PREFACE.

IN 1855, when the printing of the SEVENTH EDITION of this Dictionary had commenced, Mr. Haydn became too unwell to continue his useful labours. At the urgent request of the publisher, Mr. Edward Moxon, I undertook to continue the work and correct the press. I soon perceived the excellence of the compiler's plan, but also became aware, that in the execution of the work there was need of considerable improvement; that numerous additions were required, that much superfluous matter might be omitted: in fact, that the whole work needed a thorough revision. With the view of rendering the book more worthy of its established reputation, I have devoted much time, thought, and labour,—particularly since 1857. The chronological tables have been revised and continued; important dates have been compared with recognised authorities; about a thousand new articles have been inserted, and a large number of others re-written; much Biographical, Geographical, Literary, and Scientific information has been supplied, as well as a Table of the Countries of the World, their Population, and Governments (p. viii); and the Index has been made more useful by the insertion of Dates relating to eminent persons of past and present time. To afford room for these additions, the size of the page has been enlarged, a great number of articles condensed, and unimportant matters either printed in small type or excluded.

In the preparation of this, the ELEVENTH EDITION, the varied labours of revision, continuation, and condensation, have unremittingly proceeded; very many new articles have been supplied; and the Index has been still further enlarged. My aim, throughout, has been to make the book, not a mere Dictionary of Dates, but a Dated Encyclopædia,—a digested summary of every department of the History of the World, brought down to the very eve of the publication of each edition. The latest Additions and Corrections will be found at the end of the volume.

B. VINCENT.

PREFACE TO THE FIRST EDITION.

THE design of the Author has been to attempt the compression of the greatest body of general information that has ever appeared in a single volume, and to produce a Book of Reference whose extensive usefulness may render its possession material to every individual—in the same manner that a London *Directory* is indispensable, on business affairs, to a London merchant.

He grounds his hope of the Public taking an interest in this work altogether upon its own intrinsic utility. Its articles are drawn principally from historians of the first rank, and the most authentic annalists; and the *DICTIONARY OF DATES* will, in almost every instance, save its possessor the trouble of turning over voluminous authors to refresh his memory, or to ascertain the date, order, and features of any particular occurrence.

The volume contains upwards of *FIFTEEN THOUSAND ARTICLES*, alphabetically arranged; and, from the selection of its materials, it must be important to every man in the British Empire, whether learned or unlearned, or whether connected with the professions or engaged in trade.

It would be difficult to name all the authors from whose works the Compiler of this volume has copiously extracted; but he may mention among the classics, Herodotus, Livy, Pliny, and Plutarch. He has chosen in general chronology, Petavius, Usher, Blair, Prideaux, and the Abbé Lenglet Dufresnoy. For the events embraced in foreign history, he has relied upon Henault, Voltaire, La Combe, Rollin, Melchior Adam, the *Nouveau Dictionnaire*, and chief authors of their respective countries. On subjects of general literature, his authorities are Cave's *Historia Literaria*, Moreti, Bayle, Priestley, and others of equal repute. And English occurrences are drawn from Camden, Stow, Hall, Baker, Holinshed, Chamberlayne, Rapin, Hume, Gibbon, Goldsmith, &c. Besides these, the Compiler has freely used the various abridgments that have brought facts and dates more prominently forward; and he is largely indebted to

Chambers, Aspin, Beatson, Anderson, Beckmann, the *Cyclopædias*, *Annual Register*, *Statutes at Large*, and numerous other compilations. In almost every instance the authority is quoted for the extract made and date assigned, though inadvertence may have prevented, in some few cases, a due acknowledgment.

The leading events of every country, whether ancient or modern kingdoms, are to be found in the annals of each respectively, as in the cases, for instance, of GREECE, ROME, the EASTERN EMPIRE, ENGLAND, FRANCE, and GERMANY. But, independently of this plan of reference, when any historical occurrence claims, from its importance, more specific mention, it is made in a separate article, according to alphabetical arrangement. Thus, in the annals of England, the dates are given of the foundation of our universities, the institution of honorary orders, and signature of *Magna Charta*; we find, in those annals, the periods of our civil wars, and remarkable eras in our history, set down as they have occurred; but if more ample information be necessary to the Reader, and if he desire to know more than the mere date of any fact or incident, the particulars are supplied under a distinct head. In the same way, the pages of *Battles* supply the date of each, in the order of time; yet in all instances where the battle has any relation to our own country, or is memorable or momentous, the chief features of it are stated in another part of the volume.

The Compiler persuades himself that the *DICTIONARY OF DATES* will be received as a useful companion to all Biographical works, relating, as it does, to *things* as those do to *persons*, and affording information not included in the range or design of such publications.

LONDON, *May*, 1841.

JOSEPH HAYDN.

[Died Jan. 17, 1856.]

COUNTRIES OF THE WORLD AND THEIR GOVERNMENTS.

(Compiled from the *Almanach de Gotha* for 1863.)

COUNTRIES.	POPULATION.	RULERS.	BIRTH.	ACCESSION.
Anhalt-Bernburg, <i>Pop. in</i> Dec. 1861	57,811	Alexander, duke	March 2, 1805	March 24, 1834

Southern Confederate States 1861	9,103,014		1808	Feb. 18, 1861.

DICTIONARY OF DATES.

ABA

ABACUS, the capital of the Corinthian order in architecture, ascribed to Callimachus, about 540 B.C. *—This name is also given to a frame traversed by stiff wires, on which beads or counters are strung, frequently used in infants' schools for instruction in arithmetic. It was also used by the Greeks, Romans, Chinese, &c. M. Lalanne published an ABACUS at Paris in 1845.—The multiplication table has been called the Pythagorean abacus.

ABATTOIRS, slaughter-houses for cattle. Five near Paris were erected by decree of Napoleon I. in 1810; the finest near Montmartre. About 48,000*l.* were raised from them in 1842. An abattoir was erected at Edinburgh in 1851. Abattoirs form part of the new London Metropolitan Cattle-market, opened in June 13, 1855.

ABBASSIDES, the descendants of Mahomet's uncle, Abbas-Ben-Abdul-Motaleb. Thirty-seven caliphs of this race (including Haroun Alraschid, 786—809) reigned from 750 to 1258, when their rule was overthrown by the Mongols. See *Caliphs*.

ABBAYE, a military prison near St. Germain des Prés, Paris, where 164 prisoners were murdered by infuriated republicans led by Maillard, Sept. 2 and 3, 1792.

ABBEYS, monasteries for either men or women, governed by an abbot or abbess, were founded in the third century, near the close of which the sister of St. Anthony is said to have retired to one. An abbey was founded by St. Anthony at Phaim, in Upper Egypt, 305. The first founded in France was at Poitiers, in 360; the first in Ireland in the fifth century: see *Clogher, Elphin, Down*; the first in Scotland in the sixth century: see *Isles*; and the first in Britain in 560: see *Bangor*.—The abbey of Mount Cassino, near Naples, founded by St. Benedict about 529, was esteemed the richest in the world, and furnished many thousands of saints to the church.—110 monasteries and priories were suppressed in England by order in council, 2 Henry V. 1414. *Salmon*. These foundations (containing then about 47,721 persons) were totally suppressed throughout the realm, 31 Henry VIII. 1539. Abbeys were suppressed in France in 1790; and in the revived kingdom of Italy in 1861. See *Convents and Monasteries*. †

ABBOT (from *Ab*, father, a title adopted by the Jewish doctors), the heads of monasteries. There were cardinal abbots, bishop abbots, and mitred abbots; croziered abbots held their dignities from the pope. In England, mitred abbots were lords of parliament; twenty-seven abbots and two priors were thus distinguished in the 4th Edward III. 1329; but the number was reduced to twenty-five in the parliament 20 Richard II. 1396. *Coke*. The abbots of Reading, Glastonbury, and St. John's, Colchester, were hanged and quartered for denying the king's supremacy, and not surrendering their abbeys, 1539. See *Glastonbury*.

* Ascribed to the following incident:—On the death of a young maid of Corinth, her lover gathered the ornaments she had most valued when living, and placed them in a wicker basket, covered by a tile, upon her tomb. Close to her grave an acanthus had taken root, and the flowers shooting forth in the spring, its leaves twined around the basket, and convolved beneath the tile in the form of volutes. Callimachus took from it the model for his capital; the tile being the ABACUS, the foliage of the acanthus the volutes; the whole forming the capital. *Perault*.

† According to Tanner, they then consisted of 374 larger monasteries (revenue 104,919*l.* 13*s.* 3*d.*), 186 lesser monasteries (revenue 33,479*l.* 13*s.* 7*d.*) and 48 houses of the knights hospitallers (revenue 2385*l.* 12*s.* 8*d.*); total, houses, 608; revenue, 140,725*l.* 6*s.* 3*d.*

ABDICATIONS of sovereigns are numerous in ancient history. The most remarkable in modern history are the following :—

Stephen II., of Hungary, A.D. 1131	Victor Amadeus, of Sardinia 1730	Napoleon, of France, April 5, 1814
Albert, the Bear of Brandenburg 1142	Charles, of Naples . . . 1759	Victor Emmanuel, of Sardinia March 13, 1821
Lescov V., of Poland . . . 1200	Stanislaus, of Poland . . . 1795	Pedro IV., of Portugal, May 2, 1826
Uladislaus III., of Poland . . . 1206	Charles Emmanuel II., of Sardinia June 4, 1802	Charles X., of France, Aug. 2, 1830
John Balliol, of Scotland . . . 1306	Francis II., of Germany, who became emperor of Austria Aug. 11, 1804	Pedro I., of Brazil, April 7, 1831
Otho (of Bavaria), of Hungary 1309	Charles IV., of Spain, in favour of hisson, March 19; in favour of Bonaparte. See Spain May 1, 1808	Dom Miguel, of Portugal (by leaving it) May 26, 1834
Eric IX., of Denmark, &c. 1439	Joseph Bonaparte, of Naples (to take the crown of Spain), June 1, —	William I., of Holland, Oct. 8, 1840
Pope Felix V. . . 1449	Louis, of Holland July 1, 1810	Louis-Philippe, of France, Feb. 24, 1848
Charles V., emperor 1556	Jerome, of Westphalia, Oct. 20, 1813	Louis Charles, of Bavaria, March 21, —
Christina, of Sweden . . . 1654		Ferdinand of Austria, Dec. 2, —
John Casimir, of Poland . . . 1669		Charles Albert, of Sardinia, March 26, 1849
James II., of England . . . 1688		Leopold II., grand-duke of Tuscany . . . July, 1859
Frederick Augustus II., of Poland 1704		
Philip V., of Spain (resumed) 1724		

ABELARD AND HÉLOÏSE, celebrated for their passionate love, which commenced at Paris, 1118, when Héloïse (a canon's daughter) was under seventeen years of age. Abelard built the convent of the Paraclete and made her abbess in 1121. Here he taught what was condemned as heresy, 1122 and 1140. After suffering an ignominious injury, he became a monk of the abbey of St. Denis, and died of grief in 1142, at St. Marcel. Héloïse begged his body, and buried it in the Paraclete. She died in 1163, and was buried beside Abelard. The ashes of both were carried to the Museum of French Monuments in 1800; and the museum having been subsequently broken up, they were finally removed to the burying-ground of Père La Chaise, in 1817. Their works and letters were published in one volume in 1616: their letters have been frequently paraphrased. Pope's imitations of the latter are well known.

ABENCERAGES, a powerful Moorish tribe of Granada opposed to that of the Zegrirs. From 1480 to 1492 their quarrels deluged Granada with blood and hastened the fall of the kingdom. They were exterminated by Boabdil (Abu Abdallah), the last king, who was dethroned by Ferdinand and Isabella in 1492, when his dominions were annexed to Castile.

ABERDEEN, N. Scotland. Gregory the Great conferred peculiar privileges on Aberdeen, in 893. The university was founded by bishop William Elphinstone, who had a bull from the pope Alexander VI. in 1494. King's college was erected in 1500-6. Marischal college was founded by George Keith, earl marischal of Scotland, in 1593; rebuilt in 1837. In 1858 the universities and colleges were united by 21 & 22 Vict. c. 83.—King Malcolm III., having gained a great victory over the Danes in the year 1010, resolved to found a new bishopric, in token of his gratitude for his success, and pitched upon Mortlach, in Banffshire, where St. Beanus was first bishop, 1015. The see was removed to Aberdeen early in the twelfth century, and was discontinued at the revolution, 1689. Now a post-revolution bishopric, instituted in 1721. See *Bishops of Scotland*.

ABERDEEN ADMINISTRATION was formed in consequence of the resignation of the first Derby administration. It was sworn in Dec. 28, 1852, resigned Jan. 30, 1855, and was succeeded by the Palmerston administration, *which see*. Called the *Coalition Ministry* (as including Whigs, Radicals, and the followers of sir R. Peel).

Earl of Aberdeen, * *first lord of the treasury*.
Lord Cranworth, *lord chancellor*.
Earl Granville, *president of the council*.
Duke of Argyll, *lord privy seal*.
Lord John Russell, † *foreign*,
Viscount Palmerston, *home*, and the
Duke of Newcastle, ‡ *colonial and war secretaries*.
William Ewart Gladstone, *chancellor of exchequer*.

Sir James Graham, *first lord of the admiralty*.
Sir Charles Wood, *president of the India board*.
Edward Cardwell, *president of board of trade*.
Hon. Sidney Herbert, *secretary-at-war*.
Sir William Molesworth, *chief commissioner of works*.
Marquess of Lansdowne (without office).
Viscount Canning, lord Stanley of Alderley, right hon. Edward Sturt, &c.

ABHORRERS, a political court-party in England, in the reign of Charles II. the opponents of the Addressers (afterwards *Whigs*), so called from their address to the king.

* Born in 1784; engaged in foreign diplomacy, 1813; became foreign secretary, Jan., 1828; joined the party of sir R. Peel, 1846; died, Dec. 14, 1860.

† Lord John Russell was succeeded as foreign secretary by the earl of Clarendon, but continued a member of the cabinet, without office; he afterwards became president of the council, in the room of earl Granville, appointed to the duchy of Lancaster.

‡ On June 11, 1854, the offices were separated; the duke of Newcastle remained *secretary of war*, and sir George Grey was made *colonial secretary*.

The former (afterwards *Tories*) expressed their *abhorrence* of those who endeavoured to encroach on the royal prerogative, 1680.* *Hume*.

ABINGDON LAW. In the civil war against Charles I., lord Essex and Waller held Abingdon, in Berks; the town was unsuccessfully attacked by sir Stephen Hawkins in 1644, and by prince Rupert in 1645; on these occasions the defenders put every Irish prisoner to death without trial; hence the term "Abingdon Law."

ABJURATION. The abjuration of particular doctrines of the church of Rome was enjoined by statute 25 Charles II. 1672. The oath of abjuration of the pope and the pretender, was first administered by statute 13 William III. 1701. By 21 & 22 Vict. c. 48 (1858) an alteration in the oath was authorised for Jews.

ABO, a port of Russia, founded prior to 1157, was till 1809 capital of Swedish Finland. It has suffered much by fire, especially in 1775 and 1827. It was seized by the Russians in Feb. 1808; ceded to them in 1809; and rebuilt by them after the fire in 1827. A university was erected by Gustavus Adolphus and Christina, 1640, *et seq.*, and removed to Helsingfors in 1827. The peace of Abo between Russia and Sweden was signed in 1743.

ABORIGINES (from *ab origine*, without origin), a name given to the earliest known inhabitants of Italy (from whom came the Latini), but now applied to the original inhabitants of any country.—The Aborigines Protection Society was established in 1838. Reports on the conditions of the Aborigines in the British colonies were presented to parliament in 1834 and 1837.

ABOUKIR, Egypt; the ancient Canopus: the point of debarkation of the British expedition to Egypt under general sir Ralph Abercromby. Aboukir surrendered to the British, after an obstinate and sanguinary conflict with the French, March 8, 1801. See *Alexandria*. The bay is famous for the defeat of the French fleet by Nelson, August 1, 1798. See *Nile*. A Turkish army of 15,000 was defeated here by 5000 French under Bonaparte, July 25, 1799.

ABRAHAM, ERA OF, used by Eusebius; so called from the patriarch Abraham, anciently Abram, who died B.C. 1821. It began October 1, 2016 B.C. To reduce this era to the Christian, subtract 2015 years and three months.

ABRAHAM, HEIGHTS OF, near Quebec, Lower Canada. The French were defeated here by general Wolfe, who fell in the moment of victory, Sept. 13, 1759. See *Quebec*.

ABRAHAMITES, a sect which adopted the errors of Paulus, and was suppressed by Cyriacus, the patriarch of Antioch. In the ninth century there sprang up a community of monks under a like designation: it, too, was suppressed, or rather exterminated, for worshipping images.

ABSALOM'S REBELLION and death (1024-3 B.C.) are described in 2 *Sam.* xv.—xix.

ABSENTEE TAX (four shillings in the pound) was levied in Ireland in 1715 on the incomes and pensions of absentees (persons who derive their income from one country and spend it in another). This tax ceased in 1753. In 1773, Mr Flood, the great Irish orator, proposed a tax of 2s. in the pound. It was proposed in 1783 by Mr. Molyneux, and again lost.

ABSOLUTION, ECCLESIASTICAL. Till the third century, the consent of the congregation was necessary to absolution; but soon after, the power was reserved to the bishop; and in the twelfth century, the form "I absolve thee" had become general.

ABSTINENCE. St. Anthony lived to the age of 105, on twelve ounces of bread and water daily. James the Hermit lived in the same manner to the age of 104. St. Epiphanius lived thus to 115; Simeon the Stylite to 112; and Kentigern, commonly called St. Mungo, lived by similar means to 185 years of age., *Spottiswood*. A man may live seven, or even eleven, days without meat or drink. *Pliny, Hist. Nat. lib. ii.* Ann Moore, the fasting woman of Tutbury, Staffordshire, was said to have lived twenty months without food; but her imposture was detected by Dr. A. Henderson, Nov. 1808. At Newry, in Ireland, a man named Cavanagh was reported to have lived two years without meat or drink, Aug. 1840; his imposture was afterwards discovered in England, where he was imprisoned as a cheat, Nov. 1841. See *Fasts*.

* The commons expelled several members for being Abhorrrers, among them sir Francis Withens (whom they sent to the Tower), and prayed his majesty to remove others from places of trust. They also resolved, "that it is the undoubted right of the subject to petition for the calling of a parliament, and that to traduce such petitions as tumultuous and seditious, is to contribute to the design of altering the constitution." Oct. 1680. *Salmon*.

ABSTINENTS, a sect of ascetics that wholly abstained from wine, flesh, and marriage, appeared in France and Spain in the third century, and is said to have spread elsewhere.

ABYSSINIA, a large country in N. E. Africa. Its ancient history is very uncertain. The kingdom of Auxumitæ (from its chief town Auxume) flourished in the 1st and 2nd centuries after Christ. About 960, Judith, a Jewish princess, murdered a great part of the royal family, and reigned forty years. The young king escaped: and the royal house was restored in 1268 in the person of his descendant Icon Amlac. In the middle ages it was said to be ruled by Prester John or Prete Janni. The Portuguese missions commenced in the 15th century, but were expelled about 1632 in consequence of the tyranny of Mendez and the Jesuits. The encroachments of the Gallas and intestine disorders soon after broke up the empire into petty governments. The religion of the Abyssinians is a corrupt form of Christianity introduced about 329 by Frumentius. Missions were sent from England in 1829 and 1841. Much information respecting Abyssinia has been given by Bruce (1790), Salt (1805—9), Rüppell (1838), and Parkyns (1853).

ABYSSINIAN ERA. This era is reckoned from the period of the Creation, which the Abyssinians place in the 5493rd year before our era, on the 29th Aug. old style: and their dates consequently exceed ours by 5492 years and 125 days. To reduce Abyssinian time to the Julian year, subtract 5492 years and 125 days.

ACADEMIES. *Academia* was a shady grove without the walls of Athens (bequeathed to Academus for gymnastic exercises), where Plato first taught philosophy, and his followers took the title of Academics, 378 B.C. *Stanley*.—Rome had no academies.—Ptolemy Soter is said to have founded an academy at Alexandria, about 314 B.C. Abderahman I., caliph of Spain, founded academies about A.D. 773. Theodosius the Younger, Charlemagne, and Alfred are also named as founders of academies. Italy is celebrated for its academies; and Jarekius mentions 550, of which 25 were in the city of Milan. See *Societies*. The following are among the principal academies:—

American Academy of Sciences, Boston, 1780.
 Ancona, of the *Cuplinosi*, 1642.
 Basil, 1460.
 Berlin, Royal, 1700; of Princes, 1703; Architecture, 1799.
 Bologna, Ecclesiastical, 1687; Mathematics, 1690; Sciences and Arts, 1712.
 Brescia, of the *Erranti*, 1626.
 Brest and Toulon, Military, 1682.
 Brussels, *Belles Lettres*, 1773.
 Caen, *Belles Lettres*, 1705.
 Copenhagen, of Sciences, 1743.
 Cortona, Antiquities, 1726.
 Dublin, Arts, 1742; Royal Irish, Science and Literature, 1782; Painting, Sculpture, &c., 1823.
 Erfurt, Saxony, Sciences, 1754.
 Faenza, the *Philoponi*, 1612.
 Florence, *Belles Lettres*, 1272; *Della Crusca* (now united with the *Florentine*, and merged under that name), 1582; *Del Cimento*, 1657 (by cardinal de' Medici); Antiquities, 1807.
 Geneva, Medical, 1715.
 Genoa, Painting, &c., 1751; Sciences, 1783.
 Germany, *Natura Curiosi*, now *Leopoldine*, 1662.
 Göttingen, 1750.
 Haerlem, the Sciences, 1760.
 Irish Academy, Royal, Dublin, 1782.
 Lisbon, History, 1720; Sciences, 1779.
 London. See *Societies*. Royal Academy of Fine Arts, 1668; of Music, 1734-43; and 1822.
 Lyons, Sciences, 1710; Physic and Mathematics added, 1758.
 Madrid, the Royal Spanish, 1713; History, 1730; Painting and the Arts, 1753.
 Mannheim, Sciences, 1755; Sculpture, 1775.
 Mantua, the *Vigilanti*, Sciences, 1704.
 Marseilles, *Belles Lettres*, 1726.

Massachusetts, Arts and Sciences, 1780.
 Milan, Architecture, 1380; Sciences, 1719.
 Munich, Arts and Sciences, 1759.
 Naples, *Rossana*, 1540; Mathematics, 1560; Sciences, 1695; *Herculeum*, 1755.
 New York, Literature and Philosophy, 1814.
 Nismes, Royal Academy, 1682.
 Padua, for Poetry, 1613; Sciences, 1792.
 Palermo, Medical, 1645.
 Paris, *Sorbonne*, 1253; Painting, 1391; Music, 1543 and 1672; French (by Richelieu), 1635; Fine Arts, 1648; *Inscriptions et Belles Lettres* (by Colbert), 1663; Sciences (by Colbert), 1666; Architecture, 1671; Surgery, 1731; Military, 1751; Natural Philosophy, 1796.
 Parma, the *Annominati*, 1550.
 Prousa, *Insensati*, 1561; *Filigirti*, 1574.
 Philadelphia, Arts and Sciences, 1749.
 Portsmouth, Naval, 1722; enlarged, 1806.
 Rome, *Umoristi*, 1611; *Fantascici*, 1625; *Infecundi*, 1653; Painting, 1665; *Arcaidi*, 1690; English, 1752; *Lincei*, about 1600; *Nuovi Lincei*, 1847.
 St. Petersburg, Sciences, 1725; Military, 1732; the School of Arts, 1764.
 Stockholm, of Science, 1741; *Belles Lettres*, 1753; Agriculture, 1781; Royal Swedish, 1786.
 Toulon, Military, 1682.
 Turin, Sciences, about 1759; Fine Arts, 1778.
 Turkey, Military School, 1775.
 Upsal, Royal Society, Sciences, 1720.
 Venice, Medical, &c., 1701.
 Verona, Music, 1543; Sciences, 1780.
 Vienna, Sculpture and the Arts, 1705; Surgery, 1783; Oriental, 1820.
 Warsaw, Languages and History, 1753.
 Woolwich, Military, 1741.

ACADIA. See *Nova Scotia*.

ACANTHUS. See *Abacus*.

ACAPULCO, a celebrated prize, a Spanish galleon, from Acapulco, laden with gold and precious wares, and estimated by some annalists at 1,000,000*l.* sterling, and upwards; taken by lord Anson, who had previously acquired booty in his memorable voyage amounting to 600,000*l.* He arrived at Spithead in the *Centurion* with his gains, after having circum-navigated the globe, June 15, 1744.

ACCENTS. The most ancient manuscripts are written without accents, and without any separation of words; nor was it until after the ninth century that the copyists began to leave spaces between the words. Michaelis, after Wetstein, ascribes the insertion of accents to Euthalius, bishop of Sulca, in Egypt, A.D. 458. Accents were first used by the French in the reign of Louis XIII. (about 1610).

ACCESSION, THE. By this term is usually understood the accession of the house of Hanover to the throne of England, in the person of George I., the elector of Hanover, as the Protestant descendant of Elizabeth, the daughter of James I.; he being the son of Sophia, the daughter of that princess. He succeeded to the crown, Aug. 1, 1714, by virtue of the act of settlement passed in the reign of William III., June 12, 1701, which limited the succession to his mother in the event of queen Anne dying without issue.

ACCESSORIES to crimes. The law respecting them was consolidated and amended in 1861, by 24 & 25 Vict. c. 34.

ACCIDENTS. See *Coal, Fires, Railways*; &c.

ACCLIMATISATION OF ANIMALS. This has been prosecuted with great vigour since the establishment of the Zoological Society of London in 1829, and of the Société d'Acclimatation in Paris. Numbers of European animals have been naturalised in Australia; the camel has been conveyed to Brazil (1859); alpacas are bred at Paris; and ostriches in Italy (1859). On Oct. 6, 1860, the Bois de Boulogne, near Paris, was opened as a Zoological Garden, containing only acclimatised animals. An English acclimatisation society was founded June 10, 1860, by hon. Grantley Berkeley, Mr. J. Crockford, Mr. F. Buckland, &c. An acclimatising garden was established at Melbourne, Australia, in Feb. 1861.

ACCORDION, a small keyed wind-instrument, introduced into England from Germany about 1828.

ACCUSERS. By the occult writers, such as Agrippa, accusers are the eighth order of devils, whose chief is called Asteroth, or Spy. In the Revelation, ch. xii. 10, the devil is called "the accuser of the brethren."—False accusers were to be hanged, by 24 Henry VI. 1446; and burnt in the face with an F, by 37 Henry VIII. 1545. *Stow.*

ACELDAMA (CHAKELDAM), the field bought with the thirty pieces of silver given to Judas Iscariot for betraying Christ. It is still shown to travellers, and being small, is covered with an arched roof, and retains the name Aceldama, that is "the field of blood," to this day. *Matthew* xxvii. 8; *Acts* i. 19.—This name was given to an estate purchased by Judge Jeffreys after the "bloody assizes" in 1685.

ACHAIA, N. Peloponnesus, Greece; the capital was settled by Achæus, the son of Xuthus, about 1330 B.C. (?) The kingdom was united with Sicyon or subject to the Ætolians until about 284 B.C. The Achæi, descendants of Achæus, originally inhabited the neighbourhood of Argos; but when the Heracidae drove them thence, they retired among the Ionians, expelled the natives, and seized their thirteen cities, viz., Pellene, Ægira, Ægium, Bura, Tritæa, Leontium, Rhypes, Cerynea, Olenos, Helice, Patræ, Dyme, and Pharæ.—The Swiss Cantons and the United States of America somewhat resemble the Achæan league, which was originally a union of independent republics.

Achaia invaded by Epaminondas.	B.C. 366	Alliance with the Romans	B.C. 198
The Achæan league revived	about 280	Philopemen defeated by Nabis in a naval battle	194
Joined by other cities	276	Sparta joined to the league	191
Aratus made prætor	245	Philopemen, a prisoner, killed by the Messenians	183
The league joined by Corinth, &c.	243-239	The Achæans overrun Messenia with fire and sword	182
Supported by Athens and Antigonus Doson	229	The Romans enter Achaia, and carry off numbers of the people, among whom is the celebrated Polybius	165
War with the Spartans	227-224	Metellus enters Greece	147
Defeat of the Achæans by the Spartans	226	The Achæans defeated by Mummius at Leucopetra; league dissolved by Mummius, then Corinth taken; Greece subjected to Rome, and named the province of Achaia	146
Battle of Sellasia; Spartans defeated	222	Achaia made a Latin principality	A.D. 1205
The Social War begun; battle of Caphyæ, in Arcadia; Aratus defeated	220	Conquered by the Turks	about 1540
The Peloponnesus ravaged by the Ætolians	219		
Aratus poisoned at Argium	213		
Battle of Mantinea; Philopemen defeats the Spartan tyrant Machanidas	208		

ACHONRY, Sligo, N. Ireland; a bishopric founded by St. Finian, who erected the church of Achad, usually called Achonry, about 520, and conferred it on his disciple Nathy, in Irish, Dathy, or David, the first bishop. In ancient annals the prelates are mostly called bishops of Luigny, or Liny. The see has been held with Killala since 1612. See *Killala*.

ACHROMATIC TELESCOPES, in which aberrations in colour are remedied, were contrived by John Dollond, whose experiments were published in the *Phil. Trans.*, 1753-8. See *Telescopes*.

ACOLYTES, an inferior order of clergy in the Latin church, unknown to the Greek Church for 400 years after Christ.

ACOUSTICS (from *akouō*, Greek, I hear). The science of sound, so named by Sauveur in the 17th century. The doctrine of the different sounds of vibrating strings and communication of sounds to the air by the vibrations of the atmosphere, was probably first explained by Pythagoras about 500 B.C. Mentioned by Aristotle, 330 B.C.

The speaking-trumpet is said to have been used by Alexander the Great, 335 B.C. The discoveries of Galileo were made about A.D. 1600.

Galileo's theorem of the harmonic curve was demonstrated by Dr. Brook Taylor, in 1714; and further perfected by D'Alembert, Euler, Bernoulli, and La Grange, at various periods of the eighteenth century.

Hooker produces sounds by the striking of the teeth of brass wheels, 1681.

Sauveur determined the number of vibrations belonging to a given note, about 1700.

Velocity of sound said to be 1,173 feet in a second, by Gassendi; 1,172 feet by Cussini, Römer and others; 958 by Newton, about 1700.

Chladni (who raised acoustics to an independent science) published his important discoveries on the figures produced in layers of sand by harmonic chords, &c., in 1787, and since.

Cagniard-Latour invented the *sirène* (which see), 1819. Biot, Savart, Wheatstone, Lissajous, Helmholtz, and others in the present century have greatly increased our knowledge of acoustics.

ACRE. This measure was formerly of uncertain quantity, and differed in various parts of the realm, until made standard by statute 31 Edward I. 1303, and fixed at 40 poles or perches in length, and 4 in breadth—or 160 square poles, containing 4840 square yards, or 43,560 square feet. In certain counties and places the measure is larger. *Pardon*.

ACRE, Acca, anciently Ptolemais, in Syria, was taken by the crusaders under Baldwin I. in 1104, and again by Richard I. and other crusaders, July 17, 1191, and after a siege of two years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named St. John d'Acre. Retaken by the Saracens in 1291, when 60,000 Christians perished. This capture was rendered memorable by the murder of the nuns, who had mangled their faces to repress the lust of the infidels.—Acre was gallantly defended by Djeddar Pacha against Bonaparte in July, 1798. It was relieved by sir Sidney Smith, who gallantly resisted twelve attempts during the memorable siege by the French, between March 16 and May 20, 1799; till, baffled by the British squadron on the water and the Turks on land, Bonaparte retreated.—**ST. JEAN D'ACRE**, as a pachalic subject to the Porte, was seized July 2, 1832, by Ibrahim Pacha, who had revolted. On Nov. 3, 1840, it was stormed by the British fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000 prisoners, while the British had but twelve killed and 42 wounded. See *Syria and Turkey*.

ACROPOLIS, the citadel of Athens, was built on a rock, and accessible only on one side; Minerva had a temple at the bottom. The roof of this vast pile, which had stood 2000 years, was destroyed in the Venetian siege, A.D. 1687. *Aspin*.

ACTA SANCTORUM (acts of the saints), a work commenced by the Jesuits in the seventeenth century. The first volume appeared in 1643: the publication was interrupted in 1734, when the fifty-third volume was published, but was resumed in 1846, and is still in progress: having advanced in the order of the months as far as October. From one of the first editors, Bolland, the writers have been named *Bollandists*.

ACTINOMETER, an instrument to measure the power of the solar rays, invented by sir J. F. Herschel, about 1825. See *Sun*.

ACTIUM (a promontory of Acarnania, W. Greece), near which was fought, on Sept. 2, 31 B.C., the battle between the fleets of Octavianus Cæsar on the one side, and of Marc Antony and Cleopatra on the other, which decided the fate of Antony; 300 of his galleys going over to Cæsar. This victory made Octavianus master of the world, and the Roman empire is commonly dated from this year. The conqueror built Nicopolis (the city of victory), and instituted the Actian games. *Blair*.

ACTRESSES appear to have been unknown to the ancients; men or eunuchs performing the female parts. Charles II. is said to have first encouraged the public appearance of women on the stage in England, in 1662; but the queen of James I. had previously performed in a theatre at court. *Theat. Biog.* Mrs. Coleman was the first actress on the stage; she performed the part of *Iunthe* in Davenant's "Siege of Rhodes," in 1656. *Victor*.

ACTS OF PARLIAMENT, OR STATUTES. See *Parliament*. The following are among the most celebrated early statutes :—

Statutes of Clarendon, to restrain the power of the clergy, enacted in 10 Hen. II., 1164. Provisions of Merton, 1235-6. Statute of Marlborough, 1267. Of Bigamy, 1275-6. Of Gloucester, the earliest statute of which any record exists, 6 Edw. I., 1278. Of Mortmain, 1279. Quo Warranto, Oct. 1280. Statutes of Wales, 1284. Of Winchester, Oct. 1284. Of Westminster, 1285. Statute forbidding the levying of taxes without the consent of parliament, 1297. Magna Charta, 1297. Of Præmunire, 1366.

Between 1823 and 1829, 1126 acts were wholly repealed, and 443 repealed in part, chiefly arising out of the consolidation of the laws by Mr. (afterwards sir Robert) Peel; of these acts, 1344 related to the kingdom at large, and 223 to Ireland solely; and in 1856 many obsolete statutes (enacted between 1285 and 1777) were repealed. By the Statute Law Revision Act, 770 acts were wholly repealed, and a great many partially, 1861.

The greatest number of acts passed in any one year since 1800, was 570, in 1846 (the railway year);

402 were local and personal, 51 private, and 117 public acts. In 1841, only 13 were passed (the lowest number), of which two were private. In three instances only, the annual number was under a hundred. The average number of the first ten years of the present century was 132 public acts. In the ten years ending 1850, the average number of acts, of public interest, was 112.

The number of public general acts passed in 1851 was 106; in 1852, 88; in 1853, 137; in 1854, 125; in 1855, 134; in 1856, 120; in 1857, 86; in 1858, 109; in 1859, 101; in 1860, 154; and in 1861, 134. In 1850, 13 Vict. c. 13, was passed to curtail *Repetitions* in statutes.

Statutes first printed in the reign of Richard III., 1483. Statutes of the Realm, from Magna Charta to George I., printed from the original records and MSS. in 12 vols. folio, under the direction of commissioners appointed in 1801, 1811—28.

The statutes passed during each session are now printed annually in 4to. and 8vo. Abstracts are given in the *Cabinet Lawyer*.

ACTS, in dramatic poetry, first employed by the Romans. *Five* acts are mentioned by Horace (*Art of Poetry*) as the rule (about B.C. 8).

ADAM AND EVE, ERA OF, set down by most Christian writers as being 4004 B.C. There have been as many as one hundred and forty opinions on the distance of time between the creation of the world and the birth of the Redeemer: some make it 3616 years, and some as great as 6484 years. See *Creation*.

ADAMITES, a sect about A.D. 130. They assembled quite naked in their places of worship, asserting that if Adam had not sinned there would have been no marriages. Their chief was named Prodicus; they defied the elements, rejected prayer, and said it was not necessary to confess Christ. *Eusebius*. A somewhat similar sect arose at Antwerp in the twelfth century, under a chief named Tandemus, or Tanchelin, whose followers, 3000 soldiers and others, committed many crimes under spiritual names. The sect became extinct soon after the death of its chief; but another of the same kind, named Turlupins, appeared shortly after in Savoy and Dauphiny. A Fleming, named Picard, again revived this sect in Bohemia, in the fifteenth century, whence it spread into Poland and existed some time.

ADDINGTON ADMINISTRATION, succeeded Mr. Pitt, who, having engaged to procure Roman Catholic emancipation to secure the union with Ireland, and being unable to do so as a minister, resigned. A new ministry was formed March, 1801, and terminated May 11, 1804.

Henry Addington, * *first lord of the treasury and chancellor of the exchequer*.
Lord Eldon, *lord chancellor*.
Duke of Portland, *lord president*.
Earl of Westmoreland, *lord privy seal*.
Lord Pelham, *home secretary*.

Lord Hawkesbury, *foreign secretary*.
Lord Hobart, *colonial secretary*.
Earl St. Vincent, *admiralty*.
Earl of Chatham, *ordnance*.
Charles Yorke, *secretary-at-war*.
Viscount Lewisham, *lord Auckland, &c.*

ADDISCOMBE COLLEGE, near Croydon, Surrey, established by the East India Company, in 1809, for the education of candidates for the scientific branches of the Indian army, was closed in 1861.

ADELAIDE, the capital of South Australia, was founded in 1836. It contained 14,000 inhabitants in 1850, and 18,259 in 1855.

ADELPHI (Greek for brothers), a series of streets on the south side of the Strand, London, erected about 1768 by the brothers, John, Robert, James, and William Adam, after whom the streets are named. They form a grand beginning of the architectural embankment of the Thames. See *Theatres*.

ADEN, a free port on the S. W. corner of Arabia, where in 1837 a British ship was wrecked and plundered. The sultan promised compensation, and agreed to cede the place to the English. The sultan's son refusing to fulfil this agreement to captain Haynes, a naval and military force, under captain H. Smith, of the *Volage*, was despatched to Aden, which captured it, Jan. 19, 1839. It is now a coal depôt for Indian steamers, &c.

* Born 1757; became viscount Sidmouth in 1805; held various offices afterwards, and died in 1844. His circular to the lords lieutenants, dated March 27, 1817, directing them to adopt severe measures against the authors of blasphemous and seditious pamphlets, was greatly censured, and not carried into effect.

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN. The following were the prime ministers, or favourites, or the chiefs of administrations, in the respective reigns. For a fuller account of each administration since 1700, see articles headed with the name of the **PREMIER** throughout the volume. The average duration of a ministry has been set down at four, five, and six years; but instances have occurred of the duration of a ministry for much longer periods: sir Robert Walpole, minister from 1721 to 1742 (21 years). Mr. Pitt, 1783 to 1801 (18 years), and lord Liverpool's administration, 1812 to 1827, (15 years). Several ministries have not endured beyond a few months, as the Coalition Ministry in 1783, and the "Talents" Ministry in 1806. The "Short-lived" Administration lasted Feb. 10 to 12, 1746.

KING HENRY VIII.

Archbishop Warham; Bishops Fisher and Fox; the earl of Surrey, &c. A.D. 1509
Cardinal Thomas Wolsey, &c. 1514
Earl of Surrey; Tunstall, bishop of London, &c. 1523
Sir Thomas More; bishops Tunstall and Gardiner, and Cranmer, *afterwards* archbishop of Canterbury 1529
Archbishop Cranmer; lord Cromwell, *afterwards* earl of Essex; Thomas Boleyn, earl of Wiltshire, &c. 1532
Thomas, duke of Norfolk; Henry, earl of Surrey; Thomas, lord Audley; bishop Gardiner; sir Ralph Sadler, &c. 1540
Lord Wriothesley; Thomas, duke of Norfolk; lord Lisle; sir William Petre; sir William Paget, &c. 1544

KING EDWARD VI.

Lord Wriothesley, *now* earl of Southampton, lord chancellor (expelled); Edward, earl of Hertford, lord protector, created duke of Somerset; John, lord Russell; Henry, earl of Arundel; Thomas, lord Seymour; sir William Paget; sir William Petre, &c. 1547
John Dudley, late lord Lisle and earl of Warwick, created duke of Northumberland; John, earl of Bedford; bishop Goodrich, sir William Cecil, &c. 1551

QUEEN MARY.

Stephen Gardiner, bishop of Winchester; Edmund Bonner, bishop of London; William, marquess of Winchester; sir Edward Hastings, &c. 1554

QUEEN ELIZABETH.

Sir Nicholas Bacon; Edward, lord Clinton; sir Robert Dudley, *afterwards* earl of Leicester; sir William Cecil, *afterwards* lord Burleigh, &c. 1558
Sir William Cecil, *now* lord Burleigh (who continued minister during nearly the whole of this long reign); sir Nicholas Bacon, &c. 1572
William, lord Burleigh; sir Thomas Bromley; Robert Devereux, earl of Essex (a favourite); earl of Leicester; earl of Lincoln; sir Walter Mildmay; sir Francis Walsingham, &c. 1579
Lord Burleigh; Robert, earl of Essex; sir Christopher Hatton, &c. 1587
Thomas Sackville, lord Buckhurst, *afterwards* earl of Dorset; sir Thomas Egerton, *afterwards* lord Ellesmere and viscount Brackley; sir Robert Cecil, &c. 1599

KING JAMES I.

Thomas, earl of Dorset; Thomas, lord Ellesmere; Charles, earl of Nottingham; Thomas, earl of Suffolk; Edward, earl of Worcester; Robert Cecil, *afterwards* earl of Salisbury, &c. 1603
Robert Cecil, earl of Salisbury; Thomas, lord Ellesmere; Henry, earl of Northampton; Charles, earl of Nottingham; Thomas, earl of Suffolk, &c. 1609
Henry, earl of Northampton; Thomas, lord Ellesmere; Edward, earl of Worcester; sir

Ralph Winwood; Charles, earl of Nottingham; Robert, viscount Rochester, *afterwards* earl of Somerset, &c. A.D. 1612
Thomas, lord Ellesmere; Thomas, earl of Suffolk; Charles, earl of Nottingham; sir George Villiers (a favourite), *afterwards* viscount Villiers, and successively earl, marquess and duke of Buckingham 1615
Sir Henry Montagu, *afterwards* viscount Mandeville and earl of Manchester 1620
Lionel, lord Cranfield, *afterwards* earl of Middlesex; Edward, earl of Worcester; John, earl of Bristol; John Williams, dean of Westminster; George Villiers, *now* marquess of Buckingham; sir Edward Conway, &c. 1621

KING CHARLES I.

Richard, lord Weston, *afterwards* earl of Portland; sir Thomas Coventry, *afterwards* lord Coventry; Henry, earl of Manchester (succeeded by James, earl of Marlborough, who, in turn, gave place to Edward, lord, *afterwards* viscount, Conway); William Laud, bishop of London; sir Albert Morton, &c. 1628
William Laud, *now* archbishop of Canterbury; Francis, lord Cottington; James, marquess of Hamilton; Edward, earl of Dorset; sir John Coke; sir Francis Windebank, &c. 1635
William Juxon, bishop of London; sir John Finch, *afterwards* lord Finch; Francis, lord Cottington; Wentworth, earl of Strafford; Algernon, earl of Northumberland; James, marquess of Hamilton; Laud, archbishop of Canterbury; sir Francis Windobank; sir Henry Vane, &c. 1640
The king beheaded, Jan. 30, 1649.

COMMONWEALTH.

Oliver Cromwell, protector; named a council, the number at no time to exceed twenty-one members, or be less than thirteen 1653
Richard Cromwell, son of Oliver, succeeded on the death of the latter. A council of officers ruled at Wallingford House 1658

KING CHARLES II.*

Sir Edward Hyde, *afterwards* earl of Clarendon; George Monk, created duke of Albemarle; Edward Montagu, created earl of Sandwich; lord Saye and Sele; earl of Manchester; lord Seymour; sir Robert Long, &c. 1660
George Monk, duke of Albemarle, made first commissioner of the treasury, &c. 1667
The "CAROL" Ministry. Sir Thomas Clifford, *afterwards* lord Clifford (C); Anthony Ashley, *afterwards* earl of Shaftesbury (A); George Villiers, duke of Buckingham (B); Henry, lord Arlington, *afterwards* earl of Arlington (A); and John, duke of Lauderdale (L). This private council obtained the name of the *Carol* from the initial letters of their five names, which composed the word. *Idem* 1670
Thomas, lord Clifford; Anthony, earl of Shaftesbury; Henry, earl of Arlington; Arthur, earl of Anglesey; sir Thomas Osborne, created

* Until the Restoration, there was not in fact anything that could be exclusively called a Cabinet. The sovereign had latterly governed by a collection of privy councillors, sometimes of larger, sometimes of smaller number, the men and offices being frequently changed.

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN, *continued.*

viscount Latimer; rt. hon. Henry Coventry; sir George Carteret; Edward Seymour, &c. . . 1672
 Thomas, viscount Latimer, *afterwards* earl of Danby, made lord high treasurer June 26, 1673
 Arthur, earl of Essex (succeeded by Lawrence Hyde, *afterwards* earl of Rochester); Robert, earl of Sunderland, *vice* sir Joseph Williamson, &c. . . 1679

[The king nominated a new council on April 21, consisting of thirty members only, of whom the principal were the great officers of state and great officers of the household] —

Sidney, lord Godolphin; Lawrence, earl of Rochester; Daniel, earl of Nottingham; Robert, earl of Sunderland; sir Thomas Chicheley; George, lord Dartmouth; Henry, earl of Clarendon; earls of Bath and Radnor, &c. . . 1684

KING JAMES II.

Lawrence, earl of Rochester; George, marquess of Halifax; sir George Jeffreys, *afterwards* lord Jeffreys; Henry, earl of Clarendon; sir John Ernley; viscount Preston, &c. . . 1685

The earl of Rochester was displaced, and John, lord Belasyse, made first commissioner of the treasury in his room, Jan. 4; the earl of Sunderland made president of the council; viscount Preston, secretary of state; and various other changes took place in this and the following year . . . 1687

[The king left Whitehall in the night of Dec. 17, and quitting the kingdom, landed at Ambleteuse, in France, on Dec. 23, 1688.]

KING WILLIAM III.

Charles, viscount Mordaunt; Thomas Osborne, earl of Danby, created marquess of Carmarthen, *afterwards* duke of Leeds; George, marquess of Halifax; Arthur Herbert, *afterwards* lord Torrington; earls of Shrewsbury, Nottingham and Sunderland; earl of Dorset and Middlesex; William, earl (*afterwards* duke) of Devonshire; lord Godolphin; lord Montagu; lord De la Mere, &c. . . 1689

Sidney, lord Godolphin; Thomas, earl of Danby; rt. hon. Richard Hampden; Thomas, earl of Pembroke; Henry, viscount Sydney; Daniel, earl of Nottingham, &c. . . 1690

Sir John Somers became lord Somers in 1697, and lord chancellor; Charles Montagu, *afterwards* lord Halifax, was made first commissioner of the treasury, May 1, 1698, succeeded by Ford, earl of Tankerville, in 1699.

QUEEN ANNE.

Sidney, lord (*afterwards* earl of) Godolphin; Thomas, earl of Pembroke; John Sheffield, marquess of Normanby, *afterwards* duke of Normanby and Buckingham; hon. Henry Boyle; sir Charles Hedges; and the earl of Nottingham; the latter succeeded by Robert Harley, created earl of Oxford, &c. . . May, 1702

Robert, earl of Oxford; sir Simon (*afterwards* lord) Harcourt; duke of Normanby and Buckingham; lord Dartmouth; Henry St. John, *afterwards* viscount Bolingbroke; Robert Benson, *afterwards* lord Bingley, &c. . . June 1, 1711

Charles, duke of Shrewsbury, made lord treasurer three days before the queen's death . . . July 30, 1714

KING GEORGE I.

Charles, earl of Halifax (succeeded on his death by the earl of Carlisle); William, lord (*afterwards* earl) Cowper; Daniel, earl of Nottingham; Thomas, marquess of Wharton; James Stanhope, *afterwards* earl Stanhope; Charles, viscount Townshend; sir Richard Onslow; rt. hon. Robert Walpole; Mr. Pulteney, &c. . . —

Rt. hon. Robert Walpole, first lord of the treasury and chancellor of the exchequer, &c. . . 1715

Rt. hon. James (*afterwards* earl) Stanhope; William, lord Cowper; Charles, earl of Sunderland; lord Berkeley; Joseph Addison, &c. . . 1717
 Charles, earl of Sunderland; Thomas, lord Parker; the earl Stanhope; lord Berkeley; Mr. Craggs; Mr. Aislable, &c. . . 1718

Rt. hon. Robert Walpole, *afterwards* sir Robert Walpole, and earl of Orford; Thomas, lord Parker, *afterwards* earl of Macclesfield; earl of Berkeley; lord Carteret; viscount Townshend; viscount Torrington, &c. . . 1721

KING GEORGE II.

Rt. hon. sir Robert Walpole, *continued* . . . 1727
 [Sir Robert remained prime minister twenty-one years; numerous changes occurring in the time. See *Walpole*.]

Earl of Wilmington; lord Hardwicke; earl Gower; Mr. Sandys; earl of Harrington; duke of Newcastle; Mr. Pelham, &c. . . 1742

Rt. hon. Henry Pelham, in the room of earl of Wilmington, deceased . . . Aug. 1743

The "BROAD BOTTOM" administration—Henry Pelham; lord Hardwicke; dukes of Dorset, Montagu, Bedford, Grafton and Argyll; earl Gower; duke of Newcastle, &c. . . Nov. 1744

The "SHORT-LIVED" administration—earl of Bath; lord Winchelsea; and lord Granville, . . . Feb. 10-12, 1746

Rt. hon. Henry Pelham, &c., returned to power . . . Feb. 12, —

Thomas Holles Pelham, duke of Newcastle; earl of Holderness; Henry Bilson Legge; sir Thomas Robinson, *afterwards* lord Grantham; lord Granville; lord Anson; lord Hardwicke; lord Halifax; rt. hon. George Grenville, &c. . . April, 1754

Duke of Devonshire; rt. hon. William Pitt; earl of Holderness; dukes of Rutland and Grafton; Mr. Legge; earl Gower, &c. . . Nov. 1756

Duke of Newcastle, and Mr. Pitt, *afterwards* earl of Chatham; earl Temple; earl of Holderness; lord Henley; earls Gower and Halifax; rt. hon. Henry Fox, *afterwards* lord Holland, &c. . . June, 1757

KING GEORGE III.

Duke of Newcastle's and Mr. Pitt's ministry, *continued* . . . 1760

Earl of Bute; lord Henley; sir Francis Dashwood; lord Granville; earls of Halifax and Egremont; lords Sandys and North; rt. hon. George Grenville, &c. . . May, 1762

Rt. hon. George Grenville; earls of Halifax and Sandwich; lord Henley; earl Gower; lord Egmont; lord Holland; marquess of Granby; lord North, &c. . . May, 1763

Marquess of Rockingham; earl of Winchelsea and Nottingham; hon. Henry Seymour Conway; duke of Grafton; hon. Charles Townshend; earl of Northampton, &c. . . July, 1765

Earl of Chatham; duke of Grafton; earl of Shelburne; lord North; lord Camden; gen. Conway; sir Charles Saunders; marquess of Granby; hon. Charles Townshend; lord Hillsborough, &c. . . Aug. 1766

Duke of Grafton; lord North; earl Gower; earl of Chatham; earl of Shelburne; viscount Weymouth; marquess of Granby; sir Edward Hawke; Thomas Townshend; lord Sandwich, &c. . . Dec. 1767

Frederick, lord North; earl of Halifax; earl Gower; lords Hillsborough, Weymouth, Rochford and Granby; sir Edward Hawke; lord Apsley; sir Gilbert Elliot, &c. . . Jan. 1770

[Lord North was minister eleven years, during the whole of the American war. The changes within this period were numerous.]

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN, *continued.*

Marquess of Rockingham; lord John Cavendish; lord Camden; duke of Grafton; William, earl of Shelburne; rt. hon. Charles James Fox; rt. hon. Augustus Keppel; duke of Richmond; rt. hon. Thomas Townshend; rt. hon. Isaac Barré; rt. hon. Edmund Burke, &c. March, 1782

Earl of Shelburne (*afterwards* marquess of Lansdowne); rt. hon. William Pitt; lord Camden; lord Thurlow; duke of Grafton; lord Grantham; viscount Koppel; rt. hon. Henry Dundas, &c. July, —

The "COALITION MINISTRY," duke of Portland; lord North; Charles James Fox; lord Stormont; earl of Carlisle; lord John Cavendish; viscount Townshend; rt. hon. Charles Townshend; Edmund Burke, &c. April, 1783

Rt. hon. William Pitt; earl Gower; duke of Rutland; marquess of Carmarthen; earl Temple (succeeded by lord Sydney); viscount Howe; lord Mulgrave; lord Thurlow; rt. hon. William Wyndham (*afterwards* lord Grenville); Henry Dundas, &c. Dec. —

[During Mr. Pitt's long administration, numerous changes in the ministry took place.]

Rt. hon. Henry Addington; duke of Portland; earl of Westmorland; lord Polham; lord Eldon; lord Hawkesbury; lord Hobart; earl St. Vincent; earl of Chatham; rt. hon. Charles Yorke; viscount Lewisham; lord Auckland, &c. March, 1801

Rt. hon. William Pitt; lord Eldon; duke of Portland (succeeded by lord Sidmouth, *late* Mr. Addington); earl of Westmorland; lord Hawkesbury; lord Harrowby (succeeded by lord Mulgrave); earl Camden (succeeded by viscount Castlereagh); viscount Melville (succeeded by lord Barham); duke of Montrose; lord Mulgrave; rt. hon. Mr. Dundas; rt. hon. George Canning, &c. May, *et seq.* 1804

[The death of Mr. Pitt, Jan. 23, 1806, led to the formation of another cabinet.]

"ALL THE TALENTS" administration — lord Grenville; lord Henry Petty; lord Erskine; earl Fitzwilliam; viscount Sidmouth; Charles James Fox; earl Spencer; William Windham; earl of Moira; sir Charles Grey (*afterwards* viscount Howick and earl Grey); lord Minto; lord Auckland, &c. — Lord Ellenborough, *lord chief justice, had a seat in the cabinet. Feb. 1806

[The death of Mr. Fox, Feb. 13, led to numerous changes in the cabinet.]

Duke of Portland; lord Eldon; earl Camden; earl of Westmorland; hon. Spencer Perceval; lord Hawkesbury; viscount Castlereagh; Mr. Canning; earl of Chatham; earl Bathurst; Mr. Dundas; lord Mulgrave, &c.* March, 1807

Rt. hon. Spencer Perceval; earl Camden; earl of Westmorland; lord Eldon; hon. Richard Ryder; marquess Wellesley; earl of Liverpool; lord Mulgrave; Mr. Dundas; earl Bathurst; earl of Chatham; viscount Palmerston, &c., Nov. and Dec. 1809

THE REGENCY.

Mr. Spencer Perceval (shot by Bellingham, May 11, 1812), &c., *continued*. Feb. 5, 1811

Earl of Liverpool; lord Eldon; earl of Harrowby; earl of Westmorland; Mr. Vansittart; earl of Mulgrave; lord Melville; viscount Sidmouth; viscount Castlereagh; earl Bathurst; earl of Buckinghamshire; marquess Camden; lord Palmerston, &c. May, June, 1812

KING GEORGE IV.

Earl of Liverpool, &c., *continued*. Jan. 29, 1820

[During lord Liverpool's long administration,

numerous changes in, and accessions to, office occurred; they included the following names: Mr. Charles Bragge Bathurst; Mr. William Wellesley Pole, *afterwards* lord Maryborough and earl of Mornington; Mr. Canning; Mr. Frederick John Robinson, *afterwards* lord Goderich and earl of Ripon; duke of Wellington; Mr. *afterwards* sir Robert Peel; Mr. Charles Watkin Williams Wynn, &c. Lord Liverpool's ministry endured fifteen years.]

Rt. hon. George Canning; lord Lynnhurst; earl of Harrowby; duke of Portland; lord Dudley; viscount Goderich; Mr. Sturges Bourne; Mr. Wynn; Mr. Huskisson; lord Bexley; lord Palmerston; duke of Clarence, &c. April, 1827

On the death of Mr. Canning — viscount Goderich; duke of Portland; earl of Carlisle; lord Lyndhurst; viscount Dudley; viscount Palmerston; marquess of Lansdowne; Mr. Huskisson; Mr. Charles Grant, &c. August, —

Duke of Wellington; lord Lyndhurst; earl Bathurst; lord Ellenborough; Mr. Goulburn; Mr. Peel; earl Dudley; Mr. Huskisson; Mr. Grant, *afterwards* lord Glenelg; lord Palmerston; earl of Aberdeen; Mr. Horries; Mr. Arbuthnot, &c. Jan. 1828

Duke of Wellington; lord Lyndhurst; earl of Aberdeen; earl Bathurst; Mr. Peel; sir George Murray; lord Ellenborough; viscount Lowther; viscount Melville; sir Henry Hardinge, May and June, —

[This last remodelling of the ministry was consequent upon the retirement of the earl of Dudley; lord Palmerston; Mr. Grant; and Mr. Huskisson]. May and June, —

KING WILLIAM IV.

Duke of Wellington, &c., *continued*. June 26, 1830

Earl Grey; marquess of Lansdowne; viscount Althorpe; earl of Durham; viscounts Melbourne, Palmerston, and Goderich; sir James Graham; Mr. Grant; lord Auckland; lord John Russell; lord Brougham, &c. Nov. —

[Earl Grey resigns office, owing to a majority against him in the lords, on a question relating to the Reform Bill, May 10, 1832; but he resumes his post May 18, following.]

Viscount Melbourne; marquess of Lansdowne; earl Mulgrave; viscount Althorpe; viscount Palmerston; viscount Duncannon; Mr. Spring Rice; lord Brougham; lord John Russell; lord Auckland; sir John Hobhouse; Mr. Ellice; Mr. Grant; Mr. Littleton, &c. July, 1834

[Viscount Melbourne's administration dissolved. The duke of Wellington takes the helm of state provisionally, waiting the return of sir Robert Peel from Italy.]

Sir Robert Peel; lord Wharncliffe; earl of Rosslyn; lord Lyndhurst; Mr. Goulburn; duke of Wellington; earl of Aberdeen; earl de Grey; rt. hon. Alexander Baring; lord Ellenborough; sir George Murray, &c. Nov. and Dec. —

Viscount Melbourne; marquess of Lansdowne; viscount Duncannon; Mr. Spring Rice; lord John Russell; viscount Palmerston; lord Glenelg (*late* Mr. Charles Grant); earl of Minto; sir John Hobhouse; Mr. Poulett Thomson; lord Holland; viscount Howick; Sir Henry Parnell; Mr. Labouchere; lord Morpeth, &c. April, 1835

Sir Charles C. Pepys, created lord Cottenham, and made lord chancellor Jan. 1836

QUEEN VICTORIA.

Viscount Melbourne, &c. *continued*. June 20, 1837

[Among the subsequent accessions and changes, were the following: rt. hon. F. T. Baring; mar-

* The duel between lord Castlereagh and Mr. Canning, Sept. 22, 1809, led to the breaking up of this administration.

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN, *continued.*

- quess of Normanby (late Earl of Mulgrave); earl of Clarendon; Mr. T. B. Macaulay, &c.]
- [Viscount Melbourne resigns, and sir Robert Peel receives the queen's commands to form a new administration, May 8. This command is withdrawn, and on May 10, lord Melbourne and his friends return to power] 1839
- Sir Robert Peel; duke of Wellington; lord Wharncliffe; lord Lyndhurst; duke of Buckingham; sir James Graham; earl of Aberdeen; lord Stanley; Mr. Goulburn; earl of Haddington; earl of Ripon; sir George Murray; sir Henry Hardinge; lord Ellenborough, &c.
- Aug. and Sept. 1841
- [Among the many succeeding changes were: lord Fitzgerald; duke of Buccleuch; earl of Dalhousie; Mr. Sidney Herbert; Mr. W. E. Gladstone, &c.]
- Lord John Russell; marquess of Lansdowne, earl of Minto; lord Cottenham; sir George Grey; viscount Palmerston; earl Grey; Mr. (now sir Charles) Wood; earl of Auckland; sir John Hobhouse; earl of Clarendon; lord Campbell; viscount Morpeth (*afterwards* earl of Carlisle); marquess of Clanricarde; Mr. Macaulay; Mr. Labouchere, &c. July, 1846
- [Among the accessions to office in the Russell ministry were: earl Granville; sir Francis Baring; Mr. Fox Maule; earl of Carlisle; sir Thomas Wylde, created lord Truro, &c.]
- [Feb. 24. Lord John Russell announced to the commons, and the marquess of Lansdowne to the lords, that the ministers had resigned, owing to their defeat on Mr. Locke King's motion respecting the franchise, the majority against them being 48 (100 to 52); and on March 3, the same personages informed parliament, that it having been found impossible to construct a coalition ministry, the queen, by the advice of the duke of Wellington, had called upon her late ministers to resume office. Lord Stanley had been charged by her majesty, in the interval, to form a new cabinet, but had not succeeded] 1851
- Lord John Russell and his colleagues *continued.*
- Lord John Russell; marquess of Lansdowne; earl of Minto; lord Truro; sir Charles Wood; sir George Grey; viscount Palmerston (succeeded by earl Granville); earl Grey; sir Francis Thornhill Baring; lord Broughton (late Sir John Hobhouse); Henry Labouchere (since lord Taunton); Fox Maule (since lord Panmure); marquess of Clanricarde; marquess of Anglesea, &c. March, —
- Earl of Derby (late lord Stanley); lord St. Leonards; earl of Lonsdale; marquess of Salisbury; rt. hon. Benjamin Disraeli; rt. hon. Spencer Horatio Walpole; earl of Malmesbury; sir John Pakington; duke of Northumberland; rt. hon. John C. Herries; rt. hon. Joseph Warner Henley; earl of Hardwicke; rt. hon. William Beresford, &c. Feb. 27, 1852
- Earl of Aberdeen; lord John Russell; visc. Palmerston; sir Jas. Graham; Mr. Gladstone; marquess of Lansdowne; lord Cranworth; duke of Newcastle; duke of Argyle; earl Granville; hon. Sidney Herbert; sir Chas. Wood; sir W. Molesworth, &c. Dec. 28, —
- [In this last ministry various changes of offices took place: among them, a fourth secretary of state was appointed, by a separation of the war from the colonial department, the former being retained by the duke of Newcastle, and Sir George Grey being appointed to the latter. See *Aberdeen Administration, Secretaries of State, and War Minister.*]
- [The retirement of Lord J. Russell, Jan. 24, 1855, and a majority in the commons against ministers of 157 (305 to 148) on Mr. Reebuck's motion respecting the conduct of the war, led to the resignation of lord Aberdeen and his colleagues, Jan. 30; the cabinet was reconstructed under lord Palmerston.]
- Viscount Palmerston; lord Cranworth; earl Granville; lord Panmure; earl of Clarendon; sir George Grey; rt. hon. Sidney Herbert; sir James Graham; sir Charles Wood; sir William Molesworth; duke of Argyle; Mr. Gladstone; Mr. Cardwell; and (without office) the marquess of Lansdowne, &c. Feb. 7, 1855
- [Viscount Palmerston, owing to the secession of Sir J. Graham, Mr. Gladstone, and Mr. S. Herbert, had to reconstruct his ministry.]
- Viscount Palmerston; lord John Russell; lord Panmure; marquess of Lansdowne (without office); earl of Clarendon; sir George Grey; sir George Cornwall Lewis; sir Charles Wood; sir William Molesworth, &c. (See *Palmerston*) Feb. 24, —
- On the second reading of the Foreign Conspiracy bill, the government (defeated by a vote of censure being passed by a majority of 19, on the motion of Milner Gibson) resigned immediately Feb. 19, 1858
- Earl of Derby; rt. hon. B. Disraeli; Spencer Walpole; J. W. Henley; lord Stanley; sir F. Thesiger (lord Chelmsford), &c. Feb. 26, —
- [The Derby administration, in consequence of a vote of want of confidence in it being carried by a majority of 13, June 10, 1859, resigned the next day. Earl Granville attempted to form an administration in vain; and lord Palmerston and lord John Russell came into office.]
- THE PALMERSTON-RUSSELL administration, (which see) June 18, 1859

ADMINISTRATIVE REFORM ASSOCIATION derives its origin from the opinion of many eminent commercial men and others, that the disasters which occurred to the army in the Crimea in 1854-5 were attributable to the inefficient and irresponsible management of the various departments of the state. A meeting for organising the association was held in London, May 5, 1855, succeeded by others in the principal towns in the kingdom. Mr. W. Tite, a deputy-chairman, was elected M.P. for Bath, on June 4, 1855. A meeting was held in Drury Lane Theatre, on June 13, and Mr. Layard's motion on the subject in parliament was negatived June 18 following. The association was reorganised in 1856, Mr. Roebuck, M.P., becoming chairman. It has now become unimportant. See *Civil Service*.

ADMIRAL. This distinction does not appear to have been adopted in these realms until about the year 1300, but the title was in use some time previously in France. *Sir Harris Nicolas.* Alfred, Athelstan, Edgar, Harold, and other kings, had been previously the commanders of their own fleets. The first French admiral was appointed 1284. The rank of *admiral of the English seas* was one of great distinction, and was first given to William de Leybourne by Edward I. in 1297. *Spelman; Rymer.* The first LORD HIGH ADMIRAL in England was created by Richard II. in 1385: there had been previously high admirals of

districts—the north, west, and south. This office has seldom been entrusted to single hands, the duties being generally executed by lords commissioners. A similar dignity existed in *Scotland* from the reign of Robert III. : in 1673, the king bestowed it upon his natural son Charles Lennox, afterwards duke of Richmond, then an infant, who resigned the office to the crown in 1703 : after the union it was discontinued.—The dignity of lord high admiral of *Ireland* (of brief existence) was conferred upon James Butler by Henry VIII., in May, 1534. The Admiral of the Fleet is the highest rank in the Royal Navy, corresponding to that of Marshal in the army. We have now Sir Wm. Hall Gage, Admiral of the Fleet, and 7 admirals of the red, 7 of the white, and 7 of the blue, and vice-admirals for each colour (1862). See *Navy*.

ADMIRALTY, COURT OF, erected by Edward III. in 1357 ; a civil court for the trial of causes relating to maritime affairs. It was enacted in the reign of Henry VIII., that criminal causes should be tried by witnesses and a jury, some of the judges at Westminster (or, as now, at the Old Bailey) assisting. The judgeship of the Admiralty was constituted, as at present, in 1514, and was filled by two or more functionaries until the Revolution, when it was restricted to one. *Bealson*. The judge has usually been an eminent doctor of the civil law. There are appeals from the decisions of this court to the judicial committee of the privy council, by statutes 11 George IV. and 1 William IV., 1830 and 1831. By 20 & 21 Vict. c. 77 (1857) the judge of the Probate court was to be also judge of the Admiralty court. Sir John Dodson, the last Admiralty judge, died in 1858. The jurisdiction of this court was extended in 1861.

ADMIRALTY OFFICE dates from 1512, when Henry VIII. appointed commissioners to inspect his ships of war, &c. In 1662 the Admiralty was first put into commission, the great officers of state being the commissioners. During the commonwealth the admiralty affairs were managed by a committee of the parliament ; and at the restoration in 1660, James, duke of York, became lord high admiral. In 1684, Charles II. held the admiralty in his own hands, until his death, when James II. made himself lord high admiral. In 1688-9, the admiralty was a second time put into commission, and the board appears to have assembled at admiral Herbert's lodgings in Channel-row, Westminster, he being at that time first lord. The patent appointing him, together with six other lords, was dated March 6, 1688-9. In 1830, 1832, and 1836 various changes were made in the civil departments, several offices being abolished or consolidated with others. In March, 1861, a Royal commission recommended the abolition of the Board of Admiralty and the appointment of a Minister of the Navy Department.

FIRST LORDS OF THE ADMIRALTY, ETC.

| 1757. Daniel, earl of Winchelsea, April 6. | 1853. Sir James Robert George Graham, Jan. 5. |
| — George, lord Anson, July 2. | 1855. Sir Charles Wood, bart., Feb. 24. |
| 1762. George M. Dunk, earl of Halifax, June 19. | 1858. Sir John Pakington, Feb. 26. |
| 1763. George Grenville, esq., Jan. 1. | 1859. Edward, duke of Somerset, the PRESENT (1862) First Lord. |

ADMIRALTY, Whitehall. "At the South end of Duke-street, Westminster, was seated a large house, made use of for the admiralty office, until the business was removed to Greenwich, and thence to Wallingford house, against Whitehall." It was rebuilt by Ripley about 1726; the screen was erected, to conceal the ugliness of the building, by the brothers Adam, in 1776.—Lord Nelson lay in state in one of the apartments on Jan. 8, 1806; and on the next day was buried at St. Paul's.

"**ADMONITION TO THE PARLIAMENT**," condemning all religious ceremonies but those commanded in the New Testament, was published by certain Puritans in 1571. It was answered by Abp. Whitgift. Its presumed authors, Field and Wilcox, were imprisoned.

ADRIAN'S WALL (to prevent the irruptions of the Scots and Picts into the northern counties of England, then under the Roman government) extended from the Tyne to Solway firth, and was eighty miles long, twelve feet high, and eight in thickness, with watch-towers; built 121. It was named after its second founder, the emperor Adrian, and was repaired by Severus, 208.

ADRIANOPLE, in Turkey. Here was fought the battle by which Constantine gained the empire, July 3, 323.—Adrianople was taken by the Ottoman Amurath in 1361. It was the seat of the Turkish empire till the capture of Constantinople in 1453. Mahomet II. was born here in 1430. *Priestley*.—Adrianople was taken by the Russians in Aug. 20, 1829; but was restored at the close of the war, Sept. 14, same year. See *Turkey*.

ADRIATIC. The ceremony of the doge of Venice wedding the Adriatic sea was instituted in 1173. Annually upon Ascension-day, the doge dropped a ring into the sea from his bucentaur, or state barge, being attended on these occasions by all the nobility of the state, and foreign ambassadors, in gondolas. The ceremony was omitted, for the first time for centuries, in 1797.

ADULTERATION OF FOOD. Much attention was drawn to this, in 1822, through Mr. Accum's book, popularly called "Death in the Pot," and in 1855 through Dr. Hassall's book, "Food and its Adulterations." By an act for preventing the adulteration of food, passed in 1860, parochial chemical analysts may be appointed.

ADULTERY. Punished by the law of Moses (1490 B.C.) with death, *Leviticus* xx. 10.—Lycurgus (884 B.C.) punished the offender as he did a parricide, and the Locrians and Spartans tore out the offender's eyes. The Romans had no formal law against adultery: the emperor Augustus was the first to introduce a positive law to punish it, and he had the misfortune to see it executed on the persons of his own children. *Lenglet*. The early Saxons burnt the adulteress, and erected a gibbet over her ashes, whereon they hanged the adulterer. King Edmund punished the crime as homicide, during the Saxon Heptarchy (454 to 828). It was punished by cutting off the hair, stripping the female offender naked, and whipping her through the streets, if the husband so demanded it to be done, without distinction of rank. *Stow*. The ears and nose were cut off under Canute, 1031. Ordained to be punished capitally, together with incest, under Cromwell, May 14, 1650: but there is no record of this law taking effect. In New England a law was ordained whereby adultery was made capital to both parties, even though the man were unmarried; and several suffered under it, 1662. *Hardie*. Till 1857 the legal redress against the male offender was by civil action for a money compensation; the female being liable to divorce. By 20 & 21 Vict. c. 85 (1857) the "action for criminal conversation" was abolished and the "Court for Divorce and Matrimonial Causes" was established, with power to grant divorces for adultery and ill usage. See *Divorce*.

ADVENT (*adveniens*, coming) signifies the approach of the feast of the Nativity. The season includes four Sundays, the first being the nearest Sunday to St. Andrew's day (Nov. 30), before or after. Homilies respecting Advent are mentioned prior to A.D. 378.

ADVENTURE BAY, at the S.E. end of Van Diemen's Land, visited in 1778 by capt. Furneaux in his first voyage to the Pacific, and named from his ship *Adventure*. It was visited by captain Bligh in 1788.

ADVENTURERS, MERCHANT, a celebrated company of enterprising merchants, originally formed for the discovery of territories, and the extension of commerce, by John, duke of Brabant, in 1296, was transferred to England in the reign of Edward III. Elizabeth formed it into an English corporation in 1564. *Anderson*.

ADVERTISEMENTS IN NEWSPAPERS, as now published, were not general in England until the beginning of the eighteenth century. A penalty of 50*l.* was inflicted on persons advertising a reward with "No questions to be asked" for the return of things stolen, and on the printer, 25 Geo. II. 1754. *Statutes*. The *advertisement duty* was formerly charged

according to the number of lines ; it was afterwards fixed, in England, at 3s. 6d., and in Ireland at 2s. 6d. each advertisement. The duty was further reduced, in England, to 1s. 6d. and in Ireland to 1s. each, by 3 & 4 Will. IV. (1833), and was altogether abolished in the United Kingdom, by 16 & 17 Vict. c. 63 (Aug. 4, 1853).* ADVERTISING VANS, a great nuisance, were prohibited by 16 & 17 Vict. c. 33 (1853).

ADVOCATE, THE KING'S. This office was instituted about the beginning of the sixteenth century ; and the advocate (always a doctor of the civil law) was empowered to prosecute at his own instance certain crimes, 1597. *Statutes.* LORD ADVOCATE in Scotland is the same as the attorney-general in England.—It was decided in the parliament of Paris, in 1685, that the king's advocate of France might at the same time be a judge ; so in like manner it was allowed in Scotland, where Sir John Nesbit and Sir William Oliphant were lord advocates and lords of session at the same time. *Beatson.*—The Advocates' library in Edinburgh was established by Sir G. Mackenzie in 1682.

ÆDILES, magistrates of Rome, first created 492 B.C. There were three degrees of these officers, and the functions of the principal were similar to our justices of the peace. The plebeian ædiles presided over the more minute affairs of the state, good order, and the reparation of the streets. They procured all the provisions of the city, and executed the decrees of the people. *Varro.*

ÆGINA, a Greek island, a rival of Athens, was humbled by Themistocles, B.C. 485 ; and taken 455.

ÆGOSPOTAMOS, the Goat-river, in the Chersonesus, where Lysander, the Lacedæmonian, defeated the Athenian fleet, 405 B.C., and ended the Peloponnesian war.

ÆLIA CAPITOLINA, built on the ruins of Jerusalem by the emperor Adrian, 131.

ÆMILIA, the name given to the provinces of Parma, Modena, and the Romagna, united to Sardinia in 1860 ; and part of the kingdom of Italy.

ÆNEID, the great Latin epic poem, relating the adventures of Æneas, written about 24 B.C. by Virgil, who died Sept. 22, 19 B.C., before he had finally corrected the poem. It was first printed in 1469, at Rome.

ÆNIGMA. Samson's riddle (about 1141 B.C. ; *Judges* xiv. 12) is the earliest on record. The ancient oracles frequently gave responses admitting of perfectly contrary interpretations. Gale attributes enigmatical speeches to the Egyptians. In Nero's time, the Romans were often obliged to have recourse to this method of concealing truth under obscure language. The following epitaph on Fair Rosamond (mistress of our Henry II. about 1173) is a mediæval specimen :—"Hic jacet in tombâ Rosa mundi, non Rosa munda ; Non redolet, sed olet, quæ redolere solet."

ÆOLIA, in Asia Minor, was colonised by a principal branch of the Hellenic race : beginning about 1124 B.C. The Æolians built several large cities both on the mainland and the neighbouring islands,—Mitylene, in Lesbos, being considered the capital.

ÆOLIAN HARP. The invention of this instrument is ascribed to Kircher, 1653 ; but it was known at an earlier period.

ÆOLOPILE, a hollow ball with an orifice in which a tube might be screwed, was used in the 17th century as a boiler for experimental steam-engines.

ÆERATED WATERS. Apparatus for combining gases with water have been patented by Thomson in 1807 ; Bakewell in 1832 and 1847 ; Tylor in 1840, and by several other persons.

ÆERIANS, followers of Aerius, a presbyter, in the 4th century. He maintained that there was no distinction between a bishop and a presbyter ; that there was no Pasch to be observed by Christians ; that the Lent and other fasts should not be observed ; and that prayers should not be offered for the dead. *Epiphanius.*

ÆERONAUTICS. To lord Bacon, the prophet of art, as Walpole calls him, has been erroneously attributed the first suggestion of the true theory of balloons. The ancient speculations about artificial wings whereby a man might fly as well as a bird, was refuted by Borelli, 1670. Mr. Henry Cavendish ascertained that hydrogen gas (now used for balloons) is at least twelve times lighter than common air, 1766. The true doctrine of æronautics was announced in France by the two brothers Montgolfier, 1782. See *Balloon*.†

* On Oct. 16, 1860, the whole of the libretto of MacFarren's opera, *Robin Hood*, was inserted as an advertisement in the *Times* (4½ columns).

† In July, 1850, M. Lissie laid before the Academy of Sciences, Paris, a memoir on Aërial Navigation : giving an account of his cylinder balloon, supplied with apparatus to enable him to direct its course in the atmosphere. Many similar projects have been devised,—in vain.

ÆSOP'S FABLES, said to have been written by him, the inventor of this species of instruction, about 565 B.C. "Æsop's fables" are, no doubt, a compilation from various sources. *Plutarch*.

ÆSTHETICS (from the Greek *aisthesis*, perception), the science of the beautiful (especially in art); a term invented by Baumgarten, a German philosopher, whose work "*Æsthetica*" was published in 1750.

ÆTHIOPIA. See *Ethiopia*.

ÆTNA. See *Etna*.

ÆTOLIA, in Greece, a country named after Ætolus of Elis, who, having accidentally killed a son of Phoroneus, king of Argos, left the Peloponnesus, and settled here. The inhabitants were very little known to the rest of Greece, till after the ruin of Athens and Sparta, when they became the rivals of the Achæans, and alternately allies and enemies of Rome.

The Ætolians join Sparta against Athens	B.C. 455	Alliance with Rome	B.C. 211
Subdued by Antipater during the Lamian war	322	War with Philip—Peace	205
Aid in the expulsion of the Gauls	279	They next invite the kings of Macedonia, Syria, and Sparta, to coalesce with them against the Romans	193-2
Invade the Peloponnesus, and ravage Messenia (Social War), and defeat the Achæans at Caphyæ	220	Defeat of the allies near Thermopylæ	191
Philip V., of Macedon, invades Ætolia, and takes Thermum—Peace concluded	217	Conquered by the Romans under Pulvius	189
Battle of Lania; the Ætolians, commanded by Pyrrhus, are defeated by Philip of Macedon	214	Leading patriots massacred by the Roman party	167
		Made a province of Rome	146

AFFINITY, DECREES OF. Marriage within certain degrees of kindred has been prohibited by the laws of almost all nations, in almost every age, but has yet taken place to a considerable extent. Several degrees were prohibited in scriptural law, as may be seen in *Leviticus*, chap. xviii. (1490 B.C.). In England, a table restricting marriage within certain near degrees was set forth by authority, A.D. 1563. Many of these are disputed. Prohibited marriages were adjudged to be incestuous and unlawful by the ninety-ninth canon, in 1603. All marriages within the forbidden degrees of kindred are declared to be absolutely void by statute 5 & 6 Will. IV. c. 54, 1835. See *Marriage (of deceased Wife's Sister)*.

AFFIRMATION. The Quakers objecting to oaths, their simple affirmation is accepted instead; for the first time, A.D. 1696. The affirmation was altered in 1702, 1721, 1837, and in April, 1859.—The indulgence was granted to persons who were formerly Quakers but who had seceded from that sect, 2 Vict. 1838; and extended to other dissenters in Scotland 9 Geo. IV. (1828). 18 & 19 Vict. c. 2 (1855).

AFGHANISTAN, a large country in central Asia, conquered by the Tartars about 977.

The Mahommedan dynasty, the Ghaznevîdes, said to have ruled from 1186 to 1206.	On his assassination, one of his officers, Ahmed Shah, an Afghan, forms Afghanistan into an independent kingdom, and reigns prosperously, 1747-73.
They were conquered by Genghis Khan about 1221, and by Tamerlane, 1398.	His son and successor, Timour, died in 1793; whose son, Zemaun, was dethroned and blinded after reigning ten years. Since then, the history is a series of broils, crimes, and murders.
Baber conquered Cabul in 1527.	Runjeet Sing, the Sikh chief of Lahore, conquers a large part of the country in 1818.
On his death Afghanistan divided between Persia and Hindostan.	[For the war with England, see <i>India</i> , 1838.]
The Afghans revolt in 1740; invade Persia and take Ispahan; repulsed by Nadir Shah in 1728, who subdues the whole of the country, 1737.	

AFRICA, called *Libya* by the Greeks, one of the three parts of the ancient world, and the greatest peninsula of the universe; first peopled by Ham. For its history see *Egypt*, *Carthage*, *Cyrene*, *Abyssinia*, *Algiers*, *Morocco*, &c.

Finally subdued by the Romans under Pompey, 82 B.C.	<i>force</i> and <i>Soudan</i> steam-ships, commenced the ascent of the Niger, Aug. 20, 1841; but when they reached Iddah, fever broke out among the crews, and they were successively obliged to return, the <i>Albert</i> having ascended the river to Egga, 320 miles from the sea, Sept. 28. The expedition was, in the end, wholly relinquished owing to the disease, heat, and hardships, and all the vessels had cast anchor at Clarence Cove, Fernando Po, Oct. 17, 1841.
Conquered by the Vandals under Genseric, A.D. 429-35.	James Richardson explored the great Sahara in 1845-6, and in 1849 (by direction of the Foreign Office) he left England to explore central Africa, accompanied by Drs. Barth and Overweg. Richardson died, March 4, 1851; and Overweg, Sept. 27, 1852.
Reconquered by Belisarius, 533 <i>et seq.</i>	Dr. Vogel sent out with reinforcements to Dr. Barth, Feb. 20, 1853; in April, 1857, said to have been assassinated.
The Mahommedan Arabs subdued the north of Africa about 627.	
English merchants visit Guinea in 1550; and Elizabeth granted a patent to a company in 1588.	
Capt. Stubbs sailed up the Gambia, 1723.	
Bruce commenced his travels in 1768.	
Mungo Park, who made his first voyage to Africa, May 22, 1795; and his second voyage, January 30, 1804, but from which he never returned (see <i>Park</i>).	
Visited by Salt in 1805 and 1809; Bueckhardt in 1812; Hornemann in 1816; Denham and Clapperton in 1822; the brothers Lander in 1830.	
The great Niger expedition (for which parliament voted 61,000 <i>l.</i>), consisting of the <i>Albert</i> , <i>Wilber-</i>	

AFRICA, *continued.*

Dr. Barth returned to England, and received the Royal Geographical Society's medal, May 16, 1856. His travels were published in 5 vols. in 1858.

Dr. David Livingstone, a missionary traveller, returned to England in Dec. 1856, after an absence of 16 years, during which he traversed a large part of the heart of South Africa, and walked about 11,000 miles, principally over country

hitherto unexplored. His book was published in Nov. 1857. In Feb. 1858, he was appointed British consul for the Portuguese possessions in Africa, and left England shortly after. He has been recently heard of (1862).

The publication of M. du Chaillu's travels in central Africa created much controversy and excitement in 1861.

AFRICAN ASSOCIATION, for promoting the exploration of Inner Africa, was formed in June, 1788, principally by Sir Joseph Banks; and under its auspices many additions were made to African geography by Ledyard, Park, Burckhardt, Hornemann, &c. It merged into the Royal Geographical Society in 1831.

AFRICAN COMPANY, a society of merchants trading to Africa, arose out of an association in Exeter, which was formed in 1588. A charter was granted to a joint-stock company in 1618; a third company was created in 1631; a fourth corporation in 1662; and another formed by letters-patent in 1672, and remodelled in 1695. The rights vested in the present company are by 23 Geo. II. 1749.

AFRICAN INSTITUTION, founded in London in 1807, for the abolition of the slave trade, and the civilisation of Africa. Many schools have been established with success, particularly at Sierra Leone, where the number of scholars, male and female, is said to approach 2000. *Leigh.*

AGAPÆ, Feasts of Charity (from *agapē*, Greek for love, charity), mentioned *Jude* 12, of which the first Christians of all ranks partook in common, in memory of the last meal which Christ took with his disciples. In consequence of disorders creeping in, these feasts were forbidden to be celebrated in churches by the council of Laodicea, 361, and by the council of Carthage in 391.

AGAPEMONIANS, an extraordinary sect, which mainly originated with Henry James Prince, an ex-clergyman of the Church of England, who claimed the attributes of omnipotence, and thereby obtained great influence over the minds and actions of his wealthy dupes. They profess to live in a state of brotherly love, delivering themselves up to innocent amusements of all kinds, not vexing themselves with the cares of ordinary mortals, but existing in communion with God. Various disclosures do not at all confirm these statements. They have their residence in a building called "Agapémone" (a Greek term signifying the abode of love), near Bridgewater, in Somersetshire.*

AGE. Chronologers have commonly divided the time between the Creation and the birth of Christ into periods called ages. Hesiod (about 850 B.C.) described the Golden, Silver, Brazen, and Iron Ages. See *Dark Ages*.

	B.C.		B.C.
FIRST AGE (from the Creation to the Deluge)	4004—2349	FOURTH AGE (to the founding of Solomon's Temple)	1490—1014
SECOND AGE (to the coming of Abraham into Canaan)	2348—1922	FIFTH AGE (to the capture of Jerusalem)	1014—588
THIRD AGE (to the Exodus from Egypt)	1921—1491	SIXTH AGE (to the birth of Christ)	588—4
		SEVENTH AGE (to the present time)	B.C. 4—A.D. 1862

AGE, OF. In England the minority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, fixed at eighteen years; previously to completing which age, Henry VIII. had himself assumed the reins of government, in 1509.—A *male* of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the statute of wills, 7 William IV. and 1 Victoria, cap. 26, 1837, no will made by any person under the age of twenty-one years shall be valid. A *female* at twelve may consent to a marriage; at fourteen she may choose a guardian, and at twenty-one she is of age.

* On May 22, 1850, Thomas Robinson sought to recover the possession of his child from the care of its mother (from whom Thomas had separated): the application was refused by the vice-chancellor, on the ground that the father would instil the doctrines of this sect into the child in educating it, and the court held it a duty to "save it from the pollution of the parent's teaching." Several suicides have been committed by the deluded females of this sect.—On Aug. 21, 1858, Miss Louisa Jane Nottidge died, having transferred her property to Mr. H. J. Prince. Her brother, Mr. Nottidge, by an action, recovered from Prince 5728*l.*, as having been fraudulently obtained. Extraordinary disclosures were made during the trial, July 25, 1860. In the autumn of 1860, the rev. Mr. Prince, after several vain attempts, succeeded in rescuing his wife from the Agapemone. They had both been early supporters of it.

AGINCOURT (N. France), BATTLE OF, Oct. 25, 1415, between the French (60,000) and English (9000); the latter commanded by Henry V. Of the French, whose leaders acted with little judgment, there were according to some accounts 10,000 killed (of whom 3000 were persons of rank), and 14,000 taken prisoners; the English losing the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Among the prisoners were the dukes of Orleans and Bourbon, and 7000 barons, knights, and gentlemen. The dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 1500 knights were slain. Henry V. soon after obtained the kingdom of France,

AGITATORS, officers appointed by the English army in 1647, to take care of its interests: each troop or company had two. The protector Cromwell was eventually obliged to repress the seditious power of the Agitators. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions and the forces on the ground, and thus restored discipline. *Hume*.—Daniel O'Connell, called the Agitator of Ireland, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, July 5, 1828; the election being declared void, he was re-elected July 30, 1829. After the passing of the Catholic Emancipation bill, he agitated in vain for the repeal of the Union, 1834 to 1843. He died May 15, 1847.—Richard Cobden and John Bright were the chief anti-corn-law agitators, 1841-5.

AGRA was once the most splendid of the Indian cities, and even now exhibits magnificent ruins. In the 17th century the great mogul frequently resided here, the palaces being very numerous; Agra then contained above 60 caravansaries, 300 baths, and 700 mosques. See *Mausoleums*. In 1658 Aurungzebe removed to Delhi.—The fortress of Agra, termed the key of Hindostan, surrendered, in the war with the Mahrattas, to the British forces, under general Lake, Oct. 17, 1803, in one day's siege: 162 pieces of ordnance and 240,000. were captured.—In June 1857, the city was abandoned to the mutineers by the Europeans, who took refuge in the fort, from which they were rescued by major Montgomery and colonel Greathed.—Agra till 1861 was the capital of the north-west provinces of India.

AGRARIAN LAW (*Agraria lex*) decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by Spurius Cassius, 486 B.C., and occasioned his judicial murder by the aristocracy in 493. It was enacted by the tribune Licinius Stolo, 376, and by the tribune Tiberius Gracchus, 132 B.C. The law at last proved fatal to the freedom of Rome under Julius Cæsar, 60 B.C. *Livy; Vossius*. In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as *Gracchus Babeuf*, editor of the *Tribun du Peuple*, in 1794.

AGRICULTURE. "Abel was a keeper of sheep, but Cain was a tiller of the ground," *Genesis* iv. 2. The Athenians asserted that the art of sowing corn began with them; and the Cretans, Sicilians, and Egyptians made the same claim.

Cato the Censor (died 149 B.C.) and Varro (died 28 B.C.) were eminent Roman writers on agriculture. It was brought into England by the Romans about A.D. 27.

Fitzherbert's "Book of Husbandry" printed in 1524.

Tusser's "Five Hundred Points of Husbandry," 1562.

Blythe's "Improver," 1649.

Hartlib's "Legacy," 1650.

Jethro Tull's "Horse-hoeing Husbandry," 1701.

About the end of the 18th century fallowing was gradually superseded by turnips and other green crops.

AGRICULTURAL SOCIETIES.—The earliest mentioned in the British Isles was the Society of Improvers of Agriculture in Scotland, instituted in 1723. The Dublin Agricultural Society (1749) gave a stimulus to agriculture in Ireland; its origin is attributed to Mr. Prior of Rathdowney, Queen's County, in 1731. The Bath and West of England Society established, 1777; and the Highland Society of Scotland, 1793.

London Board of Agriculture established by act of parliament, 1793.

Francis duke of Bedford, a great promoter of agriculture, died, March 2, 1802.

Royal Agricultural Society of England (now the most important) established in 1838, by noblemen and gentlemen, the chief landed proprietors in the kingdom, and incorporated by royal charter, 1840.

It holds two meetings annually, one in London the other in the country; the first country meeting at Oxford, in 1839. It awards prizes, and publishes a valuable journal. The London meeting at Battersea in June, 1862, was highly successful.

The Royal Agricultural College at Cirencester established, 1846.

AGRICULTURAL CHEMISTRY.—Sir Humphry Davy delivered lectures on this subject (afterwards published), at the instance of the Board of Agriculture, in 1812; but it excited little attention till the publication of Liebig's work in 1840, which made a powerful impression. Boussingault's "Economie Rurale," an equally important work, appeared in 1844. The immoderate expectations from this study having been somewhat disappointed, a partial reaction took place. Liebig's "Letters on Agriculture" appeared in 1859.

Agricultural Hall, Islington, N. London, chiefly for the meetings of the Smithfield Club. The foundation stone was laid by the president, Lord Berners, Nov. 5, 1861. A remarkable exhibition of dogs was opened here on June 24, 1862.

In Aug. 1855, a committee presented a report on the best mode of obtaining accurate agricultural statistics, which has not been acted on. There were, in 1831, 1,055,982 agricultural labourers in Great Britain, and in Ireland, 1,131,715.

AGRICULTURE, *continued.*

The following Table, drawn up by Mr. William Couling, C.E., in 1827,* is extracted from the Third Report of the Emigration Committee:—

Countries.	Cultivated.	Wastes capable of Improvement.	Unprofitable.	Total.
	ACRES.	ACRES.	ACRES.	ACRES.
England	25,632,000	3,454,000	3,256,400	32,342,400
Wales	3,117,000	530,000	1,105,000	4,752,000
Scotland	5,205,000	5,950,000	8,523,930	19,738,930
Ireland	12,125,280	4,900,000	2,416,004	19,441,944
British Islands	383,690	166,000	569,469	1,119,159
	46,522,970	15,000,000	15,871,463	77,394,433

AGRIGENTUM (now *Girgenti*), a celebrated city of Sicily, built about 582 B.C. It was governed by tyrants from 566 to 470; among these were Phalaris (see *Brazen Bull*); Alcmanes; Theron who, with his step-father, Gelon, defeated the Carthaginians at Himera and Thrasylæus, his son, expelled in 470; when a republic was established, and Agrigentum became opulent and luxurious. It was taken by the Carthaginians in 405 B.C., and held, except during short intervals, till wrested from them by the Romans in 262 B.C. From A.D. 825 till 1086 it was held by the Saracens.

AID. See *Ayde*.

AILANTINE. See *Silk*.

AIR, OR ATMOSPHERE. Anaximenes of Miletus (530 B.C.) declared air to be a self-existent deity, and the first cause of everything created. Posidonius (about 79 B.C.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lbs. to the square inch, was discovered by Torricelli A.D. 1645, and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others the AIR-GUN of Guter of Nuremberg about 1656; the AIR-PUMP, invented by Otto von Guericke of Magdeburg about 1650; improved by the illustrious Boyle in 1657; and the AIR-PIPE, invented by Mr. Sutton, a brewer of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light and sound by Hooke, Newton, and Derham. The extension of our atmosphere above the surface of the earth, long considered as about 45 miles, is now thought by admiral FitzRoy to be only about 9 or 10 miles (1862).—Its composition, about 77 parts of nitrogen, 21 of oxygen, and 2 of other matters (such as carbonic acid, watery vapour, a trace of ammonia, &c.), was ascertained by Priestley (1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737. Dr. Stenhouse's *Air-fillers* in which powdered charcoal is used) were first set up at the Mansion-house, London, in 1854. In 1858, Dr. R. Angus Smith made known a chemical method of ascertaining the amount of organic matter in the air. The researches of Dr. Schönbein, a German chemist of Basel, between 1840 and 1859, led to the discovery of two states of the oxygen in the air, which he calls *ozone* and *antozone*. See *Ozone*.

AIX-LA-CHAPELLE (AACHEN), a Roman city, now in Rhenish Prussia. Here Charlemagne was born A.D. 742, and died 814; having built the minster (796-804), and conferred many privileges on the city, in which fifty-five emperors have since been crowned. The

* At that period it was computed that the soil of the United Kingdom was annually cropped in the following proportions:—

ACRES.	ACRES.
Wheat 7,000,000	Nursery-grounds 21,210,000
Barley and rye 1,950,000	Inclosed fruit, flower, kitchen, and other gardens 110,000
Potatoes, oats, and beans 6,500,000	Pleasure-grounds 100,000
Turnips, cabbages, and other vegetables 1,150,000	Land depastured by cattle 21,000,000
Clover, rye-grass, &c. 1,750,000	Hedge-rows, copses, and woods 2,000,000
Fallow 2,800,000	Ways, water, &c. 2,100,000
Hop-grounds 60,000	
Forward 21,210,000	Cultivated land 46,540,000

It was reckoned by the Agricultural Committee, that the cultivation of waste lands would yield above 20,000,000. a year. It was calculated in 1854 that there were in England 32,160,000 acres in cultivation, of the annual value of 37,412,000*l.* Since that time much land has been brought into cultivation. See *Wheat*.

imperial insignia were removed to Vienna in 1795.—The first *treaty of peace* signed here was between France and Spain, when France yielded Franche Comté, but retained her conquests in the Netherlands, May 2, 1668.—The second, or celebrated treaty, was between Great Britain, France, Holland, Hungary, Spain, and Genoa. (By it the treaties of Westphalia in 1648, of Nimeguen in 1678 and 1679, of Ryswick in 1697, of Utrecht in 1713, of Baden in 1714, of the Triple Alliance in 1717, of the Quadruple Alliance in 1718, and of Vienna in 1738, were renewed and confirmed.) Signed on the part of England by John, earl of Sandwich, and sir Thomas Robinson, Oct. 7, 1748.—A congress of the sovereigns of Austria, Russia, and Prussia, assisted by ministers from England and France, was held at Aix-la-Chapelle, and a convention signed, Oct. 9, 1818. The sum then due from France to the allies was settled at 265,000,000 of francs.

AKERMAN, in Bessarabia. Here the celebrated treaty between Russia and Turkey was concluded in 1826, which secured for the former the navigation of the Black sea, &c.

ALABAMA, a southern slave state, N. America; made an independent state in 1819: commercial metropolis, Mobile. It seceded from the Union, Dec. 1860.

ALAND ISLES, Gulf of Bothnia, were taken from Sweden by the Russians in 1809. See *Bomarsund*.

ALBA LONGA, an ancient city of Italy, said to have been founded by Ascanius, son of Æneas, 1152 B.C. Its history is of doubtful authenticity.

Ascanius, son of Æneas, 1152 B.C.; Sylvius Posthumus, 1143; Æneas Sylvius	B.C. 1114	Agrippa; Remulus, 864; Aventinus, 845; Procas	B.C. 808
Reign of Latinus, 1048; Alba, 1038; Atys, or Capetus, 1002; Capys, 996; Capetus	916	Numitor, 795; Amulius* the brother of Numitor, seizes the throne, 794; killed by his grandson, Romulus, who restores Numitor	754
Reign of Tiberinus, 903; being defeated in battle, near the river <i>Albula</i> , he throws himself into the stream, is drowned, and hence this river is now called the <i>Tiber</i>	895	Alba conquered by Tullus Hostilius, who incorporates it with his Roman dominions	665

ALBANIA (part of the ancient Epirus). The Albanians became independent during the decline of the Greek empire; and about 1443, under George Castriot (Scanderbeg), baffled the efforts of Mahomed II. to subdue them, till the siege of Scutari in 1478, when they partially submitted. Albania became independent under Ali Pacha, of Janina, in 1812, who defeated the Turkish pachas, and governed ably, but cruelly and despotically, till Feb. 1822, when he and his two sons were slain, after surrendering under a solemn promise of safety.

ALBAN'S, ST. (Hertfordshire), the Roman Verulam, and previously the residence of British princes. At St. Alban's queen Boadicea made her celebrated assault upon the Romans, and failed, after an immense slaughter, it is said of 70,000 men; and Cassibelanus was defeated by Cesar at this place. It takes its present name from St. Alban, said to have been born here, and to have been the first British martyr (decapitated during the persecution raised by Diocletian, June 23, A.D. 286). A stately monastery was erected in the town to his memory by Offa, king of Mercia, about 787. The abbot sat in parliament as premier abbot, till the dissolution in 1539. St. Alban's was incorporated by Edward VI. 1552; and again by Charles II., but was disfranchised for bribery, June 17, 1852.

ALBAN'S, ST., BATTLES of, between the partisans of the houses of York and Lancaster. In the first, May 23, 1455, Richard, duke of York, obtained an easy victory over Henry VI., of whose army 5000 were slain. The second, fought on Shrove-Tuesday, Feb. 17, 1461, between the earl of Warwick and the Lancastrians, commanded by queen Margaret of Anjou. The Yorkists were defeated, and 2000 of them perished.

ALBANY (OR ALBAINN), the ancient name of the Scottish Highlands. The brother of Robert III. of Scotland, was made duke of Albany in 1398. Frederick, son of George III., was duke of York and Albany.

ALBERT MEMORIAL. The Prince Consort died on Dec. 14, 1861, deeply lamented by the whole civilised world. A meeting to organise a method of receiving contributions for a Great National Memorial was held at the Mansion-house, Jan. 14, 1862; and a large

* Early traditions state, that when Amulius dethroned his brother, he condemned Ilia, the daughter of Numitor, to a life of celibacy, by obliging her to take the vows and office of a vestal, thereby to assure his safety in the usurpation. His object was, however, frustrated: violence was offered to Ilia, and she became the mother of twins, for which Amulius ordered her to be buried alive, and her offspring to be thrown into the Tiber, 770 B.C. But the little bark in which the infants were sent adrift stopped near mount Aventine, and was brought ashore by Faustulus, the king's chief shepherd, who reared the children as his own, and called them Romulus and Remus. His wife, Acca-Laurentia, was surnamed *Lupa*; whence arose the fable that Romulus and his brother were suckled by a she-wolf. At sixteen years of age, Romulus avenged the wrongs of Ilia and Numitor, 754 B.C., and the next year founded Rome. *Varro*.

sum was immediately obtained. After much consideration the nature of the memorial was referred to the queen herself. In a letter to the lord mayor, dated Feb. 19, 1862, sir Charles Grey says, on behalf of her majesty, "It would be more in accordance with her own feelings, and she believes with those of the country in general, that the monument should be directly personal to its object. After giving the subject her maturest consideration, her majesty has come to the conclusion, that nothing would be more appropriate, provided it is on a scale of sufficient grandeur, than an obelisk to be erected in Hyde Park on the site of the Great Exhibition of 1851, or on some spot immediately contiguous to it. Nor would any proposal that could be made be more gratifying to the queen herself personally, for she can never forget that the prince himself had highly approved of the idea of a memorial of this character being raised on the same spot in remembrance of the Great Exhibition." In a second letter the queen expressed her intention of personally contributing towards erecting the memorial that, "It might be recorded in future ages as raised by the queen and people of a grateful country to the memory of its benefactor." Shortly after a committee was appointed to fulfil her majesty's desire.—Hitherto, a block of granite suitable to the purpose has not been obtained, and the nature of the memorial is still undecided on. On March 1, 36,000*l.*, on June 11, 50,220*l.* had been received.

ALBIGENSES, who opposed the doctrines and corruptions of the Church of Rome, had their origin about A.D. 1160, at Albigeois, in Languedoc, and at Toulouse. They were persecuted as Manichæans, 1163, and a crusade commenced against them in 1208, Simon de Montfort (to whom Toulouse was given) commanded, and at Beziers he and the pope's legate put friends and foes to the sword, saying, "God will find his own!" At Minerva he burnt 150 of the Albigenses alive; and at La Vaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering other women. He next defeated the count of Toulouse, but was himself killed in 1218. The count made peace in 1229, giving up the heretics to the Inquisition. See *Waldenses*.

ALBION (from *albus* or *alp*, white). The island of Britain is said to have been so called by Julius Cæsar and others, on account of the chalky cliffs upon its coast.

ALBUERA (OR ALBUHERA), in Estremadura, Spain, where a battle was fought between the French, commanded by marshal Soult, and the British and Anglo-Spanish army, under marshal, afterwards lord Beresford, May 16, 1811. The allies obtained the victory, one of the most brilliant achievements of the war. The French loss exceeded 8000 men previously to their retreat; but the allies lost a large number. The chief brunt of the action fell on the British; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had mounted a hill, fell,—out of the 57th regiment alone; the other regiments were scarcely better off, not one-third being left standing; "1500 unwounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill." *Napier*.

ALCHEMY, the forerunner of the science of chemistry: its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an alkahest or universal menstruum, and the elixir of life. Alchemy is said to be as old as the Flood; yet few writers, from Homer till 400 years after Christ, mention any such thing. The alchemists assert that their founder was Hermes *Trismegistus* (thrice greatest), an ancient Egyptian king.—Pliny says, the emperor Caligula was the first who prepared natural arsenic, in order to make gold of it, but left it off, because the charge exceeded the profit. Others say, the Egyptians knew the secret. Zosimus wrote on the subject about A.D. 410. The Arabians are said to have invented this art, wherein they were vainly followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, and Raymond Lullius, by Basil Valentine (born 1394), and by Paracelsus (died 1541), and others.—In 1404 the craft of multiplying gold and silver was made felony by 5 Hen. IV. c. 4, which act was repealed in 1689. A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1476. *Rymer's Fœd.* Dr. Price, of Guildford, in 1782 published an account of his experiments in this way, and pretended to success: he brought his specimens of gold to the king, affirming that they were made by means of a red and white powder. Being a fellow of the Royal Society, he was required, upon pain of expulsion, to repeat his experiments before Messrs. Kirwan and Wolfe (some say Higgins); but after much equivocation and delay he took poison and died, August, 1783.

ALCOHOL. See *Distillation, Spirits, Brandy, Gin, Rum*.

AL-CORAN. See *Koran, Mahometanism, &c.*

ALDERMAN. The word is derived from the Saxon *Ealdorman*, a senior, and among the Saxons the rank was conferred upon elderly and sage, as well as distinguished persons. At the time of the Heptarchy, aldermen were the governors of provinces or districts, and

are so mentioned up to A.D. 882. After the Danes were settled in England, the title was changed to that of *earl*, and the Normans introduced that of *count*. Henry III. may be said to have given its basis to this city distinction. In modern British policy, an alderman is a magistrate next in dignity to the mayor. Appointed in London (where there are twenty-six) in 1242; and in Dublin (where there are twenty-four) in 1323. Aldermen chosen for life, instead of annually, 17 Richard II., 1394. Present mode of election established 11 George I. 1725. Aldermen made justices of the peace 15 George II. 1741.

ALDERNEY, RACE OF (N. E. France). Through this strait the French escaped after their defeat at La Hogue by admiral Rooke, in 1692.—It is celebrated for two fatal occurrences; William of Normandy, son of Henry I. of England, and many young nobles (140 youths of the principal families of France and Britain), were overtaken by a storm, and all lost, Nov. 26, 1120. The British man-of-war *Victory*, of 100 guns and 1160 men, was wrecked here, Oct. 5, 1744; the admiral, sir John Balcham, and all his crew perished.

ALDERSHOT CAMP, near Farnham, about 35 miles from London. In April, 1854, the War Office, having obtained a grant of 100,000*l.*, purchased 4000 acres of land, for a permanent camp for 20,000 men. Barracks have been since erected for 4000 infantry, 1500 cavalry, and several batteries of artillery. In 1859, about 15,000 men were stationed here. (Cost, up to Feb. 1860, said to be 1,291,531*l.*) Great improvements in military cookery have been introduced here under the superintendence of captain John Grant. See *Cookery*.—On July 7, 1856, the queen reviewed the troops returned from the Crimea; and again on the 16th, in the presence of both houses of parliament.

ALDINE PRESS, that of Aldus Manutius, at Venice, where were printed many of the first editions of the Greek, Latin, and Italian classics, commencing in 1494 with *Museus*.

ALE, BEER (and Wine) are said to have been invented by Bacchus; the first in Egypt, where the soil was considered unable to produce grapes. Ale was known as a beverage at least in 404 B.C. Herodotus ascribes the first discovery of the art of brewing barley-wine to Isis, the wife of Osiris.—A beverage of this kind is mentioned by Xenophon, 401 B.C. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. *Tacitus*. Ale-houses are made mention of in the laws of Ina, king of Wessex (A.D. 688). Booths were set up in England 728, when laws were passed for their regulation. Ale-houses were subjected to regulation by 5 & 6 Edw. VI. c. 25 (1551). By 1 James I. c. 9 (1603), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excise duty on ale and beer was imposed on a system nearly similar to the present, 13 Charles II. (1660). See *Beer, Porter, Wine*.

ALEMANNI, OR ALL MEN (*i. e.* men of all nations), hence *Allemand*, German. A body of Suevi, who took this name, were defeated by Caracalla, A.D. 214. After several repulses, they invaded the empire under Aurelian, 270; who subdued them in three battles. They were again vanquished by Julian, 356, 357. They were defeated and subjugated by Clovis at Tolbiac (or Zulpich), 496. The Suabians are their descendants.

ALENÇON (N. France) gave title to a count and duke.

1268. Peter made count by his father king Louis IX.
1293. Charles I., of Valois, made count by his brother king Philip the Fair.
1325. Charles II., his son, killed at Crecy.
1346. Charles III. (his son), became a priest.
1361. Peter, his brother.

1404. John (his son), made DUKE in 1414, killed at Agincourt, 1415.
1415. John II. (his son), intrigued against the king.
1476. Charles IV. fled after the battle of Pavia in 1525, and died shortly after of chagrin. The duchy was absorbed by the crown.

ALEPPO (anciently Berea), a large town, N. Syria, called by the natives Haleb. The pachalic of Aleppo is one of the five governments of Syria. It was taken by the Turks, A.D. 638; by Saladin, 1193; and sacked by Timour, 1400. Its depopulation by the plague has been frequent; 60,000 persons were computed to have perished by it in 1797. It suffered by the plague in 1827, and the cholera in 1832. Aleppo suffered severely from the terrible earthquakes in 1822 and 1830; and has often been the scene of fanatical massacres. On Oct. 16, 1850, the Mahometans attacked the Christian inhabitants. They burnt everything in their way; three churches were destroyed, five others were plundered, thousands of persons were slain, and the total loss of property amounted to about a million sterling; no interference was attempted by the pacha or the Turkish soldiers.

ALESSANDRIA, a city of Piedmont, built in 1168 under the name of Casarea by the Milanese and Cremonese, to defend the Tanaro against the emperor. It was named Alessandria after pope Alexander III. Near it the Austro-Russian army under Suwarrow defeated the French under Moreau. The French had possessed themselves of Alessandria the year before, but were driven out July 21, 1799. It was again delivered up to them after the

battle of Marengo, in 1800. Marengo lies east of the town. Alessandria was strongly fortified by Napoleon. Its works were destroyed at the peace in 1814, but a European subscription was commenced in 1856, to restore them.

ALEXANDER, ERA OF, dated from the death of Alexander the Great, Nov. 12, 323 B.C. In the computation of this era, the period of the Creation was considered to be 5502 years before the birth of Christ, and, in consequence, the year 1 A.D. was equal to 5503. This computation continued to the year A.D. 284, which was called 5786. In the next year (A.D. 285), which should have been 5787, ten years were discarded, and the date became 5777. This is still used in the Abyssinian era, *which see*. The date is reduced to the Christian era by subtracting 5502 until the year 5786, and after that time by subtracting 5492.

ALEXANDRIA (Egypt), the walls whereof were six miles in circuit, was built by Alexander the Great, 332 B.C., who was buried here, 322. It became the residence of the Greek sovereigns of Egypt, the Ptolemies, who made it a magnificent city. The celebrated library was founded by Ptolemy Soter, in 298 B.C.; it was said to contain 400,000 valuable works in MS., when burnt by a fire which occurred when Julius Cæsar took the city, 48 A.C. Another library was destroyed A.D. 390, when paganism was suppressed by the decree of Theodosius. Conquered by the Saracens, 640, when the second library, consisting of 700,000 volumes, was totally destroyed by the victors, who heated the water for their baths for six months by burning books instead of wood, by command of the caliph Omar.* Plundered by the crusaders in 1365. Alexandria was formerly a place of great trade, all the treasures of the east being deposited here before the discovery of the route by the Cape of Good Hope. Taken by the French under Bonaparte, when a massacre ensued, July 5, 1798; and from them by the British in the memorable battle mentioned in next article, in 1801. Again taken by the British under general Fraser, March 20, 1807, but evacuated, Sept. 23, same year. *See Syria and Turkey*. The railway to Cairo was formed in 1851.

ALEXANDRIA, BATTLE OF, between the French (16,000) under Menou, who made the attack, and the British under sir Ralph Abercromby, amounting to about 12,000 men, which had but recently debarked; fought March 21, 1801. The British were victorious, but sir Ralph Abercromby was mortally wounded; after the retreat of Menou, he was carried to the admiral's ship, and died on the 28th. The French lost about 3000; the British 1400. The command devolved on major-general Hutchinson, who baffled all the schemes of Menou, and obliged him to surrender, Sept. 2 following, the victor guaranteeing the conveyance of the French (whose number exceeded 10,000) to a French port in the Mediterranean.

ALEXANDRIAN CODEX, a MS. of the whole Bible in Greek; said to have been written by a lady named Thecla, in the sixth century, and to have belonged to the patriarch of Alexandria in 1098. It was presented to Charles I. of England in 1628 by Cyrillus Lascaris, patriarch of Constantinople. It was placed in the British Museum in 1753, and was printed in fac-simile, 1786-1821.

ALEXANDRIAN SCHOOLS OF PHILOSOPHY. The first arose soon after the foundation of Alexandria, 332 B.C. It flourished under the patronage of the Ptolemies till about 100 A.C. It included Euclid (300), Archimedes (287—212), Apollonius (250), Hipparchus (150), and Hero (150). The second school arose about A.D. 140, and lasted till about 400. Its most eminent members were Ptolemy, the author of the Ptolemaic system (150), Diophantus, the arithmetician (200), and Pappus, the geometer (350).

ALEXANDRINES, verses of twelve syllables, first written by Alexander of Paris, about 1164, and since called after him. The last line of the Spenserian stanza is an Alexandrine. In Pope's *Essay on Criticism*, this verse is thus happily exemplified:—

"A needless Alexandrine ends the song,
That, like a wounded snake, drags its slow length along."

The longest English poem wholly in Alexandrine verse is Drayton's *Polyolbion*, published in 1612. Chapman's *Homer's Iliad* (1598) is in this measure.

ALFORD (N. Scotland), BATTLE OF. General Baillie, with a large body of Covenanters was defeated by the marquess of Montrose, July 2, 1645. There was discovered some years since, in one of the mosses near this place, a man in armour on horseback, supposed to have been drowned in attempting to escape from this battle.

ALGEBRA: Diophantus, said to be the inventor, first wrote upon it, probably about A.D. 200. It was brought into Spain by the Saracens, about A.D. 900; and into Italy by

* Doubtful: the celebrated saying of Omar—"That if the books agreed with the book of God, they were useless; if they disagreed, they were pernicious"—is denied by Mahometans. It is also attributed to Theophilus, archbishop of Alexandria (390), and to cardinal Ximenes (1500).

Leonardo Bonaccio of Pisa, in 1202. In 1494 Luca Paciolo published the first book on algebra in Europe. *Serret*. The first writer who used algebraical signs was Stifelius of Nuremberg, in 1544. The introduction of symbols for quantities was by Francis Vieta, in 1590, when algebra came into general use. *Moreri*. Descartes applied algebra to geometry about 1637. The binomial theorem of Newton, the basis of the doctrine of fluxions, and the new analysis, 1668. Dean Peacock's "Algebra" is a first-class work (1860).

ALGERIA. See *Algiers*.

ALGESIRAS, OR OLD GIBRALTAR (S. Spain). By this city, the Moors entered Spain in A.D. 710, and held it till 1343.—Two engagements took place here between the English fleet under sir James Saumarez and the united French and Spanish fleets, July 6 and 12, 1801. In the first the enemy was victorious, the English losing the *Pompey*; but their honour was redeemed in the latter conflict, the *San Antonio*, 74 guns, being captured. By an unfortunate error, two Spanish ships fired on each other and took fire; of 2000 men on board, 250 were saved by the English. *Alison*.

ALGIERS (N. Africa), the ancient kingdom of Numidia, was reduced to a Roman province by Julius Caesar, 44 B.C. The Romans were expelled by the Vandals, A.D. 435; these by the Greeks under Belisarius, A.D. 533, who gave way to the Saracens about 700. In 1516 the Algerines invited Aruc Barbarossa, the pirate chief, to their defence against the incursions of the Spaniards. He and his successors governed ably but corruptly; the latter as viceroys of the sultan of Turkey. The emperor Charles V. made an attempt to crush the Algerines in 1541, but failed. Deys were appointed by the Algerines themselves about 1600; and about 1623 they became independent of the sultan. The Algerines for ages braved the resentment of the most powerful states in Christendom, and the emperor Charles V. lost a fine fleet and army in an unsuccessful expedition against them, in 1541. Algiers was terrified into pacific measures by admiral Blake in 1655, and by Du Quesne in 1683. In consequence of the continued piracy of the Algerines, the city was successfully bombarded by the British fleet, under admiral lord Exmouth, Aug. 27, 1816, when a new treaty followed, and Christian slavery was abolished. Algiers surrendered to a French armament under Bourmont and Duperré, after some severe conflicts, July 5, 1830, when the dey was deposed, and the barbarian government wholly overthrown. The French ministry announced their intention to retain Algiers permanently, May 20, 1834. Shortly after, the celebrated Arab chief, Abd-el-Kader, preached a holy war, became powerful, and attacked the French, at first successfully. Marshal Clausel defeated the Arabs in two battles, and entered Mascara, Dec. 8, 1836. General Damremont attacked Constantina (*which see*) Oct. 13, 1837; and afterwards various engagements between the French and the natives took place. Abd-el-Kader surrendered Dec. 22, 1847, and after a contest of seventeen years, his country became a colony of France, as "ALGERIA."* An insurrection of the Kabyles in 1851 was subdued by the French, after several sharp engagements. In 1858 the government was entrusted (for a short time) to prince Napoleon. The Arab tribes attacked the French, and were twice defeated, Oct. 31 and Nov. 6, 1859. In Sept. 1860, Algiers was visited by the emperor Napoleon III. In Nov. 1860, marshal Pelissier, duke of Magenta, was appointed governor-general.

ALHAMBRA, a Moorish palace and fortress near Grenada in Spain, founded by Mohammed I. of Grenada about 1253. It surrendered to the Christians Jan. 6, 1496. The remains have been described in a magnificent work by Owen Jones and Jules Goury, published 1842-5. There is a fac-simile of a part of this palace in the Crystal Palace at Sydenham. The Panopticon (*which see*) was opened as a circus, &c., under this name, in March 1858.

ALI, Secr or, founded by the Mahometan chief Ali (who married Mahomet's daughter Fatima), about A.D. 632. He became Mahomet's vizir, 613; and caliph, 655. Ali was called by the prophet, "the lion of God, always victorious;" and the Persians follow the interpretation of the Koran according to Ali, while other Mahometans adhere to that of Abubeker and Omar. Ali was assassinated in 660.†—This sect is also called Fatimites.

* He, with his suite, embarked at Oran, and landed at Toulon on Dec. 28 following. He was removed to the castle of Amboise, near Tours, Nov. 2, 1848, and released from his confinement by Louis Napoleon, Oct. 16, 1852, after swearing on the Koran never to disturb Africa again; he was to reside henceforward at Broussa, in Asia Minor; but in consequence of the earthquake at that place Feb. 28, 1855, he removed to Constantinople. In July, 1860, Abd-el-Kader held the citadel of Damascus, and there protected many of the Christians whom he had rescued from the massacres then in perpetration by the Turks. He received honours from the English, French, and Sardinian sovereigns.

† The first four successors of Mahomet—Abubeker, Omar, Othman, and Ali, his chief agents in establishing his religion and extirpating unbelievers, and whom on that account he styled the "cutting swords of God," all died violent deaths; and his family was wholly extirpated within thirty years after his own decease.

ALIENS, or FOREIGNERS, were banished in 1155, being thought too numerous. In 1343 they were excluded from enjoying ecclesiastical benefices. By 2 Rich. II. st. 1, 1378, they were much relieved. When they were to be tried criminally, the juries were to be half foreigners, if they so desired, 1430. They were restrained from exercising any trade or handicraft by retail, 1483. The celebrated *Alien Bill* passed, January, 1793. Act to register aliens, 1795.—The celebrated baron Geramb, a conspicuous and fashionable foreigner, known at court, was ordered out of England, April 6, 1812.—Bill to abolish their naturalisation by the holding of stock in the banks of Scotland, June, 1820. New registration act, 7 Geo. IV. 1826. This last act was repealed and another statute passed, 6 Will. IV. 1836. The rigour of the alien laws was much mitigated by 7 & 8 Vict. c. 66, 1844.—**ALIEN** priories were suppressed in England in 1414.*

ALIWAL, a village in N.W. India, the site of a battle on Jan. 28, 1846, between the Sikh army under sirdar Runjoor Singh Majeethea, 19,000 strong, supported by 68 pieces of cannon, and the British under sir H. Smith, 7000 men, with 32 guns. The contest was obstinate, but ended in the defeat of the Sikhs, who lost nearly 6000 killed or drowned in attempting to recross the Sutlej.

ALKALIES (from *kali*, the Arabic name for the plant from which an alkaline substance was first procured) are ammonia, potash, soda, and lithia. The fixed alkalies, potash and soda, were decomposed in 1808 by Humphry Davy at the Royal Institution, London. In 1816 Dr. Ure invented an alkalimeter. The manufacture of alkalies, very extensive in Lancashire and Cheshire, are based on the decomposition of common salt (chloride of sodium), by a process invented by a Frenchman named Le Blanc, about 1792. Mr. Lesh obtained crystals of soda from brine about 1814. Various modifications of these processes are now in use.

ALKMAER. See *Bergen*.

ALLAHABAD, the "holy city" of the Indian Mahometans, situated at the junction of the rivers Jumna and Ganges, N. W. Hindostan. By treaty here, Bengal, &c., was ceded to the English in 1765.—During the sepoy mutiny several regiments of the East India Company rose and massacred their officers, June 4, 1857; colonel Neil marched promptly from Benares and suppressed the insurrection. In Nov. 1861, lord Canning made this city the capital of the N. W. provinces.

ALLEGIANCE. The oath of allegiance, as administered in England for 600 years, contained a promise "to be true and faithful to the king and his heirs, and truth and faith to bear of life and limb and terrene honour; and not to know or hear of any ill or damage intended him, without defending him therefrom." The new oath, administered in 1605, was altered by the convention parliament, 1688; and again in favour of the Jews in 1858. See *Oaths*.

ALLEGORY is very ancient; the Bible abounds in it. See Jacob's blessing upon his sons, *Genesis* xlix. (B.C. 1689), and *Psalms* lxxx. Spenser's *Faerie Queene* (1590) and Bunyan's *Pilgrim's Progress* (1678) are allegories throughout; Addison's writings in the *Spectator* (1711) abound in allegories.

ALLIA (Italy), a small river flowing into the Tiber, where Brennus and the Gauls defeated the Romans July 16, 390 or 389 B.C. The Gauls sacked Rome and committed so much injury that the day was thereafter held to be unlucky (*nefas*), and no public business was permitted to be done thereon.

ALLOTMENTS. See *Land*, note.

* "Foreigners have reclaimed our marshes, drained our fens, fished our seas, and built our bridges and harbours." *Smiles*, 1861.

ALL SAINTS' DAY (Nov. 1). The festival was introduced about A.D. 625, and instituted by pope Gregory IV. 835. All Saints', or All-Hallows' in the Protestant church, is a day for the commemoration of all those saints and martyrs in whose honour no particular day is assigned. The church of Rome and the Greek church have saints for every day in the year. The reformers of the English church A.D. 1549 provided offices only for very remarkable commemorations, and struck out of their calendar altogether a great number of anniversaries, leaving only those which at *their time* were connected with popular feeling or tradition.

ALL SOULS' DAY (Nov. 2), a festival of the Roman Catholic church instituted, it is said, at Cluny in 993.

"ALL THE TALENTS" ADMINISTRATION. On the death of Mr. Pitt (Jan. 23, 1806), lord Grenville formed a ministry, in union with Mr. Fox and his friends, Feb 5, 1806. The friends of this ministry gave it the appellation of "All the Talents," which, being echoed in derision by the opposition, it has since retained. The death of Mr. Fox, Sept 13, 1806, led to various changes, and it was dissolved, March 1807.

Lord Grenville, *first lord of the treasury*.
 Lord Henry Petty (afterwards marquess of Lansdown), *chancellor of the exchequer*.
 Earl Fitzwilliam, *lord president*.
 Viscount Sidmouth (late Mr. Addington), *privy seal*.
 Charles James Fox, *foreign secretary*.
 Earl Spencer, *home secretary*.
 William Windham, *colonial secretary*.
 Lord Erskine, *lord chancellor*.

Sir Charles Grey (afterwards viscount Howick and earl Grey), *admiralty*.
 Lord Minto, *board of control*.
 Lord Auckland, *board of trade*.
 Lord Moira, *master-general of the ordnance*.
 R. B. Sheridan, *treasurer of the navy*.
 Richard Fitzpatrick, &c.
 Lord Ellenborough (*lord chief justice*), had a seat in the cabinet.

ALMA, BATTLE OF THE. See *Russo-Turkish War and Crimea*. The English, French, and Turkish army (with about 50,000 men) moved out of their first encampment in the Crimea on Sept. 19, 1854, and bivouacked for the night on the left bank of the Bulganac. The Russians (commanded by prince Menschikoff), mustering 40,000 infantry, had 180 field-pieces on the heights, and on the morning of the 20th were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces, under lord Raglan, consisted of 25,000 men; the French of 23,000, under marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river Alma was crossed, while prince Napoleon took possession of the village under the fire of the Russian batteries. At 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 5000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men killed, and 73 officers and 1539 men wounded (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed, and 54 officers and 1033 men wounded. Total loss of allies, about 3300.

ALMACK'S ASSEMBLY-ROOMS, in King-street, St. James's, London, were erected by a Scotchman named Almack, and opened Feb. 12, 1765. Latterly the very exclusive character of the assemblies held here declined.

ALMANACS (the Arabic from *al manah*, to count): The Egyptians computed time by instruments. The Alexandrians had almanacs. Log calendars were anciently in use. In the British Museum and universities are curious specimens of early almanacs. Michael Nostradamus, the celebrated astrologer, wrote an almanac in the style of Merlin, 1556. *Dufresnoy*. Among the earlier and more remarkable almanacs were

John Somer's Calendar, written in Oxford A.D. 1380	Connaissance des Temps (by Picard)	A.D. 1699
One in Lambeth palace, written in . . . 1460	Moore's Almanack	1698 or 1713
First printed one, published at Buda . . . 1472	Lady's Diary	1705
First printed in England, by Richard Pynson . 1497	Season on the Seasons	1735
Tyball's Prognostications	Gentleman's Diary	1741
Almanac Logeotis	Nautical Almanack, begun by Dr. Neville Mas-	
Lilly's Ephemeris	kelyne (materially improved in 1834) . . .	1767
Poor Robin's Almanac	British Imperial Calendar	1809
British Merlin	Hone's Every-Day Book	1826
Edinburgh Almanac	British Almanac and Companion	1828

Of Moore's (under the management of Henry Andrews, the able computer of the *Nautical Ephemeris*) at one time upwards of 430,000 copies were annually sold. He died in 1820. The Stationers' company claimed the exclusive right of publishing almanacs, in virtue of letters patent from James I., granting the privilege to them and the two universities; but the monopoly was broken up by a decision of the Court of Common Pleas in 1775. A bill to renew the privilege was lost in 1779.—Of foreign almanacs, the principal are the "Almanach de France," first published in 1699, and the "Almanach de Gotha," 1764.—The stamp duty on English almanacs was abolished in August, 1834; since when almanacs have been innumerable.

ALMANZA (Spain), **BATTLE OF** (April 14, 1707), between the English, Dutch, and Portuguese forces under the earl of Galway, and the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II.). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

ALMEIDA (Portugal), a frontier town, captured by Massena, Aug. 27, 1810. The French crossed into Spain, leaving a garrison at Almeida, blockaded by the English, April 6, 1811. Almeida was retaken by Wellington (May 10), who eventually compelled Massena to retire from Portugal, his route being tracked by horrid desolation.

ALMOHADES, Mahometan partisans, followers of El-Mehedi in Africa, about 1120. They subdued Morocco, 1145; entered Spain and took Seville, Cordova, and Granada, 1146-56; ruled Spain till 1232, and Africa till 1278.

ALMONER, an office of uncertain origin, anciently allotted to a dignified clergyman, who had the privilege of giving the first dish from the royal table to the poor, or instead thereof an alms in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France (*le grand aumônier*) was the highest ecclesiastical dignity in that kingdom before the revolution, 1789. Queen Victoria's almoner (now the bishop of Oxford) or his sub-almoner distributes the queen's gifts on *Maiden Thursday* (which see.)

ALMORAVIDES, Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohades in 1145.

ALMSHOUSES for aged and infirm persons have been erected by very many public companies and benevolent individuals, particularly since the destruction of religious houses at the time of the Reformation in the 16th century. A list of them, with useful information, will be found in "Low's Charities of London," ed. 1862.

Cornelius Van Don founded the Red Lion alms-
houses, Westminster A.D. 1577
Emmanuel College, Westminster, founded by
Lady Dacre 1594
Whittington's almshouses, founded in 1621,
were rebuilt near Highgate-hill by the Mer-
cers' company 1826
The Fishmongers' company founded almshouses
in 1618, and rebuilt them on Wandsworth-
common 1850

Dame Owen's almshouses, Islington, built in
1613 (in gratitude for her escape from an
'arrow-shot' were rebuilt by the Brewers'
company 1839
Baneroff's almshouses, Mile End, were erected 1735
The London almshouses, in commemoration of
the passing of the Reform Bill, built at
Brixton 1833

ALNEY, BATTLE OF, or rather single combat, asserted to have taken place between Edmund Ironside and Canute the Great, on an island on the Severn, Gloucestershire, in sight of their armies; when the latter was wounded, he proposed a division of the kingdom, the south part falling to Edmund; but Edmund having been murdered at Oxford shortly after the treaty, according to some by the treachery of Ædric Streon, Canute was left in possession of the whole kingdom, A.D. 1016.

ALNWICK (Saxon *Ealnwic*), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesco. It has belonged to the Percies since 1310. Malcolm, king of Scotland, besieged Alnwick in 1093, when he and his sons were killed. It was taken by David I. in 1135, and attempted in 1174 by William the Lion, who was taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparing expense.

ALPACA (or *Paco*), a species of the S. American quadruped the Llama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory, &c. (covering 11 acres), was erected at Salthair, near Shipley, Yorkshire, by Mr Titus Salt in 1852.

ALPHABET. Athotes, son of Menes, is said to have been the author of hieroglyphics, and to have written thus the history of the Egyptians, 2122 B.C. *Blair*. But Josephus affirms that he had seen inscriptions by Seth, the son of Adam; this is deemed fabulous.—The Egyptian alphabet is ascribed to Memnon, 1822 B.C. The first letter of the Phœnician and Hebrew alphabet was *aleph*, called by the Greeks *alpha*, and abbreviated by the moderns to A. The Hebrew is supposed to be derived from the Phœnician. Cadmus the founder of Cadmea, 1493 B.C., is said to have brought the Phœnician letters (fifteen in number) into Greece, viz. —A, B, Γ, Δ, I, K, Λ, M, N, O, Π, P, Σ, T, Y. These letters were originally either Hebrew, Phœnician, or Assyrian characters, and changed gradually in form till they became the ground of the Roman letters, now used all over Europe. Palamedes of Argos invented the double characters, Θ, X, Φ, Ξ, about 1224 B.C.; and Simonides added Z, Ψ, Η, Ω, about 489 B.C. *Arundelian Marbles*.—When the E was introduced is not precisely known.

The Greek alphabet consisted of 16 letters till 399 (or 403) B.C., when the Ionic of 24 characters was introduced. The small letters, for the convenience of writing, are of later invention. The alphabets of the different nations contain the following number of letters :—

English 26	German 26	Greek 24	Turkish 28
French 25	Slavonic 42	Hebrew 22	Sanscrit 44
Italian 20	Russian 35	Arabic 28	Chinese radical cha- racters 214
Spanish 27	Latin 22	Persian 32	

ALPHONSINE TABLES, astronomical tables, composed in 1253 under the direction of Alphonsus X., of Castile, surnamed the Wise, who is said to have expended upwards of 400,000 crowns in completing the work ; he himself wrote the preface.

ALPS, a European range of mountains. Those between France and Italy were passed by Hannibal 218 B.C., by the Romans 154 B.C., and by Napoleon I. in A.D. 1800. Roads over Mount Cenis and the Simplon, connecting France and Italy, were constructed by order of Napoleon between 1801-6. See *Simplon*. A sub-alpine tunnel through Mount Cenis to connect France and Piedmont has been in progress since 1858. In Jan. 1862 about 2050 yards had been pierced. In 1859 the "Alpine Club," which consists of British travellers in the Alps, published their first work, "Peaks, Passes, and Glaciers."

ALSATIA, a cant name given to the precinct of Whitefriars, London, described in Scott's "Fortunes of Nigel." Its privilege of sanctuary was abolished in 1696.

ALTAR. One was built by Noah, 2348 B.C. (*Gen.* viii. 20). Altars were raised to Jupiter, in Greece, by Cærops, who is said to have instituted marriages, 1556 B.C. He introduced among the Greeks the worship of the deities of Egypt. *Herodotus*. The term "altar" was applied to the Lord's table for the first three centuries after Christ (*Heb.* xiii. 10). Christian altars in churches were instituted by pope Sixtus I., A.D. 135; and were first consecrated by pope Sylvester. The first Christian altar in Britain was in 634. *Stow*. The church of England terms the table on which the elements are placed an altar. Since the time of Elizabeth there has been much controversy on the subject, and the Puritans in the civil war destroyed many of the ancient stone altars, substituting wooden tables. In 1845 it was decided in the Arches Court that stone altars were not to be erected in English churches.

ALTER EGO (*another or second I*), a term applied to Spanish viceroys when exercising regal power ; used at Naples when the crown prince was appointed vicar-general during an insurrection in July 1820.

ALT-RANSTADT, Prussia, where the treaty of peace between Charles XII. of Sweden, and Frederick Augustus of Poland, was signed, Sept. 24, 1706. Frederick, deposed in 1704, was afterwards restored.

ALUM is said to have been first discovered at Rocha, in Syria, about A.D. 1300 ; it was found in Tuscany about 1470 ; was brought to perfection in England, in 1608 ; was discovered in Ireland in 1757 ; and in Anglesey in 1790. Alum is a salt used as a mordant in dyeing ; and also to harden tallow, to whiten bread, and in the paper manufacture. It may be made of pure clay exposed to vapours of sulphuric acid, and sulphate of potash added to the ley ; but is usually obtained by means of ore called alum slate. Sir T. Challoner established large alum works near Whitby in 1608.

ALUMBAGH, a fort near Lucknow, India, heroically defended by the British under sir James Outram during the mutiny in 1857. He defeated an attack of 30,000 sepoys on Jan. 12, 1858, and of 20,000 on Feb. 21. He was relieved by sir Colin Campbell in March.

ALUMINIUM, a metal, the base of the earth alumina (*clay*), first obtained by F. Wöhler in 1827 ; was for some time merely a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste.-Claire Deville, who in 1856 succeeded in procuring considerable quantities of this metal. It is very light (sp. g. 2.25), malleable, and sonorous ; does not rust, and is not acted on by sulphur or any acid except hydrochloric. These qualities will render it very useful when improved processes render it cheaper. In March 1856, it was 3*l.* the ounce ; in June 1857, 11*s.* or 12*s.*, and is now much cheaper (1862). The eagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, "De l'Aluminium" was published in 1859. An aluminium manufactory was established at Newcastle in 1860, by Messrs. Bell. Their aluminium bronze is much admired.

AMADIS OF GAUL, a Spanish or Portuguese romance, stated to have been written about 1342 by Vasco de Lobeiro. It was translated and enlarged by De Montalvo about 1485.

AMALEKITES, a tribe of Canaanites, who attacked the Israelites 1491 B.C., when perpetual war was denounced against them. They were subdued by Saul about 1079; by David, 1058 and 1056; and by the Simeonites about 715 B.C.

AMAZON, West India mail steam-ship, left Southampton on her first voyage, Friday, Jan. 2, 1852, and on Sunday morning, Jan. 4, was destroyed by fire at sea, about 110 miles W. S. W. of Scilly (supposed by the spontaneous ignition of combustible matter placed near the engine-room). Out of 161 persons on board (crew and passengers, women and children), 102 persons must have perished by fire or drowning. 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galliot. Eliot Warburton, a distinguished writer in general literature, was among those lost.

AMAZONIA (S. America) was discovered by Francisco Orellana, in 1540. Coming from Peru, he sailed down the river Amazon to the Atlantic, and observing companies of women in arms on its bank, he called the country Amazonia, and gave the name of Amazon to the river, which had previously been called Marañon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambushes by their enemies. Their widows resolved to form a female state, and having firmly established themselves, they decreed that matrimony was a shameful servitude. *Quintus Curtius*. They were said to have been conquered by Theseus, about 1231 B.C. The Amazons were constantly employed in wars; and that they might throw the javelin with more force, their right breasts were burned off, whence their name from the Greek, *a*, no, *mazos*, breast. Others derive the name from *maza*, the moon, whom they are supposed to have worshipped. About 330 B.C. their queen, Thalestris, visited Alexander the Great, while he was pursuing his conquests in Asia; three hundred females were in her train. *Herodotus*.

AMBASSADORS. Accredited agents, and representatives from one court to another, are referred to early ages. In most countries they have great privileges; and in England, they and their servants are secured against arrest. The Russian ambassador was imprisoned for debt by a lace-merchant, July 27, 1708; but in 1709 the statute of 3 Anne was passed for the protection of ambassadors.—Two men were convicted of arresting the servant of an ambassador; they were sentenced to be conducted to the house of the ambassador, with a label on their breasts, to ask his pardon, and then one of them to be imprisoned three months, and the other fined, May 12, 1780. *Phillips*.—England usually has twenty-five ambassadors or envoys extraordinary, and about thirty-six chief consuls, resident at foreign courts, exclusive of inferior agents; the ambassadors and other agents from abroad at the court of London in 1861 were 49.—Among the more memorable instances of interchange it may be recorded, that the first ambassador from the United States of America to England was John Adams, presented to the king, June 2, 1785; and the first from Great Britain to America was Mr. Hammond, in 1791.

AMBER, a carbonaceous mineral,* principally found in the northern parts of Europe, of great repute in the world from the earliest time; esteemed as a medicine before the Christian era: Theophrastus wrote upon it, 300 B.C. Upwards of 150 tons of amber have been found in one year on the sands of the shore near Pillau. *Phillips*.

AMBOYNA, one of the Molucca isles, discovered about 1512 by the Portuguese, but not wholly occupied by them till 1580. It was taken by the Dutch in 1605. The English factors at this settlement were cruelly tortured and put to death, Feb. 17, 1623-4, by the Dutch, on an accusation of a conspiracy to expel them from the island, where the two nations resided and jointly shared in the pepper trade of Java. Cromwell compelled the Dutch to give a sum of money to the descendants of the sufferers. Amboyna was seized by the English, Feb. 16, 1796, but was restored by the treaty of Amiens, in 1802. It was again seized by the British, Feb. 17-19, 1810; and again restored at the peace of 1814.

AMEN, an ancient Hebrew word meaning *true, faithful, certain*. At the end of a prayer, it implies *so be it*; at the termination of a creed, *so it is*. It is used in the Jewish and Christian assemblies, at the conclusion of prayer. See 1 Cor. xiv. 16 (A.D. 59).

* Much diversity of opinion still prevails among naturalists and chemists, respecting the origin of amber, some referring it to the vegetable, others to the mineral, and some to the animal kingdom; its natural history and chemical analysis affording something in favour of each opinion. It is considered by Berzelius to have been a resin dissolved in volatile oil. It often contains delicately-formed insects. Sir D. Brewster concludes it to be indurated vegetable juice. When rubbed it becomes electrical, and from its Greek name, *electron*, the term Electricity is derived.

AMENDE HONORABLE, in France, in the ninth century, was an infamous punishment inflicted on traitors and sacrilegious persons : the offender was delivered into the hands of the hangman : his shirt was stripped off, a rope put about his neck, and a taper in his hand ; he was then led into court, and was obliged to beg pardon of God and the country. Death or banishment sometimes followed.

AMERCEMENT, IN LAW, a fine assessed for an offence done, or pecuniary punishment at the *mercy* of the court : thus differing from a fine directed and fixed by a statute. By Magna Charta a freeman cannot be amerced for a small fault, but in proportion to the offence he has committed, 9 Henry III. 1224.

"AMERICA," an American yacht, schooner-built, 171 tons burthen. On Aug. 22, 1851, at Coves regatta, in a match round the Isle of Wight for a cup worth 100*l.*, open to all nations, she came in first by 8 miles, owing to her superior construction.

AMERICA, NORTH, is said to have been discovered by Icelanders in 1001, and also to have been known to the Vikings or Norsemen. It was discovered by Christoforo Colombo, a Genoese, better known as Christopher Columbus, Oct. 11, 1492, when he came in sight of the island of St. Salvador. See *Bahama Islands*. The continent of America was discovered by Columbus in 1497, and the eastern coasts in 1498, by Admiral Hojeda, from the name of whose pilot, Amerigo Vespucci (Americus Vespucius*), the whole of America is named. See *America, South ; United States, Canada, Mexico, &c.*

tyranny in England, built New Plymouth	1620	France and Spain, ceded by the latter to the	
Nova Scotia settled, under Sir William Alex-		English	—
ander, by the Scotch	1622	See <i>United States</i> .	

AMERICA, SOUTH. Cabral visited the coast of Brazil in 1500, and discovered the river Amazon ; and Penzon entered the river La Plata in 1508. When the Spaniards landed in Peru, A.D. 1530, they found it governed by sovereigns called Incas, who were revered by their subjects as divinities, but were soon subdued by their invaders ; under the command of Francis Pizarro, by whom enormous cruelties were practised.† In 1535 Mendoza founded Buenos Ayres, and conquered the neighbouring country. Spanish America successfully asserted its freedom within the present century ; the provinces declared their independence in 1810, proclaimed the sovereignty of the people in July 1814 : and since have wholly shaken off the yoke of Spain. Their independence was recognised by England, in sending consuls to the several new states, Oct. 30, 1823, *et seq.* ; and by France, Sept. 30, 1830. See *Brazil, Buenos Ayres, Colombia, Lima, Peru, &c.*

AMERICA, CENTRAL, including the states of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, *which see*, declared their independence Sept. 21, 1821, and separated from the Mexican confederation, July 21, 1823. The states made a treaty of union between themselves March 21, 1847. There has been among them since much anarchy and bloodshed, aggravated greatly by the irruption of American filibusters under Kenny and Walker, 1854-5. —Population, 1859, about 2,355,000. See *Nicaragua, Darien, and Panama*.

* An astronomer of Florence, died 1512 ; Humboldt has vindicated his character from the charge of presumption, and asserts that the new continent received its name from the Germans without the knowledge or consent of Americus.

† Las Casas describes the barbarity of the Spaniards while pursuing their conquests. In Jamaica, he says, they hanged the unresisting natives by thirteen at a time, in honour of the thirteen apostles ! and he has beheld them throw the Indian infants to their dogs for food ! " I have heard them," says Las Casas, " borrow the limb of a human being to feed their dogs, and have seen them the next day return a quarter of another victim to the lender ! " Depopulation led to the importation of African slaves.

AMERICANISMS: a useful dictionary of these expressions was compiled by John R. Bartlett, and first published in 1848.

AMETHYST, the ninth stone upon the breastplate of the Jewish high priest; and on it was engraved the name *Issachar*. It is of a rich violet colour. One worth 200 rix-dollars, having been rendered colourless, equalled a diamond in lustre, valued at 18,000 gold crowns. *De Boot, Hist. Gemmarum*.—Amethysts discovered at Kerry, in Ireland, in 1775. *Burns*.

AMIENS, an ancient city in Picardy (N. France): the cathedral was built in 1220. It was taken by the Spanish and English Sept. 25, 1597. The preliminary articles of the memorable peace between Great Britain, Holland, France, and Spain, fifteen in number, were signed in London by lord Hawkesbury and M. Otto, on the part of England and France, Oct. 1, 1801; and the definitive treaty was subscribed at Amiens, on March 27, 1802, by the marquess of Cornwallis for England, Joseph Bonaparte for France, Azara for Spain, and Schimmelpenninck for Holland.—War was declared again in 1802.

AMMONIA, the volatile alkali, mainly produced by the decomposition of organic substances. Its name is ascribed to its having been procured from heated camel's dung near the temple of Jupiter Ammon in Libya. The discovery of its being a compound of nitrogen and hydrogen is ascribed to Joseph Priestley in 1774. By the recent labours of chemists the oxide of the hypothetical metal ammonium, and ammonium amalgam, have been formed. Specimens of each were shown at the Royal Institution in 1856 by Dr. A. W. Hofmann, who has done very much for the chemical history of ammonia.

AMMONITES, descended from Ben-Ammi, the son of Lot (1897 B.C.). They invaded the land of Canaan and made the Israelites tributaries, but they were defeated by Jephthah, 1143 B.C. They again invaded Canaan in the reign of Saul, with an intention to put out the right eye of all these they subdued; but Saul overthrew them, 1095 B.C. They were afterwards many times vanquished; and Antiochus the Great took Rabbah their capital, and destroyed all the walls, 198 B.C. *Josephus*.

AMNESTY (a general pardon after political disturbances, &c.) was granted by Thrasybulus, the Athenian patriot, after expelling the thirty tyrants with the assistance of only thirty friends, 403 B.C. Acts of amnesty were passed after the civil war in 1651, and after the two rebellions in England in 1715 and 1745.—After his victorious campaign in Italy, Napoleon III. of France granted an amnesty to all political offenders, Aug. 17, 1859.

AMPHICTYONIC COUNCIL, asserted traditionally to have been established at Thermopylae by Amphictyon, for the management of all affairs relative to Greece. This celebrated council, composed of twelve of the wisest and most virtuous men of various cities of Greece, began 1498 [1113, *Clinton*] B.C. Other cities in process of time sent also some of their citizens to the council of the Amphictyons, and in the age of Antoninus Pius, they were increased to the number of thirty. *Suidas*. Its immediate office was to attend to the temples and oracles of Delphi. It abused its office in causing the Sacred war, 356—346 B.C.

AMPHION, a British frigate, of 38 guns, blown up while riding at anchor in Plymouth Sound, and the whole of her crew then on board, consisting of more than two hundred and fifty persons, officers and men, perished, Sept. 22, 1796. *Butler*.

AMPHITHEATRES, said to be the invention of Julius Caesar and Curio. In the Roman amphitheatres, which were vast round or oval buildings, the people assembled to see the combats of gladiators, of wild beasts, and other exhibitions. They were generally built of wood, but Statilius Taurus made one of stone, under Augustus Caesar. The amphitheatre of Vespasian (capable of holding 87,000 persons) was built between A.D. 75 and 80; and is said to have been a regular fortress in 1312. See *Coliseum*. The amphitheatre at Verona was next in size, and then that of Nîmes.

AMPHITRITE, THE SHIP. See *Wrecks*, Aug. 30, 1833.

AMPUTATION, in surgery, was greatly aided by the invention of the tourniquet by Morel, a French surgeon in 1674; and of the flap-method by Lowdham of Exeter in 1679.

AMSTERDAM, Holland. The castle of Amstel was commenced in A.D. 1100; the building of the city in 1203. Its commerce was greatly increased by the decay of that of Antwerp after 1609. The exchange was built in 1634; and the noble stadthouse in 1648; the latter cost three millions of guilders, then a large sum. It is built upon 13,659 piles. Amsterdam surrendered to the king of Prussia, when that prince invaded Holland, in favour of the stadtholder, in 1787. The French were admitted without resistance, Jan. 18, 1795. The Dutch government was restored in December, 1813. The erection of a crystal palace has been proposed. See *Holland*.

AMULETS, or **CHARMS**, employed from the earliest times. Amulets were made of the wood of the true cross, about A.D. 328. They have been sanctioned in modern times by medical men—witness the anodyne necklace, &c.

AMYLENE, a colourless, very mobile liquid, procured by distilling fousel oil (potato-spirit) with chloride of zinc; discovered by M. Balard of Paris in 1844. The vapour was employed instead of chloroform first by Dr. Snow in 1856. It has since been tried in many hospitals here, and in France. The odour is more unpleasant than chloroform, and more vapour must be used. It is, however, thought less dangerous.

ANABAPTISTS. The sect arose about A.D. 1525, and was known in England before 1549. John of Leyden, Muncer, Storck, and other German enthusiasts, about the time of the Reformation, taught that infant baptism was a contrivance of the devil, that there is no original sin, that men have a free will in spiritual things, and other doctrines still more wild and absurd. They committed many violences, and in 1534 seized Munster, calling it Mount Zion, and one Mathias, a baker, was declared to be the king of Zion. Their enthusiasm led them to the maddest practices, and they at length rose in arms under pretence of gospel liberty. Munster was taken June 24, 1535, and the chiefs of the Anabaptists were put to death.—On Jan. 6, 1661, about 80 anabaptists in London appeared in arms, headed by their preacher, Thomas Venner, a wine-cooper. They fought desperately, and killed many of the soldiers brought against them. Their leader and sixteen others were executed, Jan. 19 and 21. *Annals of England*.—For the modern Anabaptists see *Baptists*.

ANACREONTIC VERSE, commonly of the jovial or Bacchanalian strain, named after Anacreon of Teos, the Greek lyric poet, whose odes are much prized. He is said to have been choked by a grape-stone in his eighty-fifth year, about 514 B.C. His odes were translated and published by T. Moore, 1800.

ANÆSTHETICS. See *Chloroform*, *Ether*, *Amylene*, *Kerosolene*. Intense cold is also employed in deadening pain.

ANAGRAM. A transposition of the letters of a name or sentence: as from *Mary*, the name of the Virgin, is made *army*. On the question put by Pilate to Our Saviour, "*Quid est veritas?*" (what is truth?) we have the remarkable anagram, "*Est vir qui adest*" (the man who is here). Another good one is "*Horatio Nelson*," and "*Honor est a Nilo*" (there is Honour from the Nile).—The French are said to have introduced the art as now practised, about the year 1560, in the reign of Charles IX. *Henault*.

ANATHEMA, among the Jews, was the devoting some person or thing to destruction, as in the case of Jericho (*Joshua* vi. 17). The word occurs 1 *Cor.* xvi. 22. Anathemas were used by the primitive churches, A.D. 387. See *Excommunication*.

ANATOMY (Greek, cutting up). The study of the human body was part of the philosophical investigations of Plato, Xenophon, and Aristotle; and it became a branch of medical art under Hippocrates, about 420 B.C. But Erasistratus and Herophilus may be regarded as the fathers of anatomy; they were the first to dissect the human form, as anatomical research had been previously confined to brutes: it is mentioned that they practised upon the bodies of living criminals, about 300 and 293 B.C. Galen, who died A.D. 193, was a great anatomist. In England, the schools were supplied with subjects unlawfully exhumed from graves; and, until lately, the bodies of executed criminals were ordered for dissection.* Pope Boniface VIII. forbade the dissection of dead bodies, 1297. The first anatomical plates, designed by Titian, were employed by Vesalius, about A.D. 1538. The great discoveries of Harvey were made in 1616. William and John Hunter were great anatomists; they died in 1783 and 1793. Quain's and Wilson's large anatomical plates were published in 1842. Comparative anatomy has been treated systematically by Cuvier, Owen, Müller, Huxley, and others. The anatomy of plants has been studied since 1680. See *Botany*.

ANCHORITES. See *Monachism*.

ANCHORS are of ancient use, and the invention belongs to the Tuscans. *Pliny*. The second tooth, or fluke, was added by Anacharsis, the Scythian (592 B.C.). *Strabo*. Anchors were first forged in England A.D. 578. Those of a first-rate ship of war (four) will weigh 99

* By 32 Henry VIII., c. 42 (1540), surgeons were granted four bodies of executed malefactors for "*anatomyses*," which privilege was extended in following reigns: but in consequence of the crimes committed by resurrection-men in order to supply the surgical schools (robbing churchyards and even committing murder, see *Burking*), a new statute was passed in 1832 (2 & 3 William IV.), which abated the ignominy of dissection by prohibiting that of executed murderers, and made provision for the wants of surgeons by permitting, under certain regulations, the dissection of persons dying in workhouses, &c. The act also appointed inspectors of anatomy, regulated the schools, and required persons practising anatomy to obtain a licence.

cwt. each, costing 450*l.* *Phillips*. The Admiralty anchor was introduced about 1841. Improved anchors were made by Pering and Rodgers about 1831; by Porter 1846; by Costell 1848; by Trotman 1853; and by several other persons. Trotman's is attached to the Queen's yacht the *Fairy*. The anchors of the *Great Eastern* are of enormous size.

ANCIENT HISTORY commences in the Holy Scriptures, and in the history of Herodotus about 1687 B.C. It is considered as ending with the destruction of the Roman empire in Italy, A.D. 476. Modern history begins with Mahomet (A.D. 622), or Charlemagne (768).

ANCONA, a port on the Adriatic. The mole was built by Trajan, A.D. 107. After many changes of rulers Ancona was finally annexed to the Papal States in 1532. In 1798 it was taken by the French; but was retaken by the Austrians in 1799. It was occupied by the French in 1832; evacuated in 1838; after an insurrection it was bombarded and captured by the Austrians, June 18, 1849. The Marches (comprising this city) rebelled against the Papal government in Sept. 1860. Lamoricière, the Papal general, fled to Ancona after his defeat at Castelfidardo, but was compelled to surrender himself, the city, and the garrison, on Sept. 29. The king of Sardinia entered soon after.

ANDRÉ'S EXECUTION. André (born 1751), was an adjutant-general in the British army, and was taken in disguise on his return from a secret expedition to the traitorous American general Arnold, Sept. 23, 1780. He was sentenced to execution as a spy by a court of general Washington's officers at Tappan, New York, and suffered death, Oct. 2 following. His remains were removed to England in a sarcophagus, Aug. 10, 1821, and interred in Westminster abbey. Impartial judges justify the severity of this punishment.

ANDREW, ST., said to have been martyred by crucifixion, Nov. 30, A.D. 69, at Patra, in Achaia. The festival was instituted about 359. Andrew is the titular saint of Scotland, owing to Hungus, the Pietish prince, having dreamed that the saint was to be his friend in a pending battle with the Northumbrians. St. Andrew's cross (x) appeared in the air during the fight, and Hungus conquered. The collar of an order of knighthood, founded on this legend, is formed of thistles (not to be touched), and of rue (an antidote against poison); the motto is *Nemo me impune lacessit* (*No one assails me with impunity*). The institution of the order is attributed to Achaius in the year 809; its revival is due to king James V. in 1540, and to James II. of England in 1687. See *Thistle*. The Russian order of St. Andrew was instituted in 1698 by Peter I.

ANDREW'S, St. (E. Scotland). Here Robert Bruce held his first parliament in 1309; and here Wishart was burnt by archbishop Beaton, who himself was murdered here in 1546. The university was founded in 1411 by bishop Wardlaw. The bishopric originated with the establishment of Christianity in Scotland. Sir R. Sibbald's list of the bishops of St. Andrew's commences with Killach, A.D. 872. The see became archiepiscopal in 1470, and ceased soon after the Revolution, 1689. St. Andrew's is now a post-revolution bishopric, re-instituted in 1844. See *Bishops*.

ANDRUSSOV, PEACE OF (Jan. 20, 1667), between Russia and Poland, by which the latter lost the greater part of her conquests among the Cossacks.

ANEMOMETER (Greek, *anemos*, the wind), a measurer of the strength and velocity of the wind, was invented by Wolfius, in 1709. The extreme velocity was found by Dr. Lind to be 93 miles per hour. Osler's & Whewell's anemometers were highly approved of in 1844.

ANEROID. See *Barometer*.

ANGEL, an ancient gold coin, weighing four pennyweights, was valued at 6*s.* 8*d.* in the reign of Henry VI., and at 10*s.* in the reign of Elizabeth, 1562. The *angelot*, a gold coin, value half an angel, was struck at Paris when held by the English, in 1431. *Wood*.

ANGELIC KNIGHTS OF ST. GEORGE. This order is said to have been instituted in Greece, A.D. 456. The *Angelici* were instituted by the emperor Angelus Comnenus, 1191. The *Angelice*, an order of nuns, were founded at Milan by Louisa Torelli A.D. 1534.

ANGERSTEIN GALLERY, the foundation of the National Gallery in London, was a small collection of about forty pictures, the most exquisite of the art, purchased by the British government for the public service for 60,000*l.*, of the executors of Mr. John Julius Angerstein, who died in 1822. The exhibition of these pictures was opened to the public, in Pall Mall, in May, 1824. See *National Gallery*.

ANGLESEY, OR ISLAND OF THE ANGLES (*ey*, in Saxon, signifying island). This celebrated seat of the Druids was subdued by the Romans under Agricola (who called it *Mona*) A.D. 78; and by the English in 1282. The fortress of Beaumaris was built by Edward I. to

overawe the Welsh, 1295. The spot in Anglesey where Suetonius Paulinus and his legions butchered the Druids, in A.D. 61, is still shown, at a ferry called Porthammell, across the Menai Straits. *Phillips*.

ANGLING. Its origin is uncertain; allusion is made to it by the Greeks and Romans, and in the Bible; *Amos*, iv. 2. (787 B.C.) Oppian wrote his "Halieutics," a Greek epic poem on Fishes and Fishing, probably about A.D. 198. Wynkin de Worde's *Treatyse of Fysshinge*, the first book printed on angling, appeared in 1496; and Izaak Walton's *Complete Angler* in 1653.

ANGLO-SAXONS, OR ANGLES, derive their name from a village near Sleswick, called *Anglen*, whose population (called *Angli* by Tacitus), joined the first Saxon freebooters. East Anglia was a kingdom of the heptarchy, founded by the Angles, one of whose chiefs, Uffa, assumed the title of king, A.D. 571; the kingdom ceased in 792. See *Britain*. Cædmon paraphrased part of the Bible in Anglo-Saxon about 680; a translation of the gospels was made by abbot Egbert, of Iona, 721; of Boethius, Orosius, &c., by Alfred, 888. The Anglo-Saxon laws were printed by the government, in 1840.

ANGRIA. This famous pirate's fort on the coast of Malabar, was invested by admiral Watson, and destroyed Feb. 11, 1756. The pirate, his wife, and family, were made prisoners; and great quantities of stores which were found in the fort, and several ships in the harbour, which he had taken from the East India Company, were seized.

ANHALT, HOUSE OF, in Germany, deduces its origin from Berentholdus, who made war upon the Thuringians in the sixth century. In 1606, the principality was divided among the four sons of Joachim Ernest, by the eldest, John George: hence the various branches of this family, of which Anhalt-Dessau and Anhalt-Bernbourg are the principal.

DUKE OF ANHALT-DESSAU-CÖBETHEN (*Subjects 119,515*).
1817. Leopold, Aug. 9 (born Oct. 1, 1794), the PRESENT
duke (1862).

DUKE OF ANHALT-BERNBOURG (*Subjects 56,000*).
1834. Alexander, March 24 (born March 2, 1805), the
PRESENT duke (1862).

ANHOLT, ISLAND OF, Denmark, was taken possession of by England in the French war, on account of Danish cruisers injuring British commerce. The Danes made an attempt to regain it with a force which exceeded 4000 men, but were gallantly repulsed by the British force not amounting to more than 150, March 14, 1811.

ANILINE, a basic oily body discovered in 1826 by Unverdorben among the products of distillation of indigo. Bechamp, in 1856, obtained it from benzole by the successive treatment of this substance with concentrated nitric acid and reducing agents. The scientific relations of Aniline have been carefully examined by several chemists, more especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was only in 1856 that Mr. W. A. Perkin showed how a violet oxidation-product could be applied in dyeing. Aniline is now manufactured upon a large scale for the commercial production of "Mauve" and "Magenta" (rosaniline), and several other colouring matters.

ANIMALCULÆ. Leenwenhoek's researches in 1677 produced the most astonishing revelations. His *Arcana Naturæ* was published at Leyden in 1696. The great works of Ehrenberg of Berlin, on the Infusorial Animalculæ, &c., were issued (1838-57). Pritchard's *Infusoria*, ed. 1860, is a valuable summary of our present knowledge of animalculæ.

ANIMAL MAGNETISM was introduced by father Hehl, a Jesuit, at Vienna, about 1774; and had its dupes in France and England in about 1788-89.* See *Mesmerism*.

ANIMALS, CRUELTY TO. The late Mr. Martin, M.P., as a senator, zealously laboured to repress this odious offence; and a society in London, which was established in 1824, effects much good this way. See *Cruelty to Animals Society*. Mr. Martin's act passed 3 Geo. IV. (1822). Similar acts were passed in 1827, 1835, 1837, 1849, and 1854. Dogs were forbidden to be used for draught by 2 & 3 Vict. c. 47 (1839).

ANJOU, a province in France, was inherited by Henry II. of England from his father Geoffrey Plantagenet. It was taken from his son John by Philip of France in 1205; was reconquered by Edward III., but relinquished by him in 1360; and was given by Charles V.

* It was a pretended mode of curing all manner of diseases by means of *sympathetic affection* between the sick person and the operator. The effect on the patient was supposed to depend on certain motions of the fingers and features of the operator, he placing himself immediately before the patient, whose eyes were to be fixed on his. After playing in this manner on the imagination and enfeebled mind of the sick, and performing a number of distortions and grimaces, the cure was said to be completed. Hehl for a short time associated with Mesmer, but they soon quarrelled.—Mr. Perkins (who died in 1799) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism;" but Drs. Falconer and Haygarth put an end to his pretensions by performing many wonders with a pair of wooden tractors. *Brande*.

to his brother Louis with the title of duke. It afterwards became an appanage of the French crown. The university was formed in 1349.

DUKES OF ANJOU.

1360. Louis I. invested by the pope with the dominions of Joanna of Naples, 1381: his invading army destroyed by the plague, 1383; he dies, 1384.
1384. Louis II., his son, receives the same grant, but is also unsuccessful.

Louis III., adopted by Joanna as heir; dies 1434.
1434. Regnier (a prisoner) declared king of Naples, 1435; his daughter, Margaret, married Henry VI. of England, 1445; he was expelled from Anjou by Louis XI., 1474, and his estates confiscated.

ANJOU, OR BEAUGÉ, BATTLE OF, between the English and French; the latter commanded by the dauphin of France, April 3, 1421. The English were defeated: the duke of Clarence was slain by sir Allan Swinton, a Scotch knight, and 1500 men perished on the field; the earls of Somerset, Dorset, and Huntingdon were taken prisoners. Beaugé was the first battle that turned the tide of success against the English.

ANNAM, OR ANAM, an empire of Asia, to the east of India, comprising Tonquin, Cochin China, part of Cambodia, and various islands in the Chinese Sea. This country is said to have been conquered by the Chinese 234 B.C., and held by them till A.D. 263. In 1406 they reconquered it, but abandoned it in 1428. After much anarchy, bishop Adran, a French missionary, obtained the friendship of Louis XVI. for his pupil, Gia-long, the son of the nominally reigning monarch, and with the aid of a few of his countrymen established Gia-long on the throne, who reigned till his death in 1821, when his son became king. In 1859 war broke out with the French, who defeated the army of Annam, 10,000 strong, about April 22, when 500 were killed. In 1862 peace was made; three provinces were ceded to the French, and toleration of the Christians granted.

ANNATES. See *First Fruits*.

ANNO DOMINI, A.D. The year of Our Lord, of Grace, of the Incarnation, Circumcision, Annus Trabeationis (of the Crucifixion). The Christian era commenced Jan. 1, in the middle of the 4th year of the 194th Olympiad, the 753rd year of the building of Rome, and in 4714 of the Julian period. It is now held that Christ was born four years previous, as noted in the margin of our Bibles, *Luke*, ch. ii.—This era was invented by a monk, Dionysius Exiguus, A.D. 532. It was introduced into Italy in the 6th century, but not generally employed for several centuries. Charles III. of Germany was the first who added "in the year of our Lord" to his reign, in 879.

ANNOYANCE JURIES, of Westminster, chosen from the householders in conformity with 27 Eliz. c. 17 (1585), were abolished in 1861.

ANNUAL REGISTER, a summary of the history of each year (beginning with 1758, and continued to the present time), was commenced by R. and J. Dodsley. The somewhat similar but more elaborate work, the *Annuaire des Deux Mondes*, began in Paris in 1850.

ANNUALS, the name given to richly bound volumes, published annually, containing poetry, tales, and essays, by eminent authors, and illustrated by engravings. They were imitations of similar books in Germany, and first appeared in London in 1823. The duration of the chief of these publications is here given:

Forget-me-not (Ackerman's)	1823—48	Amulet	1827—34
Friendship's Offering	1824—44	Keepsake	1828—56
Literary Souvenir (first as "the Graces")	1824—34	Hood's Comic Annual.	1830—38

ANNUITIES, OR PENSIONS, were first granted in 1512, when 20*l.* were given to a lady of the court for services done; and 6*l.* 13*s.* 4*d.* for the maintenance of a gentleman, 1536. 13*l.* 6*s.* 8*d.* deemed competent to support a gentleman in the study of the law, 1554. An act was passed empowering the government to borrow one million sterling upon an annuity of fourteen *per cent.*, 4—6 Will. & Mary, 1691-3. This mode of borrowing soon afterwards became general among civilised governments. An annuity of 1*l.* 2*s.* 11*d.* *per annum*, accumulating at 10 *per cent.*, compound interest, amounts in 100 years to 20,000*l.*

ANNUITY TAX: a tax levied to provide stipends for ministers in Edinburgh and Montrose, and which caused much disaffection, was abolished in 1860, and other provisions made for the purpose. These, however, have proved equally unpalatable.

ANNUNCIATION OF THE VIRGIN MARY, the 25th of March, also called Lady-day, (*which see*). This festival commemorates the Virgin's miraculous conception, according to the tidings brought her by the angel Gabriel (*Luke* i.): its origin is referred variously by ecclesiastical writers to the fourth and seventh century. The religious order of the Annun-

ciation was instituted in 1232, and the military order, in Savoy, by Amadeus, count of Savoy, in memory of Amadeus I., who had bravely defended Rhodes against the Turks, 1355.

ANointING, an ancient ceremony observed at the inauguration of kings, bishops, and other eminent personages. Aaron, as high priest, was anointed, B.C. 1491; and Saul, as king, B.C. 1095. It was first used at coronations in England on Alfred the Great, in A.D. 872; and in Scotland, on Edgar, in 1098.—The religious rite is derived from the epistle of *James*, ch. v. 14, about A.D. 60. Some authors assert that in 550, dying persons, and persons in extreme danger of death, were anointed with consecrated oil, and that this was the origin of Extreme Unction (one of the sacraments of the Roman Catholic church).

ANONYMOUS LETTERS. The sending of letters denouncing persons, or demanding money, or using threats to obtain money, was made felony by the Black Act, 9 Geo. I. (1722); by 8 Geo. IV., c. 29 (1827); and by 1 Vict., c. 87 (1838). By 10 & 11 Vict., c. 66 (1847), the punishment is transportation, imprisonment, or whipping.

ANTARCTIC. The south pole (*which see*) is so called as opposite to the north or *arctic* pole.

ANTEDILUVIANS. According to the tables of Mr. Whiston, the number of people in the ancient world, as it existed previous to the Flood, reached to the enormous amount of 549,755 millions in the year of the world 1482.*

ANTHEMS, OR HYMNS (*see Hymns*). Hilary, bishop of Poitiers, and St Ambrose were the first who composed them, about the middle of the fourth century. *Langlet*. They were introduced into the church service in 386. *Baker*. Ignatius is said to have introduced them into the Greek, and St. Ambrose into the Western Church. They were introduced into the Reformed churches in queen Elizabeth's reign, about 1565.

ANTHROPOPHAGI (eaters of human flesh) have existed in all ages of the world. Homer says that the Cyclops and Lestrygonæ were such; and the Etesdonian Scythians were so, according to Herodotus. Diogenes asserted that we might as well eat the flesh of men as that of other animals; and the practice still exists in Africa and the South Sea Islands. The annals of Milan assert that a Milanese woman, named Elizabeth, had an invincible inclination to human flesh; she enticed children to her house, and killed and salted them; and on a discovery being made, she was broken on the wheel and burnt, in 1519. Cannibals were detected in Perthshire about 1339.

ANTICHRIST (opponent of Christ), the name given by St. John (1 Ep. ii. 18) to him whom St. Paul calls the *Man of Sin* (2 Thess. ii. 3), who, as some assert, at the latter end of the world, is to appear very remarkably in opposition to Christianity.†

ANTI-CORN-LAW LEAGUE, an association formed for the purpose of procuring the repeal of the laws charging duty on the importation of foreign corn. *See Corn-Laws*. It sprang from various metropolitan and provincial associations (1834-8), headed by Messrs. C. Villiers, R. Cobden, J. Bright, &c. *See Protectionists*.

* Burnet has supposed that the first human pair might have left, at the end of the first century, ten married couples; and from these, allowing them to multiply in the same decuple proportion as the first pair did, would rise, in 1500 years, a greater number of persons than the earth was capable of holding. He therefore suggests a quadruple multiplication only; and then exhibits the following table of increase during the first sixteen centuries that preceded the Flood (at least ten times the present number of mankind):—

I. 10	V. 2,560	IX. 655,360	XIII. 167,142,160
II. 40	VI. 10,240	X. 2,621,440	XIV. 671,088,640
III. 160	VII. 40,960	XI. 10,485,760	XV. 2,684,354,460
IIII. 640	VIII. 163,840	XII. 41,943,040	XVI. 10,737,418,240

† His reign, it is supposed, will continue three years and a half, during which time there will be a persecution. This is the opinion of the Roman Catholics; but the Protestants, as they differ from them, so they differ among themselves. Grotius and Dr. Hammond suppose the time to be past, and the

ANTIGUA, a West India Island, discovered by Columbus in 1493; settled by the English in 1632.

ANTILLES, an early name of the West Indies, *which see*.

ANTIMONY, a white brittle metal. Compounds of this mineral were early known, and applied. It was used as paint to blacken both men's and women's eyes, as appears from 2 *Kings* ix. 30, and *Jeremiah* iv. 30, and in eastern countries it is used to this day. When mixed with lead it makes types for printing; and in physic its uses are various. Basil Valentine wrote on Antimony about 1410. *Priestley*.

ANTINOMIANS (from the Greek *anti*, *against*, and *nomos*, *law*), a name given by Luther (in 1538) to John Agricola, who is said to have held "that it mattered not how wicked a man was if he had but faith." (Opposed to *Rom.* iii. 28, and v. 1, 2.) He retracted in 1540.

ANTIOCH, Syria, built by Seleucus after the battle of Ipsus, 301 B.C. In one day, 100,000 of its people were slain by the Jews, 145 B.C. Here the disciples were first called Christians, A.D. 42 (*Acts* xi. 26). Antioch was taken by the Saracens about 638; recovered for the Eastern emperor, 966; lost again in 1086; retaken by the Crusaders in 1098, and held by them till 1268, when it was captured by the Sultan of Egypt. It was taken in the Syrian war in 1832 by Ibrahim Pacha.—The ERA of Antioch is much used by the early Christian writers of Antioch and Alexandria: it placed the Creation 5492 years B.C.

ANTIPODES. Plato is said to be the first who thought it possible that antipodes existed, about 368 B.C. Boniface, archbishop of Mentz, legate of pope Zachary, is said to have denounced a bishop as a heretic for maintaining this doctrine, A.D. 741. The antipodes of England lie to the south-east of New Zealand; near Antipodes Island. *Brookes*.

ANTI-POPES, rival popes elected at various times, especially by the French and Italian factions at Rome, from 1305 to 1406. The last schism of this kind was terminated by the deposition of the rivals Gregory XII. and Benedict XIII., and the election of Alexander V. in 1409. See under *Popes*, the *Anti-popes*, whose names are printed in *italics*.

ANTIQUARIES. A college of antiquaries is said to have existed in Ireland 700 years B.C.; but this is justly doubted. A society was founded by archbishop Parker, Camden, Stow, and others in 1572. *Spelman*. Application was made in 1589 to Elizabeth for a charter, but her death ensued, and her successor, James I., was far from favouring the design. In 1707 the *Society of Antiquaries* was revived; in 1751 it received its charter of incorporation from George II.; and in 1777 apartments in Somerset-house were granted to it. Its Memoirs, entitled *Archæologia*, were first published in 1770, and are still continued.—The *British Archæological Association* was founded in Dec. 1843; and in 1845 the *Archæological Institute of Great Britain* was formed by a seceding part of the association. Journals are published by both societies.—The *Society of Antiquaries of Edinburgh* was founded in 1780. Since 1845 many county archæological societies have been formed in the United Kingdom. The *Society of Antiquaries of France* (1814) began in 1805 as the *Celtic Academy*.

ANTI-TRINITARIANS. Theodotus of Byzantium is supposed to have been the first who advocated the simple humanity of Jesus, at the close of the second century. This doctrine spread widely after the Reformation, when it was adopted by Lælius and Faustus Socinus. *Bayle*. See *Arians*, *Socinians*, *Unitarians*.

ANTWERP, the principal sea-port of Belgium, is mentioned in history in A.D. 517. It was a small republic in the eleventh century. It was the first commercial city in Europe till the wars of the 16th and 17th centuries.

Its fine exchange built in . . . A.D. 1531

characters to be furnished in the persons of Caligula, Simon Magus, and the Gnostics. Some have believed the pope to be the true Antichrist, as at the council held at Gap, in 1603. Many consider that the kingdom of Antichrist comprehends all who are opposed to Christ, openly or secretly.

APATITE, mineral phosphate of lime. About 1856 it began to be largely employed as manure. It is abundant in Norway, and in Sombrero, a small West India island.

APOCALYPSE, or **REVELATION**, written by St. John in the isle of Patmos about A.D. 95. *Irenæus*. Some ascribe the authorship to Cerinthus, the heretic, and others to John, the presbyter, of Ephesus. In the first centuries many churches disowned it, and in the fourth century it was excluded from the sacred canon by the council of Laodicea, but was again received by other councils, and confirmed by that of Trent, held in 1545, *et seq.* Although the book has been rejected by Luther, Michaelis, and others, and its authority questioned in all ages, from the time of Justin Martyr (who wrote his first Apology for the Christians in A.D. 139), yet its canonical authority is still almost universally acknowledged.

APOCRYPHA. In the preface to the Apocrypha it is said, "These books are *neither* found in the Hebrue nor in the Chaldee." *Bible*, 1539. The history of the Apocrypha ends 135 B.C. The books were not in the Jewish canon, were rejected at the council of Laodicea about A.D. 366, but were received as canonical by the Roman Catholic church, at the council of Trent on April 8, 1546. Parts of the Apocrypha are read as *lessons* by the Anglican church.

There are also Apocryphal writings in connection with the New Testament.

APOLLINARIANS, followers of Apollinarius, bishop of Laodicea, who taught (A.D. 366) that the divinity of Christ was instead of a soul to him; that his flesh was pre-existent to his appearance upon earth, and that it was sent down from heaven, and conveyed through the Virgin, as through a channel; that there were two sons, one born of God, the other of the Virgin, &c. Apollinarius was deposed in A.D. 378.

APOLLO, the god of the fine arts, medicine, music, poetry, and eloquence, had many temples and statues erected to him, particularly in Egypt, Greece, and Italy. His most splendid temple was at Delphi, built 1263 B.C. See *Delphi*. His temple at Daphne, built 434 B.C., during a period in which pestilence raged, was burnt A.D. 362, and the Christians were accused of the crime. *Langlet*. The statue of Apollo Belvedere, discovered in the remains of Antium, in Italy, in 1503, was purchased by pope Julius II., who placed it in the Vatican.

APOLLONICON, an elaborate musical instrument, constructed on the principle of the organ, was invented by Messrs. Flight and Robson, of St. Martin's lane, Westminster, and exhibited by them first in 1817. *Timbs*.

APOSTLES (Greek *apostolos*, one sent forth). Twelve were appointed by Christ, A.D. 31; viz. Simon Peter and Andrew (brothers), James and John (sons of Zebedee), Philip, Nathaniel (or Bartholomew), Matthew (Levi), Thomas, James the Less (son of Alphæus), Simon the Canaanite and Jude or Thaddæus (brothers), and Judas Iscariot. Matthias was elected in the room of Judas Iscariot, A.D. 33 (*Acts* i.); and Paul and Barnabas were appointed by the Holy Spirit, A.D. 45 (*Acts* xiii. 2).

APOSTLES' CREED, a summary of the Christian faith, attributed to the apostles by Ruffinus, A.D. 390, is generally believed to have been gradually composed a great while after their time. Irenæus, bishop of Lyons (A.D. 177), repeats a similar creed. Its repetition in public worship was ordained in the Greek church at Antioch, and in the Roman church in the 11th century, whence it passed to the Church of England.

APOSTOLICI. The first sect of Apostolici arose at the end of the 2nd century; they renounced marriage, wine, flesh, meats, &c. The second sect was founded by Segarelli about 1261. They wandered about, clothed in white, with long beards, dishevelled hair, and bare heads, accompanied by women whom they called their spiritual sisters, preaching against the growing corruption of the church of Rome, and predicting its downfall. They renounced baptism, the mass, purgatory, &c., and are accused, by their enemies of gross licentiousness. Segarelli was burnt alive at Parma in 1300 during a crusade against his followers, who were all dispersed in 1307.

APOTHECARY. The first mention of one attending the king's person in England was on Edward III. (1344); who settled three pence *per diem* for life on Coursus de Gangeland, for taking care of him during his illness in Scotland. *Rymer's Fœdera*. Apothecaries were exempted from serving on juries or other civil offices in 1712. The Apothecaries' Company was incorporated in London, 1617. Their hall was built in 1670; and their practice regulated by 55 Geo. III. c. 19 (1815), amended by 6 Geo. IV. c. 133 (1825). The Botanical Garden

at Chelsea was left by sir Hans Sloane to the company of Apothecaries, Jan. 1753, on condition of their introducing every year fifty new plants, until their number should amount to 2000. The Dublin guild was incorporated, 1745. See *Pharmacy*.

APOTHEOSIS, a ceremony of the ancient nations of the world, by which they raised their kings and heroes to the rank of deities. The deifying a deceased emperor was begun at Rome by Augustus, in favour of Julius Cæsar, B.C. 13. *Tillemont*.

APPEALS. In the time of Alfred (A.D. 869-901), appeals lay from courts of justice to the king in council; but being soon overwhelmed with appeals from all parts of England, he framed the body of laws which long served as the basis of English jurisprudence. *Hume*. Appeals from English tribunals to the pope were first introduced, 19 Stephen, 1154, but abolished by act 24 Henry VIII. 1532. *Viner's Statutes*. Courts of appeal at the Exchequer Chamber, in error from the judgments of the King's Bench, Common Pleas, and Exchequer, were regulated by statutes in 1830 and 1831. See *Privy Council*.

APPEAL, OR ASSIZE OF BATTLE. By the old law of England, a man charged with murder might fight with the appellant, thereby to make proof of his guilt or innocence. In 1817, a young maid, Mary Ashford, was believed to have been violated and murdered by Abraham Thornton, who, in an appeal, claimed his right by his wager of battle, which the court allowed; but the appellant (the brother of the maid) refused the challenge, and the accused escaped, April 16, 1818. This law was immediately afterwards struck from off the statute-book, by 59 Geo. III. (1819).

APPIAN WAY, an ancient Roman road, made by Appius Claudius Cæcus while censor, 312 B.C.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, fruiterer to Henry VIII., is said to have planted a great number of the orchards in Kent, and Lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 78 varieties of apples in his day (1688).

APPRAISERS. The rating and valuation of goods for another was an early business in England: and so early as 11 Edward I. 1282, it was a law, that if they valued the goods of parties too high, the appraiser should take them at the price appraised.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. *Stow's Survey*. The apprentice tax enacted, 43 Geo. III. 1802. See *Evil Mayday*.

APPROPRIATION CLAUSE, a term applied to section 36 of stat. 3 & 4 Will. IV. c. 37 (passed in 1833), which transferred the revenues of certain Irish bishoprics to the Ecclesiastical Commissioners.

APPROPRIATIONS (property taken from the church), began in the time of William I.; the parochial clergy being then commonly Saxons, and the bishops and higher clergy Normans. These impoverished the inferior clergy to enrich monasteries, which were generally possessed by the conqueror's friends. Where the churches and tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV. complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. *Pardon*.

APRICOT, *Prunus armeniaca*, first planted in England about 1540, by the gardener of Henry VIII. It originally came from Epirus.

APRIL. The fourth month of the year according to the vulgar computation, but the second according to the ancient Romans: Numa Pompilius introduced *Januarius* and *Februarius*, 713 B.C. *Peacham*.

APTERYX (wingless), a bird, a native of New Zealand, first brought to this country in 1813, and deposited in the collection of the earl of Derby. Fossil specimens of a gigantic species of this bird (named *Dinornis*) were discovered in New Zealand by Mr. Walter Mantell in 1843, and since.

APULIA, a province in S.E. Italy, conquered by the Normans, whose leader Guiscard received the title of duke of Apulia from pope Nicholas II., in 1059. After many changes of masters, it was absorbed into the kingdom of Naples, in 1265.

AQUARI, a sect said to have been founded by Tatian in the second century, who forbore the use of wine even in the sacrament, and used nothing but water, during persecution, when

the Christians met secretly and in the night, for fear of discovery. For this they were censured by Cyprian (martyred A.D. 258).

AQUARIUM, OR AQUAVIVARIUM, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as *scavengers*. In 1849, Mr. N. B. Ward succeeded in growing sea-weeds in artificial seawater; in 1850, Mr. R. Warrington demonstrated the conditions necessary for the growth of animals and plants in jars of water; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up under the skilful direction of Mr. D. Mitchell. In 1854, Mr. Gosse published "The Aquarium." Mr. W. Alford Lloyd, of Portland Road, London, by his enterprise in collecting specimens, has done much to increase the value and interest of aquaria. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860.

AQUEDUCT, an artificial watercourse, on an inclined plane. No remains of Greek aqueducts exist. Appius Claudius advised and constructed the first Roman aqueduct, as well as the *Appian way*, about 312 B.C. Aqueducts of every kind were among the wonders of Rome. *Livy*. There are now some remarkable aqueducts in Europe; that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Versailles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England is 1007 feet in length, and 126 feet high; it was completed by T. Telford, and opened Dec. 26, 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830.

AQUILEIA (Istria), made a Roman colony 141 B.C., and fortified A.D. 168. Constantine II. was slain in a battle with Constans, fought at Aquileia towards the close of March, 340. Maximus defeated and slain by Theodosius, near Aquileia, July 28, 388. Theodosius defeated Eugenius and Arbogastes, the Gaul, near Aquileia, and remained sole emperor, Sept. 6, 394. Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a synod here in A.D. 384.

AQUITAINE, a province in France, S.W. Subdued by the Visigoths, A.D. 418, and taken from them by Clovis in 507. Henry II. of England inherited it from his mother, 1152. It was erected into a principality for Edward the Black Prince in 1362; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1418. The province was lost in the reign of Henry VI.

ARABIA. The terms *Petræa* (stony), *Felix* (happy), and *Deserta*, are said to have been applied to its divisions by Ptolemy, about A.D. 140. It was unsuccessfully invaded by Gallus, the Roman governor of Egypt, 24 B.C. In A.D. 622, the Arabians, under the name of Saracens, followers of Mahomet (a native of Arabia), their general and prophet, commenced their course of conquest. See *Mahometanism*. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. To them we owe our ordinary numerals, and arithmetical notation. The Koran was written in Arabic (about A.D. 622-632). The Bible was printed in Arabic in 1671.

ARABIAN NIGHTS' ENTERTAINMENTS (or 1001 Tales) were translated into French by Galland, and published in 1704: but their authenticity was not acknowledged till many years after. The best English translation from the Arabic is that of Mr. E. W. Lane, published in 1839, with valuable notes and beautiful illustrations.

ARABICI, a sect which sprung up in Arabia, whose distinguishing tenet was, that the soul died with the body, and rose again with it, A.D. 207.

ARAGON, a kingdom in the north-east of Spain. See *Spain*.

ARAM, the ancient name of Syria, *whic*h *see*.

ARBELA. The third and decisive battle between Alexander the Great and Darius Codomanus decided the fate of Persia, Oct. 1, 331 B.C., on a plain in Assyria between Arbela and Gaugamela. The army of Darius consisted of 1,000,000 foot and 40,000 horse; the Macedonian army amounted to only 40,000 foot and 7000 horse. *Arrian*. The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. *Plutarch*.

ARBITRATION. Submission to arbitration was authorised and made equivalent in force to the decision of a jury, by 9 & 10 Will. III. (1698). Submissions to arbitration may be made rules of any court of law or equity, and arbitrators may compel the attendance of

witnesses, 3 & 4 Will. IV. c. 42 (1833). See *Ouzel Galley*. By an act passed in 1859, railway companies may settle disputes with each other by arbitration.

ARBUTUS. The *Arbutus Andrachne*, oriental strawberry-tree, was brought to England from the Levant, about 1724.

ARCADES, OR WALKS ARCHED OVER. The principal in London are the Burlington-arcade, opened in March, 1819; and the Lowther-arcade, Strand, opened at the period of the Strand improvements. See *Strand*. Exeter Change, London, was rebuilt and opened in 1845. See *Exeter Change*. The Royal arcade, Dublin, opened June 1820, was burnt to the ground, April 25, 1837.

ARCADIA, in the centre of the Peloponnesus, Greece. The Arcadians regarded their nation as the most ancient of Greece, and older than the moon. They were more simple in their manners and moderate in their desires than the other Greeks, from whom they were separated by mountains. Pelasgus is said to have taught them to feed on acorns, as being more nutritious than herbs, their former food; for which they honoured him as a god, 1521 B.C. Arcadia had twenty-five kings, whose history is altogether fabulous.

Magna Græcia, in S. Italy, said to have been colonised by Arcadians under Enotrus, about 1710 B.C.; and under Evander . . . B.C. 1240
Pelasgus begins his reign . . . 1521
Lycæon institutes the Lupercalia, in honour of Jupiter . . . 1514
Arcas, from whom the kingdom received its name, taught his subjects agriculture and the art of spinning wool; his sons reign . . . 1335
Lycæan games instituted, in honour of Pan . . . 1320
Agapenor appears at the head of the Arcadians at the siege of Troy (*Homer*) . . . 1194
The Lacedæmonians invade Arcadia, and are

beaten by the women of the country, in the absence of their husbands (?) . . . B.C. 1102
Aristocrates I. (of Orchomenus) is put to death for offering violence to the priestess of Diana . . . 715
Aristocrates II. stoned to death, and a republic established . . . 681
The supremacy of Sparta (acknowledged 560) is abolished by the Thebans; Megalopolis founded by Epaminondas . . . 371
The Arcadians make alliance with Athens, and are defeated by Archidamus . . . 367
Arcadia, having joined the Achaean league, on its suppression becomes part of the Roman empire . . . 146

ARCHANGEL, a city in N. Russia, is thus named from a monastery founded here, and dedicated to St. Michael in 1584. The passage to Archangel was discovered by the English in 1553, and it was the only seaport of Russia till the formation of the docks at Cronstadt, and foundation of St. Petersburg in 1703. The dreadful fire here, by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1793.

ARCHBISHOP (Greek, *archiepiscopos*), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople; who presided over the other metropolitans and bishops in the districts attached to those places. The word is first found in the Apology against the Arians by Athanasius, who died A.D. 373. The Eastern archbishops have since been styled *patriarchs*.* *Riddle*.

ARCH-CHAMBERLAIN. The elector of Brandenburg was appointed the hereditary arch-chamberlain of the German empire by the golden bull of Charles IV. in 1356, and in that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France (A.D. 418—986), and when their territories were divided, the archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and Arles.

ARCHDEACON. The name was early given to the first or eldest deacon, who attended on the bishop, without any power; but since the council of Nice, his function is become a dignity, and set above that of priest, though anciently it was quite otherwise. The appointment in these countries is referred to A.D. 1075. There are seventy-one archdeacons in

* In these realms the dignity is nearly coeval with the establishment of Christianity. Before the Saxons came into England there were three sees: London, York, and Caerleon-upon-Usk; but soon after the arrival of St. Austin he settled the metropolitan see at Canterbury, A.D. 602. See *Canterbury*. York continued archiepiscopal; but London and Caerleon lost the dignity. Caerleon was found, previously, to be too near the dominions of the Saxons; and in the time of King Arthur the archbishopric was transferred to St. David's, of which St. Sampson was the 26th and last Welsh archbishop. See *St. David's*. The bishoprics in *Scotland* were under the jurisdiction of the archbishop of York until the erection of the archiepiscopal sees of St. Andrew's and Glasgow, in 1470 and 1491; these last were discontinued at the Revolution. See *Glasgow* and *St. Andrew's*. The bishop of Edinburgh is now (1862) styled *Primus*. The rank of archbishop was of early institution in *Ireland*. See *Ferns*. Four archbishoprics were constituted in *Ireland*, A.D. 1151, namely, Armagh, Cashel, Dublin, and Tuam; until then the archbishop of Canterbury had jurisdiction over the Irish as well as English bishops, in like manner as the archbishop of York had jurisdiction over those of Scotland. Of these four archbishoprics two were reduced to bishoprics, namely, Cashel and Tuam, conformably with the statute 3 & 4 Will. IV. 1833, by which also the number of sees in Ireland was to be reduced (as the incumbents of ten of them respectively died) from twenty-two to twelve, the present number. See *Bishops, Cashel, Tuam; Pallium, &c.*

England (1862), and thirty-three in Ireland. The archdeacon's court is the lowest in ecclesiastical polity : an appeal lies from it to the consistorial court, by 24 Henry VIII., 1532.

ARCHERY. Plato ascribes the invention to Apollo, by whom it was communicated to the Cretans. Ishmael "became an archer" (*Gen.* xxi. 20), 1892 B.C. The Philistine archers overcame Saul (1 *Sam.* xxxi. 3), 1055 B.C. David commanded the use of the bow to be taught (2 *Sam.* i. 18). Aster of Amphipolis, having been slighted by Philip, king of Macedon, at the siege of Methone, 353 B.C., shot an arrow, on which was written "Aimed at Philip's right eye," which struck it and put it out; Philip threw back the arrow with these words : "If Philip take the town, Aster shall be hanged." The conqueror kept his word.—Archery was introduced into England previously to A.D. 440. Harold and his two brothers were killed by arrows shot from the cross-bows of the Norman soldiers at the battle of Hastings in 1066. Richard I. revived archery in England in 1190, and was himself killed by an arrow in 1199. The victories of Crecy, Poitiers, and Agincourt were won chiefly by archers.* Four thousand archers surrounded the houses of parliament, ready to shoot the king and the members, 21 Richard II. 1397. *Stow.* The citizens of London were formed into companies of archers in the reign of Edward III. : and into a corporate body by the style of "The Fraternity of St. George," 29 Henry VIII. 1538. Roger Ascham's "*Toxophilus, the School of Shooting*," was published in 1571. See *Artillery Company, Toxophilites, &c.*

ARCHES appear in early Egyptian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, constructed under the early kings, about 588 B.C. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention.†—The TRIUMPHAL arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks in London were erected about 1828. The Marble Arch which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851) was modelled from the arch of Constantine. See *Hyde Park*.

ARCHES, COURT OF, the most ancient consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow, London (*de Arcubus*), where it was held; and whose top is raised on stone pillars built archwise. *Cowell.* Appeals from this court lie to the judicial committee of the privy council, by statute 11 Geo. IV. and 1 Will. IV. 1830.

ARCHITECTURE (from the Greek *archi-tekton*, chief artificer), ornamental building. The five great orders of architecture are,—the Doric, Ionic, and Corinthian (*Greek*);—the Tuscan and Composite (*Roman*). The Gothic began to prevail in the ninth century. See *the Orders respectively and Gothic*.

An Architectural Society existed in 1808. The ROYAL INSTITUTE OF BRITISH ARCHITECTS was founded in 1834. Earl de Grey was president, 1835-61. The Architectural Society, established in 1834, was united to the Institute in 1842.

* The *long-bow* was six feet long, and the arrow three feet; the usual range from 300 to 500 yards. Robin Hood is said to have shot from 600 to 800 yards. A Persian hero, Arish, is stated to have shot over between 400 and 500 miles, as related by Ferdousi! The cross-bow was fixed to a stock, and discharged with a trigger.

† The new bridge of Chester, whose span is 200 feet, was commenced in 1829. The central arch of London Bridge is 152 feet; and the three cast-iron arches of Southwark bridge, which rest on massive stone piers and abutments, are, the two side ones 220 feet each, and the centre 240 feet; thus the centre arch exceeds the admired bridge of Sunderland by four feet in the span, and the long-famed Rialto at Venice, by 167 feet. See *Bridges*.

ARCHONS. When royalty was abolished at Athens, the executive government was vested in elective magistrates called archons, whose office continued for life. Medon, eldest son of Codrus, was the first archon, B.C. 1044 (1070, H.) The office was limited to ten years, 752 B.C., and to one year 683 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshal Alvinzi, fought Nov. 15—17, 1796. The result was the loss on the part of the Austrians of 18,000 men in killed, wounded, and prisoners, four flags, and eighteen guns. The loss of the French was estimated at 15,000. They became masters of Italy. In one of the contests Bonaparte was in most imminent danger, and was only rescued by the impetuosity of his troops.

ARCOT, East Indies. This city (established 1716) was taken by colonel Clive, Aug. 31, 1751; was retaken, but again surrendered to colonel Coote, Feb. 10, 1760. Besieged by Hyder Ali, when the British under colonel Baillie suffered severe defeats, Sept. 10 and Oct. 31, 1780. Arcot has been subject to Great Britain since 1801. See *India*.

ARCTIC EXPEDITIONS. See *North-West Passage* and *Franklin's Expedition*.

ARDAGH, an ancient prelacy in Ireland, founded by St. Patrick, who made his nephew the first bishop, previously to A.D. 454. This prelacy was formerly held with Kilmore; but since 1742 it has been held *in commendam* with Tuam (*whicli see*).

ARDFERT AND AGHADOE, bishopricks in Ireland long united; the former was called the bishoprick of Kerry; Ert presided in the fifth century. William Fuller appointed in 1663, became bishop of Limerick in 1667, since when Ardfert and Aghadoe have been united to that prelacy. Near the cathedral an anchorite tower, 120 feet high, the loftiest and finest in the kingdom, suddenly fell, 1770.

AREOPAGITÆ, a Greek tribunal, said to have heard causes in the dark, because the judges should be blind to all but facts, instituted at Athens about 1507 B.C. *Arund. Marbles*. The name is derived from the Greek *Areos pagos*, the hill of Mars, through the tradition that Mars was the first who was tried there for the murder of Halirrhottius, who had violated his daughter Aleippe. Whatever causes were pleaded before them were to be divested of all oratory and fine speaking, lest eloquence should charm their ears, and corrupt their judgment. Hence arose the most just and impartial decisions. Paul preached on Mars' hill, A.D. 52.

ARGAUM, in the Deccan, India, where sir A. Wellesley, on Nov. 29, 1803, thoroughly defeated the rajah of Berar and the Mahratta chief Scindiah, who became in consequence quite subservient to the British.

ARGENTARIA, in Alsace, where a great battle was fought, A.D. 378, between the Alemanni and the Romans under Gratian, the former being defeated with the loss of more than 35,000 out of 40,000 men. *Dufresnoy*.

ARGENTINE (or **LA PLATA**) **CONFEDERATION**, S. America, 14 provinces. This country was discovered by the Spaniards in 1515; settled by them in 1553, and formed part of the great vice-royalty of Peru till 1778, when it became that of Rio de la Plata. It joined the insurrection in 1811, and became independent in 1816. It was at war with Brazil from 1826 to 1828, for the possession of Uruguay, which became independent as Monte-Video, and at war with France from 1838-40. J. Urquiza, elected president, Nov. 20, 1853, was succeeded by Dr. S. Derqui, Feb. 8, 1860. Buenos Ayres seceded in 1853, and was reunited in 1859. An insurrection began in San Juan, in Nov. 1860, and was suppressed in Jan. 1861. Population in 1859, about 1,171,800. See *Buenos Ayres*, for the disputes with that state.

ARGONAUTIC EXPEDITION, 1263 B.C. (1225, *Clinton*), undertaken by Jason to avenge the death of his kinsman Phryxus, and recover his treasures seized by his murderer, Æetes, king of Colchis. The ship in which Phryxus had sailed to Colchis having been adorned with the figure of a ram, it induced the poets to pretend that the journey of Jason was for the recovery of the golden fleece. This is the first naval expedition on record. Many kings and heroes accompanied Jason, whose ship was called *Argo*, from its builder. *Dufresnoy*.

ARGOS, Peloponnesus, Greece. The kingdom was founded by Inachus, 1856 B.C., or 1080 years before the first Olympiad. *Blair*. (1806, *Clinton*.) The nine kings from the founder were called *Inachidae*, of whom the fourth was Argus, who gave his name to the country.

ARGYLL (W. Scotland), BISHOPRIC OF, founded A.D. 1200, Evaldus being the first bishop; the diocese was previously part of the see of Dunkeld; it was ended with the abolition of episcopacy in Scotland, 1688. Argyll is now a post-revolution bishopric. See *Bishoprics*.

ARIAN, OR ARYAN RACE, a term now frequently applied to the Indo-Germanic or Indo-European family of nations.

ARIANS, the followers of Arius, who preached against the divinity of Christ, about A.D. 315, and died in 336. The Arians were condemned by the council of Nice, in 325; but their doctrine prevailed for a time in the East. It was favoured by Constantius II. 341; and carried into Africa under the Vandals in the fifth century, and into Asia under the Goths. Servetus published his treatise against the Trinity, 1531, and was burnt 1553. See *Athanasian Creed*. Leggatt, an Arian, was burnt at Smithfield in 1614.

ARISTOTELIAN PHILOSOPHY: the most comprehensive system ever devised by man. Aristotle was born at Stagyra (hence termed the Stagyræ), 384 B.C.; was a pupil of Plato from 364 to 347; became preceptor of Alexander son of Philip of Macedon, in 342; and died in 322. He divided the circle of knowledge into Metaphysics and Logic; Physics, including part of the science of mind; and Ethics. His philosophy was too much exalted by the schoolmen during the middle ages, and too much depreciated after the reformation. His works on natural science contain a vast collection of facts and an extraordinary mixture of sound and chimerical opinions. To him is attributed the assertion that nature abhors a vacuum; an opinion still maintained by some eminent modern philosophers.

ARITHMETIC is of uncertain origin. It was brought from Egypt into Greece by Thales, about 600 B.C.

The oldest treatise upon arithmetic is by Euclid		900—into Europe, about 980—into France, by

ARK. Mount Ararat is venerated by the Armenians, from a belief of its being the place on which Noah's ark rested, after the universal deluge, 2347 B.C. But Apamea, in Phrygia, claims to be the spot; and medals have been struck there with a chest on the waters, and the letters NOE, and two doves: this place is 300 miles west of Ararat. The ark was 300 cubits in length, fifty in breadth, and thirty high; but most interpreters suppose this cubit to be about a foot and a-half, and not the geometrical one of six.

ARKLOW (in Wicklow), where a battle was fought between the insurgent Irish, amounting to 31,000, and a small regular force of British, which signally defeated them, June, 9, 1798. The town was nearly destroyed by the insurgents in May previous.—Native gold was discovered in Arklow, in Sept. 1795. *Phil. Trans.* vol. 86.

ARLES, an ancient town in France, in 879 A.D. the capital of the kingdom of Arles or Lower Burgundy. Here are the remains of a Roman amphitheatre capable of holding between 20,000 and 30,000 persons.

ARMADA, THE INVINCIBLE. The famous Spanish armament, so called, consisted of 130 ships of war, besides transports, &c., 2650 great guns, 20,000 soldiers, 11,000 sailors, and 2000 volunteers, under the duke of Medina Sidonia, and 180 priests and monks. It arrived in the channel, July 19, 1588, and was defeated the next day by Drake and Howard. Ten fire-ships having been sent into the enemies' fleet, they cut their cables, put to sea and endeavoured to return to their rendezvous between Calais and Gravelines: the English fell upon them, took many ships, and admiral Howard maintained a running fight from the 21st

July to the 28th, obliging the shattered fleet to bear away for Scotland and Ireland, where a storm dispersed them, and the remainder of the armament returned by the North Sea to Spain. The Spaniards lost fifteen capital ships in the engagement, and 5000 men; seventeen ships were lost or taken on the coast of Ireland, and upwards of 5000 men were drowned, killed, or taken prisoners. The English lost but one ship. About one-third of the armament returned to Spain.

ARMAGH, in *N.* Ireland, of which it was the metropolis from the 5th to the 9th century, was the first ecclesiastical dignity in Ireland, founded by St. Patrick, its first bishop, about A.D. 444. Six saints of the Roman calendar have been bishops of this see. In the king's books, by an extent taken 15 James I., it is valued at 400*l.* sterling a year; and until lately, was estimated at 15,000*l.* per annum. The see was re-constituted (see *Pallium*) in 1151. *Beatson.* Armagh was destroyed by the Danes on Easter-day, 852. *Burns.*

ARMAGNACS, a political party in France, followers of the duke of Orleans, derived their name from his father-in-law, the count of Armagnac. About 3500 of this party were massacred at Paris in May, 1418, by their opponents, the followers of the duke of Burgundy.

ARMED NEUTRALITY, the confederacy of the northern powers against England, formed by the empress of Russia in 1780; ended in 1781. The confederacy was renewed, and a treaty ratified in order to cause their flags to be respected by the belligerent powers, Dec. 16, 1800. The principle that neutral flags protect neutral bottoms being contrary to the maritime system of England, the British cabinet remonstrated, war ensued, and Nelson and Parker destroyed the fleet of Denmark before Copenhagen, April 2, 1801. This event and the murder of the emperor Paul of Russia led to the dissolution of the Armed Neutrality.

ARMENIA, Asia Minor. Here Noah is said to have resided when he left the ark, 2347 B.C. Armenia after forming part of the Assyrian, Median, and Persian empires became subject to the Greek kings of Syria, after the defeat of Antiochus the Great, 190 B.C.; the Romans established the kingdoms of Armenia Major and Minor, but their influence over them was frequently interrupted by the aggressions of the Parthians. The modern Christian kingdom of Armenia arose about 1080 in the rebellion of Philaretus Brachancius against the Greek emperor. It lasted amid many struggles till the 14th century. In all their political troubles the Armenians have maintained the profession of Christianity. Their church is governed by patriarchs, not subject to Rome. Since 1715 an Armenian convent has existed at Venice, where books on all subjects are printed in the Armenian language.

City of Artaxarta built	B.C.	186
Antiochus Epiphanes invades Armenia		165
Tigranes the Great reigns in Armenia Major		95-60
Becomes king of Syria, and assumes the title of "King of Kings"		83
Defeated by Lucullus, 69; he lays his crown at the feet of Pompey		66
His son, Artavasdes, reigns, 54; he assists Pompey against Julius Caesar, 48; and the Parthians against Marc Antony		36
Antony subdues, and sends him loaded with silver chains to Egypt		34
Artaxias, his son, made king by the Parthians		33
Deposed by the Romans, who enthrone Tigranes II.		20
Armenia subjected to Parthia	A.D.	15
Reconquered by Germanicus, grandson of Augustus		18
After many changes Tiridates is made king by the Romans		58
The Parthians conquer Armenia, but are expelled by Trajan		115

Severus makes Volagarses king of part of Armenia	A.D.	199
Christianity introduced, between		100-200
Armenia added to the Persian empire		312
Tiridates obtains the throne through Diocletian, 286; is expelled by Narses, 294; restored by Galerius		298
On his death, Armenia becomes subject to Persia, 342; is made neutral by Rome and Persia, 364; who divide it by treaty		443
Armenia conquered and re-conquered by the Greek and Persian sovereigns		577-687
And by the Greek emperors and the Mohammedans		693-1065
Overrun by the Mongols, 1235; by Timour, 1383; by the Turks, 1516; by the Persians		1534
Shah Abbas, of Persia, surrenders Armenia to the Turks, but transports 22,000 Armenian families into his own states		1589
Overrun by the Russians		1828
Surrender of Erzeroum		July, 1829

(See Syria and Russo-Turkish War.)

ARMENIAN ERA, commenced on the 9th of July, A.D. 552; the ecclesiastical year on the 11th August. To reduce this last to our time, add 551 years, and 221 days; and in leap years subtract one day from March 1 to August 10. The Armenians used the old Julian style and months in their correspondence with Europeans.

ARMILLARY SPHERE, an instrument devised to give an idea of the motions of the heavenly bodies. It is commonly made of brass, and disposed in such a manner that the greater and lesser circles of the sphere are seen in their natural position and motion; the whole being comprised in a frame. It is said to have been invented by Eratosthenes, about 255 B.C.; and was employed by Tycho Brahe and other astronomers.

ARMINIANS (OR REMONSTRANTS) derive their former name from James Arminius, a Protestant divine, of Leyden, Holland (died, 1609); the latter from Arminius and his friends

having presented a *Remonstrance* to the States-General in 1609. They separated from the Calvinists, considering Calvin's views of grace and predestination in opposition to free will too severe. A fierce controversy raged from 1609 to 1625, when the Arminians, who had been exiled, returned to their homes. Their doctrines were condemned in 1618, at the synod of Dort (*which see*). The Calvinists were then sometimes styled Gomarists, from Gomar, the chief opponent to Arminius. James I. and Charles I. favoured the doctrines of the Arminians, which still prevail largely in Holland and elsewhere.

ARMORIAL BEARINGS became hereditary in families at the close of the twelfth century. They took their rise from the knights painting their banners with different figures, and were employed by the crusaders, in order at first to distinguish noblemen in battle, A.D. 1100. The lines to denote colours in arms, by their direction or intersection, were invented by Columbiere in 1639. Armorial bearings were taxed in 1798, and again in 1808.

ARMORICA, now Brittany, N. France, was conquered by Julius Cæsar, 56 B.C. Many Gauls retired there and preserved the Celtic tongue, A.D. 584.

ARMOUR. The warlike Europeans at first despised any other defence than the shield. Skins and padded hides were first used; and brass and iron armour, in plates or scales, followed. The first body armour of the Britons was skins of wild beasts, exchanged, after the Roman conquest, for the well-tanned leathern cuirass. *Tacitus*. This latter continued till the Anglo-Saxon era. Hengist is said to have had scale armour, A.D. 449. The Norman armour formed breeches and jacket, 1066. The hauberk had its hood of the same piece, 1100. John wore a surtout over a hauberk of rings set edgewise, 1199. The heavy cavalry were covered with a coat of mail, Henry III. 1216. Some horsemen had vizors, and skull-caps, same reign. Armour became exceedingly splendid about 1350. The armour of plate commenced 1407. Black armour, used not only for battle, but for mourning, Henry V. 1413. The armour of Henry VII. consisted of a cuirass of steel, in the form of a pair of stays, about 1500. Armour ceased to reach below the knees, Charles I. 1625. In the reign of Charles II. officers wore no other armour than a large gorget, which is commemorated in the diminutive ornament known at the present day. *Meyrick*.

ARMS. The club was the first offensive weapon; then followed the mace, battle-axe, pike, spear, javelin, sword and dagger, bows and arrows. *Pliny* ascribes the invention of the sling to the Phœnicians. See *the various weapons throughout the volume*.

ARMS, see *Armorial bearings* and *Heraldry*. Those of England varied with the conquest which she made, and included the insignia of Wales, Ireland, Scotland, France, and Hanover, as these countries successively fell to her sovereignty. The arms of France were claimed and quartered by Edward III., A.D. 1330, but were discontinued on the union with Ireland, and a new imperial standard was hoisted, Jan. 1, 1801. The escutcheon of Hanover was discontinued on the separation of the crowns of England and Hanover by the death of William IV. in 1837.

ARMS' BILL, for the repression of crime and insurrection in Ireland, was passed Oct. 15, 1831. It was a revival of the expired statutes of George III. The guns registered under this act throughout the kingdom at the close of the first year scarcely amounted to 3000, and the number was equally small of all other kinds of arms. The new Arms' bill passed Aug. 22, 1843. It has been since renewed, but has not been rigidly enforced.

ARMY. Ninus and Semiramis had armies amounting to nearly two millions of fighting men, 2017 B.C. The first guards and regular troops as a standing army were formed by Saul, 1093 B.C. *Eusebius*. One of the first standing armies of which we have any account, is that of Philip of Macedon. The army which Darius opposed to Alexander the Great (332 B.C.) is set down as between 750,000 and a million. The first standing army which existed as such, in modern times, was maintained in France by Charles VII. in 1445. The chief European nations have had in their service the following armies: Spain, 150,000 men; Great Britain, 310,000; Prussia, 350,000; Turkey, 450,000; Austria, 500,000; Russia, 560,000; and France, 680,000.

ARMY, BRITISH, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1633 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1685 the army consisted of 7000 foot and 1700 cavalry. Standing armies were introduced by Charles I. in 1638; they were declared illegal in England, 31 Charles II. 1679; but one was then gradually forming. See *Regiments*. Grose's "History of the British Army" was published in 1801. The effective rank-and-file of the army actually serving in the pay of Great Britain on the 24th Dec. 1800, amounted to 168,082; and the estimates

of the whole army in that year were 17,973,000*l*. The militia, volunteer, and other auxiliary forces were of immense amount at some periods of the war ending in 1815. The strength of the volunteer corps was greatest between the years 1798 and 1804, in which latter year this species of force amounted to 410,000 men, of whom 70,000 were Irish; and the militia had increased to 130,000 men, previously to the regular regiments being recruited from its ranks in 1809. The following are statements of the effective military strength of the United Kingdom at the periods mentioned, and of the sums voted for military expenditure :

1780, Time of war: troops of the line	amount	110,000 men:	sum voted	£7,847,000
1800, War	ditto	168,000 men	ditto	17,973,000
1810, War: army including foreign troops	ditto	300,000 men	ditto	26,748,000
1815, Last year of the war	ditto	300,000 men	ditto	39,150,000
1820, Time of peace; war incumbrances	ditto	88,100 men	ditto	18,253,000

The Army Service Acts: 12 & 13 Vict. c. 37 (June 21, 1847), and 78 Vict. c. 4. . . Feb. 27. 1855
The Mutiny Act is passed annually; alterations were made in this Act and in the Articles of War in 1855. See *Militia and Volunteers*.
Officers in the service of the East India Company to have the same rank and precedence as those in the regular army. . . April 25, —
The office of Master-General of the Ordnance abolished, and the civil administration of the Army and Ordnance vested in the hands of Lord Panmure, the Minister of War. May 25, —
Examination of staff-officers, previous to their appointment ordered. . . April 9, 1857
The army largely recruited in 1857 and 1858, in consequence of the war in India.
The East India Company's army was transferred to the Queen 1859
Much dissatisfaction arose in that army in con-

sequence of no bounty being granted; and threatenings of mutiny appeared, which subsided after an arrangement was made granting discharge to those who desired it. See *India* 1859
Examination of candidates for the Military Academy, previously confined to pupils from Sandhurst, was thrown open, 1855; the principle of this measure was affirmed by the House of Commons by vote . . . April 26, 1858
By 22 & 23 Vict. c. 42, provision made for a reserve force, not to exceed 20,000 men, who had been in her majesty's service. . . 1859
Flogging virtually abolished in the army: First class soldiers to be degraded to second class before being liable to it. . . Nov. 9, —
A report of a commission in 1858 causes great sanitary improvements in the army, barracks, &c., under direction of Hon. Sidney Herbert 1859-60

ARMY OF OCCUPATION. The army distinguished by this name was that of the allied powers of Austria, Russia, and Prussia, which occupied the northern frontier towns of France by the treaty, signed Nov. 20, 1815, which established the boundaries of France, and stipulated for the occupation of certain fortresses by foreign troops for three years.

* Besides this national army, 14,950 foreign troops were voted for the service of the year 1855-6; and the English militia was called out, and increased to the number of 120,000 men, thus forming a total of 313,595, exclusive of 20,000 Turkish auxiliaries taken into British pay.

AROMATICS. Acron of Agrigentum, is said to have been the first who caused great fires to be made, and aromatics to be thrown into them, to purify the air, by which means he put a stop to the plague at Athens, 473 B.C. *Nouv. Dict.*

ARQUEBUS. See *Fire Arms*.

ARRACAN, a province of N.E. India. Arracan, the capital, was taken from the Burmese by gen. Morrison, April 1, 1825. The subjugation of the whole province soon followed.

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person standing mute was declared convicted by 12 Geo. III. 1771; but by an act passed in 1827, the court is directed to enter a plea of "not guilty" in such cases. See *Mute*.

ARRAS, N.E. of France, the seat of a bishop since A.D. 390. Here a treaty was concluded between the king of France and duke of Burgundy, when the latter abandoned his alliance with England, Sept. 22, 1435. Another treaty was concluded by Maximilian of Austria with Louis XI. of France, whereby the counties of Burgundy and Artois were given to the dauphin as a marriage portion; this latter was entered into in 1482. *Velly*. Arras was held by the Austrians from 1493 till 1640.

ARREST FOR DEBT. The persons of peers, members of parliament, &c., are protected from arrest. See remarkable case of *Ferrars' Arrest*. Clergymen performing divine service privileged, 50 Edw. III. 1375. Seamen privileged from debts under 20*l.*, by act 30 Geo. II. 1756. Barristers are privileged from arrest while going to, attending upon, and returning from court, on the business of their clients. By statute 29 Charles II. no arrest can be made, nor process served, upon a Sunday. This law was extended by William III. Vexatious arrests prevented by act, May 1733. Prohibited for less than 10*l.* on process; 1779: and for less than 20*l.*, July, 1827. Arrests for less than 20*l.* were prohibited on mense process in Ireland, in June, 1829. Statute abolishing arrest for debt on mense process, except in cases wherein there is ground to show that the defendant designs to leave the country, 2 Vict., Aug. 1838. By 7 & 8 Vict. c. 96 (1844), the power of imprisonment even upon final process, that is judgment debts, is abolished if the sum does not exceed 20*l.* exclusive of costs: and by 9 & 10 Vict. c. 95 (1846), the judge has no power to punish except in case of fraud or contempt of court. See *Ambassadors*.

ARSENAL, a great military or naval repository. The largest in this country is at Woolwich, *whick see*.

ARSENIC. A mineral substance, caustic and corrosive to so great a degree, as to be a deadly poison. It has been known from the earliest times. Brandt, in 1733, made the first accurate experiments on its chemical nature. There are divers kinds, yellow or native, red and crystalline. Native arsenic is of an orange or yellow colour, and is called orpiment; it is commonly found in copper mines; and the heinous crimes committed by means of this mineral obliged the legislature to enact regulations for its sale, 14 Vict. cap. 13, June 5, 1851. The sale of all colourless preparations of arsenic is regulated by this act. In 1858 Dr. A. S. Taylor asserted that green paper-hangings prepared from arsenic were injurious to health; which appears now to be true, although doubted by some chemists. See *Kakodyl*.

ARSON. This felony has always been deemed capital, and been punished with death, and remained so on a consolidation of the laws by statute 7 & 8 Geo. IV., 1827. If any house be fired, persons being therein, or if any vessel be fired, with a view to murder or plunder, it shall be death, statute 1 Vict., July, 1837.

ARSOUF (Syria), BATTLE OF, in which Richard I. of England, commanding the Christian forces, reduced to 30,000, defeated Saladin's army of 300,000 Saracens and other infidels, on Sept. 3 or 7, 1191. Ascalon surrendered. Richard marched to Jerusalem, A.D. 1192.

ARTEMISIUM, a promontory near which the Greeks defeated the invading Persian fleet, 480 B.C.

ARTESIAN WELLS (from *Artesia*, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water, which has percolated from a higher level, and which rises through the boring tube to that level. The fountains in Trafalgar square and government offices near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1841, after eight years of exertion, by M. Mulot at an expense of about 12,000*l.*, and the well at Passy which is said will supply sufficient water for nearly 500,000 persons was begun in 1855, and completed in 1860 by M. Kind. Messrs. Amos & Easton completed an artesian well for

the Horticultural Society's garden in 1862. It yielded 880,000 gallons of water, at the temperature of 81° Fahr., in twenty-four hours. The well at Kissingen was completed in 1850. Artesian wells are now becoming common.

ARTICLES OF RELIGION. Six were published by Henry VIII. 1539, viz. transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession; and forty-two were published without the consent of parliament, in 1552. These forty-two were reduced to THIRTY-NINE in Jan. 1563; and they received the royal authority and the authority of parliament in 1571. The *Lambeth Articles*, of a more Calvinistic character, attempted to be imposed by archbishop Whitgift, were withdrawn in consequence of the displeasure of queen Elizabeth, 1595. One hundred and four articles were drawn up for Ireland by archbishop Usher in 1614, and established in 1634. On the union of the churches, the Irish adopted the English articles.

ARTICLES OF WAR were decreed in the time of Richard I. and John. Those made by Richard II. in 1485 appear in Grose's "Military Antiquities." The Articles of War now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

ARTIFICERS AND MANUFACTURERS were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A fine of 100*l.*, and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1736) and other statutes, which were repealed in 1824.

ARTILLERY, a term including properly all missiles: now applies to *cannon*. The first piece was a small one, contrived by Schwartz, a German cordelier, soon after the invention of gunpowder, in 1330. Artillery was used, it is said, by the Moors of Algeiras, in Spain, in the siege of 1343; it was used, according to our historians, at the battle of Crecy, in 1346, when Edward III. had four pieces of cannon, which gained him the battle. We had artillery at the siege of Calais, 1347. The Venetians first employed artillery against the Genoese at sea, 1377. *Voltaire*. Said to have been used by the English at Calais in 1383. Cast in England, together with mortars for bomb-shells, by Flemish artists, in Sussex, 1543. *Rymer's Fœdera*. Made of brass 1635; improvements by Browne, 1728.—See *Cannons, Bombs, Cannonades, Mortars, Howitzers, Petards, Rockets, Fire-arms*. The Royal Artillery regiment was established in the reign of Anne.

ARTILLERY COMPANY OF LONDON, HONOURABLE, was instituted in 1585, and revived in 1610. It met for military exercise at the Artillery ground, Finsbury, where the London Archers had met since 1498. (See *Archery*.) In the civil war, 1641-8, the company took the side of the parliament, and greatly contributed towards its success. The company numbered 1200 in 1803 and 800 in 1861. Since 1842 the officers have been appointed by the Queen. On the decease of the duke of Sussex in 1843, the Prince Consort became colonel and captain-general, who died on Dec. 14, 1862. His successor is not yet appointed (Aug. 1862).

ARTS. In the eighth century, the whole circle of sciences was composed of seven liberal arts—grammar, rhetoric, logic, arithmetic, music, geometry, and astronomy. *Harris*. The Royal Society of England (*which see*) obtained its charter April 2, 1663. The Society of Arts, to promote the polite arts, commerce, manufactures, and mechanics, was instituted in 1754; it originated in the patriotic zeal of Mr. Shipley, and of its first president, lord Folkestone.—**FINE ARTS.** The first public exhibition by the artists of the British metropolis took place in 1760, at the rooms of the Society of Arts, and was repeated there for several years, till, in process of time, the Royal Academy was founded. See *Royal Academy*. The Society of British Artists was instituted May 21, 1823; and their first exhibition was opened April 19, 1824. See *British Institution; National Gallery*.

ART-UNIONS began in France and Germany early in the present century. The first in Britain was established at Edinburgh; that in London was founded in 1836. Every subscriber is entitled to prints, and has the chance of drawing prizes.

ARUNDEL CASTLE (Sussex), built by the Saxons about 800. The duke of Norfolk enjoys the earldom of Arundel, as a feudal honour, by inheritance and possession of the castle, without any other creation. Philip Howard, son of the attainted duke of Norfolk, was made earl of Arundel, by summons, as possessor of this castle, 1580. It was thoroughly repaired by a late duke at a vast expense.

ARUNDELIAN MARBLES, containing the chronology of ancient history from 1582 to 355 B.C., and said to have been sculptured 264 B.C. They consist of 37 statues, 128 busts, and 250 inscriptions, and were found in the isle of Paros, in the reign of James I., about 1610. They were collected by Mr. W. Petty, purchased by lord Arundel, and given to the

university of Oxford, 1627. The characters of the inscriptions are Greek. There are two translations : by *Selden*, 1628 : by *Prideaux*, 1676. A variorum edition of the inscriptions, by *Maittaire*, appeared in 1732, and a fine one by *Chandler* in 1763. See *Kidd's Tracts* ; and *Porson's Treatise*, 1789.

ARUSPICES : priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (754 B.C.) and abolished by Constantine, A.D. 337, at which time they were seventy in number.

AS, a Roman weight and coin : when considered as a weight, it was a pound ; when a coin, it had different weights, but always the same value. In the reign of Servius, the *as* weighed a pound of brass ; in the first Punic war, it weighed two ounces, 264 B.C. ; in the second Punic war, one ounce, 218 B.C. ; and afterwards half an ounce ; its value was about three farthings sterling.

ASAPH, ST. (N. Wales), a bishopric founded by Kentigern, bishop of Glasgow. On returning into Scotland about A.D. 560, he left a holy man, St. Asaph, his successor, from whom the prelacy takes its name. It is valued in the king's books at 187*l.* 11*s.* 6*d.* By an order in council, 1838, the sees of St. Asaph and Bangor were to have been united on the next vacancy in either ; and the bishopric of Manchester was to have been then created. This order was annulled in 1846, and the two sees still exist. Present income, 4200*l.* See *Manchester*.

RECENT BISHOPS OF ST. ASAPH.

1802. Samuel Horsley, died Oct. 4, 1806.
1806. William Cleaver, died May 15, 1815.
1815. John Luxmoore, died Jan. 21, 1830.

1830. William Carey, died Sept. 13, 1846.
1846. Thomas Vowler Short (PRESENT bishop, 1862).

ASBESTOS, a native fossil stone, which may be split into threads and filaments, and which is endued with the property of remaining unconsumed in fire. Cloth was made of it by the Egyptians (*Herodotus*), and napkins in the time of Pliny, A.D. 74 ; and also paper. The spinning of asbestos known at Venice, about A.D. 1500. *Porta*.

ASCALON (Syria). The Egyptian army was defeated here by the Crusaders, Aug. 12, 1099. Ascalon was besieged by the latter in 1148, taken in 1153 ; and again in 1191.

ASCENSION, an island in the Atlantic ocean, 800 miles N. W. of St. Helena, discovered by the Portuguese in 1501 ; and taken possession of by the English in 1815.

ASCENSION DAY, also called Holy Thursday, when the church celebrates the ascension of our Saviour, the fortieth day after his resurrection from the dead, May 14, A.D. 33 ; first commemorated, it is said, A.D. 68.

ASHANTEES, a warlike tribe of Negroes of West Africa. In 1807 they conquered Fantee, in which the British settlement Cape Coast Castle is situated. On the death of the king, who had been friendly to the English, hostilities began ; and on Jan. 21, 1824, the Ashantees defeated about 1000 British under sir Charles M'Carthy at Accra, and brought away his skull with others as trophies. They were subdued Aug. 27, 1826, by Col. Purdon.

ASHBURTON TREATY, concluded at Washington, Aug. 9, 1842, by Alexander, lord Ashburton, and John Tyler, president of the United States : it defined the boundaries of Canada and the state of Maine, settled the extradition of criminals, &c.

ASHMOLEAN LIBRARY (books, manuscripts, coins, &c.), was presented to the university of Oxford by Elias Ashmole, the herald and antiquary, about 1682. It included the collections of the Tradescants, to whom he was executor. He died at Lambeth in 1692.

ASH-WEDNESDAY. The earlier Christians did not commence Lent until the Sunday now called the first in Lent. Pope Felix III., in A.D. 487, first added the four days preceding the old Lent Sunday, to raise the number of fasting days to forty ; Gregory the Great introduced the sprinkling of ashes on the first of the four additional days, and hence the name of *Dies Cinerum*, or Ash-Wednesday. At the Reformation this practice was abolished, "as being a mere shadow, or vain show."

ASKESIAN SOCIETY (from the Greek *askēsis*, exercise), instituted in March, 1796, by a number of young men for discussing philosophical subjects. Its founders were the afterwards celebrated Wm. Allen, Wm. Phillips, Alex. Tilloch, Luke Howard, W. H. Pepsy, and others. In 1806 it merged into the Geological Society.

ASIA, the largest division of the globe, so called by the Greeks, from the nymph Asia, the daughter of Oceanus and Tethys, the wife of Japhet. Asia was the first quarter of the world peopled : here the law of God was first promulgated ; here many of the greatest

monarchies of the earth had their rise ; and hence most of the arts and sciences have been derived. *See the various countries, China, India, Persia, &c.*

ASIA MINOR (now Anatolia), comprised the Ionian colonies on the coast, the early seats of Greek civilisation, and the countries Mysia, Phrygia, Lycia, Bithynia, Cælia, Lydia, Cappadocia, Galatia, &c., with the cities Troy, Ephesus, Smyrna (*all which see*). From the time of the rise of the Assyrian monarchy, about 2000 B.C., to that of the Turks under Osman, Asia Minor was the battle-field of the conquerors of the world.

First settlement of the Ionian Greeks, about B.C.	1043	Gradually acquired by the Romans B.C. 188 to A.D. 15

Contended for by his successors ; separate kingdoms established . . .	321-278	as an empire by the Turks under Mahomet I. 1413

ASPERNE AND ESSLING, near the Danube and Vienna, where a series of desperate conflicts took place between the Austrian army under the archduke Charles, and the French under Napoleon, Massena, &c., on May 21-23, 1809, ending in the defeat of Napoleon ; the severest check that he had yet received. The loss of the former exceeded 20,000 men, and of the latter 30,000. The daring marshal Lannes was killed ; the bridge of the Danube was destroyed, and Napoleon's retreat endangered ; but the success of the Austrians had no beneficial effect on the subsequent prosecution of the war.

ASPHALT, a solid bituminous substance, which in nature probably derived its origin from decayed vegetable matter. The artificial asphalt obtained from gas-works began to be used as pavement about 1840 ; but has not been generally approved of. It is still in use in some provincial towns, and at Paris.

ASSAM (N.E. India) came under British dominion in 1825 ; the right to the principality being surrendered by the king of Ava in 1826. The tea-plant was discovered here by Mr. Bruce in 1823. A superintendent of the tea-forests was appointed in 1836, the cultivation of the plant having been recommended by lord William Bentinck. The Assam Tea Company was established in 1839. The tea was much in use in England in 1841. Chinese labour has been introduced.

ASSASSINATION PLOT, said to have been formed by the earl of Aylesbury and others to assassinate William III., near Richmond, Surrey, as he came from hunting. Its object would have been attained, Feb. 14, 1695-6, but for its timely discovery by Prendergast.

ASSASSINS, or ASSASSINIANS, a band of fanatical Mahometans, collected by Hassan-ben-Sabah, and settled in Persia A.D. 1090. In Syria they possessed a large tract of land among the mountains of Lebanon. They murdered the marquis of Montferrat in 1102 ; Lewis of Bavaria in 1213 ; and the khan of Tartary in 1254. They were conquered by the Tartars in 1257 ; and were extirpated in 1272. The chief or king of the corps assumed the title of "*Ancient of the Mountain*," and "*Old Man of the Mountain*." * They trained up young people to assassinate such persons as their chief had devoted to destruction. *Hénault*. From this fraternity the word *assassin* has been derived.

ASSAY OF GOLD AND SILVER originated with the bishop of Salisbury, a royal treasurer in the reign of Henry I. *Du Cange*. But certainly some species of assay was practised as early as the Roman conquest. Assay was established in England 1354 ; regulated 13 Will. III. 1700, and 4 Anne, 1705. Assay masters appointed at Sheffield and Birmingham, 1773. The alloy of gold is silver and copper, that of silver is copper. Standard gold is 2 carats of alloy to 22 of fine gold. Standard silver is 18 dwts. of copper to 11 ozs. 2 dwts. of fine silver. *See Goldsmiths' Company*.

ASSAYE, E. Indies, BATTLE OF. The British army, under general Arthur Wellesley (afterwards duke of Wellington) entered the Mahratta states on the south ; took the fort of Ahmednugger, Aug. 12 ; and defeated Scindiah and the rajah of Berar at Assaye, Sept. 23, 1803. This was Wellington's first great battle, in which he opposed a force full more than ten times greater than his own (only 4500 men). The enemy retired in great disorder, leaving behind the whole of their artillery, ammunition, and stores.

ASSEMBLY OF DIVINES held at Westminster, July 1, 1643, convoked by order of parliament, to consider the liturgy, government, and doctrines of the church. Two were

* He sent his emissaries to assassinate Louis IX. of France, called St. Louis ; but being afterwards affected by the fame of this king's virtues, and he being at the time in his minority, he gave the prince notice to take care of himself. *Hénault*. This statement is doubted.

elected for each county. They adopted the Scottish covenant, and drew up the directions for public worship, a confession, and the catechisms now used by the church of Scotland. The last (1163rd) meeting was on Feb. 22, 1649. See *Church of Scotland*.

ASSENT. See *Royal Assent*.

ASSESSED TAXES. The date of their introduction has been as variously stated as the taxes coming under this head have been defined—all things have been assessed, from lands and houses to dogs and hair-powder. By some the date is referred to the reign of Ethelbert, in 991; by others to that of Henry VIII. 1522; and by more, to the reign of William III. 1689, when a land-tax was imposed. See *Land Tax*. The assessed taxes yielded in 1815 (the last year of the war), exclusively of the land-tax, 6,524,766*l.*, their highest amount. These imposts have varied in their nature and amount, according to the exigencies of the state, and the contingencies of war and peace. They were considerably advanced in 1797, and 1801, *et seq.*, but considerably reduced in 1816, and in subsequent years. The last act for the repeal of certain assessed taxes was passed 16 & 17 Vict. cap. 90, Aug. 20, 1853, which was explained and amended by 17 & 18 Vict. cap. 1, Feb. 17, 1854.—17 & 18 Vict. cap. 85, was passed for the better securing and accounting for the Assessed and Income Taxes, Aug. 10, 1854. See *Taxes and Income Tax*.

ASSIENTO, a contract between the king of Spain and other powers, for furnishing the Spanish dominions in America with negro slaves. *Burke*. It began with the Flemings. By the treaty of Utrecht in 1713, the British government engaged to furnish 4800 negroes annually to Spanish America. The contract was vested in the South Sea Company. This contract was given up to Spain in 1750. See *Guinea*.

ASSIGNATS. Paper currency, to support public credit during the revolution, ordered by the National Assembly of France, April 1790. At one period, eight milliards, or nearly 350 millions of pounds sterling, of this paper were in circulation in France and its dependencies. *Alison*. Assignats were superseded by mandates in 1796.

ASSIZE OF BATTLE. See *Appeal*.

ASSIZE OF BREAD. The first statute for it was in the third year of John, 1202, when the regulations thereof were ordered to be observed upon pain of the pillory. The chief justiciary, and a baker commissioned by the king, had the inspection of the assize. *Matthew Paris*. The assize was further regulated by statute in 51 Henry III. 1266, and 8 Anne, c. 19, 1709. It was abolished in England, and the sale of bread regulated as at present, in August, 1815. The sale in Ireland was regulated by statute, 2 Will. IV., May, 1832; Bread act, 7 Will. IV. 1836. Bread act, Ireland, placing its sale on the same footing as in England, 1 Vict. 1838. See *Bread*.

ASSIZE COURTS (from *assideo*, *I sit*) are of very ancient institution in England, and in old law books are defined to be an assembly of knights and other substantial men, with the justice, to meet at a certain time and place; regulated by *Magna Charta*, A.D. 1215. The present justices of assize and *Nisi Prius* are derived from the statute of Westminster, 13 Edw. I. 1284. *Coke*; *Blackstone*. "The king doth will that no lord, or other of the country, shall sit upon the bench with the justices to take assize in their sessions in the counties of England, upon great forfeiture to the king," 20 Rich. II. 1396. *Statutes, Brough Aol*. Assizes are general or special; general when the judges go their circuits, and special when a commission is issued to take cognisance of one or more causes. See *Bloody Assize*.

ASSOCIATIONS. See *National Associations*.

ASSUMPTION, FEAST OF THE, August 15. It is observed by the church of Rome in honour of the Virgin Mary, who is said to have been taken up to heaven in her corporeal form, body and spirit, on this day, A.D. 45, in her 75th year. The festival was instituted in the 7th century, and enjoined by the council of Mentz, A.D. 813.

ASSURANCE. See *Insurance*.

ASSYRIA, an Asiatic country between Mesopotamia and Media, was the seat of the earliest recorded monarchy. Its history is mainly derived from Ctesias, an early Greek historian of doubtful authenticity, Herodotus, and the Holy Scriptures. The discovery of the very interesting Ninevite antiquities, now in the British Museum, by Mr. Layard, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, sir H. Rawlinson, and other scholars, have drawn much attention to the Assyrians. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates they assign to events in Assyrian history: some of these varying dates are inserted:

ASSYRIA, *continued.*

Nimrod or Belus reigns	B.C. [2554 H. 2235 C.]	2245	Phul raised to the throne. <i>Blair</i>	about B.C.	777
"Asshur builded Nineveh" (<i>Gen. x. xi</i>) about		2218	He invades Israel, but departs without drawing	a sword. <i>Blair</i> ; 2 <i>Kings</i> xv. 19, 20	770
Ninus, son of Belus, reigns in Assyria, and			Tiglath-Pileser, invades Syria, takes Damascus,	and makes great conquests	740
names his capital after himself, Nineveh	[2182 C.]	2069	Shalmaneser takes Samaria, transports the	people, whom he replaces by a colony of

king, is mythically said to have enclosed					
himself, his court, and women, in his palace,					
and to have perished in the fire kindled by					
himself.]		820			

ASTRACAN, S.E. Russia, a province acquired from the Mogul's empire in 1554; visited and settled by Peter the Great in 1722.

ASTROLOGY. Judicial astrology was invented by the Chaldeans, and hence was transmitted to the Egyptians, Greeks, and Romans. It was much in vogue in Italy and France in the time of Catherine de' Medicis, who was married to Francis I. of France, 1533. *Hénault*. The early history of astrology in England is very little known. It is said that Bede, A.D. 673—735, was addicted to it; and Roger Bacon, 1214—1292. Lord Burleigh calculated the nativity of Elizabeth; and she, and all the European princes, were the humble servants of Dee, the astrologer and conjuror; but the period of the Stuarts was the acme of astrology amongst us. It is stated that Lilly was consulted by Charles I. respecting his projected escape from Carisbrook castle in 1647. *Ferguson*. Astrological almanacks are still published in London (1862).

ASTRONOMY. The earliest astronomical observations were made at Babylon about 2234 B.C. The study of astronomy was much advanced in Chaldæa under Nabonassar; it was known to the Chinese about 1100 B.C.; some say many centuries before. See *Eclipses*, *Planets*, *Comets*.

ASYLUMS, OR PRIVILEGED PLACES, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. God commanded the Jews to build certain cities for this purpose, 1451 B.C., *Numbers* xxv.—The posterity of Hercules are said to have built one at Athens, to protect themselves against such as their father had irritated. Cadmus built one at Thebes, 1490 B.C., and Romulus one at Mount Palatine, 751 B.C. See *Sanctuaries*.

ATELIERS NATIONAUX (National Workshops) were established by the French provisional government in Feb. 1848. They interfered greatly with private trade, and about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the fearful conflicts in June following.

ATHANASIAN CREED. The great controversy regarding the divinity of Christ arose about A.D. 316, through the preaching of Arius. His great opponent, Athanasius, was a native of Alexandria, and was elected its bishop, 326. He encountered great persecution at the hands of the Arians; was several times exiled; and died in 373. The creed which goes by his name is supposed by many authorities to have been written about 340; by others to be the compilation of Vigilius Tapsensis, an African bishop in the fifth century. It was first commented on by Venatius Fortunatus, bishop of Poitiers in 570. Dr. Waterland's History of this creed (1723) is exhaustive. See *Arians*.

ATHEISM (from the Greek *a*, without, *Theos*, God, see *Psalms* xiv. 1). This doctrine has had its votaries and martyrs. Spinoza was the defender of a similar doctrine (1632—1677). Lucilio Vanini publicly taught atheism in France, and was condemned to be burnt at Toulouse in 1619. Mathias Knutzen, of Holstein, openly professed atheism, and had upwards of a thousand disciples in Germany about 1674; he travelled to make proselytes, and his followers were called *Conscienciaries*, because they held that there is no other deity than conscience. Many eminent men have professed atheism. "Though a small draught of philosophy may lead a man into atheism, a deep draught will certainly bring him back again to the belief of a God." *Lord Bacon*.

ATHENÆA were great festivals celebrated at Athens in honour of Minerva. One was called Panathenæa, the other Chalcea; they are said to have been instituted by Erechtheus or Orpheus, 1397 or 1495 B.C.; and Theseus afterwards renewed them, and caused them to be observed by all the Athenians, the first every fifth year, 1234 B.C. *Plutarch*.

ATHENÆUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. The most celebrated Athenæa were at Athens, Rome, and Lyons: that of Rome, of great beauty, was erected by the emperor Adrian, A.D. 125.—The ATHENÆUM CLUB of London was formed in 1823, for the association of persons of scientific and literary attainments, artists, and noblemen and gentlemen, patrons of learning, &c., by Dr. T. Young, Davy, Scott, Croker, Chantrey, Faraday, Lawrence, and others; the club-house was erected in 1829-30 on the site of the late Carlton-palace; it is of Grecian architecture, and the frieze is an exact copy of the Panathenæic procession which formed the frieze of the Parthenon.—The Liverpool Athenæum was opened Jan. 1, 1799.—At Manchester, Bristol, and many other places, buildings under this name, and for a like purpose, have been founded.—The *Athenæum*, a weekly literary journal, first appeared in 1828.

ATHENS, the capital of ancient Attica, and of the modern kingdom of Greece. The first sovereign mentioned is Ogysges, who reigned in Boeotia, and was master of Attica, then called Ionia. In his reign (about 1764 B.C.) a deluge took place (by some supposed to be the universal deluge), that laid waste the country, in which state it remained two hundred years, until the arrival of the Egyptian Cærops and a colony, by whom the land was re-peopled, and twelve cities founded, 1556 B.C. Athens was ruled by seventeen successive kings (487 years), by thirteen *perpetual* archons (316 years), seven *decennial* archons (70 years), and lastly by *annual* archons (760 years). It attained great power, and perhaps no other city

in the world can boast, in such a short space of time, of so great a number of citizens illustrious for wisdom, genius, and valour. The ancients, to distinguish Athens in a more peculiar manner, called it *Asia*, the city, by eminence, and one of the eyes of Greece. See *Greece*.

Arrival of Cecrops	B.C. [1558 H. 1433 Cl.]	1556	Comedies prohibited at Athens	B.C.	440

Persian invasion; battle of Marathon		490	The Romans proclaim liberty at Athens		196
Death of Miltiades		480	Subjugation of Greece		144
Aristides, surnamed the <i>Just</i> , banished		487	The Athenians implore assistance against the Romans from Mithridates, king of Pontus, whose general, Archelaus, makes himself master of Athens		88
Athenians taken by the Persians		480	Athenians besieged by Sylla, the Roman general, it is reduced to surrender by famine		86
Burnt to the ground by Mardonius		479	Cicero studies at Athens, 79; and Horace		42
Rebuilt and fortified; Piræus built		478	The Athenians desert Pompey, to follow the interests of Cæsar		47
Themistocles banished		471	Athenians visited by the Apostle Paul	A.D.	53
Cimon, son of Miltiades, overruns all Thracæ		469	Many temples, &c., erected by Hadrian		122-135
Pericles takes part in public affairs, 463; he and Cimon adorn Athens, 464; the latter banished through his influence		461	Athenians taken by Alaric		397
Athenians begin to tyrannise over Greece		459	By Mahomet II.		1456
Literature, philosophy, and art flourish		448	By the Venetians		1466
The first sacred (or social) war; <i>which see</i>		—	Restored to the Turks		1419
Tolmida conducts an expedition into Boeotia, and is defeated and killed near Coroneæ		447	Athenians suffered much during the insurrection, 1821-7. Taken May 17, ...		1807
The thirty years' truce between the Athenians and Lacedæmonians		445	Becomes the capital of the kingdom of modern Greece		1803
Herodotus said to have read his history in the council at Athens		—	Population, 50,000		1807
Pericles subdues Samos		440			

ATHLONE, Roscommon, Ireland, formerly a place of great strength and beauty, was burnt during the civil war in 1641. See *Aughrim*.

ATLANTIC TELEGRAPH. See *Submarine Telegraph*.

ATMOSPHERE. See *Air*.

ATMOSPHERIC RAILWAY. Experiments were made on a line of rail, laid down across Wormwood Scrubs, London, between Shepherd's Bush and the Great Western railroad, to test the efficacy of atmospheric tubes, the working of the air-pump, and speed of carriages upon this new principle on railroads in June, 1840. In Ireland the first atmospheric railway was commenced between Dalkey and Killiney, in the vicinity of Dublin, in Sept. 1843 : opened March 29, 1844 ; discontinued in 1855. An atmospheric railway was proposed to be used in the streets of London by Mr. T. W. Rammell in 1857.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The somewhat incoherent labours of his predecessors were reduced by John Dalton to four laws of combining proportion, which have received the name of "Atomic Theory." His "Chemical Philosophy," containing the exposition of his views, appeared in 1808. Dr. C. Daubeny's work on the Atomic Theory was published in 1850.

ATTAINDER, ACTS OF, have been passed in numerous reigns ; two witnesses in cases of high treason are necessary where corruption of blood is incurred, unless the party accused shall confess, or stand mute, 7 & 8 Will. III. 1694-5. *Blackstone*. The attainder of lord Russell, who was beheaded in Lincoln's-inn-fields, July 21, 1683, was reversed under William, in 1689. The rolls and records of the acts of attainder passed in the reign of James II. were cancelled and publicly burnt, Oct. 2, 1695. Amongst the last acts reversed was the attainder of the children of lord Edward Fitzgerald (who was implicated in the rebellion in Ireland of 1798), July 1, 1819.

ATTICA. See *Athens*.

ATTILA, surnamed the "*Scourge of God*," and thus distinguished for his conquests and his crimes, having ravaged the eastern empire from 445 to 450 A.D., when he made peace with Theodosius. He invaded the western empire, 450, and was defeated by Aëtius at Chalons, A.D. 451 ; he then retired into Pannonia, where he died through the bursting of a bloodvessel on the night of his nuptials with a beautiful virgin named Ildico, A.D. 453.

ATTORNEY-GENERAL, a law officer of the crown, appointed by letters patent. He has to exhibit informations and prosecute for the king in matters criminal ; and to file bills in Exchequer, for any claims concerning the crown in inheritance or profit. Others may bring bills against the king's attorney. The first attorney-general was William de Gislham, 7 Edward I. 1278. *Beaton*.

ATTORNEY-GENERALS SINCE THE RESTORATION.

Sir Jeffery Palmer	A.D. 1660	Lloyd Kenyon, again ; aft. lord Kenyon	A.D. 1783

	Sir Wm. Atherton (the <i>present</i> officer) . July, 1861

ATTORNEYS (who act for others at law). The number in Edward III.'s reign was under 400 for the whole kingdom. In the 32nd of Henry VI. 1454, a law reduced the practitioners in Norfolk, Norwich, and Suffolk, from eighty to fourteen, and restricted their increase. The number of attorneys now practising in England, or registered, or retired, is said to be about 13,000. The number in Ireland is stated at 2000. The laws respecting attorneys and solicitors were amended in 1851 and 1860.

ATTRACTION is described by Copernicus, about 1520, as an appetite or appetite which the Creator impressed upon all parts of matter. It was described by Kepler to be a corporeal affection tending to union, 1605. In 1687, sir I. Newton published his "*Principia*," containing his important researches on this subject. There are the attractions of *Gravitation*, *Magnetism*, and *Electricity*, which see.

AUCKLAND, capital of New Zealand (north island), was founded in 1840. The population of the district, in 1857, was estimated at 15,000 Europeans, and 35,000 natives.

AUCTION. A kind of sale known to the Romans. The first in Britain was about 1700, by Elisha Yale, a governor of Fort George in the East Indies, who thus sold the goods he had brought home. Auction and sales' tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. cap. 15 (1845), the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of 10*l*." In 1858 there were 4358 licences granted, producing 43,580*l*. Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland.

AUDIT-OFFICE, Somerset House. Commissioners for auditing the public accounts were appointed in 1785. Many statutes regulating their duties have since been enacted.

AUERSTADT. At this place, and at Jena (*which see*), on Oct. 14, 1806, the French signally defeated the Prussians.

AUGHRIM, near Athlone, in Ireland, where, on July 12, 1691, a battle was fought between the Irish, headed by the French general St. Ruth, and the English under general Ginckel. The former were defeated and lost 7000 men; the latter lost only 600 killed and 960 wounded. St. Ruth was slain. This engagement proved decisively fatal to the interests of James II. in Ireland. Ginckel was immediately after created earl of Athlone. The ball by which St. Ruth was killed is still suspended in the choir of St Patrick's cathedral, Dublin.

AUGMENTATION OF POOR LIVINGS' OFFICE, was established in 1704. 5597 poor clerical livings, not exceeding 50*l*. *per annum*, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established by parliament.

AUGMENTATION COURT. Erected in 1534 by Henry VIII. to increase the royal revenues by adding those of the suppressed monasteries.

AUGSBURG, Bavaria, originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diets of the empire have been held. In A.D. 952, a council confirmed the order for the celibacy of the priesthood; and on Sept. 25, 1555, the celebrated treaty of Nassau was signed, by which religious liberty was secured to Germany. A treaty between Holland and other European powers, to cause the treaties of Munster and Nimeguen to be respected, signed 1686. See *Munster* and *Nimeguen*. Augsburg was taken by the French, Oct. 10, 1805.

AUGSBURG CONFESSION (Articles of Faith, drawn up by Melancthon, and by him and Luther presented to the emperor Charles V. June 25, 1530), was directly opposed to the abuses of the church of Rome. It was signed by the elector of Saxony, and other princes of Germany, and was delivered to the emperor in the palace of the bishop of Augsburg.

AUGURY. Husbandry was in part regulated by the coming or going of birds, long before the time of Hesiod. Augurs, instituted at Rome, with vestals and several orders of the priesthood, by Numa, 710 B.C. There was a community of them appointed to foretell

events by the flight of birds, and other circumstances.—The king Car, from whom Caria in Asia Minor is named, was the inventor of augury by birds. *Vossius*.

AUGUST, the eighth Roman month of the year (previously called *Sextilis*, or the sixth from March), was named in honour of Augustus Cæsar, in the year 8 B.C., because in this month he was born, was created consul or chief magistrate, thrice triumphed in Rome, subdued Egypt to the Roman empire, and made an end of the civil wars.

AUGUSTINS, a religious mendicant order, which ascribes its origin to St. Augustin, who died A.D. 430. These monks really first appeared in the 12th century, and the order was constituted by Pope Alexander IV., in 1256. The rule requires strict poverty, humility, and chastity. Martin Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., in 1506, being one of the two courts, the first called the Imperial Chamber, formerly held at Spire, and afterwards at Wetzlar, and the other the Aulic council at Vienna. These courts, having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURICULAR CONFESSION. The confession of sin at the ear (Latin *auris*) of the priest must have been an early practice, since it is said to have been forbidden in the fourth century by Nectarius, archbishop of Constantinople. It was first enjoined by the council of Lateran, in 1215. It was one of the six articles of faith, enacted by our Henry VIII. in 1539, but was abolished in England at the Reformation. Its revival here has been attempted by the church party called Puseyites or Tractarians; but without much success.* Confession was enjoined by the council of Trent in 1551.

AURIFLAMMA, OR ORIFLAMME, the golden national banner so often mentioned in French history, was a costly standard belonging to the abbey of St. Denis, and suspended over the tomb of that saint, A.D. 1140. Louis le Gros was the first king who took this standard from the abbey, to battle, 1124. *Hénault*. At the battle of Agincourt, 1415, it appeared for the last time. *Tillet*.

AURORA FRIGATE, sailed from Britain in 1771, to the East Indies, and was never again heard of.

AURORÆ-BOREALES AND AUSTRALES (Northern and Southern Polar Lights), though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March 1716 an aurora borealis extended from the west of Ireland to the confines of Russia.—The whole horizon in the lat. of 57° N. overspread with continuous haze of a dismal red during the whole night, by which many people were much terrified, Nov. 1765.—Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. Its appearance in the southern hemisphere had been previously doubted.†

AUSTERLITZ (in Moravia), where a battle was fought between the French and the allied Austrian and Russian armies, Dec. 2, 1805. Three emperors commanded; Alexander of Russia, Francis of Austria, and Napoleon of France. The killed and wounded exceeded 30,000 on the side of the allies; who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Presburg, signed Dec. 26, 1805. See *Presburg*.

AUSTRALASIA, the fifth great division of the world. This name, originally given it by De Brosse, includes New Holland, Van Diemen's Land, New Guinea, New Britain, New Zealand, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spaniards as early as 1526; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1605 explored a part of the coast of New Guinea. Torres, a Spaniard, passed through the straits which now bear his name, between that island and Australia, and gave the first correct report of the latter, 1606. The Dutch continued their discoveries. Between 1642 and 1644, Tasman completed a discovery of a great part of the Australian coast, together with the island of Van Diemen's Land (also called Tasmania). Wm. Dampier, an Englishman, between 1684 and 1690, explored a part of the W. and N.

* The rev. Alfred Poole, one of the curates of St. Barnabas, Knightsbridge, was suspended from his office for practising auricular confession, in June, 1858, by the bishop of London. On appeal, the suspension was confirmed in January, 1859. Much excitement was created by a similar attempt by the rev. Temple West at Boyne Hill, in September, 1858.

† The aurora is now attributed by many philosophers to the passage of electric light through the rarefied air of the polar regions. In August and September, 1859, when brilliant auroræ were very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroræ were seen at Rome and Basel, and also in Australia.

W. coasts. Between 1763 and 1766, Wallis and Carteret followed in the track of Dampier, and added to his discoveries; and in 1770, Cook first made known the East coast of Australia. Furneaux in 1773, Bligh in 1789, Edwards in 1791, Bligh (a second time) in 1792, Portlock same year, Bampton and Alt in 1793, and Bass and Flinders explored the coasts and islands in 1798-9, and discovered Bass's Straits. Grant in 1800, and Flinders again (1801-5), completed the survey. *M'Culloch*.

AUSTRALIA, the smallest continent, or largest island, in the world; about six times smaller than America, and ten times larger than Borneo or Papua; its area being estimated at about three million square miles. Its colonisation by convicts was first proposed after the separation of the American colonies from this country. It is now divided into four provinces—*New South Wales, South Australia, Victoria* (or Port Phillip), and *Western Australia* (or Swan River), all situated on the sea coast: total population in 1859, 979,632.

See *New South Wales, South Australia, Victoria, and West Australia*.

* GOLD DISCOVERY.—Mr. Edward Hargraves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Conobolas, some thirty miles west of Bathurst. On his return home, he examined the soil, and after one or two months' digging, found a quantity of gold, Feb. 12, 1851. He applied to the colonial government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places; and in the first week of July, 1851, an aboriginal inhabitant, formerly attached to the Wellington mission, and then in the service of Dr. Kerr, of Wallawa, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of quartz (from two to three hundred weight), found in the Murroo Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at 4000*l*. The "Victoria nugget," a magnificent mass of virgin gold, weighing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb. weight was also found. From the gold fields of Mount Alexander and Ballarat, in the district of Victoria, up to Oct. 1852, there were found 2,532,422 ounces, or 105 tons 10 cwt. of gold; and the gold exported up to the same date represented 8,363,477*l*. sterling. On Nov. 1856, the "James Baines" and "Lightning" brought gold from Melbourne valued at 1,200,000*l*. The "Welcome nugget" weighed 2012 ounces; value, 8376*l*. 10*s*. 10*d*., found at Baker's Hill, Ballarat, June 11, 1858. Between May 1851, and May 1861, gold to the value of 96,000,000*l*. had been brought to England from New South Wales and Victoria.

AUSTRASIA, *Österreich* (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, A.D. 511, and ended by Carloman becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steam-ship, sailed from Southampton for New York, Sept. 4, 1858, with 538 persons on board. In lat. 45° N., long. 41° 30' W., it caught fire through the carelessness of some one in burning some tar to fumigate the steerage. Only 67 persons were saved—upwards of 60 by the *Maurice*, a French barque; the rest by a Norwegian barque. A heart-rending account was given in the *Times*, Oct. 11, 1858, by Mr. Charles Brews, an English survivor.

AUSTRIA, *Österreich* (Eastern Kingdom), anciently Noricum and part of Pannonia; was annexed to the Roman empire about A.D. 33; was overrun by the Huns, Avars, &c., during the 5th and 6th centuries, and taken from them by Charlemagne about 791. He established margraves, who became dukes (the first, Henry II. 1142), and archdukes (the first, Maximilian I., 1493). Austria was long subject to the king of Bohemia, but Ottocar surrendered it to Rudolph, count of Hapsburg, in 1278. The latter became emperor of Germany, which dignity was held by his descendants till Aug. 11, 1804, when Francis II. surrendered it, and took the title of Francis I. emperor of Austria. Population of the empire in Oct. 1857, 35,019,058.

Revolt of Switzerland from the house of Austria, in the reign of Albert I.	A.D. 1307	Archduke John appointed vicar-general of the empire	May 29, 1848
Albert II., duke of Austria, succeeds to three crowns,—the imperial, and those of Hungary and Bohemia	1438	A constituent assembly meet at Vienna, July 22	—

EMPERORS OF AUSTRIA.

1804. Francis I. (late Francis II. of Germany), emperor of Austria only, Aug. 11, 1804; died March 2, 1835.
 1835. Ferdinand, his son, March 2; abdicated in favour of his nephew,
 1848. Francis-Joseph, Dec. 2, 1848 (the PRESENT, 1862) emperor of Austria; [born Aug. 18, 1830; married April 24, 1854, to Elizabeth of Bavaria.]
 [Heir: their son, the Archduke Rodolph, born Aug. 21, 1858.]

AUTHORS. For the law securing copyright, see *Copyright and Literary Property.*

AUTO DA FÉ (Act of faith), the punishment of a heretic, often by burning alive, coeval with the Inquisition. Since 1203, more than 100,000 victims have been sacrificed by the sentence of the inquisitions of Roman Catholic countries. One of the last executions of this kind was at Goa, where twenty sufferers perished in the flames, 1717. An *auto da fé* took place at Lisbon, in 1761, when Malagrida, a Jesuit, was strangled and burnt for heresy.

AUTOMATON FIGURES (OR ANDROIDES), made to imitate living actions, are of early invention. Archytas' flying dove was formed about 400 B.C. Friar Bacon is said to have made a brazen head which spoke, A.D. 1264. Albertus Magnus spent thirty years in making another. A coach and two horses, with a footman, a page, a lady inside, were made by Camus, for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1649. Vaucanson made an artificial duck, which performed every function of a real one, even an imperfect digestion—eating, drinking, and quacking. Vaucanson also made a flute-player, 1738. The writing automaton, exhibited in 1769, was a pentagraph worked by a confederate out of sight. The automaton chess-player exhibited the same year was also worked by a hidden person, and so was "the invisible girl," 1800. Maelzel made a trumpeter about 1809. Early in this century an automaton was exhibited in London which pronounced several sentences with tolerable distinctness.

AVA in 1819 became the capital of the Burmese empire (*which see*).

AVARS, a barbarian tribe, which ravaged Pannonia and annoyed the eastern empire in the 6th and 7th centuries, was subdued by Charlemagne about A.D. 799.

"*AVE MARIA!*" the salutation of the angel Gabriel to the Virgin (*Luke* i. 26), was made a formula of devotion by pope John XXI. about 1326. It is repeated in Roman Catholic countries daily at the ringing of the matin and the vesper bell. *Ashé*. It can be traced no higher than the beginning of the fifteenth century, when Vicentius Ferrerius used it before his discourses. *Bingham*.

AVIGNON, a city S.E. France, ceded by Philip III. to the pope in 1273. The papal seat was removed for seventy years to Avignon, in 1308. It was seized and restored several times by the French kings; the last time restored on the suppression of the Jesuits, 1773. It was claimed by the national assembly, 1791, and was confirmed to France by the congress of sovereigns in 1815. In Oct. 1791, horrible massacres took place here.

AXE, WEDGE, WIMBLE, LEVER, and various tools in common use, are said to have been invented by Dædalus, an artificer of Athens, to whom also is ascribed the invention of masts and sails for ships, 1240 B.C. Many tools are represented on the Egyptian monuments.

AYDE, OR AIDE, the tax paid by the vassal to the chief lord upon urgent occasions. In France and England an *aide* was due for knighting the king's eldest son. One was demanded by Philip the Fair, 1313. The *aide* due upon the birth of a prince, ordained by the statute of Westminster (Edward I.) 1285, for the ease of the subject, was not to be levied until he was fifteen years of age. The *aide* for the marriage of the king's eldest daughter could not be demanded, in this country, until her seventh year. In feudal tenures, there was an *aide* for ransoming the chief lord; so when our Richard I. was kept a prisoner by the emperor of Germany, an *aide* was enforced of 20s. upon every knight's fee, to redeem him.

AYLESBURY, Buckinghamshire, was reduced by the West Saxons in A.D. 571. St. O'Syth, beheaded by the pagans in Essex, was buried there, A.D. 600. William the Conqueror invested his favourites with some of its lands, under the tenure of providing "straw for his bed-chambers; three eels for his use in winter; and in summer, straw, rushes, and two green geese, thrice every year." Incorporated by charter in 1553.

AZOFF, SEA OF, the Palus Mæotis of the ancients, communicates by the strait of Yenikalé (the Bosphorus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition composed of British, French, and Turkish troops, commanded by sir G. Brown, landed at Kertch, May 24, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikalé, which also offered no resistance. On the same evening the allied fleet entered the sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores were destroyed by the Russians to prevent them falling into the hands of the allies.

AZORES, OR WESTERN ISLES (N. Atlantic), the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by a Dutchman who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered. Martin Behem found one of them covered with beech-trees, and he called it therefore *Fajal*; another abounding in sweet flowers, and he therefore called it *Flores*; and all full of hawks, and he therefore named them the *Azores*. They were colonised about 1450. A violent concussion of the earth took place here for twelve days, in 1591. A devastating earthquake, in 1757. Here are fountains of boiling water. A volcano at St. George's destroyed the town of Ursulina, May, 1808; and in 1811 a volcano appeared near St. Michael's, in the sea, where the water was eighty fathoms deep. An island called Sabrina gradually disappeared, Dec. 1812.

AZOTE, the name given by French chemists to nitrogen (*which see*).

AZTECS, the ruling tribe in Mexico, at the time of the Spanish conquest (1521). In 1853 some pretended Aztec children were exhibited in London. They were considered to be mere dwarfs.

B.

BAALBEC, HELIOPOLIS (both meaning "City of the Sun"), an ancient city of Syria, of which magnificent ruins remain, described by Wood (in 1757), and others. Its origin (referred to Solomon) is lost in antiquity. Here Septimus Severus built a temple to the sun, A.D. 200. The city was sacked by the Moslems, A.D. 748, and by Timour Bey, 1400.

BABEL, TOWER OF, built by Noah's posterity, 2247 B.C. (*Genesis*, ch. xi.) The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was deified after death. *Blair*. The Birs Nimroud examined by Rich, Layard, and others, is considered by some persons to be the remains of the tower of Babel.

BABINGTON'S CONSPIRACY, to assassinate queen Elizabeth, and make Mary of Scotland queen, was devised by John Savage, a soldier of Philip of Spain, and approved by Wm. Gifford and John Ballard, catholic priests. Anthony Babington and other gentlemen were induced to join in the scheme. They were betrayed by Pooley Aspy. Fourteen were executed, Sept. 20, 21, 1586. Babington was deluded by a romantic hope that Mary, in gratitude, would accept him as a husband.

BABYLON, an Asiatic empire (see *Assyria*), founded by Belus, supposed to be the Nimrod of holy writ, the son of Chus, and grandson of Ham, 2245 B.C. *Lenglet*. Ninus of Assyria seized on Babylon, and established what was properly the Assyrian empire, by uniting the two sovereignties, 2059 B.C. 2233 *Cl*. The second empire of Babylon commenced about 725 B.C.

Earliest astronomical observations, at Babylon, B.C. 2234 [2230, *H*. 2233, *Cl*.]

Nabonassar governs 747
Nabopolassar, the Assyrian governor, revolts, and makes himself king of Babylon 725
Nebuchadnezzar invades Syria, 606; Judea, 605; defeats Pharaoh Necho, and annihilates the Egyptian power in Asia 604
He returns to Babylon with the spoils of Jerusalem. *Blair*; *Lenglet*
Daniel interprets the king's dream of the golden-headed image. *Daniel* ii. 602
Nebuchadnezzar goes a third time against Jerusalem, takes it and destroys the temple. *Blair*; *Usher* 589
The golden image set up, and Shadrach, Meshach, and Abed-nego thrown into the

furnace for refusing to worship it. *Daniel* iii. 570
Daniel interprets the king's second dream, and Nebuchadnezzar is driven from among men. *Daniel* iv. 569
The king recovers his reason and his throne, 562; dies 561
Evil Morodach (Neriglassar), king 559
Labynetus (Nabonadius or Belshazzar), king 555
Babylon taken by the Medes and Persians, under Cyrus, and Belshazzar slain 538
Daniel thrown into the lions' den. *Daniel* vi. 537
Babylon revolts, and is taken by Darius 518
Taken by Alexander, 331; he dies here 323
Seleucus Nicator, who died B.C. 280, transfers the seat of government to Seleucia, and Babylon is deserted.

The city of Babylon was at one time the most magnificent in the world; but Pliny says, in his time it was but a desolate wilderness. Mr. Rich visited the ruins in 1811, and sir R. Kerr Porter in 1818. The laborious researches of Mr. Layard, sir H. Rawlinson, M. Botta, and others, and the interesting relics excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cuneiform or wedge-like character have been translated, principally by col. (now sir Henry) Rawlinson, and published in the Journal of the Royal Asiatic Society. In the spring of 1855, he returned once more to England, bringing with him many valuable relics, drawings, &c., which are now in the British Museum. He gave discourses on the subject at the Royal Institution, May 30, 1851, and June 15, 1855.*

BACCHANALIA (games celebrated in honour of Bacchus) arose in Egypt, and were brought into Greece by Melampus, and were there called *Dionysia*, about 1415 B.C. *Diodorus*. In Rome the *Bacchanalia* were suppressed, 186 B.C. The priests of Bacchus were called Bacchanals.

BACHELORS. The Roman censors frequently imposed fines on unmarried men; and men of full age were obliged to marry. The Spartan women at certain games laid hold of old

* The *Hanging Gardens* are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast arches raised on other arches; and on the top were flat stones closely cemented together with plaster of bitumen, and that covered with sheets of lead, upon which lay the mould of the garden, where there were large trees, shrubs, and flowers, with various sorts of vegetables. There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. *Strabo*; *Diodorus*.

bachelors, dragged them round their altars, and inflicted on them various marks of infamy and disgrace. *Vossius*. After twenty-five years of age, a tax was laid upon bachelors in England, 12*l.* 10*s.* for a duke, and for a common person, one shilling, 7 Will. III., 1695. Bachelors were subjected to a double tax on their male and female servants, in 1785.

BACKGAMMON. Palamedes of Greece is the reputed inventor of this game (decidedly one of the oldest in our times) about 1224 B.C. It is stated by some to have been invented in Wales in the period preceding the conquest. *Henry*.

BACTRIANA, a province in Asia, was subjugated by Cyrus and formed part of the Persian empire, when conquered by Alexander, 330 B.C. About 254 B.C., Theodotus, a Greek, threw off the yoke of the Seleucidæ, and became king. Eucratides reigned prosperously about 181 B.C., and Menander about 126 B.C. The Greek kingdom appears to have been broken up by the irruption of the Scythians shortly after.

BADAJOS, SIEGE OF. This important barrier fortress in S. W. Spain had surrendered to the French, under Soult, March 11, 1811, was invested by the British, under lord Wellington, on March 16, 1812, and stormed and taken on April 6 following. This victory obliged the French to commence a precipitate retreat.

BADEN (S. W. Germany). The house of Baden descended from Herman, son of Berthold I., duke of Zahringen, who died A.D. 1074. From Christopher, who united the branches of Hochberg and Baden, and died in 1527, proceed the branches of Baden-Baden and Baden-Dourlach. By the treaty of Baden, between France and the emperor, when Landau was ceded to the former, Sept. 7, 1714, Baden, formerly a margraviate, was elected into a grand duchy, as a member of the Rhenish confederation, Aug. 13, 1806. Its territorial acquisitions by its alliances with France were guaranteed by the congress at Vienna, in 1815. In May, 1849, the grand-duke was expelled by his subjects, but was restored in June. In July, 1857, an amnesty was decreed for political offences. A concordat made with the pope, June 28, 1859, having greatly displeased the representative assembly, was set aside by the grand-duke, April 8, 1860. On June 16, 1860, the emperor of the French met the regent of Prussia, the kings of Hanover, Bavaria, Wurtemberg, and Saxony, and the German princes at Baden-Baden. The population of Baden, in 1859, was 1,336,000.

Louis William, margrave of Baden-Baden, a great general, born 1665, died 1707.

Charles William, margrave of Baden-Dourlach, born 1679, died 1746; succeeded by his son,

Charles Frederic, margrave, afterwards grand-duke of Baden-Dourlach, born 1728, who joined to his dominions Baden-Baden in 1771, which were also increased by the favour of Napoleon; he died in 1811; succeeded by his grandson,

1811. Charles Louis Frederic, who died without issue in 1818; succeeded by his uncle,

1818. Louis William, who also died without issue in 1830; succeeded by his brother,

1830. Leopold, who died in 1852; succeeded by his second son (the first being imbecile),

1852. Frederic (born September 9, 1826), regent to September 5, 1856, when he was declared grand-duke, and still remains so (1862).

[*Heir*: his son Frederic William, born July 9, 1857.]

BAFFIN'S-BAY, N. America, discovered by William Baffin, an Englishman, in 1616. The extent of this discovery was much doubted, until the expeditions of Ross and Parry proved that Baffin was substantially accurate in his statement. Parry entered Lancaster Sound, and discovered the islands known by his name, in 1818. See *North-West Passage*.

BAGDAD, in Asiatic Turkey, built by Al Mansour, and made the seat of the Saracen empire, about A.D. 762.—Taken by the Tartars, and a period put to the Saracen rule, 1258. Often taken by the Persians, and retaken by the Turks, who have held it since 1638.

BAGPIPE, an ancient Greek and Roman instrument. On a piece of ancient Grecian sculpture, now in Rome, a bagpiper is represented dressed like a modern highlander. Nero is said to have played upon a bagpipe, A.D. 51. Our highland regiments retain their pipers.

BAHAMA ISLES, N. America, were the first points of discovery by Columbus. San Salvador was seen by him on the night of the 11th of October, 1492. New Providence was settled by the English in 1629. They were expelled by the Spaniards, 1641; returned 1666; again expelled in 1703. The isles were formally ceded to the English in 1783.

BAIL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1274) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated, 23 Henry VI., 2 Philip and Mary, and in later reigns. Bail is now accepted in all cases, felony excepted; and where a magistrate refuses bail, it may be granted by a judge.

BAILIFFS, OR SHERIFFS. Said to be of Saxon origin. London had its *shire-reve* prior to the conquest, and this officer was generally appointed for counties in England in 1079. Sheriffs were appointed in Dublin under the name of bailiffs, in 1308; and the name was

changed to sheriff in 1548. There are still some places where the chief magistrate is called bailiff, as the high bailiff of Westminster. *Bum-bailiff* is a corruption of bound-bailiff, every bailiff being obliged to enter into bonds of security for his good behaviour. *Blackstone*.

BAIZE, a species of coarse woollen manufacture, was brought into England by some Flemish or Dutch emigrants who settled at Colchester, in Essex, and had privileges granted them by parliament in 1660. The trade is under the control of a corporation called the governors of the Dutch baize-hall, who examine the cloth previous to sale. *Anderson*.

BAKERIAN LECTURES, Royal Society, originated in a bequest of 100*l.* by Henry Baker, F.R.S., the interest of which was to be given to one of the fellows, for a scientific discourse to be delivered annually. Peter Woulfe gave the first lecture in 1765. Latterly it has been the custom to nominate as the lecture a paper written by one of the fellows. Davy, Faraday, Tyndall, and other eminent men have given the lecture.

BALAKLAVA, a small town in the Crimea, with a fine harbour, 10 miles S.E. from Sebastopol. After the battle of the Alma, the allies advanced upon this place, Sept. 26, 1854. On Oct. 25, following, about 12,000 Russians, commanded by gen. Liprandi, attacked and took some redoubts in the vicinity, which had been entrusted to about 250 Turks. They next assaulted the English, by whom they were compelled to retire, mainly through the charge of the heavy cavalry, led by Brigadier Scarlett, under the orders of lord Lucan. After this, from an unfortunate misconception of lord Raglan's order, lord Lucan ordered lord Cardigan with the light cavalry, to charge the Russian army, which had re-formed on its own ground with its artillery in front. This order was most gallantly obeyed. Great havoc was made on the enemy; but of 607 British horsemen, only 198 returned. The British had altogether 9 officers killed, 21 wounded, and 620 men put *hors de combat*. The Russians had 550 men killed, and 6 officers (among whom was one general), and 190 men wounded.—A sortie from the garrison of Sebastopol on the night of March 22, 1855, led to a desperate engagement here, in which the Russians were vigorously repulsed, with the loss of 2000 men killed and wounded, the allies losing about 600.—The electric telegraph between London and Balaklava was completed in April, 1855, and communications were then received by the British government.—A railway between Balaklava and the trenches was completed in June, 1855. See *Russo-Turkish War*.

BALANCE OF POWER, to assure the independency and integrity of states, and control the ambition of sovereigns; the principle is said to be a discovery of the Italian politicians of the fifteenth century, on the invasion of Charles VIII. of France. *Robertson*. The principle was first recognised by the treaty of Munster, Oct. 24, 1648. The arrangements for the balance of power in Europe made in 1815, without the consent of the people of the countries concerned, have been greatly set aside since 1830 to the present time.

BALEARIC ISLANDS, in the Mediterranean, called by the Greeks *Balearides*, and by the Romans *Baleares*, from the dexterity of the inhabitants at slinging: they include Majorca and Minorca, with the smallisle of Cabrera. These islands were conquered by the Romans, 123 B.C.; by the Vandals, 426 B.C., and formed part of Charlemagne's empire in 799. They have belonged to Spain since 1232. See *Minorca*.

BALKAN, the ancient *Hæmus*, a range of mountains extending from the Adriatic to the Euxine. The passage deemed impracticable, effected by the Russians under Diebitsch, during the Russian and Turkish war, was completed July 26, 1829. An armistice was the consequence; and a treaty of peace was signed at Adrianople, Sept. 14 following.

BALLADS may be traced in the British history to the Anglo-Saxons. *Turner*. Adhelme, who died A.D. 709, is mentioned as the first who introduced ballads into England. "The harp was sent round, and those might sing who could." *Bede*. Alfred sung ballads. *Malmesbury*. Canute composed one. *Turner*. Minstrels were protected by a charter of Edward IV.; but by a statute of Elizabeth they were made punishable among rogues, vagabonds, and sturdy beggars. *Viner*. "Give me the writing of the ballads, and you may make the laws." *Fletcher of Saltoun*. The sea-ballads of Dibdin inspired many a brave defender of his country in the French war; he died Jan. 20, 1833.

BALLETS began through the meretricious taste of the Italian courts. One performed at the interview between our Henry VIII. and Francis I. of France, in the field of the Cloth of Gold, at Ardres, 1520. *Guccicardini*. They became very popular in France, the kings taking part in them; their zealous patron, Louis XIV., bore a part in one, 1664.

BALLOON. Galien of Avignon wrote on *aërostation*, in 1575. Dr. Black gave the hint as to hydrogen in 1767. A balloon was constructed in France by M. Montgolfier, in 1783, when Rozier and the marquis d'Arlandes ascended at Paris. MM. Pilâtre Desrozier and

Romain perished in an attempted voyage from Boulogne to England, the balloon having taken fire, June 14, 1785. Balloons were used by the French to reconnoitre the enemy's army (at the battle of Fleurus), June 17, 1794, and at the battle of Solferino, June 24, 1859, and by the Federal army at Washington in July, 1861. Garnerin ascended in a balloon to the height of 4000 feet, and descended by a parachute, Sept. 21, 1802. Gay-Lussac ascended at Paris to the height of 23,000 feet, Sept. 6, 1804. Madame Blanchard ascended from Tivoli at night: the balloon, being surrounded by fireworks, took fire, and she was precipitated to the ground and killed, July 6, 1819. An Italian aeronaut ascended from Copenhagen, in Denmark, Sept. 14, 1851; his corpse was subsequently found on the sea-shore in a contiguous island, dashed to pieces. On June 23, 1859, a Mr. Wise and three others ascended from St. Louis in a balloon. After travelling 1150 miles they descended in Jefferson county, New York. They were nearly killed.

BALLOONS IN ENGLAND,* &c. The first attempt to navigate the atmosphere in England in a balloon was by Signor Lunardi, who ascended from Moorfields, Sept. 15, 1784. Blanchard and Jeffries passed from Dover to Calais, in 1785. Mr. Arnold went up from St. George's-fields, and fell into the Thames; and major Money ascended from Norwich, and fell into the North Sea, but was saved by a revenue cutter. The first ascent from Ireland was from Ranelagh gardens, Dublin, in 1785. Sadler, who made many previous expeditions in England, fell into the sea, near Holyhead, but was taken up, Oct. 9, 1812. Sadler, jun. was killed, falling from a balloon, in 1825. Mr. Charles Green's first ascent, July 19, 1821. Lieut. Harris killed descending in a balloon, May 25, 1824. Mr. Cocking ascended from Vauxhall in order to try his parachute, in which he had great faith; in its descent from the balloon it collapsed, and he was thrown out and killed, July 24, 1837. Green and others made many ascents near London, in 1852.—The great Nassau balloon, which had for some time previously been exhibited to the inhabitants of London in repeated ascents from Vauxhall gardens, started from that place on an experimental voyage, having three individuals in the car, and after having been eighteen hours in the air descended at Weilburg, in the duchy of Nassau, Nov. 7, 1836.†

BALLOT (French *Ballotte*, a little ball). Secret voting was practised by the ancient Greeks and modern Venetians.—A tract entitled "The Benefit of the Ballot," said to have been written by Andrew Marvell, was published in the "State Tracts," 1693. The ballot-box was used in a political club which met in 1659 at Miles's coffee-house, Westminster. It was proposed to be used in the election of members of parliament in a pamphlet published in 1705. A bill authorising vote by ballot passed the commons in 1710; but was rejected by the lords. The ballot has been an open question in whig governments since 1835. On June 30, 1857, the house of commons rejected the ballot—257 being against, and 189 for it. For several years past it has been annually proposed and rejected. The Ballot Society is very energetic. The ballot was adopted in Victoria, Australia, in 1856.—Secret voting existed in the chamber of deputies in France from 1840 to 1845; and was employed also after the coup d'état in Dec. 1851. It is adopted in many of the United States of America.

BALLYNAHINCH, Ireland, where a sanguinary engagement took place between a large body of the insurgent Irish and the British troops, under gen. Nugent, June 13, 1798. A large part of the town was destroyed, and the royal army suffered very severely.

BALMORAL CASTLE, in Aberdeenshire; visited by her majesty in 1848, 1849, 1850. The estate was purchased for 32,000*l.* by prince Albert in 1852. In 1853 the new building, in the Scotch baronial style, was commenced, from designs by Mr. W. Smith of Aberdeen.

BALTIC EXPEDITIONS AGAINST DENMARK. In the first expedition under lord Nelson and admiral Parker, Copenhagen was bombarded, and twenty-eight sail of the Danish fleet

* **EQUESTRIAN ASCENTS.** Mr. Green affirms that he ascended from London, on a horse attached to a balloon, in May, 1828, though few persons seem to be aware that the experiment was made. He performed a feat of this kind, however, from Vauxhall gardens, in July, 1850; his "steed" being a very diminutive pony. To M. Poitevin, of Paris, appears to belong the "honour" of this species of aérostation: he ascended on a horse, in the vicinity of that capital, about the time just mentioned; was nearly drowned in the sea, near Malaga, while descending from his balloon in 1858, and died soon after. Lieut. Gale, an Englishman, made an ascent from the Hippodrome of Vincennes, near Bordeaux, Sept. 8, 1850. On descending, and detaching the animal from the balloon, the people who held its ropes, from some misconception, prematurely let them go, and the unfortunate aeronaut was rapidly borne in the air before he was quite ready to resume his voyage. He was discovered next morning dashed to pieces in a field a mile from where the balloon was found. The ascent of Madame Poitevin from Cremerne gardens, near London, as "Europa on a bull" (a feat she had often performed in France), and several ascents on horses, brought the parties concerned before the police-courts on a charge of cruelty to animals, and put an end to experiments that outraged public feeling, Aug. 1852.

† *Scientific balloon ascents*, for meteorological purposes, were made by Mr. Walsh in 1838, and their repetition was recommended to the British Association in 1860 and 1861. In 1862 Mr. James Glaisher, in a balloon provided with suitable apparatus, ascended from Wolverhampton on July 17, to the height of about five miles; and from the Crystal Palace, Sydenham, on July 30, and published interesting observations. (See *Il. Lond. News*, Aug. 2, 1862.)

were taken or destroyed, April 2, 1801. See *Armed Neutrality*. In the second expedition under admiral Gambier, and lord Cathcart, eighteen sail of the line, fifteen frigates, and thirty-one brigs and gun-boats surrendered to the British, July 26, 1807.

BALTIC EXPEDITION AGAINST RUSSIA. The British fleet sailed from Spithead in presence of the queen, who led it out to sea in her yacht, the *Fairy*, March 11, 1854. It consisted of a crowd of steam-ships of the line, of which, five were each of 120 guns and upwards: the whole under the command of vice-admiral sir Charles Napier, whose flag floated on board the *Duke of Wellington*, of 131 guns. The fleet arrived in Wingo Sound, March 15, and in the Baltic, March 20, following. The gulf of Finland was blockaded, April 12. 10,000 French troops embarked at Calais for the Baltic in English ships of war, in presence of the emperor, July 15. The capture of Bomarsund, one of the Åland islands, and surrender of the garrison, took place, Aug. 16. See *Bomarsund*. The English and French fleets, the latter having joined June 14, commenced their return homeward to winter, Oct. 15, 1854.—The second expedition (of which the advanced or flying squadron sailed March 20) left the Downs, April 4, 1855. In July it consisted of 85 English ships (2098 guns), commanded by admiral R. S. Dundas and 16 French ships (408 guns), under admiral Perrand. On July 21, three vessels silenced the Russian batteries at Hogland island. The fleet proceeded towards Cronstadt. Many infernal machines* were discovered. Sveaborg was attacked Aug. 9. See *Sveaborg*. Shortly after, the fleet returned to England.

BALTIMORE, a maritime city in Maryland, United States, founded in 1729. On Sept. 12, 1814, the British army under gen. Ross advanced against this place. He was killed in a skirmish; and the command was assumed by col. Brooke, who attacked and routed the American army, which lost 600 killed and wounded and 300 prisoners. The projected attack on the town was however abandoned. *Alison*.

BAMPTON LECTURES (Theological), delivered at Oxford annually, began in 1780, with a lecture by James Bandinel, D.D. The lecturer is paid out of the proceeds of an estate bequeathed for the purpose by the rev. John Bampton, and the lectures are published. Among the more remarkable were those by White (1784), Heber (1815), Whately (1822), Milman (1827), Hampden (1832), and Mansel (1858).

BAND OF GENTLEMEN PENSIONERS. See *Gentlemen-at-Arms*.

BANGALORE, S. India, was besieged by the British under lord Cornwallis, March 6, and taken by storm, March 21, 1791. Bangalore was restored to Tippoo in 1792, when he destroyed the strong fort, deemed the bulwark of Mysore.

BANGOR, in Wales. Here was one of the earliest monastic institutions in Britain, the monks of which were mercilessly murdered by the Danes. Its bishopric is of great antiquity, but its founder is unknown. The church is dedicated to St. Daniel, who was a bishop, 516. Owen Glendower greatly defaced the cathedral; but a more cruel ravager than he, the bishop Bulkeley, alienated many of the lands, and even sold the bells of the church, 1553. The see is valued in the king's books at 131*l.* 16*s.* 4*d.* An order in council directing that the sees of Bangor and St. Asaph be united on the next vacancy in either, was issued in 1838; but this order was rescinded by the 10 & 11 Vict. c. 108 (1846). Present income, 4200*l.*

RECENT BISHOPS OF BANGOR.

1800. Wm. Cleaver, translated to St. Asaph . . . 1806	1830. Christopher Bethell, died . . . April 19, 1839
1806. John Randolph, translated to London . . . 1809	1859. James Colquhoun Campbell (the present
1809. Henry William Majendie, died July 9 . . . 1830	bishop, 1862).

BANGORIAN CONTROVERSY was occasioned by Dr. Hoadly, bishop of Bangor, preaching a sermon before George I., March 31, 1717, upon the text, "*My kingdom is not of this world*." (John xviii. 36), in which he descanted on the spiritual nature of the kingdom of Christ. He thereby drew upon himself the indignation of almost all the clergy, who published hundreds of pamphlets.

BANK. The name is derived from *banco*, a bench, erected in the market-place for the exchange of money. The first was established in Italy A.D. 808, by the Lombard Jews, of whom some settled in Lombard-street, London, where many bankers still reside. The Mint in the Tower of London was anciently the depository for merchants' cash, until Charles I. laid his hands upon the money and destroyed the credit of the Mint in 1640. The traders were thus driven to some other place of security for their gold, which, when kept at home, their apprentices frequently absconded with to the army. In 1645, therefore, they consented to lodge it with the goldsmiths in Lombard-street, who were provided with strong chests for their own valuable wares; this became the origin of banking in England.

* These were cones of galvanised iron, 16 inches in diameter, and 20 inches long. Each contained 9 or 10 lbs. of powder, with apparatus for firing by sulphuric acid. Little damage was done by them. They were said to be the invention of the philosopher Jacobi.

BANK, *continued.*

Hamburg	1619	Berlin	1765	Branch banks in these realms	1828

BANK OF ENGLAND* originally projected by a merchant named Wm. Paterson, was incorporated by William III. in 1694, in consideration of 1,200,000*l.*, the then amount of its capital, being lent to government. The interest was originally 8 per cent. The capital has gone on increasing from one period to another up to the present time, as the discretion of parliament allowed; and the same authority has also at different intervals prolonged the privileges of the bank, and renewed its charter.† By statute 6 Anne, 1707, no other banking company might consist of more than six persons. When first established, the notes of the bank were at 20 per cent. discount; and so late as 1745, they were under par. Bank bills were paid in silver, 1745. The first bank post-bills were issued 1754; small notes (for 10*l.* and 15*l.*) were issued 1759. CASH PAYMENTS were discontinued February 26, 1797, and notes of one and two pounds were put into circulation in March. Silver tokens appeared in January, 1798; and afterwards Spanish dollars, with the head of George III. stamped on the neck of Charles IV., were made current. Cash payments were resumed partially, September 22, 1817, and the restriction had altogether ceased in 1821.—For a number of years the financial measures of the crown have been largely aided by loans from this great reservoir of wealth. The issue of bank notes led to a great increase of forgery. See *Forgery*. The branch banks of the Bank of England in the chief towns of the kingdom: as Birmingham &c., have all been formed since 1828.—A branch bank was opened in Burlington-gardens, near Regent-street, London, Oct. 1, 1856. A committee on the Bank Acts was appointed in July, 1857. The average amount of the Bank of England notes in circulation:

1718	£1,829,930	1815	£26,803,520	1845	£19,262,327
1778	7,030,680	1820	27,174,000	1850	19,776,814
1790	10,217,000	1830	20,620,000	1855	19,616,627
1800	15,450,000	1835	18,215,220	1857	21,036,430
1810	23,904,000	1840	17,231,000	1859	22,705,780

The amount of gold and silver coin and bullion in the bank fluctuates considerably, sometimes from twelve to seventeen millions. In 1852, consequent on the discovery of the gold fields of Australia, the gold bullion in the bank amounted, on July 10, to 21,845,390*l.* On Jan. 1, 1853, the amount was 20,527,662*l.* The returns of the bank are now made weekly, pursuant to 7 & 8 Vict. c. 32, 1844.

	DEC. 27, 1856.	NOV. 11, 1857. (Time of Panic.)	APRIL 27, 1859.
Assets—Securities	£29,484,000	£35,480,281	£28,798,619
Bullion	10,105,000	7,170,508	17,640,342
Liabilities	36,329,000	39,286,433	43,289,701
Balance	£3,260,000	£3,364,356	£3,149,260

Sept. 14, 1859. Assets.—Securities, 30,099,179 <i>l.</i> Bullion, 17,120,822 <i>l.</i> Liabilities, 43,593,214 <i>l.</i> Balance, 3,716,787 <i>l.</i>

Aug. 30, 1862. " " 30,106,295 <i>l.</i> " 17,678,698 <i>l.</i> " 44,453,778 <i>l.</i> " 3,331,215 <i>l.</i>			

BANK OF IRELAND. Established by act of parliament and opened at St. Mary's-abbey, Dublin, June 25, 1783. The business was removed to the late houses of parliament, in

* The building called the Bank of England, in Threadneedle-street, was commenced by G. Sampson, architect, in 1732, and opened in 1734. It has been since greatly enlarged by its successive architects, sir Robert Taylor, sir John Soane, and Mr. Cockerell. It occupies the site of the church, and almost all the parish, of St. Christopher's.

† By 3 & 4 Will. IV. (1833), the charter was continued till one year's notice after Aug. 1, 1855; but power was reserved to determine the charter in 1844. In that year an act was passed, 7 & 8 Vict. c. 32, effecting important changes in the management of the bank. By this act, the issue of notes was limited to the value of 14,000,000*l.*, which restriction was relaxed on the responsibility of the government during the commercial panic of 1847 (by lord John Russell), and that of 1857 (by lord Palmerston, Nov. 12); acts of indemnity being passed afterwards. In 1847, the relaxation was not acted on, but in 1857, additional notes were issued to the amount of 2,000,000*l.* In Nov. 1857, the bank discount was 9 per cent., in Feb. 1858, it fell to 3 per cent. On Nov. 11, 1857, the amount of specie in the bank was only 7,170,508*l.*; on Sept. 15, 1858, it had risen to 18,648,915*l.*—On Nov. 15, 1860, the bank discount rose to 6 per cent. in consequence of a demand for gold from France; to 7 per cent. on Jan. 7, 1861; and to 8 per cent. on Feb. 14, 1861, through the demand for money in the United States, India, &c. The discount fell to 2 per cent. on July 24, 1862. On Aug. 16, 1862, the Bank solicitor announced that a quantity of bank-note paper had been stolen from the paper-makers, which caused much anxiety, as forged notes on this paper soon appeared.

College-green, in May, 1808. Branch Banks of this establishment have been formed in most of the provincial towns in Ireland, all since 1828.

BANKS OF SCOTLAND. The old bank of Scotland was set up in 1695, the second institution of the kind in these kingdoms. The Royal Bank was instituted in 1727; the British Linen Company's bank, 1746; the Commercial bank, 1810; National bank, 1825; Union bank, 1830. The first stone of the present Bank of Scotland was laid June 3, 1801.

BANK OF SAVINGS. See *Savings' Banks*.

BANKS, JOINT STOCK. Since the act of 1826, a number of these banks have been established. In 1840, the amount of paper currency issued by joint-stock banks amounted to 4,138,618*l.*; the amount in circulation by private banks, same year, was 6,973,613*l.*—the total amount exceeding eleven millions.* In Ireland many similar banks have been instituted, the first being the Hibernian bank, established by a special act in 1825. The note-circulation of joint-stock banks, on Oct. 1, 1855, was, in England, 3,990,800*l.*; in Scotland, 4,280,000*l.*; and in Ireland, 6,785,000*l.*; total, with English private banks, about 19,000,000*l.*; and with the bank of England, above 39,000,000*l.* There are now 14 joint-stock banks in Scotland. There have been no private banks since 1845. The Western Bank of Scotland and the Glasgow bank stopped in Nov. 1857.

BANKRUPTS IN ENGLAND. The first law enacted regarding them was 35 Henry VIII. 1543; again, 13 Eliz. 1570; 1 James I. 1602; again, 1706; and more recently. It was determined by the King's Bench that a bankrupt may be arrested, except in going to or coming from any examination before the commissioners, May 13, 1780. The lord chancellor (Thurlow) refused a bankrupt his certificate, because he had lost five pounds at one time in gaming, July 17, 1788. In 1812 it was enacted that members of the house of commons becoming bankrupt, and not paying their debts in full, should vacate their seats. Bankruptcy act, Ireland, consolidating all the statutes relating to bankruptcy, and founding a complete system of administering bankrupts' estates, 6 Will. IV. cap. 14, passed May 20, 1836. The Present **BANKRUPTCY COURT** was erected by 2 Will. IV. cap. 56 (1831). The act 12 & 13 Vict. cap. 106 (1849), repealed several previous acts; defined the jurisdiction of the court; prescribed the duties of the official assignee, accountant, and master; regulated fees; and enumerated the traders and others that should be deemed bankrupts and liable to become so. The bankrupt laws were further amended in 1854. Bills for reforming bankruptcy law were in vain brought before parliament in 1859 and 1860. At length in 1861 was passed the bill brought in by the lord chancellor (formerly sir R. Bethell), 24 & 25 Vict. c. 134 (1861), by which great changes were made. The court for relief of insolvent debtors was abolished, and increased powers given to the commissioners in Bankruptcy, &c. The new orders were issued Oct. 12, 1861.

NUMBER OF BANKRUPTS IN GREAT BRITAIN AT DIFFERENT PERIODS.

1700	38	1800	1339	1830	1467	1857 England . .	1488

BANNATYNE CLUB, established in 1823, by George Bannatyne, sir Walter Scott, and others, for the publication of early Scottish poetry, of which above 100 volumes have been published (1861).

* THE ROYAL BRITISH BANK was established in 1849, by Mr. John McGregor, M.P., and others, under sir R. Peel's joint-stock banking act, 7 & 8 Vict. c. 113 (1844); as an attempt to introduce the Scotch banking system of cash credits into England. On Sept. 3, 1856, it stopped payment, occasioning much distress and ruin to many small tradesmen and others. In consequence of strong evidence of the existence of fraud in the management of the bank, elicited during the examination before the court of bankruptcy, the government instructed the attorney-general to file *ex-officio* informations against the manager, Mr. H. Innes Cameron, and several of the directors. They were convicted Feb. 27, 1858, after 13 days' trial, and sentenced to various degrees of imprisonment. Attempts to mitigate the punishment failed (May, 1858); but all were released except Cameron and Esdaile, in July, 1858. In April, 1860, dividends had been paid to the amount of 1*5s.* in the pound. The attorney-general brought in a bill called the *Fraudulent Trustees' Act*, 20 & 21 Vict. c. 54, to prevent the recurrence of such transactions.—On April 19, 1860, a deficiency of 263,000*l.* was discovered in the *Union Bank of London*. Mr. George Pullinger, a cashier, confessed himself guilty of forgery and fraud, and was sentenced to 20 years' imprisonment.—On Feb. 18, 1861, it was discovered that John Durden, a clerk of the *Commercial Bank of London*, had robbed his employers of 67,000*l.*, of which 46,000*l.* might be recovered.

† According to a return to parliament made at the close of February, 1826, there had become bankrupt in the four months preceding, 50 banking-houses, comprising 144 partners; and 20 other banking establishments had been declared insolvent. Every succeeding week continued to add from seventy to a hundred merchants, traders, and manufacturers to the bankrupt list. This was, however, the period of bubble speculation, and of unprecedented commercial embarrassment and ruin.

BANNERS were common to all nations. The Jewish tribes had standards or banners—Num. ii. (1491 B.C.) The standard of Constantine bore the inscription, *In hoc signo vinces*—"In this sign thou shalt conquer," under the figure of the cross. See *Cross*. The famous magical banner of the Danes was taken by Alfred A.D. 879. *Spelman*. St. Martin's cap, and afterwards the celebrated auriflamma, or oriflamme, were the standards of France, about 1100. See *Auriflamma, Standards, &c.*

BANNERET, a dignity between baron and knight, conferred by the king under the royal standard. *Beaton*. Created in England, 1360; renewed by Henry VII. 1485. It was disused from the reign of Charles I., but was revived by George III. in the person of sir William Erskine in 1764.

BANNOCKBURN, Stirlingshire, the site of the battle between Robert Bruce, of Scotland, and Edward II. of England, June 24, 1314. The army of Bruce consisted of 30,000; that of Edward of 100,000 men, of whom 52,000 were archers. The English crossed a rivulet to the attack, and Bruce having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete: the English king narrowly escaped, and 50,000 were killed or taken prisoners. Near here James III. was defeated in 1488 by his rebellious nobles. A national monument was founded here June 24, 1861.

BANNS, in the feudal law, were a solemn proclamation of any kind: hence arose the present custom of asking banns, or giving notice before marriage; said to have been introduced into the Gallican church about A.D. 1210.

BANTAM, Java, where a rich British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683. Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814. It was not worth retaining, the harbour being choked up and inaccessible.

BANTRY BAY, S. Ireland, where a French fleet, bringing succour to the adherents of James II., was attacked by admiral Herbert, May, 1689. A French squadron of seven sail of the line and two frigates, armed *en flute*, and seventeen transports, anchored here for a few days, Dec. 1796. **MUTINY** of the Bantry Bay squadron under admiral Mitchell was in Dec. 1801, and Jan. 1802. Twenty-two of the mutineers were tried on board the *Gladiator*, at Portsmouth, when seventeen were condemned to death, of whom eleven were executed; the others were sentenced to receive each 200 lashes. The executions took place on board the *Majestic*, *Centaure*, *Formidable*, *Téméraire*, and *L'Achille*, Jan. 8 to 18, 1802.

BAPTISM, the ordinance of admission into the Christian church, instituted by Christ, and practised by all sects professing Christianity, except Quakers. St. John the forerunner of Our Saviour is called *the Baptist*, as being the first that publicly baptized with a spiritual intention. Christ was baptized by John A.D. 30. (Matt. iii.) Originally the people were baptized in rivers; but in the reign of Constantine, A.D. 319, they built in great cities chapels, or places specially to baptize in, which in the eastern countries was done by dipping the person all over. In the western and colder parts, they used sprinkling; at first every church had not a baptistry belonging to it; our founts answer the same end. *Pardon*. Much controversy has arisen since 1831 (particularly in 1849 and 1850), in the church of England, respecting the doctrine of baptismal regeneration.

BAPTISTS (see *Anabaptists*). A sect distinguished from other Christians by their opinions respecting (1) the proper *subjects*, and (2) the proper *mode* of baptism: the former, they affirm to be those who are able to make a profession of faith; the latter, to be total immersion. There are seven sections of Baptists. They have suffered much persecution. The first Baptist church formed in London was in 1608. They published a confession of faith in 1689. In 1851 they had 130 chapels in London and 2789 (with sittings for 752,353 persons) in England and Wales. Rhode Island, America, was settled by Baptists in 1635.

BARBADOES. The first English settlement in the West Indies. This mother plantation gave rise to the sugar trade in England about 1605; and was, with other Caribbee islands, settled by charter granted to James, earl of Marlborough, 2 Charles I., 1627. Barbadoes has suffered severely from elemental visitations; in a dreadful hurricane in 1780, more than 4000 of the inhabitants lost their lives. A large plantation with all its buildings was destroyed, by the land removing from its original site to another, and covering everything in its peregrination, Oct. 1784. An inundation, Nov. 1795; and two great fires, May and Dec. 1796. Awful devastation, with the loss of thousands of lives, and of immense property, by a hurricane, Aug. 10, 1831. Nearly 17,000 persons died of cholera here in 1854. On Feb. 14, 1860, property to the amount of about 300,000*l.* was destroyed by a fire at Bridgetown, the capital.

BARBARY, in N. Africa, comprises Algeria, Morocco, Fez, Tunis, &c., *which see*. Piratical states were founded on the coast by Barbarossa, in 1518.

BARBERS existed at Rome in the third century B.C. : and in England, in early times ; they exhibited a head, or *pole*, at their doors ; and the barber's *pole* afterwards used by them was a burlesque imitation of the former sign. Anciently the business of a surgeon was united to that of barber, and he was denominated a **BARBER-SURGEON**. A company was formed under this name in 1308, and the London company was incorporated 1 Edw. IV. 1461. This union was partially dissolved in 1540, and wholly so in 1745. "No person using any shaving or barbery in London shall occupy any surgery, letting of blood, or other matter, except only drawing of teeth." 32 Henry VIII. 1540.

BARCELONA, a maritime city, N. E. Spain, said to have been rebuilt by Hamilcar Barca, father of the great Hannibal, about 233 B.C. With the surrounding country it was held by the Romans, Goths, Moors, and Franks, and, with the province of which it is the capital, it was made an independent county about A.D. 864, and incorporated into Aragon in 1164, the last count becoming king. The city has suffered much by war. The last siege by the French, in 1694, was relieved by the approach of the English fleet, commanded by admiral Russell ; but the city was bombarded by the duke of Berwick and the French in 1714. It was taken by Napoleon in 1808 and retained till 1814. It revolted against the queen in 1842, and was bombarded and taken in Dec. 1842, by Espartero.

BARCLAY, CAPTAIN. His wager, to walk 1000 miles in 1000 successive hours, each mile within each hour, and upon which hundreds of thousands of pounds depended, was accomplished July 10, 1809. This feat occupied without intermission every hour (less eight) of forty-two days and nights. See *Walking*.

BARDS. Known to the Romans 200 B.C. Demodocus is mentioned as a bard by Homer ; and we find bards, according to Strabo, among the Romans before the age of Augustus. The Druids among the English were philosophers and priests, and the bards were their poets. The *Welsh* bards formed a hereditary order, regulated, it is said, by laws, about A.D. 940 ; and regulated anew in 1078. They lost their privileges at the conquest by Edward I. in 1284. The institution was revived by the Tudor sovereigns ; and Eisteddfodds (or meetings) have been and are frequently held ; the last in Aug. 1861. The Gwyneddigion Society of Bards was founded in 1770. Turlogh O'Carolan, the last of the *Irish* bards, died in 1737. *Chambers*.

BARBONES' PARLIAMENT. Cromwell, supreme in the three kingdoms, summoned 122 persons, such as he thought he could manage, who with six from Scotland, and five from Ireland, met, and assumed the name of parliament, July 4, 1653. It obtained its name from one of its members, a leather-seller, named "Praise-God Barbones," a great haranguer and frequent in prayer. Although violent and absurd propositions were made by some of the members, the majority evinced much sense and spirit. The parliament was suddenly dissolved, Dec. 13, 1653, at the instance of Sydenham, an independent, and Cromwell was invested with the dignity of Lord Protector.

BARFLEUR, N. France, where William, duke of Normandy, equipped the fleet by which he conquered England, A.D. 1066. Near it prince William, son of Henry I., in his passage from Normandy, was shipwrecked, 1120.* Barfleur was destroyed by the English in the campaign in which they won the battle of Crecy, 1346. The French navy was destroyed near the cape by admiral Russell, after the victory of La Hogue, in 1692.

BARING ISLAND, Arctic Sea, discovered by captain Penny in 1850-1, and so named by him after sir Francis Baring, first lord of the admiralty in 1849.

BARIUM, a metal, first obtained from the earth baryta by Humphry Davy in 1808. It is more than twice as heavy as water.

BARK. See *Jesuits' Bark*.

BARMECIDES, a powerful Persian family, celebrated for virtue and courage, were massacred through the jealousy of the caliph Haroun-al-Raschid, about A.D. 802. His vizier Giafar was a Barmecide. The phrase Barmecide (or imaginary) feast originated in the story of the Barber's sixth Brother, in the Arabian Nights' Entertainments.

* In this shipwreck perished his legitimate son, William, duke of Normandy ; the prince's newly married bride, Matilda, daughter of Fulke, earl of Anjou ; the king's natural son, Richard ; his niece, Lucia, the earl of Chester, and the flower of the nobility, with one hundred and forty officers and soldiers, and fifty sailors, most of the latter being intoxicated, which was the cause of their running upon the rocks near Barfleur. This lamentable catastrophe had such an effect upon Henry that he was afterwards never seen to smile. *Hémeault : Hume*.

BARNABITES, an order of monks, established in Milan about 1530. They were much engaged in instructing youth, relieving the sick and aged, and converting heretics.

BARNARD'S, SIR JOHN, ACT (7 Geo. II., cap. 8), entitled, "an act to prevent the infamous practice of stock-jobbing," was passed in 1734, and repealed in 1860. Sir John Barnard (born 1685, died 1764) was an eminent and patriotic lord mayor of London.

BARNET, Hertfordshire. Here Edward IV. gained a decisive victory over the Lancastrians, on Easter-day, April 14, 1471, when the earl of Warwick and his brother the marquis of Montacute, or Montagu, and ten thousand men were slain. A column commemorative of this battle has been erected at the meeting of the St. Alban's and Hatfield roads.

BAROMETERS. Torricelli, a Florentine, having discovered that no principle of suction existed, and that water did not rise in a pump through nature's abhorrence of a vacuum, imitated the action of a pump with mercury, and made the first barometer, about 1643. Pascal's experiments 1646 enhanced the value of the discovery by applying it to the measurement of heights. Wheel barometers were contrived in 1668; pendent barometers in 1695; marine in 1700, and many improvements have been since made. In the *Aneroid* barometer (from *a*, no, and *nēros*, watery) no liquid is employed; the atmospheric pressure being exerted on a metallic spring. Its invention (attributed to Conté, in 1798, and to Vidi, about 1844) excited much attention in 1848-9. Barometers were placed at N.E. coast stations in 1860, by the duke of Northumberland and others.

BARON. The dignity is extremely ancient: its original name in England was *Vavasour*, which, by the Saxons, was changed into *Thane*, and by the Normans into *Baron*. Many of this rank are named in the history of England, and undoubtedly had assisted in, or had been summoned to parliament (in 1205); but the first precept found is of no higher date than the 49 Henry III. 1265. The first raised to this dignity by patent was John de Beauchamp, created baron of Kidderminster, by Richard II., 1387. The barons took arms against king John, and compelled him to sign the great charter of our liberties, and the charter of our forests, at Runnymede, near Windsor, June, 1215. Charles II. granted a coronet to barons on his restoration.

BARONETS, the first in rank among the gentry, and the only knighthood that is hereditary, were instituted by James I. 1611. The rebellion in Ulster seems to have given rise to this order; it having been required of a baronet, on his creation, to pay into the exchequer as much as would maintain "thirty soldiers three years at eightpence a day, in the province of Ulster in Ireland." It was further required that a baronet should be a gentleman born, and have a clear estate of 1000*l.* per annum. The first baronet was sir Nicholas Bacon (whose successor is therefore styled *Primus Baronetorum Angliæ*), May 22, 1611. The baronets of Ireland were created in 1619; the first being sir Francis Blundell. —Baronets of Nova Scotia were created, 1625; sir Robert Gordon the first baronet. —All baronets created since the Irish union in 1801 are of the United Kingdom.

BARONS' WAR, arose in consequence of the faithlessness of king Henry III. and the oppression of his favourites. The barons, headed by Simon de Montfort, earl of Leicester, and Gilbert de Clare, earl of Gloucester, met at Oxford in 1262, and enacted statutes to which the king objected. In 1263 their disputes were in vain referred to the decision of Louis IX. of France. War broke out, and on May 14, 1264, the king's party were totally defeated at Lewes; and De Montfort became the virtual ruler of the kingdom. Through treachery the war was renewed; and at the battle of Evesham, Aug. 4, 1265, De Montfort was slain, and the barons were defeated. They however did not render their final submission till 1268. A history of this war was published by Mr. W. H. Blaauw in 1844.

BARRACKS. This word is not to be found in our early lexicographers: it comes to us from the French, and in the *Dict. de l'Acad.* is thus defined: "*Baraque—Hutte qui font les soldats en campagne pour se mettre à couvert.*" —Barracks were not numerous in these countries until about 1789. A superintendent-general board was appointed in 1793, since when commodious barracks have been built in the various garrison towns and central points of the empire. —A report, censuring the condition of many barracks, was presented to parliament in 1858; and great improvements were effected under the direction of Mr. Sidney Herbert. See *Aldershot*.

BARRICADES, mounds formed of trees and earth, and for military defence. During the wars of the League in France, in 1588, the people made *barricades* by means of chains, casks, &c., and compelled the royal troops to retire. Barricades composed of overturned vehicles, &c., were erected in Paris in the insurrection of July 27-30, 1830, and June 23, 1848.

BARRIER TREATY, by which the Low Countries were ceded to the emperor Charles VI., was signed by the British, Imperial, and Dutch ministers, Nov. 5, 1715.

BARRISTERS are said to have been first appointed by Edward I., about 1291, but there is earlier mention of professional advocates in England. They are of various rank, as King's or Queen's Counsel, Serjeants, &c., *which see*. Students for the bar must keep a certain number of terms at the Inns of Court, previously to being called; and by the regulations of 1853 must pass a public examination. Irish students must keep eight terms in England.

BARROSA, or **BAROSSA**, S. Spain, where a battle was fought on March 5, 1811, between the British army, commanded by major-general sir Thomas Graham, afterwards lord Lynedoch, and the French under marshal Victor. After a long conflict, the British achieved one of the most glorious triumphs of the Peninsular war. Although they fought at great disadvantage, the British compelled the French to retreat, leaving nearly three thousand dead, six pieces of cannon, and an eagle, the first that the British had taken; the loss of the British was 1169 men killed and wounded.

BARROWS, circular mounds found in Britain and other countries, were ancient sepulchres. Sir Richard Hoare caused several barrows near Stonehenge to be opened; in them were found a number of curious remains of Celtic ornaments, such as beads, buckles, and brooches, in amber, wood, and gold: Nov. 1808.

BARROW'S STRAITS, N. Arctic Sea, discovered by Parry, who penetrated as far as Melville Island, in lat. 74° 26' N., and long. 113° 47' W. The strait, named after sir John Barrow, was entered on Aug. 2, 1819. The thermometer was 55° below zero of Fahrenheit.

BARROW, JOHN, ISLAND, N. Arctic Sea, discovered by captain Penny in 1850-51, and named by him in honour of John Barrow, Esq., son of sir John.

BARTHOLOMEW, ST., martyred, A.D. 71. The festival (on August 24) is said to have been instituted in 1130. Monastery of St. Bartholomew (Austin Friars), founded in the reign of Henry I. by Rahere, about 1100. On its dissolution the HOSPITAL of this name in London was founded, 1539, and was incorporated in the last year of the reign of Henry VIII. 1546-7. It was rebuilt by subscription in 1729. In 1861 it contained 580 beds, and relieved about 70,000 patients: it has since been considerably enlarged. The charter of the FAIR was granted by Henry II., and was held on the ground which has been the former scene of tournaments and martyrdoms. The shows at the fair were discontinued in 1850, and the fair was proclaimed for the last time in 1855. In 1858 Mr. H. Morley published his "History of Bartholomew Fair," with many illustrations. *See Smithfield*.—The MASSACRE commenced at Paris on the night of the festival of St. Bartholomew, August 24, 1572. According to Sully, 70,000 Huguenots, or French Protestants, including women and children, were murdered throughout the kingdom, by secret orders from Charles IX., at the instigation of his mother, the queen dowager, Catherine de Medicis.*

BARTHOLOMITES, a religious order founded A.D. 1307, at Genoa, where is preserved in the Bartholomite church the image which Christ is said to have sent to king Abgarus. The order was suppressed by pope Innocent X. 1650.

BARTON AQUEDUCT (near Manchester) was constructed by James Brindley, to carry the Bridgewater canal over the Irwell, which was done at a height of 39 feet above the river. It is said to be in as good a state now as it was on the day it was completed, in 1761.

BASLE, the richest city in Switzerland. The 18th General Council sat here from 1431 to 1443. Many important reforms in the church were proposed, but not carried into effect: among others the union of the Greek and Roman churches. The university was founded in 1460. Treaties between France, Spain, and Prussia were concluded here in 1795.

BASHI-BAZOUKS, irregular Turkish troops, partially employed by the British in the Crimean war, 1854-5.

BASILIANs, an order of monks, which obtained its name from St. Basil, who died A.D. 380. The order was reformed by pope Gregory, in 1569.—A sect founded by Basil, a physician of Bulgaria, on the most extravagant notions; they rejected the books of Moses, the eucharist, and baptism, and are said to have had everything, even their wives, in common, 1110. Basil was burnt alive in 1118.

* The number of the victims is differently stated by various authors. La Popelionère calculates the whole at 20,000; Adriani, De Serres, and De Thou say 30,000; Davila states them at 40,000; and Péréfixe makes the number 100,000. Above 500 persons of rank, and 10,000 of inferior condition, perished in Paris alone, besides those slaughtered in the provinces.

BASQUE ROADS. Four French ships of the line, riding at anchor here, were attacked by lords Gambier and Cochrane (the latter commanding the fireships), and all, with a great number of merchant and other vessels, were destroyed, April 12, 1809. A serious difference between these officers led to a court-martial (July 26—Aug. 4) on charges preferred by lord Cochrane against lord Gambier, who was honourably acquitted.

BASS'S STRAIT, AUSTRALIA. Mr. Bass, surgeon of the *Reliance*, in an open boat from Port Jackson, in 1797 penetrated as far as Western Port, and affirmed that a strait existed between New South Wales and Van Diemen's Land. Lieutenant Flinders circumnavigated Van Diemen's Land, and named the strait after Mr. Bass, 1799.

BASSET, OR BASSETTE, or *Pour et Contre*, a game at cards, invented by a noble Venetian, for which he was banished; introduced into France, 1674.

BASTARD, a child not born in lawful wedlock. An attempt was made in England, in 1236, to make bastard children legitimate by the subsequent marriage of the parents, but it failed, and led to the memorable answer to the barons assembled in the parliament of Merton: *Nolumus leges Angliæ mutari*—"We will not have the laws of England changed." Women concealing their children's birth deemed guilty of murder, 21 James I. 1624. *Viner's Statutes.* In Scotland bastard children had not the power of disposing of their moveable estates by will, until 6 Will. IV. 1836. A new act, facilitating the claims of mothers, and making several provisions for proceeding in bastardy cases, was passed 8 Vict. cap. 10, in 1845.—About 1831, the illegitimate births in England were about 1 in 16; in Sweden 1 in 4; in Paris, 1 in 3; in Prussia, 1 in 13; in Austria, 1 in 4 or 5; in Lombardy, 1 in 25.

BASTILLE, PARIS, a castle built by Charles V., king of France, in 1369, for the defence of Paris against the English; completed in 1383. It was afterwards used as a state prison, and became the scene of much suffering. Henry IV. and his veteran army assailed it in vain in the siege of Paris, during the war that desolated France between 1587 and 1594. On July 14-15, 1789, it was pulled down by the infuriated populace; the governor and other officers were seized, conducted to the Place de Grève, and had their hands and heads cut off. The heads fixed on spikes were carried in triumph through the streets.—"The man with the iron mask," the most mysterious prisoner ever known, died here, Nov. 19, 1703. See *Iron Mask*.

BATAVIA AND BATAVIAN REPUBLIC. See *Holland*.

BATAVIA, the capital of Java, and of all the Dutch settlements in the East Indies, built by that people about 1619. Taken by the English, January, 1782. Again, by the British, under general sir Samuel Auchmuty, to whom the garrison surrendered, Aug. 26, 1811.

BATH, Somerset. This city was a favourite station of the Romans, and was remarkable even in their time for its springs. Coel, a British king, is said to have given this city a charter, and the Saxon king Edgar was crowned here, A.D. 973. Bath was plundered and burnt in the reign of William Rufus, and again in 1137. The abbey church was commenced in 1405, and was finished in 1606; the Assembly-rooms were built in 1791; the Pump-room, in 1797; the theatre, Beaufort-square, was opened in 1805. The Bath Philosophical Society was formed in 1817.

BATH AND WELLS, BISHOPRIC OF. The see of Wells, whose cathedral church was built by Ina, king of the West Saxons, in 704, was erected 909. John de Villula, the sixteenth bishop, having purchased the city of Bath for 500 marks of Henry I., transferred his seat from Wells to Bath in 1088. Disputes arose between the monks of Bath and the canons of Wells about the election of a bishop, which were compromised in 1135. Henceforward the bishop was to be styled from both places; the precedency to be given to Bath. The see is valued in the king's books at 531*l.* 1*s.* 3*d.* per annum. Present income 5000*l.*

RECENT BISHOPS OF BATH AND WELLS.

1802. Richard Beadon, died April 21, 1824.
1824. George Henry Law, died Sept. 22, 1845.

1845. Richard Bagot, died May 15, 1854.
1854. Robert John, baron Auckland (PRESENT bishop).

BATH, EARL OF; HIS ADMINISTRATION. Mr. Pelham and his friends having tendered their resignation to the king (George II.), Feb. 10, 1746, the formation of a new ministry was undertaken by William Pulteney, earl of Bath; but it expired on Feb. 12, while yet incomplete, and received the name of the "Short-lived" administration. The members of it actually appointed were: the earl of Bath, *first lord of the treasury*; lord Carlisle, *lord privy seal*; lord Winchelsea, *first lord of the admiralty*; and lord Granville, one of the secretaries of state, with the seals of the other in his pocket, "to be given to whom he might choose." Mr. Pelham and his colleagues returned to power. *Cocce's Life of Pelham.*

BATH, ORDER OF THE. Instituted in 1399 by Henry IV. on his coronation in the Tower; he conferred the order upon forty-six esquires, who had watched the night before, and had bathed. After the coronation of Charles II. the order was neglected until 1725, when it was revived by George I., who fixed the number of knights at 37. In 1815 the prince regent enlarged the order, forming classes of knights grand crosses (72), and knights commanders (180), with an unlimited number of companions. By an order published May 25, 1847, all the existing statutes of this order were annulled; and by the new statutes, the order, hitherto exclusively military, was opened to civilians. In 1851, Dr. Lyon Playfair, and other promoters of the Great Exhibition of that year, received this honour.

CONSTITUTION: —1st Class.	Knights grand cross,	50 military,	25 civil.
2nd Class.	Knights commanders,	100 „	50 „
3rd Class.	Companions,	525 „	200 „

BATHS were long used in Greece, and introduced by Agrippa into Rome. The *thermae* of the Romans and *gymnasia* of the Greeks (of which baths formed merely an appendage) were sumptuous. The marble group of Laocöon was found in 1506 in the baths of Titus, erected about A.D. 80, and the Farnese Hercules in those of Caracalla, A.D. 211.

BATHS IN ENGLAND. The baths of Somersetshire are said to have been in use eight centuries before Christ. In London, St. Agnes Le Clere, in Old-street-road, was a spring of great antiquity, well known in the time of Henry VIII. St. Chad's-well, Gray's-inn-road, derived its name from St. Chad, the fifth bishop of Lichfield, in A.D. 667. Old Bath-house, Coldbath-square, was in use in 1697. A bath opened in Bagnio-court, now Bath-street, Newgate-street, London, is said to have been the first bath in England for hot bathing. Established in 1679. Turkish sweating-baths became very popular in 1860; the Oriental Baths in Victoria-street, Westminster, were completed in 1862.

BATHS AND WASH-HOUSES, PUBLIC. The first was established by Mr. Bowie in the neighbourhood of the London docks in 1844. An act was passed in 1846 to encourage the establishment of public baths and wash-houses, "for the health, comfort, and welfare of the inhabitants of populous towns and districts." In the same session a similar act was passed for Ireland. Several of these institutions were forthwith opened in London, which have been most successful. In the quarter ending Sept. 1854, 537,345 bathers availed themselves of the baths in London, and in this period there were 85,260 washers. Public baths and wash-houses have since been established throughout the empire.

BATON, a truncheon borne by generals in the French army, and afterwards by the marshals of other nations. Henry III. of France, before he ascended the throne, was made generalissimo of the army of his brother Charles IX., and received the *bâton* as the mark of the high command, 1569. *Hénault*.

BATTEL-ABBEY, Sussex, founded by William I., 1067, on the plain where the battle of Hastings was fought, Oct. 14, 1066. It was dedicated to St. Martin, and was given to Benedictine monks, who were to pray for the souls of the slain. The original name of the plain was Hetheland. See *Hastings*. After the battle of Hastings, a list was taken of William's chiefs, amounting to 629, and called the **BATTEL-ROLL**; and amongst these chiefs the lands and distinctions of the followers of the defeated Harold were distributed.

BATTEL, WAGER OF, a trial by combat formerly allowed by our laws, where the defendant in an appeal of murder might fight with the appellant, and make proof thereby of his guilt or innocence. See *Appeal*.

BATTERIES along the coasts were constructed by Henry VIII. (who reigned 1509-47). The famous floating batteries with which Gibraltar was attacked, in the memorable siege of that fortress, were the scheme of D'Arcon, a French engineer. There were ten of them, and they resisted the heaviest shells and 32-pound shot, but ultimately yielded to red-hot shot, Sept. 13, 1782. See *Gibraltar*.

BATTERING-RAM, *Testudo Arietaria*, with other military implements, some of which are still in use, are said to have been invented by Artemon, a Lacedæmonian, and employed by Pericles, about 441 B.C. These ponderous engines (from 80 to 120 feet long) by their own weight exceeded the utmost effects of the battering cannon of the early part of the last century. *Desaguliers*. Sir Christopher Wren employed a battering-ram in demolishing the old walls of St. Paul's church, previously to rebuilding the edifice in 1675.

BATTERSEA PARK originated in an act of parliament passed in 1846, which empowered Her Majesty's commissioners of woods to form a royal park in Battersea-fields. Acts to enlarge the powers of the commissioners were passed in 1848, 1851, and 1853. The park and the new bridge connecting it with Chelsea were opened in April, 1858.

BATTLE-AXE, a weapon of the Celts. The Irish were constantly armed with an axe. *Burns*. At the battle of Bannockburn king Robert Bruce clove an English champion down to the chine at one blow with a battle-axe, 1314. *Hume*. The battle-axe guards or beaufetiers, who are vulgarly called beef-eaters, and whose arms are a sword and lance, were first raised by Henry VII. in 1485. They were originally attendants upon the king's buffet. See *Yeoman of the Guard*.

BATTLEFIELD, BATTLE OF. See *Shrewsbury*.

BATTLES. Palamedes of Argos is said to have been the first who ranged an army in a regular line of battle, placed sentinels round a camp, and excited the soldier's vigilance by giving him a watchword. *Lenglet*. (See *Naval Battles*.) The following are the most memorable battles, arranged in chronological order. The 15 battles termed "decisive" by Professor Creasy are marked by a †.

BEFORE CHRIST.		B.C.	
Abraham defeats kings of Canaan (<i>Gen. xiv.</i>)	1913	Metellus defeats Jugurtha	109
Joshua subdues five kings of Canaan (<i>Josh. x.</i>)	1451	Ague Sextie (Adx.; <i>Marius defeats the Teutones</i>)	102
Gideon defeats the Midonites (<i>Judges vii.</i>)	1245	*Gimbr and Romans	101
Trojan war commenced	1193	*Cheronea (<i>Sylla defeats Mithridates' army</i>)	85
Troy taken and destroyed	1184	Marius defeated by Sylla	82
Ethiopiens defeated by Asa (<i>2 Chron. xiv.</i>)	945	Catiline defeated at Flistoria	62
*Morath vanquish Ouriatii	669	Crassus defeated by the Parthians at Carrhe	53
*Halys (<i>Medes and Lydians, stopped by eclipses</i>)	585	*Pharsalia Aug. 9,	48
†*Marathon (<i>Greeks defeat Persians</i>)	Sept. 28, 490	*Zola (<i>Cæsar defeats Pharnaces</i>)	47
*Thermopylæ (<i>heroism of Leonidas</i>)	Aug. 7-9, 480	Munda, in Spain (<i>Pompey's sons subdued</i>)	45
*Salamis (<i>Greeks defeat Persians</i>)	Oct. 20, 480	*Philippi (<i>Roman Republic ends</i>)	42
*Mycale (<i>ditto</i>)	Sept. 22, 479	Agrippa defeats Pompey the Younger	36
*Platæa (<i>ditto: Persians</i>)	Sept. 22, 479	*Actium (<i>Octavius defeats Antony</i>)	Sept. 2, 31
*Eurymedon (<i>ditto: Cimon</i>)	466	ANNO DOMINI.	
*Coronea (<i>Boeotians defeat Athenians</i>)	447	†Varus defeated by Herman (or Arminius)	9
Torone (<i>Cleon killed: Athenians defeat Spartans</i>)	422	*Shropshire (<i>Caractacus taken</i>)	50
†Athenians defeated before Syracuse	413	Romans defeat Boadicea	61
*Cyzius (<i>Alcibiades defeats Spartans</i>)	405	Jerusalem taken	70
*Egospotomos (<i>Athenian fleet destroyed</i>)	405	Agrioola conquers Mona	76
*Cunaxa (<i>Artaxerxes kills Cyrus</i>)	401	Issus (<i>Niger slain</i>)	334
*Coronea (<i>Agessius defeats Athenians and allies</i>)	394	Claudius defeats Goths (300,000 slain)	269
*Allia (<i>Brennus and the Gauls defeat Romans</i>)	390	Alectus defeated in Britain	296
Volsci defeated by Camillus	381	Constantine def. Maxentius (see <i>Cross</i>), Oct. 27,	312
Volsci defeat the Romans	379	*Adrianople (<i>Constantine defeats Licinius</i>)	323
Naxos (<i>Chabrias defeats Lacedæmonians</i>)	376 or 377	*Aquilaia (<i>Constantine II. slain</i>)	340
*Leuctra (<i>Thebans defeat Spartans</i>)	371	*Argentaria (<i>Græcian defeats Gauls</i>)	378
Camillus defeats the Gauls	367	*Aquilaia (<i>Marius slain</i>)	388
*Cyncephale (<i>Thebans defeat Thessalians</i>)	364	*Aquilaia (<i>Eugenius slain</i>)	394
*Mantineæ (<i>Thebans victors: Epaminondas slain</i>)	362	Rome taken by Alaric	Aug. 24, 410
Timoleon defeats Carthaginians	339	Ravenna taken by Aspar	475
*Cheronea (<i>Philip defeats Athenians, &c.</i>)	338	*Franks defeated by Aëtius	428
Thebes destroyed by Alexander	335	Genserik takes Carthage	439
*Granicus (<i>Alexander defeats Darius</i>)	May 22, 334	†*Châlons-sur-Marne (<i>Attila defeated</i>)	451
*Issus (<i>ditto</i>)	Oct. 333	Aylesford (<i>Britons defeat Saxons</i>)	455
†Arbela (<i>ditto</i>)	Oct. 1, 333	Crayford, Kent (<i>Hengist defeats Britons</i>)	457
*Oranion (<i>Antipater defeats Greeks</i>)	331	Pewsey Moor	485
Fabius defeats the Punicans	310	*Tolbiach or Zulpich (<i>Clovis defeats Alemanni</i>)	496
*Ipsus (<i>Selenus defeats Antigonus, who is slain</i>)	301	Saxons defeat Britons	508
Asculum (<i>Pyrrius defeats Romans</i>)	279	Victories of Belisarius	533-4
Beneventum (<i>Romans defeat Pyrrhus</i>)	273	Narses defeats Totila	552
*Punic Wars begin	264	Heracius defeats the Persians (<i>Chosroes</i>)	622
Xantippus defeats Regulus	255	First victory of Mahommed	623
Asdrubal defeated by Metellus near Panormus	250	Hatfield (Heathfield: <i>Penda defeats Edwin</i>)	632
Clusium (<i>Gauls defeated</i>)	225	Saracens subdue Syria	636-8
Sellasia (<i>Macedonians defeat Spartans</i>)	222	And take Alexandria	640
Caphye (<i>Acheans defeat Ethiopians</i>)	220	Orwostry (<i>Penda def. Oswald of Northumberland</i>)	641
Hannibal takes Seguntum (<i>which see</i>)	219	Leeds (<i>Osby defeats Penda, who is slain</i>)	655
*Punic War (the Second) begins	218	Saracens defeated by Wamba, in Spain	675
*Trobia (<i>Victory of Hannibal</i>)	209	They defeat the Goths at Gundasto	711
*Thrasymonus (<i>ditto</i>)	217	†*Tours (<i>Charl. Martel defeats the Alemanni</i>)	732
Raphia (<i>Antiochus defeated</i>)	217	Victories of Charlemagne	775-800
*Cannæ (<i>Victory of Hannibal</i>)	Aug. 2, 216	*Roncesvalle (<i>death of Roland</i>)	778
Marcellus and Hannibal (<i>former killed</i>)	209	Albaida (<i>Masa defeated</i>)	852
†*Motaurus (<i>Nero defeats Asdrubal</i>)	207	DANISH INVASION, ETC.	
*Zama (<i>Scipio defeats Hannibal</i>)	202	Hengestdown (<i>Danes defeated by Robert</i>)	835
Abydos (<i>Siege of</i>)	200	Charmouth (<i>Ethelwolf defeated by the Danes</i>)	840
*Cynosephale (<i>Romans defeat Macedonians</i>)	197	Danes defeat King Edmund of East Anglia	870
Scipio defeats Antiochus near Mount Sipylus	190	Assendon (<i>Danes defeated</i>)	871
*Pydna (<i>Romans defeat Perseus</i>)	168	Merton (<i>Danes victorious</i>)	—
*Punic War (the Third)	149		
*Carthage taken by Publius Scipio	146		
Mummius takes Corinth	—		

[The battles which are thus marked * are more fully described in their alphabetical order.]

BATTLES, *continued.*

	A.D.
Wilton (<i>Danes victorious over Alfred</i>) . . .	872
Farnham (<i>Danes defeated</i>) . . .	894
Bury (<i>Edward defeats Ethelwald and Danes</i>) . . .	905
*Semincas (<i>Spaniards defeat Moors?</i>) . . .	934 or 938
Basientello (<i>Otho II. def. by Greeks, &c.</i>) . . .	July 13, 982
[The Saxons and Danes fought with different success from 938 to 1016.]	
Ashdon (<i>Canute defeats Edmund</i>) . . .	1016
*Clontarf (<i>Danes defeated</i>) . . .	1039
*Dunsinane (<i>Macbeth defeated</i>) . . .	1056
Stanford Bridge (<i>Harold defeats Tostig</i>) . . .	Sept. 25, 1066
†Hastings (<i>William I. defeats Harold</i>) . . .	Oct. 14, —
*Alnwick (<i>Scots defeated, Malcolm slain</i>) . . .	1093
*Crusades commence . . .	1096
*Ascalon (<i>Crusaders victorious</i>) . . .	Aug. 12, 1099
*Tinchebray (<i>Robert of Normandy defeated</i>) . . .	1106
Brenneville, Normandy (<i>Henry I. victorious</i>) . . .	1119
*Northallerton, or Battle of the Standard, (<i>David I. and Scots defeated</i>) . . .	Aug. 22, 1138
*Ourique (<i>Alfonso of Portugal defeats Moors</i>), . . .	July 25, 1139
*Lincoln (<i>Stephen defeated</i>) . . .	Feb. 2, 1141
*Alnwick (<i>William the Lion defeated</i>) . . .	July 13, 1174
*Legnano (<i>Italians def. Frd. Barbarossa</i>) . . .	May 29, 1176
*Ascalon surrenders (<i>Richard I.</i>) . . .	Sept. 7, 1191
Arcadiopolis (<i>Bulgarians defeat Emp. Isaac</i>) . . .	1194
*Gisors (<i>Richard I. defeats French</i>) . . .	Oct. 10, 1198
*Arsoul (<i>Richard I. defeats Saracens</i>) . . .	Sept. 7, 1199
Tolosa (<i>Moors defeated</i>) . . .	1212
*Bouvines (<i>French defeat Germans</i>) . . .	1214
*Lincoln (<i>French defeated</i>) . . .	May 19, 1217
*Mansourah (<i>Louis IX. and Crusaders defeated</i>) . . .	1250
*Evesham (<i>English barons victorious</i>) . . .	May 14, 1264
*Evesham (<i>Barons defeated</i>) . . .	Aug. 4, 1265
*Benevento (<i>Chas. of Anjou def. Manfred</i>) . . .	Feb. 26, 1266
*Tagliacozza (<i>Charles defeats Conradin</i>), . . .	Aug. 23, 1268
Llandewyrol (<i>Llewellyn of Wales defeated</i>) . . .	1282
Dunbar (<i>King of Scots taken</i>) . . .	April 27, 1296
Cambuskenneth (<i>Wallace defeats English</i>) . . .	1297
*Falkirk (<i>Wallace defeated</i>) . . .	July 22, 1298
*Courtray (<i>Flemings def. Count of Artois</i>) . . .	July 11, 1302
Roslin, Scotland . . .	Feb. 24, 1303
*Bannockburn (<i>Bruce defeats English</i>), . . .	June 24, 1314
*Fouhards or Dundalk (<i>Ed. Bruce def.</i>) . . .	Oct. 5, 1318
*Boroughbridge (<i>Edward II. defeats Barons</i>) . . .	1322
Duplin (<i>Edward Butler defeats earl of Mar</i>), . . .	Aug. 11, 1332
*Halidon Hill (<i>Edward III. defeats Scots</i>), . . .	July 19, 1333
Auberoche (<i>earl of Derby defeat French</i>) . . .	1345
*Cressy (<i>English defeat French</i>) . . .	Aug. 26, 1346
*Burham, Nevil's Cross (<i>Scots defeated</i>), . . .	Oct. 17, —
La Roche Darien (<i>Charles of Blois defeated</i>) . . .	1347
*Poitiers (<i>English defeat French</i>) . . .	Sept. 19, 1356
Auray (<i>Du Guesclin defeated</i>) . . .	Sept. 29, 1364
Najara (<i>Black Prince def. Henry of Trastamare</i>), . . .	April 3, 1367
*Montiel (<i>Peter of Castile defeated</i>) . . .	March 14, 1369
*Rosbecque (<i>French defeat Flemings</i>) . . .	Nov. 17, 1382
*Sempach (<i>Swiss defeat Austrians</i>) . . .	July 9, 1386
*Otterburn (<i>Chevy Chase; Scots victors</i>) . . .	Aug. 10, 1388
*Nicopolis (<i>Turks defeat Christians</i>) . . .	Sept. 28, 1396
*Homeldon Hill (<i>English defeat Scots</i>), . . .	Sept. 14, 1402
*Shrewsbury (<i>Percies, &c., defeated</i>) . . .	July 21, 1403
Monmouth (<i>Glendower defeated</i>) . . .	May 11, 1405
*Harlaw (<i>Lord of the Isles defeated</i>) . . .	July 24, 1411
*Agincourt (<i>English defeat French</i>) . . .	Oct. 25, 1415
*Anjou, Beaugé (<i>English def. by Scots</i>) . . .	April 3, 1421
*Crevant (<i>English def. French and Scots</i>) . . .	June 11, 1423
*Verneuil (<i>ditto</i>) . . .	Aug. 27, 1424
*Herrings (<i>English defeat French</i>) . . .	Feb. 12, 1429
†*Patay (<i>English defeated, Joan of Arc</i>), . . .	June 18, —
*Kunobirza (<i>Hunians defeats the Turks</i>), . . .	Dec. 24, 1443
*Brechin, Scotland (<i>Huntly defeats Crawford</i>) . . .	1452
*Castillon (<i>French defeat Talbot</i>) . . .	July 23, 1453

WAR OF THE ROSES—YORKISTS AND LANCASTRIANS.

	A.D.
*St. Alban's (<i>Yorkists victorious</i>) . . .	May 22, 1455
*Belgrade (<i>Muhamet II. repulsed</i>) . . .	Sept. 10, 1456
*Bloreheath (<i>Yorkists victors</i>) . . .	Sept. 23, 1459
*Northampton (<i>ditto</i>) . . .	July 10, 1460
*Wakefield (<i>Lancastrians victors</i>) . . .	Dec. 31, —
Mortimer's Cross (<i>Yorkists victorious</i>) . . .	Feb. 2, 1461

Wilson Creek, or Dug Spring (<i>Federals, victors, lose Gen. Lyon</i>)	Aug. 10, —		

BAUGÉ. See *Anjou*.

BAUTZEN and WURTZCHEN (in North Germany), the sites of battles fought May 20, and 21, 1813, between the French commanded by Napoleon, and the allies under the emperor of Russia and the king of Prussia. The struggle commenced on the 19th with a contest on the outposts, which cost each army a loss of above 2000 men. On the 20th (at BAUTZEN), the French were more successful; and on the 21st (at WURTZCHEN), the Allies were compelled to retire; but Napoleon obtained no permanent advantage from these sanguinary engagements. Duroc was among the killed at Bautzen, to the great sorrow of the emperor and the French army.

BAVARIA (part of ancient Noricum and Vindelicia), a kingdom in South Germany, conquered from the Celtic Gauls (Boii) by the Franks between A.D. 630 and 660. The country was afterwards governed by dukes subject to the French monarchs. Tassillon II. was deposed by Charlemagne, who established margraves in 788: Arnoul became duke in 907. Guelf of the house of Este was made duke by the emperor Henry IV. in 1071. His descendant Henry the Lion, duke of Saxony, Bavaria, and Brunswick (ancestor of the present Brunswick family, see *Brunswick*), was dispossessed in 1180 by the emperor Frederick Barbarossa (who had been previously his friend and benefactor). Otho of Wittelsbach became duke, whose descendants reigned till 1777, when the elector palatine acquired Bavaria, which was made an electorate 1623. In Dec. 1805, Bavaria was erected into a kingdom by Bonaparte, and obtained by the treaty of Presburg the incorporation of the whole of the Italian and German Tyrol, the bishopric of Anspach, and lordships in Germany. Bavaria suffered much by its alliances with France against Austria in 1726 and 1805. It joined the Allies in Oct. 1813. Population in 1859, 4,615,800.

DUKES.

1071. Guelf I., an illustrious warrior.	1375. John.
1101. Guelf II.	1397. Ernest.
1120. Henry the Black.	1438. Albert I.
1126. Henry the Proud. He competed with Conrad of Hohenstaufen for the empire and failed, and was deprived of Bavaria.	1460. John II. and Sigismund.
1138. Leopold of Austria.	1465. Albert II.
1142. Henry of Austria.	1508. William I.
1154. Henry the Lion (son of Henry the Proud), restored by the emperor Frederick Barbarossa, but afterwards expelled by him.	1550. Albert III.
1180. Otho, earl of Wittelsbach.	1579. William II.
1185. Louis of Wittelsbach.	1595. Maximilian the Great; the first ELECTOR of Bavaria, 1623.
1231. Otho II., the Illustrious: his son Louis was raised to the electoral dignity.	1651. Ferdinand and Mary.
1253. Henry and Louis the Severe.	1679. Maximilian Emanuel.
1294. Louis III.	1745. Charles Albert; elected emperor of Germany in 1742.
1347. Stephen I.	1745. Maximilian-Joseph I., as elector.
	1778. Charles Theodore (the elector palatine of the Rhine since 1743).
	1799. Maximilian-Joseph II., as elector.

* We have no space for the numerous smaller conflicts, of which the accounts are very uncertain

BAVARIA, *continued.*

KINGS OF BAVARIA.

1805. Maximilian-Joseph I., the preceding elector, created king.
 1825. Louis-Charles, 13th October; abdicated.
 1848. Maximilian-Joseph II.; born Nov. 28, 1811,

succeeded his father, Louis-Charles, on his abdication, March 20.* The PRESENT king (1862).
Heir, his son Louis, born Aug. 25, 1845.

BAY ISLANDS (the chief, Ruatan), in the Bay of Honduras, Central America, belonged to Spain till 1821, and since then to Great Britain, which power formed them into a colony in 1852, but ceded them to Honduras, Nov. 28, 1859, after much negotiation. See *Honduras*.

BAYEUX TAPESTRY, a remarkable historical document, said to have been wrought by Matilda, queen of William I. It is 19 inches wide, 214 feet long, and is divided into compartments showing the train of events, commencing with the visit of Harold to the Norman court, and ending with his death at Hastings; it is now preserved in the town house at Rouen. *Agnes Strickland*. A copy, drawn by C. Stothard (coloured after the original), was published by the Society of Antiquaries in 1821-3.

BAYLEN (S. Spain), where on July 20, 1808, the French, consisting of 14,000 men commanded by generals Dupont and Wedel, were defeated by the Spaniards under Reding, Coupigny, and other generals, whose force amounted to 25,000. The French had nearly 3000 killed and wounded, and the division of Dupont (about 8000 men) was made prisoners.

BAYONET, the short sword or dagger fixed at the end of fire-arms. This important weapon was invented at Bayonne, in France (whence some derive the name), about 1647, 1670, or 1690. It was used at Killiecrankie in 1689, and at Marsaglia by the French, in 1693, "with great success, against the enemy unprepared for the encounter with so formidable a novelty." The ring bayonet was adopted by the British, Sept. 24, 1693. *Aspin*.

BAYONNE (S. France). Charles IV. of Spain abdicated here in favour of "his friend and ally" the emperor Napoleon; and Ferdinand, prince of Asturias, and Don Carlos and Don Antonio renounced their rights to the Spanish throne, May 1, 1808. In the neighbourhood of Bayonne was much desperate fighting between the French and the British armies, Dec. 10, 11, and 13, 1813.† Bayonne was invested by the British, Jan. 14, 1814; on April 14 the French made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and lieutenant-general Sir John Hope was wounded and taken prisoner.

BAYREUTH (N. Germany). The margrave was a branch of the Brandenburg family. The margravate of Bayreuth, with that of Anspach, was abdicated by the reigning prince in favour of the king of Prussia, 1790. The archives of the principality were brought (in 1783) from Plassenburg to the city of Bayreuth, the capital of the domain, which was incorporated with Bavaria by Napoleon in 1806.

BAZAAR, or Covered Market. The word is of Arabic origin. The bazaar of Ispahan is magnificent, yet it is excelled by that of Tauris, which has several times held 30,000 men in order of battle. In London, the Soho-square bazaar was opened by Mr. Trotter in 1816 to relieve the relatives of persons killed in the war. The Queen's bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000*l.*, May 27, 1829. The St. James's bazaar was built by Mr. Crockford in 1832. There are also the Pantheon, the Western Exchange, &c. The most imposing sale termed a bazaar, for the benefit of the Anti-Corn Law League, began in Covent-garden theatre, May 5, 1845; in six weeks 25,000*l.* was obtained, mostly by admission money.

BEACHY HEAD, a promontory on the S.E. coast of Sussex, where the British and Dutch combined fleet, commanded by the earl of Torrington, was defeated by a superior French force, under admiral Tourville; the British suffered very severely, June 30, 1690. The Dutch lost two admirals, 500 men, and several ships,—sunk to prevent them from falling

* The abdication of Charles-Louis was mainly caused by his unfortunate attachment to an intriguing woman, known throughout Europe under the assumed name of Lola Montes, who, in the end, was expelled the kingdom for her interference in state affairs, and afterwards led a wandering life. She delivered lectures in London, in 1859, and thence proceeded to the United States. She died at New York, Jan. 17, 1861.

† Soult issued out of Bayonne and attacked the left of the British army under Sir John Hope, and twice succeeded in driving the fifth division of the allies, but was twice repulsed, Dec. 10. Next morning, Soult again directed several columns, also against the British left, which withstood the attack, and at the close of the day each army maintained its position, Dec. 11. In the night, Soult moved with his main force to attack the British right. Gen. Hill commanded above 13,000 men, and Soult a force of 30,000. Two attacks were at first successful; but the French were ultimately defeated, and Soult drew back his troops towards his intrenched camp at Bayonne, Dec. 13, 1813. *Sir W. F. P. Napier*.

into the hands of the enemy; the English lost two ships and 400 men. The admirals on both sides were blamed; ours, for not fighting; the French, for not pursuing the victory.

BEADS were early used for reckoning prayers in the East. St. Augustin mentions them in A.D. 366. About 1090, Peter the Hermit is said to have made a series of 55 beads. To Dominic de Guzman is ascribed the invention of the Rosary, consisting of a series of 15 large and 150 small beads, in honour of the Blessed Virgin, 1202. They were in general use in Roman Catholic devotions, 1213. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited, which the devout counted by a string of beads. Beads appear to have been used by the Druids, being found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weigh-master, who was to do justice between buyer and seller, statute 3 Edw. II. 1309. *Stow.* Beams and scales, with weights and measures, were ordered to be examined by the justices at quarter-sessions, 35 Geo. III. 1794. They have been frequently the subject of penal acts to ensure justice in public dealings. See *Weights and Measures*.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The precept of Pythagoras to abstain from beans, *abstine a fabis*, has been variously interpreted. "Beans do not favour mental tranquillity." *Cicero.* The finer kinds of beans were brought to these countries at the period of the introduction of most other vegetables, in Henry VIII.'s reign.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards till the time of Alexander, who ordered the Macedonians to be shaved, lest the beard should give a handle to their enemies, 330 B.C. Beards were worn by the Romans, 297 B.C. The emperor Julian wrote a diatribe (entitled "*Misopogon*") against wearing beards, A.D. 362.—In England, they were not fashionable after the Conquest, 1066, until the thirteenth century, and were discontinued at the Restoration. Peter the Great enjoined the Russians, even of rank, to shave, but was obliged to keep officers on foot to cut off the beard by force. Since 1851 beards have been much worn in England, and the custom is increasing.

BEAUGÉ. See *Anjou*.

BEAULIEU, ABBEY OF, founded by king John, in the New Forest, Hampshire, in 1204. It was dedicated to the Blessed Virgin, had the privilege of sanctuary, and was devoted to monks of the reformed Benedictine order. It afforded an asylum to Margaret, queen of Henry VI., after the defeat of the earl of Warwick at Barnet, April 14, 1471. Here, too, Perkin Warbeck obtained refuge in the reign of Henry VII., in 1497.

BEAUVAIS (N. France), HEROINES OF. On the town being besieged by Charles the Bold, duke of Burgundy, at the head of 80,000 men, the women under the conduct of Jeanne Fourquet, Lainé, or De la Hachette, particularly distinguished themselves, and the duke was obliged to raise the siege, July 10, 1472. In memory of this, the women of Beauvais walk first in the procession on the anniversary of their deliverance. *Henault.*

BECKET'S MURDER.† Thomas Becket, archbishop of Canterbury, was murdered at the altar, Dec. 29, 1170. Four barons, hearing Henry II. say in a moment of exasperation, at receiving intelligence of Becket's pertinacity against the prelates opposed to him, "What

* A bearded woman was taken by the Russians at the battle of Pultowa, and presented to the czar, Peter I. 1724: her beard measured $1\frac{1}{2}$ yard. A woman is said to have been seen at Paris with a bushy beard, and her whole body covered with hair. *Dict. de Trevoux.* The great Margaret, governess of the Netherlands, had a very long stiff beard. In Bavaria, in the time of Wolfius, a virgin had a long black beard. *Mdlle. Bois de Chêne,* born at Geneva (it was said) in 1834, was exhibited in London, in 1852-3, when, consequently, eighteen years of age: she had a profuse head of hair, a strong black beard, large whiskers, and thick hair on her arms and down from her neck on her back, and masculine features.

† Thomas Becket was born in 1119. His father Gilbert was a London trader, and his mother is stated to have been a convert from Mahomedanism. He was educated at Oxford, and made archdeacon by Theobald archbishop of Canterbury, who introduced him to the king Henry II. He became chancellor in 1155, but on being elected archbishop of Canterbury in 1162, he resigned the chancellorship, to the great offence of the king. He opposed strenuously the constitutions of Clarendon in 1164, and fled the country: and, in 1166, excommunicated all the clergy who agreed to abide by them. He and the king met at Fretville, in Touraine, on July 22, 1170, and were formally reconciled. On his return he re-commenced his struggle with the king, which led to his tragical death.

an unhappy prince am I, who have not about me one man of spirit enough to rid me of this insolent prelate!" resolved upon Becket's assassination; and rushing with drawn swords into the cathedral of Canterbury where he was at vespers, they feigned a commission from the king, and endeavoured to induce Becket to recall his sentence against the bishops. On his refusal they followed him into the north transept, when he cried out, "I charge you, in the name of the Almighty, not to hurt any other person here, for none of them have been concerned in the late transactions." The confederates then strove to drag him from the church; but not being able to do so, on account of his resolute deportment, they killed him on the spot with repeated wounds.—The king was absolved of guilty knowledge of the crime in 1172, and did penance at the tomb in 1174. The bones of Becket were enshrined in gold and jewels in 1220; but were burned in the reign of Henry VIII. 1539. *Stow.*

BEDS. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. Feather-beds were in use in England in the reign of Henry VIII. The bedsteads of the Egyptians and later Greeks, like modern couches, became common among the Roman upper classes.—A bedstead of gold was presented to the queen on Nov. 2, 1859, by the Maharajah of Cashmere. Air-beds and water-beds have been made since the manufacture of india-rubber cloth by Clark in 1813; and by Macintosh in 1823. Dr. Arnott's hydrostatic bed was invented in 1830.

BED OF JUSTICE, a French court presided over by the king, which had the power of enforcing or overruling the ordinances of the parliament. The last was held by Louis XVI. at Versailles in 1787.

BEDFORD, a town, N.N.W. London, renowned for its many free educational establishments endowed in 1561 by sir Wm. Harpur, a London alderman. Here John Bunyan preached, wrote "The Pilgrim's Progress," and died (in 1688).

BEDFORD LEVEL, a portion of the great fen districts in the eastern counties, drained in the early part of the seventeenth century by the earl of Bedford, aided by the celebrated Dutch engineer, sir Cornelius Vermuyden, amid great opposition from the natives of the district. See *Levels*.

BEDLAM. See *Bethlehem*.

BEDOUINS, wandering tribes of Arabs, living on the plunder of travellers, &c. They profess a form of Mahomedanism, and are governed by sheikhs. They are said to be descendants of Ishmael, and appear to fulfil the prophecy respecting him, *Gen.* xvi. 12, 1911 B.C. They are the scourge of Arabia and Egypt.

BEEF-EATERS. See *Battle-axe*.

BEEFSTEAK SOCIETY, the members of which dine together in a room behind the Lyceum theatre, was founded in 1735 by John Rich, patentee of Covent-garden theatre, and George Lambert, the scene-painter, in whose work-room the society originated. Beefsteak Clubs existed in 1709 and 1733.

BEER. See *Ale, Porter, Victuallers*.

BEES. Mount Hybla, on account of its odoriferous flowers, thyme, and abundance of honey, has been poetically called the "empire of bees." Hymettus, in Attica, was also famous for its bees and honey. The economy of bees was admired in the earliest ages; and Eumelus, of Corinth, wrote a poem on bees, 741 B.C. There are 292 species of the bee or *apis* genus, and 111 in England. Bees were first introduced into Boston, New England, by the English in 1670, and have since spread over the whole continent. Mandeville's satirical "Fable of the Bees" appeared in 1723. Huber published his observations on bees in 1796. The Apian Society have an establishment at Muswell, near London (1862).

BEET-ROOT is of recent cultivation in England. *Beta vulgaris*, red beet, is used for the table as a salad. Margraff first produced sugar from the *white* beet-root in 1747. M. Achard produced excellent sugar from it in 1799; and the chemists of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. 60,000 tons of sugar, about half the consumption, are now manufactured in France from beet. It is also largely manufactured in other countries. A refinery of sugar from beet-root has been erected at the Thames-bank, Chelsea.

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. In modern times severe laws have been passed against them. In 1572, by 14 Eliz. c. 5, sturdy beggars were ordered to be "grievously whipped and burnt through the right ear." By the Vagrant Act (1824) 5 Geo. IV. c. 83, all public beggars are liable to a month's imprisonment. See *Poor Laws* and *Mendicity Society*.

BEGUINES, a congregation of nuns, first established at Liège, and afterwards at Nivelles; in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive of modern times.—Some of these nuns imagined that they could in this life arrive at the highest moral perfection, even to impeccability. The council of Vienna condemned this error, and abolished a branch of the order in 1311. They still exist in Germany and Belgium, acting as nurses to the sick and wounded, &c.

BEHEADING, the *Decollatio* of the Romans, introduced into England from Normandy (as a less ignominious mode of putting high criminals to death) by William the Conqueror, 1076, when Waltheoff, earl of Huntingdon, Northampton, and Northumberland, was first so executed. Since then this mode of execution became frequent, particularly in the reigns of Henry VIII. and Mary, when even women of the noblest blood, greatest virtues, and most innocent lives thus suffered death.*

BEHISTUN, in Persia. At this place is a rock containing important inscriptions in three languages, in cuneiform (or wedge-shaped) characters, which were deciphered and translated by sir H. Rawlinson in 1844-6 and published in the Journal of the Royal Asiatic Society. Each paragraph commences with "I am Darius the Great King."

BEHRING'S STRAIT, discovered by captain Vitus Behring, a Danish navigator in the service of Russia. He thus proved that the continents of Asia and America are not united, but are distinct from each other about thirty-nine miles, 1728. He died at Behring's island in 1741. The current from the west between the shores is very inconsiderable, the depth not being more than from twelve to thirty fathoms. In 1788 capt. James Cook accurately surveyed the coast of both continents.

BELFAST, capital of Ulster, Ireland. First mentioned about A.D. 1315; its castle, supposed to have been built by John de Courcy, was then destroyed by the Scots, under Edward Bruce. Belfast was granted by James I. to sir Arthur Chichester, then lord deputy, 1612. It was erected into a corporation by James I. 1613. The long bridge, 2000 feet in length, and of 21 arches, was commenced in 1682. Here was printed the first edition of the Bible published in Ireland, 1704. The castle was burnt, April, 1708. The bank built, 1787. The mechanics' institute established, 1825. Of three colleges established in Ireland under the act 8 & 9 Vict. c. 66, passed in 1845, one was inaugurated in Belfast, October, 1849. See *Colleges in Ireland*. In July, August, and September, 1857, there was much rioting at Belfast through Mr. Hanna persisting in open-air preaching. On June 24, 1859, the Victoria chambers were burnt down. The loss was estimated at 100,000*l*. In Sept. 1859 Belfast was the scene of exciting religious revivals.

BELGIUM, late the southern portion of the kingdom of the Netherlands, and anciently the territory of the Belgæ, who were finally conquered by Julius Cæsar, 51 B.C. Its size is about one-eighth of Great Britain. The population, December 31, 1859, was 4,671,187. Its government is a liberal constitutional monarchy, founded in 1831. For previous history, see *Flanders, Netherlands and Holland*.

The revolution commences at Brussels Aug. 25, 1830	[France sends 50,000 troops to assist Belgium, and an armistice ensues.]
The Provisional Government declares Belgium independent Oct. 4, —	Conference of ministers of the five great powers held in London: acceptance of 24 articles of pacification Nov. 15, 1831
Antwerp taken Dec. 23, —	The French army returns to France Dec. 27, 1832
Belgian independence acknowledged by the allied powers Dec. 26, —	Riot at Brussels (see <i>Brussels</i>) April 6, 1834
Duke de Nemours elected king: but his father, the French king, refuses his consent Feb. 3, 1831	Treaty between Holland and Belgium signed in London April 19, 1839
Surlet de Chokier is elected regent Feb. 24, —	Queen of England visits Belgium Aug. 1852
Leopold, prince of Coburg, elected king July 12, enters Brussels July 19, —	The king and his son visit England Oct. —
The king of the Netherlands commences war Aug. 3, —	Increase of army to 100,000 men voted May 10, 1853
	Opposition to religious charities' bill † June, 1857

* Among other instances (besides queens of England) may be mentioned the lady Jane Grey, beheaded Feb. 12, 1554; and the venerable countess of Salisbury,—the latter remarkable for her resistance of the executioner. When he directed her to lay her head on the block, she refused to do it; telling him that she knew of no guilt and would not submit to die like a criminal. He pursued her round and round the scaffold, aiming at her hoary head, and at length took it off, after mangling the neck and shoulders of the illustrious victim in a horrifying manner. She was daughter of George, duke of Clarence, and last of the royal line of Plantagenet. May, 27, 1541. *Hume*.

† This treaty arose out of the conference held in London on the Belgian question; by the decision of which, the treaty of Nov. 15, 1831, was maintained, and the pecuniary compensation of sixty millions of francs, offered by Belgium for the territories adjudged to Holland, was declared inadmissible.

‡ At the Revolution in 1830 the Roman Catholic clergy lost the administration of the public charities, which they have struggled to recover ever since. In April, 1857, M. Decker, the head of the ministry, brought in a bill for this purpose; the principle of which was carried. This led, however, to so much agitation that the ministry were compelled to withdraw the bill, and eventually to resign.

BELGIUM, *continued*.

A new ministry under M. Charles Rogier Nov. 9, 1857	The Octrois abolished July 27, 1860
The chambers dissolved; re-assembled Dec. 10, —	Successful military volunteer movement Aug. —
The king proclaims Belgium neutral in the Italian war May, 1859	Commercial treaty with France March 1, 1861
Death of M. Potter July 22, —	Continued illness of the king; with occasional amendment May, June, 1862
The king visits England June, 1860	Commercial treaty with Great Britain adopted by the chamber Aug. 22, —
Vague rumours of annexation to France produce warm loyal addresses to the king . June 13, —	Great distress through decay of trade Aug. —

KING OF THE BELGIANS.

1831. Leopold,* first king of the Belgians; born Dec. 16, 1790; inaugurated July 21, 1831, at Brussels; married Aug. 9, 1832, Louise, eldest daughter of Louis Philippe, king of	the French; she died Oct. 11, 1850. The PRESENT king, 1862. Heir: his son, Leopold, duke of Brabant; born April 9, 1835; married archduchess Maria of Austria, Aug. 22, 1853.
--	--

BELGRADE (in Servia, on the right bank of the Danube); a battle was fought here on September 10, 1456, between the Germans (under John Huniades) and the Turks (under Mahomed II.), in which the latter was defeated with the loss of 40,000 men. Belgrade was taken by Solymán, 1522, and retaken by the Imperialists in 1688, from whom it again reverted to the Turks in 1690. It was besieged in May, 1717, by prince Eugene. On Aug. 5 of that year, the Turkish army, 200,000 strong, approached to relieve it, and a sanguinary battle was fought at Peterwaradein, on August 22, in which the Turks lost 20,000 men; after this battle Belgrade surrendered. In 1739 it was ceded to the Turks, after its fine fortifications had been demolished. It was again taken in 1789, and restored at the peace of Reichenbach, in 1790. The Servian insurgents had possession of it in 1806. In 1815 it was placed under prince Milosch, subject to Turkey. The fortifications were restored in 1820. On June 19, 1862, the Turkish pacha was dismissed for firing on the town during a riot. See *Servia*.

BELL, BOOK, AND CANDLE: in the Romish ceremony of Excommunication (*which see*), the bell is rung, the book closed, and candle extinguished; the effect being to exclude the excommunicated from the society of the faithful, divine service, and the sacraments. Its origin is ascribed to the 8th century.

BELL-ROCK LIGHT-HOUSE, esteemed one of the finest structures of the kind in Great Britain. It is nearly in front of the Frith of Tay, and is 115 feet high; it is built upon a rock that measures 427 feet in length and 200 feet in breadth, and is about 12 feet under water.† The present lighthouse was erected in 1806-10; it is provided with two bells for hazy weather.

BELLAIR, in North America. The town was attacked by the British forces under sir Peter Parker, who after an obstinate engagement were repulsed with considerable loss; their gallant commander was killed, Aug. 30, 1814.

BELLEISLE, an isle on the south coast of Brittany, France, was erected into a duchy in favour of marshal Belleisle, in 1742, in reward of his brilliant military and diplomatic services, by Louis XV. Belleisle was taken by the British forces under commodore Keppel and general Hodgson, after a desperate resistance, June 7, 1761, but was restored to France in 1763.

BELLES-LETTRES or POLITE LEARNING. See *Academies* and *Literature*.

BELLMEN, appointed in London, to proclaim the hour of the night before public clocks became general, were numerous about A.D. 1556. They were to ring a bell at night, and cry "Take care of your fire and candle, be charitable to the poor, and pray for the dead." *Noorthouck's History of London*.

BELLOWS. Anacharsis, the Scythian, is said to have been the inventor of them, about 569 B.C.; to him is also ascribed the invention of tinder, the potter's wheel, anchors for ships, &c. Bellows were not used in the furnaces of the Romans. The production of the great leviathan bellows of our foundries (suggested by the diminutive domestic bellows) must have been early, but we cannot trace the time. See *Blowing-Machines*.

BELLS were used among the Jews, Greeks, and Romans. The responses of the Dodonæan oracle were in part conveyed by bells. *Strabo*. The monument of Porsenna was decorated

* Leopold married, in May, 1816, the princess Charlotte of Wales, daughter of the prince regent, afterwards George IV. of England; she died in childbed, Nov. 6, 1817.

† Upon this rock, tradition says, the abbots of the ancient monastery of Aberbrothock succeeded in fixing a bell in such a manner that it was rung by the impulse of the sea, thus warning mariners of their impending danger. Tradition also tells us that this apparatus was carried away by a Dutchman, who was afterwards lost upon the rock, with his ship and crew.

by pinnacles, each surmounted by bells. *Pliny*. Introduced by Paulinus, bishop of Nola, in Campania, about A.D. 400. First known in France in 550. The army of Clothaire II., king of France, was frightened from the siege of Sens by the ringing of the bells of St. Stephen's church. The second excerption of our king Egbert commands every priest, at the proper hours, to sound the bells of his church. Bells were used in churches by order of pope John IX., about 900, as a defence by ringing them, against thunder and lightning. First cast in England by Turketel, chancellor of England, under Edmund I. His successor improved the invention, and caused the first tuneable set to be put up at Croyland abbey, 960. *Stow*. The celebrated "Song of the Bell," by Schiller (died 1805) has been frequently translated. The following list is that given by Mr. E. Beckett Denison in his discourse on bells, at the Royal Institution, March 6, 1857.

Moscow, 1736; * broken,	Weight—Tons Cwt.	Paris, 1680	Tons Cwt.	Antwerp	Tons Cwt.
2737	250 ?	Sens	12 16	Brussels	7 3
Another, 1817	110 ?	Montreal, 1847	13 ?	Dantzic, 1453	6 1
Three others	16 to 31	Cologne, 1448	12 15	Lincoln, 1834	5 8
Novogorod	31 0	Breslaw, 1507	11 0	St. Paul's, 1716, §	5 4
Olmütz	17 18	Görlitz	10 17	Ghent	4 18
Vienna, 1711	17 14	York, 1845	10 15	Boulogne, new	4 18
Westminster, 1856 † "Big Ben"	15 8½	Bruges, 1680	10 5	Exeter, 1675	4 10½
Westminster, 1858 † "St. Stephen"	13 10½	St. Peter's, Rome	8 0	Old Lincoln, 1610	4 8
Erfurt, 1497	13 15	Oxford, 1680	7 12	Fourth quarter-bell, Westminster, 1857	4 0
		Lucerne, 1636	7 11		
		Halberstadt, 1457	7 10		

BELLS, BAPTISM OF. They were anointed and baptised in churches it is said from the 10th century. *Du Fresnoy*. The bells of the priory of Little Dunmow, in Essex, were baptised by the names of St. Michael, St. John, Virgin Mary, Holy Trinity, &c., in 1501. *Weever*. The great bell of Notre Dame, in Paris, was baptised by the name of Duke of Angoulême, 1816. On the continent, in Roman Catholic states, they baptize bells as we do ships, but with religious solemnity. *Ashé*.

BELLS, RINGING OF, in changes of regular peals, is almost peculiar to the English, who boast of having brought the practice to an art. There were formerly societies of ringers in London. *Holden*. A sixth bell was added to the peal of five, in the church of St. Michael, 1430. *Stow*. Nell Gwynne left the ringers of the bells of St. Martin's-in-the-fields money for a weekly entertainment, 1687, and many others have done the same.

BELOOCHISTAN, S. Asia, the ancient Gedrosia. The capital was taken by the British in the Afghan war, in 1839; abandoned in 1840, and again taken and held for a short time in 1841.

BENARES, in India, a holy city of the Hindoos, abounding in temples. It was ceded by the nabob of Oude, Asoph-ud-Dowlah, to the English in 1775. An insurrection took place here, which had nearly proved fatal to the British interests in Hindostan, 1781. The rajah, Cheyt Sing, was deposed in consequence of it, in 1783. Mr. Cherry, capt. Conway, and others, were assassinated at Benares, by vizier Aly, Jan. 14, 1799. In June, 1857, col. Neil succeeded in suppressing attempts to join the Sepoy mutiny. See *India*.

BENCOCLEEN, in the island of Sumatra. The English East India Company made a settlement here, which preserved to them the pepper trade after the Dutch had dispossessed them of Bantam, 1682. *Anderson*. York Fort was erected by the East India Company, 1690. In 1693, a dreadful mortality raged here, occasioned by the town being built on a pestilential morass: among others the governor and council perished. The French, under count

* The metal has been valued, at the lowest estimate, at £66,565. Gold and silver are said to have been thrown in as votive offerings.

† The largest bell in England (named Big Ben, after sir Benjamin Hall, the then chief commissioner of works), cast at Houghton-le-Spring, Durham, by Messrs. Warner, under the superintendence of Mr. E. Beckett Denison and the rev. W. Taylor, at an expense of £3343 14s. 9d. The composition was 22 parts copper and 7 tin. The diameter was 9 ft. 5½ in.; the height 7 ft. 10½ in. The clapper weighed 12 cwt. *Rev. W. Taylor*.

‡ The bell "Big Ben," having been found to be cracked on Oct. 24, 1857, it was broken up, and another bell cast with the same metal, in May, 1858, by Messrs. Mears, Whitechapel. It is rather different in shape to its predecessor, "Big Ben," and about 2 tons lighter. Its diameter is 9 ft. 6 in.; the height 7 ft. 10 in. It was struck for the first time, Nov. 18, 1858. The clapper weighs 6 cwt.—half that of the former bell. The note of the bell is E natural; the quarter-bells being G, B, E, F. On Oct. 1, 1859, this bell was also found to be cracked. It remains in this state (May, 1862). The scientific men referred to greatly differ in opinion as to the merits of this bell.

§ The clapper of St. Paul's bell weighs 180 lbs.; the diameter of the bell is 10 feet, and its thickness 10 inches. The hour of the day strikes upon this bell, the quarters upon two smaller ones beneath. See *Clocks*.

D'Estaing, destroyed the English settlement, 1760. Bencoolen was reduced to a residency under the government of Bengal, in 1801, and was ceded to the Dutch in 1825, in exchange for their possessions in Malacca. See *India*.

BENDER in Bessarabia, European Russia, is memorable as the asylum of Charles XII. of Sweden, after his defeat at Pultowa by the czar Peter the Great, July 8, 1709. The celebrated peace of Bender was concluded in 1711. Bender was taken by storm, by the Russians, in Sept. 1770; was again taken by Potemkin in 1789, and again stormed in 1809. It was restored at the peace of Jassy, but retained at the peace of 1812.

BENEDICTINES, an order of monks founded by Benedict (A.D. 480—543), who introduced the monastic life into western Europe, in 529, when he founded the monastery on Monte Cassino in Campania, and eleven others afterwards. His *Regula Monachorum* (rule of the monks) soon became the common rule of western monachism. No religious order has been so remarkable for extent, wealth, and men of note and learning, as the Benedictine. Among its branches the chief were the Cistercians, founded in 1098, and reformed by St. Bernard, abbot of Clairvaux, in 1116; and the Carthusians, from the Chartreux (hence Charter-house) founded by Bruno about 1084. The Benedictine order was introduced into England by Augustin, in 596; and William I. built an abbey for it on the plain where the battle of Hastings was fought 1066. See *Battel Abbey*. William de Warrenne, earl of Warrenne, built it a convent at Lewes, in Sussex, in 1077. "At Hammersmith is a nunnery, whose inmates are denominated Benedictine dames." *Leigh*. Of this order it is reckoned that there have been 40 popes, 200 cardinals, 50 patriarchs, 116 archbishops, 4600 bishops, 4 emperors, 12 empresses, 46 kings, 41 queens, and 3600 saints. Their founder was canonised. *Barontius*. The Benedictines have taken little part in politics, but have produced many valuable works: especially the congregation of St. Maur, who published the celebrated *l'Art de Vérifier les Dates*, in 1750, and edited many ancient authors.

BENEFICE (literary a good deed or favour), OR FEEF. Clerical benefices originated in the twelfth century, when the priesthood began to imitate the feudal lay system of holding lands for performing certain duties: till then the priests were supported by alms and oblations at mass. Vicarages, rectories, perpetual curacies, and chaplaincies, are termed benefices in contradistinction to dignities, bishoprics, &c. A rector is entitled to all the tithes; a vicar, to a small part or to none.—All benefices that should become vacant in the space of six months, were given by pope Clement VII. to his nephew, in 1534. *Notitia Monastica*. The number of benefices in England and Wales, according to parliamentary returns, in 1844, was 11,127, and the number of glebe-houses 5527; these are exclusive of bishoprics, deaneries, canonries, prebendaries, priest-vicars, lay-vicars, secondaries, and similar church preferments. The number of parishes is 11,077, and of churches and chapels about 14,100. The number of benefices in Ireland was 1495, to which there were not more than about 900 glebe-houses attached, the rest having no glebe-houses. An act was passed in 1860 for the union of contiguous benefices. See *Church of England*.

BENEFIT SOCIETIES. See *Friendly Societies*.

BENEFIT OF CLERGY, *Privilegium Clericale*, arose in the regard paid by Christian princes to the church, and consisted of: 1st, an exemption of places consecrated to religious duties from criminal arrests, which was the foundation of sanctuaries; 2nd, exemption of the persons of clergymen from criminal process before the secular judge, in particular cases, which was the original meaning of the *privilegium clericale*. In the course of time, however, the *benefit of clergy* extended to every one who could read, which was thought a great proof of learning; and it was enacted, that there should be a prerogative allowed to the clergy, that if any man who could read were to be condemned to death, the bishop of the diocese might, if he would, claim him as a clerk, and dispose of him in some places of the clergy as he might deem meet. The ordinary gave the prisoner at the bar a Latin book, in a black Gothic character, from which to read a verse or two; and if the ordinary said, "*Legit ut Clericus*," "He reads like a clerk," the offender was only burnt in the hand; otherwise he suffered death, 3 Edw. I. 1274. This privilege was restricted by Henry VII. in 1489, and abolished with respect to murderers and other great criminals, by Henry VIII. 1512. *Stow*. The reading was discontinued by 5 Anne, c. 6. 1706. Benefit of clergy was wholly repealed by statute 7 & 8 Geo. IV. c. 28. 1827.

BENEVENTO, an ancient city in South Italy, said to have been founded by Diomedes the Greek, after the fall of Troy. Near it was erected the triumphal arch of Trajan, A.D. 114. Benevento was formed into a duchy by the Lombards, A.D. 571. At a battle fought here, Feb. 26, 1266, Manfred, king of Sicily, was defeated and slain by Charles of Anjou, who thus became virtually master of Italy. The castle was built 1323; the town was nearly

destroyed by an earthquake, 1688, when the archbishop, afterwards pope Benedict XIII., was dug out of the ruins alive, and contributed to its subsequent rebuilding again, 1703. It was seized by the king of Naples, but restored to the pope on the suppression of the Jesuits, 1773. Talleyrand de Périgord, Bonaparte's arch-chancellor, had the title of prince of Benevento conferred upon him. Benevento was restored to the pope in 1814.

BENEVOLENCES (Aids, Free Gifts, or Forced Loans) appear to have been claimed by our Anglo-Saxon sovereigns. Special ones were levied by Edward IV. 1473, by Richard III. 1485 (although a statute forbidding them was enacted in 1484), by Henry VII. 1492; and by James I. in 1613, on occasion of the marriage of the princess Elizabeth with the king of Bohemia. In 1615 Oliver St. John, M.P., was fined 500*l.*, and chief justice Coke disgraced, for severely censuring such modes of raising money. Benevolences were declared illegal by the bill of rights, Feb. 1689.

BENGAL, the chief presidency of British India, containing Calcutta, the capital. It was ruled by governors delegated by the sovereigns of Delhi, till 1340, when it became independent. It was added to the Mogul empire by Baber, about 1529. See *India* and *Calcutta*.

The English were first permitted to trade to Bengal	A.D. 1534	India Bill; Bengal made the chief presidency	June 16, 1773
Factories of the French and Danes	1664	Supreme court established	June 16, —
Bengal made a distinct agency	1680	Courts of judicature erected for civil causes	Feb. 11, 1793

		Railway opened	Aug. 15, 1854

See *India*.

BENZOLE, a compound of hydrogen and carbon, discovered by Faraday in oils (1825), and by C. B. Mansfield in coal tar (1849), the latter of whom unfortunately died in consequence of being severely burnt while experimenting on it (Feb. 25, 1855). Benzole has become useful in the arts. Chemical research has produced from it *aniline* (*which see*), the source of the celebrated modern dyes, mauve, magenta, &c.

BEOWULF, an ancient Anglo-Saxon epic poem, describing events which probably occurred in the middle of the 5th century A.D., and supposed to have been written subsequent to 597. An edition by Kemble was published in 1833. It has been translated by Kemble, Thorpe, and Wackerbath.

BERBICE, in British Guiana, surrendered to the British by the Dutch, April 23, 1796, and again Sept. 22, 1803. It was finally ceded to England in 1814; since when it has much improved, and has been placed in the same relation to trade as the British West India Islands in 1816. See *Colonies*.

BERESINA, a river in Russia, crossed by the French main army after its defeat by the Russians, Nov. 25-29, 1812. The French lost upwards of 20,000 men, and their retreat was attended by great calamity and suffering.

BERGEN (in Germany), **BATTLE OF**, between the French and allies, the latter defeated, April 13, 1759.—(In *HOLLAND*) The allies under the duke of York were defeated by the French, under gen. Brune, with great loss, Sept. 19, 1799. In another battle, fought Oct. 2, same year, the allies lost 4000 men; and, on the 6th, they were again defeated before Alkmaar, losing 5000 men. On the 20th, the duke of York entered into a convention, by which he exchanged his army for 6000 French and Dutch prisoners in England.

BERGEN-OP-ZOOM, in Holland. This place, whose works were deemed impregnable, was taken by the French, Sept. 16, 1747, and again in 1794. An attempt made by the British, under general sir T. Graham (afterwards lord Lynedoch), to carry the fortress by storm, was defeated; after forcing an entrance, their retreat was cut off, and a dreadful slaughter ensued; nearly all were cut to pieces or made prisoners, March 8, 1814.

BERKELEY CASTLE, Gloucestershire, was begun by Henry I. in 1108, and finished in the next reign. Here Edward II. was cruelly murdered by the contrivance of his queen Isabella (a princess of France) and her paramour, Mortimer, earl of March, Sept. 21, 1327. Mortimer was hanged at the Elms, near London, Nov. 29, 1330; and Edward III. confined his mother in her own house at Castle Rising, near Lynn, in Norfolk, till her death.

BERLIN (capital of Prussia, in the province of Brandenburg), was founded by the margrave Albert, surnamed the Bear, about 1163. Its five districts were united under one magistracy, in 1714; and it was subsequently made the capital of Prussia. It was taken by an army of Russians, Austrians, and Saxons, in 1760; but they were obliged to retire in a few days. On Oct. 27, 1806, thirteen days after the battle of Jena, the French entered Berlin; and from its place Napoleon issued the famous Berlin decree or interdict against

the commerce of England. It declared the British islands to be in a state of blockade, and ordered all Englishmen found in countries occupied by French troops to be treated as prisoners of war. On Nov. 5, 1808, Napoleon entered into a convention with Prussia, by which he remitted to Prussia the sum due on the war-debt, and withdrew many of his troops to reinforce his armies in Spain. An insurrection commenced here in March 1848. Berlin was declared in a state of siege, Nov. 1848. The continuation of this state of siege was declared to be illegal without its concurrence by the lower chamber, April 25, 1849. The railway to Magdeburg was opened, Sept. 10, 1841. The first constituent assembly was held here on June 21, 1842.

BERMUDAS, OR SOMERS' ISLES, a group in the North Atlantic ocean, discovered by João Bermudas, a Spaniard, in 1522 or 1527, but not inhabited until 1609, when sir George Somers was cast away upon them. They were settled by a statute of James I. 1612. Among the exiles from England during the civil war, was Waller, the poet, who wrote, while resident here, a poetical description of the islands. There was an awful hurricane here, Oct. 31, 1780, and another, by which a third of the houses was destroyed, and all the shipping driven ashore, July 20, 1813.

BERNAL COLLECTION of articles of taste and virtue, formed by Ralph Bernal, Esq., many years chairman of committees of ways and means in the house of commons. He died Aug. 26, 1854. The sale in March, 1856, lasted 31 days; and enormous prices were given. The total sum realised was 62,680*l.* 6*s.* 8*d.*

BERNARD, MOUNT ST., so called from a monastery founded on it by Bernardine Menthon in 962. Velan, its highest peak, is about 8000 feet high, covered with perpetual snow. Hannibal, it is said, conducted the Carthaginian army by this pass into Italy (218 B.C.); and it was by the same route, in May, 1800, that Bonaparte led his troops to the plains of Lombardy, before the battle of Marengo, fought June 14, 1800. On the summit of Great St. Bernard is a large community of monks, who entertain travellers in their convent.

BERNARDINES, a strict order of Cistercian monks, established by St. Bernard, of Clairvaux, about 1115. He founded seventy-two monasteries.

BERNE, a town in Switzerland, founded in A.D. 1191; joined the Swiss League 1353; surrendered to the French under general Brune, April 12, 1798. The town has bears for its arms, and some of these animals are still maintained on funds specially provided for the purpose.

BERSAGLIERI, the sharpshooters of the Sardinian army, first employed about 1848.

BERWICK-ON-TWEED, a fortified town on the north-east extremity of England. It has been the theatre of many bloody contests between the English and Scots: and while England and Scotland remained two kingdoms, was always claimed by the Scots as belonging to them, because it stood on their side of the river. It was taken from the Scots, and annexed to England in 1333; and after having been taken and retaken many times, was finally ceded to England in 1482. In 1551 it was made independent of both kingdoms. The town surrendered to Cromwell in 1648, and afterwards to general Monk in 1659. Since the union of the crowns (James I. 1603), the fortifications, which were formerly very strong, have been much neglected. The corruption of its electors was exposed in 1860.

BESSARABIA, a frontier province of European Russia, part of the ancient Dacia. After being possessed by the Goths, Huns, &c., it was conquered by the Turks in 1484, by whom it was ceded to Russia in 1812.

BETHLEHEM, Syria, now contains a large convent, enclosing, as is said, the very birth-place of Christ; a church, erected by the famous St. Helena, in the form of a cross; a chapel, called the Chapel of the Nativity, where they pretend to show the manger in which Christ was laid; another, called the Chapel of Joseph; and a third, of the Holy Innocents. Bethlehem is much visited by pilgrims.—The Bethlehemite monks existed in England in 1257.

BETHLEHEM HOSPITAL (so called from having been originally the hospital of St. Mary of Bethlehem), a royal foundation for the reception of lunatics, incorporated by Henry VIII. in 1546. The old Bethlehem Hospital, which was erected in 1675, on the east side of Moorfields, was pulled down in 1814. It was built in imitation of the Tuileries at Paris; this gave so much offence to Louis XIV., that he ordered a plan of St. James's palace to be taken for offices of a very inferior nature. The present hospital in St. George's fields was begun April, 1812, and opened in 1815. In 1856 extensive improvements were completed under the direction of Mr. Sydney Smirke, costing between nine and ten thousand pounds.

BETTING-HOUSES. These establishments affording much temptation to gaming, and consequent dishonesty, in the lower classes, were suppressed by an act passed Aug. 10, 1853 (16 & 17 Vict. c. 119), a penalty of 100*l.* being enforced on the owners or occupiers.

BEYROUT (the ancient *Berytus*), a seaport of Syria, colonised from Sidon. It was destroyed by an earthquake, A.D. 566; was rebuilt, and was alternately possessed by the Christians and Saracens; and after a frequent change of masters, fell into the power of Amurath IV., since when it remained with the Ottoman empire up to the revolt of Ibrahim Pacha, in 1832. The total defeat of the Egyptian army by the allied British, Turkish, and Austrian forces, and evacuation of Beyrout (the Egyptians losing 7000 in killed, wounded, and prisoners, and twenty pieces of cannon), took place Oct. 10, 1840. Sir C. Napier was the English admiral engaged. Beyrout suffered greatly in consequence of the massacres in Syria in May 1860. In Nov. 1860 above 27,000 persons were said to be in danger of starving. See *Syria*.

BHURTPORE, India, capital of the state of Bhurtpore, was besieged by the British, Jan. 3, 1805, and attacked five times up to March 21, without success. The fortress was taken by general Lake, after a desperate engagement with Holkar, the Mahratta chief, April 2, 1805. The defeat of Holkar led to a treaty, by which the rajah of Bhurtpore agreed to pay twenty lacs of rupees, and ceded the territories that had been granted to him by a former treaty, delivering up his son as hostage, April 17, 1805. On the rajah's death, during a revolt against his son, Bhurtpore was taken by storm, by lord Combermere, Jan. 18, 1826. See *India*.

BIANCHI (Whites), a political party at Florence, in favour of the Ghibelines or imperial party, headed by Vieri de' Cerchi, opposed to the Neri (or Blacks), headed by Corso de' Donati. The latter expelled their opponents, among whom was the poet Dante, in 1301.

BIARCHY. When Aristodemus, king of Sparta, died, he left two sons, twins, Eurysthenes and Procles; and the people not knowing to whom precedence should be given, placed both upon the throne, and thus established the first biarchy, 1102 B.C. The descendants of each reigned alternately for 800 years. *Herodotus*.

BIBERACH, Wurtemberg. Here Moreau twice defeated the Austrians,—under Latour, Oct. 10, 1796, and under Kray, May 9, 1800.

BIBLE (from the Greek *biblos*, a book) the name especially given to the Holy Scriptures. The Old Testament is said to have been collected and arranged by Ezra between 453 and 450 B.C. The Apocrypha are considered as inspired writings by the Roman Catholics, but not by the Jews and Protestants. See *Apocrypha*.

The most ancient copy of the *Hebrew* Scriptures existed at Toledo, called the Codex of Hillel; it was of very early date, probably of the 4th century after Christ, some say about 60 years before Christ. The copy of Ben Asher, of Jerusalem, was made about 1100.

The oldest copy of the Old and New Testament in *Greek*, is that in the Vatican, which was written in the 4th or 5th century, and published in 1586. The next in age is the Alexandrian Codex (referred to the 5th century) in the British Museum, pre-

sented by the Greek patriarch to Charles I. in 1628 and said to have been copied about the same time. It has been printed in England, edited by Woide and Baber, 1786—1821.—Codex Ephraemi, or Codex Regius, ascribed to the 5th century, in the Royal Library, Paris: published by Tischendorf in 1843.

The *Hebrew* Psalter was printed at Bologna in 1477. The complete *Hebrew* Bible was first printed by Soncino in Italy in 1488, and the *Greek* Testament (edited by Erasmus) at Rotterdam, in 1516. Aldus's

* The division into *chapters* has been ascribed to archbishop Lanfranc in the 11th and to archbishop Langton in the 13th century; but T. Hartwell Horne considers the real author to have been cardinal Hugo de Sancto Caro, about the middle of the 13th century. The division into *verses* was commenced by Rabbi Nathan (author of a Concordance), about 1445, and completed by Athras, a Jew, in 1661. Robert Stephens introduced verses into his *Greek* Testament published in 1551.

BIBLE, *continued.*

edition was printed in 1518; Stephens' in 1546; and the *textus receptus* (or received text) by the Elzevirs in 1624.

TRANSLATIONS.

The oldest translation of the Scriptures (into Greek) is the Alexandrian or Septuagint (*which see*), generally considered to have been made by order of Ptolemy Philadelphus, king of Egypt, about 286 or 285 B.C.; but of which many fabulous accounts are given.

Origen, after spending twenty-eight years in collating MSS., commenced his polyglot Bible at Caesarea in A.D. 231; it contained the Greek versions of Aquila, Symmachus, and Theodotion, all made in or about the second century after Christ. The following are ancient versions:—Syriac, 1st or 2nd century; the old Latin version, early in the 2nd century, revised by Jerome, in 384; who, however, completed a new version in 405, now called the *Vulgate*, *which see*; the first edition was printed in 1469;—Coptic, 2nd or 3rd century; Ethiopic; Armenian, 4th or 5th century; Slavonic, 9th century; and the Mass-Gothic, by Ulfilas, about 370; a manuscript copy of which, called the *Codex Argenteus*, is at Upsal. The Psalms were translated into Saxon by bishop Aldhelm, about 706; and the Gospels by bishop Egbert, about 721; the whole Bible by Bede, in the 10th century.

ENGLISH VERSIONS AND EDITIONS.*

MS. paraphrase of the whole Bible at the Bodleian Library, Oxford, dated by Usher . . . 1290
Versions (from the Vulgate) by Wicliffe and his followers about . . . 1380
[First published by Lewis, 1731; by Baber, 1810; the whole by Madden and Forshall, 1850.]
William Tyndale's version of Matthew and Mark from the Greek, 1524; of the whole New Testament . . . 1525 or 1526
Miles Coverdale's version of the whole Bible . . . 1533
[Ordered by Henry VIII. to be laid in the choir of every church, "for every man that would to look and read therein."]
T. Matthews' (fictitious name for John Rogers') version (partly by Tyndale and Coverdale) . . . 1537
Cranmer's Great Bible (Matthews' revised) . . . 1539
Geneva version (the first with figured verses) . . . 1540—1557
Archbishop Parker's, called "The Bishop's Bible" (eight of the fourteen persons employed being bishops) . . . 1568
King James' Bible, the present authorised version—Translation began 1604; published . . . 1611
Roman Catholic authorised version; New Testament, at Rheims, 1582; Old Testament, at Douay . . . 1609-10
Dr. Benjamin Blayney's revised edition . . . 1769
Authorised Jewish English version . . . 1851-61

The British and Foreign Bible Society continue to make and print translations of the Bible in all the dialects of the world. See *Polyglot*.

BIBLE DICTIONARIES. The most remarkable are Calmet's "Dictionary of the Bible," 1722-8; Kitto's "Cyclopædia of Biblical Literature," 1843; and Smith's "Dictionary of the Bible," 1860.

BIBLE SOCIETIES. Among the principal and oldest societies which have made the dissemination of the Scriptures a collateral or an exclusive object are the following:—The Society for Promoting Christian Knowledge was formed 1698; Society for Propagating the Gospel in Foreign Parts, 1701; Society in Scotland, for Promoting Christian Knowledge, 1709; Society for Promoting Religious Knowledge among the Poor, 1750; Naval and Military Bible Society, 1780; Sunday School Society, 1785; French Bible Society, 1792; British and Foreign Bible Society, 1804; Hibernian Bible Society, 1806; City of London Auxiliary Bible Society, 1812. A bull from the pope against Bible Societies appeared in 1817.

BIBLIA PAUPERUM (the Bible for the Poor, consisting of engravings illustrating scripture history, with texts, carved in wood), a block book printed early in the 15th century, was compiled by Bonaventura, general of the Franciscans, about 1260. A fac-simile was published by J. Russell Smith in 1859.

BIBLIOGRAPHY, the Science of Books. Gesner's "Bibliotheca Universale" appeared in 1545; and De Bure's "Bibliographie Instructive" in 1763. The following works on this subject are highly esteemed: Peignot, Manuel, 1823; Horne, Introduction to the Study of Bibliography, 1814; *Scriptural*, Ormè, Bibliotheca Biblica, 1824; Darling, Cyclopædia Bibliographica, 1854-8; *Classical*, the works of Fabricius, Clarke, and Diblin; *English*, Watts' Bibliotheca Britannica, 1824; Lowndes, Manual, 1834 (new edition by Behn, 1857-62); *French*, Querard, 1828 et seq. Brunet's Manuel du Libraire (first published in 1810), is exceedingly valuable: a new edition (the 5th) is now publishing, 1862.

* "The Bible of every Land," ed. 1860, published by Messrs. Bagsters, London, is full of information respecting ancient and modern versions of the Bible.

† He was strangled at Antwerp in 1536, at the instigation of Henry VIII. and his council. His last words were, "Lord, open the king of England's eyes!" 14 editions of his Testament had then been published.

‡ At the end of 1850 this society had issued 24,247,667 copies of the Bible. In 1857 they published a catalogue of their library, which contains a large number of remarkable editions of the Bible.

BIBLIOMANIA (or book-madness) prevailed in 1811, when Dr. Dibdin's work with this title was published. See *Boccaccio*.

BIDASSOA. The allied army under lord Wellington, having driven the French from Spain, effected the passage of this river, Oct. 8, 1813, and entered France, where was fought the crowning battle of the campaign.

BIDDENDEN MAIDS. A distribution of bread and cheese to the poor takes place at Biddenden, Kent, on Easter Sundays, the expense being defrayed from the rental of twenty acres of land, the reputed bequest of the Biddenden maids, two sisters named Chalkhurst, who, tradition states, were born joined together by the hips and shoulders, in A.D. 1100; and having lived in that state to the age of thirty-four, died within six hours of each other. Cakes bearing a corresponding impression of the figures of two females, are given on Easter-day to all who ask for them. Hasted deems this tale fabulous, and states that the print on the cakes is of modern origin, and that the land was given by two maiden ladies named Preston. See *Siamese Twins*.

BIGAMY. The Romans branded the guilty party with an infamous mark; with us, the punishment of this offence, formerly, was death. The first act respecting it was passed 5 Edw. I. 1276. *Vinor's Statutes*. Declared to be felony, without benefit of clergy, 1 James I. 1603. Subjected to the same punishments as grand or petit larceny, 35 Geo. III. 1794. Now punished, according to circumstances, by imprisonment or transportation.

BILBOA, N.E. Spain, was taken by the French in 1795. This place, which had been invested by the Carlists under Villareal, and was in considerable danger, was delivered by the defeat of the besiegers by Espartero, assisted by British naval co-operation, Dec. 24, 1836. Espartero entered Bilboa in triumph next day.

BILL OF EXCEPTIONS. The right of tendering to a judge upon a trial between parties a bill of exceptions to his charge, his definition of the law, or to remedy other errors of the court, was provided by the 2nd statute of Westminster, 13 Edw. I. 1284. Such bills are tendered to this day.

BILL OF PAINS, &c. See *Queen Caroline's Trial*. **BILL OF RIGHTS**, &c. See *Rights*.

BILLIARDS. Invented by the French, by whom, and by the Germans, Dutch, and Italians, they were brought into general vogue throughout Europe. *Nouv. Dict.* The French ascribe their invention to Henrique Devigne, an artist in the reign of Charles IX., about 1571. Slate billiard tables were introduced in England in 1827.

BILLINGSGATE, the celebrated market-place for fish, in London, is said to have derived its name from Belinus Magnus, a British prince, the father of king Lud, 400 B.C., but Stow thinks from a former owner. *Mortimer*. It was the old port of London, and the customs were paid here under Ethelred II. 979. *Stow*. Billingsgate was made a perfect free market, 1669. *Chamberlain*. Fish by land-carriage, as well as seaborne, now arrives daily here. In 1849, the market was very greatly extended and improved, and is now well cleaned, lighted, and ventilated.

BILLS OF EXCHANGE were invented by the Jews as a means of removing their property from nations where they were persecuted A.D. 1160. *Anderson*. Bills were used in England, 1307. The only legal mode of sending money from England, 4 Richard II. 1381. Regulated, 1698; first stamped, 1782; duty advanced, 1797, again, June, 1801; and since. It was made capital to counterfeit bills of exchange in 1734. In 1825, the year of disastrous speculations in bubbles, it was computed that there were 400 millions of pounds sterling represented by bills of exchange and promissory notes. The present amount is not supposed to exceed 50 millions. The many statutes regarding bills of exchange were consolidated by act 9 Geo. IV.; 1828. An act regulating bills of exchange passed 3 Vict. July, 1839. Great alterations were made in the law on the subject by 17 & 18 Vict. c. 83 (1854), and 18 & 19 Vict. c. 67 (1855).

BILLS OF MORTALITY FOR LONDON. These bills were first compiled, by order of Cromwell, about A.D. 1538, 30 Hen. VIII., but in a more formal and recognised manner in 1603, after the great plague of that year. No complete series of them has been preserved, They are now superseded by the weekly returns of the registrar-general. The following show the numbers at decennial periods:—

BINARY ARITHMETIC, that which counts by twos, for expeditiously ascertaining the property of numbers, and constructing tables, was invented by Baron Leibnitz of Leipsic, the celebrated statesman, philosopher, and poet, A.D. 1694. *Moreri*.

BINOMIAL ROOT, in Algebra, composed of only two parts connected with the signs *plus* or *minus*; a term first used by Recorda, about A.D. 1550, when he published his Algebra. The celebrated *binomial theorem* of Newton was first mentioned in 1688. *Hutton*.

BIOGRAPHY (from the Greek *bios*, life, and *graphō*, I write), defined, as history teaching by example. The book of *Genesis* contains the biography of the patriarchs; and the Gospels, that of Christ. Plutarch wrote the Lives of Illustrious Men; Cornelius Nepos, Lives of Military Commanders; and Suetonius, Lives of the Twelve Cæsars (all three in the first century after Christ); Diogenes Laërtius, Lives of the Philosophers (about A.D. 205).—Boswell's Life of Johnson (published in 1790) is the most remarkable English biography of modern times.

BIRCH TREE. The black (*Betula nigra*), brought from North America, 1736. The birch tree known as the *Betula pumila*, introduced into Kew-gardens, England, by Mr. James Gordon, from North America, 1762. The tree known as the *Birch* is now largely cultivated in all the countries of Europe. *Hardy's Annals*.

BIRDS were divided by Linnæus into six orders (1735); by Blumenbach, into eight (1805); and by Cuvier, into six (1817). The most remarkable works on birds are those now publishing by John Gould, F.R.S.; they are to consist of about 31 folio volumes of coloured plates, &c. Each set bound will cost about 500l. "The Ibis," a journal devoted to ornithology, edited by Mr. Selater, secretary of the Zoological Society, began in 1859.

BIRKENHEAD, Cheshire, a prosperous modern town on the Mersey, immediately opposite to Liverpool. The great dock here was projected by Mr. John Laird, constructed by Mr. Rendell, and opened in Aug. 1847 by lord Morpeth. In 1861 Birkenhead was made a parliamentary borough, and Mr. Laird was elected first representative.

BIRKENHEAD. The troop-ship Birkenhead, iron paddle-wheeled, and of 556 horse-power, sailed from Queenstown, January 7, 1852, for the Cape, having on board detachments of the 12th Lancers, 2nd, 6th, 12th, 43rd, 45th, and 60th Rifles, 73rd, 74th, and 91st regiments. It struck upon a pointed pinnacle rock off Simon's bay, South Africa, and of 638 persons, only 184 were saved by the boats; 454 of the crew and soldiers perished by drowning; some of them, perhaps, swallowed by sharks that were seen swimming around; Feb. 26, following. The rock broke through into the engine-room, and literally rent the ship in two.

BIRMAN EMPIRE, OR EMPIRE OF AVA. See *Burmese Empire and India*.

BIRMINGHAM, Warwickshire. This town existed in the reign of Alfred, A.D. 872; it belonged to the Bermenghams, at Domesday survey, 1086. There were "many mythes" here in the time of Henry VIII. (*Leland*), but its great importance commenced in the reign of William III. It has been styled "the Toyshop of Europe."

Besieged and taken by prince Rupert . . .	1643	Political Union, headed by T. Attwood, formed,	
Button manufactures established . . .	1689	Feb. 1831

Theatre again burnt, 1817, and . . .	Jan. 7, 1820	Great political riot, firing of houses, and other outrages committed by the Chartists, July 15, 1839	

BIRMINGHAM, *continued.*

Town incorporated, and Police Act passed	1839	Death of G. F. Muntz, M.P.	July 30, 1857
Corn Exchange opened	Oct. 27, 1847	J. Bright elected M.P., Aug. 10, 1857, & April, 1859	
Queen's College organised	Jan. 1853	The Queen and Prince Consort visit Birmingham, Warwick, &c., for the first time, and open Aston Park, purchased by the corporation and workmen of Birmingham, June 14-16, 1858	
Public park opened (ground virtually given by Mr. Adderley)	Aug. 3, 1856	The Free Library opened	April 4, 1861
New music hall opened	Sept. 3, 1856	Dreadful factory explosion ; 9 killed and many injured	June 23, 1862
Another park opened by the duke of Cambridge, 100,000 persons present (ground given by lord Calthorpe).	June 1, 1857		

BIRTHS. The births of children were taxed in England, viz., birth of a duke 30*l.*, of a common person 2*s.*, 7 Will. III. 1695. Taxed again, 1783. The instances of four children at a birth are numerous ; but it is recorded that a woman of Königsberg had five children at a birth, Sept. 3, 1784, and that the wife of Nelson, a journeyman tailor, of Oxford-Market, London, had also five children at a birth, in October, 1800. See *Bills of Mortality and Registers*. The Queen presents a small sum of money to a poor woman giving birth to three or more children at one time.

BISHOPS (Greek *episcopoi*, overseers). The name was given by the Athenians to those who had the inspection of the city. The Jews and Romans had also like officers. The Bishop now is a person who has the government of church affairs in a certain district. St. Peter, styled the first bishop of Rome, was martyred A.D. 65. The episcopate became an object of contention about 144. The title of pope was anciently assumed by all bishops ; and was exclusively claimed by Gregory VII. (1073-85). In England, the dignity is coeval with the introduction of Christianity.

BISHOPS OF ENGLAND. See the *Sees severally*. The first is said to have been London, founded by Læius, king of Britain, 179. Bishops were made barons, 1072. The *Comté d'Elire* of the king to choose a bishop originated in an arrangement of king John. Bishops were elected by the king's *Comté d'Elire*, 25 Hen. VIII. 1534.* Seven were deprived for being married, 1554. Several suffered martyrdom under queen Mary, 1555-6. See *Cranmer*. Bishops were excluded from voting in the house of peers on temporal concerns, 16 Charles I. 1640. Several were committed for protesting against the legality of all acts of parliament passed while they remained deprived of their votes, Dec. 28, 1641 ; regained their seats, Nov. 1661. Seven were sent to the tower for not reading the king's declaration for liberty of conscience (intended to bring the Roman Catholics into ecclesiastical and civil power), June 8, 1688, and tried and acquitted June 29-30, following. The archbishop of Canterbury (Dr. Sancroft) and five bishops (Bath and Wells, Ely, Gloucester, Norwich, and Peterborough) were suspended for refusing to take the oaths to William and Mary, 1689, and deprived 1690. *Warner's Eccles. Hist.*

BISHOPS OF IRELAND. See the *Sees severally*. Bishops are said to have been consecrated in this country as early as the second century. The bishopric of Ossory, first planted at Saiger, was founded A.D. 402, thirty years before the arrival of St. Patrick. The bishopric of Trim has been named as the first by some writers, although not erected before the year 432. Prelacies were constituted, and divisions of the bishoprics in Ireland made, by cardinal Paparo, legate from pope Eugene III. 1151. Several prelates were deprived by queen Mary, 1554. One (Atherton) suffered death ignominiously, 1640. Two were deprived for not taking the oaths to William and Mary, 1691. One was deprived (Clogher) in 1822. The Church Temporalities Act, for reducing the number of bishops in Ireland, 3 &

* *Retirement of Bishops.* In 1856 the bishops of London and Durham retired on annuities. The new bishops hold their sees subject to future provision. In 1857 the bishop of Norwich also resigned.

† An order in council, Oct. 1838, directed the sees of Bangor and St. Asaph to be united on the next vacancy in either, and Manchester, a new see, to be created thereupon : this order, as regarded the union of the sees, was rescinded 1846.

‡ The sees of Bristol and Gloucester were united, 1836.

4 Will. IV. c. 37, passed Aug. 14, 1833. By this statute, of the four archbishoprics of Armagh, Dublin, Tuam, and Cashel, the last two were to be abolished on the decease of the then archbishops which has since occurred; and it was enacted that eight of the then eighteen bishoprics should, as they became void, be henceforth united to other sees, which was accomplished in 1850: so that the Irish Church establishment at present consists of two archbishops and ten bishops.

BISHOPS OF SCOTLAND. They were constituted in the fourth century. The see of St. Andrew's was founded by Hergustus, king of the Picts, who, according to a legendary tale of this prelacy, encouraged the mission of Regulus, a Greek monk of Patræ, about A.D. 370. There were two archbishops and twelve bishops. Episcopacy was abolished in 1638; but restored by Charles II. 1661, which caused an insurrection. The bishops were deprived of their sees, and episcopacy again abolished in Scotland at the period of the revolution, 1689. There are now, however, seven bishops belonging to the Scotch Episcopal Church who are called post-revolution bishops.*

POST-REVOLUTION BISHOPRICS OF SCOTLAND.

Aberdeen, re-instituted	1721	Glasgow and Galloway, re-instituted	1731
Argyll and the Isles, ditto	1847	Moray and Ross ditto	1727
Brechin ditto	1731	St. Andrew's (late Fife) ditto	1733
Edinburgh ditto	1720		

BISHOPS, COLONIAL. The first was the right rev. doctor Samuel Seabury, consecrated bishop of Connecticut by four nonjuring prelates, at Aberdeen, in Scotland, November 14, 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, Feb. 4, 1787, and the bishop of Virginia in 1790. The first *Roman Catholic* bishop of the United States was Dr. Carroll of Maryland, in 1789. By 15 & 16 Vict. c. 52, and 16 & 17 Vict. c. 49, the colonial bishops may perform all episcopal functions in the United Kingdom, but have no jurisdiction. The following Protestant colonial bishoprics have since been established.

Nova Scotia	1787	Gibraltar	1841	Newcastle	1847	Perth	1856
Quebec	1793	New Zealand	1841	Sydney (formerly		Brisbane	1859

BISHOPS, PRECEDENCY OF, was settled by statute 31 Hen. VIII. to be next to viscounts, they being barons of the realm, 1540; and they have the title of *Lord and Right Rev. Father in God*. The archbishops of Canterbury and York, taking place of all dukes, have the title of *Grace*. The bishops of London, Durham, and Winchester have precedence of all bishops; the others rank according to seniority of consecration.

BISMUTH was recognised as a distinct metal by Agricola, in 1529. It is very fusible and brittle, and of a yellowish white colour.

BISSEXTILE. See *Calendar and Leap Year*.

BITHYNIA, a province in Asia Minor, previously called *Bebricia*, is said to have been invaded by the Thracians under Bithynus, son of Jupiter, who gave it the name of Bithynia. It was subject successively to the Assyrians, Lydians, Persians, and Macedonians. Most of the cities were built by Grecian colonists. The first king of whom we have any knowledge is Dydalsus, who, in the reign of Artaxerxes Mnemon, made himself independent.*

Dydalsus reigns about	B.C. 430—440	Zipetas, son of Bias, resists Lysimachus	B.C. 326

* Bishop Rose connected the established episcopal church of Scotland with that form of it which is now merely tolerated, he having been bishop of Edinburgh from 1687 till 1720, when, on his death, Dr. Fullarton became the first post-revolution bishop of that see. Fife (now St. Andrew's, so called in 1844) now unites the bishopric of Dunkeld (re-instituted in 1727) and that of Dumblane (re-instituted in 1731). Ross (of uncertain date) was united to Moray (re-instituted in 1727) in 1838. Argyll and the Isles never existed independently until 1847, having been conjoined to Moray and Ross, or to Ross alone, previously to that year. Galloway has been added to the see of Glasgow.

BLACK BOOK* (*Liber Niger*), a book kept in the exchequer, which received the orders of that court. It was published by Hearn in 1728.

BLACKBURN, Lancashire, so called in Domesday-book. The manufacture of a cloth called Blackburn cheque, carried on in 1650, was superseded by Blackburn greys. In 1767, James Hargreaves, of this town, invented the spinning-jenny, for which he was eventually expelled from the county. About 1810 or 1812, the townspeople availed themselves of his discoveries, and engaged largely in the cotton manufacture, now their staple trade.

BLACK DEATH. See *Plagues*, 1340.

BLACK FRIARS. See *Dominican*.

BLACKFRIARS BRIDGE, London. The first stone of this bridge was laid Oct. 31, 1760, and it was completed by Mylne, in 1770, though for some time previously made passable. It was the first work of the kind executed in England, in which arches, approaching to the form of an-ellipsis, were substituted for semicircles. It is about a thousand feet in length and forty-five wide. It was partially repaired in 1834; but the thorough repair of its arches and piers was commenced in 1837, and completed Oct. 1, 1840, when it was re-opened. Since 1850 the bridge has been gradually sinking, and Mr. J. Cubitt's design for a new bridge was accepted by the city authorities in July 1862.

BLACKHEATH, near London. Here Wat Tyler and his followers assembled in 1381; and here also Jack Cade and his 20,000 Kentish men encamped, 1451. See *Tyler and Cade*. Battle of Blackheath, in which the Cornish rebels were defeated and Flannoc's insurrection quelled, June 22, 1497. The cavern, on the ascent to Blackheath, the retreat of Cade, and the haunt of banditti in the time of Cromwell, was re-discovered in 1780.

BLACK-HOLE, at Calcutta. On June 18, 1756, 146 British gentlemen, merchants, and others, in the service of the East India Company, were seized by order of the nabob, Surajah Dowlah, and thrust into a dungeon, called the "Black-hole," in the fort by his soldiers. These latter saw that the place was too small for such a number, but were afraid to awaken the sleeping nabob for further orders. One hundred and twenty-three of the sufferers died before morning, having been suffocated by the heat and stench of a dungeon only eighteen feet square. Calcutta was retaken next year, and the nabob was deposed and put to death by his successor. *Holwell's India Tracts*.

BLACK LEAD. See *Graphite*.

BLACK LETTER, or **GOTHIC LETTER**, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469; Pliny's Natural History being then printed in the new characters.

BLACK-MAIL, a compulsory payment made in parts of Scotland by the lowlanders to the highlanders, for the protection of their cattle, existed till within a few months of the outbreak of the rebellion in 1745. It rendered agricultural improvement impossible.

BLACK MONDAY, Easter Monday, 1351, "when the hailstones are said to have killed both men and horses, in the army of our king Edward III. in France." *Bailey*. "This was a memorable Easter Monday, which in the 34th of Edward III. happened to be full dark of mist and hail, and so cold that many men died on their horses' backs with the cold," 1351. *Stow*. In Ireland, Black Monday was the day on which a number of the English were slaughtered at a village near Dublin, in 1209.

* A book was kept in the English monasteries, wherein details of the scandalous enormities practised in religious houses were entered for the inspection of visitors, under Henry VIII. 1535, in order to blacken them and hasten their dissolution: hence possibly the phrase, "I'll set you down in the black book."

BLACK ROD. The usher belonging to the order of the Garter is so called from the *black rod* he carries in his hand. *Concel.* It has a gold lion at the top, and is carried by the king's chief gentleman usher, instead of the mace, at the feast of St. George at Windsor, instituted A.D. 1349. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords.

BLACK SEA, THE EUXINE (Pontus Euxinus of the Ancients), a large internal sea lying between the S.W. provinces of Russia and Asia Minor, connected with the sea of Azoff by the straits of Yenikalé, and with the sea of Marmora by the channel of Constantinople. This sea was much frequented by the Greeks and Italians, till it was closed to all nations by the Turks after the fall of Constantinople in 1453. The Russians obtained admission by the treaty of Kainardji, in 1774. In 1779 it was partially opened to British and other traders, since which time the Russians gradually obtained the preponderance. It was entered by the British and French fleets, Jan. 3, 1854, at the requisition of the Porte, after the destruction of the Turkish fleet at Sinope by the Russians, Nov. 30, 1853. A dreadful storm in this sea raged from Nov. 13 to 16, 1854, and caused great loss of life and shipping, and valuable stores for the allied armies. See *Russo-Turkish War.*—The Black Sea is now open to the commerce of all nations.

BLACKWALL, London. The site of the finest commercial docks and warehouses in the world. See *Docks*. The Blackwall railway was opened to the public, July 4, 1840; the eastern terminus being at Blackwall wharf, and the western in Fenchurch-street.

BLACK WATCH, armed companies of the loyal clans (Campbells, Monros, &c.) employed to watch the Highlands from about 1725 to 1739, when they were formed into the celebrated 42nd regiment. Their removal probably facilitated the outbreak in 1745. They wore dark tartans, and hence were called *Black Watch*.

BLACKWATER, BATTLE OF, in Ireland, Aug. 14, 1598, when the Irish chief O'Neal defeated the English under sir Edward Bagnal. Pope Clement VIII. sent O'Neal a consecrated plume, and granted to his followers the same indulgence as to crusaders.

BLANKETEERS, the term applied to a number of operatives who on March 30, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. The repressive legislation of the time led to the disturbances at Derby and elsewhere. See *Derby*. Eventually the ring-leaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKETS are said to have been first made at Bristol by T. Blanket, about 1705.

BLASPHEMY was punished with death by the law of Moses (*Lev. xxiv. 1491 B.C.*); and by the code of Justinian, A.D. 529. It is condemned both by the civil and canon law of England. In Scotland the blasphemer's tongue was cut out; he was punished with fine and imprisonment, by law, 1696-7. Daniel Isaac Eaton was tried and convicted in London of blasphemy, March 6, 1812. A protestant clergyman, named Robert Taylor, was tried in London twice for the same crime, and as often convicted. Taylor was last brought to the bar, and sentenced to two years' imprisonment, and largely fined, for (amongst other things) in his discourses reviling the Redeemer, July, 1831. Even as late as Dec. 1840, two prosecutions against publishers of blasphemous writings, subjected the offenders to the sentence of the court of Queen's Bench.

BLAZONRY. The bearing coats-of-arms was introduced, and became hereditary in families in France and England, about A.D. 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. *Dugdale.*

BLEACHING. This art was known early in Egypt, Syria, and India, and in ancient Gaul. *Pliny.* An improved chemical system was adopted by the Dutch, who introduced it into England and Scotland in 1768. There are now immense bleach-fields in both countries, particularly in Lancashire and in the counties of Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dumbarton. The application of the gas chlorine to bleaching is due to Berthollet about 1785. Its combination with lime (as chloride of lime) was devised by Mr. Tennant, of Glasgow, who took out a patent for the process in 1798, and by his firm it is still extensively manufactured. In 1822 Dr. Ure published an elaborate series of experiments on this substance. In 1860 bleaching and dyeing works were placed under the regulations of the Factories' Act.

BLLENHEIM, or Blindheim, in Bavaria, the site of a battle fought Aug. 2 (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria, whom Marlborough signally defeated, with the loss of 27,000 in killed, and 13,000 prisoners, Tallard being among the latter: the electorate of Bavaria became the prize of the conquerors. The British nation testified its gratitude to the duke by the gifts of the honour of Woodstock and hundred of Wotton, and erected for him one of the finest seats in the kingdom, known as the domain and house of Blenheim.*

BLIND. By the census of 1851, there were in Great Britain, 21,487 blind persons, 11,273 males; 10,214 females: about one blind in 975. The first public school for the blind was established by Valentine Haüy, at Paris, in 1784. The first in England was at Liverpool in 1791; in Scotland, in Edinburgh, in 1792; and the first in London in 1799. Printing in raised or embossed characters for the use of the blind was begun at Paris by Haüy in 1786. The whole bible was printed at Glasgow in raised Roman characters about 1848. A sixpenny magazine for the blind, edited by the rev. W. Taylor, F.R.S., so eminent for his exertions on behalf of these sufferers, was published in 1855-6. There is hardly any department of human knowledge in which blind persons have not obtained distinction.† Laura Bridgman, born in 1829, became dumb and blind two years after: she was so well taught by Dr. Howe of Boston, U.S., as to become an able instructor of blind and dumb persons.

BLINDING, by consuming the eyeballs with lime or scalding vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. Blinding the conquered was a practice in barbarous states; and a whole army was deprived of their eyes, by Basilus, in the eleventh century. See *Bulgarians*. Several of the Eastern emperors had their eyes torn from their heads. See article *Eastern Empire*.

BLISTERS, used by Hippocrates (460-357 B.C.) made, it is said, of cantharides, *which see*.

BLOCK BOOKS. See *Printing*.

BLOCKADE of the Elbe, by Great Britain, 1803; of the Baltic, by Denmark, 1848-49; of the gulf of Finland, by the Allies, 1854. See *Orders in Council*, and *Berlin*.

BLOCKS employed in the rigging of ships were much improved in their construction by Mr. Taylor, in 1781. In 1801 Mark I. Brunel invented a mode of making blocks which was put into operation in 1808, and in 1815 was said to have saved the country 20,000l. a-year.

BLOOD. The circulation of the blood through the lungs was first made public by Michael Servetus, a Spanish physician, in 1553. Cæsalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, commonly called Father Paolo, whose real name was Peter Sarpi, certainly discovered the valves which serve for the circulation; but the honour of the positive discovery of the circulation of the blood belongs to our countryman, Harvey, by whom it was fully confirmed, between 1619 and 1628. *Preind's Hist. of Physic*.

EATING BLOOD was prohibited to Noah, *Gen. ix.*, to the Jews, *Lev. xvii.*, &c., and to the Gentile converts by the apostles at an assembly at Jerusalem, *A.D. 50, Acts xv.*

BLOOD-DRINKING was anciently tried to give vigour to the system. Louis XI., in his last illness, drank the warm blood of infants, in the vain hope of restoring his decayed strength, 1483. *Hénault*. In the fifteenth century an opinion prevailed that the declining vigour of the aged might be repaired by TRANSFUSING into their veins the blood of

young persons. It was countenanced in France by the physicians about 1668, and prevailed for many years, till the most fatal effects having ensued, it was suppressed by an edict. It was attempted again in France in 1797, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. *Med. Journ.* "One English physician named Lower, or Lower, practised in this way; he died in 1691." *Preind*.

BLOOD'S CONSPIRACY. Blood, a discarded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, and had got him to Tyburn, intending to hang him, when he was rescued by his friends, Dec. 4, 1670. Blood, afterwards, in the disguise of a clergyman, attempted to steal the regal crown from the Jewel-office in the Tower, May 9, 1671; yet notwithstanding these and other offences, he was not only

* On Feb. 5, 1861, a fire broke out at this place, which destroyed the "Titian Gallery" and the pictures; the latter, a present from Victor Amadeus, king of Sardinia, to John the great duke of Marlborough.

† James Holman, the "blind traveller" (born 1786, died 1857), visited almost every place of note in the world. His travels were published in 1825. In April, 1858, a blind clergyman, Rev. J. Sparrow, was elected chaplain to the Mercers' Company, London, and read the service, &c., from embossed books.

pardoned, but had a pension of 500*l.* per annum settled on him by Charles II. 1671. He died in 1680, in prison, for a libel on the duke of Buckingham.

BLOODY ASSIZES. Those held by Jeffreys in the west of England, in Aug. 1685, after the defeat of the duke of Monmouth in the battle of Sedgmore. Upward of 300 persons were executed after short trials; very many were whipped, imprisoned, and fined; and nearly 1000 were sent as slaves to the American plantations.

BLOOMER COSTUME. See a *note* to article *Dress*.

BLOOMSBURY GANG, a cant term applied to an influential political party in the reign of George III., in consequence of the then duke of Bedford, the chief, being the owner of Bloomsbury square, &c. The marquess of Stafford, the last survivor, died Oct. 26, 1803.

BLOREHEATH (Staffordshire), **BATTLE OF,** September 23, 1459, in which the earl of Salisbury and the Yorkists defeated the Lancastrians, whose leader, lord Audley, was slain with many Cheshire gentlemen. A cross commemorates this conflict.

BLOWING-MACHINES, the large cylinders, used in blowing-machines, were erected by Mr. Smeaton at the Carron iron works, 1760. One equal to the supply of air for forty forge fires was erected at the king's dock-yard, Woolwich. The hot-air blast, a most important improvement, was invented by Mr. James Neilson, of Glasgow, and patented in 1828.

BLOW-PIPE. The origin of this indispensable chemical apparatus is unknown. It was employed in mineralogy, by Andrew von Swab, a Swede, about 1733, and improved by Wollaston and others. In 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newman's improved blow-pipes, in 1816, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. The best work on the blow-pipe is by Plattner and Muspratt, 1854.

BLUE was the favourite colour of the Scotch covenanters in the 16th century. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "Edinburgh Review," first published in 1802. The Prussian Blue dye was discovered by Diesbach, at Berlin, in 1710.

BLUE-COAT SCHOOLS, so called in reference to the costume of the children. The Blue-coat school in Newgate-street, London, is regarded as the first charitable foundation of the kind in the world; it was instituted by Edward VI. in 1552. See *Christ's Hospital*,

BLUE-STOCKING, a term applied to literary ladies, was originally conferred on a society of literary persons of both sexes. Benjamin Stillingfleet, the distinguished naturalist, a most active member, always wore blue worsted stockings, and hence the name: the society existed in 1760 *et seq.* *Anecd. of Bowyer*. The beautiful and fascinating Mrs. Jerningham is said to have worn blue stockings at the *conversazioni* of lady Montagu.

BOARD OF ADMIRALTY, HEALTH, &c. See *Admiralty, Health, &c.*

BOARD OF CONTROL. Mr. Pitt's celebrated bill, establishing this board for the purpose of aiding and controlling the executive government of India, and of superintending the territorial concerns of the company, was passed 24 Geo. III. (May 18, 1784.) Act amended and the board remodelled 33 Geo. III. c. 52 (1793). The president of the board was a chief minister of the crown, and necessarily one of the members of the cabinet. This board was abolished in 1858, when the government of India was transferred from the company to the crown. See *India Bills*, and *India*.

BOARD OF TRADE AND PLANTATIONS. Cromwell seems to have given the first notions of a board of trade: in 1655 he appointed his son Richard, with many lords of his council, judges, and gentlemen, and about twenty merchants of London, York, Newcastle, Yarmouth, Dover, &c., to meet and consider by what means the trade and navigation of the republic might be best promoted. *Thomas's Notes of the Rolls*. Charles II., on his restoration, established a council of trade for keeping a control over the whole commerce of the nation, 1660; he afterwards instituted a board of trade and plantations, which was remodelled by William III. This board was abolished in 1782; and a new council for the affairs of trade on its present plan was appointed, Sept. 2, 1786.

BOATS. Their invention cannot be traced to any age or country. Flat-bottomed boats were made in England in the reign of William I. The flat-bottomed boat was again brought into use by Barker, a Dutchman, about 1690. See *Life-Boat*. A mode of building boats by the help of the steam-engine was invented by Mr. Nathan Thompson of New York in 1860, and premises were erected for its application at Bow, near London, in 1861.

BOCCACCIO'S DECAMERONE, a collection of a hundred stories or novels (many of an immoral tendency, severely satirising the monks and clergy), feigned to have been related in ten days, during the plague of Florence in 1348. Boccaccio lived 1313—75. A copy of the first edition (that of Valdarfer, in 1471) was knocked down at the duke of Roxburgh's sale, to the duke of Marlborough, for 2260*l.*, June 17, 1812. This identical copy was afterwards sold by public auction, for 875 guineas, June 5, 1819.

BODLEIAN LIBRARY, Oxford, founded in 1598, and opened in 1602, by sir Thos. Bodley (died, 1612). It is open to the public, and claims a copy of all works published in this country. For rare works and MSS. it is said to be second only to the Vatican.

BOEOTIA, a political division of Greece, north of Attica. Thebes, the capital, was equally celebrated for its antiquity, its grandeur, and the exploits and misfortunes of its kings and heroes. The country was known successively as Aonia, Messapia, Hyantis, Ogygia, Cadneis, and Boeotia. From the general character of the inhabitants, the term Boeotian was used by the Athenians as a synonym for dulness; but unjustly,—since Pindar, Hesiod, Plutarch, Democritus, Epaminondas, and the accomplished and beautiful Corinna, were natives of Boeotia.

Arrival of Cadmus, founder of Cadmea (*Hales*, 1494; *Clinton*, 1313) B.C. 1493
 Reign of Polydore 1459
 Labdacus ascends the throne 1430
 Amphion and Zethus besiege Thebes, and de- throne Lailus 1388
 Edipus, not knowing his father Lailus, kills him in an affray, confirming the oracle fore- telling his death by the hands of his son . . . 1276
 Edipus said to encounter the Sphinx and resolve her enigmas 1266
 War of the Seven Captains 1225
 Thebes besieged and taken 1213
 Thersander reigns 1198; slain 1193
 The Thebans abolish royalty, and ages of obscurity follow, about 1120
 The Thebans fight with the Persians against the Greeks at Plataea 479

Battle of Coronea, in which the Thebans defeat the Athenians B.C. 447
 The Thebans under Epaminondas and Pelopidas enrol their Sacred Band, and join Athens against Sparta 377
 Epaminondas defeats the Lacedemonians at Leuctra, and restores Thebes to independence . 371
 Pelopidas killed at the battle of Cynoscephalæ . 364
 Epaminondas gains the victory of Mantinea, but is slain 362
 Philip, king of Macedon, defeats the Thebans and Athenians near Charonea 338
 Alexander destroys Thebes, but spares the house of Pindar 335
 Boeotia henceforth partook of the fortunes of Greece; and was conquered by the Turks under Mahomet II. A.D. 1456

See *Thebes*.

BOGS, commonly the remains of fallen forests, covered with peat and loose soil. Moving bogs are slips of land carried to lower levels by accumulated water. Of recent acts, one relating to Ireland for their drainage, passed March, 1830. The bog-land of Ireland has been estimated at 3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1849, Mr. Rees Reece took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London.

BOHEMIA, formerly the Hercynian Forest,—Boiemum. *Tacitus*. This country derives its name from the Boii, a Celtic tribe. It was originally governed by dukes, till the title of king was obtained from the emperor Henry IV., in 1061, by Wratisslaus II. It was not finally retained until 1199 by Ottocar I. The kings at first held their territory from the empire, but they at length threw off the yoke: and the crown was elective till it came to the house of Austria, in which it is now hereditary. This kingdom has suffered much from contending armies and civil wars; its capital, Prague, is famous in modern history for sieges and battles. Population in 1857, 4,705,525. See *Prague*.

The Slavonians seize Bohemia about . . . A.D. 550
 City of Prague founded 795
 Introduction of Christianity 894
 Bohemia conquered by the emperor Henry III., who spreads devastation through the country . 1041
 Reign of Ottocar II., who invades Prussia . . 1255
 Ottocar vanquished by the emperor Rudolph, and deprived of Austria, Styria, and Carniola . 1277
 King John (*blind*) slain at the battle of Crecy . . 1346
 John Huss and Jerome of Prague, two of the first Reformers, are burnt for heresy, which occasions an insurrection 1415, 1416
 Ziska, leader of the Hussites, dies of the plague . 1424
 Albert, duke of Austria, marries the daughter of the late emperor and king, and receives the crowns of Bohemia and Hungary . . . 1437
 The succession infringed by Ladislas, son of the king of Poland, and George Podiebrad, a Protestant chief 1440-1458

Ladislas, king of Poland, elected king of Bo- hemia, on the death of Podiebrad A.D. 1471
 The emperor Ferdinand I. marries Anne, sister of Louis the late king, and obtains the crown . 1527
 The emperor Ferdinand II., oppressing the Pro- testants, is deposed, and Frederic the elector- palatine, elected king Sept. 5, 1619
 Frederic, totally defeated at Prague, flies to Holland Nov. 9, 1620
 The crown secured to the Austrian family by the treaty of 1648
 Silesia and Glatz ceded to Prussia 1742
 Prague taken by the Prussians 1744
 The Prussians victorious over Prague May 6, 1757
 Revolt of the peasantry 1775
 Edict of Toleration promulgated 1781
 The French occupy Prague 1806

See *Germany*.

BOHEMIA, *continued.*

KINGS.

1197. Premislal I., or Ottocar I.
 1230. Wenceslas III.
 1253. Premislal II., or Ottocar II.
 1278. Wenceslas IV., king of Poland.
 1305. Wenceslas V.
 1306. Rudolph of Austria.
 1307. Henry of Carinthia.
 1310. John of Luxemburg (killed at Crecy).
 1346. Charles I., emperor.

1378. Wenceslas VI., emperor.
 1479. Sigismund I., emperor.
 1437. Albert of Austria.
 1440. Ladislal III.
 1458. George von Podiebrad.
 1471. Ladislal IV., king of Hungary (in 1400).
 1516. Louis king of Hungary (killed at Mohatz).
 1526. Bohemia united to Austria under Ferdinand I., elected king.

BOHEMIAN BRETHREN, a body of Christians in Bohemia, who appear to have separated from the Calixtines (*which see*), a branch of the Hussites, in 1467. Dupin says "They rejected the sacraments of the church, were governed by simple laics, and held the scriptures for their only rule of faith. They presented a confession of faith to king Ladislal in 1504 to justify themselves from errors laid to their charge." They appear to have had communication with the Waldenses, but were distinct from them. Luther, in 1533, testifies to their purity of doctrine, and Melancthon commends their severe discipline. They were doubtless dispersed during the religious wars of Germany in the seventeenth century.

BOII, a Celtic people of N. Italy, who emigrated into Italy, and were defeated at the Vadimonian lake, 283 B.C. They were finally subdued by Scipio Nasica, 191 B.C.

BOILING OF LIQUIDS. Dr. Hooke, about 1683, ascertained that liquids were not increased in heat after they had once begun to boil; and that a fierce fire only made them boil more rapidly. The following boiling points have been stated:—

Ether	94° Fahr.	Nitric acid	187° Fahr.	Oil of turpentine	312° Fahr.
Alcohol	173° "	Sulphuric acid	600° "	Sulphur	822° "
Water	212° "	Phosphorus	554° "	Mercury	662° "

BOILING TO DEATH, made a capital punishment in England, by statute 22 Henry VIII., 1530. This act was occasioned by seventeen persons having been poisoned by John Roose, the bishop of Rochester's cook, two of whom died. Poisoning was made treason, and it was enacted to be punished by boiling the criminal to death! Margaret Davie, a young woman, suffered in the same manner for a similar crime, in 1541.

BOIS-LE-DUC, Dutch Brabant, the site of a battle between the British and the French republican army, in which the British were defeated, and forced to abandon their position and retreat to Schyndel, Sept. 14, 1794. This place was captured by the French, Oct. 10 following; it surrendered to the Prussian army, under Bulow, in 1814.

BOLIVIA, a republic in South America, formerly part of Peru; was declared independent, Aug. 6, and took the name of Bolivia, in honour of General Bolivar, Aug. 11, 1825. Slavery was abolished in 1836. General Sucre governed ably from 1826-8; Santa Cruz ruled from 1828 to 1834; after which many disorders occurred. In 1853 free trade was proclaimed. General Cordova was president 1855-7, succeeded by the dictator José Maria Linares, March 31, 1859. In 1860, Gen. George Cordova became constitutional president, succeeded by José M. de Acha, in 1861. Population in 1855, 2,326,126;—in 1858, 1,987,352. The insurrection of the ill-used Indians, headed by Tupac Amaru Andres, took place here in 1780-2.

BOLLANDISTS. See *Acta Sanctorum*.

BOLOGNA, a city in central Italy, the ancient Bononia, distinguished for its magnificent specimens of architecture.

University founded by Theodosius A.D. 433
 Bologna joins the Lombard league 1167
 Pope Julius II. takes Bologna; enters in triumph Nov. 11, 1506
 It becomes part of the States of the Church 1515
 In the church of St. Petronius, remarkable for its pavement, Cassini drew his meridian line (over one drawn by Father Ignatius Dante in 1575) 1653
 Bologna was taken by the French, 1796; by the Austrians, 1799; again by the French, after

the battle of Marengo, in 1800; and restored to the pope in A.D. 1815
 A revolt suppressed by Austrian interference 1831
 The Austrians evacuate Bologna: and cardinal Ferretti departs: the citizens rise and form a provisional government June 12, 1859
 Which decrees that all public acts shall be headed "Under the reign of king Victor Emmanuel," &c. Oct. 1, 1860
 He enters Bologna as sovereign May 2, —

BOMARSUND, a strong fortress on one of the Åland isles in the Baltic sea, taken by sir Charles Napier, commander of the Baltic expedition, aided by the French military contingent under general Baraguay d'Hilliers, Aug. 16, 1854. The governor Bodisco, and the garrison, about 2000 men, became prisoners. The fortifications were destroyed.

71.643 104386

BOMBAY, the most westerly and smallest of our Indian presidencies, was visited by the Portuguese in 1509, and acquired by them in about 1530. It was given (with Tangier in Africa, and 300,000*l.* in money) to Charles II. as the marriage portion of the infanta, Catherine of Portugal, 1661. In 1668, it was granted to the East India Company, who had long desired it, "in free and common socage," as of the manor of East Greenwich, at an annual rent of 10*l.* Confirmed by William III. 1689. The two principal castes at Bombay are the Parsees (descendants of the ancient Persian fire-worshippers) and the Borahs (sprung from early converts to Islamism). They are both remarkable for commercial activity.

Mr. Gyfford, deputy-governor, 100 soldiers, and other English perish through the climate, Oct. 1675—Feb. 1676.
 Captain Keigwin usurps the government 1681-84.
 Bombay made chief over the company's settlements 1687.
 The whole island, except the fort, seized and held for a time by the mogul's admiral . . . 1690.
 Bombay becomes a distinct presidency . . . 1708.

Additions to the Bombay territory:—Bancoot river, 1756; island of Salsette . . . 1775.
 Population of the presidency, 12,034,483 . . . 1858.
 The benevolent sir Jamsetjee Jeejeebhoy, a Parsee (who erected several hospitals, &c.), dies . . . April 15, 1859.
 His son, sir Cursetjee, visits England . . . 1860.
 Rioting against the income tax suppressed, Nov. & Dec. —

BOMBS (shells of iron filled with gunpowder), said to have been invented at Venlo, in 1495; and used by the Turks at the siege of Rhodes in 1522. They came into general use in 1634, having been previously used only by the Dutch and Spaniards. Bomb-vessels were invented in France in 1681. *Voltaire*. The shrapnel shell is a bomb filled with balls, and a lighted fuse to make it explode before it reaches the enemy; a thirteen-inch bomb-shell weighs 198 lbs.

BONAPARTE FAMILY, &c. See *France*, 1793, and *note*.

BONDAGE, or **VILLANAGE**. See *Villanage*.

BONE-SETTING cannot be said to have been practised scientifically until 1620. *Bell*.

BONES. The art of softening bones was discovered about 1688, and they were used in the cutlery manufacture, &c., immediately afterwards. The declared value of the bones of cattle and of other animals, and of fish (exclusive of whale-fins) imported into the United Kingdom from Russia, Prussia, Holland, Denmark, &c., amounts annually to more than 300,000*l.* (in 1851 about 32,000 tons). Bone-dust has been extensively employed in manure since the publication of Liebig's researches in 1840. •

BONHOMMES, hermits of simple and gentle lives, appeared in France about 1257; in England about 1283. The prior of the order was called *le bon homme*, by Louis VI., and hence the name. *Du Fresnoy*.

BONN, a town on the Rhine, founded by the Romans, belonged to the elector of Cologne till its capture by the French in 1802. It was assigned to Prussia in 1814. The Prince Consort of England was a student at the university, founded in 1818.

BOOK OF SPORTS. See *Sports*.

BOOKS (Anglo-Saxon, *booc*; German, *buch*). Books were originally made of boards, or the inner bark of trees: afterwards of skins, for which latter, parchment was substituted. Papyrus, an indigenous plant, was adopted in Egypt. Books with leaves of vellum were invented by Attalus, king of Pergamus, about 198 B.C., at which time books were in volumes or rolls. The MSS. in Herculaneum consist of Papyrus, rolled and charred and matted together by the fire, and are about nine inches long, and one, two, or three inches in diameter, each being a separate treatise. The Pentateuch of Moses and the history of Job are the most ancient in the world; and in profane literature the poems of Homer and Hesiod. The first PRINTED BOOKS were printed on one side only, the leaves being pasted back to back. The first known printed book was the *Book of Psalms*, by Faust and Schœffer his son-in-law, Aug. 14, 1457. Faust began in 1450 an edition of the Bible, which was finished in 1460. The second printed book was *Cicero de Officiis*, 1466. *Blair*. The first book printed in England was *The Game and Play of the Chess*, by Caxton, 1474. Books of astronomy and geometry were ordered to be destroyed in England as being infected with magic, 6 Edw. VI. 1552. *Stow*. In 1839, 2032 volumes of new works and 773 of new editions were published in London; and in 1852, 3359 new works and 1159 new editions, exclusive of pamphlets, of which 908 were published in that year. In Paris, 6445 volumes were published in 1842; and 7350 in 1851. See *Bibliography*, and *Printing*.

BOOKS, PRICES OF. Jerome (who died 420) states that he had ruined himself by buying a copy of the works of Origen. A large estate was given by Alfred for one on cosmography, about 872. The *Roman de la Rose* was sold for about 30*l.*; and a homily was exchanged for 200 sheep and five quarters of wheat. Books frequently fetched double or treble their weight

in gold. They sold at prices varying from 10*l.* to 40*l.* each, in 1400. In our own times, the value of some volumes is very great. A copy of *Macklin's Bible*, ornamented by Mr. Tomkins, was declared worth 500 guineas. *Buller*. A yet more superb copy was insured in a London office for 3000*l.* See *Boccaccio*.

BOOK-BINDING. The book of St. Cuthbert, the earliest ornamental book, is supposed to have been bound about A.D. 650. A Latin Psalter in oak boards was bound in the ninth century. A MS. copy of the Four Evangelists, the book on which our kings from Henry I. to Edward VI. took their coronation oath, was bound in oaken boards, nearly an inch thick, A.D. 1100. Velvet was the covering in the fourteenth century; and silk soon after. Vellum was introduced early in the fifteenth century; it was stamped and ornamented about 1510. Leather came into use about the same time. Cloth binding superseded the common boards generally about 1831. Caoutchouc or India-rubber backs to account-books and large volumes were introduced in 1841. The rolling-machine invented by Mr. Wm. Burr was substituted for the beating hammer about 1830, about which time gas-stoves began to take the place of the charcoal fires used to heat the finisher's gilding tools.

BOOK-HAWKING SOCIETIES were begun in England in 1851 by archdeacon Wigram (since bishop of Rochester). The hawkers vend moral and religious books in a similar manner to that of the French colporteurs. The system was in existence in Scotland a few years previous.

BOOK-KEEPING. The system by double-entry, called originally Italian book-keeping, was taken from the course of Algebra published by Burgo, in the fifteenth century, at Venice, then a great commercial state. James Peele published his *Book-keeping* in 1569. *Anderson*. John Mellis published "A Briefe Instruction and Manner how to Keepe Bookes of Accompts," in 1588; in the preface he states that he is only "the reviver of a work published in 1543 by one Hugh Oldcastle." Improved systems were published by Mr. Benj. Booth in 1789 and by Mr. Edw. Thos. Jones in 1821 and 1831.

BOOKSELLERS, at first migratory like hawkers, became known as *stationarii*, from their practice of having booths or stalls at the corners of streets and in markets. They were long subject to vexatious restrictions, from which they were freed in 1758.*

BOOTHIA FELIX, a large peninsula, the N.W. point of the American continent, discovered by sir John Ross in 1831, and named in honour of sir Felix Booth, who had presented him with 20,000*l.* to enable him to fit out his Polar expedition. Sir Felix Booth died at Brighton in Feb. 1850.

BOOTS are said to have been the invention of the Carians, and were made of iron, brass, or leather; of the last material, some time after their invention, boots were known to the Greeks, for Homer mentions them about 907 B.C. They are frequently mentioned by the Roman historians. A variety of forms may be seen in Fairholt's "Costume in England." An instrument of torture termed the boot was used in Scotland so late as 1690.

BORAX was known to the ancients. It is used in soldering, brazing, and casting gold and other metals, and was called *chrysocolia*. It is also used in medicine, and in composing *fucus*, or a wash or paint for the ladies. *Pardon*. Borax is produced naturally in the mountains of Thibet; and was brought to Europe from India about 1713. It has lately been found in Saxony. It is now largely manufactured from the boracic acid found by Hoefer to exist in the gas arising from certain lagoons in Tuscany; an immense fortune has been made by their owner M. Lardarel since 1818.—Homberg in 1702 discovered in borax boracic acid, which latter in 1808 was decomposed by Gay-Lussac, Thénard, and H. Davy into oxygen, and the previously unknown element, boron.

BORNEO, an island in the Indian Ocean, the largest in the world except Australia, was discovered by the Portuguese in 1526.

The Dutch trade here in 1604, and establish factories in 1776
The pirates of Borneo chastised by the British in 1813, and by captain Keppel in March 1843
By a treaty with the sultan, the island of La-

boan, or Labuan (N.W. of Borneo), and its dependencies, incorporated with the British empire, and formally taken possession of in presence of the Bornean chiefs Dec. 2, 1846
James Brooke, rajah of Sarawak, by whose

* **BOOKSELLERS' ASSOCIATION.** In 1829 a number of eminent publishers of London formed themselves into an association for the regulation of the trade, and fixed the amount of discount to be allowed, Dec. 29, 1829, and for some years restricted the retail booksellers from selling copies of works under the full publishing price. A dispute afterwards arose as to the right, maintained by the latter, to dispose of books (when they had once become theirs by purchase) at such less profit as they might deem sufficiently remunerative. The dispute was referred to lord chief justice Campbell, before whom the parties argued their respective cases, at Stratheden House, April 14, 1852. His lordship gave judgment in effect against the association; this led to its immediate dissolution, May 19 following.

BORNEO, *continued.*

exerts this island was annexed to the British crown, governor of Labuan and consul-general of Borneo, visits England and receives many honours . . . Oct. 1847
 He destroys many of the Bornean pirates . . . 1849
 Labuan made a bishopric; the bishop was consecrated at Calcutta, the first English bishop consecrated out of England . . . Oct. 18, 1855
 The Chinese in Sarawak rise in insurrection and massacre a number of Europeans; sir J. Brooke escapes by swimming across a creek; he

speedily returns with a force of Malays, &c., and chastises the insurgents, of whom 2000 were killed . . . Feb. 17, 18, 1857
 He comes to England to seek help from the government, without success . . . 1858
 His health being broken up, an appeal for a subscription for him made . . . —
 Deputation of merchants waits on the earl of Derby, recommending the purchase of Sarawak, which is declined . . . Nov. 30, —
 Sir J. Brooke returns to Borneo . . . Nov. 20, 1860

BORNOU, an extensive kingdom in central Africa, explored by Denham and Clapperton, who were sent out by the British government in 1822. The population is estimated by Denham at five millions, by Barth at nine.

BORODINO, a Russian village on the river Moskwa, near which a sanguinary battle was fought, Sept. 7, 1812, between the French under Napoleon, and the Russians under Kutusoff; 240,000 men being engaged. Each party claimed the victory, but it was rather in favour of Napoleon; for the Russians retreated, leaving Moscow, which the French entered, Sept. 14. See *Moscow*.

BORON. See *Boraz*.

BOROUGH, anciently a company of ten families living together, now such towns as send members to parliament, since the election of burgesses in the reign of Henry III. 1265. Charters were granted to towns by Henry I., 1132; which were remodelled by Charles II. in 1682-4, but restored in 1688. 22 new English boroughs were created in 1553. Burgesses were first admitted into the Scottish parliament by Robert Bruce, 1326; and into the Irish, 1365. The Municipal Reform act passed in 1835. See *Constituency and Reform*.

BOROUGH-BRIDGE (W. R. of York), the site of a battle between the earls of Hereford and Lancaster and Edward II., March 16, 1322. The latter, at the head of 30,000 men, pressed Lancaster so closely, that he had not time to collect his troops together in sufficient force, and being defeated and made prisoner, was led, mounted on a lean horse, to an eminence near Pontefract, or Pomfret, and beheaded by a Londoner.

BOROUGH-ENGLISH, an ancient tenure by which the younger son inherits, is mentioned as occurring 834. It was abolished in Scotland by Malcolm III. in 1062.

BOSCOBEL, near Donington, Shropshire, where Charles II. concealed himself after his defeat at Worcester (*which see*), Sept. 3rd, 1651.* The "Boscobel Tracts" were first published in 1660. In 1861 Mr. F. Manning published "Views," illustrating these tracts.

BOSNIA, a province in Turkey, formerly a dependent upon Servia, was conquered by the Turks about 1526, who still retain it after losing it several times.

BOSPHORUS (properly *Bosporus*), now called *Circassia*, near the Bosphorus Cimmerius, now the straits of Kertch or Yenikalé. The history of the kingdom is involved in obscurity, though it continued for 350 years. It was named Cimmerian, from the *Cimmeri*, who dwelt on its borders, about 750 B. C.

The Archæanactidæ from Mitylene rule . . . B. C. 502-480	Battle of Zela, gained by Julius Cæsar over
They are dispossessed by Spartacus I. . . 480-438	Pharnaces II. (Cæsar writes home, <i>Veni, vidi, vici</i> , "I came, I saw, I conquered") . . . B. C. 47

Eumelus puts to death all his relations, 309; and is killed . . . 304	Polemon II. reigns, 33; Mithridates II. reigns . . . 41
The Seythians conquer Bosporus . . . 285	Mithridates conducted a prisoner to Rome, by order of Claudius, and his kingdom made a province of the empire.
Mithridates VI., of Pontus, conquers Bosporus . . . 80	
He poisons himself; and the Romans make his son, Pharnaces, king . . . 63	

BOSPHORUS, THRACIAN (now channel of Constantinople). Darius Hystaspes threw a bridge of boats over this strait when about to invade Greece, 493 B. C. See *Constantinople*.

* The king, disguised in the clothes of the Pandrills, remained from Sept. 4-6, at White Ladies; on Sept. 7 and 8 he lay at Boscobel house, near which exists an oak, said to be the scion of the Royal Oak in which the king was part of the time hidden with col. Careless. *Sharpe*.

BOSTON, a city in the United States, built about 1627. Here originated that resistance to the British authorities which led to American independence. The act of parliament laying duties on tea, papers, colours, &c. (passed June, 1767), so excited the indignation of the citizens of Boston, that they destroyed several hundreds of chests of tea, Nov. 1773. Boston seaport was shut by the English parliament, until restitution should be made to the East India Company for the tea lost, March 25, 1774. The town was besieged by the British next year, and 400 houses were destroyed. A battle between the royalists and independent troops, in which the latter were defeated, took place on June 17, 1775. The city was evacuated by the king's troops, April, 1776. The inhabitants are very zealous against slavery. An industrial exhibition was opened here in Oct. 1856, and lasted two weeks.

BOSWORTH FIELD, Leicestershire, the site of the thirteenth and last battle between the houses of York and Lancaster, in which Richard III. was defeated by the earl of Richmond, afterwards Henry VII., the former being slain, Aug. 22, 1485. Sir Wm. Stanley at a critical moment changed sides, and thus caused the loss of the battle. It is said that the crown of Richard was found in a hawthorn bush, near the field of battle, and that Henry was crowned on the spot with that very crown.

BOTANY. Aristotle is considered the founder of the philosophy of botany (about 347 B.C.). *Historia Plantarum* of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the fifteenth century. The study was advanced by Fuchsius, Bock, Bauhin, Cæsalpinus, and others, between 1535 and 1600. *Melchior Adam*. The system and arrangement of Linnæus, the great botanist of modern times, was made known about 1750; and Jussieu's system, founded on Tournefort's, and called "the natural system," in 1758. At the time of Linnæus' death, 1778, the species of plants actually described amounted in number to 11,800. The number of species now recorded cannot fall short of 100,000.* J. C. Loudon's "Encyclopædia of Plants," a most comprehensive work, first appeared in 1829.

BOTANY BAY, Australia, was fixed on for a colony of convicts from Great Britain. The first governor, capt. Arthur Phillip, who sailed from England in May, 1787, arrived at the settlement in Jan. 1788. The bay was discovered by captain Cook, April 28, 1770, and the place took its name from the great variety of plants which abounded on the shore. The colony was eventually established at Port Jackson, about thirteen miles to the north of the bay. See *New South Wales* and *Transportation*.

BOTHWELL BRIDGE, Lanarkshire. The Scotch covenanters took up arms against the intolerant government of Charles II. in 1679, and defeated the celebrated Claverhouse at Drumclog. They were however totally routed by the earl of Monmouth at Bothwell Bridge, June 22, 1679, and many of the prisoners were cruelly tortured and afterwards executed.

BOTTLE-CONJUROR. On Jan. 16, 1748, a charlatan at the old Haymarket theatre had announced that he would jump into a quart bottle. The theatre was besieged by 10,000 persons, anxious to gain admittance and witness the feat. The duped crowd, in the storm of their indignation, nearly pulled down the edifice.

BOTTLES in ancient time were made of leather. Bottles of glass were first made in England about 1558. See *Glass*. The art of making glass bottles and drinking-glasses was known to the Romans at least before A.D. 79; for these articles and other vessels have been found in the ruins of Pompeii. A bottle which contained two hogsheds was blown, we are told, at Leith, in Scotland, in January 1747-8.

BOULOGNE, a seaport in Picardy, N. France, was taken by the British on Sept. 14, 1544, but restored at the peace, 1550. Lord Nelson attacked Boulogne, disabling ten vessels and sinking five, Aug. 3, 1801. In another attempt he was repulsed with great loss, and captain Parker of the *Medusa* and two-thirds of his crew were killed, Aug. 18, following. In 1804 Bonaparte assembled 160,000 men and 10,000 horses, and a flotilla of 1300 vessels and 17,000 sailors to invade England. The coasts of Kent and Sussex were covered with

* Robert Brown, who accompanied Flinders in his survey of New Holland in 1803, died June 10, 1838, aged 85. He was acknowledged to be the chief of the botanists of his day.

martello towers and lines of defence; and nearly half the adult population of Britain was formed into volunteer corps. It is supposed that this French armament served merely for a demonstration, and that Bonaparte never seriously intended the invasion. Sir Sidney Smith unsuccessfully attempted to burn the flotilla with fire-machines called catamarans, Oct. 2, 1804. Congreve-rockets were used in another attack, and they set the town on fire, Oct. 8, 1806. The army was removed on the breaking out of the war with Austria in 1805. Louis Napoleon (now emperor) made a descent here with about 50 followers, Aug. 6, 1840, without success. On July 10, 1854, he reviewed the French troops destined for the Baltic, and on Sept. 2, following, he entertained prince Albert and the king of the Belgians. See *France*.

BOUNTIES, premiums granted to the producer, exporter, or importer of certain articles; a new principle introduced into commerce by the British parliament. The first bounties granted on corn were in 1688, which were repealed in 1815. They were first legally granted in England for raising naval stores in America, 1703, and have been granted on sail-cloth, linen and other goods.

BOUNTY. A mutiny on board the *Bounty*, an armed ship returning from Otaheite, with bread-fruit, April 28, 1789. The mutineers put their captain, Bligh, and nineteen men into an open boat, near Annamooka, one of the Friendly Isles, April 28, 1789; they reached the island of Timor, south of the Moluccas, in June, after a perilous voyage of nearly 4000 miles; their preservation was next to miraculous. The mutineers were tried, Sept. 15, 1792; six were condemned and three executed. See *Pitcairn's Island*.

BOURBON, HOUSE OF (from which come the royal houses of France, Spain and Naples), derives its origin from the Archambauds, lords of Bourbon in Berry. Robert, count of Clermont, son of Louis IX. of France, married the heiress Beatrice in 1272: their son Louis I. was created duke of Bourbon and peer of France by Charles IV. in 1327. The last of the descendants of their elder son Peter I. was Susanna, wife of Charles, duke of Montpensier, called constable of Bourbon, who, offended by his sovereign Francis I., entered into the service of the emperor Charles V., and was killed at the siege of Rome, May 6, 1527. From James, the younger son of Louis I., was descended Antony, duke of Vendôme, who married (1548) Jean D'Albret, daughter of Henry, king of Navarre. Their son the great Henry IV. was born at Pau, Dec. 23, 1553, and became king of France, July 31, 1589.—The crown of Spain was settled on a younger branch of this family, 1700, and guaranteed by the peace of Utrecht, 1713. *Rapin*. The Bourbon FAMILY COMPACT (*which see*) was made 1761. The Bourbons were expelled France, 1791; restored, 1814; again expelled on the return of Bonaparte from Elba, and again restored after the battle of Waterloo, 1815. The elder branch was expelled once more, in the person of Charles X. and his family, in 1830, in consequence of the revolution of the memorable days of July in that year. The Orleans branch ascended the throne in the person of the late Louis-Philippe, as "king of the French," Aug. 9, following. He was deposed Feb. 24, 1848, when his family also was expelled. The Bourbon family fled from Naples, Sept. 6, 1860; and Francis II. lost his kingdom. See *France, Spain, Naples, Orleans, Parma, Condé and Legitimists*.

BOURBON, ISLE OF (in the Indian Ocean), discovered by the Portuguese in 1545. The French are said to have first settled here in 1672. It surrendered to the British, under admiral Rowley, Sept. 21, 1809, and was restored to France in 1815. *Alison*. An awful hurricane in Feb. 1829 did much mischief. See *Mauritius*.

BOURDEAUX (or **BORDEAUX**), W. France, was united to the dominions of Henry II. of England by his marriage with Eleanor of Aquitaine. Edward the Black Prince brought his royal captive, John, king of France, to this city after the battle of Poitiers in 1356, and here held his court during eleven years: his son, our Richard II., was born at Bourdeaux, 1366. Bourdeaux finally surrendered to Charles VII. of France in 1453. The fine equestrian statue of Louis XV. was erected in 1743. Bourdeaux was entered by the victorious British army after the battle of Orthes, fought Feb. 27, 1814.

BOURIGNONISTS, a sect founded by *Antoinette Bourignon*, a fanatic, who, in 1658, took the habit of St. Augustin and travelled into France, Holland, England, and Scotland; in the last she made many converts about 1670. She maintained that Christianity does not consist in faith or practice, but in an inward feeling and supernatural impulse. She published a book entitled the *Light of the World*. A disciple named Court left her a good estate. She died in 1680.

BOURNOUS, the Arabic name of a hooded garment worn in Algeria, which has been introduced in a modified form into England and France since 1847.

BOUVINES (N. France), the site of a desperate battle, 1214, in which Philip Augustus of France obtained a complete victory over the emperor Otho and his allies, con-

sisting of more than 150,000 men. The earls of Flanders and Boulogne were taken prisoners. The chevalier Guérin commanded the king's army, not in order to fight, but to animate the barons and other knights in honour of God, the king, and kingdom, and in defence of their sovereign lord. *Hénault.*

BOWLS, or BOWLING, an English game, played as early as the thirteenth century. Charles I. played at it, and it formed a daily share in the diversions of Charles II. at Tunbridge. *Grammont.*

BOWS AND ARROWS. See *Archery.*

BOXING, or PRIZE-FIGHTING, the *pugilatus* of the Romans, once a favourite sport with the British, who possess an extraordinary strength in the arm, an advantage which gives the British soldier great superiority in battles decided by the bayonet. A century ago boxing formed a regular exhibition, and a theatre was erected for it in Tottenham-court.—Broughton's amphitheatre, behind Oxford-road, was built 1742. Schools were opened in England to teach boxing as a science in 1790. Mendoza opened the Lyceum in the Strand in 1791. Boxing was much patronised from about 1820 to 1830, but is now out of favour. John Gully, formerly a prize-fighter, was M.P. for Pontefract in 1835.*

BOXTTEL (in Dutch Brabant), where the British and allied army, commanded by the duke of York, was defeated by the French republicans, who took 2000 prisoners and eight pieces of cannon, Sept. 17, 1794.

BOX-TREE, indigenous to this country, and exceedingly valuable to wood-engravers. In 1815 a large box-tree at Box-hill, Surrey, was cut down, and realised more than 10*l.* About 1820 the cutting of all the trees on the hill (during a century) produced about 6000*l.* Boxwood is now largely imported.

BOYDELL'S LOTTERY for a gallery of paintings was got up in 1791 at a vast expense by alderman Boydell, lord mayor of London, a great encourager of the arts. The collection was called the Shakspeare gallery, and every ticket was sold at the time the alderman died, Dec. 12, 1804, before the decision of the wheel.

BOYLE LECTURES, instituted in 1691 by Robert Boyle (son of the great earl of Cork), a philosopher, distinguished by his genius, virtues and benevolence. Eight lectures (in vindication of the Christian religion) are delivered at St. Mary-le-bow church on the first Monday in each month, from January to May and September to November.

BOYNE (a river in Kildare, Ireland), BATTLE OF, between king William III. and his father-in-law, James II., fought July 1, 1690. The latter was signally defeated, losing 1500 men (out of 30,000); the Protestant army lost about a third of that number (out of 30,000). James immediately fled to Dublin, thence to Waterford, and escaped to France. The duke of Schomberg was killed in the battle, having been shot by mistake as he was crossing the river Boyne by the soldiers of his own regiment. Here also was killed the rev. George Walker, who defended Londonderry in 1689. Near Drogheda is a splendid obelisk, 150 feet in height, erected in 1736 by the Protestants of the empire in commemoration of this victory.

BOYNE, man-of-war of 98 guns, was destroyed by fire at Portsmouth, May 4, 1795, by the explosion of the magazine; numbers perished. Large portions of the Boyne have been recovered since, June, 1840.

BRABANT (now part of the kingdoms of Holland and Belgium), an ancient duchy, part of Charlemagne's empire, fell to the share of his son Lothaire. It became a separate duchy (called at first Lower Lorraine) in 959. It descended to Philip II. of Burgundy, and in regular succession to the emperor Charles V. In the seventeenth century it was held by Holland and Austria, as Dutch Brabant and the Walloon provinces, and underwent many changes in the wars of Europe. The Austrian division was taken by the French in 1746 and 1794. It was united to the Netherlands in 1814, but has formed part of Belgium, under Leopold, since 1830. His heir is styled duke of Brabant. See *Belgium.*

BRACELETS were worn by the ancients, and *armillæ* were Roman military rewards. Those of pearls and gold were worn by the Roman ladies.

BRADFORD. See *Poison.*

* On April 17, 1860, a large number of persons of all classes assembled at Farnborough to witness a desperate conflict between Thomas Sayers, the Champion of England, a light Sussex man, about 5 feet 8 inches high, and John Heenan, the "Benicia Boy," a huge American, in height 6 feet 1 inch. Strength, however, was matched by skill; but eventually the fight was interrupted. Both men received a silver belt on May 31 following.

BRADSHAW'S RAILWAY GUIDE was first published by Mr. G. Bradshaw in Dec. 1841. He had previously published occasionally a *Railway Companion*.

BRAGANZA, a city in Portugal, gave title to Alfonso, natural son of Pedro I. of Portugal (in 1422), founder of the house of Braganza. When the nation, in a bloodless revolution in 1640 threw off the Spanish yoke, John, duke of Braganza, was called to the throne, on which, and on that of Brazil, his family continues to reign. See *Portugal* and *Brazil*.

BRAHMINS, the highest of the four castes of the Hindoos. Pythagoras is thought to have learned from them his doctrine of the *Metempsychosis* and it is affirmed that some of the Greek philosophers went to India on purpose to converse with them. The modern Brahmins derive their name from Brahmah, one of three beings whom God, according to their theology, created, and with whose assistance he formed the world. They never eat flesh, and abstain from the use of wine and all carnal enjoyments. *Strabo*. The modern Indian priests are still considered as the depositaries of the whole learning of India. *Holwell*.

BRAINTREE CASE (in Essex), which was decided in 1842 by Dr. Lushington, who determined that a minority in a parish vestry cannot levy a church rate.

BRAMHAM, W. R. York : near here the earl of Northumberland and lord Bardolf were defeated and slain by sir Thomas Rokeby, the general of Henry IV., in 1408 ; and Fairfax was defeated by the royalists under the duke of Newcastle, March 29, 1643.

BRANDENBURG, a city in Prussia, said to be of great antiquity, founded by the Slavonians, who gave it the name of *Bamber*, which signified *Guard of the Forest*, according to some ; others say, Burg, or city of the *Brenns*. Henry I., surnamed the Fowler, after defeating the Slavonians, fortified Brandenburg, 926, as a rampart against the Huns, and bestowed the government on Sigefroi, count of Ringelheim, with the title of Margrave, or protector of the marches or frontiers. The emperor Sigismund gave perpetual investiture to Frederick IV. of Nuremberg, ancestor of the royal family of Prussia, who was made elector in 1417. For a list of the Margraves since 1134, see *Prussia*.

BRANDENBURG HOUSE, Hammersmith. See *Queen Caroline*.

BRANDY (German *Branntwein*, burnt wine), the spirit distilled from wine. It appears to have been known to Raymond Lully in the 13th century, and to have been manufactured in France early in the 14th. It was at first used medicinally, and miraculous cures were ascribed to its influence. In 1851, 938,280 gallons were imported with a duty of 15s. per gallon. It is now manufactured in Britain.

BRANDYWINE, a river in N. America, near which a battle took place between the British and the revolted Americans, in which the latter (after a day's fight) were defeated with great loss, and Philadelphia fell into the possession of the victors, Sept. 11, 1777.

BRASS was known among all the early nations. *Usher*. The British from the remotest period were acquainted with its use. *Whitaker*. When Lucius Mummius burnt Corinth to the ground; 146 B.C., he found immense riches, and during the conflagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as *Corinthian Brass*. This, however, may well be doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper ; and the Syriac translation of the Bible says, that Hiram made the vessels for Solomon's temple of Corinthian brass. *Du Fresnoy*. Some of the English sepulchral engraved *brasses* are said to be as old as 1277.

BRAURONIA, festivals in Attica, at Brauron, where Diana had a temple. The most remarkable that attended these festivals were young virgins in yellow gowns, dedicated to Diana. They were under ten years of age, and not under five ; and therefore their consecration was called "*dekateuein*," from *deka*, ten ; 600 B.C.

BRAY, THE VICAR OF. Bray, in Berks, is famous in national song for its vicar, the rev. Symon Symonds, who was twice a papist and twice a Protestant—in four successive reigns—those of Henry VIII., Edward VI., Mary, and Elizabeth, between the years 1533 and 1558. Upon being called a turn-coat, he said he kept to his principle, that of "living and dying the vicar of Bray." *Fuller's Church History*.

BRAZEN BULL. Perillus, a brass-founder at Athens, knowing the cruel disposition of Phalaris, tyrant of Agrigentum, 570 B.C., contrived a new species of punishment. He cast a brazen bull, larger than life, with an opening in the side to admit the victims. A fire was kindled underneath to roast them to death ; and the throat was so contrived that their dying groans resembled the roaring of a bull. Phalaris admired the invention and workmanship, but said it was reasonable the artist should make the first experiment, and ordered his execution. Ovid mentions that the Agrigentes, maddened by the tyrant's cruelties, revolted,

seized him, cut his tongue out, and then roasted him in the brazen bull, by which he had put to death so many of their fellow-citizens, 549 B.C.

BRAZIL, an empire in South America, was discovered by Alvarez de Cabral, a Portuguese, who was driven upon its coasts by a tempest in 1500. He called it the land of the Holy Cross; but it was subsequently called Brazil, on account of its red wood. The French having seized on Portugal in 1807, the royal family and nobles embarked for Brazil, and landed March 7, 1808. Brazil was erected into an empire, when Dom Pedro assumed the title of emperor, Nov. 18, 1825. The dominant religion is Roman Catholic; but others are tolerated. Population in 1856, 7,677,800. See *Portugal*.

South America discovered by Vincent Yanez Pinzon	Jan. 26, 1500	Royal family of Portugal arrive at Brazil, Mar. 7, 1808
Pedro Alvarez Cabral discovers Espirito Santo, coast of Brazil, and lands	May 3, —	First printing-press established
Brazil explored by Amerigo Vespucci, about	1504	Brazil becomes a kingdom
Divided into captaincies by the king of Portugal	1530	King John VI. returns to Portugal, and Dom Pedro becomes regent
Martin Le Souza founds the first European colony at San Vincente	1531	Brazil declares its independence
Jews banished from Portugal to Brazil	1548	Pedro I. crowned emperor
San Salvador (Bahia) founded by Thomé de Souza	1549	New constitution ratified
French Protestants occupy bay of Rio Janeiro	1555	Independence recognised by Portugal, Aug. 29, 1825
Expelled	1557	Abdication of Dom Pedro I.
Sebastian founded	1580	Reform of the constitution
Brazil, with Portugal, becomes subject to Spain	1593	Accession of Pedro II.
James Lancaster captures Pernambuco	1593	Steam-ship line to Europe commenced
The French establish a colony at Maranhão	1594	Suppression of the slave-trade; railways commenced
Belem founded by Caldeira	1613	Rio Janeiro lit with gas
The French expelled	—	The emperor explores his northern provinces
The Dutch seize the coast of Brazil, and hold Pernambuco	1630	Oct. 1859—Feb. 1860
Defeated at Guararapes	1646	
Give up Brazil	1661	
Gold mining commences	1693	
Destruction of Palmares	1697	
The French assault and capture Rio Janeiro	1710-11	
Diamond mines discovered in Sezzo Frio	1729	
Jesuits expelled	1758-60	
Capital transferred from Bahia to Rio	1763	

EMPERORS OF BRAZIL.

1825. Dom Pedro (of Portugal) first emperor, Oct. 22, abdicated the throne of Brazil in favour of his infant son, April 7, 1831; died Sept. 24, 1834.
1831. Dom Pedro II. (born Dec. 2, 1825) succeeded on his father's abdication. Assumed the government July 23, 1840; crowned July 18, 1841; married Sept. 4, 1843, Princess Theresa of Naples. The PRESENT emperor (1862).
Heiress: Isabella, born July 29, 1846.

BREAD. Ching-Noung, the successor of Fohi, is reputed to have been the first who taught men (the Chinese) the art of husbandry, and the method of making bread from wheat, and wine from rice, 1998 B.C. *Univ. Hist.* Baking of bread was known in the patriarchal ages; see *Exodus* xii. 15. It became a profession at Rome, 170 B.C. After the conquest of Macedonia, 148 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained the monopoly of the baking trade. During the siege of Paris by Henry IV., owing to the famine which then raged, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1594. *Hénault*. In the time of James I., barley bread was used by the poor; and now in Iceland, cod-fish, beaten to powder, is made into bread; potato-bread is used in Ireland. Near Moscow is a portion of land whose clay will ferment when mixed with flour. The Indians of Louisiana eat a white earth with salt; and the Indians of the Orinooko eat a white unctuous earth. *Greig; Phillips*. The London Bakers' Company was incorporated in 1307. Bread-street was once the London market for bread. Until 1302, the London bakers were not allowed to sell any in their shops. *Stow*. Bread was made with yeast by the English bakers in 1634. The making of bread is now regulated by 6 & 7 Will. IV. c. 37, 1836. In 1822 it was directed to be sold by weight by 3 Geo. IV. c. 106. In 1858 Mr. Miller, near the Edgeware-road, sold good bread made by machinery. In 1859 Dr. Daughlish patented a mode of bread-making in which carbonic-acid gas is combined with water and mixed with the flour. This mode is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1862 a company was formed to encourage Stevens' Bread-making machinery. See *Assize*.

PRICES OF BREAD IN VARIOUS YEARS.

Quartern Loaf (4lb. 5½oz.)	1800 [For 4 weeks, 22½d.]	1825	1850	June. Dec.
1735	5½d.	11d.	10½	11d. 10½d.
1745	4½	7	9	11 10½
1755	5	9	8	8½
1765	7	11	8	7
1775	6½	11	8	7½
1785	6½	11	8	9
1795	12½	7½d. 7½d.	8½	9
1800	17½	10 11	9	9

Four-pound Loaf (best).
1822 10d.

BREAD-FRUIT TREE. It is mentioned by Dampier, Anson, Wallis, and other voyagers. A vessel under the command of captain Bligh was fitted out to convey these trees to various parts of the British colonies in 1789 (see *Bounty*), and again in 1791. The number taken on board at Otaheite was 1151. Some were left at St. Helena, 352 at Jamaica, and five were reserved for Kew Gardens, 1793. The tree was successfully cultivated in French Guiana, 1802. In the West Indies the negroes prefer their plantain fruit; and hence the bread-fruit tree has not been successful in the colonies.

BREAKWATERS. The first stone of the Plymouth breakwater was lowered August 12, 1812. It was designed to break the swell, and stretches 5280 feet across the Sound; it is 360 feet in breadth at the bottom and more than thirty at the top, and consumed 3,666,000 tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half sterling. The architects were Mr. John Rennie and his son sir John. The first stone of the lighthouse on its western extremity was laid Feb. 1, 1841. Breakwaters are now in course of construction at Holyhead, Portland, Dover, &c. (1862).

BREAST-PLATE, one was worn by the Jewish high-priest, 1491 B.C. (*Exod.* xxxix.), Goliath "was armed with a coat of mail," 1063 B.C. (1 *Sam.* xvii.) Breast-plates dwindled to the diminutive gorgets. Ancient breast-plates are mentioned as made of gold and silver, until iron and steel were found of greater security.

BRECHIN, Scotland; sustained a siege against the army of Edward III., 1333. The battle of Brechin was fought between the forces of the earls of Huntly and Crawford; the latter defeated, 1452. The see of Brechin was founded by David I. in 1150. One of its bishops, Alexander Campbell, was made prelate when but a boy, 1556. The bishopric was discontinued soon after the revolution in 1688; but was revived as a post-revolution bishopric in 1731. See *Bishops of Scotland*.

BREDA, Holland, was taken by prince Maurice, of Nassau, in 1590; by the Spaniards, under Spinola, in 1625; and by the Dutch in 1637. Our Charles II. resided here at the time of the restoration, 1660. See *Restoration*. Breda was taken by the French in 1793, and retaken by the Dutch the same year. The French garrison was shut out by the burghesses in 1813, when the power of the French ceased here. The *Compromise* of Breda was a proposal to Philip II., deprecating his harsh measures in the Netherlands, presented and refused in 1566.

BREECHES. Among the Greeks, this garment indicated slavery. It was worn by the Dacians, Parthians, and other northern nations; and in Italy, it is said, was worn in the time of Augustus Caesar. In the reign of Honorius, about A.D. 394, the *braccarii* or breeches-makers were expelled from Rome; but soon afterwards the use of breeches was adopted in other countries, and at length became general.

BREHONS, ancient judges in Ireland, are said to have administered justice with religious impartiality, but in later times with a tendency to love of country. It was enacted by the statute of Kilkenny, that no English subject should submit to the Brehon laws, 40 Edw. III., 1365. These laws, however, were recognised by the native Irish till about 1650. A translation of them was proposed in 1852, the publication of which may be expected.

BREITENFELD, BATTLE OF. See *Leipsic*.

BREMEN, N. Germany, said to have been founded in 788, and long an archbishopric and one of the leading towns of the Hanseatic league, was allowed a seat and vote in the college of imperial cities in 1640. In 1648 it was secularised and erected into a duchy and held by Sweden till 1712, when it was taken possession of by Denmark in 1731, by whom it was ceded to Hanover. It was taken by the French in 1757; who were expelled by the Hanoverians in 1758. Bremen was annexed by Napoleon to the French empire in 1810; but its independence was restored in 1813, and all its old franchises in 1815. Population of the province in 1862, about 90,000. See *Hanse Towns*.

BRESCIA, N. Italy (the ancient Brixia), was taken by the French under Gaston de Foix, in 1512, when it is said 40,000 of the inhabitants were massacred. It surrendered to the Austrian general Haynau, March 30, 1849, on severe terms.

BRESLAU, in Silesia, was burnt by the Mongols in 1241, and conquered by Frederick II. of Prussia, in Jan. 1741. A fierce battle took place here between the Austrians and Prussians, the latter under prince Bevern, who was defeated, Nov. 22, 1757. Breslau was taken; but was regained, Dec. 21, the same year. It was besieged by the French, and surrendered to them Jan. 1807, and again in 1813.

BREST, a sea-port, N.W. France, was besieged by Julius Cæsar, 54 B.C.—possessed by the English, A.D. 1378—given up to the duke of Brittany, 1390. Lord Berkeley and a British fleet and army were repulsed here with dreadful loss in 1694. The magazine burnt, to the value of some millions of pounds sterling, 1744. The marine hospitals, with fifty galley slaves, burnt, 1766. The magazine again destroyed by fire, July 10, 1784. From this great depôt of the French navy, numerous squadrons were equipped against England during the late war, among them the fleet which Lord Howe defeated on the 1st of June, 1794. England maintained a large blockading squadron off the harbour from 1793 to 1815; but with little injury to France. It is now a chief naval station of that country, and from the fortifications and other vast works of late construction it is considered impregnable.

BRETAGNE. See *Brittany*.

BRETHREN. See *Bohemian* and *Plymouth Brethren*.

BRETIGNY, PEACE OF, concluded with France, May 8, 1360, by which England retained Gascony and Guienne, and acquired other provinces; renounced her pretensions to Maine, Anjou, Touraine, and Normandy; was to receive 3,000,000 crowns, and to release king John, long a prisoner. The treaty not being carried out, the king remained and died in London.

BRETÓN. See *Cape Breton*.

BRETWALDA (wide-ruling chief), one of the kings of the Saxon heptarchy, chosen by the others as a leader in war against their common enemies. The following are mentioned by Bede (A.D. 500 to 642) Ella king of Sussex; Cæwlin of Wessex; Ethelbert of Kent; Redwald of East Anglia; Edwin, Oswald, and Oswy of Northumberland. The title (then become obsolete) was bestowed upon Egbert, 828.

BREVIARY (so called as being an abridgment of the books used in the Roman Catholic Service), contains the seven canonical hours, viz.: matins or lauds, primes, tierce, sexte, nones, vespers, and complines. Its origin is ascribed to pope Gelasius I. about 492. It was first called the *custos*, and afterwards the breviary; and both the clergy and laity use it publicly and at home. It was in use among the ecclesiastical orders about 1080; and was reformed by the councils of Trent and Cologne, and by Pius V., Urban VIII., and other popes. The quality of type in which the breviary was first printed gave the name to the type called *brevier* (in which this line is printed).

BREWERS are traced to Egypt. Brewing was known to our Anglo-Saxon ancestors. *Tindal*. "One William Murle, a rich maltman or brewer, of Dunstable, had two horses all trapped with gold, 1414." *Stow*. In Oct. 1851, there were 2305 licensed brewers in England, 146 in Scotland, and 97 in Ireland; total 2548: these are exclusively of retail and intermediate brewers. There were 40,418 licensed brewers in the United Kingdom in 1858; the revenue from whom to the state was in that year 81,030*l*. In 1858 in England there were 205 great brewers. See *Ale*, *Porter*.

BRIAR'S CREEK, N. America, near which the Americans, 2000 strong, under general Ashe, were totally defeated by the English under general Prevost, March 16, 1779.

BRIBERY, forbidden, *Deut.* xvi. 19. Samuel's sons were guilty of it, B.C. 1112. (1 *Sam.* viii. 3.) Thomas de Weyland, a judge, was banished for bribery in 1288; he was chief justice of the common pleas. William de Thorpe, chief justice of the king's bench, was hanged for bribery in 1351. Another judge was fined 20,000*l*. for the like offence, 1616. Mr. Walpole, secretary-at-war, was sent to the Tower for bribery, in 1712. Lord Strangford was suspended from voting in the Irish house of lords, for soliciting a bribe, January, 1784.

BRIBERY AT ELECTIONS. In 1854 an important act was passed consolidating and amending previous acts relating to this offence, from 7 Will. III. (1695) to 5 & 6 Vict. 184.*

Messrs Sykes and Rumbold fined and imprisoned for bribery . . . March 14, 1776
Messrs Davidson, Parsons, and Hopping, imprisoned for bribery at Ilchester . . . April 28, 1804
Mr. Swan, M.P. for Penryn, fined and imprisoned, and sir Manasseh Lopez sentenced to a fine of 10,000*l*. and to two years' imprisonment for bribery at Grampound . . . Oct. 1819
The members for Liverpool and Dublin unseated in 1831

The friends of Mr. Knight, candidate for Cambridge, convicted of bribery . . . Feb. 20, 1835
Elections for Ludlow and Cambridge made void . . . 1840
Sudbury disfranchised, 1848; St. Alban's . . . 1852
Elections at Derby and other places declared void for bribery, in . . . 1853
Gross bribery practised at Gloucester, Wakefield, and Berwick, in . . . 1859
Mr. Edward Leatham, convicted of bribery at Wakefield July 19, 1860

* On April 17, 1858, in the case of Cooper v. Slade, it was ruled that the payment of travelling expenses was bribery; and in the same year an act was passed which permits candidates to provide conveyances for voters, but forbids payment of travelling expenses.

BRICKS were used in Babylon, Egypt, Greece, and Rome ; in England by the Romans about A.D. 44. Made under the direction of Alfred the Great, about 886. *Saxon Chron.* The size regulated by order of Charles I., 1625. Taxed, 1784. The number of bricks which paid duty in England in 1820 was 949,000,000 ; in 1830, above 1,100,000,000 ; in 1840, 1,400,000,000 ; and in 1850, 1,700,000,000. The duties and drawbacks of excise on bricks were repealed in 1850. In 1839 Messrs. Cooke and Cunningham brought out their machinery by which, it is said, 18,000 bricks may be made in ten hours. Messrs. Dixon and Corbett, near Newcastle, in 1861, were making bricks by steam at the rate of 1500 per hour. The machinery is the invention of Clayton and Co., London.

BRIDEWELL, originally a royal palace of king John, near Fleet-ditch, London, was built anew by Henry VIII., in 1522, and was given to the city for a workhouse by Edward VI. in 1553. The new Bridewell prison was erected in 1829 ; and that of Tothill-fields was rebuilt in 1831.

BRIDGES were first of wood. The ancient stone bridges in China are of great magnitude. Abydos is famous for the bridge of boats which Xerxes built across the Hellespont, 480 B.C. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built in A.D. 105. Brotherhoods for building bridges existed in S. France about 1180.*

Triangular bridge at Croyland Abbey referred to in a charter dated A.D. 943	Sunderland bridge by Wilson, 100 feet high, an arch, with a span of 236 feet 1796
First stone bridge erected at Bow, near Stratford, by queen Matilda about 1100-18	The fine chain suspension bridge at the Menai Strait 1825
Bishop's bridge, Norwich 1295	Westminster, 1750; Blackfriars, 1769; Waterloo, 1817; Southwark, 1819; Hungerford, 1845; Chelsea, 1858; Vauxhall, 1816.
London Bridge: one existed about 978: one built of wood, 1014; one by Peter of Colechurch, 1176-1200: New London Bridge finished 1831	For details see separate articles, and also <i>Tubular bridges, Victoria bridge, &c.</i>
The first large iron bridge, erected over the Severn, Shropshire 1777	

BRIDGEWATER, Somersetshire, was incorporated by king John, in 1200. In the war between Charles I. and the parliament, the forces of the latter reduced part of the town to ashes, 1643. Here stood an ancient castle, in which the ill-advised duke of Monmouth lodged when he was proclaimed king in 1685.

BRIDGEWATER CANAL, the first great work of the kind in England, was begun by the duke of Bridgewater, styled the father of canal navigation in this country, in 1759, and opened 1761. Mr. Brindley was the engineer. It commences at Worsley, seven miles from Manchester ; and at Barton Bridge is an aqueduct which, for upwards of 200 yards, conveys the canal across the river Irwell. The length of the canal is about twenty-nine miles.

BRIDGEWATER TREATISES. The rev. Francis, earl of Bridgewater, died in April, 1829, leaving by will 8000*l.* to be given to eight persons, appointed by the president of the Royal Society, who should each write an essay "on the power, wisdom, and goodness of God, as manifested in the Creation." The essays (by sir Charles Bell, Drs. T. Chalmers, John Kidd, William Buckland, William Prout, J. M. Roget, and the revs. William Whewell and William Kirby) were published in 1834-37.

BRIEF, a written instrument in the Roman Catholic church, of early but uncertain date. Briefs are the letters of the pope despatched to princes and others on public affairs, and are usually written short, hence the name, and are without preface or preamble, and on paper ; in which particulars they are distinguished from *bulls*. The latter are ample and are always written on parchment. Briefs are sealed with red wax and the seal of the fisherman, or St. Peter in a boat, and always in the presence of the pope ; they are used for graces and dispensations, as well as business.

BRIENNE, N.E. France. Here the allied armies of Russia and Prussia were defeated by the French, Feb. 1 and 2, 1814.

BRIGHTON, or **BRIGHTHELMSTONE**, in Sussex, formerly inhabited chiefly by fishermen, now a place of fashionable resort. The length of the esplanade here from the Steyne is about 1250 feet.

* The Devil's bridge in the canton of Uri, so called from its frightful situation, was built on two high rocks, so that it could scarcely be conceived how it was erected, and many fabulous stories were invented to account for it. At Schaffhausen an extraordinary bridge was built over the Rhine, which is there 400 feet wide : there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it : a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. This bridge was destroyed by the French in 1799.

BRIGHTON, *continued.*

Here Charles II. embarked for France after the battle of Worcester . . . 1651
 The Prince of Wales (afterwards George IV.) built the Pavilion, 1784: which was greatly enlarged and altered into a general resemblance of the Kremlin at Moscow, 1784-1823; it was sold to the town for 53,000*l.* . . . 1849
 The Block-house swept away . . . March 26, 1786

Part of the cliff fell, doing great damage, Nov. 16, 1807
 The chain-pier, 1134 feet long and 13 wide, was completed . . . 1823
 Brighton made a parliamentary borough . . . 1832
 The railway to London opened . . . Sept. 21, 1841
 Collision of trains in Clayton tunnel, 23 persons killed and many wounded . . . Aug. 25, 1861

BRISTOL (W. England), built by Brennus, a prince of the Britons, 380 B.C., is mentioned in A.D. 430 as a fortified city. It was called Caer Oder, a city in the valley of Bath; and sometimes, by way of eminence, Caer Brito, the British city, and by the Saxons Brightstowe, pleasant place. Gildas and Nennius speak of Bristol in the fifth and seventh centuries. The city was granted a charter, and made a distinct county, by Edward III. in 1373.

Taken by the earl of Gloucester, in his defence of his sister Maud, the empress, against king Stephen . . . A.D. 1138
 Eleanor of Brittany (daughter of Geoffrey, son of Henry I.) dies in the castle after 39 years' imprisonment . . . 1241
 St. Mary's church built . . . 1292
 Bishopric founded . . . 1542
 A new charter obtained . . . 1581
 Taken by prince Rupert, July 26, 1643; by Cromwell . . . Sept. 1645
 Act passed for new exchange, 1723: erected . . . 1741
 Bread riots . . . 1753
 Bridge built . . . May, 1760
 Attempt to set the shipping on fire . . . Jan. 22, 1777

Riot on account of a toll; the troops fire on the populace, and many are wounded . . . Oct. 25, 1793
 Riot on the entrance of sir Charles Wetherell, the recorder, into the city. He was opposed to the reform bill, and thus obnoxious to the lower classes. The mansion house, the bishop's palace, several merchants' stores, some of the prisons (the inmates liberated), and nearly 100 houses had been burned and many lives lost . . . Oct. 29-31, 1831
 Trial of rioters, Jan. 2 (four were executed and twenty-two transported). Suicide of colonel Brereton, during his trial by court-martial . . . Jan. 9, 1832
 Railway to London completed . . . June 30, 1841

BRISTOL, SEE OF, one of the six bishoprics erected by Henry VIII. out of the spoils of the monasteries and religious houses which that monarch had dissolved, 1542. The cathedral was the church of the abbey of St. Austin, founded here by Robert Fitz-Harding, son to a king of Denmark, and a citizen of Bristol, A.D. 1148. It is valued in the king's books at 338*l.* 8*s.* 4*d.* Paul Bushe, provincial of the Bons-hommes was the first bishop, in 1542—deprived for being married, 1554. The see of Bristol was united by an order in council with that of Gloucester, in 1836, and they now form one see under the name of Gloucester and Bristol. The cathedral which had been under repair since 1844 was reopened in 1861.

RECENT BISHOPS OF BRISTOL.

1803. Hon. G. Polham, translated to Exeter . . . 1807
 1807. John Luxmoore, translated to Hereford . . . 1808
 1808. Wm. Lort Mansel, died . . . June 27, 1820
 1820. John Kaye, translated to Lincoln . . . 1827

1827. Robert Gray died . . . Sept. 28, 1834
 1834. Joseph Allen, the last bishop, translated to Ely in June, 1836. (In October the diocese was united with Gloucester.)

BRITAIN (called by the Romans Britannia,† from its Celtic name *Prydhain, Camden*). The earliest records of the history of this island are the manuscripts and poetry of the Cambrians. The Celts, the ancestors of the Britons and modern Welsh, were the first inhabitants of Britain. It is referred to as the Cassiterides or tin-islands by Herodotus, 450 B.C.; as Albion or Ierne by Aristotle, 350 B.C.; Polybius, 260 B.C. Britain, including England, Scotland, and Wales, was anciently called Albion, the name of Britain being applied to all the islands collectively—Albion to only one. *Pliny*. It was invaded by Julius Cæsar, 55 B.C.; subdued by Agricola, A.D. 84; left by the Romans, about 426; invaded by the Saxons, 429; the southern part became one kingdom under Egbert, 828; subdued by William I., 1066. See *England, Scotland, and Wales*.

Divitiacus, king of the Suessones, in Gaul, said to have supremacy over part of Britain. B.C. 57
 First invasion of Britain by the Romans, under Julius Cæsar . . . 55-54

He defeats Cassivelaunus, general of the Britons, 54
 Cymbeline (Cunobelin) king of Britain . . . 4
 Expedition of Aulus Plautius into Britain A.D. 40

* From the period of Henry II. in the twelfth to the middle of the eighteenth century, Bristol ranked next to London, as the most populous, commercial, and flourishing place in the kingdom; but since the latter time it has declined, and been exceeded in these respects by Liverpool, Manchester, Leeds, Birmingham, and Glasgow.

† The Romans eventually divided Britain into *Britannia Prima* (the country south of the Thames and Severn); *Britannia Secunda* (Wales); *Flavia Cesariensis* (between the Thames, Severn, and Humber); *Maxima Cesariensis* (between the Humber and the Tyne); and *Valentia* (between the Tyne and the Firth of Forth).

BRITAIN, *continued.*

Caractacus defeated by Ostorius, 50; carried in chains to Rome
 Romans defeated by Boadicea; 70,000 slain, and London burnt
 Britons defeated by Suetonius; 80,000 slain
 Agricola conquers Anglesea, and overruns Britain in 7 campaigns
 The emperor Adrian visits Britain, 120; and builds a wall from the Tyne to the Solway
 Lucius king of the Britons, said to have sent an embassy on religious affairs to pope Eleutherius
 The Britons (allies of Albinus) defeated at Lyons by Severus
 Southern Britain subdued and divided by the Romans into two provinces
 Severus keeps his court at York; then called Eboracum, 208; dies there
 Carausius usurps the throne of Britain
 He is killed by Allectus, another usurper
 Constantius recovers Britain from Allectus
 St. Alban and 17,000 Christians martyred (*Bede*)
 Constantius, emperor of Rome, dies at York

Scots and Picts invade Britain, 360; routed by Theodosius
 Roman forces gradually withdrawn from Britain
 The Saxons and Angles are called in to aid the natives against the Picts and Scots
 Having expelled these, the Anglo-Saxons attack the Britons, driving them into Wales
 Many Britons settled in Armorica (Brittany),
 The Saxon Heptarchy; Britain divided into seven or more kingdoms
 Supposed reigns of Vortigern, 446; Vortimer, 464; Vortigern again, 471; Aurelius Ambrosius, 481; and Arthur Pendragon
 The renowned king Arthur said to reign
 Arrival of St. Augustine (or Austin), and re-establishment of Christianity
 Cadwallader, last king of the Britons, reigns
 Lindisfarne church destroyed by the Northmen
 The Saxon Heptarchy ends, and Egbert, king of Wessex, becomes king of England

See *England.*

KINGS OF THE HEPTARCHY.*

KENT. [*The shire of Kent*]
 454. Hengist. [473, Saxon Chronicle.]
 488. Æse, Esca, or Æscus, son of Hengist; in honour of whom the kings of Kent were for some time called Æscings.
 512. Octa, son of Æse.
 542. Hermenric, or Ermenric, son of Octa.
 562. St. Ethelbert; first Christian king (styled *Rex Anglorum*).
 616. Eadbald, son of Ethelbert.
 640. Erconbert, or Ercombert, son of Eadbald.
 664. Eobert, or Egbert, son of Erconbert.
 671. Lothar, or Lothair, brother of Eobert.
 685. Edric; slain in 687. [The kingdom now subject to various leaders.]
 694. Wiltred, or Wilgred.
 725. Eadbert.
 738. Ethelbert II., } sons of Wiltred, succeeding each other.
 760. Alric, }
 794. Eobert, or Ethelbert Pryn; deposed.
 795. Guthred, or Guthred.
 805. Baldred; who in 823 lost his life and kingdom to Egbert, king of Wessex.

SOUTH SAXONS. [*Sussex and Surrey.*]

490. Ella, a warlike prince, succeeded by
 514. Cissa, his son, whose reign was long and peaceful, exceeding 70 years.
 [The South Saxons then fell into an almost total dependence on the kingdom of Wessex.]
 648. Edilwald, Edilwach, Adelwach, or Ethelwach.
 686. Authum and Berthun, brothers; reigned jointly; vanquished by Ina, king of Wessex, 689; kingdom conquered in 725.

EST SAXONS. [*Berks, Southampton, Wilts, Somerset, Dorset, Devon, and part of Cornwall.*]

519. Cerdicus.
 534. Cynric, or Kenric, son of Cerdic.
 560. Ceawlin, son of Cynric; banished; dies in 593.
 591. Ceolric, nephew to Ceawlin.
 597. Ceolwulf.
 611. Cyneigils, and in
 614. Cwichelm, his son reigned jointly.
 643. Cenwal, Cenwahl, or Cenwald.
 672. Sexburga, his queen, sister to Penda, king of Mercia; of great qualities; probably deposed.
 674. Esecwine; in conjunction with Centwine; on the death of Esecwine,
 676. Centwine rules alone.

685. Caadwalla: went to Rome, to expiate his deeds of blood, and died there.
 688. Ina, or Inas, a brave and wise ruler; journeyed to Rome; left an excellent code of laws.
 728. Ethelheard, or Ethelard, related to Ina.
 740. Euthred, brother to Ethelheard.
 734. Sigebryht, or Sigebert; having murdered his friend Cumbrian, governor of Hampshire, was compelled to fly. He was slain by one of his victim's retainers.
 755. Cynewulf, or Kenwulf, or Cenulpe, a noble youth of the line of Cerdic; murdered by a banished subject.
 784. Bertric, or Beorlutr: poisoned by drinking of a cup his queen had prepared for another.
 800. Egbert, afterwards sole monarch of England, and Bretwalda.

EAST SAXONS. [*Essex, Middlesex, and part of Hert.*]

526, 527, or 530. Erchenwin, or Erchwine.
 587. Sledda; his son.
 597. St. Sebert, or Sabert; son of the preceding; first Christian king.
 614. Saxred or Sexted, or Serred, jointly with Sigebert and Seward: all slain.
 623. Sigebert II. surnamed the little: son of Seward.
 655. Sigebert III. surnamed the good; brother of Sebert: put to death.
 661. Swithehn (or Suidhehn), son of Sexhald.
 663. Siger, or Sigeric, jointly with Sebbi, or Sebba, who became a monk.
 693. Sigenard, or Sigehard, and Suenfrid.
 700. Offa; left his queen and kingdom, and became a monk at Rome.
 709. Suebriht, or Seled.
 738. Swithred, or Swithed: a long reign.
 792. Sigeric; died in a pilgrimage to Rome.
 799. Sigered.
 823. Kingdom seized by Egbert of Wessex.

NORTHUMBRIA. [*Lancaster, York, Cumberland, Westmorland, Durham, and Northumberland.*]

* Northumbria was at first divided into two separate governments, *Bernicia* and *Deira*: the former stretching from the river Tweed to the Tyne, and the latter from the Tyne to the Humber.
 547. Ida; a valiant Saxon.
 560. Adda, his eldest son; king of Bernicia.
 — Ella, king of Deira; afterwards the sole king of Northumbria (to 587).

* The term, "Octarchy" is sometimes used; Northumbria being divided into Bernicia and Deira ruled by separate kings.

BRITAIN, *continued.*

567. Glappa, Clappa, or Elapea; Bernicia.
 572. Heodwulf; Bernicia.
 573. Freodwulf; Bernicia.
 580. Theodoric; Bernicia.
 588. Ethelric; Bernicia.
 593. Ethelfrith, surnamed the Fierce.
 617. Edwin, son of Ella, king of Deira in 590. The greatest prince of the Heptarchy in that age. *Hume.* Slain in battle with Penda, of Mercia.
 634. The kingdom divided; Eanfrid rules in Bernicia, and Osric in Deira: both put to death.
 635. Oswald slain in battle.
 642. Osweo, or Oswy; a reign of great renown.
 670. Ecfrid, or Egfrid, king of Northumbria.
 685. Alefrid, or Ealdfirth.
 705. Osred, son of Ealdfirth.
 716. Cenric; sprung from Ida.
 718. Osric, son of Alefrid.
 729. Ceolwulf; died a monk.
 737. Eadbert, or Egbert: retired to a monastery.
 757. Oswulf, or Osulf; slain in a sedition.
 759. Edilwald or Mollo; slain by Alred.
 765. Alred, Ailred, or Alured; deposed.
 774. Ethelred, son of Mollo; expelled.
 778. Elwald, or Celwold; deposed and slain.
 789. Osred, son of Alred; fled.
 790. Ethelred restored; afterwards slain.
 794. Erdulf, or Ardulf; deposed.
 806. Alfwold.
 808. Erdulf restored.
 809. Eanred.
 841. Kingdom annexed by EGBERT.

EAST ANGLES. [*Norfolk, Suffolk, Cambridge, Ely.*]

- 571 or 575. Uffa; a noble German.
 578. Titilus or Titulus; son of Uffa.
 599. Redwald son of Titilus: the greatest prince of the East Angles.
 624. Erpwald, Eorpwald, or Eordwald.
 627. Richbert.
 629. Sigebert, half-brother to Erpwald.
 632. Egfrid or Egrie; cousin to Sigebert.
 635. Anna, or Annas; a just ruler: killed.
 654. Ethelric, or Ethelhere: slain in battle.
 655. Ethelwulf; his brother.
 664. Aldulf, or Aldwulf.

713. Selred, or Ethelred.
 746. Alphwulf.
 749. Beorna and Ethelred, jointly.
 758. Beorna alone.
 761. Ethelred.
 790. Ethelbert, or Ethelbryht; treacherously put to death in Mercia in 792, when Offa, king of Mercia, overran the country, which was finally subdued by EGBERT.

MERCIA. [*Gloucester, Hereford, Chester, Stafford, Worcester, Oxford, Salop, Warwick, Derby, Leicester, Bucks, Northampton, Notts, Lincoln, Bedford, Rutland, Huntingdon, and part of Herts.*]

586. Crida, or Cridda; a noble chieftain.
 593. [Interregnum—Ceolric.]
 597. Wibba, a valiant prince, his son.
 615. Ceorl, or Cheorl; nephew of Wibba.
 626. Penda; fierce and cruel; killed in battle.
 655. Peada, son of Penda; killed to make way for
 656. Wulfhere (brother); he slew his two sons with his own hand.
 675. Ethelred; became a monk.
 704. Cenred, Cendred, or Kenred; became a monk at Rome.
 709. Ceolred, Celred, or Chelred, son of Ethelred.
 716. Ethelbald; slain in a mutiny by one of his own chieftains, his successor, after a defeat in battle.
 755. Beornred, or Bernred: himself slain.
 — Offa; he formed the great dyke on the borders of Wales known by his name.
 794. Egfrid, or Egferth, son of Offa: died suddenly.
 — Cenulph, Cenwulph, or Kenulph; slain.
 819. Kenelm, or Ceneim, a minor; reigned five months; killed by his sister Quendreda, from the hope of reigning. *Hume.*
 — Ceolwulf, uncle to Kenelm; expelled.
 821. Beornulf; killed by his own subjects.
 823. Ludecan; a valiant ruler: slain.
 825. Withlaf, or Wiglaf.
 832. Berthulf, or Bertulf.
 852. Burdred, or Burdred.
 874. Ceolwulf: deposed by the Danes, 877.
 [The kingdom merged into that of England.]

BRITANNIA TUBULAR BRIDGE. See *Tubular Bridge.*

BRITISH ASSOCIATION for the Advancement of Science. It holds annual meetings; the first of which was held at York in 1831. One of its main objects is "to promote the intercourse of those who cultivate science with each other." It also appoints commissions for scientific research. A volume containing Reports of the proceedings is published annually.

BRITISH BANK. See *Banks, Joint Stock.*

BRITISH COLUMBIA. In June 1858 news came to California that in April gold had been found in abundance on the mainland of North America, a little to the north and east of Vancouver's island. A great influx of gold-diggers (in a few weeks above 50,000) from all parts was the consequence. Mr. Douglas, governor of Vancouver's island, evinced much ability in preserving order. The territory was made a British colony with the above title, and placed under Mr. Douglas. The colony was nominated and the government settled by 21 & 22 Vict. c. 99 (Aug. 1858).—For a dispute in July 1859, see *United States*. The colony was stated to be flourishing (1862).

BRITISH INSTITUTION, PALL MALL, (founded in 1805, for the encouragement of British artists) opened Jan. 18, 1806, on a plan formed by sir Thomas Bernard. In the gallery (erected by alderman Boydell, to exhibit the paintings executed for his edition of Shakspeare), are exhibited pictures by the old masters and deceased British artists.

BRITISH LEGION, raised by lord John Hay, col. De Lacy Evans, and others, to assist queen Isabella of Spain against the Carlists in 1835. On May 5, 1836, it defeated them at Hernani, and at St. Sebastian's on Oct. 1, same year.

BRITISH MUSEUM, originated with the grant by parliament (April 5, 1753) of 20,000*l.* to the daughters of sir Hans Sloane, in payment for his fine library, and vast collection of the productions of nature and art, which had cost him 50,000*l.* The library contained 50,000 volumes and valuable MSS., and 69,352 articles of virtu enumerated in the catalogue. Montagu-house was obtained by government as a place for their reception. The museum was opened in 1759, and has since been enormously increased by gifts, bequests, and purchases; by the Cottonian, Harleian, and other libraries; by the Townley marbles (in 1812); by the Elgin marbles (1816); by the Lycian marbles obtained by sir C. Fellows (1842-6); by the Assyrian antiquities collected by Mr. Austin Layard between 1847 and 1850; by the antiquities brought from Halicarnassus (now Budrum), including remains of the celebrated tomb of Mausolus, by Mr. C. T. Newton (Nov. 1858); by antiquities from Carthage (1860) and Cyrene (1861).—George II. presented the Royal Library in 1757, and in 1823, George IV. presented the library collected at Buckingham-house by George III., consisting of 65,250 volumes, and about 19,000 pamphlets. In 1846 the right hon. Thos. Grenville bequeathed to the museum his library, consisting of 20,240 volumes. Great additions to, and improvements in, the buildings have since been made, independently of the annual grant.* The gigantic iron railing enclosing the frontage, was completed in 1852. The magnificent reading-room, erected by Mr. Sydney Smirke, according to a plan by Mr. Antonio Panizzi, the present librarian, at a cost of about 150,000*l.*, was opened to the public, May 11, 1857. The height of the dome is 106 feet, and the diameter 140 feet. The room contains about 80,000 volumes, and accommodates 300 readers.—The daily increasing library contained in 1860 above 562,000 volumes, exclusive of tracts, MSS., &c. A new alphabetical catalogue was completed from A to H in June, 1859. In 1861 the incorporation of the four library catalogues into one alphabet began—three copies being made. The proposed separation of the antiquarian, literary, and scientific collections, was disapproved of by a commission in 1860; and a bill to remove the Natural History Collections to South Kensington was rejected by the commons on May 19, 1862.

BRITISH PORTRAIT GALLERY. See *National*, &c.

BRITTANY, OR BRETAGNE, N. W. France, the ancient Armorica, *which see*. It formed part of the kingdom of the Franks.

Nomenoi revolts and becomes the first count.	A.D. 841	The succession disputed between John of Montfort (John IV.) supported by Edward of England, and Charles of Blois, made duke by Philip VI. of France. John is made prisoner; his wife, Jane, besieged at Hennebounne; holds out, and is relieved by the English, 1343; John of Montfort dies	1345
Geoffroy I., the first duke	992	Charles of Blois defeated and slain at Auray, Sept. 29; John V., son of Montfort, duke. . .	1364
Alan V., 1008; Conan II.	1040	John VI., duke, 1359; Francis I.	1442
Hoel V., 1066; Alan VI.	1084	Peter II., 1450; Arthur III.	1457
Conan III.	1112	Francis II., 1458: takes part with the Orleansists in France; defeated at St. Aubin, July 28, 1488; he dies in 1488; his heiress, Anne, compelled to marry Charles VIII., who annexes Brittany to France.	1491
Hoel VI. expelled; Geoffroy of Anjou, elected duke	1155	Brittany held by the Spaniards, 1591; recovered by Henry IV.	1594
Conan IV. duke, 1156; on the death of Geoffroy, cedes Brittany to Henry II. of England, and betroths his daughter, Constance, to Henry's son Geoffroy (both infants)	1159	The Bretons take part in the Vendean insurrection (see <i>La Vendée</i>) in	1791
Geoffroy succeeds, 1171; killed at a tournament	1185		
His son, Arthur, murdered by his uncle, John of England; his daughter, Eleanor, imprisoned at Bristol (for 39 years)	1202		
Alice, daughter of Constance, and her second husband Guy de Thours, proclaimed duchess, 1203; marries Peter of Dreux, who is made duke	1213		
John I., duke, 1237; John II.	1286		
John III., 1312; dies without issue	1341		

BROAD ARROW, a mark for goods belonging to the royal dockyards or navy, is said to have been ordered to be used in 1698, in consequence of robberies.

"BROAD BOTTOM" ADMINISTRATION, so called because it comprised nine dukes and a grand coalition of all parties, was formed Nov. 1744; and dissolved by the death of Mr. Pelham, March 6, 1754. *Coax.*

* The total expenditure by the government on the British Museum for the year ending March 31, 1860, was 78,445*l.*; 1861, 92,776*l.* the number of visitors to the general collection in 1859 was 517,295; in 1861, 536,939.

“BROAD BOTTOM” ADMINISTRATION, *continued.*

Henry Pelham, *first lord of the treasury and chancellor of the exchequer.*
 Duke of Dorset, *president of the council.*
 Earl Gower, *lord privy seal.*
 Duke of Newcastle, and the earl of Harrington, *secretaries of state.*
 Duke of Montagu, *master-general of the ordnance.*
 Duke of Bedford, *first lord of the admiralty.*

Duke of Grafton, *lord chamberlain.*
 Duke of Richmond, *master of the horse.*
 Duke of Argyll, *keeper of the great seal of Scotland.*
 Marquess of Tweeddale, *secretary of state for Scotland.*
 Lord Hardwicke, *lord chancellor.*
 All of the cabinet.
 The duke of Devonshire and duke of Bolton were *not* of the cabinet.

BROCADE, a silken stuff, variegated with gold or silver, and enriched with flowers and figures, originally made by the Chinese. *Johnson.* Its manufacture was successfully established at Lyons in 1757.

BROCOLI. An Italian plant. *Pardon.* The white and purple were brought to England from Cyprus, in the 17th century. *Anderson.* About 1603. *Burns.* It became abundant about 1680. *Anderson.*

BROKERS, both of money and merchandise, were known early in England. See *Appraisers.* They are licensed, and their dealings regulated by law in 1695-6, 1816, and 1826. The dealings of *stock-brokers* were regulated in 1719, 1733, and 1736, and subsequently. See *Pawnbroker* and *Barnard's Act.*

BROMINE (from the Greek, *brōmos*, a stink), a poisonous volatile liquid element discovered in salt water by M. Balard in 1826. It is found in combination with metals and mineral waters, but not as yet in the free state.

BRONZE was known to the ancients, some of whose bronze statues, vessels, &c. are in the British Museum. The bronze equestrian statue of Louis XIV., 1699, in the Place Vendôme at Paris (demolished Aug. 10th, 1792), the most colossal ever made; it contained 60,000 lbs. Bronze is composed of copper and tin, with sometimes a little zinc and lead. *Ure.* The bronze coinage (composed of 95 copper, 4 tin, 1 zinc), came into circulation Dec. 1860.

BROWNISTS, the first Independents (*which see*), began with Robert Brown, a school-master in Southwark, about 1580. Henry Penry, and other Brownists were cruelly executed May 29, 1593.

BRUCE'S TRAVELS. James Bruce, the “Abyssinian Traveller,” set out in June, 1768, to discover the source of the Nile. Proceeding first to Cairo, he navigated the Nile to Syene, thence crossed the desert to the Red Sea, and, arriving at Jedda, passed some months in Arabia Felix, and after various detentions reached Gondar, the capital of Abyssinia, in Feb. 1770. On Nov. 14th, 1770, he obtained a sight of the sources of the Nile. He returned to England in 1773, and died in 1794.

BRUGES, Belgium, in the 7th century was capital of Flanders, and in the 13th and 14th centuries had become almost the commercial metropolis of the world. It suffered much through an insurrection in 1488, and the consequent repression. It was incorporated with France in 1794, with the Netherlands in 1815, and with Belgium in 1830.

BRUNSWICK, HOUSE OF. The duchy of Brunswick, in Lower Saxony, was conquered by Charlemagne, and governed afterwards by counts and dukes. Albert-Azzo, marquis of Italy and lord of Este, died in 1055, and left by his wife Cunegonde (the heiress of Guelph, duke of Carinthia in Bavaria), a son, Guelph, who was invited into Germany by Imtza, his mother-in-law, and invested with all the possessions of his wife's step-father, Guelph of Bavaria. (See *Bavaria*.) His descendant, Henry the Lion, married Maud, daughter of Henry II. of England, and is always looked upon as the founder of the Brunswick family. His dominions were very extensive: but having refused to assist the emperor Frederick Barbarossa in a war against pope Alexander III., through the emperor's resentment he was proscribed at the diet at Wurtzburg, in 1180. The duchy of Bavaria was given to Otho, from whom is descended the family of Bavaria; the duchy of Saxony to Bernard Aseanius, founder of the house of Anhalt; and his other territories to different persons. On this, he retired to England; but at the intercession of our Henry II. Brunswick and Lunenburg were restored to him. The house of Brunswick in 1409 divided into several branches.—Brunswick was included by Napoleon in the kingdom of Westphalia in 1806, but was restored to the duke in 1815.—Population of the duchy of Brunswick in 1858, 273,400.

DUKES OF BRUNSWICK.

1139. Henry the Lion, succeeded by
 1195. Henry the Long and William (sons).
 1213. Otho I. (son of William).

1252. Albert I. (son of preceding).
 1278. Albert II. (son).
 1318. Otho, Magnus I. and Ernest (sons).
 1368. Magnus II. (Torquatus) (son of Magnus I.).

BRUNSWICK, HOUSE OF, *continued.*

DUKES OF BRUNSWICK-WOLFENBUTTEL.

First Branch.

1409. Henry I. (son of Magnus II.)
 1416. William I. and Henry II. (sons).
 1482. Frederic and William II. } sons of William I.
 1495. Henry III. and Eric. }
 1514. Henry IV. (son of Henry II.)
 1568. Julius (son of preceding).
 1589. Henry Julius (son).
 1613. Frederic-Ulric (son), died without issue.

Second Branch.

1634. Augustus (son of Henry of Luneburg).
 1666. Rodolph-Augustus; who associated his next brother, Anthony-Ulric, in the government, from 1685; died, 1704.
 1704. Anthony-Ulric now ruled alone; became a Roman Catholic in 1710; died in 1714.
 1714. Augustus-William (son).
 1731. Lewis-Rodolph (brother).
 1735. Ferdinand-Albert, duke of Brunswick-Bevern, married Antoinette-Amelia, daughter of Lewis-Rodolph, and succeeded him.
 — Charles (son).
 1780. Charles-William-Ferdinand (son): a great general (served under his uncle Ferdinand in the Seven Years' War, 1756-1763); married princess Augusta of England; was killed at the battle of Auerstadt, Oct. 14, 1806; succeeded by his fourth son (his elder sons being blind, abdicated).
 1806. Frederick-William, whose reign may be dated from the battle of Leipzig in Oct. 1813; fell at Quatre-Bras, commanding the *avantgarde* under the duke of Wellington, June 16, 1815; succeeded by his eldest son,

1815. Charles-Frederick-William. • [Revolution at Brunswick; the duke retires to England, 1830.]
 1830. William-Augustus-Louis, brother; born April 25, 1806; succeeded Sept. 7, 1830, provisionally; and, on the demand of the Germanic diet, definitely, April 25, 1831; the PRESENT duke (1862); *unmarried*.

DUKES OF BRUNSWICK-LUNEBURG.

1409. Bernard (son of Magnus II., duke of Brunswick. *See above*).
 1434. Otho and Frederic (his sons).
 1478. Henry (son of Otho).
 1532. Ernest I. (son of Otho). His sons were,
 1546. Henry (founder of second branch of Brunswick-Wolfenbuttel), and William, whose seven sons cast lots to determine who should marry. The lot fell on GEORGE, sixth son. Four of the brothers reigned, viz:—
 1592. Ernest II.
 1611. Christian. } no issue.
 1633. Augustus.
 1636. Frederic II.
 1648. Christian-Lewis (son of the George above mentioned).
 1665. George-William (brother of Christian-Lewis), dies in 1705; leaving as heiress, SOPHIA-DOROTHEA, his daughter, who married in 1682 her cousin, prince GEORGE-LEWIS of Hanover, afterwards George I. of England (son of Ernest of Hanover, youngest son of the above-mentioned George).

(See *Hanover and Eng'land*.)

BRUNSWICK CLUBS, established to maintain the house of Hanover and the Protestant ascendancy in church and state, began in England at Maidstone, in Sept. 1828; in Ireland, at the Rotunda in Dublin, Nov. 4, same year.

BRUSSELS, capital of Austrian Brabant, and of Belgium (since 1831), was founded by St. Gery of Cambray, in the 7th century. It is celebrated for its fine lace, camlets, and tapestry. The *Hôtel de Ville* has a turret 364 feet in height; and on its top is a copper figure of St. Michael, 17 feet high, which turns with the wind. *See Belgium*.

Bombarded by Marshal Villeroy, when 14 churches and 4000 houses were destroyed, Aug. 1695
 Taken by the French, 1746; and by Dumouriez, 1792
 The revolution commences . . . Aug. 25, 1830
 The costly furniture of 16 principal houses was demolished in consequence of an injudicious

display of attachment to the house of Orange in a riot on . . . April 5, 1834
 Maritime conference to obtain uniform meteorological observations held here . . . 1853
 International philanthropic congress meet, Sept. 1856
 International association for social science to meet here on . . . Sept. 22-25, 1862

BRUTTIUM, a province of S. Italy (now Calabria Oltra). The Bruttians and Lucanians defeated and slew Alexander of Epirus at Pandosia, 332 B.C. They were conquered by the Romans, 277 B.C.

BUBBLE COMPANIES. *See Companies, Law's Bubble, and South-Sea Bubble.*

BUCCANEERS, * piratical adventurers, chiefly French, English, and Dutch, who commenced their depredations on the Spaniards of America soon after the latter had taken possession of that continent and the West Indies. Their numbers were much increased by a twelve years' truce between the Spaniards and Dutch, in 1609, when many of the discharged sailors joined the Buccaneers, and extended the range of their ravages. The first levy of ship-money in England in 1635 was to defray the expense of chastising these pirates. The principal commanders of the first Buccaneers were Montbar, Lolonois, Basco, and Morgan, said to have murdered thousands and plundered millions. The expedition of Van Horn, of Ostend, was undertaken in 1603; that of Gramont in 1685; and that of Pointis in 1697.

BUCENTAUR, the vessel in which the doge of Venice used to proceed to wed the Adriatic, from the twelfth to the eighteenth century.

* Raynal asserts that the name is derived from a Caribbee word *boucan*, signifying the place where the native savages dried their food by smoke; a custom necessarily adopted by the pirates from their mode of life.

BUCHANITES (in Scotland): followers of Margaret Buchan, who about 1779 promised to conduct them to the new Jerusalem, prophesied the end of the world, and maintained many absurd doctrines, which appeared to arise from a disordered mind. She died in 1791, when her followers dispersed.

BUCHAREST (in Wallachia). Preliminaries of peace were ratified at this place between Russia and Turkey, it being stipulated that the Pruth should be the frontier of the two empires; signed May 28, 1812. The subsequent war between these powers altered many of the provisions of this treaty. Bucharest was occupied by the Russians, Turks, and Austrians successively in the Crimean war. The last quitted it in 1856.

BUCKINGHAM PALACE (London). The original edifice (Buckingham-house) was built on the site known as Mulberry-gardens, by John Sheffield, duke of Buckingham, in 1703. In 1761 it was bought by George III., who in 1775 settled it on his queen, Charlotte. She made it her town residence; and here all her children, with the exception of the eldest, were born. Here were married the duke of York and princess Frederica of Prussia, in 1791; the duke of Gloucester and princess Mary, 1816; the prince of Hesse-Homburg and princess Elizabeth, 1818; and the duke of Cambridge and princess of Hesse, same year. The house was pulled down in 1825, and the new palace commenced on its site. After an expenditure of nearly a million sterling it was completed, and taken possession of by queen Victoria, July 13, 1837. It is now her ordinary London residence. Further improvements were made in 1853. The marble arch, taken down from the exterior of this palace, was re-erected at Cumberland-gate, Hyde-park, March 29, 1851.

BUCKLERS, used in single combat, are said to have been invented by Prætus and Acrisius of Argos, about 1370 B.C. When Lucius Papirius defeated the Samnites, he took from them bucklers of gold and silver, 309 B.C. The light cuirass of the horse-soldiers called cuirassiers, is something akin to the ancient buckler.

BUCKLES were first worn instead of shoe-strings in the reign of Charles II., and soon became fashionable and expensive from the richness of their material; about 1791 they had fallen out of use. Buckles continue to be used in court dress and by persons of rank in most countries of Europe.

BUDA, on the Danube, once called the Key of Christendom, is, in conjunction with Pesth, the capital of Hungary. It was taken by Charlemagne in 799; and sacked by Solymán II. after the battle of Mohatz, when the Hungarian king, Louis, was killed, and 200,000 of his subjects carried away captives, 1526. Buda was sacked a second time, when the inhabitants were put to the sword, and Hungary was annexed to the Ottoman empire, 1541. Retaken by the Imperialists, under the duke of Lorraine, and the Mahometans delivered up to the fury of the soldiers, 1686. It suffered much in 1848-9. See *Hungary*.

BUDE LIGHT (so named from Bude in Cornwall, the residence of Mr. Goldsworthy Gurney, its inventor), consists of two or more concentric argand gas-burners, one rising above another, which produce a most brilliant flame, like the petals of a rose. The illuminating powers were increased by subjecting to the action of the flame manganese, &c., in order to produce oxygen and hydrogen gas. The patent was issued in 1841.

BUDDHISM, the religion (formerly of India, and now of a large part of Asia beyond the Ganges and Japan), from which Brahminism is said to be derived. Buddha (also Bud, Bot, and Poot), or the Wise, flourished about 1000 or 800 B.C. The Buddhists believe that the soul is an emanation from God, and that if it continue virtuous, it will return to him on the death of the body; but if not so, that it will undergo various degrees and changes of abode. Buddhism was expelled from India about A.D. 956.

BUDGET (from the French *bougette*, a small bag), a term applied to the English chancellor of exchequer's statement of the finances of the country. The budgets of sir R. Peel in 1842 (including the income-tax) and 1846 (free trade), and of Mr. Gladstone in 1860 (in connection with the treaty with France), are the most important in recent times.

BUENOS AYRES, a republic of S. America. The country was explored by Sebastian Cabot in 1526, and the capital founded by Don Pedro de Mendoza in 1535. In 1585 the city was rebuilt, and recolonised, after several abandonments. A British fleet and army under sir Home Popham and general Beresford, took the city with slight resistance in 1806, but it was retaken Aug 12, after six weeks' possession. Monte Video was taken by storm by sir Samuel Auchmuty, Feb. 3, 1807, but evacuated July 7, following. See *Monte Video*. The British suffered a dreadful repulse here, in an expedition of 8000 men under general Whitelock (who was disgraced), July 7, 1807. On entering the town they were attacked by a superior force of musketry and grape from every quarter, and perished in great numbers,

without occasioning any corresponding loss to the enemy. A convention followed, by which the British were allowed to re-embark in their ships. The peace of Buenos Ayres was disturbed in the beginning of the last century by rival chiefs, who defied the authority of Spain, but after great havoc and bloodshed they were quieted.

Independence of the province, declared July 19, 1816;
—population in 1859 about 350,000.
Recognised as forming part of the Argentine
confederation Feb. 1822
[A prey to civil war through the violent in-
trigues of Rosas, Oribe, Urquiza, and others,
for many years.]
Oribe defeated by general Urquiza, to whom
Buenos Ayres capitulates Feb. 3, 1852
Rosas flees, arrives at Plymouth April 25, 1852
Urquiza deposed Sept. 10; invests the city
Dec. 28, 1852
After some successes he retires; Buenos Ayres
secedes from the Argentine confederation,
and is recognised as an independent state. The

first governor, Dr. D. Pastor Obligado, elected
Oct. 12, 1853
Dr. Valentin Alsina, elected governor May, 1857
War breaks out, Urquiza, general of the forces
of the Argentine confederation, has an inde-
cisive conflict with the Buenos Ayres general
Mitra Oct. 23, 1859
A treaty signed, by which Buenos Ayres is re-
united with the Argentine confederation
Nov. 11, 1859
Fresh contests: Mitra defeats Urquiza in an
almost bloodless contest at Pavon; Urquiza
retires; (Buenos Ayres hopes to recover her
supremacy) Sept. 17, 1861

BUFFOONS were originally mountebanks in the Roman theatres. Their shows were discouraged by Domitian, and abolished by Trajan, A.D. 98. See *Jesters*.

BUILDING. See *Architecture*. The first structures were of wood and clay, then of rough stone, and in the end the art advanced to polished marble. Building with stone was early among the Tyrians; and as ornaments and taste arose, every nation pursued a different system. Building with stone in England may be referred to Benedict the monk, about A.D. 670. In Ireland a castle was built of stone at Tuam by the king of Connaught, in 1161; and it was "so new and uncommon as to be called the *Wonderful Castle*." Building with brick was introduced by the Romans into their provinces. Alfred encouraged it in England, in 886. It was generally adopted by the earl of Arundel, about 1598, London being then almost built of wood.

BUILDING ACTS were passed by Elizabeth in 1562, 1580, and 1592; and by Charles II. in 1667. Recent acts are very numerous; and building is now regulated by stringent provisions enforced by law. The Building Act for the Metropolis is 7 & 8 Vict. c. 84 (1844), amended in 1855 and 1860.

BUILDING SOCIETIES, formed to enable a person to purchase a house by paying money periodically to a society for a certain number of years, instead of paying rent to a landlord, began about 1836, when an act was passed for their regulation.

BULGARIA, anciently Moesia, now part of European Turkey. The Bulgarians were a Slavonian tribe, who harassed the Eastern empire and Italy from A.D. 499 to 678, when they established a kingdom. They defeated Justinian II., 687; but were subdued, after several conflicts, by the emperor Basil, in 1018, who, in 1014, having taken 15,000 Bulgarian prisoners, caused their eyes to be put out, leaving one eye only to every hundredth man, to enable him to conduct his countrymen home. The kingdom was re-established in 1096; but after many changes, it became part of the Ottoman empire, in 1391. In Jan. 1861, it was stated that the Bulgarians had seceded from the Greek to the Roman church.

BULL, OR EDICT OF THE POPE. The bull is, properly, the seal, deriving its name from *bulia*, made either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul; and, on the other, the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Bulls were forbidden to be promulgated in England, in 1571. Bulls consigning queen Elizabeth and her abettors to hell-fire, accompanied the Spanish Armada, 1588. The bull *Unigenitus* against the Jansenites was issued by Clement XI. in 1713. The **GOLDEN BULL** of the emperor Charles IV., so called from its golden seal, was made the fundamental law of the German empire, at the diet of Nuremberg, 1356.

BULL-BAITING, OR BULL-FIGHTING, a sport somewhat equivalent to the fights of the gladiators among the Romans, still exists in Spain, where the ladies are among the spectators. It is recorded as being an amusement at Stamford so early as the reign of John, 1209. Bull-running was a sport at Tutbury in 1374. In the *Sports of England*, we read of the "Easter fierce hunts, when foaming boars fought for their heads, and lusty bulls and huge bears were baited with dogs;" and near the *Clink*, London, was the Paris, or Bear, Garden, so celebrated in the time of Elizabeth for the exhibition of bear-baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of the late Mr. Windham, who made a singular speech in favour of the custom, May 24, 1802. *Butler*. It has since been declared illegal. See *Cruelty to Animals*. Bull-fights were intro-

duced into Spain about 1260 : abolished there, "except for *pious* and *patriotic* purposes," in 1784. In June 1833, ninety-nine bulls were killed at bull-fights at Madrid. There was a bull-fight at Lisbon, at Campo de Santa Anna, attended by 10,000 spectators, on Sunday, June 14, 1840.

BULLETS of stone were in use 1514. Iron ones are mentioned in the *Federa*, 1550. Lead bullets were made before the close of the sixteenth century, and continue in use in all nations. The cannon-ball in some eastern countries was long of stone. *Ashe*. The conoidal cup rifle-ball was invented by capt. Minié, about 1833 ; a modification of this (conoidal but without cup), by Mr. Pritchett (1853), is used with the Enfield rifle. Other bullets have been since devised.

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1810, principally guided by Mr. Horner and Mr. (afterwards sir R.) Peel, established the conclusion, that paper money is always liable to be over-issued and consequently depreciated; unless it be at all times immediately convertible into gold. This principle has been adopted in British monetary arrangements.

BULWER-CLAYTON TREATY, ratified July 4, 1850, by which sir Henry Lytton Bulwer on behalf of the British, and Mr. Clayton on behalf of the American government, declared that neither would obtain any exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty and the connection of Great Britain with the Mosquito territory (*which see*), which were settled in 1857.

BUNKER'S-HILL (near Boston, U.S.), the site of a battle on June 17, 1775, between the British (nearly 3000) and the revolted Americans (about 2000), who were ultimately defeated with considerable loss. It was one of the earliest actions in the war, and the Americans refer to it with national pride, on account of the heroic resistance against superior numbers. Ralph Farnham, who was present at the battle, died on Dec. 28, 1860, aged 104½ years. He was introduced to the prince of Wales when in America.

BUONAPARTE. See *France*.

BURFORD CLUB, the appellation given (according to Mr. Lyster, the barrister, a conspirator, see *Lyster*) by the Pretender and his agents, to a club of Tory lords and others, of which lord Orrey was chairman, and lord Strafford, sir Henry Goring, lord Cowper, Mr. Hutcheson, the bishop of Rochester, sir Constantine Phipps, general Webb, lord Bingley, lord Craven, Mr. Dawkins, lord Scarsdale, lord Bathurst, Mr. Shippen, and lord Gower, were members. This club was said to meet at the members' houses, to form designs against the government. This story was set aside by the solemn declarations of lord Cowper and lord Strafford, that they did not know of its existence. The list of this pretended club was published in the *Weekly Journal*, printed in Whitefriars ; but when Read, the printer of the paper, was ordered to appear at the bar of the house, he absconded. March, 1722. *Salmon*.

BURGESSES, from the French *Bourgeois*, a distinction coeval in England with its corporations. They were called to parliament in England, A.D. 1265 ; in Scotland, in 1326 ; and in Ireland, about 1365. Burgesses to be resident in the places they represented in parliament, 1 Hen. V. 1413. *Viner's Statutes*. See *Borough*.

BURGHHER SECEDERS are dissenters from the church of Scotland. Their separation from the associate presbytery arose from a difference of sentiment regarding the lawfulness of taking the burgh oath, 1739. Their number has been always small.

BURGLARY, until the reign of George IV., was punished with death. Formerly to encourage the prosecution of offenders, he who convicted a burglar was exempted from parish offices, 10 & 11 Will. III. 1699 ; Statute of Rewards, 5 Anne, 1706 ; and 6 Geo. I. 1720. Receivers of stolen plate and other goods, to be transported, 10 Geo. III. 1770. Persons having upon them picklock-keys, &c., to be deemed rogues and vagabonds, 13 Geo. III. 1772-3. The laws with respect to burglary were amended by Mr. (afterwards sir Robert) Peel's acts, between 4 & 10 Geo. IV. 1823 and 1829.

BURGOS (Spain), the burial place of the Cid, 1099. Lord Wellington entered Burgos on Sept. 19, after the battle of Salamanca (fought July 22, 1812). The castle was besieged by the British and allied army, but the siege was abandoned, Oct. 21, same year. The fortifications were blown up by the French, June 12, 1813.

BURGUNDY, a large province in France, derives its name from the Burgundians, a Gothic tribe who overran Gaul in A.D. 275, but were driven out by the emperor Probus : they returned in 287, and were defeated by Maximin. In 413 they established a KINGDOM,

comprising the present Burgundy, large parts of Switzerland, with Alsace, Savoy, Provence, &c. Gondicar, their leader, was the first king.—The *second* kingdom, consisting of a part of the first, began with Gontran, son of Clotaire I. of France, in 561. The kingdom of Arles, Provence, and Transjurane Burgundy, were formed out of the old kingdom.—In 877, Charles the Bald made his brother-in-law Richard the first *DUKE* of Burgundy. In 938, Hugh the Great, count of Paris, founder of the house of Capet, obtained the duchy. His descendant, Henry, on becoming king of France, conferred it on his brother Robert, in whose family it remained till the death of Philippe de Rouvre, without issue, in 1361. In 1363, king John of France made his fourth son, Philip, duke, who greatly enlarged his dominions by marrying the heiress of Louis, count of Flanders, Artois, &c.

1363. Philip the Bold.

1404. John the Fearless (son), joined English invading France; supposed to have been privy to the assassination of the duke of Orleans in 1407; was himself assassinated at Montreuil, in the presence of the dauphin, Sept. 1419.

1419. Philip the Good (son), the most powerful duke in the world; married to Margaret of York, sister to Edward IV.

1467. Charles the Bold; killed in an engagement with the Swiss, before Nancy, Jan. 4, 1477.

1477. Mary (daughter); married Aug. 1477, to Maximilian of Austria; died March 27, 1482.

1479. Louis XI. annexed Burgundy to France. The other dominions fell to Austria.

(See *Austria and Germany*).

BURIALS. Abraham buried Sarah at Machpelah, 1860 B.C., *Gen.* xxiii. Places of burial were consecrated under pope Calixtus I. in A.D. 210. *Eusebius.* The Greeks had their burial-places at a distance from their towns; the Romans near the highways; hence the necessity for inscriptions on tombs. The first Christian burial-place was instituted in 596; burial in cities, 742; in consecrated places, 750; in churchyards, 758. Many of the early Christians are buried in the catacombs at Rome. See *Catacombs*. Vaults were erected in chancels first at Canterbury, 1075. Woollen shrouds were used in England, 1666. Linen scarfs were introduced at funerals in Ireland, 1729; and woollen shrouds used, 1733. Burials were taxed, 1695—again, 1783. The acts relating to metropolitan burials were passed 1853, 1854, 1855, and 1857. See *Cemeteries*. Parochial registers of burials, births, and marriages, were instituted in England by Cromwell, lord Essex, about 1538. *Stow.* A tax was enacted on burials in England—for the burial of a duke 50*l.*, and for that of a common person 4*s.*—under Will. III. 1695, and Geo. III. 1783. *Statutes.* See *Bills of Mortality*.

BURKING, a new species of murder, committed in Britain, thus named from Burke, the first known criminal by whom it was perpetrated. His victims were killed by pressure or other modes of suffocation, and the bodies, which exhibited no marks of violence, were sold to the surgeons for dissection. He was executed at Edinburgh, in February 16, 1829. A monster named Bishop was apprehended in Nov. 1831, and executed in London, Dec. 5, with Williams, one of his accomplices, for the murder of a poor friendless Italian boy named Carlo Ferrari. They confessed to this and other similar murders.

BURLINGTON HEIGHTS. Here a fierce contest took place between the British and the United States American forces, June 6, 1813. The British carried the heights.

BURMESE, or BIRMAN, EMPIRE, founded in the middle of the last century by Alompra, the first sovereign of the present dynasty. Our first dispute with this formidable power in 1795, was amicably adjusted by general Erskine. Hostilities were commenced by the British in 1824, when they took Rangoon. The fort and pagoda of Syriam were taken in 1825. After a short armistice, hostilities were renewed, Dec. 1, same year, and pursued until the successive victories of the British led to the cession of Arracan, and to the signature of peace, Feb. 24, 1826. For the events of this war, and of the war in 1851, see *India*. Pegu was annexed to our Indian empire, Dec. 20, 1852. The war ended June 20, 1853.

BURNING ALIVE was inflicted among the Romans, Jews, and other nations, on the betrayers of counsels, incendiaries, and for incest. The Britons punished heinous crimes by burning alive in wicker-baskets. See *Stonehenge*.—This punishment was countenanced by bulls of the pope; and witches suffered in this manner. See *Witches*. Many persons have been burned alive on account of religious principles. The first sufferer was sir William Sawtre, parish priest of St. Osyth, London, 3 Hen. IV., Feb. 9, 1401. In the reign of Mary, numbers were burned; among others, Ridley, bishop of London; Latimer, bishop of Rochester; and Cranmer, archbishop of Canterbury; at Oxford in 1555 and 1556.* Bartholomew Leggatt and Edward Wightman were burned for heresy in 1612, by warrant of James I.

* It is computed, that during the three years of Mary's reign, there were 277 persons brought to the stake; besides those who were punished by imprisonment, fines, and confiscations. Among those who suffered by fire were 5 bishops, 21 clergymen, 8 lay gentlemen, 84 tradesmen, 100 hu. bandmen, servants,

BURNING THE DEAD was practised among the Greeks and Romans, and the poet Homer gives descriptions of it. It was very general about 1225 B.C., and was revived by Sylla about 78 B.C. It is still practised in parts of the East Indies. See *Suttees*, *Barrows*.

BURNING-GLASS AND CONCAVE MIRRORS. Their power was known to Archimedes, and it is even asserted that by their aid he burnt a fleet in the harbour of Syracuse, 214 B.C.; their powers have been increased by Settalla; Tschirnhausen, 1680; Buffon, 1747; and Parker and others more recently. The following experiments were made about 1800, with Mr. Parker's lens or burning mirror, which cost 700*l.*, and is said to have been the largest ever made. It was sold to capt. Mackenzie, who took it to China, and left it at Pekin:

<i>Substances fused.</i>	<i>Weight.</i>	<i>Time.</i>	<i>Substances fused.</i>	<i>Weight.</i>	<i>Time.</i>
Pure gold	20 grains	4 seconds.	A crystal pebble	7 grains	6 seconds.
Silver	20 "	3 "	Flint	10 "	30 "
Copper	33 "	20 "	Cornelian	10 "	75 "
Platina	10 "	3 "	Pumice stone	10 "	24 "
Cast iron (a cube)	10 "	3 "	Green wood takes fire instantaneously; water boils		
Steel	10 "	12 "	immediately; bones are calcined; and things not		
A topaz	3 "	45 "	capable of melting, at once become red-hot, like		
An emerald	2 "	25 "	iron.		

BURWELL FIRE. A number of persons assembled to see a puppet-show in a barn at Burwell near Newmarket, Sept. 8, 1727. A candle having set fire to a heap of straw, seventy-six individuals perished, and others died of their wounds.

BURY ST. EDMUND'S, Suffolk, named from St. Edmund, king of East Anglia, who was murdered by the Danes in 870, and buried here, and to whom its magnificent abbey was founded. It shares with Runnymede the honour of producing Magna Charta in 1215; it having been prepared here by the barons in 1214. Henry VI. summoned a parliament in 1447, when Humphrey, duke of Gloucester, was imprisoned, and died here, it is supposed by poison. It was almost consumed by fire in 1608; and was desolated by plague in 1636.

BURYING ALIVE. A mode of death adopted in Boeotia, where Creon ordered Antigone, the sister of Polynices, to be buried alive, 1225 B.C. The Roman vestals were subjected to it for any levity that excited suspicion of their chastity. The vestals buried alive on a charge of incontinence, were Minutia 337 B.C.; Sextilla, 274 B.C.; Cornelia, A.D. 92. Lord Bacon gives instances of the resurrection of persons who had been buried alive; the famous Duns Scotus is of the number. The two assassins of Capo d'Istria, president of Greece, were sentenced to be immured in brick walls built around them up to their chins, and to be supplied with food in this species of torture until they died, Oct. 1831.

BUSACO, OR BUZACO (Portugal). Here the British, under lord Wellington, repulsed the French army, commanded by Massena, Sept. 27, 1810. The latter losing one general and 1000 men killed, two generals and about 3000 men wounded, and several hundred prisoners; the loss of the allies did not exceed 1300. The British retreated to the lines of Torres Vedras, which were too strong for Massena to force, and the two armies remained in sight of each other to the end of the year.

BUSHEL. This measure was ordered to contain eight gallons of wheat, 12 Henry VIII. 1520; the legal Winchester bushel was regulated 9 Will. III. 1697; the imperial corn bushel of 2218·192 cubic inches is to the Winchester of 2150·42, as 32 to 31. Regulated by act 5 Geo. IV. June, 1824, which act came into operation Jan. 1, 1826.

BUSHIRE (on the Persian Gulf), attacked by sea by sir H. Leake and by land by general Stalker, was taken Dec. 10, 1856. The place proved stronger than was expected, and was bravely defended. Brigadier Stopford and col. Malet were killed in a previous attack on the fort at Reshire, Dec. 9. The loss of the British was four officers killed, and one wounded; five men killed and 35 wounded.

BUSTS. This mode of preserving the remembrance of the human features is the same with the *hermæ* of the Greeks. Lysistratus, the statuary, was the inventor of moulds, from which he cast wax figures, 328 B.C. *Pliny*. Busts from the face in plaster of Paris were first taken by Andrea Verrochi, about A.D. 1466. Smaller busts and statuettes are now accurately produced from larger ones by machinery.

BUTCHERS. Among the Romans there were three classes: the *Suarii* provided hogs, the *Boarii* oxen, which the *Lanii* killed. The butchers' company in London is ancient, although not incorporated till 1604.

and labourers, 55 women, and 4 children. The principal agents of the queen were the bishops Gardiner and Bonner. The latter is said to have derived a savage pleasure from witnessing the torture of the sufferers.

BUTE ADMINISTRATION. John earl of Bute, tutor of prince George (afterwards George III.), obtained great influence over him. His administration formed in May, 1762, resigned April, 1763. It was severely attacked by Junius and John Wilkes.

John, earl of Bute, *first lord of the treasury*.
Sir Francis Dashwood, *chancellor of the exchequer*.
Lord Grenville, *president of the council*.
Duke of Bedford, *privy seal*.
Earl of Halifax, *admiralty*.
Earl of Egremont and George Grenville, *secretaries of state*.

Lord Ligonier, *ordnance*.
Henry Fox, afterwards lord Holland, *paymaster of the forces*.
Viscount Barrington, *treasurer of the navy*.
Lord Sandys, *first lord of trade*.
Duke of Marlborough, earl Talbot, lord Huntingdon, lord North, &c.

BUTTER. It was late before the Greeks had any notion of butter, and by the early Romans it was used only as a medicine—never as food. The Christians of Egypt burnt butter in their lamps instead of oil, in the third century. Butter forming an important article of commerce as well as food in these countries, various statutes have passed respecting its package, weight, and sale; the principal of which are the 36th and 38th Geo. III. and 10 Geo. IV. 1829. In 1675, there fell in Ireland, during the winter time, a thick yellow dew, which was said to have all the medicinal properties of butter.—In Africa, vegetable butter is made from the fruit of the shea tree, and is of richer taste, at Kebba, than any butter made from cow's milk. *Mungo Park*. The import duty of 5s. per cwt. on foreign butter (producing in 1859, 104,587*l.* on 421,354 cwts.) was repealed in 1860.

BUTTONS, an early manufacture in England; those covered with cloth were prohibited by a statute, thereby to encourage the manufacture of metal buttons, 8 Geo. I. 1721. They are now made of glass, porcelain, &c.

BUGAR, a town in Bengal, near to which, on Oct. 22, 1764, sir Hector Monro (with 857 Europeans and 6215 sepoy) gained a great victory over the troops of the nabob of Oude, &c., 50,000 in number; 6000 of these were killed, and 130 pieces of cannon were taken. The loss of the English was trifling.

BY-LAWS, OR BYE-LAWS, from Saxon *by*, a habitation, private ordinances made by subordinate communities, such as corporations. These laws must not militate against the law of the land. By 5 & 6 Will. IV. 1834, those made by corporate bodies become valid, if not disallowed by the king's council within forty days after their enactment.

BYNG, HON. ADMIRAL JOHN, was charged with neglect of duty in an engagement with the enemy off Minorca, May 20, 1756. As his conduct could not merit the accusation of cowardice, and as he was too *British* for that of disaffection to be hazarded against him, he was condemned for an *error of judgment*, and shot on board the Monarch at Spithead, March 14. The following inscription was cut upon his tomb, at South-hill, Bedfordshire: "*To the Perpetual Disgrace of Public Justice, the Honourable John Byng fell a Martyr to Political Persecution, March 14, 1757, when Bravery and Loyalty were insufficient securities for the Life and Honour of a Naval Officer.*"

BYRON'S VOYAGE. Commodore Byron left England on his voyage round the globe, June 21, 1764, and returned May 9, 1766. He discovered the populous island in the Pacific Ocean which bears his name, Aug. 16, 1765. Though brave and intrepid, such was his general ill-fortune at sea, that he was called by the sailors of the fleet "Foulweather Jack."

BYZANTIUM, now *Constantinople*, founded by a colony of Megarians, under Byzas, 667; but various dates and persons are given. It was taken successively by the Medes, Athenians, and Spartans. In 340 B.C., in alliance with the Athenians, the Byzantines defeated the fleet of Philip of Macedon. During the wars with Macedon, Syria, &c., it became an ally of the Romans, by whom it was taken, A.D. 73. . . Rebelling, it was taken after two years' siege and laid in ruins by Severus in 196. Byzantium was re-founded by Constantine in 324, and dedicated in May 22, 330, all the heathen temples being destroyed; and from him it received the name of Constantinople. See *Constantinople*. *Byzantine Art* flourished from the time of Constantine to about 1204. The Byzantine or Eastern empire really commenced in A.D. 395, when Theodosius divided the Roman empire. See *East*.

C.

CABAL (from Italian and Spanish, *cabala*, secret knowledge). In English history, the cabal was a council which consisted of five lords of administration, supposed to be pensioners of France, and distinguished by the appellation of the *Cabal*, from the initials of their names: sir Thomas, afterwards lord Clifford (C); the lord Ashley (A), (afterwards earl of Shaftesbury); George Villiers, duke of Buckingham (B); Henry, lord Arlington (A); and John, duke of Lauderdale (L); 22 Charles II. 1670. *Hume*.

CABBAGES. Three varieties were brought to these realms from Holland, A.D. 1510. To sir Arthur Ashley of Dorset the first planting them in England is ascribed. This vegetable was previously imported from the continent. It was introduced into Scotland by the soldiers of Cromwell's army. See *Gardening*.

CABBALA, a Hebrew word, signifying recension or tradition, applied to a mystical mode of interpreting the Scriptures as well as natural things, said to have been given to Adam by angels, and transmitted from father to son by his descendants. It is said to have been lost at the Babylonian captivity (587 B.C.), but to have been revealed again to Ezra. The Cabbalists were opposed by the philosophers and by Talmudists, *which see*.

CABINET COUNCIL. * There were councils in England so early as the reign of Ina, king of the West Saxons, A.D. 690; Offa, king of the Mercians, 758; and in other reigns of the Heptarchy. State councils are referred to Alfred the Great. *Spelman*. Cabinet Councils, properly so called, are, however, of comparatively modern date. The cabinet councils in which secret deliberations were held by the king and a few of his chosen friends, and the great officers of state, to be afterwards laid before the second council, now styled the privy council, originated in the reign of Charles I. *Salmon*. But were not fully established before the time of William III. The great household officers were formerly always of the cabinet. "But in Walpole's time there was an *interior* council, of Walpole, the chancellor, and secretaries of state, who, in the first instance, consulted together on the more confidential points." *Croker's Memoirs of Lord Hervey*. See *Administrations*. Till 1850 the cabinet council usually consisted of the following twelve members:—

First lord of the treasury.
Lord chancellor.
Lord president of the council.
Chancellor of the exchequer.
Lord privy seal.
Home, foreign and colonial secretaries of state,
First lord of the admiralty.
President of the board of trade.

President of the board of control (who became secretary for India in 1858).
Chancellor of the duchy of Lancaster.
In 1850, the number was *fifteen*, and included the secretary-at-war, the postmaster-general, and the chief secretary for Ireland. The Palmerston-Russell cabinet (*which see*) includes the president of the poor-law board, making the number *fifteen*.

CABLES. A machine was invented in 1792, for making the largest, by which human labour was reduced nine-tenths. It was set in motion by sixteen horses, when chain cables were introduced into the British navy about 1812.

CABRIOLETS (*vulgo* Cabs), one-horsed vehicles, were introduced into the streets of London in 1823, when the number plying was twelve. In 1831 they had increased to 165 and then the licences were thrown open. The number at present running in the metropolis exceeds six thousand (of which about 1800 only ply on Sunday). Previous to throwing open the trade, the number of hackney carriages was limited to 1200, when, it is worth noting, there were few omnibuses (*which see*).—On June 28, 1853, an act (called Mr. FitzRoy's act) was passed for "the better regulation of metropolitan stage and hackney carriages, and for prohibiting the use of advertising vehicles," by which the cab fares were reduced to 6d. a mile. It came into operation July 11, and on the 27th a general strike of the London cabmen took place. Much inconvenience was felt, and every kind of vehicle was employed to supply the deficiency. Some alterations (previously agreed on) having been made in the act, the cabs re-appeared on the stands on the 30th. Cabmen's Clubs began at Paddington in Feb. 1859. A London General Cab Company published its prospectus on July 1862, professing a reformed system.

* The term *cabinet council* originated thus: The affairs of state in the reign of Charles I., were principally managed by the archbishop of Canterbury, the earl of Strafford, and the lord Cottington; to these were added, the earl of Northumberland, for ornament; the bishop of London, for his place, being lord treasurer; the two secretaries, Vane and Windebank, for service and intelligence; only the marquis of Hamilton, by his skill and interest, meddled just so far, and no further, than he had a mind. These persons made up the committee of state, reproachfully called the *junto*, and afterwards, enviously, the *cabinet council*. LORD CLARENDON.

CABUL, OR **CABOOL**, a city of Afghanistan, taken A.D. 977 by Subuctajeen, grandfather of Mahomed, founder of the Gaznevide dynasty. It was taken by Nadir Shah in 1738. It was the capital of the Durani empire at the end of the last century. In 1809 the sovereign Shah Sooja was expelled, and eventually Cabul came into the hands of Dost Mahomed, a clever and ambitious chieftain. In 1839 the British restored Shah Sooja; but in 1842 a dreadful outbreak took place. The chief British civil officer, sir Wm. M'Naghten, was massacred, and the British commenced a most disastrous retreat. Of 3849 soldiers, and about 12,000 camp followers, only one European, Dr. Bryden, and four or five natives escaped. In the same year (Sept. 16) general afterwards sir George Pollock retook the town, and rescued Lady Sale and many of the prisoners. After destroying many public buildings, he left Cabul to its fate, Oct. 12, 1842.

CADDEE, OR **LEAGUE OF GOD'S HOUSE**, the celebrated league of independence in Switzerland, formed by the Grisons to resist domestic tyranny, A.D. 1400 to 1419. A second league of the Grisons was called the Grise or Gray League, about 1424. A third league, called the League of Ten Jurisdictions, was formed in 1436.

CADDE'S INSURRECTION. Jack Cade, an Irishman, a fugitive on account of his crimes, assumed the name of Mortimer, and headed about 20,000 Kentish men, who armed "to punish evil ministers, and procure a redress of grievances." He defeated and slew sir Humphrey Stafford, at Sevenoaks, June 27, 1450; entered London in triumph, July 3, and beheaded the lord treasurer, lord Saye, and several other persons of consequence. The insurgents at length losing ground, a general pardon was proclaimed; and Cade, deserted by his followers, fled. A reward was offered for his apprehension; he was discovered, and refusing to surrender, was slain by Alexander Iden, sheriff of Kent, July 11.

CADIZ, W. Spain, anciently Gadiz; called by the Romans, Gades; built by the Carthaginians, 530 B.C. *Priestley*.

One hundred vessels of the Spanish Armada destroyed in the port by sir Francis Drake . . .	1587	a frigate surrender to the Spaniards and British . . .	June 14, 1808
Cadiz was taken by the English, under the earl of Essex, and plundered . . .	Sept. 15, 1596	Besieged by the French, but the siege was raised after the battle of Salamanca . . .	July, 1812
Vainly attacked by sir George Rooke . . .	1702	Massacre of a thousand inhabitants by the soldiery . . .	March 10, 1830
Bombarded by the British in . . .	1797	Taken by the French in 1823, and held till . . .	1828
Blockaded by lord St. Vincent, for two years, 1797-9 . . .	Oct. 1800	Declared a free port . . .	1829
Again bombarded by the British . . .			
A French squadron of five ships of the line and			

CADMIUM, a metal, discovered by Stromeyer in 1818.

CAEN, N. France, a place of importance before A.D. 912, when it became the capital of the possessions of the Normans, under whom it flourished. It was taken by the English in 1346 and 1417; but was finally recovered by the French in 1450.

CÆSAREAN SECTION, which, it is said, first gave the name of Cæsar to the Roman family, is performed by cutting the child out of the womb, when it cannot otherwise be delivered. The case of Alice O'Neal, an Irishwoman, who survived the section, which was performed by a female, is authenticated by Dr. Gabriel King, of Armagh, and surgeon Duncan Stewart, of Dungannon. In January, 1847, the operation was performed in St. Bartholomew's hospital, London, on a young woman of diminutive stature, under the influence of ether: but she died the next day. On Dec. 9, 1860, a similar operation was successfully performed by Dr. James Edmunds at Bethnal Green. On the continent the operation is said to have been more frequent and more successful. Cooper's Surgical Dictionary (ed. 1861) contains a table, which, out of 2009 cases, gives a mortality of 55.4 per cent. of the mothers and 29.45 per cent. of the children.

CÆSARS. See *Rome: Emperors*. The Era of the Cæsars or Spanish Era, is reckoned from the 1st of Jan. 38 B.C., being the year following the conquest of Spain by Augustus. It was much used in Africa, Spain, and the South of France; but by a synod held in 1180 its use was abolished in all the churches dependent on Barcelona. Pedro IV. of Arragon abolished the use of it in his dominions in 1350. John of Castile did the same in 1383. It was used in Portugal till 1415, if not till 1422. The months and days of this era are identical with the Julian calendar; and to turn the time into that of our era, subtract thirty-eight from the year; but if before the Christian era, subtract thirty-nine.

CÆSIUM (Latin, bluish), a rare alkaline metal, found in some mineral waters by Bunsen in 1861, by means of the "Spectrum analysis," *which see*.

CAFFRARIA, AND **CAFFRE WAR**. See *Kaffraria*.

CAGLIARI. See *Naples*, note.

CA IRA ! the burden of a popular song, during the French revolution, 1791 :

"Ah ! ça ira, ça ira, ça ira ! Les Aristocrates à la lanterne !" (It will proceed ! &c. Hang the aristocrats !)

CAI-FONG (China), was besieged by 100,000 rebels, in 1642. The commander of the relieving forces, in order to drown the enemy, broke down its embankments. All the besiegers perished ; but the city at the same time overflowed, and 300,000 of the citizens were also drowned.

CAIRO, OR GRAND CAIRO, the modern capital of Egypt, remarkable for the minarets of its mosques, and the splendid sepulchres of its caliphs, in what is called the "city of the dead."

It was built by the Saracens A.D. 969	Taken by the French under Napoleon Bonaparte July 23, 1798
Burnt to prevent its occupation by the Crusaders 1220	
Taken by the Turks from the Egyptian Sultans 1517	Taken by the British and Turks, when 6000 French capitulated June 27, 1801
Ruined by an earthquake and a great fire, when 40,000 persons perished June, 1754	

CALABRIA (the ancient Messapia, S.E. Italy), was conquered by the Romans, 266 B.C. It formed part of the kingdom of the Ostrogoths under Theodoric, A.D. 493 ; was re-conquered (for the Eastern empire) by Belisarius, 536 ; subdued by the Lombards and joined to the duchy of Benevento, 572. After various changes, it was conquered by Robert Guiscard, the Norman, 1058, who obtained the title of duke of Calabria, and eventually that of king of Naples. See *Naples*.

CALAIS (N.W. France), taken by Edward III. after a year's siege, Aug. 4, 1347, and held by England 210 years. It was retaken by the duke of Guise, in the reign of Mary, Jan. 7, 1558, and its loss so deeply touched the queen's heart, as to cause some to say it occasioned her death, which occurred soon afterwards, Nov. 17, same year. "When I am dead," said the queen, "Calais will be found written on my heart." It was held by the Spaniards, 1594-6 ; and was bombarded by the English, 1694. Here Louis XVIII. landed after his long exile from France, April 1814.

CALATRAVA. See *Knighthood*.

CALCIUM, the metallic base of lime, was discovered at the Royal Institution, London, by sir Humphry Davy in 1808.

CALCULATING MACHINES. With the utmost care, errors in computation and in printing will always occur in logarithms and tables of figures. To avoid them, machines to calculate and print have been devised. Pascal, when 19 years of age, invented one, about 1650. The construction of Mr. C. Babbage's machine was commenced at the expense of government in 1821, and continued till 1833, when the work was suspended after an expenditure of above 15,000*l*. The portion completed is in the library of King's College, London. In 1857, Messrs. G. and E. Scheutz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Scheutz brought their machine to England in 1854. It was bought for 1000*l*. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857 Messrs. Scheutz were engaged to make one for the British Government, which is now completed.

CALCUTTA, capital of Bengal and British India. The first settlement of the English here was made in 1689. It was purchased as a zemindary, and Fort William built in 1698. It was made the head of a separate presidency in 1707. Calcutta was attacked by a large army of 70,000 horse and foot, and 400 elephants, on June 18, 1756. On the capture of the fort, 146 of the British were crammed into the Black-hole prison, a dungeon, about 18 feet square, from whence 23 only came forth the next morning alive. See *Black-hole*. Calcutta was retaken the following year, and the inhuman Soubah put to death. Supreme Court of Judicature established 1773. College founded here, 1801. Bishopric of Calcutta instituted by act 53rd Geo. III. c. 155, July, 1813. An industrial exhibition was held here in Jan. 1855. Population in 1850, 413,582. See *Bengal and India*.

CALEDONIA (now *Scotland*). The name is supposed by some to be derived from *Gael* or *Gaelmen* or *Gadel-doine*, corrupted by the Romans. Tacitus, who died A.D. 99, distinguishes this portion of Britain by the appellation of *Caledonia*. Venerable Bede says, that it retained this name until A.D. 258, when it was invaded by a tribe from Ireland, and called *Scotia*. The ancient inhabitants appear to have been the Caledonians and Picts, tribes of the Celts, who passed over from the opposite coast of Gaul. About the beginning of the

fourth century of the Christian era, they were invaded (as stated by some authorities) by the Scythys or Scythins (since called Scots), who, having driven the Picts into the north, settled in the Lowlands, and gave their name to the whole country. Hence the remarkable distinction of language, habits, customs, and persons between the Highlanders and the inhabitants of the southern borders. See *Scotland*.

Caledonian monarchy, said to have been founded by Fergus I., about	B.C. 330	The Caledonians invade south Britain 207; repelled by the emperor Severus who advances to the Moray Frith	209

Christianity introduced in the reign of Donald I.	201		

CALEDONIAN CANAL, from the North Sea to the Atlantic Ocean. The act for its construction received the royal assent, July 27, 1803; and the works were commenced same year. By its means the nautical intercourse between the western ports of Great Britain, and those also of Ireland to the North Sea and Baltic, is shortened in some instances 800, and in others 1000 miles. A sum exceeding a million sterling was granted by parliament from time to time; and this safe navigation for ships of nearly every tonnage was completed and opened, Nov. 1, 1822. It has not paid. Annual income from tonnage, May 1, 1859, 508*l.*; expenditure, 695*l.*

CALENDAR. The Roman calendar, which has in great part been adopted by almost all nations, was introduced by Romulus, who divided the year into ten months, comprising 304 days; 738 B.C. This year was of fifty days' less duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not, of course, correspond with any fixed season. Numa Pompilius, 713 B.C., corrected this calendar, by adding two months; and Julius Cæsar, 45 B.C., desirous to make it more correct, fixed the solar year at 365 days and six hours, every fourth year being bissextile or leap year. See *Leap Year*. This almost perfect arrangement was denominated the Julian style, and prevailed generally throughout the Christian world till the time of pope Gregory XIII. The calendar of Julius Cæsar was defective in this particular, that the solar year consisted of 365 days, five hours, and forty-nine minutes; and not of 365 days six hours. This difference, then, amounted to ten entire days, the vernal equinox falling on the 11th instead of the 21st of March. To obviate this error, Gregory ordained, in 1582, that that year should consist of 356 days only (Oct. 5 became Oct. 15); and to prevent further irregularity, it was determined that a year beginning a century should not be bissextile, with the exception of that beginning each fourth century; thus, 1700 and 1800 have not been bissextile, nor will 1900 be so: but the year 2000 will be a leap year. In this manner three days are retrenched in 400 years, because the lapse of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided. See *New Style*.

CORRESPONDENCE OF CALENDARS WITH A.D. 1861.

Year of the world (Jewish)	5621	United States' Independence	85-86
Julian period	6574	Year of Queen Victoria	25-26
Hegira	1276-7	Year of Napoleon III.	10
Foundation of Rome (Varro)	2614	(See <i>French Revolutionary Calendar</i> .)	

CALENDER, a machine used in glazing various kinds of cloth, was introduced into England by the Huguenots, who were driven by persecution from France, Holland, and the Netherlands to these countries about 1685. *Anderson*.

CALENDS were the first day of the Roman months. The *Nones* of March, May, July and October fell on the 7th; and their *Ides* on the 15th. The other months had the *Nones* on the 5th and the *Ides* on the 13th. As the Greeks had no *Calends*, *ad Grææas Calendas*, "on the Greek Calends," meant *never*.

CALICO, the well-known cotton cloth, is named from Calicut, a city of India, which was discovered by the Portuguese in 1498. Calico was first brought to England by the East India Company in 1631. Calico-printing and the Dutch loom engine were first used in 1676, when a Frenchman established a factory at Richmond, near London. *Anderson*. Calicoes were prohibited to be printed or worn in 1700; and again, in 1721, a penalty of 5*l.* was laid on the wearer, and 20*l.* on the seller of calico. In 1831, by the exertions of Mr. Poulett Thompson, afterwards lord Sydenham, and other the consolidated duty of 3*d.* on

the square of printed calico was taken off, and immense impetus was given to the manufacture. Since 1834 the manufacture has been greatly increased by the applications of science. Cylinders for printing are now engraved by galvanism, and new dyes have been introduced by the discoveries of chemists: *e.g.* Liebig, Hofmann, Perkin, &c. See *Cotton* and *Dyeing*. The French government encouraged the manufacture early in the last century.

CALIFORNIA (from the Spanish, *Caliente Fornalla*, hot furnace, in allusion to the climate) was discovered by Cortez in 1537; others say by Cabrillo in 1542; and visited by sir Francis Drake, who named it New Albion, in 1578. It was colonised by the Spaniards in 1698, and principally ruled by the priests. This peninsula for a long period, before 1846 belonged to Mexico; but in July in that year the whole territory, by a bloodless conquest, was annexed to the possessions of the United States of North America. Adventurers from all parts have flocked here since. The first known discovery of gold in its wonderful quantity was made by a located captain, named Sutter, and his friend Mr. Marshall, in September, 1847; * but it is supposed that the existence of gold was known to numerous individuals previously, who concealed the source of their enormous gains, while they trafficked ostensibly in the inferior products of the land. The discovery of the gold-fields of Australia in April 1851, turned the stream of emigration to that country. See *Australia*. California was admitted into the United States in 1850. It is advancing rapidly in wealth and importance, but society is still in a very disorganised state. There were many murders committed in 1853, and Lynch law (*which see*) is occasionally in operation. The population in 1856 was 506,067; in 1860, 700,000.

CALIPER COMPASS, whereby founders and gunners measure the bore or diameter of cannon, mortars, and other pieces of ordnance, and also of small arms, and the diameter of shot, is said to have been invented by an artificer of Nuremberg in 1540.

CALIPH (in Arabic), Vicar, or Apostle, the title assumed by the sophi of Persia, in the succession of Ali, and, since 1517, by the sultans of Turkey, as the successors of Mahomet. The caliphat began with Abubeker, the father of the prophet's second wife; he died A.D. 631.—In process of time the soldans or sultans engrossed all the civil power, and little but the title was left to the caliphs, and that chiefly in matters of religion. *Sic. T. Herbert.*

CALIPHS OF ARABIA.
632. Abu Beker.
634. Omar I.
644. Othman.

655. Ali.
661. Hassan.
The OMMAIADS ruled 661—750.
The ABBASIDES ruled 750—1258.

In 775 they were styled caliphs of Bagdad.
Haroun-al-Raschid ruled 786—809.

CALIPPIC PERIOD, invented by Calippus, to correct the Metonic cycle. It consists of four cycles, or of seventy-six years, at the expiration of which he imagined the new and full moons returned to the same day of the solar year, which is incorrect; this period was begun about the end of June, in the third year of the 112th Olympiad, in the year of Rome 424, and 330 B.C. *Pardon.*

CALIXTINS, a sect derived from the Hussites, about 1451. They demanded the use of the cup (Greek, *Kalic*) as essential to the Eucharist.—Also a sect among the Lutherans following the sentiments of George Calixtus, who died in 1656. Calixtus wrote a treatise against the celibacy of the priesthood, and proposed a re-union of Catholics and Protestants based on the Apostles' creed.

CALI YUGA, the Hindoo era of the Deluge, dates from 3101 B.C. (according to some, 3102), and begins with the entrance of the sun into the Hindoo sign Aswin, which is now on the 11th April, N.S. In the year 1600 the year began on the 7th of April, N.S., from which it has now advanced four days, and from the precession of the equinoxes is still advancing at

* Captain Sutter says: he was sitting one evening in his room writing, when Mr. Marshall suddenly entered, with great excitement in his face, and unable to speak, flung upon the table a handful of scales of pure virgin gold. He at length explained that, while widening a channel which had been made too narrow to allow a mill-wheel to work properly, a mass of sand and gravel had been thrown up by the excavators. Glittering in this sand, Mr. Marshall noticed what he thought to be an opal, a stone common in California: it was, however, a scale of pure gold, and the first idea of the discoverer was, that some Indian tribes or ancient possessors of the land had buried a treasure. But examination showed the whole soil to teem with the precious metal; and then mounting a horse he rode down to carry the intelligence to his partner. To none but him did he communicate it, and they two agreed to keep it a secret. Proceeding together to the spot, they picked up a quantity of the scales; and with nothing but a small knife, captain Sutter extracted from a little hollow in the rock a solid mass of gold weighing an ounce and a half. The attempt to conceal this valuable discovery was not successful. An artful Kentuckian labourer, observing the eager looks of the two searchers, followed, and imitated them, picking up several flakes of gold. Gradually the report spread, and as the would-be monopolists returned towards the mill, a crowd met them, holding out flakes of gold, shouting with joy, and calling out, "Oro! Oro!" Gold! Gold!

the rate of a day in sixty years. The number produced by subtracting 3102 from any given year of the Cali Yuga era will be the Christian year in which the given year begins.

CALLAO (Peru). Here, after an earthquake, the sea retired from the shore, and returned in mountainous waves, which destroyed the city, A.D. 1687. The same phenomenon took place, Oct. 28, 1746, when all the inhabitants perished, with the exception of one man, who was standing on an eminence, and to whose succour a wave providentially threw a boat.

CALLIGRAPHY (beautiful writing). Callicrates is said to have written an elegant distich on a sesamum seed, 472 B.C. In the 16th century Peter Bales wrote the Lord's Prayer, Creed, and Decalogue, two short Latin prayers; his own name, motto, day, of the month, year of our Lord, and of the reign of Queen Elizabeth (to whom he presented them at Hampton-court), all within the circle of a silver penny, encased in a ring and border of gold, and covered with crystal, so accurately done, as to be plainly legible, to the great admiration of her majesty, the whole of the privy council, and several ambassadors then at court, 1574. *Holished.*

CALMAR, UNION OF. The treaty, whereby Denmark, Sweden, and Norway, were united under one sovereign; Margaret of Waldemar, "the Semiramis of the North," being the first, June, 1397. The deputies of the three kingdoms assembled at Calmar for the election of a king; and Margaret, having defeated Albert of Sweden (whose tyranny had caused a revolt of his subjects) in 1393, was made choice of to rule over Denmark, as well as Sweden and Norway, of which she was then queen. This union was dissolved by Gustavus Vasa in 1523.

CALOMEL ("beautiful black"), a compound of mercury, sulphuric acid, and chloride of sodium, first mentioned by Crollius early in the 17th century. The first directions given for its preparation were by Beguin in 1608.

CALORIC. See *Heat*.

CALORIC SHIP ERICSSON. In this vessel it was attempted to supersede steam, as a motive power, by caloric or heated air. It was constructed in America, and sailed down the bay of New York, Jan. 4th, 1853; and, it was thought, proved that caloric was adapted to locomotion, and destined perhaps to work a revolution in navigation. It was designed by captain Ericsson, whose name it bore, and on this trial trip sailed fourteen miles an hour, at a cost of full eighty per cent. less than is consumed by ordinary steam-ships. Caloric engines, however, are generally considered unsuccessful; but captain Ericsson is still continuing his researches. He patented a modified engine in 1856.

CALOTYPE PROCESS (from the Greek *kalos*, beautiful), by which negative photographs are produced on paper, is the invention of Mr. Henry Fox Talbot, about 1840.

CALOYERS (meaning *good old men*). The monks of the Greek church, of the order of St. Basil. Their most celebrated monastery in Asia is at Mount Sinai, endowed by Justinian (died 565); the European one is at Mount Athos.

CALVARY, MOUNT, the place where the Redeemer suffered death, A.D. 33 (or 30: *Hales, 31; Clinton, 29.*) See *Luke* xxiii. 33. Adrian, at the time of his persecution of the Christians, erected a temple of Jupiter on Mount Calvary, and a temple of Adonis on the manger at Bethlehem, A.D. 142. The empress Helena built a church here about A.D. 326. See *Holy Places*.

CALVES' HEAD CLUB, composed of noblemen and gentlemen who exposed raw heads in cloths at the windows of a tavern. The mob would have pulled down the house if the guards had not dispersed them, Jan. 30, 1735, the anniversary of the execution of Charles I. The club was suppressed. *Salmon.*

CALVI (Corsica). The British forces besieged the fortress of Calvi, June 12, 1794. After fifty-nine days it surrendered on Aug. 10. It surrendered to the French in 1796.

CALVINISTS, named after John Calvin (or Chauvin), the great Protestant Reformer, who was born at Noyon, in Picardy, in 1509. Adopting the principles of the Reformers, he fled to Angoulême, where he composed his *Institutio Christianæ Religionis* in 1533, published in 1536. He subsequently retired to Basle, and next settled in Geneva, where he died, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans first took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. They spread into France, Scotland, &c. In France (see *Huguenots*) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the *Edict of Nantes* in 1598 (*which see*).

CAMBRAY (N. France), an independent archbishopric in 1007, and lordship in 1076, gives name to cambric. Cambray was taken by the Spaniards by a memorable surprise in 1595; and has been taken and retaken several times. In the war of the French revolution it was invested by the Austrians, Aug. 8, 1793, when the republican general, Dclay, replied to the imperial summons to surrender, that "he knew not how to do *that*, but his soldiers knew how to fight." It was, however, taken by Clairfait, the Austrian general, on Sept. 10 following. In 1794 the French were defeated at Caesar's Camp, in the neighbourhood, by the allied army under the duke of York, April 24. Cambray was seized by the British, under sir Charles Colville, June 24, 1815. The citadel surrendered the next day, and was occupied by Louis XVIII. and his court. This was one of the fortresses stipulated to be occupied by the allied army for five years. Fénelon was archbishop in 1695. The celebrated LEAGUE OF CAMBRAY against the republic of Venice, comprising pope Julian II., the emperor Maximilian, and Louis XII. of France, and Ferdinand of Spain, was entered into Dec. 10, 1508. It compelled Venice to yield up her Neapolitan possessions to Spain. A treaty was concluded here in 1529 between Francis I. of France and Charles V. of Germany (called *Paix des Dames*, because negotiated by Louisa of Savoy, mother of the French king, and Margaret of Austria, aunt of the emperor); also a treaty between the emperor Charles VI. and Philip V. of Spain in 1724-5.

CAMBRIA, ancient name of Wales (*which see*).

CAMBRICS were first worn in England, and accounted a great luxury, 1580. *Stow*. Their importation was restricted in 1745; and prohibited in 1758; re-admitted in 1786, but afterwards prohibited. The importation is now allowed.

CAMBRIDGE, the Roman *Camboricum* and the Saxon *Granta*, frequently mentioned by the earliest British historians, was burnt by the Danes in 870 and 1010. Roger de Montgomery destroyed it with fire and sword to be revenged of king William Rufus. The *university* is said to have been commenced by Sigebert, king of the East Angles, about A.D. 630; it lay neglected during the Danish invasions, from which it suffered much. It was somewhat restored by Edward the Elder in 915; and began to revive about 1110, when Henry I. bestowed many privileges upon the town; as did Henry III., who granted a charter to the university, 1230 or 1231, which was incorporated by Elizabeth in 1571. In Wat Tyler's and Jack Straw's rebellion, in the reign of Richard II., the rebels entered the town, seized the university records and burnt them in the market-place, 1381. The university press was set up in 1534; letters patent having been granted by Henry VIII. In 1687 the university refused the degree of M.A. to father Francis, a Benedictine monk, recommended by the king; and the presidency of Magdalene college was also refused to Farmer, a Roman Catholic, notwithstanding the king's mandate.—The Cambridge Philosophical Society was established in 1819 and chartered in 1832. The railway to London was opened, June, 1845. Commissioners were appointed for the government and extension of this university and Eton college, by 19 & 20 Vict. c. 88 (1856). See *Fitzwilliam Museum*.

FOURTEEN COLLEGES.

Peterhouse College, by Hugo de Balsham, bishop of Ely, founded	A.D. 1257
Pembroke College, founded by the countess of Pembroke	1347
Gonville and Caius, by Edmund Gonville	1348
Enlarged by Dr. John Caius in	1358
Corpus Christi, or Benet	1352
King's College by Henry VI.	1441
Christ's College founded 1442; endowed by Margaret, countess of Richmond, mother of Henry VII.	1505
Queen's College, by Margaret of Anjou, consort of Henry VI.	1448
Jesus College, by John Alcock, bishop of Ely	1496
St. John's College, endowed by Margaret, countess of Richmond	1511
Magdalen College, by Thomas, baron Audley of Walden	1519
Trinity College, by Henry VIII.	1546
Emmanuel College, by sir Walter Mildmay	1584
Sidney-Sussex College, founded by Frances Sidney, countess of Sussex.	1598

Downing College, by sir George Downing, by will, in 1717; its charter A.D. 1800

THREE HALLS.

Clare Hall, or College, first by Dr. Richard Baden, in 1326; destroyed by fire and re-established by Elizabeth de Burg, sister to Gilbert, Earl of Clare	about 1342
Trinity Hall, by Wm. Bateman, bp. of Norwich, ...	1350
St. Catherine's College or Hall, founded	1473

[*Cambridge University Calendar*.]

CHANCELLORS.

Charles, duke of Somerset, elected	1688
Thomas, duke of Newcastle	1748
Augustus Henry, duke of Grafton	1768
H. R. H. William Frederick, duke of Gloucester	1811
John, marquess Camden	1834
Hugh, duke of Northumberland	1840
The Prince Consort [died Dec. 14, 1861.] Feb. 28, 1847	
Duke of Devonshire	Dec. 31, 1861

CAMBUSKENNETH (Central Scotland). Here Wallace defeated the English in 1297.

CAMDEN (N. America). A battle, was fought here Aug. 16, 1780, between general Gates and lord Cornwallis, the former commanding the revolted Americans, who were defeated.

At a second battle, between general Greene and lord Rawdon, the Americans were again defeated, April 25, 1781. Camden was evacuated and burnt by the British, May 13, 1781.

CAMERA LUCIDA. Invented by Dr. Hooke about 1674. *Wood's Ath. Ox.* Also an instrument invented by Dr. Wollaston in 1807. The **CAMERA OBSCURA**, or dark chamber, was invented, it is said, by Roger Bacon in 1297; and it was improved by Baptista Porta, the writer on natural magic, about 1500. *Moreri.* Sir Isaac Newton remodelled it. By the invention of M. Daguerre, in 1839, the pictures of the camera are rendered permanent. See *Photography*.

CAMERONIANS, a name frequently given to the body now termed the Reformed Presbyterian Church of Scotland, the lineal descendants of the covenanters of the seventeenth century, who were the established church from 1638-50. Charles II. signed the League and Covenant in 1650, in hopes of recovering his kingdoms, but renounced it in 1661, and revived episcopacy, so hateful to the Scots. A revolt ensued in 1666, when many zealous covenanters were slain in battle (in the Pentland hills, &c.), and many died on the scaffold, after undergoing cruel tortures: refusing to take the oaths required, and declining to accept the king's *indulgence*. The name *Cameronian* is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. In 1689 they raised a body of soldiers to support William III., who enrolled them under the command of lord Angus, as the 26th regiment, since so famous. They were frequently called hill-men, or mountain-men, and *society people* (from the places and modes of worship to which they were frequently reduced), and McMillanites, from John McMillan, their first minister, after their secession from the church of Scotland on account of its subserviency to the English government, and its declining from its original rigid principles. In 1712 the Cameronians renewed the public covenants, and are described in one of their tracts as "the suffering anti-popish, and anti-prelatical, anti-erastian, true presbyterian church of Scotland." They have now (1862) between thirty and forty congregations in Scotland.—The 79th regiment (*Cameron Highlanders*), raised in 1793 by Allan Cameron, has no connection with the Cameronians.

CAMISARDS (from *chemise*, a shirt, which they frequently wore over their dress in night attacks), a name given to the more warlike French Protestants in the neighbourhood of the Cevennes (mountain chains in S. France), who defended themselves and attacked their enemies after the revocation of the edict of Nantes, in 1685. They were suppressed in 1704. Their leader, Cavalier, is said to have become governor of Jersey under William III.

CAMLET, formerly made of silk and camel's hair, but now of wool, hair, and silk. Oriental camlet first came here from Portuguese India, in 1660. *Anderson.*

CAMP. The Hebrew encampment was first laid out by divine direction, 1490 B.C. (*Numbers* ii.) The Romans and Gauls had intrenched camps in open plains; and vestiges of such exist to this day in England and Scotland. A camp was formed at Hyde Park in 1745 and 1814. See *Chobham* and *Aldershot*.

CAMPANIA (S. Italy), was occupied by Hannibal 216 B.C., but regained by the Romans, 213. Its capital is Capua (*which see*).

CAMPBELL'S ACT, introduced by lord Campbell, in order to compel Railway Companies to grant compensation for accidents, was passed in 1846. In accordance with it the family of a gentleman killed through the breaking of a rail, obtained a verdict for 13,000*l.* from the Great Northern Railway Company. On appeal the sum was reduced.

CAMPEACHY-BAY (Yucatan, Central America), discovered about A.D. 1520, and settled in 1540; was taken by the English in 1659; by the Buccaneers, in 1678; and by the Freebooters of St. Domingo, in 1685. These last burnt the town and blew up the citadel. The English logwood-cutters made their settlement here in 1662.

CAMPERDOWN: in a battle off Camperdown, south of the Texel, Holland, a signal victory was obtained by the British fleet, under admiral Duncan, over the Dutch fleet, commanded by admiral De Winter; the latter losing fifteen ships, either taken or destroyed, Oct. 11, 1797. This was the most brilliant naval achievement of the war, and obtained a peerage for the British admiral. He died suddenly on his way to Edinburgh, Aug. 4, 1804.

CAMPO FORMIO (North Italy). Here a humiliating treaty was concluded between France and Austria, the latter power yielding the Low Countries and the Ionian Islands to France, and Milan, Mantua, and Modena to the Cisalpine republic, Oct. 17, 1797. This treaty resulted from the ill-success of Austria on the Rhine. By a secret article, however, the emperor took possession of the Venetian dominions.

CAMPO SANTO (Holy Field), a burial-place at Pisa, surrounded by an arcade erected by archbishop Ubaldo, about 1300, which is celebrated for the frescoes painted on the walls by Giotto, Memmi, and others.

CANAAN (Palestine), is considered to have been settled by the Canaanites, 1965 B.C. (Clinton, 2088). The land was divided among the Israelites by Joshua, 1445 (Hales, 1602).

CANADA (N. America), was discovered by John and Sebastian Cabot, in June, 1497; in 1535 Jacques Cartier (a Breton mariner), ascended the St. Lawrence as far as where Montreal now stands. See *Montreal* and *Quebec*.

Quebec founded	1608	The Canada clergy reserves abolished by parliament	May 9, 1853
Canada taken by the English 1628; restored	1631	Lord Elgin gov.-general (1846-54) concluded an important treaty with United States July 24, 1854	
War begins in 1756; Canada conquered by the English 1759 (see <i>Quebec</i>), confirmed to them by the peace	1763	The grand trunk railroad of Canada, 850 miles long, from Quebec to Toronto, opened Nov. 12, 1856	
The French laws confirmed and religious liberty given to Roman Catholics	1774	On reference having been made to the queen, Ottawa, formerly Bytown, appointed the capital; this decision was unpopular; a federal union of the N. American colonies has been since proposed	August, 1858
The Americans under Montgomery invade Canada, and surprise Montreal, Nov. 1775; expelled by Carleton	March, 1776	Canada raises a regiment of soldiers (made one of the line and called the 100th)	—
Canada divided into Upper and Lower	1791	The prince of Wales presents the colours at Shorncliffe	Jan. 20, 1859
During the debates on this bill the quarrel between Mr. Burke and Mr. Fox arose. Mr. Fox seemed anxious for a reconciliation, but Mr. Burke rejected it with disdain	—	The prince of Wales, the duke of Newcastle, &c. arrived at St. John's, Newfoundland, July 24; visit Halifax, July 30; Quebec, Aug. 18; Montreal, Aug. 25; Ottawa, Sept. 1; leave Canada, Sept. 20; after visiting the United States, embark at Portland, Oct. 20; and arrive at Plymouth	Nov. 15, 1860
Canada made a bishopric	1793	Lord Monck assumes office as gov.-gen., Nov. 28, 1861	
The Americans invade Canada at different points, with 30,000 men, but are forced to retire after several sanguinary battles	1812	In consequence of the "Trent" affair (see <i>United States</i> , 1861,) 3000 British troops were sent to Canada; and warlike preparations were made	Dec. —
First railway in Canada opened	July, 1826	Brit. N. American Assoc. founded in London Jan. 1862	
The Papineau rebellion commences at Montreal by a body called <i>Fils de la Liberté</i>	1837	Carter's ministry defeated on Militia bill; Mr. J. Sandfield Macdonald becomes premier May 20-23, —	
The rebels defeated at St. Eustace	Dec. 14, —	The assembly vote only 5000 militia and 5000 reserve towards the defence of the country; this causes discontent in England	July, —
Repulsed at Toronto, by sir F. Head	Jan. 5, —	Population in 1857: Lower Canada, 1,220,514; Upper Canada, 1,350,924.	
Earl of Durham appointed gov.-gen.	Jan. 16, —		
Lount and Mathews (rebels) hanged	April 12, —		
Lord Durham resigns his government	Oct. 9, —		
Rebellion appears in Beauharnois Nov. 3; the insurgents at Napierville under Nelson, are routed with great loss Nov. 6; the rebellion suppressed	Nov. 17, —		
Acts relating to government of Lower Canada, passed in Feb. 1838, and	Aug. 1839		
Upper and Lower Canada reunited	Feb. 1840		
Lord Sydenham appointed governor	Feb. 10, 1841		

CANALS. The most stupendous in the world is a canal in China, commenced in the tenth century, which is said to pass over 2000 miles, and to 41 cities. The canal of Languedoc, which joins the Mediterranean with the Atlantic Ocean, was completed in 1681. That of Orleans from the Loire to the Seine, commenced in 1675. That between the Baltic and North Sea at Kiel, opened 1785. That of Bourbon, between the Seine and Oise, commenced 1790. That from the Cattagat to the Baltic, 1794—1800. The great American Erie canal, 363 miles in length, was commenced in 1817. That of Amsterdam to the sea, 1819-25. See *Ganges Canal*, the most stupendous modern one.—The first canal made in England was by Henry I., when the river Trent was joined to the Witham, A.D. 1134. Francis Mathew in 1656, and Andrew Yarranton in 1677, in vain strongly urged improvement in internal navigation. In England there are 2800 miles of canals, and 2500 miles of rivers, taking the length of those only that are navigable—total, 5300 miles. (Mr. Porter, in 1851, says 4000 miles.) In Ireland there are 300 miles of canals; 150 of navigable rivers; and 60 miles of the Shannon, navigable below Limerick: in all, 520 miles. *Williams*. The prosperity of canals, for a time largely checked by the formation of railways, is now greatly revived (1862). The most remarkable canals in Great Britain are:—

A.D.		A.D.		A.D.	
New river canal, commenced 1608		Northampton navigation	1761	Hertford to Ware, 1739; to London	1770
Brought to London	1614	Dublin to the Shannon (the Grand) commenced (opened to Sallins, 1782)	1765	Leeds to Liverpool	—
Thames made navigable to Oxford	1624	Stafford and Worcester, commenced	—	Monkland (Scotland), commenced	—
Kennet made navigable to Reading	1715	Grand Trunk commenced by Brindley	1766	Fillesmere and Chester	1772
Lagan navigation, commenced 1755		Forth to Clyde, commenced 1768		Basingstoke canal, commenced	—
Casermarthenshire canal	1756	Birmingham to Bilston	—	Liverpool to Wigan	1774
Droitwich to the Severn	—	Oxford to Coventry, commenced	1769	Stroud to the Severn	1775
Duke of Bridgewater's navigation (first great canal), commenced (see <i>Bridgewater</i>)	1759	Lea made navigable from	—	Staffordshire canal, commenced	—
				Stourbridge canal, completed	1776

		Ellesmere aqueduct . . .	1805		

CANARY ISLANDS (N.W. Africa), were known to the ancients as the *Fortunate Isles*. The first meridian was referred to the Canary Isles by Hipparchus, about 140 B.C. They were re-discovered by a Norman named Bethencourt, about A.D. 1400; his descendants sold them to the Spaniards, who, however, did not become masters of them till 1483. About 1420 they planted vines, which till recently flourished here. The canary-bird, so much esteemed all in parts of Europe, is a native of these isles; it was brought into England about 1500. Teneriffe is the largest island.

CANCER. A free hospital to receive persons suffering from this fearful disease was founded by Miss Burdett Coutts, at West Brompton, near London, on May 30, 1859. A temporary hospital, in a private house, existed since 1851.

CANDIA, the ancient Crete, whose centre is Mount Ida. It was seized by the Saracens A.D. 823, when they changed its name. Taken by the Greeks in 960; sold to the Venetians, 1194, and held by them until the Turks obtained it, after a twenty-four years' siege, during which more than 200,000 men perished 1669. It was ceded to the Egyptian pacha in 1830, but restored to Turkey in 1840. An insurrection, which broke out here in May, 1858, when a reduction of taxation was demanded, soon subsided on the adoption of conciliatory measures. A persecution of the Christians took place, July 31, 1859.

CANDLEMAS-DAY, Feb. 2, is kept in the church in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, *Luke* ii. 32, "a Light to lighten the Gentiles," &c.), this festival was called Candlemas, as well as the Purification. Its origin is ascribed by Bede to pope Gelasius in the fifth century. The practice of lighting the churches was forbidden by order of council, 2 Edw. VI. 1548; but it is still continued in the church of Rome.

CANDLES.* The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fattened were used for light among the lower classes in England, about A.D. 1300. At this time wax candles were little used, and esteemed a luxury; dipped candles were usually burnt. The Wax-Chandlers' company was incorporated 1484. Mould candles are said to be the invention of the sieur Le Brez, of Paris. Spermaceti candles are of modern manufacture. The Chinese make candles from wax obtained from the berries of a tree, which wax is fragrant, and yields a bright light.† The duty upon candles made in England, imposed in 1709, amounted to about 500,000*l.* annually; it was repealed in 1831, and the makers were placed upon the same footing as melters of tallow. Very great improvements in the manufacture of candles are due to the researches on oils and fats, carried on by "the father of the fatty acids," Chevreul, since 1811, and published in 1823. At Price's manufactory at Lambeth, the principles involved in many patents are carried into execution; including those of Gwynne (1840), Jones and Price (1842), and Wilson in 1844. Palm and cocoa-nut oils are now extensively used. In 1860, at the Belmont works 900

* The custom of selling at public auctions *by inch of candle* is said to have been borrowed from the church of Rome, where there is an excommunication by inch of candle, and the sinner is allowed to come to repentance before final excommunication, while yet the candle burns.

† The candleberry myrtle, (*Myrica cerifera*) at Nankin, in China, flourishes with beautiful blossoms and fruit. The latter, when ripe, is gathered and thrown into boiling water; the white unctuous substance which covers the kernels is thereby detached, and swims at the top; it is skimmed off and purified by a second boiling, when it becomes transparent, of a consistence between tallow and wax, and is converted into candles. It is said that specimens of this tree were brought to England from America in 1699. Its cultivation in America in a commercial point of view is now recommended (1862).

persons were employed, and in winter 100 tons (7000*l.* worth) of candles are manufactured weekly. Candles are manufactured at Belmont from the mineral oil or tar brought from Rangoon in the Burmese empire and from Trinidad.

CANDLESTICKS (or *lamp-stands*) with seven branches were regarded as emblematical of the priest's office, and were engraven on their seals and cups while living, and on their tombs when dead. Candlesticks were used in Britain in the days of king Edgar, A.D. 959, for historians of his time mention "silver candelabra and gilt candelabra well and honourably made;" but even in 1388 they were not common.

CANDY (Ceylon). A whole British detachment took possession of it, Feb. 20, 1803, but capitulated June 23 following, anxious to evacuate the place on account of its unhealthiness: on the third day they were treacherously massacred at Columbo, or imprisoned. The war was renewed in October, 1814. The king was made prisoner by general Brownrigg, Feb. 19, 1815; and the sovereignty vested in Great Britain, March 2, 1815.

CANNÆ (Apulia), **BATTLE OF**, fought Aug. 2, 216 B.C., when Hannibal with 50,000 Africans, Gauls, and Spaniards, defeated Paulus Æmilius and Terentius Varro, with 88,000 Romans, of whom 40,000 were slain. *Livy*. The victor sent to Carthage three bushels of rings, taken from the Roman knights on the field. Neither party perceived an awful earthquake which occurred during the battle. The place is now denominated by some "the field of blood."

CANNIBALISM. See *Anthropophagi*.

CANNING ADMINISTRATION.* The illness of lord Liverpool led to the formation of this administration, April 24—30, 1827. See *Goderich*.

George Canning, *first lord of the treasury and chancellor of the exchequer*.
Lord Harrowby, *president of the council*.
Duke of Portland, *lord privy seal*.
Lord Dudley, viscount Goderich, and Mr. Sturges Bourne, *secretaries of state*.
W. W. Wynn, *president of the India board*.
Wm. Huskisson, *board of trade*.

Lord Palmerston, *secretary at war*.
Lord Bexley, *chancellor of the duchy of Lancaster*.
Duke of Clarence, *lord high admiral*.
Lord Lyndhurst, *lord chancellor, &c.*
Marquess of Lansdowne, *without office; afterwards home secretary*.
On Mr. Canning's death (Aug. 8) the cabinet was re-constructed.

CANNON. See *Artillery*. The largest known piece of ordnance is of brass, cast in India in 1685. Gibbon described a cannon employed by Mahomet II. at the siege of Adrianople, in 1453: the bore was 12 palms wide, and the stone balls weighed each 600 lbs. At Ehrenbreitstein castle, one of the strongest forts in Germany, opposite Coblenz on the Rhine, is a prodigious cannon, eighteen feet and a half long; a foot and a half in diameter in the bore, and three feet four inches in the breech. The ball made for it weighs 180 lbs., and its charge of powder 94 lbs. The inscription on it shows that it was made by one Simon, 1529. In Dover castle is a brass gun called queen Elizabeth's pocket pistol, which was presented to her by the states of Holland; this piece is 24 feet long, and is beautifully ornamented, having on it the arms of the states, and a motto in Dutch, importing thus—"Charge me well, and sponge me clean—I'll throw a ball to Calais green." Some fine specimens are to be seen in the tower. A leathern cannon was fired three times in the King's park, Edinburgh, Oct. 23, 1788. *Phillips*. The Turkish piece now in St. James's park, was taken by the French at Alexandria; but was retaken, and placed there in March, 1803.—Messrs. Horsfall's monster wrought-iron gun was completed in May, 1856, at Liverpool. Its length is 15 feet 10 inches, and its weight 21 tons 17 cwt. 1 qr. 14 lbs. Its cost was 3500*l.* With a charge of 25 lbs. it struck a target 2000 yards distance. It has been since presented to government. Of late years very great improvements have been made in the construction of cannon, by Messrs. Whitworth, Mallet, Armstrong, and others.†

* George Canning was born April 11, 1770; became foreign secretary in the Pitt administration, 1807; fought a duel with Castlereagh and resigned in 1809; president of the council in 1820; disapproved of the queen's trial and resigned in 1821; appointed governor-general of India in 1822, but became soon after foreign secretary, and remained such till 1827, when he became premier. He died Aug. 8, same year.

† On Feb. 18, 1859, Mr. W. G. Armstrong was knighted. He had been working for four years on gun-making, and had succeeded in producing "a breech-loading rifled wrought-iron gun of great durability and of extreme lightness, combining a great extent of range and extraordinary accuracy." The range of a 32-lb. gun, charged with 5 lbs. of powder, was a little more than five miles. The accuracy of the Armstrong gun is said at equal distances to be fifty-seven times more than that of our common artillery, which it greatly exceeded also in destructive effects. The government engaged the services of Sir W. Armstrong for ten years (commencing with 1855) for 20,000*l.*, as consulting engineer of rifled ordnance. The Armstrong gun was said to be very effective in the attack on the Chinese forts at Taku, Aug. 21, 1860. Mr. Whitworth's guns and rifles have also been greatly commended. An American cannon, weighing 35 tons, stated to be the largest in the world, was cast in 1860.—Great endeavours are still making to improve the construction of cannon, to counterbalance the strength given to ships of war by iron plates. On April 8, 1862, targets of the thickness of the iron sides of the Warrior, three 5 inch plates of wrought iron bolted together at Shoeburyness, Essex, was pierced three times by 156 lbs. shot from an Armstrong gun smooth bore, 300 lbs.,

CANON OF SCRIPTURE. See *Bible*.

CANONISATION, of pious men and martyrs as saints, was instituted in the Romish church by pope Leo III. in 800. *Tallent*. Saints have so accumulated, that every day in the calendar is now a saint's day. The first canonisation made by papal authority was that of St. Udalricus, in 993. *Hénault*. On June 8, 1862, the pope canonised 27 Japanese, who had been put to death on Feb. 5, 1597, near Nagasaki.

CANONS, **APOSTOLICAL**, ascribed by Bellarmin and Baronius to the Apostles; by others to St. Clement, are certainly a forgery of much later date (since A.D. 325). The Greek church allows 85, the Latin 50 of them. The first ecclesiastical canon was promulgated A.D. 380. *Usher*. Canon law was first introduced into Europe by Gratian, the celebrated canon law author, in 1151 (or 1127); and was introduced into England, 19 Stephen, 1154. *Stow*. See *Decretals*. The present Canons and Constitutions of the Church of England, collected from former ordinances, were established in 1603 by the clergy in convocation, and ratified by king James I.

CANOSSA, a castle in Modena, celebrated on account of the degrading penance submitted to by the emperor Henry IV. of Germany, in deference to his greatest enemy, pope Gregory VII. (Hildebrand), then living at the castle, the residence of the great countess Matilda. Henry was exposed for several days to the inclemency of winter, Jan. 1077, till it pleased the pope to admit him. Matilda greatly increased the temporal power of the papacy by bequeathing to it her large estates, to the injury of her second husband, Guelph, duke of Bavaria.

CANTERBURY (Kent), the *Durovernum* of the Romans, and capital of Ethelbert, king of Kent, who reigned A.D. 560—616. He was converted to Christianity by Augustin, 596, upon whom he bestowed many favours, giving him land for an abbey and cathedral, which was dedicated to Christ, 602. During the Danish wars, it was several times burnt and rebuilt. It was once famous for the shrine of Becket (see *Becket*), slain here, Dec. 29, 1170; and within it are interred Henry IV. and Edward the Black Prince. The present cathedral is a revival of that begun by archbishop Lanfranc.—During the rebellion against Charles I., the usurper Cromwell made it a stable for his dragons. St. Martin's church here is said to have been the first erection for Christian worship in Britain; but this is doubted.—The riot at Boughton, near Canterbury, produced by a fanatic called Tom or Thom, who assumed the name of sir William Courtenay, occurred May 31, 1838. See *Thomites*. The railway to London was completed in 1846.—The **ARCHBISHOP** is primate and metropolitan of all England, and the first peer in the realm, having precedence of all officers of state, and of all dukes not of the blood royal. Canterbury had formerly jurisdiction over Ireland, and the archbishop was styled a patriarch. This see has yielded to the church of Rome 18 saints and 9 cardinals; and to the civil state of England, 12 lord chancellors and 4 lord treasurers. The see was made superior to York, 1073. See *York*. The revenue is valued in the king's books at 2816*l.* 17*s.* 9*d.* *Beatson*. Present income, 15,000*l.*

ARCHBISHOPS OF CANTERBURY.

A.D.		A.D.		A.D.	
602-605.	St. Augustine, or Austin, died May 26.	988-989.	Æthelgar.	1193-1205.	Hubert Walter. [Reginald the sub-prior, and John Grey, bishop of Norwich, were successively chosen, but set aside.]
605-519.	St. Lawrence.	990-995.	Sigeric.		
619-624.	St. Mellitus.	995-1006.	Ælfric.	1206-1228.	Stephen Langton, died July 6.
624-630.	Justus.	1006-1011.	St. Ælphege, murdered by the Danes, April 19.	1229-1231.	Richard Weathershed.
631-653.	St. Honorius.	1013-1020.	Lyfing, or Ælfstun.	1233-1240.	Edmund de Abingdon.
655-664.	Deusdedit (Adeodatus).	1020-1038.	Æthelnoth.	1240-1270.	Boniface of Savoy.
668-690.	Theodore of Tarsus.	1038-1050.	St. Eadsige.	1272-1278.	Robert Kilwarby (resigned).
693-731.	Berhtwald.	1050-1052.	Robert of Jumièges.	1279-1292.	John Peckham.
731-734.	Taetwine.	1052-1070.	Stigand: deprived.	1293-1313.	Robert Winchelsey.
735-741.	Nothelm.	1070-1089.	St. Lanfranc, d. May 24.	1313-1327.	Walter Reynolds.
741-758.	Outhbert.	1093-1109.	Anselm.	1327-1333.	Simon de Mepham.
759-762.	Broogwine.		[See vacant 5 years.]	1333-1348.	John Stratford.
763-790.	Jænbeht, or Lambert.	1114-1122.	Radulphus de Turbине.	1348-1349.	John de Ufford.
790-803.	Æthelheard.	1123-1136.	William de Curbellio.	1349.	Thomas Bradwardin.
803-829.	Wulfred.	1139-1261.	Theobald.	1349-1366.	Simon Islip.
829.	Flegild.	1162-1170.	Thomas Becket: murdered Dec. 29.	1366-1368.	Simon Langham (resigned).
830-870.	Ceolnoth.		[See vacant.]	1368-1374.	Wm. Whittlesey.
870-889.	Æthelred.	1174-1184.	Richard.		
891-929.	Plegmund.	1184-1190.	Baldwin.		
923 (?)	Æthelm.	1191.	Reginald Fitz-Joceline, died Dec. 26.		
928-941.	Wulfelm.		[See vacant.]		
941-958.	Odo.				
959-988.	St. Dunstan, d. May 19.				

muzzle-loaded with charges of 40lbs. of powder, twice, and once of 50lbs. Great efforts are still being made in the construction of iron plates, and cannon to destroy them. On Sept. 16, 1862, the Horsfall gun mentioned in the text, with a charge of 75 lbs. of powder and a shot of 270 lbs. totally smashed a Warrior target.

CANTERBURY, *continued.*

A.D.		A.D.		A.D.	
1375-1381.	Simon Sudbury, beheaded by the rebels, June 14.	1503-1532.	Wm. Warham.	1691-1694.	John Tillotson, d. Nov. 22.
1381-1396.	William Courtenay.	1533-1556.	Thos. Cranmer (burnt, March 21).	1695-1715.	Thos. Tenison, d. Dec. 14.
1397-1398.	Thos. Fitzalan or Arundel (attainted).	1556-1558.	Reginald Pole, d. Nov. 17.	1715-1737.	Wm. Wake, d. Jan. 24.
1398.	Roger Walden (expelled).	1559-1575.	Matt. Parker, d. May 17.	1737-1747.	John Potter, d. Oct. 10.
1399-1414.	Thomas Arundel (restored).	1576-1583.	Edm. Grindal, d. July 6.	1747-1757.	Thos. Herring, d. Mar. 13.
1414-1443.	Henry Chicheley.	1583-1604.	John Whitgift, d. Feb. 29.	1757-1758.	Matt. Hutton, d. Mar. 19.
1443-1452.	John Stafford.	1604-1610.	Rd. Bancroft, d. Nov. 2.	1758-1768.	Thos. Secker, d. Aug. 3.
1452-1454.	John Kemp.	1611-1633.	Geo. Abbot, d. Aug. 4.	1768-1783.	Fred. Cornwallis, died Mar. 19.
1454-1486.	Thomas Bouchier.	1633-1645.	Wm. Laud (beheaded, Jan. 10).	1783-1805.	John Moore, d. Jan. 18.
1486-1500.	John Morton.	[See vacant 16 years.]		1805-1828.	Chas. Manners Sutton, died July 21.
1501-1503.	Henry Deane or Denny.	1660-1663.	Wm. Juxon, d. June 4.	1828-1848.	Wm. Howley, d. Feb. 11.
		1663-1677.	Gilb. Sheldon, d. Nov. 9.	1848-1862.	John Bird Sumner, died Sept. 6.
		1678-1691.	Wm. Sancroft (deprived Feb. 1), d. Nov. 24, 1693.	1862.	C. T. Longley, PRESENT-abp.

CANTERBURY TALES, by Geoffrey Chaucer, were written about 1364; and first printed about 1475 or 1476 (by Caxton).

CANTHARIDES, venomous green beetles, which, when dried and pulverised, are used principally to raise blisters. They are commonly found in Spain, and hence are called Spanish flies. Their use is ascribed to Areteus of Cappadocia, about 50 B.C.

CANTON, the only city in China with which Europeans were allowed to trade, till the treaty of Aug. 29, 1842. Nearly every nation has a factory at Canton, but that of England surpasses all others in elegance and extent. Merchants arrived here in 1517. A fire destroying 15,000 houses, 1822. An inundation sweeping away 10,000 houses and 1000 persons, Oct. 1833. See *China* 1834, 1839, 1856, 1861. Population estimated at 1,000,000.

CANULEIAN LAW, permitting the patricians and plebeians to intermarry, was passed at Rome 445 B.C.

CAOUTCHOUC, or INDIA RUBBER, an elastic resinous substance that exudes by incisions from several trees that grow in Cayenne, Quito, and the Brazils, the *Hævia caoutchouc* and *Siphonia elastica* (vulgarly called syringe trees). It was first brought to Europe from South America, about 1730. In 1770, Dr. Priestley said that he had seen "a substance excellently adapted to the purpose of wiping from paper the marks of a black-lead pencil." It was sold at the rate of 3s. the cubic half-inch. India rubber cloth was made by Samuel Peal and patented in 1791. Vulcanised rubber formed by combining India rubber with sulphur, which process removes the susceptibility of the rubber to change under atmospheric temperatures, was patented in America, by Mr. C. Goodyear in 1839; and is said to have been invented also by Mr. T. Hancock, of the firm of Mackintosh and Co., who patented it in 1843. Subsequently (in 1849), Mr. Goodyear invented the manufacture of hard rubber (now termed Ebonite) as a substitute for horn and tortoise-shell, for combs, paper-knives veneer, walking sticks, &c. A mode of retaining India rubber in its natural fluid state (by applying to it liquid ammonia) was patented in England, on behalf of the inventor, Mr. Henry Lee Norris, of New York, in 1853. Above 1000 tons of caoutchouc were imported into this country in 1860.

CAP. The Romans long went without regular covering for the head, and ancient statues are bare headed. At one period the cap was a symbol of liberty, and when the Romans gave it to their slaves, it entitled them to freedom. In Italy the Jews were formerly distinguished by a yellow cap, and in France persons who had been bankrupt were for ever after obliged to wear a green cap. The general use of caps and hats is referred to the year 1449. They were worn at the entry of Charles VII. into Rouen, from which time they took the place of chaperons or hoods. The velvet cap was called mortier; the wool cap, bonnet. The clerical or university square cap was invented by Patrouillet. See *Copper* and *Hats*. By the canons of the English church (1603), a nightcap or "coife" may be worn during divine service only in case of infirmity.

CAPE BRETON, a large island, on the W. coast of N. America, was discovered by the English in 1584; taken by the French in 1632, but was afterwards restored; and again taken in 1745, and re-taken in 1748. It was finally captured by the English in 1758, when the garrison of 5600 men were made prisoners, and eleven French ships were captured or destroyed. Ceded to England in 1763.

CAPE-COAST CASTLE (S.W. Africa). Settled by the Portuguese in 1610; but it soon fell to the Dutch. It was demolished by admiral Holmes in 1661. All the British factories

and shipping along the coast were destroyed by the Dutch admiral, De Ruyter, in 1665. It was confirmed to the English by the treaty of Breda, in 1667. See *Ashantee*.

CAPE DE VERD ISLANDS, N. Atlantic Ocean, near Cape de Verd, were known to the ancients as Gorgades; but not to the moderns till discovered by Antonio de Noli, a Genoese navigator in the service of Portugal, 1446, 1450, or 1460. The Portuguese possess them still.

CAPE LA HOGUE. See *La Hogue*.

CAPE OF GOOD HOPE, a promontory on the S.W. point of Africa, originally called "Cabo Tormentoso," (the stormy cape), and also the "Lion of the Sea," and the "Head of Africa," discovered by Bartholomew de Diaz in 1486. The name was changed to its present one by John II. of Portugal, who augured favourably of future discoveries from Diaz having reached the extremity of Africa.

The cape was doubled, and the passage to India discovered by Vasco de Gama . . . Nov. 20, 1497	The constitution granted to the colony promulgated and joyfully received on . . . July 1, 1853
Cape Town, the capital, planted by the Dutch 1651	General Pratorius, the chief of the Trans-Vaal Republic, died in . . . Aug. —
Colony taken by the English, under admiral Elphinstone and general Clarke . . . Sept. 1795	The British having given up its jurisdiction over the Orange river territory, a free state was formed (See <i>Orange River</i>) . . . March 29, 1854
Restored at the peace in . . . 1802	The Caffres were much excited by a prophet named Umhla-kaza. By the exertions of sir George Grey, the governor, tranquillity was maintained . . . Aug. 1846
Taken by sir D. Baird and sir H. Popham, Jan. 8, 1806	The cape visited by prince Alfred in . . . July 1860
Finally ceded to England in . . . 1815	The first railway from Cape Town, about 53 miles long, about to be opened . . . Dec. —
British emigrants arrive in . . . March, 1820	Population in 1854, 267,100.
The neighbouring Caffres make irruptions on the British settlements at the cape; and commit dreadful ravages at Grahamstown (See <i>Kafraria</i>) . . . Oct. 1834	
The inhabitants successfully resist the attempt to make the cape a penal colony . . . May 19, 1849	

CAPE ST. VINCENT (S.W. Portugal). Sir George Rooke, with twenty-three ships of war, and the Turkey fleet, was attacked by Tourville, with 160 ships off Cape St. Vincent, when twelve English and Dutch men of war, and eighty merchantmen, were captured or destroyed by the French, June 16, 1693.—Sir John Jervis, with the Mediterranean fleet of fifteen sail, defeated the Spanish fleet of twenty-seven ships of the line off this cape, taking four ships and destroying several others, Feb. 14, 1797. For this victory sir John was raised to the English peerage, by the title of earl St. Vincent. Nelson was engaged in this battle.

CAPET, HOUSE OF. The third race of the kings of France. Hugo Capet, count of Paris and Orleans, the first of this race (which was called from him Capetians, and Capetigians), seized the throne on the death of Louis V. called the Indolent, who reigned but one year, and is supposed to have been poisoned by his queen, A.D. 987. Hugo was renowned for his military valour and public virtues. *Hénault*. The first line of the house of Capet expired with Charles IV., the Handsome, in 1328, when the branch of Valois ascended the throne in the person of Philip VI. See *France*.

CAPILLARITY (a term applied to the rising of liquids in small tubes, and the ascent of the sap in plants) is said to have been first observed by Niccolo Aggiunti of Pisa, who lived 1600—35. The theory has been considered by Newton, La Place, and others. Dr. T. Young's theory was put forth in 1805, and Mr. Wertheim's researches in 1857.

CAPITATION TAX. See *Poll-tax*.

CAPITOL, so called from a human head (*caput*) being found when digging the foundations of the principal fortress of ancient Rome, on Mons Tarpeius, on which a temple was built to Jupiter, thence called *Jupiter Capitolinus*. The foundation was laid by Tarquinius Priscus, 616 B.C. The building was continued by Servius Tullius, and completed by Tarquinius Superbus, but was not dedicated till 507 B.C. by the consul Horatius. It was burnt during the civil wars, 83 B.C., rebuilt by Sylla, and dedicated again by Lutatius Catulus, 69 B.C. The Roman consuls made large donations to this temple, and the emperor Augustus bestowed on it 2000 pounds weight of gold, of which precious metal the roof was composed: its thresholds were of brass, and its interior was decorated with shields of solid silver. It was destroyed by lightning 188 B.C.; by fire A.D. 70, and rebuilt by Domitian. The Capitoline games, instituted 387 B.C., were revived by Domitian, 86. A.D. The Campidoglio contains palaces of the senators, erected on the site of the Capitol by Michael Angelo soon after 1546.

CAPITULARIES, the laws of the Frankish kings, commencing with Charlemagne (801). Collections have been published by Baluze (1677) and others.

CAPPADOCIA, an ancient kingdom of Asia Minor. Its early history is involved in obscurity. Its inhabitants are stated to have been most depraved idolators.

Pharnaces said to have founded the kingdom . . .	B. C. 744	Roman senate declares the country free, and appoints Ariabazanes I. king . . .	B. C. 93
Cappadocia conquered by Perdiccas, regent of Macedon; the king, Ariarathes I., aged 82, crucified . . .	322	He is several times expelled by Mithridates, &c., but restored by the Romans; dies . . .	64
Recovers its independence . . .	315	Ariobarzanes II. supports Pompey, and is slain by Crassus . . .	42
Conquered by Mithridates of Pontus . . .	291	Ariarathes VII. deposed by Antony . . .	36
Held by Seleucus Nicator . . .	280	Archelaus is favoured by Augustus, 20 B.C.; but accused by Tiberius, he comes to Rome and dies there, oppressed with age and infirmities . . .	A. D. 17
Ariarathes V., Philopator, reigns, 162; dethroned by Holophernes, 130, but restored by the Romans, 158; killed with Crassus in the war against Aristonicus . . .	130	Cappadocia becomes a Roman province . . .	15
His queen, Laodice, poisons five of her sons; the sixth (Ariarathes VI.) is saved; she is put to death . . .	—	Invaded by the Huns . . .	515
Ariarathes VI. murdered by Mithridates Eupator; who sets up various pretenders. The		And by the Saracens . . .	717
		Recovered by the emperor Basil I. . .	876
		Conquered by Soliman . . .	1074
		Annexed to Turkish empire . . .	1360

CAPPEL (Switzerland). Here the reformer Zwinglius was slain in a conflict between the catholics and the men of Zurich in 1531.

CAPPER. None allowed to sell any hat for above 20*d*, nor cap for above 2*s*. *Sd*. 5 Henry VII. 1489. It was enacted in 1571 that every person above seven years of age should wear on Sundays and holidays, a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. Excepted: maids, ladies, and gentlewomen, and every lord, knight, and gentleman, of twenty marks of land, and their heirs, and such as had borne office of worship, in any city, town, or place, and the wardens of the London companies. See *Caps* and *Hats*.

CAPRI (Capræ), an island near Naples, the sumptuous residence of Augustus, and particularly of Tiberius; memorable for the debaucheries he committed during the seven last years of his life, A.D. 27. Capri was taken by sir Sidney Smith, April 22, 1806.

CAPS and **HATS**. About 1750 Sweden was much distracted by two factions thus named, the former in the interest of the Russians, and the latter in that of the French. They were broken up and the names prohibited by Gustavus III. in 1771, who desired to exclude foreign influence. His assassination by Ankarström, March 6, 1792, set aside all his plans for the improvement of Sweden.

CAPUA (Naples), formerly capital of Campania, took the part of Hannibal, whose army wintered here after the battle of Cannæ, 216 B.C., and it is said became enervated through luxury. In 211, when the Romans retook the city, they scourged and beheaded all the surviving senators; the others had poisoned themselves after a banquet previous to the surrender of the city. Only two persons escaped degradation, two women; one of whom had prayed for the success of the Romans, and the other succoured some prisoners. During the middle ages Capua was in turn subjugated by the Greeks, Saracens, and Normans, and Germans. It was restored to Naples in 1424. Capua was invested in Oct. and taken Nov. 2, 1860, by Garibaldi and his followers.

CAPUCHIN FRIARS, a sort of Franciscans, to whom this name was given from their wearing a great *Capuchon*, or cowl, an odd kind of cap or hood, sewn to their habit, and hanging down upon their backs. The Capuchins were founded by Matthew Baschi, about A.D. 1525.

CAR. The invention is ascribed to Erichthonius of Athens, about 1486 B.C. Covered cars (*currus arcuati*) were in use among the Romans. The *lectica* (a soft cushioned car) was the next invented; and this gave place to the *carpentum*, a two-wheeled car, with an arched covering, hung with costly cloth. Still later were the *carruce*, in which the officers of state rode. Triumphal cars, introduced by Tarquin the Elder, were formed like a throne.

CARACAS (a province, S. America, part of Venezuela), discovered by Columbus, A.D. 1498. After many unsuccessful attempts to settle it by the missionaries, it was at last reduced by force of arms, and assigned as property to the Welsers, German merchants, by Charles V.; but, owing to the tyranny of their administration, they were dispossessed in 1550, and a crown governor appointed. The province declared its independence of Spain, May 9, 1810. The city Leon de Caracas, on March 26, 1812, was visited by a violent earthquake, and nearly 12,000 persons perished. See *Venezuela*.

CARBERRY HILL (S. Scotland). Here on June 15, 1567, lord Hume and the confederate barons dispersed the royal army under Bothwell, and took Mary queen of Scots prisoner. Bothwell fled.

CARBOLIC ACID (or phenic acid), obtained by the distillation of pit-coal, is a powerful antiseptic. It is now (1862) manufactured for medical purposes, and has been advantageously used at Carlisle and Exeter in the deodorisation of sewage (1860-1).

CARBON was shown to be a distinct element by Lavoisier in 1788. He proved the diamond to be its purest form, converting it into carbonic acid gas by combustion. *Gmelin*.

CARBONARI (colliers, or charcoal-burners), a powerful secret society in Italy, which derived its origin, according to some, from the Waldenses, and which became known soon after the fall of the Italian republics early in the present century. It aimed at the expulsion of foreigners from Italy, and the establishment of civil and religious liberty. In March, 1820, it is said that 650,000 joined the society, and an insurrection soon after broke out in Naples, general P  p   taking the command. It was quickly suppressed, and the Carbonari were henceforth denounced as traitors. The society since 1818 spread in France, and doubtless hastened the fall of the Bourbons in 1830 and 1848. It has been frequently but incorrectly confounded with free-masonry.

CARBONIC ACID GAS, a compound of carbon and oxygen, which occurs in the air, and is a product of combustion, respiration, and fermentation. The Grotto del Cane yields 200,000 lbs. per annum. No animal can breathe this gas. The briskness of champagne, beer, &c., is due to its presence. It was liquefied by atmospheric pressure by Faraday in 1823. On exposing the liquid to the air for a short time it becomes solid, in the form of snow.

CARDIFF CASTLE (S. Wales). Here Robert, duke of Normandy, eldest son of William I., was imprisoned from 1106 till his death, 1134.

CARDINALS, ecclesiastical princes in the church of Rome, are properly the council of the pope, and constitute the conclave or sacred college. At first they were only the principal priests, or incumbents of the parishes in Rome, and were called *cardinales* in 853. On this footing they continued till the eleventh century. They did not acquire the exclusive power of electing the popes till A.D. 1160 (some say 1058 or 1181; Onuphrius says not till 1562). They first wore the red hat to remind them that they ought to shed their blood for religion, if required, and were declared princes of the church by Innocent IV., 1243. In 1586 pope Sixtus V. fixed their number at 70; but there are generally vacancies. In 1860 there were 69 cardinals, in 1861, 63. Paul II. gave the scarlet habit, 1464; and Urban VIII. the title of Eminence in 1630; some say, in 1623. *Ducange*.

CARDROSS CASE. See *Trials*, 1861.

CARDS. Their invention is referred to the Chinese, Hindoos, and Romans. It is generally supposed that they were invented in France in 1391, to amuse Charles IV. during the intervals of a melancholy disorder, which in the end brought him to his grave. *Mezeray*. Cards are of Spanish, not of French origin. *Daines Barrington*. Piquet and all the early games are French.—Cards first taxed in England, 1756. 428,000 packs were stamped in 1775, and 986,000 in 1800. In 1825, the duty being then 2s. 6d. per pack, less than 150,000 packs were stamped; but in 1827 the stamp duty was reduced to 1s., and 310,854 packs paid duty in 1830. Duty was paid on 239,200 packs in the year ending 5th Jan. 1840; and on near 300,000, year ending 5th Jan. 1850. By an act passed in 1862 the duty on cards was reduced to 3d. per pack, and the sellers were required to take out a licence.

CARIA, in Asia Minor, was conquered by Cyrus, 546 B.C.; subdued by Dercyllidas, a Lacedæmonian, 397; his successor Hecatomnus became king, 385 B.C., for whose son Mausolus the celebrated *Mausoleum* was erected (*which see*). After many changes Caria was absorbed into the Turkish empire.

CARICATURES originated, it is said, with Bufalmaco, an Italian painter; he first put labels to the mouths of his figures with sentences, since followed by bad masters, but more particularly in caricature engravings, about 1330. *De Piles*. The modern caricatures of Gilray, Rowlandson, H. B. (John Doyle ^{TD} = IB), R. Doyle and J. Leech are justly celebrated. The well-known "Punch" was first published in 1841. The most eminent writers of fiction of the day and others (Douglas Jerrold, Thackeray, A. Becket, Professor E. Forbes, &c.) have contributed to this amusing periodical.

CARINTHIA, a Bavarian duchy, was annexed to Austria, 1363.

CARISBROOK CASTLE (Isle of Wight), said to have been a fortress under the Britons and Romans; was taken, A.D. 530, by Cerdic, founder of the kingdom of the West Saxons. Its Norman character has been ascribed to William Fitz-Osborne, earl of Hereford in William I.'s time. Here Charles I. was imprisoned in 1647. The part which he occupied is much decayed, but a window is shown through which he endeavoured to escape. Here died his daughter Elizabeth, aged fifteen, too probably of a broken heart, Sept. 8, 1650.

CARLISLE (Cumberland), a frontier town of England, wherein for many ages a strong garrison was kept. Just below this town the famous Picts' wall began, which crossed the whole island to Newcastle-upon-Tyne, and here also ended the great Roman highway. The great church, called St. Mary's, is a venerable old pile; a great part of it was built by St. David, king of Scotland, who held Cumberland, Westmoreland, and Northumberland, in vassalage from the crown of England. The castle, restored in 1092, by William II., was the prison of Mary queen of Scots, in 1568.—Taken by the parliamentary forces in 1645, and by the young Pretender, Nov. 15, 1745: retaken by the duke of Cumberland, Dec. 30, same year. The see was erected by Henry I. in 1132, and made suffragan to York. The cathedral had been founded a short time previously, by Walter, deputy in these parts for William Rufus. It was almost ruined by Cromwell, and has never recovered its former great beauty, although repaired after the Restoration. It has been lately renovated at a cost of 15,000*l.* and was reopened in 1856. The see has given to the civil state one lord chancellor and two lord treasurers; it is valued in the king's books at 530*l.* 4*s.* 1*d.* per annum. Present income 4500*l.*

RECENT BISHOPS OF CARLISLE.

1791. Edward Venables Vernon, trans. to York, 1807.	1856. Hon. H. Montagu Villiers, trans. to Durham, May, 1860.
1808. Samuel Goodenough, died Aug. 12, 1827	
1827. Hugh Percy, died Feb. 1856.	1860. Hon. Samuel Waldegrave (PRESENT bishop).

CARLOVINGIANS, the second dynasty of the French kings. See *France*.

CARLOW (S. E. Ireland). The castle, erected by king John, surrendered after a desperate siege to Rory Oge O'Moore, in 1577; again to the parliamentary forces, in 1650. In an attempt to new-model this venerable pile, its foundations were so sapped, that the whole fabric gave way, and it now contains a heap of indiscriminate ruins. Battle here between the royal troops and the insurgents; the latter routed, May, 1798.

CARLSBAD (or Charles's Bath), in Bohemia, where are the celebrated springs, discovered by the emperor Charles IV. in 1358.—On Aug. 1, 1819, a congress was held here, when the great powers decreed measures to repress the liberal press, &c.

CARMAGNOLE, a popular song and dance, derived from Piedmont, very popular in France during the reign of terror in 1793-4. The chorus of this song was "*Dansons la Carmagnole: vive le son du canon!*"

CARMELITES, or **WHITE FRIARS**, named from Mount Carmel, one of the four orders of mendicants, distinguished by austere rules, was founded by Berthold about 1156, and settled in France in 1252. *Hénault*. The rigour of the rules was moderated about 1540. They profess to claim descent from Elijah, Elisha, &c. See *White Friars*.

CARNATIC, a district of Southern Hindostan, extending along the whole coast of Coromandel. Hyder Ali entered the Carnatic with 80,000 troops, in 1780, and was defeated by the British under sir Eyre Coote, July 1, and Aug. 27, 1781; and decisively overthrown, June 2, 1782. The Carnatic was overrun by Tippoo in 1790. The British have possessed entire authority over the Carnatic since 1801. See *India*.

CARNATION. Several of its varieties, together with the gilly-flower, the Provence rose, and a few others, were first planted in England by the Flemings, about 1567. *Stow*. The carnation was so called from the original species being of a flesh colour (*carnis*, of flesh).

CARNEIAN GAMES, observed in many Grecian cities, particularly at Sparta (instituted about 675 B.C. in honour of Apollo, surnamed Carneus), lasted nine days.

CARNIVAL (*Carni vale*, Italian, *i.e.* *Flesh, farewell!*), a festival time in Italy, particularly at Venice, about Shrove-tide, or beginning of Lent.

CAROLINA (N. America). Discovered by Sebastian Cabot in 1498. A body of English, about 850 persons, landed and settled here about 1669; and Carolina was granted to lord Berkeley and others a few years afterwards. The cultivation of rice was introduced by governor Smith in 1695, and subsequently cotton. The province was separated into North and South Carolina, in 1719. See *America*. The Carolinas are slave states. Great excitement prevailed in them in Nov. 1860, on account of Mr. Abraham Lincoln's election to the presidency of the United States, he being strongly opposed to slavery. South Carolina began the secession from the United States, Dec. 20, 1860: North Carolina followed, May 21, 1861. See *United States*.

CAROLINE ISLANDS were discovered by the Spaniards in the reign of Charles II. 1686.

CARP, a fresh-water or pond fish, was, it is said, first brought to these countries about 1525. *Walton*. But is mentioned by lady Juliana Berners in 1496.

CARPETS were in use, at least in some kind, as early as 800 B.C. See *Amos* ii. 8. They were used spread on the ground, for sitting on in tents. In the twelfth century they were articles of luxury; and in England it is mentioned that Becket's sumptuous apartments were every day in winter strewn with clean straw or hay; about A.D. 1160. The manufacture of woollen carpets was introduced into France from Persia, in the reign of Henry IV., between 1589 and 1610. Some artisans who had quitted France in disgust established the English carpet manufacture, about 1750. A cork-carpet company was formed in 1862.

CARRACK, or *Karraek* (Italian, *Caracca*), a large ship in the middle ages. The *Santa Anna*, the property of the knights of St. John, of about 1700 tons, sheathed with lead, was built at Nice about 1530. It was literally a floating fortress, and aided Charles V. in taking Tunis in 1535. It contained a crew of 300 men and 50 pieces of artillery.

CARRIAGES. Their invention is ascribed to Erichthonius of Athens, who produced the first chariot about 1486 B.C. Carriages were known in France in the reign of Henry II. A.D. 1547; but they were very rude and rare. They seem to have been known in England in 1555; but not the art of making them. Close carriages of good workmanship began to be used by persons of the highest quality at the close of the sixteenth century. Henry IV. of France had one, but without straps or springs. They were first made in England in the reign of Elizabeth, and were then called whirlicotes. The duke of Buckingham, in 1619, drove six horses; and the duke of Northumberland, in rivalry, drove eight. Carriages were let for hire in Paris, in 1650, at the Hôtel Fiacre; hence the name, *fiacre*. See *Car*, *Cabriolets*, *Chariots*, and *Coaches*.

CARRICKFERGUS (Antrim, Ireland). Its castle is supposed to have been built by Hugh de Lacy, in 1178. The town surrendered to the duke of Schomberg, Aug. 28, 1699. William III. landed here, June 14, 1690, to reduce the adherents of James II. The castle surrendered to the French admiral Thurot, 1760. See *Thurot*.

CARRON IRON-WORKS, on the banks of the Carron, in Stirlingshire, established in 1760. The works in 1852 employed about 1600 men. Here since 1776 have been made the pieces of ordnance called *carronades*.

CARROTS and other edible roots were imported from Holland and Flanders, about 1540; they were grown in England.

CARTESIAN DOCTRINES, promulgated by René Des Cartes, the French philosopher, in 1637. He was an original thinker: his metaphysical principle is, "I think, therefore I am;" his physical principle, "Nothing exists but substance." He accounts for all physical phenomena on his theory of vortices, motions excited by God, the source of all motion. His system has contributed to excite independent thought in others. He was born 1596, and died at Stockholm, the guest of queen Christina, in 1650.

CARTES DE VISITE. The small photograph portraits thus termed are said to have been first taken at Nice, by M. Ferrier in 1857. The duke of Parma having had his full length portrait placed upon his visiting cards, his example was followed, and the practice soon became popular in Paris and London.

CARTHAGE (N. coast of Africa, near Tunis), founded by Dido or Elissa, sister of Pygmalion, king of Tyre, B.C. 878 (869, *Blair*; 826, *Niebuhr*). She fled from that tyrant, who had killed her husband, and took refuge in Africa. Carthage became a great commercial and warlike republic and disputed the empire of the world with Rome, which occasioned the Punic wars (*which see*). The Carthaginians bore the character of a faithless people, hence the term *Punic faith*.* Cato the censor was so inveterate against them that he ended his discourses in the senate with *Carthago delenda!* "Carthage must be destroyed!"

First alliance of the Carthaginians with the Romans	B.C. 509	The Carthaginians land in Italy	379
The Carthaginians in Sicily defeated at Himera by Gelo; the elder Hamilcar perishes	480	Their defeat by Timoleon	339
They enlarge their territories	410	Defeated by Agathocles, they immolate their children on the altar of Saturn	B.C. 310
They send 300,000 men into Sicily	407	The first Punic war begins	264
Take Agrigentum	406	The Carthaginians defeated by the Roman consul Duilius in a naval engagement	260
The siege of Syracuse	396	Xanthippus defeats Regulus	255

* The Carthaginians had two principal deities, the *Celestial Goddess*, the Moon; and *Moloch* or *Saturn*, to whom their infants were sacrificed. This idol was contrived with a hollow body, in which a fire was kindled, with arms and hands bent in a position for receiving the devoted victim. Into these hands, while the idol was of a glowing heat, the unhappy child was placed; and in the struggle occasioned by the torture, it fell forward, through a hole in the base on which the idol sat, into the fire beneath. These sacrifices were not always confined to children: the Carthaginian generals, when the event of a battle seemed likely to be against them, made no scruple to offer up their soldiers and prisoners.

CARTHAGE, *continued*.

Hasdrubal defeated by Metellus at Panormus . . .	251	Hasdrubal, brother of Hannibal, defeated and slain at the Metaurus . . .	207

		Taken and destroyed by Hassan the Saracenic governor of Egypt . . .	698
		Carthaginian antiquities brought to the British Museum . . .	1861

CARTHAGENA, or NEW CARTHAGE (S.E. Spain), built by Hasdrubal, the Carthaginian general, 229 B.C.; was taken by Scipio 210; and by a British force under sir John Leake in A.D. 1706, but was retaken by the duke of Berwick, 1707.—CARTHAGENA, in Columbia, South America, was taken by sir Francis Drake in 1585; was pillaged by the French, of 1,200,000*l.* in 1697; and was bombarded by admiral Vernon in 1740-1.

CARTHUSIANS, a religious order (springing from the Benedictines) founded by Bruno of Cologne, who retired with six companions from the converse of the world in 1084, to Chartreuse (*which see*), in the mountains of Dauphiné. Their austere rules were formed by Basil VII., general of the order. The monks could not leave their cells, or speak, without express leave; and their clothing was two hair-cloths, two cowls, two pair of hose, and a cloak, all coarse.—They appeared in England about 1180, and a Carthusian monastery, founded by sir William Manny, 1371, was the site of the present Charter-house, London. See *Charter-house*. The Carthusian powder, so called because it was first administered by a friar, father Simon, at Chartreuse, was first compounded about 1715.

CARTOONS. Those of RAPHAEL were designed (for tapestries) in the chambers of the Vatican under Julius II. and Leo. X. about 1510 to 1514. The seven preserved were purchased in Flanders by Rubens for Charles I. of England, for Hampton court palace in 1629. They represent—1, the Miraculous draught of Fishes; 2, the Charge to Peter; 3, Peter and John healing the Lame at the Gate of the Temple; 4, the Death of Ananias; 5, Elymas the Sorcerer struck with blindness; 6, the Sacrifice to Paul and Barnabas, at Lystra; 7, Paul preaching at Athens.—The tapestries executed at Arras from these designs are at Rome. They were twice carried away by invaders, in 1526 and 1798, and were restored in 1815.—The Cartoons for the British Houses of Parliament were exhibited in 1843.

CARVING. See *Sculptures*.

CASH-PAYMENTS. See *Bank of England*.

CASHEL (Tipperary, Ireland). Cormack Cuillinan, king and bishop of Cashel, is reputed to be either the founder or the restorer of the cathedral; A.D. 901. In 1152, bishop Donat O'Danergan was invested with the pall. See *Pallium*. Cashel was valued in the king's books, by an extent returned 29 Henry VIII., at 66*l.* 13*s.* 4*d.* Irish money. By the Church Temporalities act, 3 & 4 Will. IV. 1833, this see ceased to be archiepiscopal, and was joined to Waterford and Lismore.

CASHMERE, in the Himalayas; was subdued by the Mahometans in the 16th century; by the Affghans in 1754; by the Sikhs in 1819; and was ceded to the British in 1846; who gave it to the Maharajah Gholab Singh, with a nominal sovereignty. The true Cashmere shawls can be manufactured of no other wool than that of Thibet. They were first brought to England in 1666; but are well imitated at Bradford and Huddersfield. Shawls of Thibetian wool, for the omrahs, cost 150 rupees each, about 1650. *Bernier*.

CASSITERIDES. See *Scilly Isles*.

CASTE, a term applied to distinct sections of society in India. In the laws of Menu (see *Menu*), the Hindus are divided into the Brahmins, or sacerdotal class; the Kshatrya or Chuttree, military class; the Vaisya, or commercial class; and the Sudras, or sooders, servile class.

CASTEL FIDARDO, near Ancona, Central Italy. Near here general Lamoricière and the papal army of 11,000 men were totally defeated by the Sardinian general, Cialdini, Sept.

18, 1860. Lamoricière with a few horsemen fled to Ancona, then besieged. On Sept. 29, he and the garrison surrendered, but were shortly after set at liberty.

CASTEL NUOVO, in the great earthquake which convulsed all Naples and Sicily, in 1783, was almost obliterated. It is recorded that an inhabitant being on a hill at no great distance, looking back, saw no remains of the town, but only a black smoke : 4000 persons perished ; and in Sicily and Naples, more than 40,000.

CASTIGLIONE (N. Italy). Here the French under Augereau defeated the main body of Austrians, commanded by Wurmser : the battle lasted from Aug. 3rd to 5th, 1796. Bonaparte stated the enemy's loss to be 70 field-pieces, all his caissons, between 12,000 and 15,000 prisoners, and 6000 killed and wounded.

CASTILE (Central Spain). A most powerful government of the Goths was established here about A.D. 800.—Ferdinand, count of Castile, assumed the title of king in 1035. Ferdinand of Arragon married Isabella of Castile in 1474, and nearly the whole of the Christian dominions in Spain were united in one monarchy, 1479. See *Spain*.

CASTILLEJOS (N. Africa). Here on Jan. 1, 1860, was fought the first decisive action in the war between Spain and Morocco. General Prim, after a vigorous resistance, repulsed the Moors under Muley Abbas, and advanced towards Tetuan.

CASTELON, in Guienne. Here the army of Henry VI. of England was defeated by that of Charles VII. of France. An end was put to the English dominion in France, Calais alone remaining, July 23, 1453. Talbot, earl of Shrewsbury, was killed.

CASTLEBAR (Ireland). A body of French troops, under general Humbert, landed at Killala, and, assisted by an insurgent Irish force, compelled the king's troops to retreat, after a sharp contest, Aug. 28, 1798.

CASTLEPOLLARD (Ireland). Fatal affray at a fair here between some peasantry and a body of police, when thirteen persons lost their lives, and more than twice that number were wounded, May 23, 1831. The chief constable, Blake, and his men, escaped punishment.

CASTLES. Ancient British castles were tall houses, strongly fortified, and built on the tops of hills, with gates and walls. The castle of the Anglo-Saxon was a tower keep, either round or square, and ascended by a flight of steps in front. William I. erected 48 strong castles. Several hundreds, built by permission of Stephen, between 1135 and 1154, were demolished by Henry II., 1154. Many were dismantled in the civil wars.

CATACOMBS. The early depositories of the dead. The first Christians at Rome are said to have met for worship in the catacombs ; and here are said to have been the tombs of the apostles Peter and Paul. Catacombs were numerous in Egypt ; and Belzoni in 1815 and 1818, explored many catacombs both in that country and Thebes, built 3000 years ago : among others, a *chef-d'œuvre* of ancient sculpture, the temple of Psammethichus the Powerful, whose sarcophagus, formed of the finest oriental alabaster, exquisitely sculptured, he brought to England. In the Parisian catacombs (formerly stone quarries), human remains from the cemetery of the Innocents were deposited in 1785 ; and there are interred many of the victims of the revolution in 1792.

CATALONIA (W. Spain), was settled by the Goths and Alani, about A.D. 409 ; conquered by the Saracens, 712 ; recovered by Pepin and Charlemagne. It formed part of the Spanish marches and the territory of the count of Barcelona (*which see*). The natives were able seamen : being frequently unruly, their peculiar privileges were abolished in 1714.

CATAMARANS, fire-machines, called also careasses, for destroying ships ; invented and tried in vain by sir Sidney Smith, Oct. 2, 1804, on the Boulogne flotilla destined by Bonaparte to invade England.

CATANIA, a town near Etna, Sicily, was founded by a colony from Chalcis, 753 B.C. Ceres had a temple here, open to none but women. Catania was almost totally overthrown by an eruption of Etna in 1669, and in 1693 was nearly swallowed up by an earthquake : in a moment more than 18,000 of its inhabitants were buried in the ruins. An earthquake did great damage, Feb. 22, 1817. In Aug. 1862, the town was held by Garibaldi and his volunteers, in opposition to the Italian government. He was captured on Aug. 29.

CATAPHRYGIANS, heretics in the second century, who followed the errors of Montanus. They are said to have baptized their dead, forbidden marriage, and mingled the bread and wine in the Lord's Supper, with the blood of young children.

CATAPULTÆ, military engines of the cross-bow kind, for throwing huge stones as well as darts and arrows ; invented by Dionysius, the tyrant of Syracuse, 399 B.C. *Josephus*.

CATEAU CAMBRESIS (N. France), where, in 1559, peace was concluded between Henry II. of France and Philip II. of Spain; to which latter country France ceded Savoy, Corsica, and nearly 200 forts in Italy and the Low Countries.

CATECHISMS. A short one was published by the bishop of Winchester, in 1552. The catechism used by the Protestants originally contained no more than a repetition of the baptismal vow, the creed, and Lord's prayer; but James I. ordered the bishops to enlarge it by adding an explication of the sacraments, 1612. It was increased subsequently by the doctrinal points of the established religion. The catechism of the council of Trent was published in 1566; that of the Assembly of Divines at Westminster in 1648.

CATHERINE. The order of knighthood instituted in Palestine, A.D. 1063. The order of nuns called Catherine's was founded in 1373. An order of ladies of the highest rank in Russia, was founded by Catherine, empress of Peter the Great, 1714. They were to be distinguished, as the name implied (from *katharos*, pure), for purity of life and manners.

CATHOLIC MAJESTY. This title was first given by pope Gregory III. to Alphonsus I. of Spain, A.D. 739. *Licenciado.* The title was also given to Ferdinand V. and his queen in 1474 by Innocent VIII. on account of their zeal for the Roman Catholic religion, and their establishment of the Inquisition in Spain.

CATHOLICS. See article *Roman Catholics*.

CATILINE'S CONSPIRACY. Sergius L. Catiline, a Roman of noble family, having squandered away his fortune by debaucheries and extravagance, and having been refused the consulship, secretly meditated the ruin of his country, and conspired with many of the dissolute aristocracy, to extirpate the senate, plunder the treasury, and set Rome on fire. This conspiracy (commenced 65 B.C.) was timely discovered (in 63 B.C.) by the consul Cicero, whom he had resolved to murder. On seeing five of his accomplices arrested, Catiline retired to Gaul, where his partisans were assembling an army. Cicero punished the condemned conspirators at home, while Petreus routed Catiline's ill-disciplined forces; the conspirator being killed in the engagement, December, 62 B.C. *Sallust*.

CATO, SUICIDE OF, termed the "era destructive of the liberties of Rome." This Roman philosopher, considering freedom as that which alone "sustains the name and dignity of man," and unable to survive the independence of his country, stabbed himself at Utica, 46 B.C.

CATO-STREET CONSPIRACY. A gang of desperate politicians proposed the assassination of the ministers of the crown and the overthrow of the government; they were arrested Feb. 23, 1820. The principals, Thistlewood, Brunt, Davidson, Ings, and Tidd, were executed according to the horrid manner of traitors, on May 1, following.

CATTLE. The importation of horned cattle from Ireland and Scotland into England was prohibited by a law, 16 Charles II. 1663; but the export of cattle from Ireland became and continues to be a vast and beneficial branch of the Irish trade with the sister country. From Waterford alone the value of imported cattle and provisions amounted, in 1841, to nearly half a million sterling. In 1842 the importation of cattle was admitted into England from foreign countries at a moderate duty per head, and in 1846 they were made duty free. In 1846, the live imports from Ireland were, black cattle, 81,592; sheep, 100,366; swine, 381,744.—In 1850, were imported of all sorts of cattle, 217,247; in 1854, 397,430; in 1859, 347,341; from all countries. In April, 1857, great disease arose among cattle abroad, but by great care it was almost excluded from this country. See *Metropolitan Cattle-market* and *Smithfield*.

CAUCASUS. A lofty mountain, a continuation of the ridge of Mount Taurus, between the Euxine and Caspian seas, inhabited anciently by various savage nations. Prometheus was said to have been tied on the top of Caucasus, by Jupiter and continually devoured by vultures, (according to ancient authors, 1548 B.C.) The passes near the mountain were called *Caucasæ Portæ*, and it is supposed that through them the Sarmatians, called Huns, made their way when they invaded the provinces of Rome, A.D. 447. *Strabo*; *Herodotus*. The subjugation of the Caucasian tribes has long been the object of the Russians, and seemed almost achieved by the capture of Schamyl, Sept. 7, 1859, who was honourably received by the czar. The contest still endures. See *Circassia*.

CAUDINE FORKS, according to Livy, the *Furculæ Caudinæ* (in Samnium, S. Italy), were two narrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 321 B.C. (after a fruitless contest, according to Cicero). The Roman senate broke the treaty.

CAULIFLOWER, called the queen of vegetables, was first planted in these kingdoms about 1603; it came from Cyprus, but was not sold at market until about 1670. In the 18th century cauliflowers were a common present from England to Portugal.

CAUSTIC IN PAINTING, a method of burning colours into wood or ivory, invented by Gausias of Sicily. He made a beautiful painting of his mistress Glycère sitting on the ground making garlands with flowers; from this circumstance the picture received the name of *Stephanoplocon*. It was bought by Lucullus for two talents, 335 B.C. *Pliny*.

CAUTIONARY TOWNS (Holland), (the Briel, Flushing, and Rammekins), were given to queen Elizabeth in 1585; and restored to the Dutch republic by James I. in 1616.

CAVALIERS. The appellation given to the supporters of the king during the civil war, from a number of gentlemen forming themselves into a body-guard for the king in 1641. They were opposed to the Roundheads, or friends of the parliament. *Hume*.

CAVALRY. The Romans were celebrated for the discipline and efficiency of their cavalry. Attached to each of the Roman legions was a body of horse 300 strong, in ten turmae; the commander was always a veteran, chosen for his experience and valour. The Persians brought the greatest force of cavalry into the field: they had 10,000 horse at Marathon, 490 B.C.; and 10,000 Persian horse were slain at the battle of Issus, 333 B.C. *Plutarch*. Cavalry were used by the Romans against the natives, and were of large amount in the first wars in Wales. In the wars with Napoleon I. the British cavalry reached to 31,000 men. Our present cavalry force consists of regiments of various denominations; in 1840 it was, *rank and file*, viz. household troops, 1209; dragoons, hussars and lancers, 9524; total, 10,733. In 1856 the total was stated to be 21,651; in 1861, 23,210. See *Horse Guards, &c.*

CAVENDISH EXPERIMENT. In 1798 the hon. Henry Cavendish described his experiment for determining the mean density of the earth, by comparing the force of terrestrial attraction with that of the attraction of leaden spheres of known magnitude and density, by means of the torsion balance. *Brande*.

CAWNPORE, a town in India, on the Doab, a peninsula between the Ganges and Jumna. During the mutiny in 1857 it was garrisoned by native troops under sir Hugh Wheeler. These broke out into revolt. An adopted son of the old Peishwa Bajee Rao, Nana Sahib, who had long lived on friendly terms with the British, came apparently to their assistance, but joined the rebels. He took the place after three weeks' siege, June 26; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, July 12, at Futtehpore, and retook Cawnpore, July 17. A column was erected here, in memory of the sufferers, by their relatives of the 32nd regiment. In Dec. 1860, Nana was said to be living in Thibet; and in Dec. 1861 was incorrectly said to have been captured at Kurrachee.

CAYENNE (in French *Guiana*), S. America, settled by the French in 1625, but left in 1654. It afterwards came successively into the hands of the English, French, and Dutch. The last were expelled by the French in 1677. Cayenne was taken by the British, Jan. 12, 1809, but was restored to the French in 1814. Here is produced the *capsicum baccatum*, or cayenne pepper. Many French political prisoners have been sent here since 1852.

CEDAR TREE. The red cedar (*Juniperus Virginiana*) came from North America before 1664; the Bermudas cedar from Bermudas before 1683; the cedar of Lebanon (*Pinus Cedrus*) from the Levant before 1683. In 1850 a grove of venerable cedars, about 40 feet high, remained on Lebanon. The cedar of Goa (*Cupressus Lusitanica*) was brought to Europe by the Portuguese about 1683. See *Cypress*.

CELERY is said to have been introduced into England by the French marshal, Tallard, during his captivity in England, after his defeat at Blenheim by Marlborough in 1704.

CELESTIAL GLOBE. See *Globes*.

CELIBACY (from *cælebs*, unmarried), was preached by St. Anthony in Egypt about A.D. 305. His early converts lived in caves, &c., till monasteries were founded. The doctrine was rejected in the council of Nice, A.D. 325. Celibacy was enjoined to bishops only in 692. The Romish clergy generally were compelled to a vow of celibacy in 1073. This decree was opposed in England, 958 to 978. Its observance was finally established by the council of Placentia, held in 1095. The marriage of the clergy was proposed, but negatived at the council of Trent (1563).

CELL THEORY (propounded by Schwann in 1839) supposes that the ultimate particles of all animal and vegetable tissues are composed of small cells. Some of the lowest forms of

animal and vegetable life are said to be composed of merely a single cell, as the germinal vesicle in the egg and the red-snow plant.

CELTIBERI. See *Numantine War*.

CELTS, a group of the Aryan family. See *Gauls*.

CEMETERIES. The burying-places of the Greeks and Romans were at a distance from their towns; and the Jews had their sepulchres in gardens and in fields. (*John* xix. 41; *Matthew* xxvii. 60.) The present practice was introduced by the clergy, who pretended that the dead enjoyed peculiar privileges by being interred in consecrated ground. Several public cemeteries planted after the manner of Père La Chaise* have of late years been opened in all parts of the kingdom. See *Catacombs*.

The Kensal-green or general cemetery, containing 53 acres; consecrated . . . Nov. 2, 1832 The South Metropolitan and Norwood cemetery containing 40 acres; consecrated . . . Dec. 6, 1837 The Highgate and Kentish-Town cemetery, containing 22 acres, was opened and consecrated . . . May 20, 1839 The Abney Park cemetery and Arboretum, containing 30 acres at Stoke Newington, was opened by the lord mayor . . . May 20, 1840 The Westminster cemetery, at Earl's-court, Kensington-road, called also the West London; consecrated . . . June 15, 1840	The Nunhead cemetery, containing about 50 acres; consecrated . . . July 29, 1840 City of London and Tower Hamlets cemetery, containing 30 acres; consecrated . . . 1841 The London Necropolis and National Mausoleum, at Woking, Surrey, containing 2000 acres, the company incorporated in July 1852; opened . . . Jan. 1855 The City of London cemetery at Tiford, was opened . . . June 24, 1856 Since then, parochial cemeteries have been opened at Finchley and other places.
---	--

CENSORS, Roman magistrates, whose duty was to survey, rate, and correct the manners of the people. The two first censors were appointed 443 B.C. Plebeian censors were first appointed 131 B.C. The office was abolished by the emperors. See *Press*.

CENSUS. In the Roman polity, a general estimate of every man's estate and personal effects, delivered to the government upon oath every five years; established by Servius Tullius, 566 B.C. In England the census, formerly not periodical, is now taken at decennial periods, of which the latest were, viz. in 1801, 1811, 1821, 1831, 1841, 1851 and 1861 (April 7). The latest census taken in France was in 1862 (every 5th year); in Austria (every 3rd year) 1857; in Belgium (every 3rd year) 1858; in United States (every 10th year) 1860. See *Population*.

CENTRAL AMERICA. See *America*. A large American steamer of this name was wrecked during a gale in the gulf of Mexico, Sept. 12, 1857. Of about 550 persons only 152 were saved: several of these after drifting on rafts above 600 miles. The loss of about 2½ million dollars in specie aggravated the commercial panic at New York shortly after. The captain and crew behaved heroically.

CENTRAL CRIMINAL COURT established in 1834. Commissions are issued to all the fifteen judges of England (of whom three attend in rotation at the Old Bailey) for the periodical delivery of the gaol of Newgate, and the trial of offences of greater degree, committed in Middlesex and certain parts of Essex, Kent, and Surrey; the new district is considered as one county.

CENTURION, the captain, head, or commander of a subdivision of a Roman legion which consisted of 100 men, and was called a *centuria*. By the Roman census each hundred of the people was called a *centuria*, 556 B.C.

CENTURY. The method of computing time by centuries, first generally observed in ecclesiastical history, commenced from the incarnation of Christ, A.D. 1. *Pardon*. It was adopted in chronological history first in France. *Dupin*. Early adopted by all civilised nations. *Dufrenoy*. The Greeks computed time by the Olympiads, beginning 776 B.C.; and the Roman Church, by Indictions, the first of which began Sept. 24, A.D. 312.

CEPHALONIA, one of the Ionian islands, was obtained from the Ætolians by the Romans, 189 B.C., and given to the Athenians by Hadrian, A.D. 135. See *Ionian Isles*.

CERBÈRE, FRENCH BRIG, mounted nine large guns, had a crew of eighty-seven men, and was lying at Port Louis. The harbour was entered in a ten-oared cutter manned with only eighteen men, who, directed by their gallant officer, lieut. Paddon, cut out and made good their prize, July 29, 1800.

* Père La Chaise takes its name from a French Jesuit, the favourite and confessor of Louis XIV. He died in 1709; and the site of his house and grounds at Paris is now occupied by this cemetery.

CEREMONIES, MASTER OF THE, an office instituted for the more honourable reception of ambassadors and persons of quality at court, 1 James I. 1603. *Baker's Chron.* The famous master of the ceremonies at Bath, or president over the amusements of that city, called "Beau Nash," and the "King of Bath," extended the name beyond the court, and led to its general adoption in ordinary assemblies : he died in his 88th year, 1761. *Ashe*.

CERES, a planet, only 160 miles in diameter, was discovered by M. Piazzi, at Palermo, Jan. 1, 1801 ; he named it after the goddess highly esteemed by the ancient Sicilians. It is not visible, except with powerful glasses.

CERIUM, a very rare metal, discovered by Klaproth and others in 1803.

CEUTA, a town on N. coast of Africa, stands on the site of the ancient Abyla, the southern pillar of Hercules. It was taken from the Vandals by Justinian A.D. 534 ; by the Goths 618 ; afterwards by the Moors, from whom it was taken by the Portuguese 1415. With Portugal, it was annexed in 1580 to Spain, which power still retains it.

CEYLON, an island in the Indian Ocean, called by the natives the seat of paradise. It was discovered by the Portuguese Almeyda, A.D. 1505 ; but it was known to the Romans in the time of Claudius, A.D. 41. The capital, Columbo, was taken by the Hollanders in 1603, and was recovered by the Portuguese in 1621. The Dutch again took it in 1656. A large portion of the country was taken by the British in 1782, but was restored the next year. The Dutch settlements were seized by the British ; Trincomalee, Aug. 26, 1795, and Jellapattam, in Sept. same year. Ceylon was ceded to Great Britain by the peace of Amiens in 1802. The British troops were treacherously massacred or imprisoned by the Adigar of Candy, at Columbo, June 26, 1803. The complete sovereignty of the island was assumed by England in 1815. The governor, lord Torrington, was absolved from a charge of undue severity in suppressing a rebellion, May 1851. The prosperity of Ceylon greatly increased under the administration of sir H. Ward, 1855-60. Sir J. E. Tennant's remarkable work, "Ceylon," appeared in 1859.

CHÆRONEA (in Bœotia, where Greece lost its liberty to Philip ; 32,000 Macedonians defeating 30,000 Thebans, Athenians, &c., Aug. 2, 338 B.C. Here Archelaus, lieutenant of Mithridates, was defeated by Sylla, and 110,000 Cappadocians were slain, 86 B.C.

CHAIN-BRIDGES. The largest and oldest chain-bridge in the world is said to be that at Kingtung, in China, where it forms a perfect road from the top of one mountain to the top of another. The honour of constructing the first chain-bridge on a grand scale in England belongs to Mr. Telford, who constructed the chain-suspension-bridge, over the strait between Anglesey and the coast of Wales, 1818-25. See *Menai Straits*.

CHAIN-CABLES, PUMPS AND SHOT. Iron chain-cables were in use by the Veneti, a people intimately connected with the Belgæ of Britain in the time of Cæsar, 55 B.C. These cables came into modern use, and generally in the royal navy of England, in 1812.—**CHAIN-SHOT**, to destroy the rigging of an enemy's ship, was invented by the Dutch admiral, De Witt, in 1666.—**CHAIN-PUMPS** were first used on board the *Flora*, British frigate, in 1787.

CHAINS, HANGING IN. By the 25th Geo. II. 1752, it was enacted that the judge should direct the bodies of pirates and murderers to be dissected and anatomised ; and that he might also direct that they be hung in chains. The custom of hanging the bodies of criminals in chains was abolished in 1834.

CHALDEA, the ancient name of Babylonia, but afterwards restricted to the S.W. portion. The Chaldeans were devoted to astronomy and astrology. See *Dan*. ii. &c.—The **CHALDEAN REGISTERS** of celestial observations were commenced 2234 B.C., and were brought down to the taking of Babylon by Alexander, 331 B.C. (a period of 1903 years). These registers were sent by Callisthenes to Aristotle.—**CHALDEAN CHARACTERS** : the Bible was transcribed from the original Hebrew into these characters, now called Hebrew, by Ezra about B.C. 445.

CHALGROVE (Oxfordshire). At a skirmish here with prince Rupert, June 18, 1643, John Hampden, of the parliament party, was mortally wounded. A column was erected to his memory June 18, 1843.

CHALONS-SUR-MARNE, N.E. France. Here the emperor Aurelian defeated Tetricus, the last of the pretenders to the throne, termed the Thirty Tyrants, A.D. 274 ; and here also in 451 Ætius thoroughly defeated Attila the Hun, compelling him to retire into Pannonia.

CHAMBERLAIN, early a high court officer in France, Germany, and England. The office of chamberlain of the exchequer was discontinued in 1834. The title of chamberlain is also conferred upon civic personages, as in London.

CHAMBERLAIN OF ENGLAND, LORD GREAT. The sixth great officer of state, whose duties, among others, relate to coronations and public solemnities. The rank appertained for many centuries to the family of De Vere, earls of Oxford, granted to it by Henry I. in 1101. On the death of John de Vere, the sixteenth earl, Mary his sole daughter, marrying lord Willoughby de Eresby, the right was established in that nobleman's family by a judgment of the house of peers, 2 Charles I. 1625. On the death of his descendant, unmarried, in July 1779, the house of lords and twelve judges concurred that the office devolved to lady Willoughby de Eresby, and her sister the lady Georgina Charlotte Bertie, as heirs to their brother Robert, duke of Ancaster, deceased; and that they had powers to appoint a deputy to act for them, not under the degree of a knight, who, if his majesty approved of him, might officiate accordingly. *Beatson*. The office has been held since 1828 by the present lord Willoughby de Eresby (1862).

CHAMBERLAIN OF THE HOUSEHOLD, LORD, an ancient office. The title is from the French *Chambellan* in Latin *Camerarius*. He has the oversight of the king's chaplains, the officers of the standing and removing wardrobes, beds, tents, revels, music, hunting, and of all the physicians, surgeons, apothecaries, messengers, tradesmen, and artisans, retained in his majesty's service. Sir William Stanley, knt., afterwards beheaded, was lord chamberlain, 1 Henry VII. 1485. A vice-chamberlain acts in the absence of the chief; the offices are coexistent. *Beatson*.

CHAMBRE ARDENTE (fiery chamber), an extraordinary French tribunal so named from the punishment frequently awarded by it. Francis I. in 1535 and Henry II. in 1549 employed it for the extirpation of heresy, which led to the civil war with the Huguenots in 1560; and in 1679 Louis XIV. appointed one to investigate the poisoning cases which arose after the execution of the marchioness Brinvilliers.

CHAMP DE MARS, an open square in front of the Military School at Paris, with artificial embankments on each side, extending nearly to the river Seine. Here was held, 14th July, 1790, the "fédération," or solemnity of swearing fidelity to the "patriot king," and new constitution: great rejoicings followed, public balls were given by the municipality in the *Champs Elysées*, and Paris was illuminated. On July 14, 1791, a second great meeting was held here, directed by the Jacobin clubs, to sign petitions on the "altar of the country," praying for the abdication of Louis XVI. A third meeting took place July 14, 1792. Another constitution was sworn to here, under the eye of Napoleon I. May 1, 1815, at a ceremony called the *Champ de Mai*. The prince president (now Napoleon III.) had a grand review in the Champ de Mars, and distributed eagles to the army, May 10, 1852.

CHAMPAGNE, an ancient province, N.E. France, formed part of the kingdom of Burgundy, and was governed by counts from the 10th century till it was united to Navarre, count Thibaut becoming king, in 1234. The countess Joanna married Philip V. of France in 1284; and in 1361 Champagne was annexed by their descendant king John.

CHAMPION OF ENGLAND. The championship was instituted at the coronation of Richard II. in 1377. At the coronation of English kings the champion rode completely armed into Westminster-hall, and challenged any one that should deny the title of the sovereign to the crown. The championship is attached to the manor of Scrivelsby, derived from the family of Marmion, and is hereditary in the Dymoke family. Sir Henry Dymoke, the present champion, the 17th of his family who has held the office, was born in 1801.

CHAMPLAIN. See *Lake Champlain*.

CHANCELLOR OF ENGLAND, LORD HIGH, ranks after the princes of the blood royal as the first lay subject. Anciently the office was conferred upon some dignified ecclesiastic termed *cancellarius*, or doorkeeper, who admitted suitors to the sovereign's presence. Arlfastus or Herefast, chaplain to the king (William the Conqueror) and bishop of Elmham, was lord chancellor in 1067. *Hardy*. Thomas à Becket was made chancellor in 1154. The first person qualified by education, to decide causes upon his own judgment, was sir Thomas More, appointed in 1529, before which time the office was more that of a high state functionary than the president of a court of justice. Sir Christopher Hatton, appointed lord chancellor in 1587, was very ignorant, on which account the first reference was made to a master in 1588. In England, the great seal has been frequently put in commission; but it was not until 1813 that the separate and co-existent office of *Vice-Chancellor* was permanently held. See *Keeper, Lord*; and *Vice-Chancellors*.

LORD HIGH CHANCELLORS OF ENGLAND.

1487. John Moreton, archbishop of Canterbury.
1504. William Warham, afterwards archbishop of
Canterbury.
1515. Thomas Wolsey, cardinal and abp. of York.

1529. Sir Thomas More.
1532. Sir Thomas Audley, keeper.
1533. Sir Thomas Audley, now chancellor, created
lord Audley.

CHANCELLOR OF ENGLAND, LORD HIGH, *continued.*

1544. Thomas, lord Wriothesley.
 1547. William, lord St. John, keeper.
 — Richard, lord Rich, lord chancellor.
 1551. Thomas Goodrich, bishop of Ely, keeper
 1552. The same; now lord chancellor.
 1553. Stephen Gardiner, bishop of Winchester.
 1556. Nicholas Heath, archbishop of York.
 1558. Sir Nicholas Bacon, keeper.
 1579. Sir Thomas Bromley, lord chancellor.
 1587. Sir Christopher Hatton.
 1591. The great seal in commission.
 1592. Sir John Puckering, lord keeper.
 1596. Sir Thomas Egerton, lord keeper.
 1603. Sir Thomas Egerton, now lord Ellesmere, lord chancellor.
 1617. Sir Francis Bacon, lord keeper.
 1618. Sir Francis Bacon, created lord Verulam, lord chancellor.
 1622. The great seal in commission.
 1625. John, bishop of Lincoln, lord keeper.
 — Sir Thomas Coventry, afterwards lord Coventry, lord keeper.
 1640. Sir John Finch, afterwards lord Finch.
 1641. Sir Edward Lyttelton, afterwards lord Lyttelton, lord keeper.
 1643. The great seal in the hands of parliamentary commissioners, or keepers.
 1645. Lord Richard Lane, royal keeper.
 1646. Again in the hands of parliamentary commissioners.
 1649. In commission for the commonwealth.
 1653. Sir Edward Herbert, king's lord keeper.
 1654. In commission during the remainder of the commonwealth.
 1660. Sir Edward Hyde, lord chancellor, afterwards created lord Hyde and earl of Clarendon.
 1667. Sir Orlando Bridgman, lord keeper.
 1672. Anthony Ashley, earl of Shaftesbury, lord chancellor.
 1673. Sir Heneage Finch, lord keeper.
 1675. Heneage, now lord Finch, lord chancellor, afterwards earl of Nottingham.
 1682. Sir Francis North, created lord Guilford, lord keeper.
 1685. Francis, lord Guilford; succeeded by George, lord Jeffreys, lord chancellor.
 1689. In commission.
 1690. Sir John Trevor, knt. sir William Rawlinson, knt. and sir George Hutchins, knt. commissioners or keepers.
 1693. Sir John Somers, lord keeper.
 1697. Sir John Somers, created lord Somers, lord chancellor.
 1700. Lord chief justice Holt, sir George Treby; chief justice C.P., and chief baron sir Edward Ward, lord keepers.
 — Sir Nathan Wright, lord keeper.
 1705. Right hon. William Cowper, lord keeper, afterwards lord Cowper.
 1707. William, lord Cowper, lord chancellor.
 1710. In commission.
 1710. Sir Simon Harcourt, created lord Harcourt, lord keeper.
 1713. Simon, lord Harcourt, lord chancellor.
 1714. William, lord Cowper, lord chancellor.
 1718. In commission.
 — Thomas, lord Parker, lord chancellor; afterwards earl of Macclesfield.
 1725. In commission.
 — Sir Peter King, created lord King, lord chancellor.
 1733. Hon. Charles Talbot, created lord Talbot, lord chancellor.
 1737. Philip Yorke, lord Hardwicke, lord chancellor.
 1756. In commission.
 1757. Sir Robert Henley, afterwards lord Henley, *last lord keeper.*
 1761. Lord Henley, lord chancellor, afterwards earl of Northampton.
 1766. Charles, lord Camden, lord chancellor.
 1770. Hon. Charles Yorke, lord chancellor.
 [Created lord Mordan; died within three days, and before the seals were put to his patent of peerage.]
 1770. In commission.
 1771. Hon. Henry Bathurst, lord Apsley; succeeded as earl Bathurst.
 1778. Edward Thurlow, created lord Thurlow.
 1783. Alexander, lord Loughborough, and others, commissioners.
 1783. Edward, lord Thurlow, again.
 1792. In commission.
 1793. Alexander Wedderburne, lord Loughborough, lord chancellor.
 1801. John Scott, lord Eldon.
 1806. Hon. Thomas Erskine, created lord Erskine.
 1807. John, lord Eldon, again.
 1827. John Singleton Copley, created lord Lyndhurst.
 1830. Henry Brougham, created lord Brougham.
 1834. Lord Lyndhurst again.
 1835. Sir Charles Christopher Pepys, master of the rolls, vice-chancellor Shadwell, and Mr. Justice Bosanquet, C.P., commissioners.
 1836. Sir Charles Christopher Pepys, created lord Cottenham, lord chancellor. Jan. 16.
 1842. Lord Lyndhurst, a third time. Sept. 3.
 1846. Lord Cottenham, again lord chancellor. July 6 [His lordship on signifying his intention to retire, June 19, 1850, was created earl of Cottenham.]
 1850. Lord Langdale, master of the rolls, Sir Launcelot Shadwell, vice-chancellor of England, and sir Robert Monsey Rolfe, B.E., commissioners of the great seal. June 19.
 — Sir Thomas Wilde, lord Truro. July 15.
 1852. Sir Edward Sugden, lord St. Leonards. Feb. 27.
 — Robt. Monsey Rolfe, lord Cranworth. Dec. 28.
 1858. Sir Frederic Thesiger, lord Chelmsford. Feb. 26.
 1859. John, lord Campbell. June 18; died June 23, 1861.
 1861. Richard Bethell, lord Westbury. June 26.
 The present lord chancellor (1862).

CHANCELLOR OF IRELAND, LORD HIGH. The earliest nomination was by Richard I., A.D. 1189, when Stephen Ridel was elevated to this rank. The office of vice-chancellor was known in Ireland, but not as a distinct appointment, in the reign of Henry III., Geoffrey Turville, archdeacon of Dublin, being so named, 1232.

LORD HIGH CHANCELLORS OF IRELAND.

From the Revolution.

- Patent.*
 1690. Dec. 29. Sir Charles Porter.
 1697. Jan. 12. Sir John Jeffreys, Thomas Coote, and Nehemiah Donellan, lords keepers.
 1697. March 11. J. Methuen, ancestor of lord Methuen.
 1697. Dec. 21. Edward, earl of Meath, Francis, earl of Longford, and Murrugh, viscount Blesington, lords keepers.
Patent.
 1702. Aug. 26. Lord Methuen, lord chancellor, a second time.
 1703. Aug. 6. Sir Richard Cox, bart.; resigned in 1707.
 1707. June. Richard Freeman.
 1710. Nov. 28. Robert earl of Kildare, archbishop (Hoadley) of Dublin, and Thomas Keightley, commissioners.

CHANCELLOR OF IRELAND, LORD HIGH, *continued.*

<i>Patent.</i>		<i>Patent.</i>	
1711. Jan. 22.	Sir Constantine Phipps; resigned Sept. 1714.		English baron of the exchequer; resigned Nov. 1827.
1714. Oct. 11.	Alan Brodrick, afterwards viscount Middleton; resigned May, 1725.	1827. Nov. 5.	Right hon. sir Anthony Hart, previously vice-chancellor of England; resigned Nov. 1830; died 1831.
1725. June.	Richard West.	1830. Dec. 23.	William, baron Plunket; resigned Nov. 1834.
1726. Dec. 21.	Thomas Wyndham, afterwards lord Wyndham of Finglas.	1835. Jan. 13.	Sir Edward Burtenshaw Sugden; resigned April, 1835.
1739. Sept. 7.	Robert Jocelyn, afterwards lord Newport, and viscount Jocelyn; the latter died, Oct. 25, 1756.	1835. April 30.	William, baron Plunket, a second time; resigned June, 1841.
1757. March 22.	John Bowes, afterwards lord Bowes of Clonllyn; died 1767.	1841. June.	John, baron Campbell; resigned Sept. 1841.
1768. Jan. 9.	James Hewitt, afterwards viscount Lifford; died April 28, 1789.	1841. Oct.	Sir Edward Sugden, afterwards lord St. Leonards, a second time; resigned July, 1846.
1789. June 20.	John, baron Fitzgibbon, afterwards earl of Clare; died Jan. 28, 1802.	1846. July 16.	Maziere Brady; resigned Feb. 1852.
1802. March 15.	John, baron Redesdale; resigned Feb. 1806.	1852. March.	Francis Blackburn; resigned Dec. 1853.
1806. March 25.	Right hon. George Ponsonby; resigned April, 1807.	1853. Jan.	Maziere Brady, again.
1807. May.	Thomas, lord Manners, previously an	1858. Feb.	Joseph Napier.
		1859. June.	Maziere Brady, again. The PRESENT lord chancellor of Ireland (1862).

CHANCELLOR OF SCOTLAND, LORD. In the laws of Malcolm II., who reigned A.D. 1004, this officer is thus mentioned:—"The chancellor shall at all tymes assist the king in giving him counsall mair secretly nor the rest of the nobility. . . . The chancellor shall be ludgit neir unto the kingis Grace, for keiping of his bodie, and the seill, and that he may be readie, baith day and nicht, at the kingis command." *Sir James Balfour.* Evan was lord chancellor to Malcolm III., surnamed Canmore, in 1057; and James, earl of Seafeld, afterwards Findlater, was the last lord chancellor of Scotland, the office having been abolished in 1708, after the union. See *Keeper, Lord.*

CHANCELLOR OF THE EXCHEQUER, is mentioned in the reign of Henry III. Ralf de Leycestre surrendered the office of chancellor of the exchequer in 1248, and the king committed the exchequer seal to Edward de Westminster. The equity jurisdiction of the exchequer, which had long existed, was transferred to the court of chancery in 1841. The last chancellor of the exchequer, who acted judicially, was sir R. Walpole; he decided between the chief baron and his court in 1735. The chancellor is now an influential cabinet minister, usually one of the lords of the treasury and sometimes premier. See *Exchequer.*

CHANCELLORS OF THE EXCHEQUER SINCE 1800.

Henry Addington (aft. lord Sidmouth) Mar. 21, 1801	Viscount Althorpe (aft. earl Spencer) Nov. 22, 1830
Wm. Pitt (<i>premier</i>) May 16, 1804	Sir Robert Peel (<i>premier</i>) Dec. 10, 1834
Lord Henry Petty (afterwards marquess of Lansdowne) Feb. 10, 1806	Thos. Spring Rice (aft. 1d. Monteagle) April 18, 1835
Spencer Percival March 31, 1807	Francis T. Baring (afterwards baronet) Aug. 26, 1839
And <i>premier</i> Dec. 6, 1809 (assassinated May 11, 1812)	Henry Goulburn Sept. 3, 1841
Nicholas Vansittart (aftd. 1d. Bexley) June 9, —	Charles Wood (afterwards baronet) July 6, 1846
Fred. J. Robinson (afterwards lord Goderich and earl of Ripon) Jan. 31, 1823	Benjamin Disraeli Feb. 21, 1852
George Canning (<i>premier</i>) April 24, 1827	William E. Gladstone Dec. 28, —
John C. Herries Aug. 17, —	Sir George Cornewall Lewis March, 1855
Henry Goulburn Jan. 26, 1828	Benjamin Disraeli Feb. 27, 1858
	William E. Gladstone (the PRESENT chancellor, 1862) June 13, 1859

CHANCERY, COURT OF. According to some, instituted as early as A.D. 605, to others, by Alfred, in 887; settled upon a better footing by William I., in 1067 (*Stow*) or 1070. This court had its origin in the desire to render justice complete, and to moderate the rigour of other courts that are bound to the strict letter of the law. It gives relief to or against infants, notwithstanding their minority; and to or against married women, notwithstanding their coverture; and all frauds, deceits, breaches of trust and confidence, for which there is no redress at common law, are relievable here. *Blackstone.* See *Lord High Chancellors.* The delays in chancery proceedings having long given dissatisfaction, the subject was brought before parliament in 1825, and frequently since; which led to the passing of important acts in 1852, 1853, and 1855, to amend the practice in the court of chancery.

CHANDOS CLAUSE. See *Counties.*

CHANTING the psalms was adopted by Ambrose from the pagan ceremonies of the Romans, about A.D. 350. *Lenglet.* It was introduced into the Roman Catholic service in 602, by Gregory the Great, who established schools of chanters, and corrected the church song. *Dufresnoy.* Chanting was adopted by some congregations of dissenters about 1850.

CHANTRY, a chapel endowed with revenue for priests to sing mass for the souls of the donors. See *Chanting*. Many chantries were abolished in England in 1547.

CHAPEL. There are free chapels, chapels of ease, the chapel royal, &c. *Cowel*. The gentlemen pensioners (formerly poor knights of Windsor, who were instituted by the direction of Henry VIII. in his testament, A.D. 1546-7) were called knights of the chapel.—The place of conference among printers, and the conference itself, is by them called a *chapel*, it is said because the first work printed in England was executed in a ruined chapel in Westminster-abbey, converted to the purpose by Caxton.

CHAPLAIN, a clergyman who performs divine service in a chapel, or that is retained by a prince or nobleman. About seventy chaplains are attached to the chapel royal. The chief personages invested with the privilege of retaining chaplains are the following, with the number that was originally allotted to each rank, by 21 Hen. VIII. c. 13, 1529 :—

Archbishop 8	Earl 5	Knight of the Garter . . . 3	Baroness 2
Duke 6	Viscount 4	Duchess 2	Master of the Rolls . . . 2
Bishop 6	Baron 3	Marchioness 2	Almoner 2
Marquess 5	Chancellor 3	Countess 2	Chief Justice 1

CHAPLETS, the string of beads used by the Roman Catholics in reciting the Lord's prayer, Ave Maria, &c. See *Beads*.

CHAPTER. Anciently the bishop and clergy lived in the cathedral, the latter to assist the former in performing holy offices and governing the church, until the reign of Henry VIII. The chapter is now an assembly of the clergy of a collegiate church or cathedral. *Cowel*. The chapter-house of Westminster-abbey was built in 1250. By consent of the abbot, the commoners of England held their parliaments there from 1377 until 1547, when Edward VI. granted them the chapel of St. Stephen.

CHARCOAL AIR-FILTERS were devised by Dr. John Stenhouse, F.R.S. in 1853. About the end of the last century Löwitz, a German chemist, discovered that charcoal (carbon) possessed the property of deodorising putrid substances, by absorbing effluvia and gases. Air-filters, based on this property, have been successfully applied to public buildings, &c. Dr. Stenhouse also invented charcoal respirators.

CHARING CROSS, so called from one of the crosses which Edward I. erected to the memory of his queen Eleanor, who died 1291; Charing being the name of the village in which it was built. Some contend that it derived its name from being the resting-place of the *chère reine, dear queen*. It was yet a small village in 1353, and the cross remained till the civil wars in the reign of Charles I., when it was destroyed as a monument of popish superstition.—Charing-cross was built about 1678, nearly as it appeared before the new buildings were commenced in 1829. The first stone of Charing-cross hospital was laid by the duke of Sussex, Sept. 15, 1831. Hungerford-bridge (or Charing-cross bridge) was opened May 1, 1845. See *Hungerford Bridge*.

CHARIOTS. Their invention and the harnessing horses to draw them, is ascribed to Erichthonius of Athens, 1486 B.C. Chariot racing was one of the exercises of Greece. The chariot of the Ethiopian officer, (*Acts* viii. 27) is supposed to have been in the form of our chaise with four wheels. Cæsar relates that Cassibelaunus, after dismissing all his other forces, retained no fewer than 4000 war-chariots about his person. See *Curriages, Coaches, &c.*

CHARITABLE BEQUESTS, &c. Boards for their recovery were constituted in 1764 and 1800, and a board for Ireland (chiefly prelates of the established church), in 1825. The Roman Catholic Charitable Bequests act passed in 1844, and an act for the better administration of Charitable Trusts in 1853, when commissioners were appointed, who have from time to time published voluminous reports. The law relating to the conveyance of land for Charitable Uses was amended in 1861.

CHARITABLE BRETHREN, an order founded by St. John of God, and approved by pope Pius V. 1572; introduced into France, 1601; settled at Paris, 1602. *Hénault*.

CHARITIES AND CHARITY SCHOOLS. These are very numerous in this great country. The charity commission reported to parliament that the endowed charities alone of Great Britain amounted to 1,500,000*l.* annually, in 1840. *Parl. Rep.* Charity schools were instituted in London to prevent the seduction of the infant poor into Roman Catholic seminaries, 3 James II., 1687. *Rapin*. See *Education*. Mr. Low's "Charities of London" (2nd edition, 1862), is full of useful information.

CHARLEROI, in Belgium. Great battles have been fought near this town in several wars; the principal in 1690 and 1794. See *Fleurus*. Charleroi was besieged by the prince

of Orange in 1672, and was again invested by the same prince with 60,000 men, in 1677; but he was soon obliged to retire. Near here, at Ligny, Napoleon attacked the Prussian line, making it fall back upon Wavres, June 16, 1815.

CHARLES-ET-GEORGES. Two French vessels of this name, professedly conveying free African emigrants (but really slaves), were seized by the Portuguese, in Conducia bay, Nov. 29, 1857, sent to Lisbon, and condemned as slavers. They were demanded haughtily by the French government, who, on the hesitation of the Portuguese, sent two ships of war to the Tagus. The captured vessels were then surrendered under protest. The conduct of the British government (that of lord Derby), to whom the Portuguese had referred the dispute, was considered more prudent than dignified. The emperor of France, however, gave up the free emigration scheme.

CHARLESTON (Massachusetts) was burnt by the British forces under general Gage, June 17, 1775. Charleston taken by the British, May 7, 1779.—**CHARLESTON**, South Carolina. The English fleet here was repulsed with great loss, June 28, 1776. It was besieged by the British troops at the latter end of March, 1780, and surrendered May 13 following, with 6000 prisoners; it was evacuated April 14, 1783. Great commotion arose here on Nov. 1860, through the election of Mr. Lincoln for the presidency, he being opposed to slavery. See *United States*. In Dec. 1861, the Federals sank a number of vessels laden with stone in order to choke up the entrance to Charleston harbour.

"**CHARTÉ**," the French political constitution acknowledged by Louis XVIII. in 1814. The infraction of this constitution led to the revolution of 1830. The "**Charte**" was sworn to by Louis-Philippe, Aug. 29, 1830; but set aside by the revolution of 1848.

CHARTER-HOUSE (a corruption of Chartreuse, *which see*), London, formerly a Carthusian monastery, founded in 1371 by sir Walter de Manny, one of the knights of Edward III., now an extensive charitable establishment. The last prior, John Houghton, was executed as a traitor, for denying the king's supremacy, in 1535. After the dissolution of monasteries in 1539, it passed through various hands till Nov. 1, 1611. It was sold by the earl of Suffolk to Mr. Thomas Sutton for 13,000*l.*, who obtained letters patent directing that it should be called "the hospital of king James, founded in the Charter-house," and that "there should be for ever 16 governors," &c. On the foundation are 80 poor brothers, and 44 poor scholars. Sutton died Dec. 12, 1611. The expenditure for the year 1853-4 was 22,396*l.*; the receipts 28,908*l.*

CHARTER-PARTY. A covenant between merchants and masters of ships relating to the ship and cargo, containing the particulars of their agreement. It is said to have been first used in England so early as the reign of Henry III., about 1243. *Anderson.*

CHARTERS were granted to corporate towns to protect their manufactures by Henry II. in 1132; were called in and modified by Charles II. in 1682; but the ancient charters were restored at the revolution in 1688. Alterations were made in them by the Municipal Reform act in 1835. Many ancient charters have been printed by the Record Commissioners (1800-37). Their work is now carried on under the superintendence of the master of the rolls. See *Magna Charta* and *Boroughs*.

CHARTISTS, the name assumed by large bodies of the working people, shortly after the passing of the Reform Bill in 1832, from their demanding the people's *Charter*, the five points of which were *Vote by Ballot, Universal Suffrage, Annual Parliaments, Payment of the Members, and the Abolition of the Property Qualification* (the last of which was granted, June, 1858). Their petition was presented by Mr. T. Attwood, June 14, 1838. They assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags, and conducting themselves so tumultuously, that a proclamation was issued against them, Dec. 12, 1838. They committed great outrages at Birmingham, July 15, 1839, and at Newport (*which see*), Nov. 4, 1839. They held for some time a sort of parliament called the "**National Convention**," the leading men being Fergus O'Connor, Henry Vincent, Mr. Stephens, &c. On April 10, 1848, they proposed to hold a meeting of 200,000 men on Kennington common, London, to march thence in procession to Westminster, and present a petition to parliament; but only about 20,000 came. The metropolis felt great alarm, and the bank and other establishments were fortified by military; but the preventive measures adopted by the government proved so completely successful, that the rioters, alarmed in turn, dispersed after some slight encounters with the police; their monster petition, in detached rolls, being despatched in cabs to the house of commons. The determination of society at large to oppose their designs operated more powerfully on the Chartists than the display of power by the executive; not less than 150,000 persons, among them nobles and others of high rank (including Louis Napoleon, now emperor), having

pressed forward to be sworn as special constables. From this time the proceedings of the Chartists ceased to create alarm, and they have become insignificant.

CHARTREUSE, LA GRANDE, famous as the chief of the monasteries of the Carthusian order, is situated among the rugged mountains near Grenoble, in France. It was founded by Bruno, about A.D. 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery at the restoration in 1814.

CHARTS AND MAPS. Anaximander of Miletus was the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus, with a view to illustrate his brother's theory respecting a western continent, 1489. These charts were the foundation of the discovery of the western world. The first tolerably accurate map of England was drawn by George Lilly, who died in 1559. Gerard Mercator published an atlas of maps in 1595. See *Mercator*.

CHASTITY. The Roman laws justified homicide in defence of one's self or relatives; and our laws justify a woman for killing a man in defence of her chastity; and a husband or a father in taking the life of him who attempts to violate his wife or daughter. In 1000 years from the time of Numa, 710 B.C., to the reign of Theodosius the Great, A.D. 394, but eighteen Roman vestals had been guilty of incontinence. See *Vestals*. Many remarkable instances of chastity are recorded. See *Acre* and *Coldingham*.

CHATHAM ADMINISTRATION.* Formed Aug. 1766; terminated Dec. 1767.

Earl of Chatham, *first minister and lord privy seal*.
Duke of Grafton, *first lord of the treasury*.
Lord Camden, *lord chancellor*.
Charles Townshend, *chancellor of the exchequer*.
Earl of Northampton, *lord president*.
Earl of Shelburne and general Conway, *secretaries of state*.

Sir Charles Saunders (succeeded by sir Edward Hawke), *admiralty*.
Marquess of Granby, *ordnance*.
Lord Hillsborough, *first lord of trade*.
Lord Barrington, *secretary-at-war*.
Lord North and sir George Cooke, *joint paymasters*.
Viscount Howe, *treasurer of the navy*.
Duke of Ancaster, lord de Despensers, &c.

CHATHAM (Kent), a principal station of the royal navy. Its dockyard, commenced by queen Elizabeth, contains immense magazines, furnished with all sorts of naval stores. The Chatham *Chest* for the relief of wounded and decayed seamen was originally established here by queen Elizabeth and admirals Drake and Hawkins, in 1588, after the defeat of the Spanish armada, but was removed to Greenwich in 1802. In 1667, on the 10th June, the Dutch fleet, under admiral De Ruyter, sailed up to this town and burnt several men-of-war; but the entrance into the Medway is now defended by Sheerness and other forts, and additional fortifications were made at Chatham. On Feb. 8, 1861, a violent outbreak of the convicts was suppressed by the military, and many of the rioters severely flogged. About 1000*l.* worth of property was destroyed, and many persons were seriously hurt.

CHATILLON (on the Seine, France). Here a congress was held by the four great powers allied against France, at which Caulaincourt attended for Napoleon, Feb. 5, 1814; the negotiations for peace were broken off on March 19, following.

CHAT MOSS (Lancashire), a peat bog twelve miles square, in most places so soft as to be incapable of supporting a man or horse. Over this swamp, George Stephenson, the great railway engineer, carried the Liverpool and Manchester railway, after overcoming difficulties considered invincible by the most experienced surveyors. The road (literally a floating one) was completed by Jan. 1, 1830, when the first experimental train, drawn by the Rocket locomotive, passed over it.

CHAUMONT (on the Marne, France), TREATY OF, entered into between Great Britain, Austria, Russia, and Prussia, and signed by these powers respectively, March 1, 1814. This treaty was succeeded by the celebrated treaty of Paris, April 11 following, by which Napoleon renounced his sovereignty over France. See *Paris*.

CHEATS are punishable by pillory (since abolished), imprisonment, and fine, 1 *Hawk*. L.C. 188. A rigorous statute was enacted against them in 1542. Persons cheating at play, or winning at any time more than 10*l.* or any valuable thing, were deemed infamous, and were to suffer punishment as in cases of perjury, 9 *Anne*, 1711. *Blackstone*.

* William Pitt, earl of Chatham (called the *great commoner*), was born Nov. 15, 1708, entered parliament in 1735; became secretary of state (but virtually the premier) in the Devonshire Administration, Nov. 1756, and secretary in the Newcastle Administration, Jan. 1757. In 1766 he became premier, lord privy seal, and earl of Chatham, which lord Chesterfield called a *fall upstairs*. He opposed the taxation of the American colonies, but protested against the recognition of their independence, April 7, 1778, and died May 11 following.

CHEESE is made almost by all nations. It is supposed by Camden and others that the English learned the process of making it from the Romans about the Christian era. Wilts, Gloucester, and Cheshire make vast quantities; the last alone, annually, about 31,000 tons. The Cheddar of Somerset, and Stilton of Huntingdon, are as much esteemed with us as the cheese of Parma in Italy, and of Gruyère in Switzerland. In 1840 we imported from abroad 10,000 tons; and in 1849–1850, as many as 27,000 tons. The duty on foreign cheese, producing annually about 50,000*l.*, was taken off in 1860.

CHELSEA. On the site of a college founded by James I. in 1609 for theological disputations against popery, but converted by Charles II. in 1682 to its present purpose, stands Chelsea college, an asylum for wounded and superannuated soldiers.—The erection was carried on by James II., and completed by William III. in 1690. The real projector was sir Stephen Fox, grandfather of the orator C. J. Fox. The architect was sir Christopher Wren, and the cost 150,000*l.* In 1850 there were 70,000 *out-* and 539 *in-pensioners*.—The physic garden of sir Hans Sloane, at Chelsea, was given to the Apothecaries company in 1721. The Chelsea waterworks were incorporated 1722. The first stone of the Military Asylum, Chelsea, was laid by Frederick, duke of York, June 19, 1801. The body of the duke of Wellington lay here in state, Nov. 10–17, 1852.—The bridge, constructed by Mr. T. Page to connect Chelsea with Battersea park, was opened in the spring of 1858.

CHELTENHAM (Gloucestershire). Its celebrated mineral spring was discovered in 1718. The king's-well was sunk in 1778; and other wells by Mr. Thompson in 1806. Magnesian salt was found in the waters in 1811. The theatre was erected in 1804.

CHEMICAL SOCIETIES. One was formed in London in 1780, but its meetings were not long continued. The present society was established in 1841. It includes the most eminent chemists of the day, and publishes a journal. The Chemical Society at Paris was established in 1857.

CHEMISTRY was introduced into Europe by the Spanish Moors, about A.D. 1150; they had learned it from the African Moors, and these from the Egyptians. In Egypt they had, in very early ages, extracted salts from their bases, separated oils, and prepared vinegar and wine; and embalming was a kind of chemical process. The Chinese also claim an early acquaintance with chemistry. The first chemical students in Europe were the Alchemists (see *Alchemy*); but chemistry could not be said to exist as a science till the 17th century; during which its study was promoted by the writings of Bacon and the researches of Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of *Pneumatic Chemistry*, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Black, Bergman, Stahl, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, ammonia, &c.; and thus commenced a new era in the history of chemistry. He was ably seconded by Lavoisier, Cavendish, Scheele, Chaptal, &c. The 19th century opened with the brilliant discoveries of Davy, continued by Dalton, Faraday, Thomson, &c. *Organic Chemistry* has been very greatly advanced by the labours of Berzelius, Liebig, Dumas, Laurent, Hofmann, Frankland,* &c., since 1830. See *Pharmacy, Electricity, Galvanism*. The analytical processes termed "*Spectrum analysis*," by Kirchhoff and Bunsen, and "*Dialysis*" by Mr. T. Graham, were made known in 1861. (See those articles.)

CHEQUES. See *Drafts*.

CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V. in 1418, and lost in 1450. Under the direction of Louis XIV., some works were erected here by the great Vauban, which with some shipping, &c., were destroyed by the British, Aug. 6, 7, 1758. The works were resumed on a stupendous scale by Louis XVI.; but their progress was interrupted by the revolution. The breakwater, commenced in 1783, resumed by Bonaparte about 1803, and finally completed in 1813, is a magnificent work, forming a secure harbour, capable of affording anchorage for nearly the whole navy of France, and protected by batteries and fortifications of enormous strength, which have recently been increased to unparalleled magnitude. The emperor Louis Napoleon has especially here developed his uncle's ideas. On Aug. 4 and 5, 1858, the railway and the Grand Napoleon

* In 1828 Wöhler succeeded in producing artificially *urea*, a body hitherto known only as a product of the animal organism. Since then, acetic acid, alcohol, grape sugar, various essential oils, similar to those of the pine-apple, pear, garlic, &c., have been formed by combinations of the gases, oxygen, hydrogen, and carbonic acid. The barrier formed by chemists between organic and inorganic bodies is thus broken down, though the names are still retained. An eminent chemist has said that, though exceedingly improbable, it is not impossible, that in process of time chemistry may produce the food of man—such as the cereals, &c., but the artificial would be more than 100 times more expensive than the natural method.

docks were opened, the latter in the presence of the queen of England and court, who were there by special invitation.

CHERITON DOWN (Hants). Here sir Wm. Waller defeated the royalists under lord Hopton, May 29, 1644.

CHERRY, the *Prunus Cerasus*, so called from Cerasus, a city of Pontus, whence the tree was brought by Lucullus to Rome, about 70 B.C. The cherry-tree was first planted in Britain, it is said, about A.D. 100. Fine kinds were brought from Flanders, in 1540, and planted in Kent, it is said, with such success, that an orchard of thirty-two acres produced in one year to the value of 1000*l*.

CHERSON. See *Kherson*.

CHERSONESUS. See *Crimea*.

CHESAPEAKE. At the mouth of the river of that name, a contest took place between the British admiral Greaves and the French admiral De Grasse, in the interest of the revolted states of America; the former was obliged to retire, 1781. The Chesapeake and Delaware were blockaded by the British fleet in the American water of 1812, and the bay was, at that period, the scene of great hostilities of various results.—The *Chesapeake* American frigate, commanded by capt. Lawrence (50 guns, 376 men), struck to the *Shannon* British frigate (49 guns, 330 men), commanded by capt. Philip Vere Broke, after a severe action of eleven minutes, June 1, 1813. Capt. Lawrence, who had invited the contest, died of his wounds.

CHESS, a game invented, according to some authorities, by Palamedes, 680 B.C.; and according to others, in the fifth century of our era. The learned Hyde and sir William Jones concur in stating (as do most writers on the subject) that the origin of chess is to be traced to India. The celebrated automaton chess-player (a figure of wonderful machinery) was exhibited in England in 1769.* A chess congress was held at New York in 1857, and an international one in London in June and July, 1862.

CHESTER (England, N.W.), the Deva of the Romans, and one of the last places quitted by that people, was the station of their twentieth legion, called the *Valeria Victrix*. The city wall was first built by Edelfleda, A.D. 908; and Hugh Lupus, the earl, nephew of William I., rebuilt the Saxon castle in 1084, and the abbey of St. Werburgh. Chester was incorporated by Henry III. and made a distinct county. It was nearly destroyed by an accidental fire in 1471. The fatal gunpowder explosion occurred Nov. 5, 1772.—The *see* was anciently part of Lichfield, one of whose bishops, Peter, removing the seat hither in 1075, occasioned his successors to be styled bishops of Chester; but it was not erected into a distinct bishopric until the dissolution of monasteries. Henry VIII. in 1542 raised it to this dignity, and allotted the church of the abbey of St. Werburgh for the cathedral. This *see* is valued in the king's books at 420*l*. 1*s*. 8*d*. per annum. Present income, 4500*l*.

RECENT BISHOPS OF CHESTER.

CHEVALIER D'EON. See *D'Eon*.

CHICHESTER (Sussex), built by Cissa, about A.D. 540. The cathedral was erected in 1115, burnt with the city in 1186, and rebuilt by bishop Seffrid in 1187. The spire fell, Feb. 20, 1861. The bishopric originated thus: Wilfrida, archbishop of York, compelled to flee by Egfrid, king of Northumberland, preached the gospel in this country, and built a church in the Isle of Selsey, about A.D. 673. In 681 Selsey became a bishopric, and so continued until it was removed to Chichester, then called Cissan-Caester, from its builder, Cissa, or by Stigand, 1070. This *see* has yielded to the church two saints, and to the nation three lord chancellors. It is valued in the king's books at 677*l*. 1*s*. 3*d*. per annum. Present income, 4200*l*.

RECENT BISHOPS OF CHICHESTER.

- | | |
|--|--|
| 1798. John Buckner, died May 2, 1824. | 1836. Charles Otter, died Aug. 20, 1840. |
| 1824. Robert J. Carr, trans. to Worcester, Sept. 1831. | 1840. Philip Nicholas Shuttleworth, died Jan. 7, 1842. |
| 1831. Edward Maltby, translated to Durham, 1836. | 1842. Ashurst Turner Gilbert (PRESENT bishop). |

* A chess-club was formed at Slaughter's coffee-house, St. Martin's lane, in 1747. In 1797, M. Philidor played three matches blindfold at the Salopian. The London Chess-club was founded in 1807, and St. George's in 1833. In Dec. 1861 Herr Paulsen played ten games at once, of which he won five, and lost one; three were drawn, and one not played out.

CHICORY, the wild endive, or *Cichorium Intybus* of Linnæus, grows wild in calcareous soils in Britain and most countries of Europe. It was formerly raised to some extent in England as herbage, its excellence in this respect having been much insisted upon by Arthur Young. Chicory had been for many years so largely mixed with coffee in England, that it became a matter of serious complaint against dealers in the latter article; the loss of revenue being estimated at 100,000*l.* a-year. An excise order was at length issued, dated August 3, 1852, interdicting the mixture of chicory with coffee by vendors after three months. The admixture, however, has since been permitted, provided the word "chicory" be plainly printed on each parcel sold.*

CHILDERMAS DAY, Dec. 28, observed by the Roman Church, in memory of the slaughter of the Holy Innocents. (*Matth.* ii.)

CHILDREN. Many ancient nations exposed their infants,—the Egyptians on the banks of rivers, and the Greeks on highways,—when they could not support or educate them; in such cases, they were taken care of, and humanely protected by the state. The custom, which long previously existed, of English parents selling their children to the Irish for slaves, was prohibited in the reign of Canute, about 1017. *Mat. Paris.* At Darien, it was the practice when a widow died, to bury with her in the same grave such of her children as were unable from their tender years to take care of themselves. In some parts of China, infants are offered to the spirit of an adjoining river, a gourd being tied to their necks to prevent their immediately drowning. The great efforts made by the British government in India, to repress infanticide, have been successful.

CHILI (S. America), discovered by Diego de Almagro, one of the conquerors of Peru, A.D. 1535. When Almagro crossed the Cordilleras, the natives, regarding the Spaniards on their first visit as allied to the Divinity, collected for them gold and silver, amounting to 290,000 ducats, a present which led to the subsequent cruelties and rapacity of the invaders. Chili was subdued, but not wholly, in 1546.—The Chilians declared their independence of Spain, Sept. 18, 1810, and fought with varying success until 1817, when, by the decisive victory gained by San Martin over the royal forces, Feb. 12 in that year, the province was declared independent. The independence of Chili was recognised by Great Britain, whose first envoy extraordinary to this country was the hon. John Walpole, accredited May 24, 1841. Manuel Montt, elected president Oct. 18, 1856, was succeeded by José Perez, Oct. 18, 1861. Population in 1855, 1,439,120; in 1858, 1,559,000. An insurrection headed by Pedro Gallo broke out on Dec. 1858, and was suppressed by the government in April, 1859.

CHILLIANWALLAH, BATTLE OF, India, between the Sikh forces in considerable strength, and the British commanded by lord (afterwards viscount) Gough, fought Jan. 13, 1849. The Sikhs were completely routed, but the loss of the British was very severe: 26 officers were killed and 66 wounded, and 731 rank and file killed, and 1446 wounded. The Sikh loss was 3000 killed and 4000 wounded.† This battle was followed by lord Gough's attack on the Sikh army, under Shere Singh, in its position at Goojerat, on the right bank of the Chenuab, with complete success; in this last desperate engagement, the whole of the enemy's camp fell into the hands of the British, Feb. 21, 1849. See *Goojerat*.

CHILTERN HUNDREDS (viz. Burnham, Desborough, and Stoke), an estate of the crown on the chain of chalk hills that pass from east to west through the middle of Buckinghamshire, the stewardship whereof is a nominal office, with a salary of 20*s.* conferred on members of parliament when they wish to vacate their seats, as, by accepting an office under the crown, a member becomes disqualified, unless he be again returned by his constituents: this custom is ancient.

CHIMNEY TAX. See *Hearth*.

CHIMNEYS. Chafing-dishes were in use previous to the invention of chimneys, which were first introduced into these countries, in A.D. 1200, when they were confined to the kitchen and large hall. The family sat round a stove, the funnel of which passed through the ceiling, in 1300. Chimneys were general in domestic architecture in 1310. The ancients made use of stoves, although Octavio Ferrari affirms that chimneys were in use among them; but this is disputed. Act to regulate the trade of chimney-sweeping, 28 Geo. III. 1789. The *chimney-sweeping machine* was invented by Smart in 1805. A statute repealing this act, and regulating the trade, the apprenticeship of children, the construction of flues,

* In 1860 a duty of 3*s.* per cwt. was put upon English-grown chicory until April 1861; after that date to be 5*s.* 6*d.* per cwt.

† The duke of Wellington (commander in chief) did not think the victory complete. Gough was superseded, and sir C. Napier sent out (March 1849), who did not arrive in India till Gough had redeemed his reputation.

preventing calling "sweep" in the streets, &c., passed 1834. By 5 Vict. 1840, it is not lawful for master sweeps to take apprentices under sixteen years of age; and since July 1, 1842, no individual under twenty-one may ascend a chimney. At the chemical works, Glasgow, is a chimney (there termed a *stalk*) 420 feet in height; the height of the Monument in London being 202 feet; of St. Paul's, 404 feet.

CHINA, the "Celestial Empire," in Eastern Asia, for which the Chinese annals claim an antiquity of from 80,000 to 100,000 years B.C. It is allowed by some authorities to have commenced about 2500 years before the birth of Christ; by others it is said to have been founded by Fohi, supposed to be the Noah of the Bible, 2240 B.C. We are told that the Chinese knew the periods of the sun, moon, and planets, and were acute astronomers, in the reign of Yao, which is set down 2357 B.C. But dates cannot be relied upon until towards the close of the seventh century B.C., when the history of China becomes more distinct. Twenty-two dynasties have reigned, including the present. In the battle between Phraates and the Scythians, 129 B.C., the Chinese aided the latter, and afterwards ravaged the countries on the coasts of the Caspian, which is their first appearance in history. *Lenglet*. The population of China was estimated at 190,348,228 in 1757; and at 414,607,000 in 1860.

The Chinese state their first cycle to have commenced 2700
The first dates fixed to his history, by Se-ma-tsen, begin 651
Supposed age of Confucius (Kungfutze), the Chinese philosopher 550
Stupendous wall of China completed 208 or 211
The dynasty of Han 202 or 206
Literature and the art of printing encouraged(?) 202
Religion of Tao-tse commenced 15
Religion of Fo commenced about A.D. 60
Pretended embassy from Rome 166
Nankin becomes the capital 420
The atheistical philosopher, Fan-Shin, flourishes 449
The Nestorian Christians permitted to preach 635
They are proscribed and exterminated 845
China ravaged by Tartars from 9th to 12th centuries
Seat of government transferred to Peking 1260
Marco Polo introduces ambassadors 1275
Canal, called the Yu Mo, completed about 1400
Europeans first arrive at Canton 1517
Macao is granted to the Portuguese 1536
Jesuit missionaries are sent from Rome 1575
The country is conquered by the eastern or Manchou Tartars, who establish the present reigning house 1616-47
Tea brought to England 1660
An earthquake throughout China buries 300,000 persons at Peking alone 1662
Commerce with East India Company begins 1680

Edict against Christianity; † he leaves England 1812
Feb. 8, 1816
Exclusive rights of the E. I. Co. cease April 22, 1834
Opium dispute begins —

Free-trade ships sail for England April 25, 1834
Lord Napier arrives at Macao, to superintend British commerce July 15, —
Affair between the natives and two British ships of war; several Chinese killed, Sept. 5, —
Lord Napier dies, and is succeeded by Mr. (afterwards sir John) Davis Oct. 11, —
Opium trade interdicted by the Chinese, Nov. 7, —
Chinese seize the *Avogge* and crew Jan. 31, 1835
Opium burnt at Canton by the Chinese, Feb. 23, —
Captain Elliot becomes chief British commissioner Dec. 14, 1836
Admiral Maitland arrives at Macao July 12, 1838
Commissioner Lin orders seizure of opium, March 18: British and other residents forbidden to leave Canton, March 19; the factories surrounded, and outrages committed, March 24; captain Elliot requires of British subjects their surrender to him of all opium, promising them on the part of government the full value of it, March 27: half of it is given up as contraband to the Chinese, April 20; the remainder (20,283 chests) surrendered, May 21; captain Elliot and the British merchants leave Canton, May 24; the opium destroyed by the Chinese June 3, 1839
Affair between the British and American seamen and the Chinese; a native killed July 7, —
Hong-Kong taken Aug. 23, —
The British boat *Black Joke* attacked, and the crew murdered, Aug. 24; the British merchants retire from Macao Aug. 26, —
Affair at Kow-lung between British boats and Chinese junks Sept. 4, —
Attack by 28 armed junks on the British frigates *Volage* and *Hyacinth*: several junks blown up Nov. 3, —
The British trade with China ceases, by an edict of the emperor, and the last servant of the company leaves this day Dec. 6, —
Edict of the emperor interdicting all trade and intercourse with England for ever Jan. 5, 1840
The *Hellas* ship attacked by armed junks, May 22; blockade of Canton by a British fleet, by orders from sir Gordon Bremer, June 28; the *Monde* with a flag of truce fired on at Amoy, July 2; Ting-hai, in Chusan, surrenders, July 5; blockade established along the Chinese coast, July 10; Mr. Staunton carried off to Canton Aug. 6, —
Captain Elliot, on board a British steam-ship, enters the Peiho river, near Peking, Aug. 11, —

* This embassy threw some light on the political circumstances of the empire; it appeared to be divided into 15 provinces, containing 4402 walled cities; the population of the whole was given at 333,000,000: its annual revenues at 66,000,000: and the army, including the Tartars, 1,000,000 of infantry, and 800,000 cavalry; the religion Pagan, and the government absolute. Learning, and the arts and sciences were encouraged, and ethics studied.

† His lordship failed in the objects of his mission, having refused to make the prostration of the *kou-tou*, lest he should thereby compromise the majesty of England.

CHINA, *continued.*

The ship *Kite* lost on a sand-bank, and the captain's wife and part of the crew are captured by the natives, and confined in cages, Sept. 15, 1840
 Seizure of captain Anstruther Sept. 16, —
 Lin finally degraded; Keshin appointed imperial commissioner, Sept. 16; capt. Elliot's truce with him Nov. 6, —
 British plenipotentiaries arrive off Macao, Nov. 20, —
 Admiral Elliot's resignation announced, Nov. 29, —
 Mr. Staunton released Dec. 12, —
 Negotiations cease, owing to breaches of faith on the part of the Chinese emperor Jan. 6, 1841
 Chuen-po and Tse-oc-tow, and 173 guns (some sent to England), captured Jan. 7, —
 Hong-Kong ceded by Keshin to Great Britain, and 6,000,000 dollars agreed to be paid within ten days to the British authorities Jan. 20, —
 Hong-Kong taken possession of by the British Jan. 26, —
 The emperor rejects Keshin's treaty, Feb. 11; hostilities resumed, Feb. 23; Chusan evacuated, Feb. 24; rewards proclaimed at Canton for the bodies of Englishmen, dead or alive; 50,000 dollars to be given for ringleaders and chiefs Feb. 25, —
 Bogue forts taken by sir G. Bremer; admiral Kwan killed; 459 guns captured Feb. 26, —
 The British squadron proceeds to Canton, March 1; sir H. Gough takes command of the army, March 2; hostilities again suspended, March 3; and again resumed, March 6; Keshin degraded by the emperor March 12, —
 Flotilla of boats destroyed, Canton threatened, the foreign factories seized, and 467 guns taken by the British forces March 18, —
 New commissioners from Peking arrive at Canton April 14, —
Hong-Kong Gazette first published May 1, —
 Capt. Elliot prepares to attack Canton, May 17, —
 Heights behind Canton taken and 94 guns captured May 25, —
 The city ransomed for 6,000,000 dollars, of which 5,000,000 are paid down and hostilities cease May 31, —
 British forces withdrawn, June 1; and British trade re-opened July 16, —
 Arrival at Macao of sir Henry Pottinger, who, as plenipotentiary, proclaims the objects of his mission; capt. Elliot superseded, Aug. 10, —
 Amoy taken and 206 guns destroyed, Aug. 27, —
 The Bogue forts destroyed Sept. 14, —
 Ting-hae taken, 136 guns captured, and Chusan re-occupied by the British, Oct. 1; they take Chin-hae, Oct. 10; Ning-po, Oct. 13; Yu-yaou, Tse-kee, and Foong-hua Dec. 28, —
 Chinese attack Ning-po and Chin-hae, and are

repulsed with great loss, March 10; 8000 Chinese are routed near Tsze-kee, March 15, 1842
 Cha-pou attacked, and its defences destroyed, May 18, —
 45 guns taken May 18, —
 The British squadron enters the river Kiang, June 13; capture of Woosung, and of 230 guns and stores, June 16; Shang-hae taken June 19; the British armament anchors near the "Golden Isle," July 20; Chin-Keang taken; the Tartar general and many of the garrison commit suicide, July 21; the advanced ships reach Nankin, Aug. 4; the whole fleet arrives, and the disembarkation commences, Aug. 9; Keying arrives at Nankin, with full powers to treat for peace, Aug. 12, —
 Treaty of peace signed before Nankin on board the *Cornwallis* by sir Henry Pottinger, for England, and Keying Elepoo* and Neu-Kien on the part of the Chinese emperor—(Conditions: lasting peace and friendship between the two empires; China to pay 21,000,000 of dollars; Canton, Amoy, Foochoofoo, Ning-po, and Shang-hae to be thrown open to the British, and consuls to reside at these cities; Hong-Kong to be ceded in perpetuity to England, &c.; Chusan and Ku-lang-su to be held by the British until the provisions are fulfilled)† Aug. 29, —
 The ratifications signed by queen Victoria and the emperor formally exchanged, July 22; Canton opened to the British by an imperial edict July 27, 1843
 Appointment of Mr. Davis in the room of sir Henry Pottinger Feb. 16, 1844
 Bogue forts captured by the British, April 5, 1847
 Hong-Kong and the neighbourhood visited by a violent typhoon; immense damage done to the shipping; upwards of 1000 boat-dwellers on the Canton river drowned Oct. 1848
 H.M. steam-ship *Medea* destroys 13 pirate junks in the Chinese seas March 4, 1850
 Rebellion breaks out in Quang-si, spreading rapidly Aug. —
 Appearance of the pretender Tien-teh,† March, 1851
 Defeat of Leu, the imperial commissioner, and destruction of half the army June 19, 1852
 Successful progress of the rebels; the emperor applies to the Europeans for help, without success March and April, 1853
 The rebels take Nankin, March 19, 20; Amoy, May 19; Shang-hae Sept. 7, —
 And besiege Canton without success, Aug.-Nov. 1854
 The scanty accounts are unfavourable to the rebels, the imperialists having re-taken Shang-hae, Amoy, and many important places, 1855
 Outrage on the British *lorcha Arrow*, in Canton river § Oct. 8, 1856

* He took part (it was said without authority) in arranging the treaty of Tien-Sin in June, 1858. He was in consequence condemned to death—by suicide.

† The non-fulfilment of this treaty led gradually to the war of 1856-7.

‡ Taou-Kwang, the last emperor of China, during the latter part of his reign, became somewhat liberal in his views, and favoured the introduction of European arts; but his son, the late emperor, a rash and narrow-minded prince, quickly departed from his father's wise policy and adopted re-actionary measures, particularly against English influence. An insurrection broke out in consequence, Aug. 1850, and quickly became of alarming importance. The insurgents at first proposed only to expel the Tartars; but in March 1851, a pretender was announced among them, first by the name of Tien-teh (Celestial Virtue), but afterwards assuming other names. He is stated to be a native of Quang-si, of obscure origin, but to have obtained some literary knowledge at Canton about 1835, and also to have become acquainted at that time with the principles of Christianity from a Chinese Christian, named Leang-afa, and also from the missionary Roberts in 1844. He announced himself as the restorer of the worship of the true God, Shang-ti, but has derived many of his dogmas from the Bible. He declared himself to be the monarch of all beneath the sky, the true lord of China (and thus of all the world), the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin, in November, 1850. His followers are termed *Taepings*, "princes of peace," a title utterly belied by their atrocious deeds.

§ It was boarded by the Chinese officers, 12 men out of the crew of 14 being carried off, and the national ensign taken down. Sir J. Bowring, governor of Hong-Kong, being compelled to resort to hostilities, applied to India and Ceylon for troops. On March 3, 1857, the house of commons, by a majority of 16 censured sir John for the "violent measures" he had pursued. The ministry (who took his part) dissolved the parliament; but obtained a large majority in the new one.

CHINA, *continued.*

After vain negotiations with commissioner Yeh, Canton forts attacked and taken, Oct. 23, 1856
 A Chinese fleet destroyed and Canton bombarded, by sir M. Seymour Nov. 3, 4
 Imperialists defeated, quit Shang-hae, Nov. 6
 The Americans revenge an attack by capturing three forts Nov. 21—23
 Rebels take Kuri-king Nov. 25
 Other forts taken by the British Dec.
 The Chinese burn European factories Dec. 14
 And murder the crew of the *Thistle* Dec. 30
 A-lum, a Chinese baker, acquitted of charge of poisoning the bread Feb. 2, 1857
 Troops arrive from Madras, and England; and Lord Elgin appointed envoy March
 No change on either side: Yeh said to be stratagued for money: the imperialists seem to be gaining ground upon the rebels, May
 Total destruction of the Chinese fleet by commodore Elliot, May 25, 27; and sir M. Seymour and commodore Keppel June 1
 Blockade of Canton Aug.
 Stagnation in the war—Lord Elgin departs to Calcutta, with assistance to the English against the Sepoys, July 16; returns to Hong-Kong Sept. 25
 Gen. Ashburnham departs for India, and gen. Straubenzee assumes the command, Oct. 19
 Canton bombarded and taken by English and French, Dec. 28, 29, 1859; who enter it, Jan. 5, Yeh* sent a prisoner to Calcutta Jan.
 The allies proceed towards Peking, and take the Pei-ho forts May 20
 The expedition arrives at Tien-Sin May 20
 Negotiations commence June 1; treaty of peace signed at Tien-Sin by Lord Elgin, baron Gros, and Keying (who signed the treaty of 1842)—(Ambassadors to be at both courts; freedom of trade; toleration of Christianity; expenses of war to be paid by China; a revised tariff; term *I barbarian*) to be no longer applied to Europeans June 26, 28, 29
 Lord Elgin visits Japan and concludes an important treaty with the emperor Aug. 28
 The British destroy about 130 piratical junks in the Chinese seas Aug. and Sept.
 Lord Elgin proceeds up the Yants-Kiang to Nankin, Jan.; returns to England May, 1859
 Mr. Bruce the British envoy, on his way to Peking, is stopped in the river Peiho (or Tien-sin): admiral Hope attempting to force a passage, is repulsed with the loss of 82 killed, and about 350 wounded June 25
 The American envoy Ward, arrives at Peking, and refusing to submit to degrading ceremonies, does not see the emperor, July 29; the commercial treaty with America is concluded Nov. 24
 The English and French prepare an expedition against China Oct.
 Lord Elgin and baron Gros sail for China, April 26; wrecked near Point de Gallo, Ceylon, May 23; arrive at Shang-hae June 29, 1860
 The war begins: the British commanded by sir Hope Grant, the French by general Montauban. The Chinese, defeated in a skirmish near the Peiho Aug. 12
 The allies repulse the Tae-ping rebels attacking Shang-hae, Aug. 18-20; and take the Taku-forts, losing 500 killed and wounded; the Tartar general San-ko-lin-sin retreats, Aug. 21
 After vain negotiations, the allies advance towards Peking; they defeat the Chinese at Chang-kia-wan and Pa-li-chiau Sept. 18 & 21,

Consul Parkes, captains Anderson and Brabazon, Mr. de Norman, Mr. Bowlby (the *Times* correspondent), and 14 others (Europeans and Sikhs), advance to Tung-chow to arrange conditions for a meeting of the ministers, and are captured by San-ko-lin-sin; capt. Brabazon and Abbé de Luc beheaded, and said to be thrown into the canal; others carried into Peking Sept. 21, 1860
 The allies march towards Peking; the French ravage the emperor's summer palace, Oct. 6; Mr. Parkes, Mr. Loch, and others, restored alive, Oct. 8; capt. Anderson, Mr. de Norman and others die of ill-usage, Oct. 8-11
 Peking invested; surrenders, Oct. 22; severe proclamation of sir Hope Grant Oct. 15
 The bodies of Mr. De Norman and Mr. Bowlby buried with great solemnity in the Russian cemetery in Peking, Oct. 17; the summer palace (Yuen-ming-yuen) burnt by the British, in memory of the outraged prisoners Oct. 18
 Convention signed in Peking by Lord Elgin and the prince of Kung, by which the treaty of Tien-sin is ratified; apology made for the attack at Peiho (June 25, 1859); a large indemnity to be paid immediately, and compensation in money given to the families of the murdered prisoners, &c.; Kow-loon ceded in exchange for Chusan, and the treaty and convention to be proclaimed throughout the empire Oct. 24
 Allies quit Peking Nov. 5
 Treaty between Russia and China—the former obtaining free trade, enlarged territories, &c. Nov. 14
 Mr. Loch arrives in England with the treaty Dec. 27
 First instalment of indemnity paid Nov. 30
 Part of the allied troops comfortably settled at Tien-sin Jan. 5, 1861
 English and French embassies established at Peking March
 The emperor Hienfung dies Aug. 24
 Canton restored to the Chinese Oct. 27
 Ministerial crisis: several ministers put to death; Kung appointed regent Dec. 13
 Advance of the rebels: they seize and desolate Ning-po and Hang-chow Dec.
 They advance on Shang-hae, which is placed under protection of the English and French, and fortified Jan. 1862
 Rebels defeated in two engagements about April 21
 English and French assist the government against the rebels—Ning-po retaken, May 10
 French admiral Protet killed in an attack on rebels May 17
 Captain Gerard Osborne permitted by the British government to organise a small fleet of gun-boats to aid the imperialists to establish order July

 CHINESE EMPERORS.
 Chwang-wei 1627
 Shun-che (first of the Tsing dynasty) 1644
 Kang-he 1669
 Yung-ching 1693
 Keen-lung 1736
 Kea-ding 1796
 Taou-Kwang 1821
 Hienfung, Feb. 25, 1850; died Aug. 24, 1861
 His eldest son, seven years old, succeeded.

CHINA PORCELAIN is first mentioned about 1531, when it was introduced in England. See *Porcelain*.

* He died peacefully at Calcutta, April 9, 1859. He is said to have beheaded above 100,000 rebels.

CHINA ROSE, &c. A delicate and beautiful flower called the *Rosa indica* was brought to these countries from China, and after various failures planted in England, with success, in 1786; the Chinese apple-tree, or *Pyrus spectabilis*, about 1780; and other plants since.

CHIOS, now Scio, an isle in the Greek Archipelago, revolted against Athens, 412 B.C. It partook of the fortunes of the Greeks, being conquered by the Venetians, A.D. 1124; by the Crusaders, 1204; by the Greek emperor and Romans, 1329; by the Genoese, 1329, and by the Turks in 1459. A dreadful massacre of the inhabitants by the Turks took place April 11, 1822, during the Greek insurrection.*

CHIPPAWA (N. America); where the British under general Riall were defeated by the Americans under general Browne, July 5, 1814. The Americans were defeated by the British, commanded by generals Drummond and Riall, July 25 following, but the latter was wounded and taken prisoner.

CHIVALRY arose out of the feudal system in the latter part of the eighth century, (*chevalier*, or knight, being derived from the *caballarius*, the equipped feudal tenant on horseback). From the twelfth to the fifteenth century it had considerable influence in refining the manners of the nations of Europe. It flourished during the Crusades. The knight swore to accomplish the duties of his profession, as the champion of God and the ladies. He devoted himself to speak the truth, to maintain the right, to protect the distressed, to practise courtesy, to fulfil obligations, and to vindicate in every perilous adventure his honour and character. Chivalry, which owed its origin to the feudal system, expired with it. See *Tournaments*. It was commonly after the lie-direct had been given, that combats took place in the *court of chivalry*. By letters patent of James I. the earl-marshal of England had "the like jurisdiction in the courts of chivalry, when the office of lord high constable was vacant, as this latter and the marshal did jointly exercise," 1623.

CHLORINE (Greek *chloros*, pale green), a gaseous element, first obtained by Scheele in 1774, by treating manganese with muriatic acid (now termed hydrochloric acid). Sir H. Davy, in 1810, proved this gas to be an element, and named it chlorine. Combined with sodium it forms common salt (chloride of sodium), and with lime, the well-known bleaching powder and disinfectant—chloride of lime: the bleaching powers of chlorine were made known by Berthollet in 1785. In 1823 chlorine was condensed into a liquid by Faraday.

CHLOROFORM (the ter-chloride of the hypothetical radical formyl), the now well-known anæsthetic, is a compound of carbon, hydrogen, and chlorine, and is manufactured from alcohol, water, and bleaching powder. It was discovered by Soubeiran in 1831 and its composition was determined by Dumas in 1834. The term chloric ether was applied in 1820 to a mixture of chlorine and elephant gas. Chloroform was first applied as an anæsthetic by Dr. Simpson of Edinburgh; it was first administered in England on Dec. 14, 1848, by Mr. James Robinson, surgeon-dentist.

CHOBHAM COMMON, in Surrey, about 20 miles from London. A camp was formed for military exercise at this place, and occupied on June 14, 1853, by a force between 8000 and 10,000 strong. The last field-day (when there was a mock fight) took place Aug. 17, 1860. Only one serious case of misconduct was reported during all the time.

CHOCOLATE was introduced into Europe (from Mexico and the Brazils) about A.D. 1520. It is the flour or paste of the cocoa berry, and makes a wholesome beverage, and a delicate confection. Chocolate was sold in the London coffee-houses soon after their establishment, 1650. *Tatler*. See *Cocoa*.

CHOIR. This was separated from the nave of the church in the time of Constantine. The choral service was first used in England at Canterbury, A.D. 677. See *Chanting*.

CHOLERA MORBUS. This fatal disease, known in its more malignant form as the Indian cholera, made great ravages in the north, east, and south of Europe, and in Asia, where alone it carried off more than 900,000 persons, in 1829-30. In England and Wales in 1848-9, 53,293 persons died of cholera, and in 1854, 20,997.

Cholera appears at Sunderland . . . Oct. 26, 1831	The mortality very great, but more so on the Continent; 18,000 deaths at Paris, between March and August, 1832
And at Edinburgh . . . Feb. 6, 1832	
First observed at Rotherhithe and Limehouse, London, Feb. 13; and in Dublin, . . . March 3, —	

* The slaughter lasted 10 days: 40,000 of both sexes falling victims to the sword, or to the fire, which raged until every house, save those of the foreign consuls, was burned to the ground. 7000 Greeks, who had fled to the mountains, were induced to surrender by a promise of amnesty, guaranteed by the consuls of England, France, and Austria: yet even they were all butchered! The only exception made during the massacre was in favour of the young and more beautiful women and boys, 30,000 of whom were reserved for the markets.

CHOLERA MORBUS, *continued.*

Cholera rages in Rome, the Two Sicilies, Genoa, Berlin, &c., in . . . July and August, 1837
 Another visitation of the cholera in this kingdom: the number of deaths in London, for the week ending Sept. 15, 1849, was 3183, the ordinary average being 1008; and the number of deaths by cholera from June 17 to Oct. 2, in London alone, 13,161. From this time the mortality lessens, and the distemper disappeared . . . Oct. 13, 1849

Newcastle-upon-Tyne, Hexham, Tynemouth, and other northern towns, suffer much from cholera . . . Sept. 1853
 It rages in Italy and Sicily: above 10,000 are said to have died at Naples: it was also very fatal to the allied troops at Varna, autumn, 1854
 Cholera very severe for a short time in the southern parts of London, and in Soho and St. James's, Westminster, Aug. and Sept., —

CHORAGUS, an important public officer among the Greeks, who paid and regulated the chorus in the public feasts, worship, &c. Stesichorus, whose real name was Tysias, received this appellative form, he having been the first who taught the chorus to dance to the lyre, 556 B.C. *Quintil. Inst. Orat.*

CHORUS-SINGING is very ancient, and was early practised at Athens. Hypodicus, of Chalcedes, carried off the prize for the best voice, 508 B.C. *Parium marbles.* See *Music.*

CHOUANS, a name given to the Bretons during the war of La Vendée in 1792, from their chief Jean Cottureau, a smuggler, who had used, as a signal, the cry of the *Chat-huant*, or screech-owl. He was killed near Misdon in 1794. George Cadoudal, their last chief, was connected with Pichegru in a conspiracy against Napoleon when first consul, and was executed in 1804.

CHRISM. Consecrated oil was used early in the ceremonies of the Roman and Greek churches. Musk, saffron, cinnamon, roses, and frankincense, are mentioned as used with the oil, in A.D. 1541. It was ordained that chrism should consist of oil and balsam only; the one representing the human nature of Christ, and the other his divine nature, 1596.

CHRIST. See JESUS CHRIST.

CHRIST'S HOSPITAL (the *Blue-Coat* school) was established by Edward VI. 1552, on the site of the Grey Friars monastery. A mathematical ward was founded by Charles II., 1672, and the city of London and the community of England have contributed to render it a richly endowed charity. The *Times* ward was founded in 1841. Large portions of the edifice having fallen into decay, it was rebuilt; in 1822 a new infirmary was completed, and in 1825 (April 25) the duke of York laid the first stone of the magnificent new hall.—On Sept. 24, 1854, the master, Dr. Jacob, in a sermon, in the church of the hospital, censured the system of education and the general administration of the establishment. Many improvements have since been made. The subordinate school at Hertford, for 416 younger boys and 80 girls, was founded in 1683.

CHRIST'S-THORN, conjectured to be the plant of which Our Saviour's crown of thorns was composed, came hither from the south of Europe before 1596.

CHRISTIAN ERA. See *Anno Domini.*

CHRISTIAN KNOWLEDGE SOCIETY was founded in 1698 to promote the erecting of charity schools, and to disperse bibles and religious tracts. It has an annual revenue of about 100,000*l.*

CHRISTIAN AND MOST CHRISTIAN KING; *Christianissimus Rex*, a title unworthily conferred by pope Paul II. in 1469 on the crafty and tyrannical Louis XI. of France.

CHRISTIANIA, the capital of Norway, built in 1624 by Christian IV. of Denmark to replace Opslo, which had been destroyed by fire. In April 1858 Christiania suffered by fire, the loss being about 250,000*l.* New Storthing (parliament house) built 1861-2.

CHRISTIANITY. The name Christian was first given to the believers and followers of Christ's doctrines at Antioch, in Syria, *Acts* xi. 26, A.D. 43. The first Christians were divided into *episcopoi* (bishops or overseers), *presbyteroi* (elders), *diaconoi* (ministers or deacons) and *pistoi* (believers); afterwards *catechumens*, or learners, and *energumens*, who were to be exorcised, were added.

The persecutions of the Christians commenced . . .
 See *Persecutions* . . . A.D. 64
 Christianity said to be taught in Britain about 64; and propagated with some success (*Bede*) 156
 Christianity said to be introduced into Scotland in the reign of Donald I. about . . . 212

Constantine the Great professes the Christian religion . . . 312
 Prudentius preaches in Abyssinia . . . 346
 Introduced among the Goths by Ulfilas . . . 376
 Into Ireland in the second century, but with more success after the arrival of St. Patrick in 432

CHRISTIANITY, *continued.*

Christianity established in France by Clovis	496	Into Prussia, by the Teutonic knights, when they were returning from the holy wars	1227
Conversion of the Saxons* by Augustin	597	Into Lithuania; paganism was abolished about	1386
Into Helvetia, by Irish missionaries	643	Into Guinea, Angola, and Congo, in the 15th century.	
Into Flanders in the seventh century.		Into China, where it made some progress (but was afterwards extirpated, and thousands of Chinese Christians were put to death)	1575
Into Saxony, by Charlemagne	785	Into India and America, in the 16th century.	
Into Denmark, under Harold	827	Into Japan, by Xavier and the Jesuits, 1549; but the Christians were exterminated in	1638
Into Bohemia, under Borzivoi	894	Christianity re-established in Greece	1628
Into Russia, by Swiatoslaf	940		
Into Poland, under Meicislaus I.	992		
Into Hungary, under Geisa	994		
Into Norway and Iceland, under Olof I.	1000		
Into Sweden, between 10th and 11th centuries.			

CHRISTMAS-DAY, Dec. 25 (from *Christ* and the Saxon *messe*, signifying the *mass* and a *feast*), a festival observed in commemoration of the nativity of Our Saviour. It was first observed A.D. 98; and ordered to be held as a solemn feast, and divine service to be performed on the 25th of December, by pope Telesphorus, about A.D. 137.* In the eastern church, Christmas and the Epiphany (*which see*) are deemed but one and the same feast. The holly and mistletoe used at Christmas are said to be the remains of the religious observances of the Druids.

CHRISTMAS ISLAND, in the Pacific Ocean, so named by captain Cook, who landed here on Christmas-day, 1777. He had passed Christmas-day at Christmas-sound, 1774. On the shore of Christmas Harbour, visited by him in 1776, one of his men found a piece of parchment with this inscription: "*Ludovico XV. Galliarum rege, et d. Bohnes regi a secretis ad res maritimas, annis 1772 et 1773.*" On the other side of it captain Cook wrote: "*Naves Resolution et Discovery de rege Magnæ Britannie, Dec. 1776,*" and placed it in a bottle safely.

CHRISTOPHER'S, St. (or St. Kitt's), a West India Island, discovered in 1493, by Columbus, who, pleased with its appearance, called it after himself. Settled by the English and French, 1623 or 1626. Entirely ceded to England by the peace of Utrecht, 1713. Taken by the French in 1782, but restored the next year. This island suffered greatly from a storm, and the town of Basseterre from a fire, Sept. 3, 1776.

CHROMIUM (Greek, *chrome*, colour) a rare metal, discovered by Vauquelin in 1797. It is found combined with iron and lead, and forms the colouring matter of the emerald and other crystalline bodies.

CHROMO-LITHOGRAPHY. *See Printing in Colours.*

CHRONICLES. The earliest are those of the Jews, Chinese, Hindoos, and perhaps of the Irish. After the invention of writing, all civilised nations appear to have kept chroniclers, generally priests or astrologers, who mingled popular legends with their records. In Scripture there are two "Books of Chronicles." Collections of the British chroniclers have been published by Camden, Gale, &c., since 1602; in the present century by the English Historical Society &c. In 1858, the publication of them recommenced under the direction of the Master of the Rolls. Macray's "Manual of British Historians" is very useful; published 1845.

CHRONOLOGY (the science of time) has for its object the arrangement and exhibition of the various events of the history of the world in the order of their succession, and the ascertaining the intervals between them. *See Eras and Epochs.* Valuable works on the subject are *l'Art de Vérifier les Dates*, compiled by the Benedictines (1783—1820). Playfair's Chronology, 1784; Blair's Chronology, 1753 (new editions by sir H. Ellis, in 1844, and by Mr. Rosse, in 1856). The Oxford Chronological Tables, 1838. Sir Harris Nicolas' Chronology of History, 1833; new edition, 1852. Hales' Chronology, 2nd edition, 1830; and Mr. H. Fynes-Clinton's Fasti Hellenici and Fasti Romani (1824-50) are very valuable and elaborate works on this subject.

CHRONOMETER. *See Clocks and Harrison.*

* It is, traditionally, said that Gregory the Great, shortly before his elevation to the papal chair, chanced one day to pass through the slave-market at Rome, and perceiving some children of great beauty who were set up for sale, he inquired about their country, and finding they were English pagans, he is said to have cried out in the Latin language, "*Non Angli sed Angeli forent, si essent Christiani.*" that is, "they would not be English, but angels, if they were Christians." From that time he was struck with an ardent desire to convert that unenlightened nation, and ordered a monk named Austin, or Augustin, and others of the same fraternity, to undertake the mission to Britain in the year 596.

† Diocletian, the Roman emperor, keeping his court at Nicomedia, being informed that the Christians were assembled on this day in great multitudes to celebrate Christ's nativity, ordered the doors to be shut, and the church to be set on fire, and six hundred perished in the burning pile. This was the commencement of the tenth persecution, which lasted ten years, A.D. 303.

CHRONOSCOPE, an apparatus invented by professor Wheatstone in 1840, to measure small intervals of time. It has been applied to the velocity of projectiles, and to electricity. Chronoscopes were invented by Pouillet, and others in 1844.

CHUNAR, TREATY OF, concluded between the nabob of Oude and governor Hastings, by which the nabob was relieved of all his debts to the East India Company, on condition of his seizing the property of the begums, his mother and grandmother, and delivering it up to the English. This treaty also enabled the nabob to take possession of the lands of Fyzoola Khan, a Rohilla chief, who had escaped from a recent massacre, and had settled at Rampoor, under guarantee of the English. On this occasion the nabob made a present to Mr. Hastings of 100,000*l.* Sept. 19, 1781. See *Hastings, Warren, Trial of*.

CHURCH, (a term probably derived from the Greek *kyriakos*, pertaining to the Lord, *kyrios*), signifies a collective body of Christians, and is also applied to the place where they meet. In the New Testament, it signifies "congregation," in the original *ekklesia*. Christian architecture commenced with Constantine, who, after he was settled in his government, erected, at Rome, churches (called basilicas, from the Greek *basileus*, a king); St. Peter's being erected about 330. His successors erected others; and adopted the heathen temples as places of worship. Several very ancient churches exist in Britain and Ireland. See *Architecture; Choir and Chanting; Rome, Modern; and Popes*.

CHURCH OF ENGLAND. * The following are important facts in her history: for details, refer to separate articles.

Britain converted to Christianity ("Christo subdita," Tertullian) 2nd century.
Invasion of the Saxons,—who are converted by Augustin and his companions . . . 596
Dunstan establishes the supremacy of the monastic orders . . . about 960
The aggrandising policy of the Church fostered by Edward the Confessor was checked by William I. and his successors.
Severe contest between Henry II. and Becket respecting the "Constitution of Clarendon" . . . 1164-1170
John surrenders his crown to the papal legate . . . 1213
Rise of the Lollards—Wickliffe publishes Tracts against the errors of the Church of Rome; 1356; and a version of the Bible . . . about 1383
The royal supremacy imposed on the clergy by Henry VIII. 1531; many suffer death for refusing to acknowledge it . . . 1535
Coverdale's Translation of the Bible commanded to be read in churches . . . —
"Six Articles of Religion," promulgated . . . 1539
First book of Common Prayer issued . . . 1548
"Forty-two Articles of Religion" issued . . . 1552
Restoration of the Roman Catholic forms; and fierce persecutions of the Protestants by Mary . . . 1553-8
The Protestant forms restored by Elizabeth; the Puritan dissensions begin . . . 1558-1603
"Thirty-nine" Articles published . . . 1563
Hampton Court Conference . . . 1604
New translation of the Bible published . . . 1611
Book of Common Prayer suppressed and Directory established by parliament . . . 1644
Presbyterians established by the Commonwealth 1649

Act of Uniformity (14 Charles II. c. 4) passed —2000 nonconforming ministers ejected from their livings . . . 1662
Attempts of James II. to revive Romanism; "Declaration of Indulgence" published . . . 1687
Acquittal of the seven bishops on a charge of "seditious libel" . . . 1688
"Queen Anne's Bounty," for the augmentation of poor livings . . . 1704
Act for building 50 new churches passed . . . 1710
Fierce disputes between the low church and high church; trial of Sacheverell . . . —
The Bangorian Controversy begins . . . 1717
John Wesley and George Whitfield commence preaching . . . 1738
Rise of the Evangelical party in the church, under Newton Romaine and others in the latter part of the last century. [It is predominant at the present time, 1862.]
Act passed for building and enlarging churches . . . 1828, 1838
200 new churches erected in the diocese of London during the episcopate of C. J. Blomfield . . . 1828-56
"Tracts for the Times" (No. 1—90), published (much controversy ensued) . . . 1833-41
Ecclesiastical Commission established . . . 1834
New Church Discipline Act (3 & 4 Vict. c. 86) . . . 1841
"Essays and Reviews," published, 1860; numerous Replies issued . . . 1861-2
[The Church of England is now said to be divided into High, Low (or Evangelical) and Broad Church: the last including persons who hold the opinions of the late Dr. Arnold, the Rev. F. D. Maurice, and others.]

CHURCH OF IRELAND. See *Ireland*. It is now in connection with that of England, —the United Church of England and Ireland. Previously to the Church Temporalities act of Will. IV. in 1833, there were four archbishoprics and eighteen bishoprics in Ireland, of which ten have since ceased; that act providing for the union of sees, and for the abolition of certain sees, according as the possessors of them died. See *Bishops*.

CHURCH OF NORTH AMERICA. The Episcopal church was established in Nov. 1784, when bishop Seabury, chosen by the churches in Connecticut, was consecrated in Scotland.

* The church of England consists of three orders of clergy,—bishops, priests, and deacons; viz. two archbishops and twenty five bishops, exclusive of the see of Sodor and Man. The other dignities are chancellors, deans (of cathedrals and collegiate churches), archdeacons, prebendaries, canons, minor canons, and priest-vicars: these and the incumbents of rectories, vicarages, and chapelries, make the number of preferments of the Established Church, according to official returns, 12,327. The number of churches for Protestant worship in England was 11,742 in 1818, and 14,077 in 1851.

The first convention was held at Philadelphia in 1785. On Feb. 4, 1787, two more American bishops were consecrated at Lambeth. In 1851 there were 37 bishops. As the church is independent of the state, bishops are elected whenever required.

CHURCH OF SCOTLAND. See *Bishops in Scotland*. On the abolition of Episcopacy in Scotland in 1638, Presbyterianism became the religion of Scotland. Its distinguishing tenets seemed to have been first embodied in the formulary of faith, said to have been compiled by John Knox, in 1560, which was approved by the parliament and ratified in 1567, was finally settled by an act of the Scottish senate in 1696, and was afterwards secured by the treaty of union with England in 1707. The Church of Scotland is regulated by four courts—the General Assembly,* the Synod, the Presbytery, and Kirk Sessions. See *Presbyterians*. A large body seceded from this church in 1843, and took the name of the Free Church of Scotland, *which see*.

CHURCH-RATES. The maintaining the church (*i. e.* the building) in repair belongs to the parishioners, who have the sole power of taxing themselves for the expense when assembled in vestry. The enforcement of payment, which is continually disputed by dissenters and others, belongs to the ecclesiastical courts. Many attempts have been made to abolish church-rates. A bill for this purpose has passed the commons several times since 1855, but was thrown out in May, 1861. See *Braintree*.

CHURCH-SERVICES were ordered to be read everywhere in Latin by pope Vitellianus, 663; to be read in English in her kingdoms by queen Elizabeth in 1558.

CHURCH-WARDENS, officers of the parish church, appointed by the first canon of the synod of London in 1127. Overseers in every parish were also appointed by the same body, and they continue now nearly as then constituted. *Johnson's Canons*. There are commonly two church-wardens to every parish, who direct and control its affairs, summon the parishioners to meet, &c.

CHURCHING OF WOMEN is the act of returning thanks in the church by women after their delivery. It began about A.D. 214. *Wheatley*. See *Purification*.

CHUSAN, a Chinese isle. See *China*, 1840, 1841, 1860.

CIDER (*Zider*, German), when first made in England, was called wine, about A.D. 1284. When the earl of Manchester was ambassador in France, he is said to have frequently passed off cider upon the nobility of that country for a delicious wine. It was made subject to the excise regulation of sale in 1763 *et seq.* A powerful spirit is drawn from cider by distillation.—Many orchards were planted in Herefordshire by lord Scudamore, ambassador from Charles I. to France. John Philips published his poem "Cider" in 1706.

CILICIA, in Asia Minor, partook of the fortunes of that country. It became a Roman province 67 B.C. and was conquered by the Turks, A.D. 1387.

CIMBRI, a Teutonic race, who came from Jutland, and invaded the Roman empire about 120 B.C. They entered Gaul and defeated the Romans, under the consul, Marcus Silanus, 109 B.C., and under Manlius, on the banks of the Rhine, where 80,000 Romans were slain, 105 B.C. Their allies, the Tentones, were defeated by Marius in two battles at Aquæ Sextiæ (Aix) in Gaul; 200,000 were killed, and 70,000 made prisoners, 102 B.C. The Cimbri were defeated by Marius and Catulus, as they were again endeavouring to enter Italy; 120,000 were killed, and 60,000 taken prisoners, 101 B.C. They were afterwards absorbed into the Teutones or Saxons.

CINCINNATI. A society established in the American army soon after the peace of 1783, "to perpetuate friendship," and to raise a fund for relieving the widows and orphans of those who had fallen during the war." On the badge was a figure of Cincinnatus, hence the name. Owing to the people who had just accomplished their freedom dreading military influence, the officers gave up the society.

CINNAMON, a species of laurel, a native of Ceylon. Cinnamon is mentioned among the perfumes of the sanctuary, *Exodus xxx. 23*. Cinnamon was found in the American forests, by Don Ulloa, in 1736. It was cultivated in Jamaica and Dominica by transplantation in 1788.

CINQUE-CENTO (five hundred); for an explanation of this term, *tre-cento*, &c., see note to article *Italy*.

* The first general assembly of the church was held Dec. 20, 1560. The general assembly constitutes the highest ecclesiastical court in the kingdom; it meets annually in Edinburgh in May, and sits about ten days. It consists of a grand commissioner, appointed by the sovereign, and delegates from presbyteries, royal boroughs, and universities, some being laymen. To this court all appeals from the inferior ecclesiastical courts lie, and its decision is final.

CINQUE PORTS, on the South coast of England, were originally *five* (hence the name)—Dover, Hastings, Hythe, Romney, and Sandwich; Winchelsea and Rye were afterwards added. *Jeake*. Their jurisdiction was vested in barons, called wardens, for the better security of the English coast, these ports being the nearest points to France, and considered the keys of the kingdom; instituted by William I. in 1078. *Rapin*. The last lord-wardens were the duke of Wellington, 1828-52; the marquess of Dalhousie, 1852-60; lord Palmerston, appointed March, 1861.

CINTRA (Portugal). Here was concluded the convention between the British army under sir Hew Dalrymple; and the French under marshal Junot. By this compact, on Aug. 30, 1808, shortly after the battle of Vimeira (Aug. 22), the defeated French army was allowed to evacuate Portugal in British ships, carrying with them all their spoil. A court of inquiry was held at Chelsea, Nov. 17 same year, and the result was a formal declaration by the king strongly condemning the terms of the convention. Wellington and Napoleon held a different opinion.

CIRCASSIA (Asia, on N. side of the Caucasus). The Circassians are said to be descended from the Albanians. They continued unsubdued, even by the arms of Timour; but in the sixteenth century the greater part of them acknowledged the authority of the czar, Ivan II. of Russia. About A.D. 1745, the princes of Great and Little Kabarda took oaths of fealty to that power. One branch of their traffic is the sale of their daughters, famed throughout the world for their beauty, whom they sell to the merchants, generally Jews, for the seraglios of Turkey and Persia. *Klaproth*. The Circassians became Mahometans in the 18th century. By the treaty of Adrianople in 1830 Circassia was surrendered to Russia by Turkey. But the Circassians, particularly under a native chief, named Schamyl, carried on a war of independence with varying success against the whole power of Russia till 1859. In June, Nov. and Dec. 1857 they were defeated by the Russian governor, prince Orbelliani; who also in April 1858 conquered a large tract of country and expelled the inhabitants. On Sept. 7, 1859, Schamyl was captured by the Russians, and treated with great respect. Many Circassians (about 20,000), in consequence, emigrated to Constantinople in 1859-60.

CIRCENSIAN GAMES were combats in the Roman circus (at first in honour of Consus, the god of councils, but afterwards of Jupiter, Neptune, Juno, and Minerva), instituted by Evander, and established at Rome 732 B.C. by Romulus, at the time of the rape of the Sabines. They were an imitation of the Olympian games among the Greeks, and, by way of eminence, were called the Great games, but Tarquin named them Circensian; their celebration continued from Sept. 4 to 12. *Virgil*.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 1 and 72 decimals to 3; and Lagny (1719) as 1 and 122 decimals to 3.

CIRCLES OF GERMANY (formed about 1500 to distinguish the members of the diet of the empire) were, in 1512, Franconia, Bavaria, Upper and Lower Rhine, Westphalia, and Saxony; in 1789, Austria, Burgundy, Westphalia, Palatinate, Upper Rhine, Suabia, Bavaria, Franconia, and Upper and Lower Saxony. In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, *which see*.

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 22 Hen. II. 1176. They were afterwards divided into four, with five justices to each division, 1180. *Rapin*. They have been frequently altered. England and Wales are at present divided into eight—each travelled in spring and summer for the trial of civil and criminal cases; the larger towns are visited in winter for trials of criminals only: this is called “going the circuit.” There are monthly sessions for the city of London and county of Middlesex.

CIRCULATING LIBRARY. Stationers lent books on hire in the middle ages. The circulating library in England, on a public plan, was opened by Samuel Fancourt, a dissenting minister of Salisbury, about 1740. He had little encouragement in the undertaking, which in the end failed. More success, however, attended similar institutions at Bath and in London, and in a short time they spread throughout the kingdom. *Ferguson's Biog.* There was a circulating library at Crane court, London, in 1748, of which a catalogue in two vols. was published.—No books can be taken from the British Museum except for judicial purposes, but the libraries of the Royal Society and the principal scientific societies are circulating.—The London Library (circulating) was founded in 1841, under the highest auspices, and is of great value to literary men.—Of the subscription libraries belonging to individuals, that of Mr. C. E. Mudie, in New Oxford-street, is the most remarkable for the

large quantity and good quality of the books : several hundreds, sometimes thousands, of copies of a new work being in circulation. It was founded in 1842, and grew into celebrity in Dec. 1848, when the first two volumes of Macaulay's England were published, for which there was an unprecedented demand, which this library supplied. A noble hall, having the walls covered with shelves filled with new books, was opened in Dec. 1860. In Jan. 1862, the present Circulating Library Company issued their prospectus.

CIRCULATION OF THE BLOOD. See *Blood*.

CIRCUMCISION (instituted 1897 B.C.), was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christ), originally "the Octave of Christmas," is mentioned about A.D. 487. It was introduced into the Liturgy in 1550.

CIRCUMNAVIGATORS. Among the greatest and most daring of human enterprises at the period when it was first attempted, was the circumnavigation of the earth, A.D. 1519.*

Magellan first entered the Pacific Ocean	A.D. 1519	Tasman, Dutch	A.D. 1642	James Cook	A.D. 1768
Groalva, Spaniard	1537	Cowley, British	1683	On his death the voyage was continued by King	1779
Ayalradi, Spaniard	—	Dampier, English	1689	Bougainville, French	1776
Mondana, Spaniard	1567	Cooke, English	1708	Portlocke, British	1788
Sir Francis Drake, first English	1577	Clipperton, British	1719	King and Fitzroy, British	1826-36
Cavendish, first voyage	1586	Roggewein, Dutch	1721	Belcher, British	1836-42
Le Maire, Dutch	1613	Anson (aftds. lord)	1740	Wilkes, American	1838-42
Quiros, Spaniard	1625	Byron, English	1764	See <i>North West Passage</i> .	
		Wallis, British	1766

CIRCUS. There were eight (some say ten) buildings of this kind at Rome ; the largest, the *Circus Maximus*, was built by the elder Tarquin, 605 B.C. It was an oval figure ; length three stadia and a half, or more than three English furlongs ; breadth 960 Roman feet. It was enlarged by Julius Cæsar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Cæsar introduced in it large canals of water, which could be quickly covered with vessels, and represent a sea-fight. *Pliny*. See *Amphitheatres*. In the fifth and sixth centuries after Christ, Constantinople was greatly disturbed by the white, red, green, and blue factions of the circus. In 501, 3000 persons were killed.

CISALPINE REPUBLIC, N. Italy, was founded by the French in May, 1797, acknowledged by the emperor of Germany to be independent, by the treaty of Campo Formio (*which see*), Oct. 17 following. It received a new constitution in Sept. 1798 ; but merged into the kingdom of Italy in March, 1805. See *Italy*.

CISTERCIANS, an order of monks founded by Robert, a Benedictine, abbot of Cîteaux, hence called the order of Cîteaux, in France, near the end of the eleventh century. For a time it governed almost all Europe. The monks observed silence, abstained from flesh, lay on straw, and wore neither shoes nor shirts. *De Vitri*. They soon degenerated, and were reformed by St. Bernard. See *Bernardine*.

CITATE. The Russian general Gortschakoff, intending to storm Kalafat, threw up redoubts at Citate, close to the Danube, which were stormed by the Turks under Omer Pacha, Jan. 6, 1854. The fighting continued on the 7th, 8th, and 9th, when the Russians were compelled to retire to their former position at Krajowa, having lost 1500 killed and 2000 wounded. The loss of the Turks was estimated at 338 killed and 700 wounded.

CITIES. The word *city* (French *cité*, Italian *città*, Latin *civitas*) has been in use in England only since the Conquest, at which time even London was called *Londonburgh*, as the capital of Scotland is still called *Edinburgh*. The English cities were very inconsiderable in the twelfth century. Cities were first incorporated A.D. 1079. Towns corporate were called cities when the seat of a bishop's see and having a cathedral church. *Camden*.

CITIZEN. It was not lawful to scourge a citizen of Rome. *Livy*. In England a citizen is a person who is free of a city, or who doth carry on a trade therein. *Camden*. Various privileges have been conferred on citizens as freemen in several reigns.—The wives of citizens of London (not being aldermen's wives, nor gentlewomen by descent) were obliged to wear minever caps, being white woollen knit three-cornered, with the peaks projecting three or

* The first ship that sailed round the earth, and hence determined its being globular, was Magellan's or Magelhaen's ; he was a native of Portugal, in the service of Spain, and by keeping a westerly course he returned to the same place he had set out from in 1519. The voyage was completed in three years and twenty-nine days ; but Magellan was killed on his homeward passage, at the Philippines, in 1521.

four inches beyond their foreheads; aldermen's wives made them of velvet, 1 Eliz. 1558. *Stow*. Citizen was the only title allowed in France at the revolution, 1792.

CIUDAD RODRIGO, a strong fortress of Spain, invested by the French, June 11, 1810; and surrendered to them July 10, following. It remained in their possession until it was gallantly stormed by the British, commanded by Wellington, Jan. 19, 1812. The loss of the British and Portuguese amounted to about 1000 killed and wounded; that of the garrison was the same, besides 1700 prisoners. *Napier*.

CIVIL ENGINEERS. See *Engineers*.

CIVIL LAW. A body of Roman laws, founded upon the laws of nature and of nations, was first collected by Alfenus Varus, the civilian, who flourished about 66 B.C.; and a digest of them was made by Servius Sulpicius, the civilian, 53 B.C. The Gregorian code was issued A.D. 290; the Theodosian in 438. Many of the former laws having grown out of use, the emperor Justinian ordered a revision of them (in 529-534), which was called the Justinian code, and constitutes a large part of the present civil law. Civil law was restored in Italy, Germany, &c. 1127. *Blair*. It was introduced into England by Theobald, a Norman abbot, afterwards archbishop of Canterbury in 1138. It is now used in the spiritual courts only, and in maritime affairs. See *Doctors' Commons*, and *Laws*.

CIVIL LIST. This now comprehends the revenue awarded to the kings of England in lieu of their ancient hereditary income. The entire revenue of Elizabeth was not more than 600,000*l.* and that of Charles I. was about 800,000*l.* After the Revolution a civil list revenue was settled on the new king and queen of 700,000*l.*, the parliament taking into its own hands the support of the forces both maritime and military. The civil list of George II. was increased to 800,000*l.*; and that of George III. in the 55th year of his reign, was 1,030,000*l.* In 1831, the civil list of that sovereign was fixed at 510,000*l.*, and in Dec. 1837, the civil list of the queen was fixed at 385,000*l.* Prince Albert obtained an exclusive sum from parliament of 30,000*l. per an.*, on Feb. 7, 1840. Sir H. Parnell's motion for inquiry into the civil list led to the resignation of the Wellington administration, Nov. 15, 1830. On Feb. 2, 1860, a select committee was appointed by the house of commons for the purpose. The civil service estimates for the financial year 1860-1 (exclusive of those for the army and navy) amounted to 7,368,000*l.*

CIVIL SERVICE. Nearly 17,000 persons are employed in this service under the direction of the Treasury, and the Home, Foreign, Colonial, Post, and Revenue Offices, &c. In 1855 a commission reported most unfavourably on the existing system of appointments, and on May 21 commissioners were appointed to examine into the qualifications of the candidates, who report annually. The Civil Service Superannuation Act passed in April 1859.

CIVIL WARS. See *England, France, &c.*

CLANSHIPS were tribes of the same race, and commonly of the same name, and originated in feudal times. See *Feudal Laws*. They are said to have arisen in Scotland, in the reign of Malcolm II., about 1008. Clanships and other remains of heritable jurisdiction were abolished in Scotland (where clans were taken to be tenants of one lord), and the liberty of the English was granted to clansmen, 20 Geo. II. 1746. *Ruffhead*. The following is a curious and rare list of all the known clans of Scotland, with the badge of distinction anciently worn by each. The chief of each respective clan was, and is, entitled to wear two eagle's feathers in his bonnet, in addition to the distinguishing badge of his clan. *Chambers*. A history of the clans by Wm. Buchanan was published in 1775.

<i>Name.</i>	<i>Badge.</i>	<i>Name.</i>	<i>Badge.</i>	<i>Name.</i>	<i>Badge.</i>
Buchanan . . . Birch.		Lamont . . . Crab-apple tree.		M'Neil . . . Sea-ware.

CLARE AND CLARENCE (Suffolk). Richard de Clare, earl of Gloucester, is said to have seated here a monastery of the order of Friars Eremites, the first of this kind of mendicants

who came to England, 1248. *Tanner*. Lionel, third son of Edward III. becoming possessed of the honour of Clare, by marriage, was created duke of Clarence. The title has ever since belonged to a branch of the royal family.*—CLARE was the first place in Ireland for 140 years that elected a Roman Catholic member of parliament. See *Roman Catholics*. At the election, held at Ennis, the county town, Mr. Daniel O'Connell was returned, July 5, 1828. He did not sit till after the passing of the Catholic Emancipation act, in 1829, being re-elected July 30, 1829.

CLARE, NUNS OF ST., a sisterhood founded in Italy about A.D. 1212. This order settled in England, in the Mineries without Aldgate, London, about 1293. Blanche queen of Navarre, wife of Edmund, earl of Lancaster, brother of Edward I., founded the abbey for those nuns on the east side of the street leading from the Tower to Aldgate; they were called Minoreesses (hence Minories); and the order continued till the suppression, when the site was granted to the bishopric of Bath and Wells, 1539. *Tanner*.

CLAREMONT (Surrey), the residence of the princess Charlotte (daughter of the prince regent, afterwards George IV.), and the scene of her death, Nov. 6, 1817. The house was originally built by sir John Vanbrugh, and was the seat successively of the earl of Clare, afterwards duke of Newcastle, of lord Clive, lord Galloway, and the earl of Tyreconnel. It was purchased of Mr. Ellis by government for 65,000*l.* for the prince and princess of Saxe-Coburg; and the former, now king of Belgium, assigned it to prince Albert in 1840. The exiled royal family of France took up their residence at Claremont, March 4, 1848; and the king, Louis-Philippe, died there, Aug. 29, 1850.

CLARENCIEUX, the second king-at-arms, so called because formerly he belonged to the duke of Clarence; his office was instituted to marshal and dispose of the funerals of all the lower nobility, as baronets, knights, esquires, and gentlemen, on the south side of Trent, from whence he is also called sur-roy or south-roy.

CLARENDON, CONSTITUTIONS OF, were enacted at a council held A.D. 1164, at Clarendon, in Wiltshire, the object of which was to retrench the then enormous power of the clergy. They were the ground of Becket's quarrel with Henry II., and were at first condemned by the pope, but afterwards agreed to in 1173.

I. All suits concerning advowsons to be determined in civil courts.

II. The clergy accused of any crime to be tried by civil judges.

III. No person of any rank whatever to be permitted to leave the realm without the royal licence.

IV. Laics not to be accused in spiritual courts, except by legal and reputable promoters and witnesses.

V. No chief tenant of the crown to be excommunicated, or his lands put under interdict.

VI. Revenues of vacant sees to belong to the king.

VII. Goods forfeited to the crown not to be protected in churches.

VIII. Sons of villains not to be ordained clerks without the consent of their lord.

IX. Bishops to be regarded as barons, and be subjected to the burthens belonging to that rank.

X. Churches belonging to the king's see not to be granted in perpetuity against his will.

XI. Excommunicated persons not to be bound to give security for continuing in their abode.

XII. No inhabitant in demesne to be excommunicated for non-appearance in a spiritual court.

XIII. If any tenant *in capite* should refuse submission to spiritual courts, the case to be referred to the king.

XIV. The clergy no longer to pretend to the right of enforcing debts contracted by oath or promise.

XV. Causes between laymen and ecclesiastics to be determined by a jury.

XVI. Appeals to be ultimately carried to the king, and no further without his consent.

CLARENDON PRINTING-OFFICE, OXFORD, erected by sir John Vanbrugh, in 1711-3, the expense being defrayed out of the profits of lord Clarendon's History of the Rebellion, the copyright of which was given by his son to the university. The original building has been converted into a museum, lecture-rooms, &c., and a new printing-office (covering 2½ acres) erected by Blere and Robertson, 1826-9. *Sharp*.

CLARION, it is said by Spanish writers, invented by the Moors in Spain, about A.D. 800, was at first a trumpet, serving as a treble to trumpets sounding tenor and bass. *Ashe*. Its tube is narrower and its tone shriller than the common trumpet. *Pardon*.

CLARIONET, a wind instrument of the reed kind, invented by Joseph Denner, in Nuremberg, about 1690.

CLASSIS. The name was first used by Tullius Servius (the sixth king of ancient Rome), in making divisions of the Roman people, 573 B.C. The first of the six classes were called *classici*, by way of eminence, and hence authors of the first rank (especially Greek and Latin) came to be called *classici*.

* DUKES OF CLARENCE: 1362, Lionel, born 1338, died 1369. See *York, dukes of*.—1411, Thomas (second son of Henry IV.), born 1389, killed at Baugé, 1421.—1461, George (brother of Edward IV.), murdered, 1478.—1789, William (third son of George III.), afterwards William IV.

CLAVICHORD, a musical instrument in the form of a spinnet (called also a manichord); much in use in France, Spain, and Germany, in the 17th century. It had 49 stops, and 70 strings, which bore upon five bridges, the first being the highest, and the others diminishing in proportion. The chords were covered with cloth, which rendered the sound sweeter, and deadened it so that it could be heard only at a small distance. This instrument is of much older date than the harpsichord. *Pardon.*

CLEARING-HOUSE. In 1775, a building in Lombard-street was set apart for the use of bankers, in which they might exchange cheques, bills, and securities, and thereby save labour and curtail the amount of floating cash requisite to meet the settlement of the different houses if effected singly. By means of transfer tickets transactions to the amount of millions daily are settled without the intervention of a bank note. The railway clearing-house in Seymour-street, near Euston-square, is regulated by an act passed in 1850. In 1861, 117 companies were united in the clearing system.

CLEMENTINES, apocryphal pieces, attributed to the primitive father Clemens Romanus, a contemporary of St. Paul; some say he succeeded St. Peter as bishop of Rome. He died A.D. 102. *Nicéron.* Also, the decretals of pope Clement V. who died 1314, published by his successor. *Bouvyer.* Also, Augustine monks, each of whom having been a superior nine years, then merged into a common monk. **CLEMENTINES** were the adherents of Robert, son of the count of Geneva, who took the title of Clement VII. on the death of Gregory XI., 1378, and **URBANISTS**, those of pope Urban VI. All Christendom was divided by the claims of these two pontiffs; France, Castile, Scotland, &c., adhering to Clement; Rome, Italy, and England declaring for Urban. The schism ended in 1409, when Alexander V. was elected pope, and his rivals resigned. See *Anti-Popes.*

CLERGY * (from the Greek, *kleros*, a lot or inheritance) in the first century were termed presbyters, elders or bishops, and deacons. The bishops (*episcopoi* or *overseers*) in the second century assumed higher functions over the presbyters. This distinction was still further promoted in the third century; and, under Constantine, the bishops obtained the recognition and protection of the secular power. Under the Lombard and Norman kings in the seventh and eighth centuries the clergy began to possess temporal power, as owners of lands; and after the establishment of monachism, a distinction was made between the *regular* clergy who lived apart from the world, in accordance with a *regula* or rule; and the *secular* (worldly) or beneficed clergy.—The Clergy in ENGLAND increased rapidly early in the seventh century, and at length controlled the king and kingdom. They were frequently repressed by the government; were reformed and regulated by parliament in 1529, compelled to recognise Henry VIII. as head of the church in 1531; and were permitted to marry in 1549. The first-fruits of the clergy were assigned by parliament to the king, 1534; they were excluded from parliament in 1536. The conference between the established and dissenting clergy was held in 1604. See *Conference.* Two thousand resigned their benefices in the church of England, rather than subscribe their assent to the book of common prayer, including the thirty-nine articles of religion, as enjoined by the act of uniformity, 1612. The Irish Protestant Clergy were restored to their benefices, from which they had been expelled, owing to the state of the kingdom under James II., 1689. The Clergy Incapacitation act passed, 1801. See *Church of England, Benefit of Clergy, and Convocation.*

CLERGY CHARITIES. The Clergyman's Widows' and Orphans' Corporation was established in England 1670, and incorporated 1678. William Assheton, an eminent theological writer, was the first proposer of a plan to provide for the families of deceased clergy. *Watts's Life of Assheton.* The festival of the "Sons of the Clergy," held annually at St. Paul's cathedral, was instituted about 1655; the charity called the "Sons of the Clergy," was incorporated in 1678. There are several other charities for the relatives of the clergy.

CLERK. See *Clergy.*

CLERKENWELL, a parish near London, so called from a well (*fons clericorum*) in Ray-street, where the parish clerks occasionally acted mystery-plays; once before Richard II. in 1391. Hunt's political meetings in 1817 were held in Spa-fields in this parish. In St. John's parish are the remains of the priory of the Knights of St. John of Jerusalem. Clerkenwell prison was built in 1615, in lieu of the noted prison called the Cage, which was taken down in 1614; the then Bridewell having been found insufficient. The prison called

* The clergy were first styled clerks, owing to the judges being chosen after the Norman custom from the sacred order; and the officers being clergy: this gave them that denomination, which they keep to this day. *Blackstone's Comm.* "As the Druids," says Pasquier, "kept the keys of their religion and of letters, so did the priests keep both these to themselves; they alone made profession of letters, and a man of letters was called a clerk, and hence learning went by the name of clerkship." The English clergy add "clerk" to their name in legal documents.—In 992, the distinction obtained in France. *Hénault.*

the House of Detention, erected in 1775, was rebuilt in 1818; again, 1844. At Clerkenwell-cloose formerly stood the house of Oliver Cromwell, where some suppose the death-warrant of Charles I. was signed, Jan. 1649.

CLERMONT (France). Here was held the council under pope Urban II. in 1095, in which the first crusade against the infidels was determined upon, and Godfrey of Bouillon appointed to command it. In this council the name of pope was first given to the head of the Roman Catholic Church, exclusively of the bishops, who used previously to assume the title. Philip I. of France was (a second time) excommunicated by this assembly. *Henault*.

CLEVES (N.E. Germany), a duchy, after some contention assigned to the elector of Brandenburg in 1666; seized by the French in 1757; restored at the peace in 1763.

CLIMACTERIC, the term applied to certain periods of time in a man's life (multiples of 7 or 9), in which it is affirmed notable alterations in the health and constitution of a person happen, and expose him to imminent dangers. Cotgrave says, "Every 7th or 9th or 63rd year of a man's life, all very dangerous, but the last most." The *grand climacteric* is 63. Hippocrates is said to have referred to these periods in 383 B.C. Much misemployed erudition has been expended on this subject.

CLIO. The initials, C. L. I. O., forming the name of the muse of history, were rendered famous from the most admired papers of Addison, in the *Spectator*, having been marked by one or other of them, signed consecutively, in 1713. *Cibber*.

CLOACA MAXIMA, the chief of the celebrated sewers at Rome, the construction of which is attributed to king Tarquinius Priscus (583 B.C.) and his successors.

CLOCK. The clepsydra, or water-clock, was introduced at Rome about 158 B.C. by Scipio Nasica. Toothed wheels were applied to them by Ctesibius, about 140 B.C. Said to have been found by Cæsar on invading Britain, 55 B.C. The only clock supposed to be then in the world was sent by pope Paul I. to Pepin, king of France, A.D. 760. Pacificus, archdeacon of Genoa, invented one in the ninth century. Originally the wheels were three feet in diameter. The earliest complete clock of which there is any certain record was made by a Saracen mechanic in the thirteenth century. Alfred is said to have measured time by wax tapers, and to have invented lanterns to defend them from the wind about 887.

The escapement ascribed to Gerbert	A.D. 1000	Fromantil, a Dutchman, improved the pendulum	about 1659
A great clock put up at Canterbury cathedral cost £30	1292	Repeating clocks and watches invented by Barlow	about 1676
A clock constructed by Richard, abbot of St. Alban's	about 1326	The dead beat, and horizontal escapements, by Graham	about 1700
John Visconte sets up a clock at Genoa	1353	The spiral balance spring suggested, and the duplex escapement, invented by Dr. Hooke; pivot holes jewelled by Facio; the detached escapement, invented by Mudge, and improved by Berthoud, Arnold, Earnshaw and others in the 18th century.	
A striking clock in Westminster	1368	Harrison's time-piece (<i>which see</i>) constructed	1735
A perfect one made at Paris, by Vick	1370	Clocks and watches taxed, 1707; tax repealed	1708
The first portable one made	1530	The Horological Institute established	1858
In England no clock went accurately before that set up at Hampton-court (maker's initials, N.O.)	1540	The great Westminster clock set up	May 30, 1859
Richard Harris (who erected a clock at St. Paul's, Covent-Garden) and the younger Galileo constructed the pendulum	1641	266,750 clocks and 88,621 watches imported into the United Kingdom in 1857; the duty came off in 1861.	
Christian Huygens contested this discovery, and made his pendulum clock some time previously to	1658		

CLOCK, THE ELECTRIC, Strand, London. See *Electric Clock and Ball*.

CLOGHER (Ireland). St. Macartin, an early disciple of St. Patrick, fixed a bishopric at Clogher, where he also built an abbey "in the street before the royal seat of the kings of Ergal." He died in 506. Clogher takes its name from a golden stone, from which, in times of paganism, the devil used to pronounce juggling answers, like the oracles of *Apollo Pythius*, as is said in the register of Clogher. *Sir James Ware*. In 1041 the cathedral was built anew, and dedicated to its founder. Clogher merged, on the death of its last prelate (Dr. Tottenham), into the archiepiscopal see of Armagh, by the act of 1834. Jocelyn, bishop of Clogher, was degraded, and fled, 1822. See *Bishops*.

CLONFERT (Ireland). St. Brendan founded an abbey at Clonfert in 558: his life is extant in jingling monkish metre in the Cottonian library at Westminster. In his time the cathedral, famous in ancient days for its seven altars, was erected; and Colgan makes St. Brendan its founder and the first bishop; but it is said in the Ulster Annals, under the year 571, "*Mæna*, bishop of Clonfert-Brenain, went to rest." Clonfert, in Irish, signifies a wonderful den or retirement. In 1839 the see merged into that of Killoree. See *Bishops*.

CLONTARF (near Dublin), the site of a battle celebrated in the annals of Ireland, fought on Good Friday, 1039, between the Irish and Danes, the former headed by Bryan Boroinhe, monarch of Ireland, who signally defeated the invaders after a long and bloody engagement, but was wounded, and soon afterwards died, and his son Murchard fell with many of the nobility; but 11,000 of the Danes perished in the battle.

CLOSTERSEVEN (Hanover), **CONVENTION OF**, was entered into Sept. 8, 1757, between the duke of Cumberland, third son of George II., and the duke of Richelieu, commander of the French armies. By its humiliating stipulations 38,000 Hanoverians laid down their arms, and were dispersed. The duke immediately afterwards resigned all his military commands. The convention was soon broken by both parties.

CLOTH. Both woollen and linen cloths were known in very early times. Coarse woollens were introduced into England, A.D. 1191; and seventy families of cloth-workers from the Netherlands settled in England, by Edward III.'s invitation, and the art of weaving was thereby introduced, 1331. *Rymer's Fœdera*. Woollens were first made at Kendal in 1390. Medleys were manufactured, 1614. Our fine broadcloths were yet sent to Holland to be dyed, 1654. Dyed and dressed in England, by one Brewer, from the Low Countries, 1667. The manufacture was discouraged in Ireland, and that of linen countenanced, at the request of both houses of parliament, 1698. See *Woollen Cloth*.

CLOUD, St., a palace, near Paris, named from prince Clodoald or Cloud, who became a monk there in 533, after the murder of his brothers, and died in 560. The palace was built in the 16th century, and in it Henry II. was assassinated by Clement in 1589.

CLOUDS consist of minute particles of water, often in a frozen state, floating in the air. In 1802 Mr. Luke Howard published his classification of clouds, now generally adopted, consisting of three primary forms,—cirrus, cumulus, and stratus; and three compounds of these forms; and the nimbus or black rain-clouds (cumulo-cirro-stratus).

CLOYNE (S. Ireland), a bishopric, founded in the sixth century by St. Coleman, in 1431 united to that of Cork, and so continued for 200 years. It was united with that of Cork and Ross, 1834. See *Bishops*.

CLUBMEN, associations formed in the southern and western counties of England, to restrain the excesses of the armies during the civil wars, 1642-9. They professed neutrality, but inclined towards the king, and were considered enemies by his opponents.

CLUBS, **ENGLISH**, in the last century, consisted of a small number of persons of kindred tastes and pursuits, who met together at stated times for social intercourse. Addison, Steele, and others, frequently met at Button's coffee-house, as described in the *Spectator*. The Kit-Cat club (*which see*) was founded in 1703; and the Beef-Steak club (*which see*) at Covent Garden Theatre in 1735. The celebrated Literary club was established by sir Joshua Reynolds and Dr. Johnson about 1763. The members met weekly, and dined together once a fortnight.—The present London clubs, some comprising 300, others about 1500 members, possess luxuriously furnished edifices, several of great architectural pretensions, in or near Pall Mall. The members obtain the choicest viands and wines at very moderate charges. Many of the clubs possess excellent libraries, particularly the Athenæum (*which see*). The annual payment varies from 6*l.* to 11*l.* 11*s.*; the entrance fee from 9*l.* 9*s.* to 31*l.* 11*s.* The following are the principal London clubs:

White's (<i>Tory</i>), established . . . 1736	Union 1821	Reform (<i>Liberal</i>) 1836
Boodle's 1762	United University 1822	Parthenon —
Brooks's (<i>Whig</i>) 1764	Athenæum (<i>which see</i>) 1824	Army and Navy 1837
Alfred 1808	Oriental —	Conservative 1840
Guards' May 1, 1810	United Service (Junior) 1827	Whittington (by Douglas Jer-
Arthur's 1811	Wyndham 1828	rold) 1846
United Service 1815	Oxford and Cambridge 1829	
Travellers' 1819	Carlton (<i>Conservative</i>) 1832	

CLUBS, FRENCH. The first of these arose about 1782. They were essentially political, and were greatly concerned in the revolution. The *Club Breton* became the celebrated *Club des Jacobins*, and the *Club des Cordeliers* comprised among its members Danton and Camille Desmoulins. From these two clubs came the *Mountain* party which overthrew the Girondists in 1793, and fell in its turn in 1794. The clubs disappeared with the Directory in 1799. They were revived in 1848 in considerable numbers, but did not attain to their former eminence; they were suppressed by decrees, June 22, 1849, and June 6, 1850. *Bouillet*.

CLUB-FOOT, a deformity produced by the shortening of one or more of the muscles, although attempted to be cured by Lorenz in 1784, by cutting the tendo achillis, was not effectually cured till 1831, when Stromeyer of Erlangen cured Dr. Little by dividing the

tendons of the contracted muscles with a very thin knife. Very judicious after-treatment is required.

CLUGNY, OR CLUNY, ABBEY OF, in France, formerly one of the most magnificent and spacious religious institutions in the world. It was founded by Benedictines, under the abbot Bern, about A.D. 910, and was sustained afterwards by the munificence of William, duke of Berry and Aquitaine; its greatness has now passed away. In England foundations for Cluniac monks were among the earliest monastic institutions.

CLYDE AND FORTH WALL was built by Agricola, A.D. 84. The Forth and Clyde CANAL was commenced by Mr. Smeaton, July 10, 1768, and was opened July 28, 1790. It forms a communication between the seas on the eastern and western coasts of Scotland.

CNIDUS, in Caria, Asia Minor; near here Conon the Athenian defeated the Lacedemonian fleet, 394 B.C.

COACH (from *coucher*, to lie). Beckmann states that Charles of Anjou's queen entered Naples in a *caretta*. Under Francis I., a contemporary of our Henry VIII., there were but two in Paris, one belonging to the queen, the other to Diana, the natural daughter of Henry II. There were but three in Paris in 1550; and Henry IV. had one without straps or springs. The first courtier who set up this equipage was John de Laval de Bois-Dauphin, who could not travel otherwise, on account of his enormous bulk. Previously to the use of coaches, the kings of France travelled on horseback, the princesses were carried in litters, and ladies rode behind their squires. The first coach seen in England was in the reign of Mary, about 1553. *Priestley's Lect.* They were introduced by Fitz-Allen, earl of Arundel, in 1580. *Stow.* And in some years afterwards the art of making them. *Anderson's Hist. of Commerce.* A bill was brought into parliament to prevent the effeminacy of men riding in coaches, 43 Eliz. 1601.* *Carte.* Repealed, 1625. The coach-tax commenced in 1747. See *Car, Carriages, Chariots, Hackney Coaches, Mail Coaches, &c.*

COAL.† It is contended, with much seeming truth, that coal, although not mentioned by the Romans in their notices of Britain, was yet in use by the ancient Britons. *Brandt.* Henry III. is said to have granted a licence to dig coals near Newcastle-upon-Tyne in 1234; some say earlier, and others in 1239. Sea-coal was prohibited from being used in and near London, as being "prejudicial to human health;" and even smiths were obliged to burn wood, 1273. *Stow.* In 1306 the gentry petitioned against its use. Coal was first made an article of trade from Newcastle to London, 4 Rich. II. 1381. *Rymer's Fœdera.* Notwithstanding the many previous complaints against coal as a public nuisance, it was at length generally burned in London in 1400; but it was not in common use in England until the reign of Charles I. 1625.

COAL CONSUMED IN LONDON‡ IN THE FOLLOWING YEARS:

1700	317,000 chald.	1810	980,372 chald.	1835	2,299,816 tons.
1750	510,000 ditto.	1820	1,171,178 ditto.	1840	2,638,256 ditto.
1800	814,000 ditto.	1830	1,588,360 ditto.	1850	3,638,883 ditto.

1860.—Coal brought to London 3,573,377 tons coast ways; 1,499,899 tons by railways and canals.

The coal-fields of Great Britain are estimated at 5400 square miles; of Durham and Northumberland, 723 square miles. *Bakewell.* In 1857 about 65½ millions of tons were extracted (value about 16,348,676*l.*) from 2095 collieries; about 25 millions are consumed annually in Great Britain. Mr. Sopwith computes the annual product of the coal-mines of Durham and Northumberland at 14 million tons:—6 millions for London, 2½ millions exported; 2½ millions for coke, 1 million for colliery engines, &c.; and 2 millions for local consumption. The produce of coal in the whole is estimated at 96 millions of tons.—Scotland teems with coal, and fine coal is found in Kilkenny, Ireland. The first ship laden with Irish coal arrived in Dublin from Newry in 1742. *Burns.* The consumption of coal in France, which in 1780 was only 400,000 tons, had risen in 1845 to 6,000,000 tons.—In 1855 the United States produced between 8 and 9 millions of tons; Belgium, 5,000,000; and France, 4,500,000.—The duties on the exportation of British coal which had existed since the 16th century were practically repealed in 1834. In 1842 sir R. Peel imposed a duty of 4*s.* a ton,

* In the beginning of the year 1619, the earl of Northumberland, who had been imprisoned ever since the Gunpowder plot, obtained his liberation. Hearing that Buckingham was drawn about with six horses in his coach (being the first that was so), the earl put on eight to his and in that manner passed from the Tower through the city. *Rapin.*

† No satisfactory definition of coal has yet been given. The composition of wood is 49½ carbon; 6½ hydrogen; 44½ oxygen; of coal 82½ carbon; 5½ hydrogen; 11½ oxygen.

‡ COAL-WHIPPER'S BOARD, to protect the men employed in unloading coal-vessels from publicans, formed by an act of parliament in 1843, lasted till 1856, when the coal-owners themselves established a whipping-office.

which caused much dissatisfaction, and was repealed in 1845. By a stipulation in the commercial treaty of 1860, in consequence of the French government greatly reducing the duty on imported coal, the British government (it is thought by many imprudently) engaged to lay no duty on exported coal for ten years. In 1859 about 7,000,000 tons of British coals were exported, of which 1,391,009 tons went to France. Women were prohibited from working in English collieries in 1842. An act for the regulation and inspection of mines was passed in 1860.*

COAL EXCHANGE, London, was established by 47 Geo. III. c. 68, 1807. The present building was erected by Mr. J. B. Bunning, and opened by prince Albert, Oct. 30, 1849. It is a most interesting structure.

COALITIONS AGAINST FRANCE generally arose through England subsidising the great powers of the continent. They were entered into as follows:—

Austria, Prussia, and Great Britain 1793	England and Austria April 6, 1809
Great Britain, Germany, Russia, Naples, Portugal, and Turkey, signed June 22, 1799	Russia and Prussia; the treaty ratified at Kalisch March 17, 1813
Great Britain, Russia, Austria, & Naples, Aug. 5, 1805	See <i>Treaties</i> .
Great Britain, Russia, Prussia, & Saxony, Oct. 6, 1806	

“COALITION” MINISTRY, that of Mr. Fox and lord North, memorable union in political life, on account of the strong personal dislike which had always been displayed by these personages towards each other. It was formed April 5, 1783; dissolved Dec. 19, same year.

Duke of Portland, *first lord of the treasury*.

Viscount Stormont, *president of the council*.

Earl of Carlisle, *privy seal*.

Frederick, lord North, and Charles James Fox, *home and foreign secretaries*.

Lord John Cavendish, *chancellor of the exchequer*.

Viscount Keppel, *admiralty*.

Viscount Townshend, *ordnance*.

Lord Loughborough, *chief commissioner of great seal*.

Charles Townshend.

Edmund Burke.

Richard Fitzpatrick, &c.

(See also *Aberdeen and Broad Bottom Administration*.)

COAST GUARD. In 1855 the raising and governing this body was transferred to the admiralty. A coast brigade of artillery was established in Nov. 1859.

COAST VOLUNTEERS. See under *Navy of England*.

COBALT, a rare mineral, found among the veins of ores, or in the fissures of stone, at an early date, in the mines of Cornwall, where the workmen call it mundic. *Hill*. It was distinguished as a metal by Brandt, in 1733.

COCCEIANS, a small sect founded by John Cock, or Cocceius, of Bremen, 1665, who held, amongst other opinions, that of a visible reign of Christ in this world, after a general conversion of the Jews and all other people to the Christian faith.

COCHIN CHINA or ANAM, *which see*.

COCHINEAL INSECT (*Coccus cacti*), derives its colour from feeding on the *cactus*, and became known to the Spaniards soon after their conquest of Mexico, in 1518. Cochineal was brought to Europe about 1523, but was not known in Italy in 1548, although the art of dyeing then flourished there. In 1858 it was cultivated successfully in the Teneriffe, the vines having failed through disease. 260,000 lbs. of cochineal were imported into England in 1830; 1,081,776 lbs. in 1845; 2,360,000 lbs. in 1850; and 3,034,976 lbs. in 1859.

COCKER'S ARITHMETIC. The work, edited by John Hawkins, first appeared in 1677.

COCK-FIGHTING, practised by the early barbarous nations, and by Greece. It was introduced at Rome after a victory over the Persians, 476 B.C.; and was brought by the Romans into England. William Fitz-Stephen, in the reign of Henry II., describes cock-fighting as the sport of school-boys on Shrove-Tuesday. It was prohibited, 39 Edw. III. 1365; and again by Henry VIII., and also by Cromwell, 1653. Part of the site of Drury-lane theatre was a cock-pit in the reign of James I.; and the cock-pit at Whitehall was erected by Charles II. Till within these few years there was a *Cock-pit Royal* in St. James's

* It has been estimated that about 1000 lives are lost annually by accidents in coal mines. In 1858, by EXPLOSIONS in coal mines, 52 persons perished at Bardsley; 20 at Duffryn near Newport; 52 at Tyldesley near Leeds; and about 36 in different parts of the country. On April 5, 1859, 26 lives were lost at the chain colliery near Neath, through the irruption of water. In 1860, 76 lives were lost on March 2, at Burradon near Killingworth; 145 at the Risca mine near Newport, Dec. 1; and 22 at the Hetton mine, Northumberland, Dec. 20. On June 11, 1861, 21 lives were lost through an inundation in the Claycross mines, Derbyshire. In 1862, 47 lives were lost at Cothin mine, Merthyr Tydvil, S. Wales, Feb. 19. For still more fatal accidents, see *Lundhill and Hartley*. 85 lives were lost at Lalle coal mine in France in Oct. 1861.

Park; but the governors of Christ's Hospital would not renew the lease for a building devoted to cruelty.* Cock-fighting is now forbidden by law.

COCK-LANE GHOST, an imposition practised by William Parsons, his wife, and daughter, by means of a female ventriloquist. All who heard her believed she was a ghost. The deception, a malignant conspiracy, carried on for some time at No. 33, Cock-lane, London, was at length detected, and the parents were condemned to the pillory and imprisonment, July 10, 1762.

COCOA, or **CACAO**, the kernel or seed of the tree *Theobroma cacao* (Linn.), was introduced into this country shortly after the discovery of Mexico, where it forms an important article of diet. From cocoa is produced chocolate. The cocoa imported into the United Kingdom, chiefly from the British West Indies and Guiana, was, in 1849, 1,989,477 lbs.; in 1851, 4,349,051 lbs.; in 1855, 7,343,458 lbs.; in 1859, 6,006,759 lbs.; in 1861, 9,080,288 lbs.; about half for home consumption.

COCOA-NUT TREE (*Cocos nucifera*, Linn.), supplies the Indians with almost all they need, as bread, water, wine, vinegar, brandy, milk, oil, honey, sugar, needles, clothes, thread, cups, spoons, basins, baskets, paper, masts for ships, sails, cordage, nails, covering for their houses, &c. *Ray*. In Sept. 1829, Mr. Soames patented his mode of procuring stearine and elaine from cocoa-nut oil. It is said that 32 tons of candles have been made in a month from these materials, at the Belmont works, Lambeth.

CODES, see *Laws*. Alfrenus Varus, the civilian, first collected the Roman laws about 66 B.C.; and Servius Sulpicius, the civilian, embodied them about 53 B.C. The Gregorian and Hermoginian codes were published A.D. 290; the Theodosian code in 438; the celebrated code of the emperor Justinian, in 529—a digest from this last was made in 533. Alfred's code of laws is the foundation of the common law of England, 887.—The **CODE NAPOLEON**, the civil code of France, was promulgated from 1803 to 1810. The emperor considered it his most enduring monument. It was prepared under his supervision by the most eminent jurists, from the 400 systems previously existing.

CODFISH. See *Holland*, 1347.

COD-LIVER OIL was recommended as a remedy for chronic rheumatism by Dr. Percival in 1782, and its employment in diseases of the lungs began about 1838. De Jongh's celebrated treatise on Cod-liver oil was published in Latin in 1844; in English, in 1849.

CŒUR DE LION, OR **THE LION-HEARTED**, a surname given to Richard I. of England, on account of his courage, about A.D. 1192; and also conferred on Louis VIII. of France, who signalled himself in the crusades and in his wars against England, about 1223.

COFFEE. The tree was conveyed from Mocha in Arabia to Holland, about 1616; and carried to the West Indies in 1726. First cultivated at Surinam by the Dutch, 1718. The culture was encouraged in the plantations about 1732, and the British and French colonies now grow the coffee-tree abundantly. Its use as a *beverage* is traced to the Persians. It came into great repute in Arabia Felix, about 1454; and passed thence into Egypt and Syria, and thence (in 1511) to Constantinople, where a coffee-house was opened in 1551. M. Thevenot, the traveller, was the first who brought it into France, to which country he returned, after an absence of seven years, in 1662. *Chambers*. Coffee was brought into England by Mr. Nathaniel Canopus, a Cretan, who made it his common beverage at Baliol college, Oxford, in 1641. *Anderson*. The quantity of coffee imported into these realms and entered for home consumption in 1843, was 29,979,404 lbs.; in 1850, 31,166,358 lbs.; in 1857, 34,367,484 lbs.; in 1859, 34,492,947 lbs.; in 1860, 35,674,381 lbs. (duty 3d. per lb. raw coffee; 4d. roasted). Total imported in 1861, 83,532,525 lbs.

COFFEE-HOUSES. The first in England was kept by a Jew named Jacobs, in Oxford, 1650. In that year Mr. Edwards, an English Turkey merchant, brought home with him a Greek servant named Pasquet, who opened the first coffee-house in London, in George-yard, Lombard-street, in 1652. Pasquet afterwards went to Holland, and opened the first house in that country. *Anderson*. The Rainbow coffee-house, near Temple-bar, was represented as a nuisance to the neighbourhood, 1657. Coffee-houses were suppressed by proclamation in 1675; but the order was revoked in 1676, on the petition of the traders in tea and coffee.

* Mr. Ardesoif, a gentleman of large fortune and great hospitality, who was almost unrivalled in the splendour of his equipages, had a favourite cock, upon which he had won many profitable matches. The last wager he laid upon this cock he lost; which so enraged him, that in a fit of passion he thrust the bird into the fire. A delirious fever, the result of his rage and inebriety, in three days put an end to his life. He died at Tottenham, near London, April 4, 1788.

COFFERER OF THE HOUSEHOLD, formerly an officer of state, and a member of the privy council, who had special charge of the other officers of the household. Sir Henry Cocks was cofferer to queen Elizabeth. Some of the highest statesmen filled the office up to 1782, when it was suppressed by act of parliament, and the duties of it ordered to be discharged by the lord steward and the paymaster of the household. *Beatson*.

-COFFINS. Athenian heroes were buried in coffins of cedar; owing to its aromatic and incorruptible qualities. *Thucydides*. Coffins of marble and stone were used by the Romans. Alexander is said to have been buried in one of gold; and glass coffins have been found in England. *Gough*. The earliest record of wooden coffins amongst us is that of the burial of king Arthur, who was buried in an entire trunk of oak hollowed, A.D. 542. *Asser*. Patent coffins were invented in 1796. Air-tight metallic coffins were advertised at Birmingham in 1861.

COHORT. A division of the Roman army consisting of about 600 men. It was the sixth part of a legion, and its number, consequently, was under the same fluctuation as that of the legions, being sometimes more and sometimes less. The cohort was divided into centuries. In the time of the empire the cohort often amounted to a thousand men. In the fourth century mention is made of an Italian cohort, probably so called because most of the soldiers belonging to it were Italians.

COIF. The serjeant's coif was originally an iron skull-cap, worn by knights under their helmets. The coif was introduced before 1259, and was used to hide the tonsure of such renegade clergymen as chose to remain advocates in the secular courts, notwithstanding their prohibition by canon. *Blackstone*. The coif was at first a thin linen cover gathered together in the form of a skull or helmet, the material being afterwards changed into white silk, and the form eventually into the black patch at the top of the forensic wig, which is now the distinguishing mark of the degree of serjeant-at-law. *Foss's Lives of the Judges*.

COIN. Homer speaks of brass money as existing 1184 B.C. The invention of coin is ascribed to the Lydians, who cherished commerce, and whose money was of gold and silver. Both were coined by Pheidon, tyrant of Argos, 862 B.C. Money was coined at Rome under Servius Tullius about 573 B.C. The most ancient known coins are Macedonian, of the fifth century B.C.; but others are believed to be more ancient. Brass money only was in use at Rome previously to 269 B.C. (when Fabius Pictor coined silver), a sign that little correspondence was then held with the East, where gold and silver were in use long before. Gold was coined 206 B.C. Iron money was used in Sparta, and iron and tin in Britain. *Dufresnoy*. Julius Cæsar was the first who obtained the express permission of the senate to place his portrait on the coins, and the example was soon followed. In the earlier days of Rome, the heads were those of deities, or of those who had received divine honours.

COIN OF ENGLAND. The first coinage in England was under the Romans at Camalodunum, or Colchester. English coin was of different shapes, as square, oblong, and round, until the middle ages, when round coin only was used. Groats were the largest silver currency until after A.D. 1531. Coin was made sterling in 1216; before which time rents were mostly paid in kind, and money was found only in the coffers of the barons. *Stow*. Queen Elizabeth caused the *base coin* to be recalled and genuine issued in 1560. During the reigns of the Stuarts the coinage was greatly debased by clipping, &c. A commission (lord Somers, sir Isaac Newton, and John Locke) was appointed by William III. to reform the coinage. An act was passed in 1696, withdrawing the debased coin from circulation, and 1,200,000*l.* was raised by a house duty to defray the expense. English and Irish money were assimilated Jan. 1, 1826. The coin of the realm was valued at about twelve millions in 1711. *Davenant*. It was estimated at sixteen millions in 1762. *Anderson*. It was supposed to be twenty millions in 1786. *Chalmers*. It amounted to thirty-seven millions in 1800. *Phillips*. The gold is twenty-eight millions, and the rest of the metallic currency is thirteen millions, while paper largely supplies the place of coin. *Duke of Wellington*, 1830. In 1840 the metallic currency was calculated as reaching forty-five millions; and in 1853 was estimated as approaching, in gold and silver, sixty millions. The amount of gold and silver coin in the world is assumed by the able writer of *The Times'* money articles to be 400,000,000*l.* sterling, of which 250,000,000*l.* are in silver and 150,000,000*l.* are in gold. *Times*, June 25, 1852. Napier's coin-weighing machine at the Bank of England was constructed in 1844. See *Gold and Copper money*. The law respecting coinage offences was consolidated in 1861.

The first gold coins on certain record, struck
42 Hen. III. A.D. 1257
Gold florin first struck, Edward III. (*Camden*) . . . 1337
He introduced gold 6*s.* pieces, and nobles of

6*s.* 8*d.* (hence the lawyer's fee), afterwards
half and quarter nobles.
Old sovereigns first minted 1494
Shillings first coined (*Dr. Kelly*) 1503

COIN OF ENGLAND, *continued*.

Edward IV. coined angels with a figure of Michael and the dragon, the original of George and the dragon.	By the government, 23 Car. II.	1672
Henry VIII. coined sovereigns and half-sovereigns of the modern value.	Guineas first coined, 25 Car. II.	1673
Crowns and half-crowns coined	Double guineas	—
Irish shilling struck	Five guineas	—
Milled shilling of Elizabeth	Half-guineas	—
First large copper coinage, putting an end to the circulation of private leaden pieces, &c.	Quarter-guineas coined, 3 Geo. I.	1716
Modern milling introduced.	Seven-shilling pieces coined	1797
Halfpence and farthings coined	Two-penny copper pieces	1797
	Sovereigns, new coinage	1817
	Half-farthings	1843
	Silver florin	1849
	New bronze coinage issued	Dec. 1, 1860

AMOUNT OF MONEY COINED IN THE FOLLOWING REIGNS :—

Elizabeth	£5,832,000	George III.	74,591,586	Value of ten years (1849-59) gold coinage	£54,490,265
James I.	2,500,000	George IV.	47,782,815	Coined from July 1, 1854 to Dec. 31, 1860—gold 27,632,039 <i>l.</i> , silver 2,432,116 <i>l.</i>	
Charles I.	10,500,000	William IV.	10,827,603	Coined in 1861 : gold, 8,053,069 <i>l.</i> , silver, 200,484 <i>l.</i> , bronze, 273,578 <i>l.</i>	
Cromwell	1,000,000	Victoria, from 1837 to 1843, gold, 20,886,457 <i>l.</i> ; silver, 2,440,614 <i>l.</i>		13 <i>8</i> . <i>4d.</i> (No crowns, half-crowns, or four-penny pieces coined.)	
Charles II.	7,524,100	copper, 43,743 <i>l.</i>			
James II.	3,740,000	1848-1852, gold, silver, and copper, 19,838,377 <i>l.</i>			
William III.	10,511,900	Coined in 1859, 1,547,603 sovereigns, and 2,203,813 half-sovereigns.			
Anne	2,691,626				
George I.	8,725,920				
George II.	11,966,576				

COINING. This operation was originally performed by the metal being placed between two steel dies, struck by a hammer. In 1553, a mill was invented by Antonie Brucher, and introduced into England, 1562. An engine for coining was invented by Balancier, 1617. Great improvements in the art were effected by Boulton and Watt, at Soho, 1788; and by the erection of costly machinery at the Mint, London, commenced in 1811.

COLCHESTER (Essex), *Cannadodunum*, supposed by some authors to be the birthplace of Constantine the Great, and famous in history as a Roman station; it obtained its first charter from Richard I. in 1189. Siege of Colchester in the civil war, when its sixteen churches and all its buildings sustained great damage; the siege continued for ten weeks, when cats, &c., were eaten, 1648. Two of its gallant defenders, sir George Lisle and sir Charles Lisle, were tried and shot after surrendering. The baize manufacture was established here, 1660. *Anderson*. The railway to London was opened in 1843.

COLD. The extremes of heat and cold are found to produce the same perceptions on the skin, and when mercury is frozen at forty degrees below zero, the sensation is the same as touching red-hot iron. During the hard frost in 1740, a palace of ice was built at St. Petersburg. *Greig*. Quicksilver was frozen hard at Moscow, Jan. 13, 1810. Perhaps the coldest day ever known in London was Dec. 25, 1796, when the thermometer was 16° below zero. On Jan. 3, 1854 the thermometer marked 4° below zero, and on Dec. 25, 1860, it fell in some places to 18° and in others to 15° below zero; at Torquay, Devon, 20° below zero. From Dec. 23 to 30 the cold was excessive. See *Frosts, Ice, Congelation, and Regelation*.

COLDINGHAM, near Berwick, is celebrated for the heroism of its nuns, who, on the attack of the Danes, in order to preserve themselves inviolate, cut off their noses and lips, thereby becoming objects of horror to the lustful invaders. The Danes, in revenge, burnt the whole sisterhood, with the abbess Ebba, in their monastery, A.D. 875.

COLDSTREAM GUARDS. General Monk, before marching from Scotland into England to restore Charles II., raised in the town of Coldstream that regiment of royal guards which still bears this name, A.D. 1660. The town is situated at the confluence of the Leet with the Tweed.

COLIN. See *Kolin*.

COLISEUM, or **COLOSSEUM**, at Rome, an elliptical amphitheatre, of which the external diameter is 1641 Italian feet. It is supposed to have been able to contain 80,000 spectators of the fights with wild beasts, and other sports in the arena. It was erected between A.D. 75 (some say 77) and 80, by the emperors Vespasian and Titus, at an expense sufficient to have built a metropolis. Its remains are still very imposing.

COLLAR, generally a gold enamelled chain with ciphers and other devices, having the badge of some order suspended at the bottom. The collar of the order of the Garter consists of SS., with roses enamelled red, within a garter enamelled blue, A.D. 1349-50. The fashion of wearing the collar of SS., in honour of St. Simplicius, began about 1407. One was given to

the mayor of Dublin, Robert Deey, by Charles II., 1660. A second was presented as a royal donation to the chief magistrate of Dublin, the former one having been lost, 1697.

COLLECTS are short prayers introduced into the Roman mass by pope Gelasius, 493, and into the English Liturgy in 1548. The king of England coming into Normandy, appointed a collect for the relief of the Holy Land, 1166. *Rapin.*

COLLEGES. University education preceded the erection of colleges, which were munificent foundations to relieve the students from the expense of living at lodging-houses and at inns. Collegiate or academic degrees are said to have been first conferred at the university of Paris, A.D. 1140; but some authorities say not before 1215. In England, it is contended that the date is much higher, and some hold that Bede obtained a degree formally at Cambridge, and John de Beverley at Oxford, and that they were the first doctors of those universities. See *Cambridge, Oxford, Aberdeen, &c.*

FOUNDED A.D.	Harrow	1585	Physicians, Edinburgh.	1681

COLLEGES IN IRELAND. The new colleges in Ireland endowed by government "for the advancement of learning in that kingdom," have been variously called the Government Colleges, the Queen's Colleges, and, by a section of the Roman Catholics, the "Godless Colleges." They were instituted by act 8 & 9 Vict. c. 66, in 1845, and were designed to afford collegiate education of the highest order to the youth of all religious denominations, and wholly irrespective of religious distinction. The seats of these colleges were fixed at Belfast, Cork, and Galway; the last was opened on Oct. 30, 1849. They were "condemned" by the propaganda and the pope, and by a majority (a small one) of the Irish bishops in a synod held at Thurles, in Sept. 1850.

COLLODION, a film obtained from the solution of gun-cotton in ether. It has been applied to wounds, to exclude the air. The *iodised* collodion extensively employed in photography, was discovered by Mr. F. Scott Archer, and published in the "Chemist," in March, 1851. On the premature death of himself and wife, a pension of 50*l.* per annum was granted by government to his three orphan children.

COLOGNE (*Colonia Agrippina*), on the Rhine, the site of a colony founded by the empress Agrippina, A.D. 50; became a member of the Hanseatic league, 1260. The Jews were expelled from it in 1485, and the Protestants in 1618, and it then fell into decay. Cologne was taken by the French, under Jourdan, Oct. 6, 1794. In the cathedral are shown the heads of the three Magi; and in the church of St. Ursula is the tomb of that saint, and bones said to be those of 11,000 virgins put to death with her. The archbishopric was secularised in 1801, and Cologne was made over to Prussia in 1814. The building of the cathedral, begun in 1248, and suspended in consequence of the Reformation, was vigorously continued by king Frederick William IV. since 1842.

COLOMBIA, a republic of S. America, formed of states which declared their independence of the crown of Spain, Dec. 1819, but its several chiefs afterwards contending against each other, the states became a prey to civil war, and the union was dissolved. See *New Grenada.*

Union of New Grenada and Venezuela, Dec. 17, 1819	Bolivar's return to Bogotà	Nov. 1826
The Royalists wholly overthrown at Carabobo	He assumes the dictatorship	Nov. 23, —

Congress at Lima names Bolivar president of the republic	Aug. 1826	May 26, 1840
		Santander dies

COLOMBO (Ceylon), was built in 1638, by the Portuguese, who were expelled by the Dutch, in 1666; the latter surrendered it to the British, Feb. 15, 1796. The British troops were murdered here in cold blood by the adigar of Candy, June 6, 1803. See *Ceylon.*

COLON (:), a point known to the ancients, but not expressed. The colon and period were adopted and explained by Thrasymachus about 373 B.C. *Suidas*. It was known to Aristotle. The colon and semicolon (;) were both first used in British literature in the 16th century.

COLONEL (from Italian, *colonna*, a column), the highest regimental military officer. The term had become common in England in the 16th century.

COLONIES. The Phœnician and Greek colonies being frequently founded by political exiles, soon became independent of the mother country. The Roman colonies on the contrary continued in close connexion with Rome itself; being governed almost entirely by military law.—The COLONIES OF GREAT BRITAIN partake of both these characters. The N. American colonies revolted in consequence of an injudicious attempt at taxation without their consent in 1764. The loyal condition of the present colonies now is due to the gradual relaxation of the pressure of the home government. The population of the British colonies in all parts of the world was estimated, in 1861, at 142,952,243 (of which 135,442,911 belong to the East Indies). The act for the abolition of slavery in the British colonies, and for compensation to the owners of slaves (20,000,000*l.* sterling), was passed in 1833. All the slaves throughout the British colonies were emancipated on Aug. 1, 1834.

COLOSSEUM, see *Coliseum*. The building in Regent's Park, London, was planned by Mr. Hornor, a land surveyor, and commenced in 1824, by Peto and Grissell, from designs by Decimus Burton. The chief portion is a polygon of 16 faces, 126 feet in diameter externally; the walls are three feet thick at the ground: the height to the glazed dome 112 feet. On the canvas walls of the dome is painted the panoramic view of London, completed in 1829 from sketches by Mr. Hornor taken from the summit of St. Paul's cathedral in 1821-2. The picture covers above 46,000 square feet, more than an acre of canvas. The different parts were combined by Mr. E. T. Parris, who in 1845 repainted the whole. In 1848 a panorama of Paris was exhibited; succeeded, in 1850, by the lake of Thorm in Switzerland; in 1851 the panorama of London was reproduced. In 1848 the theatre with the panorama of Lisbon was added. In 1831, when Mr. Hornor failed, the establishment was sold for 40,000*l.* to Messrs. Braham and Yates. In 1843 it was bought by Mr. D. Montague for 23,000 guineas. *Timbs*. After having been closed for some time, the building was opened to the public at Christmas, 1856, all the several charges being reduced to one shilling. It is now (1862) under the superintendence of Dr. Bachhoffner.

COLOSSUS OF RHODES, a brass statue of Apollo, seventy cubits high, esteemed one of the wonders of the world, was erected at the port of Rhodes in honour of the sun, by Chares of Lindus, disciple of Lysippus, 290 or 288 B.C. It was thrown down by an earth-

quake 227 B.C. The figure stood upon two moles, a leg being extended on each side of the harbour, so that a vessel in full sail could enter between. A winding staircase led to the top, from which could be discerned the shores of Syria, and the ships that sailed on the coast of Egypt. The statue was in ruins for nearly nine centuries, and had never been repaired; when the Saracens taking Rhodes, pulled it to pieces, and sold the metal, weighing 720,900 lbs., to a Jew, who is said to have loaded 900 camels in transporting it to Alexandria about 653. *Dufresnoy.*

COLOUR, according to the Undulatory Theory, put forth by Huyghens (about 1678) and established by Dr. T. Young and others, is to light what pitch is to sound. The shade varies according to the number of vibrations. The number of millions of millions of vibrations in a second attributed to the red end of the spectrum is 458; to the violet, 727. See *Spectrum*.*

COLUMBIA, a federal district round the city of Washington in Maryland: established 1800. In 1850, slavery was abolished therein. It has no political rights. See *British Columbia*.

COMBAT, SINGLE. Trial by this commenced with the Lombards, A.D. 659. *Baronius.* It was introduced into England and was allowed in accusations of treason, if neither the accuser nor the accused could produce evidence of the charge, or of innocence, 9 Will. II. 1096. The first battle by single combat was that fought before the king and the peers between Geoffrey Baynard and William earl of Eu, who was accused by Baynard of high treason; and Baynard having conquered, Eu was deemed convicted. The last combat proposed was between lord Reay and David Ramsay, in 1631, but the king prevented it. See *High Constable* and *Appeal of Battle*. The same method of trial had also existence in *Ireland*. A trial was appointed between the prior of Kilmainham and the earl of Ormond, the former having impeached the latter of high treason; but the quarrel having been taken up by the king, was decided without fighting, 1446. Remarkable combat in Dublin castle, before the lords justices and council, between Connor MacCormack O'Connor and Teig Mac-Gilpatrick O'Connor, in which the former had his head cut off, and presented to the lords justices, 1553.

COMBINATION. Laws were enacted from the time of Edward I. downwards, regulating the price of labour and the relations between masters and workmen, and prohibiting the latter from *combining* for their own protection. All these laws were repealed in 1825, due protection being given to both parties. The act was amended in 1859, when the subject was much discussed, in consequence of the strike of the building trades.

COMEDY. Thalia is the muse of comedy and lyric poetry. Susarion and Dolon were the inventors of theatrical exhibitions, 562 B.C. They performed the first comedy at Athens, on a waggon or moveable stage, on four wheels, for which they were rewarded with a basket of figs and a cask of wine. *Arundelian Marbles.* Aristophanes was called the prince of ancient comedy, 434 B.C., and Menander that of the new, 320 B.C. Of Plautus, 20 comedies are extant; he flourished 220 B.C. Statius Cæcilius wrote upwards of 30 comedies; he flourished at Rome 180 B.C. The comedies of Lælius and Terence were first acted 154 B.C. The first regular comedy was performed in England, about A.D. 1551. It was said of Sheridan that he wrote the best comedy (the *School for Scandal*), the best opera (the *Duenna*), and the best afterpiece (the *Critic*), in the English language (1775-1779). See *Drama*.

COMETS (Greek *comē*, a hair). It is recorded that more than 600 have been seen. Mr. Hind in his little work on comets, gives a chronological list. The first discovered and described accurately was by Nicéphorus. At the birth of the great Mithridates two large comets appeared, which were seen for seventy-two days together, whose splendour eclipsed that of the mid-day sun, and which occupied the fourth part of the heavens, 135 (or 130) B.C. *Justin.* A grand comet was seen in 1264. Its tail is said to have extended 100°. It is considered to have re-appeared in 1556, with diminished splendour; and was expected to appear again about Aug. 1858 or Aug. 1860. *Hind.* A remarkable one was seen in England, June 1337. *Stow.* Comets were first rationally explained by Tycho Brahe, who, about 1577, demonstrated that comets are extraneous to our atmosphere. A comet, which terrified the people from its near approach to the earth, was visible from Nov. 3, 1679, to March 9, 1680. The orbits of comets were proved to be ellipses by Newton, 1704. A most brilliant comet appeared in 1769, which passed within two millions of miles of the earth.†

* Some persons (about 65 out of 1154) cannot distinguish between colours, and are termed *colour blind*. In 1859 Professor J. Clerk Maxwell invented spectacles to remedy this defect, which is also called "Daltonism," after John Dalton, the chemist to whom scarlet appeared drab-coloured.

† This beautiful comet, moving with immense swiftness, was seen in London; its tail stretched across the heavens, like a prodigious luminous arch, thirty-six millions of miles in length. The brilliant pheno-

One still more brilliant appeared in Sept. Oct. and Nov. 1811, visible all the autumn to the naked eye. Another in 1823.

HALLEY'S COMET. Named after one of the greatest astronomers of England. He first proved that many of the appearances of comets were but the periodical returns of the same bodies, and he demonstrated that the comet of 1682 was the same with the comet of 1456, 1531 and 1607, deducing this fact from a minute observation of the first mentioned comet, and being struck by its wonderful resemblance to the comets described as having appeared in those years: Halley, therefore, first fixed the identity of comets, and predicted their periodical returns. *Vince's Astronomy.* The revolution of Halley's comet is performed in about 75 years; it appeared in 1759, and came to its perihelion on March 13; its last appearance was 1835.

ENCKE'S COMET. First discovered by M. Pons, Nov. 26, 1818, but justly named by astronomers after professor Encke, for his success in detecting its orbit, motions, and perturbations; it is, like the preceding, one of the three comets which have appeared according to prediction, and its revolutions are made in three years and fifteen weeks.

BIELA'S COMET has been an object of fear to many on account of the nearness with which it has approached, not the earth, but a point of the earth's path; it was first discovered by M. Biela, an Austrian officer, Feb. 28, 1826. It is one of the three comets whose re-appearance was predicted, its revolution being performed in six years and

thirty-eight weeks. Its second appearance was in 1832, when the time of its perihelion passage was Nov. 27; its third was in 1839; its fourth in 1845; and its fifth in 1852.

DONATI'S COMET, so called from its having been first observed by Dr. Donati, of Florence, June 2, 1858, being then calculated to be 228 millions of miles from our earth. It was very brilliant in England in the end of September and October following, when the tail was said to be 40 millions of miles long. On the 10th of October it was nearest to the earth; on the 18th it was near coming into collision with Venus. Opinions varied as to this comet's brilliancy compared with that of 1811.

The **GREAT COMET** of 1861 was first seen by Mr. Tebbutt at Sydney in Australia, May 23; by M. Goldschmidt and others in France and England on June 29, 30. The nucleus was about 400 miles in diameter, with a long bush like tail, travelling at the rate of 10 million miles in 24 hours. On June 30, it was suggested that we were in the tail, there being "a phosphorescent auroral glare."

A tailless comet was discovered in the constellation Cassiopeia, by M. Seeling at Athens on July 2, and by M. Tempel at Marseilles July 2 and 3, 1862.

M. Rosa (at Rome) discovered a comet on July 25, 1862. It was visible by the naked eye in August and September.

COMMANDER-IN-CHIEF. This office in the British army has been very frequently vacant, and sometimes for several years consecutively. When the duke of Wellington resigned the office, on becoming minister, in 1828, his grace's successor, lord Hill, assumed the rank of commander of the forces, or general commanding in chief.

CAPTAINS-GENERAL

Duke of Albemarle	1660
Duke of Monmouth	1678
Duke of Marlborough	1702
Duke of Ormond	1711
Duke of Marlborough, again	1724
Duke of Cumberland	1744
Duke of York	1799

COMMANDERS-IN-CHIEF

Gen. Seymour Conway	1782
Lord Amherst, again	1793
Frederick, duke of York	1795
Sir David Dundas	March 25, 1809
Frederick, duke of York, again	May 29, 1811
Duke of Wellington	Jan. 22, 1827
Lord Hill, general commanding in chief	Feb. 25, 1828
Duke of Wellington, again	Dec. 28, 1842
Viscount Hardinge (died Sept. 24, 1856), general commanding in chief	Sept 28, 1852
Duke of Cambridge, commander in chief (the PRESENT, 1862)	July 15, 1856

COMMENDAM. By 6 & 7 Will. IV. c. 77, future bishops were prohibited from holding *in commendam* the livings, &c. they held when consecrated.

COMMERCE flourished in Arabia, Egypt, and among the Phenicians in the earliest ages. In later times it was spread over Europe by a confederacy of maritime cities, A.D. 1241. See *Hanse Towns*. The discoveries of Columbus, and the enterprises of the Dutch and Portuguese, enlarged the sphere of commerce, and led other nations, particularly England, to engage extensively in its pursuit. See the various articles connected with this subject through the volume. The first treaty of commerce made by England with any foreign nation was entered into with the Flemings, 1 Edw. I. 1272. The second was with Portugal and Spain, 2 Edw. II. 1308. *Anderson.* See *Treaties*. Hertslett's Collection in 10 vols. 8vo., published 1827-59, has a copious index. An important commercial treaty was concluded with France in 1860.

COMMISSION. See *High Court of Commission*.

COMMISSIONAIRES. The street messengers thus named (pensioners wounded either in the Crimea or India) were first employed in the west-end of London. They were

menon that accompanies a comet, and which we call the tail, is a vast stream of light. The computed length of that which appeared in 1811, and which was so remarkably conspicuous, was, on October 15, according to the late Dr. Herschel, upwards of one hundred millions of miles, and its apparent greatest breadth, at the same time, fifteen millions of miles. *Philos. Trans. Royal Soc. for 1812.*

* M. Babinet, on May 4, 1857, considered that comets had so little density that the earth might pass through the tail of one without our being aware of it.

appointed by a society, founded in Feb. 1859 by capt. Edward Walter, which is now under the patronage of the queen and the commander-in-chief. The charges are regulated by a tariff. In Jan. 1861 the society commenced the gratuitous issue of a Monthly Advertising Circular. Commissionaires have long existed in France.

COMMON COUNCIL OF LONDON. Its formation commenced about 1208. The charter of Henry I. mentions the *folk-mote*, this being a Saxon appellation, and which may fairly be rendered the court or assembly of the people. The general place of meeting of the *folk-mote* was in the open air at St. Paul's Cross, St. Paul's churchyard. It was not discontinued till after Henry III.'s reign; when certain representatives were chosen out of each ward, who, being added to the lord mayor and aldermen, constituted the court of common council. At first only two were returned for each ward; but the number was enlarged in 1347, and since. This council became the parent of similar institutions throughout the realm. It is elected annually on Dec. 21, St. Thomas's day. A *Common Hall* is held occasionally. The common council supported the prince of Orange in 1688; and queen Caroline in 1820.

COMMON LAW OF ENGLAND, an ancient collection of unwritten maxims and customs (*Leges non scriptæ*), of British, Saxon, and Danish origin, which has subsisted immemorably in this kingdom; and although somewhat impaired by the rude shock of the Norman conquest, has weathered the violence of the times. This endeared it to the people in general, as well because its decisions were universally known, as because it was found to be excellently adapted to the genius of the English nation; and accordingly, at the famous parliament of Merton, 1236, "all the earls and barons," says the parliament roll, "with one voice answered, that they would not change the laws of England, which have hitherto been used and approved;" eminently the law of the land. See *Bastard*.

COMMON LAW COURTS. The process, practice, and mode of pleading in the superior courts of common law, were amended in 1852 and 1854.

COMMON PLEAS, COURT OF, IN ENGLAND. This court in ancient times followed the king's person, and is distinct from that of the King's Bench; but on the confirmation of *Magna Charta* by king John, in 1215, it was fixed at Westminster, where it still continues. In it are debated all controversies, in matters civil, between subject and subject, according to law. Here real actions are pleadable; and this court may grant prohibitions, as the court of King's Bench does. In personal and mixed actions it has a concurrent jurisdiction with that court; but no cognisance of pleas of the crown. *Blackstone*. By 3 & 4 Will. IV. c. 39 (1833), the mode of procedure in all the superior courts was made uniform. In England, no barrister under the degree of a serjeant could plead in the court of common pleas; the serjeants-at-law enjoying the exclusive right. In 1846 the privilege was extended to barristers practising in the superior courts at Westminster.

CHIEF JUSTICES OF THE COMMON PLEAS OF ENGLAND (*from the reign of Elizabeth*).

1558. Sir Anthony Browne.	1689. Sir Henry Pollexfen.	1804. Sir James Mansfield, Apr. 21.
1559. Sir James Dyer.	1692. Sir George Treby.	1814. Sir Vicary Gibbs, Feb. 24.
1582. Sir Edmund Anderson.	1701. Sir Thomas Trevor, afterwards lord Trevor.	1818. Sir Robert Dallas, Nov. 5.
1605. Sir Francis Gawdy.	1714. Sir Peter King, afterwards lord chancellor King.	1824. Sir Robert Gifford, Jan. 9 (lord Gifford); aft. master of the rolls.
1606. Sir Edward Coke.	1725. Sir Robert Eyre.	— Sir William Draper Best, aft. lord Wynford, April 15.
1613. Sir Henry Hobart.	1736. Sir Thomas Reeve.	1829. Sir Nicolas C. Tindal, June 9; died July, 1846.
1626. Sir Thomas Richardson.	1737. Sir John Willes.	1846. Sir Thomas Wilde, July 11; aft. lord chancellor Truro.
1631. Sir Robert Heath.	1761. Sir Charles Pratt, afterwards lord chancellor Camden.	1850. Sir John Jervis, July 16; died November 1, 1856.
1634. Sir John Finch.	1766. Sir John Eardley Wilmot.	1856. Sir Alexander Cockburn, Nov. 15; made chief justice of the Queen's Bench, June, 1859.
1639. Sir Edward Lyttleton.	1771. Sir William de Grey, afterwards lord Walsingham.	1859. Sir William Eric, June. The PRESENT (1862) chief justice.
1640. Sir John Banks.	1780. Alexander Wedderburne, afterwards lord chancellor Loughborough.	
1648. Oliver St. John.	1793. Sir James Eyre.	
1660. Sir Orlando Bridgman, afterwards lord keeper.	1799. Sir John Scott, afterwards lord chancellor Eldon.	
1668. Sir John Vaughan.	1801. Sir Richard Pepper Arden (lord Alvanley), May 22.	
1675. Sir Francis North, afterwards lord keeper Guilford.		
1683. Sir Francis Pemberton.		
— Sir Thomas Jones.		
1686. Sir Henry Bedingfield.		
1687. Sir Robert Wright.		
— Sir Edward Herbert.		

The COURT OF COMMON PLEAS IN IRELAND is similarly constituted to the court in England, but always was open to the profession at large.

CHIEF JUSTICES OF THE COMMON PLEAS IN IRELAND (*since the Revolution*).

1691. Richard Pyne, Jan. 5.	1701. Sir Richard Cox, May 4.	1714. John Forster, Sept. 30.
1695. Sir John Hely, May 10.	1703. Robert Doyne, Dec. 27.	1720. Sir Richard Levinge, Oct. 13.

COMMON PLEAS, COURT OF, IN IRELAND, *continued*.

1724. Thomas Wyndham, Oct. 27.	1765. Richard Clayton, Feb. 21.	1827. Lord Plunket, June 18.
1726. William Whitshed, Jan. 23.	1770. Marcus Patterson, June 18.	1830. John Doherty, Dec. 23.
1727. James Reynolds, Nov. 8.	1787. Hugh Carleton, aft. viscount	1850. James Henry Monahan, Sept.
1740. Henry Singleton, May 11.	Carleton, April 30.	23. The PRESENT (1862)
1754. Sir William Yorke, Sept. 4.	1800. John Toler, afterwards lord	chief justice.
1761. William Aston, May 5.	Norbury, Oct. 22.	

COMMON PRAYER, BOOK OF, was ordered by parliament to be printed in the English language in 1548. It was voted out of doors by parliament, and the Directory (*which see*) set up in its room in 1644, and a proclamation was issued against it in 1647. With a few changes the Common Prayer-book is used by the episcopal churches in Scotland and the United States of North America.

The King's Primer published	1545	The <i>State services</i> (which had never formed part of the Prayer-book, but were annexed to it at the beginning of every reign) for November 5 (Gunpowder treason); January 30 (Charles I.'s execution), and May 29 (Charles II.'s restoration), were ordered to be discontinued on January 17, 1859.
First book of Edward VI. printed	1549	
Second book of Edward VI.	1552	
First book of Elizabeth	1559	
King James's book	1604	
Scotch book of Charles I.	1637	
Charles II.'s book (<i>Savoy Conference</i>)	1662	
(The one, with alterations, now in use.)		

COMMONS, HOUSE OF, the great representative assembly of the people of Great Britain, originated with Simon de Montfort, earl of Leicester, who by the Provisions of Oxford ordered returns to be made of two knights from every shire, and deputies from certain boroughs to meet such of the barons and clergy as were his friends, with a view thereby to strengthen his own power in opposition to that of his sovereign Henry III. This was the first confirmed outline of a house of commons, and the first commons were summoned to meet the king in parliament, 42 & 43 Hen. III., 1258. *Stowe*. The first parliament formally convened was the one summoned 49 Hen. III., Jan. 23, 1265; and writs of the latter date are the earliest extant. Some historians date the first regularly constituted parliament from the 22nd of Edward I., 1294. The first recorded speaker of the house of commons was Peter de Montfort in 1260; he was killed at the battle of Evesham in 1265; but sir Peter de la Mare is said to have been the first regular speaker, in 1376. The following is the constitution of the house of commons since the passing of the Reform Bill in 1832:—

ENGLISH.—County members	144	English and Welsh	502
Universities	4	SCOTCH.—County members	30
Cities and boroughs	325—473	Cities and boroughs	23—53
WELSH.—County members	15	IRISH.—County members	64
Cities and boroughs	14—29	University	2
English and Welsh	502	Cities and boroughs	39—105
		Total (see <i>Parliament</i>)	660*

CONSTITUENCY OF THE UNITED KINGDOM IN 1851.

[Population, 27,452,252.]

	<i>Electors.</i>		<i>Electors.</i>
ENGLAND.—County	461,463	England and Wales	887,866
Borough	378,384—839,847	SCOTLAND.—County	48,456
WALES.—County	36,984	borough	41,849—90,305
Borough	11,035—48,019	IRELAND.—County	31,832
England and Wales	887,866	borough	49,234—72,066
		Constituency	1,050,273

In 1859 Mr. Newmarch estimated the constituency of England and Wales at 934,000.

COMMONWEALTH OF ENGLAND. The term is applied to the interregnum between the death of Charles I. and the restoration of Charles II. The form of the government was changed to a republic on the execution of Charles I., Jan. 30, 1649,—a new oath called the "Engagement" was framed, which the people were obliged to take.† *Salmon*. Oliver

* In 1848 Sudbury, and in 1852 St Alban's were disfranchised for bribery and corruption; each having previously returned two members; the aggregate number of the house then became 656. In 1861, the forfeited seats were thus distributed by act of parliament—two additional to the west riding of York, one additional to south Lancashire, and one to a newly created borough, Birkenhead.

† By this oath they swore to be true and faithful to the commonwealth, without king or house of lords. The statues of Charles were next day demolished, particularly that at the Royal Exchange, and one at the west end of St. Paul's, and in their room the following inscription was conspicuously set up:—*"Erit Tyrannus Regum ultimus, Anno Libertatis Angliæ Restitutæ Prius, Anno Dom. 1648, Jan. 30."*

Cromwell was made Protector, Dec. 16, 1653. Richard Cromwell was made Protector, Sept. 3, 1658. Monarchy was restored in the person of Charles II., who entered London, May 29, 1660. See *Rome*.

COMMUNION, one of the names given to the ordinance of the Lord's supper, in the primitive church. Communicating under the form of bread alone is said to have had its rise in the West, under pope Urban II., 1096. The fourth Lateran council, 1215, decreed that every believer should receive the communion at least at Easter. The cup was first denied to the laity by the council of Constance, 1453. The communion service, as now performed in the church of England, was instituted in 1548.

COMMUNISTS. See *Socialists*.

COMPANIES.* Among the earliest commercial companies in England may be named the Steel-yard Society, established A.D. 1232. The second company was the merchants of St. Thomas à Becket, in 1248. *Stow*. The third was the Merchant Adventurers, incorporated by Elizabeth, 1564. The following are the city companies of London, in the order of precedence; the first twelve are the chief, and are styled "the Honourable." Several companies are virtually extinct, and many of the dates are of doubtful authenticity.

1. Mercers . . . A.D. 1393	25. Sadlers . . . A.D. 1280	49. Upholders . . . A.D. 1627	73. Wheelwrights . . . A.D. 1670
2. Grocers . . . 1345	26. Carpenters . . . 1344	50. Musicians . . . 1604	74. Distillers . . . *
3. Drapers . . . 1430	27. Cordwainers . . . 1410	51. Turners . . . 1604	75. Hatband-makers . . . 1638
4. Fishmongers . . . 1284	28. Paper-stainers . . . 1580	52. Basket-makers . . . *	76. Pattern-makers . . . 1670
5. Goldsmiths . . . 1327	29. Curriers . . . 1605	53. Glaziers . . . 1637	77. Glass-sellers . . . 1664
6. Skinners . . . 1327	30. Masons . . . 1677	54. Horners . . . 1638	78. Tobacco-pipe-makers . . . 1663
7. Merchant Tailors . . . 1426	31. Plumbers . . . 1611	55. Farriers . . . 1673	79. Coach and Harness makers . . . 1677
8. Haberdashers . . . 1447	32. Inn-holders . . . 1515	56. Paviers . . . *	80. Gunmakers . . . 1638
9. Salters . . . 1358	33. Founders . . . 1614	57. Lorimers . . . 1488	81. Gold and silver wire-drawers . . . 1623
10. Ironmongers . . . 1464	34. Poulterers . . . 1503	58. Apothecaries . . . 1617	82. Bowstring-makers . . . *
11. Vintners . . . 1437	35. Cooks . . . 1481	59. Shipwrights . . . 1610	83. Card-makers . . . 1609
12. Clothworkers . . . 1482	36. Coopers . . . 1501	60. Spectacle-makers . . . 1630	84. Fan-makers . . . 1709
13. Dyers . . . 1469	37. Tilers and Bricklayers . . . 1568	61. Clock-makers . . . 1632	85. Wood-mongers . . . *
14. Brewers . . . 1438	38. Bowyers . . . 1620	62. Glovers . . . 1556	86. Starch-makers . . . 1632
15. Leather-sellers . . . 1442	39. Fletchers . . . 1536	63. Comb-makers . . . 1650	87. Fishermen . . . 1687
16. Pewterers . . . 1474	40. Blacksmiths . . . 1577	64. Felt-makers . . . 1604	88. Parish clerks . . . 1232
17. Barber Surgeons . . . 1308	41. Joiners . . . 1564	65. Framework-knitters . . . 1664	89. Carmen . . . *
18. Cutlers . . . 1417	42. Weavers . . . 1164	66. Silk-throwsters . . . 1629	90. Porters . . . *
19. Bakers . . . 1307	43. Woolmen . . . *	67. Silk-men . . . 1608	91. Watermen . . . 1556
20. Wax-chandlers . . . 1484	44. Scriveners . . . 1616	68. Pin-makers . . . 1636	
21. Tallow-chandlers . . . 1463	45. Fruiterers . . . 1604	69. Needle-makers . . . 1656	
22. Armourers and Braziers . . . 1463	46. Plasterers . . . 1500	70. Gardeners . . . 1616	
23. Girdlers . . . 1448	47. Stationers . . . 1556	71. Soap-makers . . . 1638	
24. Butchers . . . 1604	48. Embroiderers . . . 1591	72. Tinsplate-workers . . . 1670	

COMPASS, MARINER'S, is said to have been known to the Chinese, 1115 B.C. The invention is by some ascribed to Marco Polo, a Venetian, A.D. 1260; by others to Flavio Gioja, of Amalfi, a navigator of Naples, about 1300.† Until this time the needle was laid upon a couple of pieces of straw, or small split sticks, in a vessel of water; Gioja introduced the suspension of the needle as we have it now, 1302. It is also said to have been known to the Swedes in the time of king Jarl Birger, 1250. Its variation was discovered first by Columbus, 1492; afterwards by Sebastian Cabot, 1540. The compass-box and hanging compass used by navigators were invented by William Barlowe, an English divine and natural philosopher, in 1608. See *Magnetism*. The *measuring* compass was invented by Jost Bing, of Hesse, in 1602.

COMPIEGNE, an ancient French city north of Paris, the residence of the Carolingian kings. During the siege of this place, Joan of Arc was captured by the English, May 24, 1430. The emperor Napoleon III. and the king of Prussia met here on Oct. 6, 1861.

COMPLUTENSIA BIBLE. See *Polyglot*.

COMPOSITE ORDER, principally a mixture of the Corinthian and Ionic, and also called the Roman order, is of uncertain date.

COMTE PHILOSOPHY. See *Positive Philosophy*.

* Bubble companies have been formed, commonly by designing persons. Law's bubble, in 1720-1, was perhaps the most extraordinary of its kind, and the *South Sea Bubble*, in the same year, was scarcely less memorable for its ruin of thousands of families.—Many companies were established in these countries in 1824 and 1825, and turned out to be bubbles. Immense losses were incurred by individuals and the families of thousands of speculators were totally ruined. Many of our railway enterprises (1844-5) may be termed bubbles. See *Law's Bubble*; *South Sea*; *Railways*; *Joint-Stock Companies*.

† The statement that the *flour-de-lis* was made the ornament of the northern point of the compass in compliment to Charles the king of Naples at the time of the discovery has been contradicted.

CONCEPTION, IMMACULATE. A festival (on Dec. 8) appointed in 1389, is observed with great devotion in the Roman Catholic Church in honour of the Virgin Mary's having been conceived and born immaculate, or without original sin. Pope Paul V. in 1617 forbade any one to stand up against the opinion of the immaculate conception; this order was confirmed by Gregory XV. and by Alexander VII. *Hénault*. On the 8th of December, 1854, the pope promulgated a bull with great solemnity and pathos, declaring this dogma to be an article of faith, and charging with heresy those who should doubt it or speak against it.—The CONCEPTIONISTS were an order of nuns in Italy, established in 1488.

CONCERTINA, a musical instrument invented by professor Wheatstone, about 1825, and improved by Mr. G. Case and others. The sounds are produced by free vibrating springs of metal.

CONCERTS. The Filarmonia gave concerts at Vicenza in the 16th century. The first public subscription concert was performed at Oxford, in 1665, and attended by many persons of rank and talent from every part of England. The first concert of a like kind performed in London was in 1678. The Academy of Ancient Music began in 1710; the Concerts of Ancient Music in 1776; and the present Philharmonic Society in 1813. See *Crystal Palace* and *Handel*.

CONCHOLOGY, the science of shells, is mentioned by Aristotle and Pliny. It was first reduced to a system by John Daniel Major, of Kiel, who published his classification of the *Testacea* in 1675. Lister's system was published in 1685; and that of Largius in 1722. Johnston's Introduction (1850) and Sowerby's Manual of Conchology (1842), are useful. Forbes and Hanley's "British Mollusca and their Shells" (1848-53) is a magnificent work.

CONCLAVE. This term is derived from the conclave, a range of small cells in the hall of the Vatican, or palace of the pope of Rome, where the cardinals usually meet to elect a pope, and is also used for the assembly of the cardinals shut up for the purpose. The conclave had its rise in A.D. 1271. Clement IV. having died at Viterbo in 1268, the cardinals were nearly three years unable to agree in the choice of a successor, and were on the point of breaking up, when the magistrates, by the advice of St. Bonaventure, then at Viterbo, shut the gates of their city, and locked up the cardinals in the pontifical palace till they agreed. Hence the custom of shutting up the cardinals while they elect a pope.

CONCORDANCE TO THE BIBLE. An index or alphabetical catalogue of all the words, and also a chronological account of all the transactions of that sacred volume. The first concordance was made under the direction of Hugo de St. Charo, who employed as many as 500. monks upon it, A.D. 1247. *Abbé Lenglet*. Cruden's well-known Concordance was published in London in 1737.* The concordat between the emperor Henry V. of Germany and pope Calixtus II., in 1122, has been regarded as the fundamental law of the church in Germany.

CONCORDAT. The name is given to an instrument of agreement between a prince and the pope, usually concerning benefices. The celebrated concordat between Napoleon Bonaparte and Pius VII., signed at Paris, July 15, 1801, re-established the Catholic Church and the papal authority in France. Napoleon was made in effect the head of the Gallican Church, as bishops were to have their appointments from him and their investiture from the pope. Another concordat between Bonaparte and the same pontiff was signed at Fontainebleau, Jan. 25, 1813. These concordats were almost nullified in 1817 and 1819. A very important concordat was signed Aug. 18, 1855, between Austria and Rome, by which a great deal of the liberty of the Austrian church was given up to the Papacy. It caused much public dissatisfaction.

CONCUBINES were tolerated among the Jews, Greeks, and Romans, but strictly forbidden by Christ and his apostles (*Mark* x. 1 *Cor.* vii. 2). They are mentioned as having been allowed to the priests, A.D. 1132. Cujas observes that, although concubinage was beneath marriage, both as to dignity and civil effects, yet concubine was a reputable title, very different from that of mistress among us. See *Morganatic Marriage*.

CONDOTTIERI, *conductors* or leaders of mercenaries, became so troublesome in Italy in the middle ages, that the various cities formed a league to suppress them in 1342.

CONDUITS. Two remarkable conduits, among a number of others in London, existed early in Cheapside. The Great Conduit was the first cistern of lead erected in the city, and

* Verbal Indexes accompany good editions of the ancient Classics. An Index to Shakspeare by Ayscough, appeared in 1790; another by Twiss in 1805; and Mrs. Cowden Clarke's (date Mary Novello) Complete Concordance to Shakspeare (on which she spent 16 years' labour) in 1847.

was built in 1285. At the procession of Anna Boleyn on the occasion of her marriage, it ran with white and claret wine all the afternoon, June 1, 1533. *Stow.*

CONFEDERATES, the name given to the states which seceded from the United States in 1860-1. See *Southern Confederacy*.

CONFEDERATION AT PARIS, July 14, 1790. See *Champs de Mars* and *Bastille*.

CONFEDERATION OF THE RHINE. The League of the Germanic States, formed by Napoleon Bonaparte, in 1806, when he abolished the Holy Roman empire, and the emperor of Germany became emperor of Austria. It consisted of the kingdoms of Bavaria, Wurtemberg, Saxony, and Westphalia; seven grand-duchies; six duchies; and 20 principalities. The German princes collectively engaged to raise 258,000 troops to serve in case of war, and established a diet at Frankfort, July 12, 1806. This league terminated with the career of Bonaparte in 1814. See *Germanic Confederation*.

CONFERENCES. The great religious conference was held at Hampton Court Palace, between the prelates of the church of England and the dissenting ministers, in order to effect a general union, at the instance of the king, James I. Jan. 14-16, 1604. It led to a new translation of the Bible, which was executed in 1607-11, and is that now in general use in England and the United States. During the meeting some alterations in the Church liturgy were agreed upon; but these not satisfying the dissenters, nothing more was done.—Another conference of the bishops and presbyterian ministers with the same view was held in the *Savoy*, April 25 to July 25, 1661. The dissenters' objections were generally disallowed, but some alterations were recommended in the Prayer-book. See *Wesleyans*.

CONFESSIONAL. See *Auricular Confession*.

CONFESSIONS OF FAITH, OR CREEDS. See *Apostles'*, *Nicene* (A.D. 325), and *Athanasian* (about 434) *Credo*s.

The confession of faith of the Greek Church was presented to Mahommed II. in 1453. This gave way in 1643 to one composed by Mogila, metropolitan of Kiev, which is the present standard of the Russo-Greek Church.

The Creed of Pius IV., composed of the Nicene Creed, with additional articles which embody all the peculiar dogmas of the Roman Catholic Church, published by the Council of Trent

The Church of England retains the Apostles', Nicene, and Athanasian creeds, with the

addition of 42 Articles (*which see*), in 1552; reduced to 39 . . . 1563

The confession of Augsburg (that of the Lutherans) was drawn up principally by Melancthon in 1530, and has since undergone modifications—the last of which is called the "Form of Concord" . . . 1579

The Westminster Confession was agreed to in 1643; and adopted by the Presbyterian Church of Scotland. See *Westminster* . . . 1647

The Congregational Dissenters published a Declaration of Faith . . . 1635

CONFIRMATION, OR LAYING ON HANDS, was practised by the apostles, A.D. 34 and 56 (*Acts viii. 17; xix. 6*), and was general, according to some church authorities, in A.D. 190. In the church of England it is the public profession of the Christian religion by an adult person, who has been baptized in infancy. It is made a sacrament by the church of Rome.

CONFLANS (near Paris), **TREATY OF**, between Louis XI. of France, and the dukes of Bourbon, Brittany, and Burgundy. By these provisions Normandy was ceded to the duke of Berry, 1465. The treaty which put an end to the "War of the Public Good," was confirmed by that of Peronne, with other stipulations, in 1468.

CONGÉ D'ÉLIRE (permission to elect), the licence of the sovereign, as head of the church, to chapters and other bodies, to elect dignitaries, particularly bishops, 26 Hen. VIII. 1535. After the interdict of the pope upon England had been removed in 1214, king John had an arrangement with the clergy for the election of bishops.

CONGELATION, the act of freezing. Ice was produced in summer by means of chemical mixtures, by Mr. Walker, in 1783. The congelation of quicksilver was effected without snow or ice, in 1787. In 1810 Leslie froze water in an air-pump by placing a vessel of sulphuric acid under it. Numerous freezing mixtures have been discovered since. Intense cold is produced by the aërication of liquefied carbonic acid gas. In 1857 Mr. Harrison patented a machine for manufacturing ice for commercial purposes, by means of ether and salt water, and made large blocks. In 1860, M. Carré devised a method of freezing to 60° below zero by making water in a close vessel absorb and give off the gas ammonia. Siebe's ice-making machine, exhibited at the International Exhibition of 1862, excited much admiration.

CONGREGATION OF THE LORD. A name taken by the Scotch Reformers, headed by John Knox, about 1546. Their leaders (the duke of Argyle, &c.) were called Lords of the Congregation about 1577.

CONGREGATIONALISTS. See *Independents*.

CONGRESS. An assembly of princes or ministers for the settlement of the affairs of nations or of a people. The following were the most remarkable congresses of Europe :—

Munster	1648	Rastadt	Dec. 9, 1797	Laybach	May 6, 1821
Nimeguen	1678	Chatillon	Feb. 5, 1814	Verona	Aug. 25, 1822
Ryswick	1697	Vienna	Nov. 3, —	Paris	Jan. 16, April 22, 1856
Utrecht	1713	Aix-la-Chapelle	Oct. 9, 1818		
Soissons	1728	Carlsbad	Aug. 1, 1819		See <i>Alliances, Conventions, &c.</i>
Antwerp	April 8, 1793	Troppau	Oct. 20, 1820		

The first general congress of the UNITED STATES of AMERICA, preparatory to their declaration of independence, when strong resolutions were passed, also a petition to the king, and an address to the people of England, was held Sept. 5, 1774. The second was held May 10, 1775; the third, when the independence was declared July 4, 1776.

The first federal American congress, under the

constitution, was held at New York, George Washington, President March, 1789. The first congress of the seceding Southern States was held at Montgomery, Alabama, Feb. 4; it elected Jefferson Davis president of the Confederate States on Feb. 9. For political reasons, it adjourned, on May 24, to meet at Richmond, in Virginia, on July 20, 1861.

CONGREVE ROCKETS. Invented by general sir William Congreve, in 1803. They were used with great effect in the attack upon Boulogne, Oct. 8, 1806, when they set a part of the town on fire, which burned for two days : they were employed in various operations in the French war with much success, by a corps called rocket-men.

CONIC SECTIONS. Their more remarkable properties were probably known to the Greeks four or five centuries before the Christian era. The study of them was cultivated in the time of Plato, 390 B.C. The earliest treatise on them was written by Aristeus, about 330 B.C. Apollonius's eight books were written about 240 B.C. The parabola was applied to projectiles by Galileo; the ellipse to the orbit of planets, by Kepler.

CONJURATION. See *Witchcraft*.

CONNECTICUT granted to lords Say, and Brooke, 1631. See *America and United States*.

CONNOR, BISHOPRIC OF, in Ireland. The see was united to that of Down, A.D. 1442. The first prelate was Angus Macnisius, who died A.D. 507. The united sees were added to Dromore on the death of the last bishop of the latter, in accordance with the provisions of the Irish Church Temporalities' act, passed 1833.

CONQUEST, THE. The memorable era in British history, when William duke of Normandy overcame Harold II. at the battle of Hastings, Oct. 14, 1066, and obtained the crown which had been most unfairly bequeathed to him by Edward the Confessor (for Edgar was the rightful heir). William has been erroneously styled the *Conqueror*, for he succeeded to the crown of England by *compact*. He defeated Harold, who was himself a usurper, but a large portion of the kingdom afterwards held out against him; and he, unlike a conqueror, took an oath to observe the laws and customs of the realm, in order to induce the submission of the people. Formerly our judges were accustomed to reprehend any gentleman at the bar who said casually William the conqueror, instead of William I. *Selden*. Maclise exhibited forty-two drawings on the events of the Norman conquest, in May, 1857.

CONSCIENCE, COURTS OF, or REQUESTS, first constituted by a statute of Henry VII. 1493, and re-organised by statute 9 Hen. VIII. 1517. These courts were improved and amended by various acts; their jurisdiction in London reached to 5*l.* and (until superseded by county-courts) to 40*s.* in other towns. The practice was by summons, and if the party did not appear, the commissioners had power to apprehend and commit. See *County Courts*.—James II. proclaimed Liberty of Conscience in 1687.

CONSCRIPT FATHERS (*Patres conscripti*) was the honourable designation given to the Roman senators, because their names were written in the registers of the senate.

CONSCRIPTION, a mode (derived from the Romans) adopted for recruiting the French and other armies. In 1798, a military conscription took place in France comprehending all the young men from 20 to 25 years of age : from these selections were made. The present law of 1818, (modified in 1824 and 1832) requires a certain annual contingent from each department,—for all the country, 80,000 men,—which may be increased. The duration of service is seven years. Substitutes and exemptions are permitted. A conscription for 350,000 men took place in Jan. 1813, after the disastrous Russian campaign, and in Dec., same year, another for 300,000 after the battle of Leipsic.

CONSECRATION. That of churches was instituted in the second century, the temple of worship being dedicated with pious solemnity to God and a patron saint. Anciently the consecration of popes was deferred until the emperor had given his assent to the election. Gregory IV. desired to have his election confirmed by the emperor Louis, in 828. *Hénaull*.

The consecration of churches, places of burial, &c., is admitted in the reformed religion. The consecration of bishops was ordained in the church of England in 1549. *Stov.*

CONSERVATION OF FORCE. The philosophical doctrine that no physical force can be created or destroyed, but may be transferred, is maintained by Grove, Faraday, Helmholtz, Tyndall, and other philosophers. See *Correlation*.

CONSERVATIVES, a name of modern date, is given to, and accepted by, a political party, whose leading principle is the conservation of our ancient national institutions. It sprung up in England at the time when the Orange societies and lodges were discouraged, 1836, and was substituted for Orangemen, as a less obnoxious term, and as indicative of milder, but equally constitutional opinions. *Conservative* has, however, in some measure changed its signification, and in popular parlance is now opposed to *Liberal*. Sir Robert Peel acknowledged himself a conservative when reproached by the Irish party in parliament with being an Orangeman; but the party that afterwards separated from him called their principles conservative, in contradistinction to his,—his policy and measures being changed. —The Conservative Club was founded in 1840. *Political Notes*. See *Protectionists*.

CONSERVATOIRES, a name given to schools for the cultivation of music on the continent. The celebrated Conservatoire de Musique at Paris began in 1793.

CONSERVATORS OF THE PUBLIC LIBERTIES. Officers chosen in England to inspect the treasury and correct abuses in administration, 28 Hen. III. 1244. *Rapin*. Conservators were appointed to see the king's peace kept. *Pardon*. Conservators were formally appointed in every sea-port to take cognisance of all offences committed against the peace upon the main sea out of the liberty of the Cinque Ports. *Bailey*.

CONSISTORIES, for regulating ecclesiastical discipline and divine worship in the Lutheran church in Germany, were established at the reformation—the first at Wittenberg in 1542; other consistories were established after the peace of Augsburg in 1555.

CONSISTORY COURT, anciently joined with the Hundred court; and its original, as divided therefrom, is found in a law of William I., 1079, quoted by lord Coke. The chief and most ancient consistory court of the kingdom belongs to the see of Canterbury, and is called the Court of Arches (*which see*).

CONSOLS. See *Stocks*.

CONSOLIDATED FUND. On Jan. 5, 1816, the exchequers of Great Britain and Ireland, previously separate, were amalgamated under this title.

CONSPIRACIES AND INSURRECTIONS IN GREAT BRITAIN. Among the recorded conspiracies, real or supposed, the following are the most remarkable:—

Of the Norman barons and Waltheof against William I. the Conqueror	A.D. 1074	hanged him; and who afterwards attempted to steal the regalia	A.D. 1671
Bishop Odo, &c. against William II.	1088	The pretended conspiracy of the French, Spanish, and English Jesuits to assassinate Charles II. revealed by the infamous Titus Oates, Dr. Tongue and others	1678
Against Henry II. by his queen and children	1173	The Meal-tub plot (<i>which see</i>)	1679
The barons against Henry III. (<i>See Barons' War</i>)	1258	The Rye-house plot to assassinate the king on his way to Newmarket. (<i>See Rye-house Plot</i>)	1683
Of barons against Henry IV.	1400	Of lord Preston, the bishop of Ely, and others to restore James II.	1691
Of the earl of Cambridge and others against Henry V.	1415	Of Granville, a French chevalier, to murder king William in Flanders	1692
Of Lambert Simnel (1487) and Perkin Warbeck against Henry VII.	1492	The Assassination plot (<i>which see</i>)	1696
Insurrection of the London apprentices. (<i>See Evil May-day</i>)	1517	Of Simon Fraser, lord Lovat, against queen Anne. (<i>See Rebellions</i>)	1703
Of Anthony Babington and others against Elizabeth. (<i>See Babington</i>)	1586	Of the marquess Guiscard	1710
Of Lopez, a Jew, and others	1594	Of James Sheppard, an enthusiast, to assassinate George I.	1718
Of Patrick York, an Irish fencing-master, hired by the Spaniards to kill the queen	—	Of counsellor Layer and others, to bring in the Pretender	1722

CONSTABLE OF ENGLAND, LORD HIGH. The seventh great officer of the crown, and, with the earl marshal, formerly a judge of the court of chivalry, called, in the time of

Henry IV., *curia militaris*, and subsequently the court of honour. It is the fountain of the martial law; and the power of this officer was so great, and such improper use was made of it, that in the 13th Richard II., 1389, a statute passed for abridging it, and also the power of the earl marshal (*which see*). The office existed before the conquest, after which it went by inheritance to the earls of Hereford and Essex, and next in the line of Stafford. In 1521 it became forfeited to the king in the person of Edward Stafford, duke of Buckingham, that year attainted for high treason, and has never been since granted to any person, otherwise than *pro hac vice* (for this occasion), and that to attend at a coronation or trial by combat. The only instance of a trial by combat being *ordered* since this office fell into the hands of the crown, was that commanded between lord Reay and sir David Ramsay in Nov. 1631; but the king prevented it.*

CONSTABLE OF SCOTLAND, LORD HIGH. The office was instituted by David I. about 1147. The holder has the keeping of the king's sword, which the king, at his promotion, delivers to him naked (and hence the badge of the lord high constable is a naked sword); and the absolute command of the king's armies while in the field, in the absence of the king. The jurisdiction of this office came at last to be exercised only in dealing with crimes during the time of parliament, which some extended likewise to all general conventions. The office was conferred heritably in 1321 on sir Gilbert Hay, created earl of Erroll, by Robert Bruce, and with his descendants it still remains, being expressly reserved by the treaty of union in 1707. The present earl of Erroll is the twenty-second lord high constable (1862).

CONSTABLES OF HUNDREDS AND FRANCHISES, instituted in the reign of Edward I., 1285, are now called high constables. There are three kinds of constables, high, petty and special: the high constable's jurisdiction extends to the whole hundred; the petty constable's to the parish or liberty for which he is chosen; and the special constable is appointed for particular occasions and emergencies (as in April, 1848, on account of the Chartists).

CONSTABULARY FORCE. For that of London, see *Police*. The Constabulary of Ireland act passed in 1823, when this species of force was embodied throughout the country. Several subsequent acts were consolidated in 1836.

CONSTANCE, a city in Baden (S. Germany). See *Councils* xvii., and *Huss*.

CONSTANTINA, the ancient capital of Numidia, was taken by the French, Oct. 13, 1837. During the assault on Oct. 12, the French general Damremont was killed. Achmet Bey retired with 12,000 men as the victors entered Constantina.

CONSTANTINOPLÉ, formerly Byzantium (*which see*), derives its name from Constantine the Great, who removed the seat of the Eastern Empire here, A.D. 330. It was continually convulsed by factions and religious dissensions. See *Eastern Empire and Turkey*. The ERA of Constantinople has the creation placed 5508 years B.C. It was used by the Russians until the time of Peter the Great, and is still used in the Greek church. The Russian year begins Sept. 1, and the ecclesiastical year towards the end of March; the day is not exactly determined. To reduce it to our era subtract 5508 years from January to August, and 5509 from Sept. to the end. *Nicolas*.

CONSTELLATIONS. Those of *Arcturus*, *Orion*, the *Pleiades*, and *Mazzaroth*, are mentioned in the book of Job (ch. ix. 9 & xxxviii. 31) about 1520 B.C. Homer and Hesiod notice constellations; but though some mode of grouping the visible stars had obtained in very early ages, our first direct knowledge was derived from Claudius Ptolemaeus, about A.D. 140. Hipparchus (about 147 B.C.) made a catalogue of forty-eight constellations. Others were added by Tycho Brahe, Hevelius, Halley, and others. The number at present acknowledged is 29 northern, 45 southern, and 12 zodiacal.

CONSTITUENCIES. See *Commons*.

CONSTITUTION OF ENGLAND. It comprehends the whole body of laws by which the British people are governed, and to which it is presumptively held that every individual has assented. *Lord Somers*. This assemblage of laws is distinguished from the term government in this respect—that the constitution is the rule by which the sovereign ought to govern at all times; and government is that by which he does govern at any particular time. *Lord Bolingbroke*. The king of England is not seated on a solitary eminence of power; on the contrary, he sees his *equals* in the co-existing branches of the legislature, and he recognises

* The lord high constable at the coronations respectively of—queen Anne, Wriothesley, duke of Bedford, 1702;—of George I., John, duke of Montagu, 1714;—of George II., Charles, duke of Richmond, 1727;—of George III., John, duke of Bedford, 1761;—of George IV., 1821, William IV., 1831, and Victoria, 1838, Arthur, duke of Wellington.

his superior in the law. *Sheridan*. Hallam's "Constitutional History of England" was first published in 1827.

CONSULS. These officers were appointed at Romé, 509 B.C. They possessed regal authority for the space of a year: Lucius Junius Brutus, and Lucius Tarquinius Collatinus, the latter the injured husband of Lucretia, were the first consuls. A consular government was established in France, Nov. 9, 1799, when Bonaparte, Cambacérès, and Lebrun were made consuls; and subsequently Bonaparte was made first consul for life, May 6, 1802. Commercial agents were first distinguished by the name of *consuls* in Italy in 1485, being appointed by Richard III. A British consul was first appointed in Portugal in 1633.

CONTINENTAL SYSTEM, the name given to Napoleon's plan to exclude the British merchandise from the entire continent. It began with his *Berlin decree* in 1806, and occasioned the *Orders in council* (*which see*).

CONTRACTORS WITH GOVERNMENT, disqualified from sitting in parliament, 1782.

CONTRIBUTIONS, VOLUNTARY, to a vast amount have been several times made by the British people in aid of the government. The most remarkable of these in 1798, to support the war against France, amounted to two millions and a half sterling. Several men of wealth, among others sir Robert Peel, of Bury, Lancashire, subscribed each 10,000*l.*; and 200,000*l.* were transmitted from India in 1799. See *Patriotic Fund*.

CONTROL, BOARD OF. See *Board of Control* and *East India Bill*.

CONVENTICLES, private assemblies for religious worship, held by dissenters from the Established Church; but first applied to the schools of Wickliff.—Conventicles, numerous at the time, were prohibited in 1664, and persons attending them were liable to fine, imprisonment, or transportation. The statute was repealed by William III. in 1689.

CONVENTION PARLIAMENTS. Two memorable parliaments (especially distinguished by this term), assembled without the king's writ upon extraordinary occasions. The first held in March, 1660, voted the restoration of Charles II.; the second held in Jan. 1689, by a majority of two voices, declared for a new sovereign William III. (and Mary), in preference to a regent which had been proposed. See *National Convention*.

CONVENTIONS. The following are the principal conventions between Great Britain and foreign powers, and by foreign powers with each other. They are more fully described in their respective places through the volume:—

Of Closterseven	Sept. 8, 1757	accept 2,500,000 <i>l.</i> as a composition for claims
Of Armed Neutrality	July 9, 1780	on Austria, amounting to 30,000,000 <i>l.</i> sterling 1824
Of Pilnitz	July 29, 1791	Of England with Russia Feb. 28, 1825
Of Paris (French National) instituted	Sept. 17, 1792	Of England and United States Nov. 26, 1826
Of Cintra	Aug. 30, 1808	Of Spain, for satisfying the claims of British
Of Berlin	Nov. 5, 1808	merchants June 26, 1828
Of Peterswalden	July 8, 1813	Of the Viceroy of Egypt and sir E. Codrington,
Of Paris	April 23, 1814	for restoring Greek captives &c. Aug. 6, —
Of the Dutch with England	Aug. 13, —	Of France with Brazil Aug. 14, —
Of Vienna; Saxony placed under the control of		Convention between Holland and Belgium,
Prussia	Sept. 28, —	signed in London April 19, 1839
Of Zurich, signed	May 20, 1815	Of England with Austria, Russia, Prussia, and
Of Capua, with Murat	May 20, —	Turkey, for the settlement of the Eastern
Of St. Cloud, between Davoust, and Wellington,		question July 15, 1810
and Blucher	July 5, —	Of France and England, respecting the Slave
Of Paris, with the allies	April 25, 1818	Trade May 29, 1845
Of Aix-la-chapelle	Oct. 9, —	Of England with the Argentine republic, Oct. 24, 1849
Of Austria, with England: the latter agrees to		See <i>Treaties</i> .

CONVENTS were first founded, according to some authorities, A.D. 270. The first in England was erected at Folkstone, by Eadbald, in 630. *Camden*. The first in Scotland was at Coldingham, where Ethelreda took the veil, in 670. They were founded earlier than this last date in Ireland. They were suppressed in England in various reigns, particularly in that of Henry VELL, and comparatively few now exist in Great Britain.* A very great number have been suppressed in Europe in the present century. The emperor of Russia abolished 187 convents of monks by an ukase dated July 31, 1832. The king of Prussia followed his example, and secularised all the convents in the duchy of Posen. Don Pedro put down 300 convents in Portugal in 1834; and Spain has abolished 1800 convents. Many were abolished in Italy and Sicily in 1860 and 1861.

CONVICTS. See *Transportation*.

* In 1597, lady Mary Percy founded a convent at Brussels, which flourished there till 1794, when the nuns were compelled to remove to England. They were received by bishop Mäner, and placed at Winchester, at which place they remained till their removal to East Bergholt, in Suffolk, June, 1857. This was the first English conventual establishment founded on the continent after the Reformation.

CONVOCACTION OF THE CLERGY. A general assembly of all the clergy in the nation convened by the sovereign's writ, to consult on the affairs of the church, and directed to the archbishop of each province, requiring him to summon all the bishops, deacons, archdeacons, &c. The convocation is divided into two houses, called the upper, consisting of the bishops; and lower, consisting of the deacons, prebendaries, archdeacons, and clergy. The first summoned to meet by writ of the king was 23 Edw. I. 1295. The power of the convocation was limited by a statute of Henry VIII., in whose reign the convocation was reorganised. The two houses of convocation were deprived of various privileges in 1716. Formal meetings of the clergy in convocation are held annually, and attempts have been made since 1853 to obtain the power of dealing with ecclesiastical affairs, but without effect.

CONVOLVULUS. The Canary Convolvulus (*Convolvulus Canariensis*) came to England from the Canary Isles, 1690. The many-flowered convolvulus in 1779.

COOKERY, an art-peculiarly connected with civilised life. Animals were granted as food to Noah, 2348 B.C., the eating blood being expressly forbidden (*Gen.* ix. 3, 4). In 1898 B.C. a calf was cooked by Abraham to entertain his guests (*Gen.* xviii. 7, 8). Cookery is alluded to throughout the Scriptures and the ancient classics: "The Forme of Cury" (*i.e.* cookery) is dated 1390. An English Cookery-book was printed as early as 1498.* See *Cottage's Stove*.

COOK'S VOYAGES. James Cook sailed from England in the *Endeavour* on his first voyage, July 30, 1768;† and returned home after having circumnavigated the globe, arriving at Spithead, July 13, 1771. Sir Joseph Banks, afterwards the president of the Royal Society, accompanied him in this voyage. Captain Cook again sailed to explore the southern hemisphere, July, 1772, and returned in July, 1775. In his third expedition this great navigator was killed by the savages of Owhyhee, at 8 o'clock on the morning of Feb. 14, 1779. His ships, the *Resolution* and *Discovery*, arrived home at Sheerness, Sept. 22, 1780.

COOPERAGE. This art must have been suggested for preserving wine in the earliest ages, as many household utensils are known to have been of wood as well as pottery. The coopers of London were incorporated in 1501.

CO-OPERATIVE SOCIETIES are composed of working men, having for their object the sale of articles of daily consumption to the members at low prices. The Rochdale Equitable Pioneers Society began in 1844, with a capital of 28*l.* In 1860, the business done amounted to 152,063*l.*, the profits being 15,906*l.* These societies, now numerous in the North, are registered pursuant to 13 & 14 Vict. c. 115 (1849).

COPENHAGEN (Denmark), built by Waldemar I., 1157, and made a royal residence, 1443; university founded, 1479. In 1728, more than seventy of its streets and 3785 houses were burnt. Its famous palace, valued at four millions sterling, was wholly burnt, Feb. 1794, when 100 persons lost their lives. In a fire which lasted forty-eight hours, the arsenal, admiralty, and fifty streets were destroyed, 1795. Copenhagen was bombarded by the English under lord Nelson and admiral Parker; and in their engagement with the Danish fleet of twenty-three ships of the line, eighteen were taken or destroyed by the British, April 2, 1801. Again, after a bombardment of three days, the city and Danish fleet surrendered to admiral Gambier and lord Cathcart, Sept. 8, 1807. The capture consisted of eighteen sail of the line, fifteen frigates, six brigs, and twenty-five gun-boats, and immense naval stores. See *Denmark*.

COPENHAGEN FIELDS (N. London). Here the Corresponding Society met on Oct. 26, 1796; and the Trades' Union, April 21, 1834. The fields are now occupied by the Metropolitan Cattle-market, opened June 13, 1855.

* *Military Cookery.*—Capt. Grant devised a system of cooking for the camp at Aldershot, which has continued in successful operation for the service of between 12,000 and 14,000 men. From April to August, in 1857, the plan was subjected to the severe test of cooking for 92,000 men, who marched in and out of the encampment during that period. The consumption of fuel requisite for this system of cooking is one half-pound of coal per man per day, and the official report states the cost to be one halfpenny per man per week for the three daily meals.

† A memorial was presented to the king by the Royal Society in 1768, setting forth the advantages which would be derived to science if an accurate observation of the then approaching transit of Venus over the sun were taken in the South Sea. The ship *Endeavour* was, in consequence, prepared for that purpose, and the command of her given to lieutenant James Cook. He sailed in July, 1768, touched at Madeira and Rio de Janeiro, doubled Cape Horn, and after a prosperous voyage reached Otaheite, the place of destination, in April, 1769. By a comparison of the observations made on this transit (June 3, 1769) from the various parts of the globe on which it was viewed by men of science, the system of the universe has, in some particulars, been better understood; the distance of the sun from the earth, as calculated by this and the transit in 1761, is now settled at 108,000,000 miles, instead of the commonly received computation of 95,000,000. *Butler*.

COPERNICAN SYSTEM, so called from its author Nicolas Copernicus, born at Thorn, 1473, died 1543. A few days before his death the printing of his book on the "Revolution of the Celestial Bodies," was completed. The system, which resembles that attributed to Pythagoras, was condemned by a decree of pope Paul V. in 1616, which was not revoked till 1821 by Pius VII. The sun is supposed to be in the centre and immovable, and the earth and the rest of the planets to move round it in elliptical orbits. The heavens and stars are imagined to be at rest, and the diurnal motion which they seem to have from east to west, is imputed to the earth's motion from west to east.

COPLEY MEDAL. See *Royal Society*.

COPPER. One of the six primitive metals, said to have been first discovered in Cyprus. *Pliny*. We read in the Scriptures of two vessels of fine copper (or brass), precious as gold 457 B.C. (*Ezra* viii. 27). The mines of Fahlun, in Sweden, is the most surprising artificial excavation in the world. In England, copper-mines were discovered in 1561, and copper now forms an immense branch of trade: there are upwards of fifty mines in Cornwall, where mining has been increasing since the reign of William III. In 1857, 75,832 tons of copper ore were imported, and 25,241 tons extracted. The Burrā-Burra copper-mines in S. Australia were discovered in 1842. They have brought great prosperity to that colony.—The first ship to which a sheathing of copper was applied, was his majesty's ship *Alarm*, at Woolwich, in 1761, "to preserve her from worms in southern climates;" it gave great satisfaction, and in 1780 all ships in the British navy were copper-bottomed.—About 1850 the electro-type process was first employed to face with copper printing-types and casts from woodcuts.

COPPER-MONEY. The Romans, prior to the reign of Servius Tullius, used rude pieces of copper for money. See *Coin*. In England, copper-money was made at the instance of sir Robert Cotton, in 1609; but was first really coined in 1665, when Miss Stewart sat for the figure of Britannia. Its regular coinage began in 1672, and it was largely issued in 1689. Private traders had done so previously. In Ireland, copper was coined as early as 1339; in Scotland in 1406; in France in 1580. Wood's coinage (*which see*) in Ireland commenced in 1723. The copper coinage was largely manufactured at Birmingham by Boulton and Watt in 1792. Penny and two-penny pieces were extensively issued 1797. The half-farthing was coined in 1843; but was disused. See *Farthing*. In July, 1859, 10,000*l.* were voted towards replacing the copper coinage. See *Bronze*.

COPPER-PLATE PRINTING was first invented in Germany, about A.D. 1450; and rolling-presses for working the plates about 1545. Messrs. Perkins, of Philadelphia, invented in 1819 a mode of engraving on soft steel, which, when hardened, will multiply copper-plates and fine impressions indefinitely. See *Engraving*.

COPPERAS, a mineral composed of copper or iron combined with sulphuric acid (vitriol), found in copper mines, commonly of a green or blue colour; first produced in England by Cornelius de Vos, a merchant in 1587.

COPTS, in Egypt, the supposed descendants of the ancient Egyptians, mingled with Greeks and Persians. Their religion is a form of Christianity, derived from the Eutychians, a sect of the fifth century (*which see*).

COPYHOLDERS, who hold an estate by a copy of the rolls of a manor made by a steward of the lord's court. They were enfranchised by 5 Vict. c. 35, 1841. By the Reform Act in 1832, copyholders to the amount of 10*l.* became entitled to a vote for the county. The copyhold acts were amended by 21 & 22 Vict. c. 94 (1858).

COPYRIGHT. Decree of the Star-chamber regarding it, A.D. 1556. Every book and publication ordered to be licensed, 1585.

Ordinance forbidding the printing of any work without the consent of the owner 1549
The first copyright act was that of 8 Anne 1709
Protection of copyright in prints and engravings, 17 Geo. III. 1777
Copyright protection act, 54 Geo. III. 1814

Dramatic authors' protection act, 3 Will. IV. c. 15 1833
Act for preventing the publication of lectures without consent, 6 Will. IV. c. 65 1835
International copyright bill, 1 Vict. 1838
5 & 6 Vict. c. 45 (Talfourd's or lord Mahon's act), to amend the copyright act, passed 1842

* This act was confirmed by a memorable decision at the bar of the House of Lords, and the claim of perpetual copyright was overruled, Feb. 22, 1774. The statute declared the author to have an exclusive right for 14 years, and if at the end of that term he were living, the right to return to him again for the same term of years. Later acts extended the author's right to 28 years, and if living at the end of that time, then to the remainder of his life.

† By this act, the right is to endure for the life of the author, and for seven years after his death; but that time expire earlier than 42 years, the right is still to endure for 42 years, for which term also any work published after the author's death is to continue the property of the owners of the manuscript.

COPYRIGHT, *continued.*

The colonies copyright act, 10 & 11 Vict. c. 95, passed 1847

COPYRIGHT FOR DESIGNS.

Protection granting security for two months to new designs applied by printing to linens, calicoes, and muslins 1787

Extended to three months 1794

A copyright of 14 years conferred on sculpture, and 1814

The designs acts of Geo. III. made to embrace printed designs on wool, silk, and hair; and twelve months' copyright granted to designs applied to all tissues except lace and those already provided for; for the modelling, embossing, and engraving of any manufacture

not being a tissue; and for the shape or configuration of any article 1839

By 5 & 6 Vict. c. 100, the existing designs acts all repealed (except that for sculpture), and provision made for including all ornamental designs under 13 classes, and conferring upon them terms of protection, varying from nine months to three years. 1842

[Fees on registration vary from 12. to 17.] By the "designs act," the Board of Trade is empowered to extend the copyright for an additional term of three years 1850

The "non-ornamental designs act," securing the configuration of articles of utility (see 101.), passed in 1843

Copyright of photographs secured by the act, protecting works of art, passed in July, 1862

COPYRIGHT, INTERNATIONAL. In 1838 and 1852 acts were passed to secure to authors, in certain cases, the benefits of international copyright (1 & 2 Vict. c. 59, and 15 Vict. c. 12), and conventions have in consequence been entered into with France, Prussia, &c.

CORCYRA (now *Corfu*, chief of the Ionian Isles), a colony founded by the Corinthians about 734 B.C. It had frequent wars with the mother country, one about the possession of Epidamnus (431 B.C.) led to the Peloponnesian war. It was subdued by the Spartans in 373, and by the Romans, 230. At the decline of the eastern empire it fell into the hands of the Venetians about 1149. The Turks attacked Corfu in 1716, but were gallantly repulsed. It was subdued by the Russian and Turkish fleets in 1799, and formed (with the other isles) into the Ionian republic. See *Ionian Isles*.

CORDELIERS, friars of the order of St. Francis d'Assisi (the Minorites) instituted about 1223. They are clothed in coarse grey cloth, with a small cowl and cloak of the same material, having a girdle of cord or rope, tied with three knots, and hence the name, which was first given to them by St. Louis of France, about 1227. The French revolutionary partisans, termed "Cordeliers," Hebert, Cloots, &c., were executed March 24, 1794.

CORDOVA, the ancient Corduba, a Roman city in Spain, taken by the Goths in A.D. 572, and made the capital of an Arab kingdom by Abderahman in 757. It became eminent for its learned men. It was rescued from the Arabs by Ferdinand III., of Castile, in 1236, and was taken by the French in 1809; but abandoned by them, in 1813. It was the birthplace of Seneca and Lucan under the Romans, and of the great Arabian physician Averrhoës.

CORFU. See *Corcyra*.

CORINTH (Greece), a city, said to have been built, 1520 B.C., on the ruins of Ephyra. It was defended by an elevated fortress called Acrocorinth, surrounded with strong walls. Its situation was so advantageous, that Cicero named it the *Eye of Greece*, and declared, that of all the cities known to the Romans, Corinth alone was worthy of being the seat of a great empire.—For *Corinth*, in North America, see *United States*, 1862.

The Isthmian games instituted, it is said, by Sisyphus, who founded a kingdom. . . . B.C. 1326
Return of the Heraclidae 1107
Their dynasty established by Aletes 1074
The Corinthians invent ships called *triremes*, with three benches of oars. 786 or 758
Reign of Bacchis, 925; oligarchy of the Bacchidae 747-657
Thebes deposed, and the government of the Prytanes instituted: Automenes is the first on whom this dignity is conferred 745
A colony goes to Sicily and founds the colonies of Syracuse and Corcyra. about 734
Revolt of the Coreyreans: they defeat the Corinthians at sea 664
Cypselus, a despot, sets aside the Prytanes His son Periander rules, and favours genius and learning 627-585
Psammetichus deposed, and a republic formed 580
The Corinthians engaged in the Persian war 480

War with the Coreyreans B.C. 435
The Corinthian war (*which see*) 395
Acrocorinth (citadel) taken by Aratus 243
Corinth joins the Achaean League
The Roman ambassadors first appear at Corinth 228
Corinth destroyed by Lucius Mummius, who sends to Italy the first fine paintings there seen, they being part of the spoil (*Livy*) 146
Rebuilt by Julius Caesar 46
Visited by St. Paul (*Acts xviii.*) A.D. 54
His two epistles to the Corinthians 59, 62
Ravaged by Alaric 396
Plundered by Normans from Sicily 1146
Taken by Turks, 1446; by Venetians, 1687; by Turks, 1715; from whom it was finally taken by the Greeks in 1823. It now belongs to the kingdom of Greece.
Corinth nearly destroyed by an earthquake, Feb. 21, 1858

* The important question of a foreigner possessing a copyright in this country was finally decided in the negative by the House of Lords, in August, 1854, which reversed the decision of the Court of Exchequer, on an appeal by the defendant in the case of *Boosey v. Jeffrey*. (In 1831 Mr. Boosey purchased the copyright of Bellini's opera, *La Sonnambula*, from which Mr. Jeffrey published a cavatina. Six of the judges were for protecting foreign copyrights and seven of a contrary opinion.)

CORINTHIAN ORDER, the richest of the orders of ancient architecture, called by Scamozzi, the virginal order, is attributed to Callimachus, 540 B.C. See *Abacus*.

CORINTHIAN WAR (395-387 B.C.), received this name, because the battles were mostly fought in the neighbourhood of Corinth, by a confederacy of the Athenians, Thebans, Corinthians, and Argives, against the Lacedæmonians. The most famous battles were at Coronea and Leuctra (*which see*).

CORK, S. Ireland, built in the sixth century. The principality of the M'Carty's was converted into a shire by king John, as lord of Ireland. A charter was granted to the city by Henry III. in 1242; its great charter was granted by Charles I. A large part of the town was consumed by an awful fire in 1621. Taken by Cromwell in 1649. The earl of Marlborough besieged and took Cork from king James's army, in 1690, when the duke of Grafton, a natural son of Charles II., was slain. The cathedral was built by the produce of a coal duty, between the years 1725 and 1735. Explosion of gunpowder here, Nov. 10, 1810. One of the three colleges, endowed by government pursuant to act 8 & 9 Vict. c. 66, passed July 31, 1845, was inaugurated in this city, Nov. 7, 1849. See *Colleges in Ireland*. Cork Industrial Exhibition was opened June 10, and closed Sept. 11, 1852. The railway to Dublin was finished in 1850. The foundation of the see is ascribed to St. Barr, or Finbarr, early in the seventh century. About 1431, this see and that of Cloyne were canonically united; but on the death of bishop Synge, in 1678, they were separated, the see of Ross having been added to Cork about a century before, 1582. No valuation is returned of this see in the king's books; but in a manuscript in Marsh's library, it is taxed 31 Eliz. at 40*l.*, sterling; and in a MS. in the college library at 25*l.* The sees of Cork and Cloyne were again united in 1833.

CORK-TREE, the *Quercus suber*, resembling the holm, is a species of the oak; its fruit is an acorn, and its bark, when burned, makes the cork used for stopping bottles, casks, and other articles. Cork was in use among the ancients. The Egyptians made coffins of cork, which, being lined with a resinous composition, preserved dead bodies uncorrupted. The tree grows in great abundance on the Pyrenean mountains, and in other parts of Spain, in France, and in the north of New England. It was brought to England before 1690. A cork carpet company was formed in 1862.

CORN. The origin of its cultivation is attributed to Ceres, who, having taught the art to the Egyptians, was deified by them, 2409 B.C. *Arundelian Marbles*. The art of husbandry, and the method of making bread from wheat, and wine from rice, is attributed by the Chinese to Ching Nong, the successor of Fohi, and second monarch of China, 1998 B.C. *Univ. Hist.* Corn provided a common article of food from the earliest ages of the world, and baking bread was known in the patriarchal ages. See *Exodus* xii. 15. Wheat was introduced into Britain in the sixth century by Coll ap Coll Frewi. *Robert's Hist. Anc. Britons*. The first importation of corn, of which we have a note, was in 1347. A law restricting it was made in 1360. Bounties were granted on its importation into England in 1686.—The new LONDON CORN EXCHANGE, Mark-lane, London, was opened June 24, 1828, and was erected at an expense of 90,000*l.*

CORN-LAWS.

The restrictions on the importation of corn are felt, in consequence of the increase of manufactures, about 1770; they were relaxed in . 1773

Mr. Robinson's act passed, permitting its importation when wheat should be 80*s.* per quarter . 1815

During the discussions on this bill, mobs assembled in London, and many of the houses of its supporters were damaged, Jan. 28; and a riot in Westminster continued several days and occasioned much mischief, March 21, *et seq.*

The corn bill, after passing in the commons, is

Average per quarter.	Duty.	Average per quarter.	Duty.
Shillings.	£ s. d.	Shillings.	£ s. d.
— under 51	1 0 0	59 and under 60	0 13 0
51 and under 52	0 19 0	60 and under 61	0 12 0
52 and under 53	0 18 0	61 and under 62	0 11 0
53 and under 54	0 17 0	62 and under 63	0 10 0
54 and under 55	0 16 0	63 and under 64	0 9 0
55 and under 56	0 15 0	64 and under 65	0 8 0
56 and under 57	0 14 0	65 and under 66	0 7 0

The CORN IMPORTATION Bill (introduced by sir Robert Peel), granting a free trade in corn, 9 & 10 Vict. c. 22, received the Royal Assent 26th June, 1846

By this act the duty on wheat was reduced to

defeated in the house of lords by a clause, proposed by the duke of Wellington, which is carried by a majority of four . June 1, 1847

The act (called the *sliding scale*) whereby wheat was allowed to be imported on payment of a duty of 1*l.* 5*s.* 8*d.* per quarter, whenever the average price of all England was under 62*s.*; from 62*s.* to 63*s.* 1*l.* 4*s.* 8*d.*; and so gradually reduced to 1*s.*, when the average price was 73*s.* and upwards, passed . July 15, 1848

The act 5th Vict. c. 14, passed 29th April, 1842, also called the "*sliding-scale act*," regulated the duty on wheat as follows; with sliding duties, also, on other articles of corn.

Average per quarter.	Duty.	Average per quarter.	Duty.
Shillings.	£ s. d.	Shillings.	£ s. d.
66 and under 67	0 6 0	70 and under 71	0 4 0
67 and under 68	0 5 0	71 and under 72	0 3 0
68 and under 69	0 4 0	72 and under 73	0 2 0
69 and under 70	0 3 0	73 and upwards.	0 1 0

4*s.* when imported at or above 53*s.* until 1st Feb. 1849; after which day the duty became 1*s.* per quarter only, on all kinds of grain imported into the United Kingdom, at any prices. See *Anti-Corn Law League*.

CORNWALL, S.W. extremity of England, originally called *Kernou*, a term connected with the Latin *cornu*, a horn, in allusion to its numerous promontories of projecting points. On the retreat of the ancient Britons, Cornwall is said to have been formed into a kingdom, and to have existed many years under different princes, among whom were Ambrosius Aurelius, and the celebrated Arthur. It was erected into a dukedom by Edward III. in 1337, and the heir to the crown of England, if a prince, is born duke of Cornwall, but is immediately afterwards created prince of Wales. The Cornish insurgents were defeated at Blackheath, June 22, 1497. The last person who spoke the Cornish dialect is said to have been Dolly Pentreath, who died aged 102 at Penzance in 1778. See *Stannary Courts*.

CORONATION. The first coronation by a bishop was that of Majocianus, at Constantinople, A.D. 457. The ceremony of anointing at coronations was introduced in England in 872, and into Scotland in 1097. The coronation of Henry III. took place, in the first instance, without a crown, at Gloucester, Oct. 28, 1216. A plain circlet was used on this occasion in lieu of the crown, which had been lost with the other jewels and baggage of king John, in passing the marshes of Lyfn, or the Wash, near Wisbeach. At the coronation of William and Mary, the bishop of London put the crown on the king's head, as Dr. Sancroft, archbishop of Canterbury, would not take the oaths to their majesties. George IV. was crowned July 19, 1821. William IV. crowned, with his queen, Sept. 8, 1831; and Victoria, June 28, 1838.

CORONATION CHAIR. In the cathedral of Cashel, formerly the metropolis of the kings of Munster, was deposited the *Lia Fail*, or Fatal Stone, on which they were crowned. In A.D. 513, Fergus, a prince of the royal line, having obtained the Scottish throne, procured the use of this stone for his coronation at Dunstaffnage, where it continued until the time of Kenneth II., who removed it to

Scone; and in 1296, it was removed by Edward I. from Scone to Westminster.

THE CORONATION OATH was first administered to the kings of England by Dunstan (archbishop of Canterbury), to Ethelred II. in 978. An oath, nearly corresponding with that now in use, was administered in 1377, and was altered in 1689.

CORONEA, BATTLES OF. 1. (or Charonea). The Athenians were defeated and their general Tolmides slain in a battle with the Boeotians at Coronea near Charonea, 447 B.C. 2. The Athenians, Thebans, Argives, and Corinthians having entered into a league, offensive and defensive, against Sparta, Agesilaus, after diffusing the terror of his arms, from his many victories, even into Upper Asia, engaged the allies at Coronea, a town of Boeotia, and achieved a great victory over them, 394 B.C.

CORONERS were officers of the realm in A.D. 925. Coroners for every county in England were first appointed by statute of Westminster, 4 Edw. I. 1276. *Stow*. They are chosen for life by the freeholders, and their duty is to inquire into the cause of violent or unnatural death, upon view of the body. Coroners were instituted in Scotland in the reign of Malcolm II. about 1004. By an act passed in 1843, coroners are enabled to appoint deputies to act for them, but only in case of illness.—20,531 coroners' inquests were held in England and Wales in 1859; and 21,178 in 1860.

CORONETS, caps or inferior crowns, of various forms, that distinguish the rank of the nobility. The coronets for earls were first allowed by Henry III.; for viscounts by Henry VIII.; and for barons by Charles II. *Baker*. But authorities conflict. Sir Robert Cecil, earl of Salisbury, was the first of the degree of earl who wore a coronet, 1604. It is uncertain when the coronets of dukes and marquesses were settled. *Beaton*.

CORPORATIONS are stated by Livy to have been of very high antiquity among the Romans, by whom they were introduced into other countries. These political bodies were first planned by Numa, in order to break the force of the two rival factions of Sabines and Romans, by instituting separate societies of every manual trade and profession. *Plutarch*.

CORPORATIONS, MUNICIPAL, IN ENGLAND. Bodies politic, authorised by the king's charter to have a common seal, one head officer, or more, and members, who are able, by their common consent, to grant or receive in law any matter within the compass of their charter. *Cowel*. Corporations were formed by charters of rights granted by the kings of England to various towns, first by Edward the Confessor. Henry I. granted charters, A.D. 1100: and succeeding monarchs gave corporate powers, and extended them to numerous large communities throughout the realm, subject to tests, oaths and conditions. *Blackstone*. The Corporation and Test Act, passed in 1661, was repealed in May, 1828. The Corporation Reform bill, for the regulation of municipal corporations in England and Wales, 5 & 6 Will. IV. c. 76 (1835). The Irish Municipal Corporation bill, 4 Vict. c. 108, passed in 1840, was amended in 1861.

CORPULENCY. In Germany some fat monks have weighed eighteen stone. *Render.* Of modern instances known in this country was Mr. Bright, a tallow-chandler and grocer, of Maldon, in Essex, who died in the 29th year of his age. Seven persons of the common size were with ease enclosed in his waistcoat. He was buried at All Saints, Maldon, Nov. 12, 1750. Daniel Lambert, supposed to have been the heaviest man that ever lived, died in his 40th year, at Stamford, in Lincolnshire, weighing ten stone more than Mr. Bright, June 21, 1809. He is said to have weighed 52 stone, 11 pounds. James Mansfield died at Debden, Nov. 9, 1856, aged 82, weighing 34 stone.

“**CORRELATION OF THE PHYSICAL FORCES**” is the title of a book by Mr. W. R. Grove, F.R.S., who in 1842 enunciated the theory of the correlation or mutual dependence and convertibility into each other of all the forces of nature (viz. heat, light, electricity, magnetism, chemical affinity, and motion).

CORROSIVE SUBLIMATE. See *Mercury*.

CORRESPONDING SOCIETY OF LONDON, was formed about 1791 to spread liberal opinions and check the tyranny of the British government, then much alarmed by the French revolution. The meetings of the society at Copenhagen-fields and elsewhere, in Oct. 1796, were termed treasonable.—On April 21, Messrs. O'Connor, O'Coigley, and others, were tried for corresponding with the French directory; and James O'Coigley was executed as a traitor (protesting his innocence) on June 7th.

CORRUPT PRACTICES ACT, respecting elections for members of parliament, was passed in 1854, and continued in 1861.

CORSICA, an island in the Mediterranean Sea, called by the Greeks *Cyrrnos*. The ancient inhabitants were savage, and bore the character of robbers, liars, and atheists, according to Seneca when he lived among them. Corsica was colonised by Phœnicians 564 B.C., and afterwards held by the Carthaginians, from whom it was taken by the Romans, 231 B.C. In modern times, it was nominally dependent upon Genoa, until 1768, when it was ceded to France. During a revolt it was erected into a kingdom under Theodore, its first and only king, in 1736.* The celebrated Pascal Paoli was chosen for their general by the Corsicans, in 1753. He was defeated by the count de Vaux, and fled to England, 1769. The people acknowledged Geo. III. of England for their king, June 17, 1794, when sir Gilbert Elliott was made viceroy, who opened a parliament in 1795. A revolt was suppressed in June, 1796; and the island was relinquished by the British, Oct. 22, same year, when the people declared for the French, who still retain it. Napoleon I. was born at Ajaccio in Corsica in Aug. 15, 1769.

CORTES, a Spanish deliberative assembly, originating in the old Gothic councils. The cortes were newly assembled after a long interval of years, Sept. 24, 1810; and settled the new constitution, March 16, 1812. This constitution was set aside by Ferdinand VII., who banished many members of the assembly in May, 1814. The cortes were opened by him in 1820, and dissolved in 1823; again assembled in 1834, and have since been regularly convened. The cortes of Portugal assembled by virtue of don Pedro's charter, Oct. 30, 1826; they were suppressed by don Miguel in 1828, and restored in 1833.

CORUNNA (N.W. Spain). The British army, about 15,000 men, under the command of sir John Moore, had just accomplished a safe retreat when they were attacked by the French, whose force exceeded 20,000: the enemy were completely repulsed, but the loss of the British in the battle was immense, Jan. 16, 1809. Sir John was struck by a cannon-ball, which carried away his left shoulder and part of the collar-bone, leaving the arm hanging by the flesh; he died universally lamented. The remains of the army hastily embarked at Corunna, Jan. 17, under sir David Baird.

CORYPHÆUS, the principal person of the chorus in the ancient tragedy. The name was given to Tysias, afterwards named Stesichorus, who first instructed the chorus to dance to the lyre, 556 B.C.

* He came to England, where he was imprisoned in the King's Bench prison for debt, and for many years subsisted on the benevolence of private friends. Having been released by an act of insolvency in 1756, he gave in his schedule the kingdom of Corsica as an estate to his creditors, and died the same year at his lodgings in Soho. The earl of Oxford wrote the following epitaph, on a tablet near his grave in St. Anne's church, Dean-street:—

“The grave, great teacher! to a level brings
Heroes and beggars, galley-slaves and kings.
But Theodore this moral learn'd ere dead;
Fate pour'd its lesson on his living head,
Bestow'd a kingdom and denied him bread.”

COSMOGRAPHY. See *Astronomy* and *Geography*.

COSSACKS, the warlike people inhabiting the confines of Poland, Russia, Tartary, and Turkey. They at first lived by plundering the Turkish galleys and the people of Natolia : but were formed into a regular army by Stephen Bathori, in 1576, to defend the frontiers of Russia from the incursions of the Tartars. In an inroad against Poland in 1673 they were defeated by John Sobieski. They joined the Russians in 1654, and in the great war of Europe against France a vast body of them formed a portion of the Russian armies and fought almost invincibly.

COSTA RICA, a republic in Central America, established in 1848. It has been much disturbed by the American filibusters. See *Nicaragua* and *Central America*. On Aug. 14, 1859, the president Juan Mora was suddenly deposed, and Dr. José Montealegre made president. Population in 1860, 126,750.

COSTERMONGERS, itinerant dealers in fruit, vegetables, fish, &c., deriving their name, it is said, from *costard*, a favourite apple. The London costermongers are useful frequently in relieving the markets when glutted; and were said in 1860 to possess a floating capital of 3,000,000*l*. Previous to fasting and thanksgiving days, they sell the appointed forms of prayers in great numbers. On Nov. 22, 1860, they held a meeting in order to represent to the city authorities the hardships they felt by the police checking their means of livelihood.

COSTUME. See *Dress*.

COTTAGER'S STOVE. This useful invention was designed by captain John Grant, registered Dec. 1849, and presented by him to the Metropolitan Association for improving the dwellings of the industrious classes. It requires no fixing, is extremely simple in its construction, and all the operations of cooking may be carried on with any description of fuel. 100 lbs. of meat and 115 lbs. of vegetables have been cooked in one of these stoves with less than 20 lbs. of coals. See *Cookery*.

COTTAGES IN ENGLAND. The term cottage originally applied to a small house without land, 4 Edw. I. 1275. "No man may build a cottage, except in towns, unless he lay four acres of land thereto," &c., 31 Eliz. 1589. This statute was repealed, 15 Geo. III. 1775. By returns to the tax office, in 1786, the number of cottages was 284,459. The number in 1800 was 428,214; the number in 1840 was about 770,000. In 1860 the public attention was much drawn to the deplorable state of cottages in many parts of the country.

COTTON, a vegetable wool, the produce of the *Gossypium*, a shrub indigenous in the tropical regions of India and America. Indian cotton cloth is mentioned by Herodotus, was known in Arabia in the time of Mahomet, A.D. 627, and was brought into Europe by his followers. It does not appear to have been in use among the Chinese till the 13th century; to them we are indebted for the cotton fabric termed nankeen. Cotton was the material of the principal articles of clothing among the Americans when visited by Columbus. It was grown and manufactured in Spain in the 10th century; and in the 14th century was introduced into Italy. Indian muslins, chintzes, and cottons were so largely imported into England in the 17th century, that in 1700 an act of parliament was passed, prohibiting their introduction; their cheapness and excellence interfering with the linen and silk manufactures. Cotton has now become the staple commodity of England, as wool was in the time of Edward III. About 1841 the "cotton" or "Manchester" interest began to obtain the political influence, which led to the repeal of the corn laws in 1846. See *Calico*, *Muslin*, &c.

PROGRESS OF THE COTTON MANUFACTURE IN ENGLAND.

Fustian and Velveteen made of cotton about 1641.
Calico, *Shedding*, &c. The fly-shuttle was invented by John Kay, of Bury, 1738; the drop-box, by Robert Kay, 1760; spinning by rollers (also attributed to John Wyatt), patented by Lewis Paul, 1758; the spinning jenny, by Hargreaves, 1767; the water-frame, by Arkwright, 1769; the power-loom, by Rev. D. E. Cartwright, 1785; the dressing machine, by Johnson and Radcliffe, 1802-4; another power-loom, by Horrocks, 1803-73.
British Muslin (totally superseding that of India), is due mainly to the invention of the MULE (which see) by Samuel Crompton, 1779-9; and to the self-acting mule of Mr. Roberts, 1825.
Calico Printing commenced 1764.

The Steam-Engine first applied to the cotton manufacture (by Boulton and Watt) 1785.
Bleaching by means of chloride of lime introduced by Mr. Tennant of Glasgow, 1798.
Stockings. The stocking-frame was invented by William Lee in 1589. *Cotton Stockings* were first made by hand about 1730; Jedediah Strutt obtained a patent for Derby ribbed stockings in 1759; and Horton patented his knitter frame in 1776; Crompton's mule was employed in making thread for the stocking manufacture about 1770.
Cotton Lace—Bobbin-net. The stocking-frame of Lee was applied to lace-making by Hammond, about 1768; the process perfected by John Heathcoat, 1809.

COTTON, *continued.*

COTTON FIBRE IMPORTED INTO THE UNITED KINGDOM.

	lbs.		lbs.		lbs.		lbs.
1697 . . .	1,976,359	1764 . . .	3,870,392	1800 . . .	56,000,000	1830 . . .	264,000,000
1710 . . .	715,008	1782 . . .	11,828,039	1810 . . .	132,500,000	1840 . . .	592,500,000
1730 . . .	1,545,472	1790 . . .	31,500,000	1820 . . .	151,500,000	1860 . . .	1,390,938,752

In 1860, 12,419,096 cwt. of raw cotton was imported; of which 9,963,309 cwt. came from the United States, and 1,822,689 cwt. from India.—The supply of cotton, from North America, has nearly ceased, in consequence of the secession of the southern states from the Union in 1860-61. In 1852 Mr. T. Bazley warned the country on the danger of trusting to this source. In May, 1862, he stated that through its failure the loss of the labouring classes was twelve million pounds sterling a year, and that the loss including the employing classes might be estimated at nearly forty millions a year. At a meeting of the noblemen and gentlemen connected with the cotton manufacturing districts at Bridge-water-house, St. James's, on July 19, 1862, the earl of Derby in the chair, 10,000l. were subscribed to the Cotton District Relief fund. The Viceroy of Egypt, in London at the time, gave 1000l., and the Queen gave 2000l. on July 24. Liberal subscriptions flowed in from all parts. On Aug. 28 the lord mayor had received 41,902l.

American Cotton. Previous to 1795, our cotton fibre came from the East and West Indies, the Levant, and a little from the United States. In 1793, Eli Whitney, an American, invented the saw-gin, a machine by which cotton wool is separated from the pod and cleaned with great ease and expedition. This led to such increased cultivation that the United States soon exported one and a-half million of pounds of cotton; in 1795, five and a-quarter million pounds; in 1820, 80,999,174 lbs.; in 1830, 210,885,358 lbs.; in 1840, 487,856,504 lbs.; in 1847, 364,599,291 lbs.; in 1850, 961,707,264 lbs.; in 1860, 1,115,890,608 lbs.; in 1861, 819,500,528 lbs. Cotton imported from other countries; in 1847,

110,208,324 lbs.; in 1850, 264,281,808 lbs.; in 1860, 215,048,144 lbs.; in 1861, 437,481,208 lbs. *Australian Cotton* is said by Manchester manufacturers to be superior to the best American cotton. Jan. 1861. A company was formed at Manchester in Sept. 1860, to endeavour to obtain cotton from India, Africa, and other places. It arose out of the Cotton Supply Association, formed in 1857. Cotton Factories were regulated by acts of parliament passed in 1825, 1831, 1833, and 1844. The hours of labour were limited, and the employment of children under nine years of age prohibited. In 1846, 1724 cotton mills employed 197,500 persons. In 1862, the persons employed were stated to be 451,000: 315,000 in Lancashire.

EXPORTS OF COTTON GOODS, YARN, &c.

Official Value.		Official Value.		Official Value.	
1697	£ 5,915	1790	£1,662,369	1859	£48,202,225
1701	23,253	1800	5,406,501	1860	52,012,430
1751	45,986	1820	20,509,926	1861	46,836,749
1780	335,000	1847	23,333,225		

COTTONIAN LIBRARY, formed with great labour and judgment by sir Robert Cotton, 1600, *et seq.* It was with difficulty rescued from the fury of the republicans during the protectorate, and was secured to the public by a statute in 1700. It was removed to Essex-house in 1712; in 1730 to Dean's-yard, Westminster, where on Oct. 23, 1731, a part of the books sustained damage by fire. The library was removed to the British Museum in 1757.

COUNCILS. King Alfred, in about 886, is said to have so arranged the business of the nation, that all resolutions passed through three councils. The first was a select council, to which those only high in the king's confidence were admitted; here were debated all affairs that were to be laid before the second council,—bishops and nobles appointed by the king like the present privy council. The third was a general assembly of the nation, called, in Saxon, Wittenagemot, to which quality and offices gave a right to sit, independent of the king. In these three councils we behold the origin of the cabinet and privy councils and the antiquity of parliaments. See *Cabinet, Common and Privy Councils, &c.*

COUNCILS OF THE CHURCH. The following are among the most memorable. Those numbered are the *General Councils*. Sir Harris Nicolas in his "Chronology of History" enumerates 1604 councils, and gives an alphabetical list.

Of the church at Jerusalem (<i>Acts xv.</i>)	50	III. Ephesus, when pope Celestine presided; Pelagius censured	431
Of the western bishops at Arles, in France, to suppress the Donatists; three fathers of the English church attended	314	IV. Chalcedon: Marcian and his empress attended; Eutychianism censured	451
I. First (Ecumenical or General, at Nice (Constantine the Great presided), decreed the constancy of the Son of God, condemned Arianism, and composed the Nicene creed	325	V. Constantinople: pope Vigilius presided; against errors of Origen	553
At Tyre, against Athanasius	335	VI. Constantinople, when pope Agathe presided; against Monothelites, Nov. 7, 680, to Sept. 16, Authority of the six general councils re-established by Theodosius	715
The first at Constantinople, when the Arian heresy gained ground	337	VII. Second Nicene council: 350 bishops attended; against Iconoclasts, Sept. 24 to Oct. 23	787
At Rome, in favour of Athanasius	342	VIII. Constantinople: the emperor Basil attended; against Iconoclasts and various heresies	870
At Sardis: 370 bishops attended; Arians condemned	347	At Clermont, convened by Urban II. to authorise the crusades: 310 bishops attended	1095
At Rimini: 400 bishops attended; Constantine obliged them to sign a new confession	359	IX. First Lateran: right of investiture settled	
II. Constantinople: 350 bishops attended, and pope Damasus presided	381		

COUNCILS OF THE CHURCH, *continued.*

by treaty between pope Calixtus II. and the emperor Henry V. March 18 to April 5, 1123		The order of the Knight-Templars suppressed Oct. 16, 1311; April 3 and May 6, 1312	
X. Second Lateran : Innocent II. presided : preservation of temporalities of ecclesiastics, the principal subject : 1000 fathers of the church attended April 20, 1139		XVI. Pisa : Gregory XII. and Benedict XIII. deposed, and Alexander elected March 5 to Aug. 7, 1409	
XI. Third Lateran : against schismatics, ... March 5 to 19, 1179		XVII. Constance : Martin V. is elected pope ; and John Huss and Jerome of Prague condemned to be burnt 1414-1418	
XII. Fourth Lateran : 400 bishops and 1000 abbots attended : Innocent III. presided ; against Albigenses, &c. Nov. 11 to 30, 1215		XVIII. Basil 1431-1443	
XIII. Lyons : under pope Innocent IV. ; emperor Frederick II. deposed June 28 to July 17, 1245		XIX. Fifth Lateran : begun by Julius II. 1512	
XIV. Lyons : under Gregory X. ; temporary union of Greek and Latin churches May 7 to June 17, 1274		XX. Trent : the last styled Œcumenical : was held to condemn the doctrines of the reformers, Luther, Zuinglius, and Calvin (See <i>Trent</i>) Dec. 13, 1545, to Dec. 3, 1536	
XV. Vienne in Dauphiné : Clement V. presided, and the kings of France and Aragon attended.			

COUNCILS, FRENCH REPUBLICAN. The council of ANCIENTS was an assembly of revolutionary France, consisting of 250 members, instituted at Paris, Nov. 1, 1795, together with the council of FIVE HUNDRED : the executive was a Directory of FIVE. Bonaparte dispersed the council of Five hundred at St. Cloud, Nov. 9, 1799, declaring himself, Roger Ducos, and Siéyès, consuls *provisoires*. See *France*.

COUNSEL. See *Barristers*. Counsel are supposed to be coëval with the *curia regis*. Advocates are referred to the time of Edward I., but earlier mention is made of them. Counsel were certainly employed in the previous reign. Counsel who were guilty of deceit or collusion were punishable by the statute of Westminster, 13 Edw. I. 1284. Counsel were allowed to persons charged with treason by act 8 Will. III. 1696. The act to enable persons indicted for felony to make their defence by counsel, passed Aug. 1836.

COUNT, from the Latin *comes*, a companion, and French *comte* ; somewhat equivalent to the English earl, whose wife is still termed a countess. Count corresponds to the German *graf*. See *Champagne* and *Toulouse*.

COUNTERPOINT (in music), writing the chords to a melody. The earliest specimen of contrapuntal writing extant is by Adam de la Halle in the 12th century.

COUNTIES or SHIRES. The division of this kingdom into counties began, it is said, with king Alfred ; but some counties bore their present names above a century before. The division of Ireland into counties took place in 1562. Lord-lieutenants were appointed in 1549 in England and in 1831 in Ireland. Counties first sent members to parliament, before which period knights met in their own counties, 1285. CHANDOS CLAUSE, Sect. 20 of the Reform act, 2 Will. IV. c. 45 (1832), inserted by the motion of the marquis of Chandos. By it occupiers as tenants of lands paying an annual rent of 50*l.* became entitled to a vote for the knight of the shire. It had the effect of increasing the number of tory members of parliament, and in consequence several vain attempts have been made to repeal the clause.

COUNTRY PARTY. See *Court Party*.

COUNTY COURTS* for the recovery of debts under 20*l.*, superseding courts of requests, were instituted in 1846 by 9 & 10 Vict. c. 95. The counties of England and Wales are divided into sixty districts, each district having a county court, and a barrister as judge, and juries sworn when necessary. These courts having been found to work well, their jurisdiction was extended by 13 & 14 Vict. c. 61 (1850), to sums not exceeding 50*l.*, and their proceedings were facilitated in 1852 and 1854. There are now (1862), 502 county courts in England and Wales. In 1850 the number of plaints entered at the courts of the sixty circuits was 306,793 for 1,265,115*l.* ; in 1857, 744,652 plaints for 1,937,745*l.* ; of the 217,173 causes tried, 4297 were for sums between 20*l.* and 50*l.* *Official Returns*. From 1847 to 1858 judgment was obtained in these courts for 8,309,236*l.*

COURIERS. Xenophon attributes the first couriers to Cyrus ; and Herodotus says that they were common among the Persians. The Greeks or Romans had no regular couriers till the time of Augustus, when they travelled in cars, about 24 B.C. Couriers or posts are said to have been instituted in France by Charlemagne about A.D. 800. The couriers for letters were employed in the early part of the reign of Louis XI. of France, owing to this monarch's

* COUNTY COURTS, or schyremotes, are of such remote antiquity that their origin is lost. In the time of the Saxons they were the most important tribunals in this country. Alfred is said to have divided England into counties, and counties into hundreds ; but the county-courts, the creation of which is generally attributed to him, in 896, seem to have existed at a period long anterior to his reign, and to have been an essential part of the Saxon judicial system.

extraordinary eagerness for news. They were the first institution of the kind in Europe, 1463. *Hénault*. See *Post-office*.

COURLAND, a duchy of Livonia, subjected to Poland in 1582, conquered by Charles XII. of Sweden in 1701; afterwards restored to Sweden, but annexed to Russia in 1795.

COURT PARTY—COUNTRY PARTY, classes of politicians of fluctuating numbers and varying power in the parliaments of England, beginning about 1620. At the end of the seventeenth century the latter embodied toryism and high church principles with a strenuous maintenance of the assumed rights of "the land," as opposed to the innovations of whiggism and the corruptions of the trading interests. Its most distinguished statesman was sir Thomas Hanmer (the *Montalto* of Pope's *Satires*), who died in 1746. *Ashe*.

COURTRAI (Belgium). Here Robert, count of Artois, who had defeated the Flemings in 1297, was defeated and slain by them, July 11, 1302. The conflict was named the "Battle of Spurs," from the number of gilt spurs collected.

COURTS OF JUSTICE were instituted at Athens, 1507 B.C. (see *Arcopagita*); by Moses, 1491 B.C. (*Exod.* xviii. 25). They existed under various denominations in Rome. For these realms, see *Chancery*, *Common Pleas*, *Exchequer*, *King's Bench*, &c. The citizens of London were privileged to plead their own cause in the courts of judicature, without employing lawyers, except in pleas of the crown, 41 Hen. III. 1257. *Stow*. The rights of the Irish courts were established by the British parliament in April, 1783. **COURTS MARTIAL** are regulated by the Mutiny act, first passed in 1690.

COURT BARON, an ancient court which every lord of a manor may hold by prescription in some part of the manor. It is supposed to have originated with the nobility. In it duties, heriots, and customs are received, and estates and surrenders are passed.

COURT OF HONOUR. In England the court of chivalry, of which the lord high constable was a judge, was called *Curia Militaris*, in the time of Henry IV., and subsequently the Court of Honour. In Bavaria, to prevent duelling, a court of honour was instituted in April, 1819. Mr. Joseph Hamilton for many years ardently laboured to establish a similar institution in Britain.

COURT OF SESSION, the highest civil tribunal in Scotland, was instituted by James V. by statute, May 17, 1532. It consisted originally of 14 judges and a president, and replaced a committee of parliament. In 1830 the number of judges was reduced; and the court now consists of the lord president, the lord justice clerk, and 11 ordinary judges (1862).

COURT LEET, a court of record, belonging to a hundred, instituted for punishing encroachments, nuisances, and fraudulent weights and measures, and also offences against the crown. The steward is the judge, and all persons residing within the hundred (peers, clergymen, &c., excepted) are obliged to do suit within this court.

COURT OF REQUESTS (also called a Court of Conscience) was first instituted in the reign of Henry VII. 1493, and was remodelled by Henry VIII. in 1517. *Stow*. Established for the summary recovery of small debts under forty shillings; but in the city of London the jurisdiction extends to debts of five pounds. *Ashe*. The courts of requests in the principal towns of the kingdom were superseded in 1847 (those of the city of London only excepted) by the County Courts (*which see*).

COUTRAS (S.W. France). Here Henry of Navarre totally defeated the duc de Joyeuse and the royalists, Oct. 20, 1587.

COVENANTERS, a name particularly applied to those persons who in the reign of Charles I. took the solemn league and *covenant*, thereby mutually engaging to stand by each other in opposition to the projects of the king; it was entered into in 1638. The COVENANT or league between England and Scotland (the preceding one modified) was adopted and solemnly received by the parliament, Sept. 25, 1643;* and was accepted by Charles II. in 1650, but repudiated by him on his restoration in 1661, when it was declared to be illegal by parliament, and copies of it ordered to be burnt all over England. See *Cameronians*.

COVENT GARDEN (London), so called from having been the garden of St. Peter's convent. The square was built about 1633, and the piazza on the north side was designed by Inigo Jones. The fruit and vegetable markets were rebuilt in 1829-30, from designs by Mr. Fowler (on about three acres of ground belonging to the duke of Bedford).

* It consisted of six articles: 1, the preservation of the reformed church in Scotland, and the reformation of religion in England and Ireland; 2, the extirpation of popery, prelacy, schism, &c.; 3, the preservation of the liberties of parliament and the king's person and authority; 4, the discovery and punishment of all malignants, &c.; 5, the preservation of "a blessed peace between these kingdoms;" 6, the assisting all who enter into the covenant: "*This will we do as in the sight of God.*"

COVENT GARDEN THEATRE sprang out of one in Lincoln's-inn-fields, through a patent granted 14 Chas. II. 1662, to sir William Davenant, whose company was denominated the Duke's servants, as a compliment to the duke of York, afterwards James II. The theatre opened by Rich, about 1732, after undergoing several alterations, was destroyed by fire, Sept. 20, 1808. The first stone of another was laid by the prince of Wales, Dec. 31, 1808, and opened September 18, 1809, with *Macbeth*. The memorable O.P. riot on account of the increased prices of admission, commenced on the first night, and did not terminate until Dec. 10 following. The Covent Garden Theatrical Fund was instituted in 1765. This theatre was opened as an Italian opera-house, April 6, 1847. It was totally destroyed by fire, which broke out about five o'clock in the morning of March 5, 1856, at the close of a bal masqué, conducted by Mr. Anderson, the Wizard of the North, which had lasted two days. A new theatre (by E. M. Barry) was completed, and opened by Mr. Gye with *Les Huguenots*, May 15, 1858. It is much larger and grander than its predecessor. The *Floral Hall* adjoining it was opened in March 17, 1860, with the volunteers' ball.

COVENTRY ACT. Sir John Coventry, K.B., M.P., was maimed and had his nose slit in the streets of London, by sir Thomas Sandys and others, the adherents of the duke of Monmouth, Dec. 25, 1670. This outrage caused a bill, named the Coventry Act, to be passed, to prevent malicious maiming and wounding, March 6, 1671: repealed in 1828.

COVENTRY (Warwickshire). Leofric, earl of Mercia, lord of Coventry, is said to have relieved it from heavy taxes, at the intercession of his wife Godiva, on condition of her riding naked through the streets, about 1057. Processions in her memory took place in 1851 and on June 23, 1862. A parliament was held here in the reign of Henry IV. called *parliamentum indoctum*, or the unlearned parliament, because lawyers were excluded; and in the reign of Henry VI. another met here afterwards called *parliamentum diabolicum*, from the acts of attainder passed against the duke of York and others. The town was surrounded with strong walls, three miles in circumference, and twenty-six towers, which were demolished by order of Charles II. in 1662. The ribbon-makers here suffered much from want of work in the winter of 1860-1.—The **BISHOPRIC** was founded by Oswy, king of Mercia, A.D. 656, and had the double name of Coventry and Lichfield, which was reversed by later bishops. It was so wealthy, that king Offa, by the favour of pope Adrian, made it archiepiscopal; but this title was laid aside on the death of that king. In 1075 the see was removed to Chester; in 1102 to Coventry; and afterwards to its original foundation, Lichfield, but with great opposition from the monks of Coventry. Coventry has lately merged into the bishopric of Lichfield. *Beatson.* See *Lichfield*.

COW-POCK INOCULATION. See *Small Pox*, and *Vaccination*.

CRACOW (a city in Austrian Poland). The Poles elected Cracus for their duke, who built Cracow with the spoils taken from the Franks, A.D. 700 *et seq.* Cracow was taken by Charles XII. in 1702. Taken and retaken several times by the Russians and confederates on the one side, and the people on the other. The sovereign was crowned at Cracow until 1764. Kosciusko expelled the Russians from the city, March 24, 1794; but it surrendered to the Prussians, June 15, same year. Cracow was formed into a republic in 1815. Occupied by 10,000 Russians, who followed here the defeated Poles, Sept. 1831. Its independence was extinguished; and it was seized by the emperor of Austria, and incorporated with his empire, Nov. 16, 1846, which was protested against by England, France, Sweden, and Turkey. See *Poland*. A dreadful fire laid the greater part of the city in ashes, July 18, 1850.

CRANES are of very early date, for the engines of Archimedes may be so called. In 1857 a crane had been erected at Glasgow capable of lifting 50 tons.

CRANIOLOGY (or PHRENOLOGY), names given to the study of the external form of the human skull, as indicative of mental powers and moral qualities. Dr. Gall, the first propounder, was a German physician, born March, 1758. His first observations were among his schoolfellows. Afterwards he studied the heads of criminals and others, and eventually reduced his ideas to a system, marking out the skull like a map. His first lecture was given at Vienna in 1796; but in 1802 the Austrian government prohibited his teaching. In 1800 he was joined by Dr. Spurzheim; and in 1810-12 they published at Paris their great work on the "Anatomy and Physiology of the Nervous System, and of the Brain in particular." Gall died in 1828. Whatever opinion may be entertained of phrenology, there is no doubt that the researches of Gall and Spurzheim have contributed greatly to physiological science, animal and mental. Combe's "Phrenology" is the popular English work on this subject. Phrenological societies were formed early in London and Edinburgh.

CRANMER, LATIMER, AND RIDLEY, Martyrdom of, see *Persecutions*, note.

CRANON, Thessaly, N. Greece. The Macedonians under Antipater and Craterus defeated the confederated Greeks, twice by sea, and once by land, near Cranon. The Athenians demanded peace, and Antipater put their orators to death, among whom was Hyperides, who, that he might not betray the secrets of his country when under torture, cut out his tongue, 322 B.C. Demosthenes is said to have taken poison shortly after. *Dufresnoy*.

CRAPE, a light kind of stuff like gauze, made of raw silk gummed and twisted on the mill. Its manufacture is of very early date, and it is said some crape was made by St. Badour, when queen of France, about A.D. 680. It was first made at Bologna.

CRAYFORD (Kent). Here the Britons, it is said, were defeated by Hengist the Saxon, A.D. 457.

CRAYONS, coloured substances made into paste, and dried into pencils, were known in France about 1422; and were improved by L'Oriot, 1748.

CREASOTE, or **KREASOTE**, (discovered by Reichenbach about 1833,) a powerful antiseptic and coagulator of albuminous tissue, is obtained from the destructive distillation of wood and other organic matters. It is successfully applied to the preservation of meat, timber, &c.

CREATINE (from the Greek *kreas*, flesh), the chemical principle of flesh, was discovered in 1835 by E. Chevreul, and has been fully investigated by Liebig and Gregory.

CREATION OF THE WORLD. The date given by the English bible, and by Usher, Blair, and others, is 4004 B.C. There are about 140 different dates assigned to the Creation, varying from 3616 years to 6984. Dr. Hales fixes it at 5411.

CRECY, or **CRESSY** (N. France), where Edward III. and his son, Edward the Black Prince obtained a great victory over Philip, king of France, with about 100,000, Aug. 26, 1346. John, king of Bohemia (nearly blind); James, king of Majorca; Ralph, duke of Lorraine (sovereign prince); and a number of French nobles, together with 30,000 private men, were slain, while the loss of the English was very small. The crest of the king of Bohemia (three ostrich feathers, with the motto *Ich Dien*—in English, "I serve,") has since been adopted by princes of Wales.

CRÉDIT MOBILIER: a joint-stock company with this name was established at Paris, Nov. 18, 1852, by Isaac and Émile Pereire, and others. It takes up or originates trading enterprises of all kinds, applying to them the principle of *commandité*, or limited liabilities; and is authorised to supersede or buy in any other companies (replacing their shares or bonds in its own scrip), and also to carry on the ordinary business of banking. The funds were to be obtained by a paid-up capital of 2½ million sterling, the issue of obligations at not less than 45 days' date or sight, and the receipt of money on deposit or current account. The society apparently prospered; but is, nevertheless, considered by experienced persons as a near approach to Law's bank of 1716, and likely to end disastrously. In Sept. 1857, several of the directors failed; and in May, 1858, no dividend was paid.

• **CREEDS** (from *credo*, I believe). See *Confessions of Faith*.

CREMERA, BATTLE OF. See *Fabii*.

CREMONA (N. Italy), a city founded by the Romans, 221 B.C. It became an independent republic in 1107, but was frequently subjugated by its neighbours, Milan and Venice, and partook of their fortunes.

CRESCENT, a symbol of sovereignty among the Greeks and Romans, and the device of the city Byzantium, now Constantinople, whence the Turks adopted it after capturing the city. The crescent has given name to three orders of knighthood; founded by Charles I. of Naples, 1268; by René of Anjou, in 1448; by the sultan Selim, in 1801; the last is still in existence, and to it none but Christians are admissible.

CRESTS. Their origin is ascribed to the Carians. In English heraldry there are several representations of Richard I. 1189, with a crest on the helmet resembling a plume of feathers; and afterwards the English kings have generally crowns above their helmets; that of Richard II. 1377, was surmounted by a lion on a cap of dignity. See *Crecy*. Alexander III. of Scotland, 1249, had a plume of feathers by way of crest; and the helmet of Robert I. was surmounted by a crown, 1306; and that of James I. by a lion, 1424. From this period crests appear to have been very generally borne both in England and Scotland. In the 15th and 16th centuries, the palmy days of heraldry, the crest was described to be, as it still is, a figure placed upon a wreath, coronet, or cap of maintenance. *Gwillim*.

CRETE, now **CANDIA** (*which see*), an island in the Mediterranean Sea, once famous for its hundred cities, and for the laws which Minos decreed about 1015 B.C. The Labyrinth of Crete

was reckoned one of the seven wonders of the world. Crete became subject to the Roman empire 68 B.C.

CREVANT-SUR-YONNE (N. France). John Stuart, earl of Buchan, with a French army, was besieging this place in 1423, when it was relieved by the earl of Salisbury with an army of English and Burgundians; after a severe contest, the French were totally defeated.

CRICKET, an ancient English national game, said to be identical with "club ball" played in the 14th century. In 1861 the All England Eleven gained and lost games in Australia.

CRIME. About 1856 it was computed that a fifteenth part of the population of the United Kingdom lived by crime. The increase in education and manufactures is gradually reducing this proportion. Since 1848 there has been no commitment for political offences, such as treason or sedition. See *Executions* and *Trials*!

CONVICTIONS (BY TRIAL) IN ENGLAND AND WALES.

	<i>Persons.</i>	<i>Capital Offences.</i>		<i>Persons.</i>	<i>Capital Offences.</i>		<i>Persons.</i>	<i>Capital Offences.</i>
1847 .	21,542		1852 .	21,304	61	1857 .	15,397	54
1849 .	21,001	66	1853 .	20,756	55	1858 .	13,249	53
1850 .	20,537	49	1854 .	23,047	49	1859 .	12,470	52

Convictions, in 1847: in Scotland, 358; Ireland, 15,233; in 1861: Scotland, 2428; Ireland, 3271.

The Criminal Justice act of 1855 authorises justices, with the consent of the prisoners, to pass sentences for short periods, instead of committing them to trial.

In 1856, the expenses for criminal prosecutions were 104,912*l.* 4*s.* 8*d.* Sixteen persons were executed for murder in 1856 (four foreigners); 14 in 1857; 11 in 1858 (four foreigners); and 9 (four for wife-murder) in 1859. 2,666 persons were liberated on *tickets-of-leave* in 1856. On Feb. 17, 1857, of 126 persons thus liberated 58 were believed to be living honestly. But in 1861 and 1862 the system was considered to have failed through the numerous crimes committed by *ticket-of-leavers*.

"Judicial Statistics" of crime, police, and law, with a report, were first published in 1857.

CRIMEA, or CRIM TARTARY, a peninsula in the Euxine or Black Sea, the ancient *Taurica Chersonesus*, colonised by the Greeks about 550 B.C. The Milesians founded the kingdom of Bosphorus, now Kertch, which about 108 B.C. formed part of the dominions of Mithridates, king of Pontus, whose descendants continued to rule the country under Roman protection till the irruption of the Goths, Huns, &c., about A.D. 258. About 1237, it fell into the hands of the Mongols under Genghis Khan; soon after the Venetians established commercial stations, with a lucrative trade, but were supplanted by the Genoese, who were permitted to rebuild and fortify Kaffa, about 1261. In 1475 Mahomet II. expelled the Genoese, and subjected the peninsula to the Ottoman yoke; permitting the government to remain in the hands of the native khans, but closing the Black Sea to Western Europe. In 1774, by the intervention of the empress Catherine II., the Crimea recovered its independence: but on the abdication of the khan in 1783, the Russians took possession of the country, after a war with Turkey, and retained it by a treaty of peace in 1791. The Crimea (now Taurida), was divided into eight governments in 1802. War having been declared against Russia by England and France, March 28, 1854, large masses of troops were sent to the East, which, after remaining some time at Gallipoli, and other places, sailed for Varna, where they disembarked May 29th. An expedition against the Crimea having been determined on, the allied British, French, and Turkish forces, amounting to 58,000 men (25,000 British), commanded by lord Raglan and marshal St. Arnaud, sailed from Varna, Sept. 3rd, and landed on the 14th, 15th, and 16th, without opposition, at Old Fort, near Eupatoria, about 30 miles from Sebastopol. On the 20th they attacked the Russians, between 40,000 and 50,000 strong (under prince Menschikoff), entrenched on the heights of Alma, supposed to be unassailable. After a sharp contest the Russians were totally routed. See *Alma* and *Russo-Turkish War*. Peace was proclaimed in April, 1856, and the allies quitted the Crimea in July following.

CRIMESUS, a river in Sicily, near which Timoleon defeated the Carthaginians, 339 B.C.

CRIMINAL LAWS OF ENGLAND. Their great severity, pointed out by sir Samuel Romilly, sir James Mackintosh, and others, about 1818, was considerably mitigated by sir R. Peel's acts, passed 1826-8. The criminal law was consolidated in six acts passed in 1861.

CRIMPING-HOUSES were used to entrap persons into the army; hence the name of "crimp sergeant." In a riot in London, some of these receptacles were destroyed by the populace, in consequence of a young man who had been enticed into one being killed in endeavouring to escape, Sept. 16, 1794.

CRINOLINE (a French word, meaning stuff made of *crin*, hair) is the modern name of the "fardingale" of the time of queen Elizabeth, hoop-like petticoats made of whalebone, &c.,

revived in France and England since 1855. They have frequently occasioned loss of life, by coming in contact with fire and machinery. In No. 116 of the *Tailor*, published Jan. 5, 1710, is an amusing trial of the hoop-petticoat then in fashion.

CRIPPLEGATE (London), was so called from the lame beggars who sat there, so early as the year 1010. The gate was new-built by the brewers of London, in 1244; and was pulled down and sold for 91*l.* in July, 1760. The poet Milton was buried in the church near it, Nov. 12, 1674. See *London Gates*.

CRISPIN and **CRISPINUS** are said to have been two saints, born at Rome, from whence they travelled to Soissons, in France, to propagate the Christian religion. Not to be chargeable to others, they worked as shoemakers; but the governor of the town discovering them to be Christians, ordered them to be beheaded, about A.D. 288. On this account, the shoemakers choose them for their tutelar saints. Their day is Oct. 25.

CRITICS. The first society of them was formed 276 B.C. *Blair*. Of this class were Varro, Cicero, Apollonius, and many distinguished men. In modern times, the *Journal des Savans* was the earliest work of the system of periodical criticism, as it is now known. It was originated by Denis de Sallo, ecclesiastical counsellor in the parliament of France, and was first published at Paris, May 30, 1655, and is still continued. The first work of this kind in England was the *Review* of Daniel Defoe (the term being invented by himself), published in Feb. 1703. The *Waies of Literature* was commenced in 1714, and was discontinued in 1722. See *Reviews*.*

CROATIA was conquered by Coloman, king of Hungary, in 1102, and was with that country united to Austria in 1526. The Croatian diet was abolished in Nov. 1861.

CROCKERY-WARE. See *Earthenware*.

CROCODILES, the largest animals of the order. Reptiles were revered as divinities by the Egyptians, fed well, and even ornamented. The emperor Augustus is said to have collected twenty-five at one time in his amphitheatre, where they were killed by gladiators. A fossil crocodile was found at Doddridge, Gloucestershire, in 1806.

CROIX, ST., a W. India Island, purchased from the French by Christian VI., king of Denmark, in 1733. It was taken by sir Alexander Cochrane, Dec. 22, 1807; and restored in 1814.

CROSIER, a staff surmounted by a cross, borne before an archbishop. The pastoral staff, or bishop's staff, with which it is often confounded, was in the form of a shepherd's crook, intended to admonish the prelate to be a true spiritual shepherd. The custom of bearing a crosier before ecclesiastics is mentioned in the life of St. Cesarea of Arles, who lived about A.D. 500.

CROSS. That on which the Redeemer suffered on Mount Calvary, was said to have been found at Jerusalem, deep in the ground with two others, by St. Helena, May 3, 328; Christ's being distinguished from those of the thieves by a sick woman being cured by touching it. It was carried away by Chosroes, king of Persia, on the plundering of Jerusalem; but was recovered by the emperor Heraclius (who defeated him in battle) Sept. 14, 615, and that day has since been commemorated as "the festival of the Exaltation of the Cross," established in 642.—It is asserted by church writers that a shining cross, two miles in length, was seen in the heavens by Constantine, and that it led him to adopt it on his standards, with the inscription "*In hoc signo vinces*;" "in this sign thou shalt conquer." With these he advanced to Rome, where he vanquished Maxentius, Oct. 27, 312. *Lenglet*. **SIGNING WITH THE CROSS** was first practised by Christians to distinguish themselves from the Pagans, about A.D. 110; and in the time of Tertullian, 260, it was deemed efficacious against poison, witchcraft, &c. *Crosses in churches* and chambers were introduced about 431; and were first set up on steeples in 568. They were erected in England in honour of queen Eleanor, in the places where her hearse rested. These monuments were set up between 1296 (when she died) and 1307. Crosses and idolatrous pictures were removed from churches, and crosses in the streets demolished by order of parliament, 17 Charles I. 1641. *Maids of the Cross* were a community of young women who made vows of poverty, chastity, and obedience, instituted in 1265. The order of *Ladies of the Star of the Cross* was instituted by the empress Eleonora de Gonzaga, queen of Leopold I., in 1668.

* The legality of fair criticism was established in the English courts, in Feb. 1794, when an action that excited great attention, brought by an author against a reviewer for a severe critique upon his work, was determined in favour of the defendant, on the principle that criticism is allowable, however sharp, if just, and not malicious.

CROSSED CHEQUES. See *Drafts*.

CROTONA (S. Italy), a city founded by the Achaean Greeks about 710 B.C. Here Pythagoras taught about 520 B.C.

CROWS. An act was passed for their destruction in England (which breeds more of them, it is said, than any other country in Europe), 24 Hen. VIII. 1532. Crows were anciently employed as letter-bearers, as carrier-pigeons are now.

CROWN. An Amalekite brought Saul's crown to David, 1056 B.C. (2 Sam. i.) The first Roman who wore a crown was Tarquin the Elder, 616 B.C. The crown was first a fillet tied round the head; afterwards it was formed of leaves and flowers, and also of stuffs adorned with jewels. See *Tiara*.

The crown of Alfred had two little bells attached (872); it is said to have been long preserved at Westminster, and may have been that described in the parliamentary inventory taken in 1649.

The crown worn by Athelstan resembled a modern earl's coronet, 929.

William I. wore his crown on a cap, adorned with points, 1066.

Richard III. introduced the crosses, 1483.

Henry VII. introduced the arches, 1485.

The crown of Charles II. made in 1660, is the oldest existing in our day. See *Blood's Conspiracy*.

The crown and regalia of England were pledged to the city of London by Richard II. for 200*l.* in 1386. See the king's receipt on redeeming them.

Kymer.

The *Imperial State Crown of England* was made by Rundell and Bridges, in 1838, principally with jewels taken from old crowns. It contains 1 large ruby, 1 large sapphire, 16 sapphires, 11 emeralds, 4 rubies, 1363 brilliants, 1273 rose diamonds, 147 table diamonds, 4 drop shaped pearls, and 273 pearls. Professor Tennant.

CROWN LANDS. The revenue arising from those in England is now nearly all subject to parliament, which annually provides for the support of the sovereign and government. The annual revenue now (1862) arising from crown lands is about 284,500*l.* The revenues of the duchies of Cornwall and Lancaster belong to the prince of Wales, and accumulate during his minority.

CROWNS AND HALF-CROWNS were coined in England very near to the present standard by Edward VI. in 1553. None were coined in 1861, and they will gradually be withdrawn from circulation.

CRUCIFIXION. A mode of execution common among the Syrians, Egyptians, Persians, Carthaginians, Greeks, and Romans, esteemed the most dreadful on account of the shame attached to it; it was usually accompanied by other tortures. Among early accounts may be mentioned, that Ariarathes of Cappadocia, aged 80, when vanquished by Perdiccas, was discovered among the prisoners; and by the conqueror's orders the unhappy monarch was flayed alive, and then nailed to a cross, with his principal officers, 322 B.C. Jesus Christ was crucified April 15, A.D. 33. *Clinton*. Crucifixion was ordered to be discontinued by Constantine, A.D. 330. *Lenglet*. See *Death, Punishment of*.

CRUELTY TO ANIMALS, ROYAL SOCIETY FOR THE PREVENTION OF, was instituted in 1824. Through its exertion hundreds of cases of cruelty are annually prosecuted. A similar society exists in Paris. In 1860 both societies endeavoured to repress vivisection (physiological experiments on living animals).

CRUSADES (French, *Croisades*), wars undertaken by the Christian powers to drive the infidels from Jerusalem and the adjacent countries, called the Holy Land.* They were projected by Peter Gautier, or Peter the Hermit, an enthusiastic French officer of Amiens, who turned pilgrim. Having travelled in the Holy Land, on his return, he deplored to pope Urban II. that infidels should be in possession of the city where Christ had taught. Urban convened a council of 310 bishops at Clermont in France, at which the ambassadors of the chief Christian potentates assisted, and gave Peter the fatal commission to excite all Europe to a general war, 1094. The first crusade was published; an army of 300,000 men was

* The Crusaders took Jerusalem by assault, July 15, 1099, after a siege of five weeks. Impelled by rage, they put the numerous garrison and inhabitants to the sword without distinction. Neither arms defended the valiant nor submission the timid; no age or sex was spared; infants on the breast were pierced by the same blow with their mothers, who implored for mercy; even a multitude, to the number of 10,000, who had surrendered themselves prisoners, and were promised quarter, were butchered in cold blood by these ferocious conquerors. The streets of Jerusalem were covered with dead bodies; and the triumphant warriors, after every enemy was subdued and slaughtered, immediately turned themselves with sentiments of humiliation towards the holy sepulchre! They threw away their arms still streaming with blood; they advanced with reclined bodies, and naked feet and hands, to that sacred monument; they sang anthems to their Saviour, who had there purchased salvation by his death and agony; and their devotion so overcame their fury, that they dissolved in tears, and bore the appearance of every soft and tender sentiment. So inconsistent is human nature with itself! and so easily does superstition ally, both with the most heroic courage and with the fiercest barbarity!—*Abbé Vertot: Hume*. It is reckoned that 2,000,000 perished in the crusades.

raised, Peter had the direction of it, and Godfrey de Bouillon the command, 1095. *Voltaire*. The warriors wore a red cross upon the right shoulder, with the name of Croisés, Crossed, or Crusaders; their motto was *Volonté de Dieu*, "God's will."—The French government are publishing the Western Historians of the Crusades in a magnificent form (1844-60).

- I. Crusade (1096) ended in establishing Godfrey de Bouillon as king of Jerusalem, 1099.
- II. Preached by St. Bernard in 1146, headed by emperor Conrad II., and Louis VII., of France. Crusaders defeated; Jerusalem lost in 1187.
- III. Emperor Frederick Barbarossa, &c., in 1188, joined by Philip II. of France and Richard I. of England, in 1190. Glorious, but fruitless.
- IV. 1195, by emperor Henry VI.; successful till his death in 1197.
- V. Proclaimed by Innocent III., 1198. Baldwin, count of Flanders, attacked the Greeks, and took Constantinople in 1202. His companions returned.

- VI. In 1228, by emperor Frederick II., who obtained possession of Jerusalem on a truce for ten years. In 1240, Richard, earl of Cornwall, arrived at Palestine, but soon departed.
- VII. By Louis IX. (St. Louis), who was defeated and taken prisoner at Mansourah, April 5, 1250; released by ransom; truce of ten years.
- VIII. And last, in 1270, by the same prince, who died on his way of a contagious disease at Carthage in Africa. Other princes followed him, among others prince Edward, afterwards our Edward I. In 1291, the sultan took Acre, and the Christians were driven out of Syria.

CRYOPHORUS, an instrument wherewith is demonstrated the relation between evaporation at low temperatures and the production of cold. It was invented and named by Dr. Wollaston, about 1812. See *Cold*.

CRYPTOGRAPHIC MACHINE; for carrying on secret correspondence, patented, 1860.

CRYSTALLOGRAPHY is the science relating to the symmetrical forms assumed by substances passing from the liquid to the solid state. Romé de Lisle published his "*Essai de Cristallographie*," in 1772; but René-Just Haüy is justly regarded as the founder of the modern school of Crystallography (1801). *Whewell*. Dana, Dufresnoy, and Miller, are eminent modern writers on this subject.

CRYSTAL PALACE, HYDE PARK, LONDON, built for the Exhibition of 1851 (*which see*). Its length was 1851 feet, corresponding with the year; the width 408 feet, with an additional projection on the north side, 936 feet long, by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about nineteen acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and seventeen acres of glass in the roof, besides about 1500 vertical glazed sashes. The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (since sir Joseph) Paxton, and the contractors were Messrs. Fox & Henderson, to whom it was agreed to pay 79,800*l.*, or 150,000*l.* if the building were permanently retained. The building commenced Sept. 22, 1850. It cost 176,030*l.* 13*s.* 8*d.* The first column was fixed Sept. 26, 1850; the exhibition was opened May 1, 1851; and was closed to the public Oct. 11, same year. See *Exhibition of 1851*.

CRYSTAL PALACE, SYDENHAM. The building described in the preceding article having been surrendered to Messrs. Fox & Henderson on Dec. 1, 1851; the materials were sold for 70,000*l.* to a company (formed by Mr. Leach), who soon after commenced erecting the present Crystal Palace, on its present site, near Sydenham in Kent (300 acres having been purchased for the purpose), under the direction of sir Joseph Paxton, Messrs. Owen Jones, Digby Wyatt, and other gentlemen engaged in the erection of the preceding structure. The proposed capital of 500,000*l.* (in 100,000 shares of 5*l.* each) was increased in Jan. 1853 to a million pounds. In addition to the permanent exhibition, there are extensive gardens, with magnificent fountains, &c., illustrations of zoology, geology, botany, ethnology, &c.

The first column raised by S. Laing, Esq., M.P., Aug. 5, 1852
During the progress of the works as many as 6400 men were engaged at one time. By the fall of scaffolding, twelve men killed Aug. 15, 1853
Dinner given to professor Owen and a party of savans in the interior of the model of the iguanodon, constructed by Mr. Waterhouse Hawkins Dec. 34
The Crystal Palace was opened by the queen, June 10, 1854
Grand musical fête on behalf of the Patriotic Fund Oct. 28, —
The palace visited by the emperor and empress of the French, &c. April 20, 1855

First grand display of the great fountains, in presence of the queen and 20,000 spectators, June 18, 1856
The receipts were 115,627*l.*; the expenditure 87,872*l.*; not including payments for preference shares, &c., in the year ending April 30, 1857
The preliminary Handel festivals, June 15, 17, 19, 1857; and July 2, 1858 (see *Handel*); the Handel festival itself took place on June 20, 22, and 24, 1859
On the Fast day (for the Indian mutiny) rev. C. Spurgeon preached here to 23,000 persons; 476*l.* were collected, to which the C. P. Company added 200*l.* Oct. 7, 1857
Centenary of the birth of Robert Burns cele-

brated : the directors awarded *sol.* to a prize poem on the subject, which was obtained by Miss Isa Craig . . . Jan. 25, 1859
 Festival kept in honour of Schiller, Nov. 10, 1859; of Mendelssohn . . . May 4, 1860
 London charity children sing here . . . June 6, —
 3000 Orpheonistes (French musical amateurs) perform choral music, June 25; the imperial band of Guides perform, June 26; both dine in the palace . . . June 30, —
 About 100 English brass bands perform, July 10, —

North wing injured by a gale of wind, Feb. 21, 1861
 Haydn's Creation performed (Costa, conductor), May 1, —
 Blondin's performances on an elevated rope begin here (he plays on violin, cooks, simulates falling, &c.) . . . June 1, —
 Another successful Handel festival; a new arched roof constructed for the orchestra; about 4000 vocal and instrumental performers, June 23, 25, 27, 1862

CUBA, an island (W. Indies) discovered by Columbus on his first voyage, 1492; conquered by Velasquez, in 1511, and settled by the Spaniards. The buccaneer Morgan, took the Havannah in 1669. See *Buccaneers*. The fort here was erected by admiral Vernon, in 1741. The Havannah was taken by admiral Pococke, and lord Albemarle, in 1762, but was restored at the peace in 1763. A marauding expedition, undertaken by general Lopez and a large body of Americans with the view of wresting this island from the dominion of Spain, landed at Cuba, May 17, 1850; but it ended in defeat and disaster. The president of the United States (Taylor) had previously published a strong proclamation denouncing the object of the invaders (Aug. 11, 1849). Cuba was again invaded by general Lopez and his followers, Aug. 13, 1851, despite a second proclamation of the American president. They were defeated and taken, and, in the end, fifty of the latter were shot, and their leader, Lopez, was garrotted at Havannah, Sept. 1, following. See *Lone Star*. On May 31, 1854, the president of the United States again issued a proclamation against an intended expedition against Cuba.*

CUBIT, a measure of the ancients, and the first measure we read of; the ark of Noah was made and measured by cubits (B.C. 2448). *Holden*. The Hebrew sacred cubit was two English feet, and the great cubit eleven English feet. Originally it was the distance from the elbow, bending inwards, to the extremity of the middle finger. *Calmet*.

CUCUMBERS grew formerly in great abundance in the east, where, it is said, they constituted the greater part of the food of the poor and slaves. This plant is noticed by Virgil and other ancient poets. It was brought to England from the Netherlands about 1538.

CUDDALORE (India), on the coast of the Carnatic, was acquired by the English in 1681. It was reduced by the French in 1758, but was recaptured in 1760 by sir Eyre Coote. Again lost in 1781, it underwent a destructive siege by the British under general Stuart, in 1783, which was continued until peace was signed. Cuddalore suffered in the wars with Hyder Ali.

CUIRASS, a part of armour much in use by the Greeks and Romans. *Tacitus*. The skins of beasts, and afterwards tanned leather, formed the cuirass of the Britons until the Anglo-Saxon era. It was afterwards made of iron and brass, and covered the warrior from neck to waist before and behind. The cuirass was worn by the heavy cavalry in the reign of Henry III. 1216 *et seq.*† Napoleon had several regiments of cavalry wearing cuirasses.

CULDEES, (said to derive their name from *cultores Dei*, worshippers of God,) monks of simple and peaceful lives, in Scotland and Ireland in early times. They had their principal seat at St. Andrew's; and it is said that in 1185 at Tipperary there was a Culdean abbey, whose monks were "attached to simple truth and pure Christian worship, and had not yet conformed to the reigning superstition." They were eventually subjected to the Papal yoke.

CULLEN'S-WOOD (Ireland): a horrible slaughter of the English by the Irish took place at a village near Dublin, on Easter or Black Monday, so called from this massacre, March 30, 1209. The English were a colony from Bristol, inhabiting Dublin, whence they went to divert themselves at Cullen's-wood, when the O'Byrnes and O'Tooles fell upon them, and destroyed 500 men, besides women and children.

CULLODEN, near Inverness, where the English, under William, duke of Cumberland, defeated the Scottish rebels headed by the young Pretender, the last of the Stuarts, April 16, 1746. The Scots lost 2500 men in killed upon the field, or in the slaughter which occurred in the pursuit, while the loss of the English did not far exceed 200. After the battle, the

* Messrs. Buchanan, Mason, and Soulé, United States envoys, in Oct. 1854, met at Ostend and Aix-la-Chapelle, and reported, recommending the purchase of Cuba. The Spanish minister in cortes, Dec. 19 following, declared that the sale of Cuba would be "the sale of Spanish honour itself."

† The use of cuirasses and helmets, as well as the use of bows and arrows, which had been hardly known under the first race of the kings of France, became a military law under the second race. (*Capit. of Charlem.*) Chivalry at this time began to be introduced: the knight, who was called *Miles*, held a rank in the army, independently of his military rank. Reign of Louis V., year 987. *Henault*.

duke's army practised great cruelties upon the vanquished and the defenceless country people. *Smollett*. Prince Charles fled, and wandered among the wilds of Scotland for six months, while 30,000 were offered for taking him, and the troops of the conqueror were constantly in search. He at length escaped from Uist to Morlaix, and died at Rome, in 1788.

CULVERINS, ordnance so called from the French *coulevrine*, introduced into England from a French model in 1534. It was originally five inches and a quarter diameter in the bore, and carried a ball of eighteen pounds. *Bailey*.

CUMBERLAND, a N. W. county of England, was granted to Malcolm I. of Scotland in 945, by king Edmund, "on condition that he should be his fellow-worker." It was seized by William I., but restored to Malcolm III., "who became his man," 1072. William the Lion, after his defeat at Alnwick, resigned Cumberland to Henry II. It was finally annexed to England in 1237.

DUKES OF CUMBERLAND.

1726. William Augustus, second son of George II., died Oct. 23, 1765.	1799. Ernest Augustus; became king of Hanover June 20, 1837; died Nov. 18, 1851.
1766. Henry Frederic, son of Frederic prince of Wales, died Sept. 18, 1790.	1851. George V., the PRESENT king of Hanover (1862).

CUMBERLAND, THE. See *Naval Battles*, 1811.

CUNAXA, in Mesopotamia, near the Euphrates, where Cyrus the younger was defeated and slain by his brother Artaxerxes II., against whom he had conspired (B.C. 401), as narrated in Xenophon's *Anabasis*. His Greek auxiliaries in the battle were successful. See *Retreat of the Greeks*.

CUNEIFORM INSCRIPTIONS (from *cuneus*, Latin for a wedge), in characters resembling arrow-heads, found at Babylon, Behistun, &c., have lately been deciphered by English and foreign scholars, who date some of them as far back as 2000 B.C. This is impugned by other scholars. See *Assyria*, *Babylon*, *Behistun*.

CUNNERSDORF (in Prussia), BATTLE OF. The king of Prussia, with 50,000 men, attacked the Austrian and Russian army of 90,000 in their camp, and at first gained considerable advantages; but pursuing them too far, the Austrians and Russians rallied, and gained a complete victory. The Prussians lost 200 pieces of cannon and 20,000 men in killed and wounded, Aug. 12, 1759.

CUPOLA SHIPS. See *Navy of England*.

CUPPING, a mode of blood-letting. The skin is scarified by lancets, and a glass cup in which the air has been rarified by flame, is immediately applied to it, when the blood usually flows into the cup. This operation was well known to the ancients, and is described by Hippocrates (B.C. 413) and Celsus (B.C. 20), who highly commend it. It was common in England about 1820, but is not much employed in the present day.

CURAÇOA, an island in the Caribbean sea, was seized by Holland in 1634. In 1800, the French having settled on part of this island, quarrelled with the Dutch, who surrendered it to a single British frigate. It was restored to the Dutch in 1802; taken from them by the British in 1807, and again restored in 1814.

CURATES were of early appointment as coadjutors in the Romish church, and are mentioned in England in the seventh century. Among the acts passed for the relief of this laborious class of the clergy, are the 12th Anne, 1713, and 36th, 53rd, and 58th Geo. III., and especially the beneficent act 2 Will. IV. Oct. 1831. It appeared by parliamentary reports on ecclesiastical revenues, that there were in 1831, 5230 curates in England and Wales, whose stipends amounted to 424,695*l*. The greatest number of curates in one diocese was Lincoln; 629; and the smallest that of St. Asaph, 43.

CURFEW BELL (from the French, *couvre feu*), was a Norman institution, introduced into England by Will. I. 1068. On the ringing of the curfew at eight o'clock in the evening all fires and candles were to be extinguished under a severe penalty. *Rapin*. The curfew was abolished 1 Hen. I. A.D. 1100. A curfew bell was rung at West Ham so lately as Nov. 1859.

CURRENTS, from *Corinth*, whence, probably, the tree was first brought to us about 1533. The name is also given to a small kind of dried grape, brought from the Levant and Zante. The duty on these currants (4*s*. 4*d*. per cwt. in 1834) has been reduced to 7*s*. The hawthorn currant (*Ribes Oxycanthoides*) came from Canada in 1705.

CURRENCY ACTS. Those of sir Robert Peel were passed in 1819 and in 1844.

CUSHEE PIECES, invented in 1673, by Richard Leake, the master-gunner of the *Royal Prince* man-of-war, renowned for bravery shown in the engagement with the Dutch admiral Van Tromp.

CUSTOM. This is a law, not written but established by long usage and consent. By lawyers and civilians it is defined *lex non scripta*, and it stands opposed to *lex scripta*, or the written law. It is the rule of law when it is derived from A.D. 1189 downwards. Sixty years' custom is binding in the civil law, and forty years' in ecclesiastical cases.

CUSTOM-HOUSE. That of London is of early institution (see *Billingsgate*), as customs were collected in a regular manner in the tenth century. A custom-house was erected on a large scale, 1304; and a yet larger in 1559. The last was burnt down in 1666. A new one built by Charles II. was burnt down in 1718, and again rebuilt. The custom-house was once more burnt down, and immense property and valuable records destroyed, Feb. 12, 1814. The present edifice was opened May 12, 1817.—The Dublin custom-house was commenced in 1781, and was opened in 1791. The eastern wing of its warehouse was destroyed by fire, with property to the amount of 400,000*l.* Aug. 9, 1833.

CUSTOMS were collected upon merchandise in England, under Ethelred II. in 979. The king's claim to them by grant of parliament was established 3 Edw. I. 1274. The customs were farmed to sir Thomas Smith for annual sums varying from 14,000*l.* to 50,000*l.* in the reign of Elizabeth. *Stow*. They were farmed by Charles II. for 390,000*l.* in 1666. *Davenant*. In 1671 commissioners were appointed. The customs were consolidated by Mr. Pitt in 1787. Between 1820 and 1830 so many reductions and consolidations were made in the customs department, that above a quarter of a million was saved in salaries, though the work has enormously increased.—Acts consolidating the customs duties were passed in 1853, 1854, and 1860, whereby the number of articles in the tariff was greatly reduced. See *Revenue*. Custom-house officers and officers of excise were disqualified from voting for the election of members of parliament, in 1782.

The customs in	The customs in	The customs in	The customs in
1580 £14,000	1684 £530,000	1830 £17,540,323	1855 £20,987,752
1592 50,000	1720 1,555,600	1835 18,612,906	1857 21,276,743
1614 148,000	1748 2,000,000	1840 19,915,296	1858 23,018,138
1622 168,000	1808 9,973,240	1845 20,196,856	1859 23,768,981
1642 500,000	1823 11,498,762	1850 20,442,170	1861 22,755,338

The customs in Ireland were, in the year 1224, viz., on every sack of wool 3*d.*; on every last of hides 6*d.*; and 2*d.* on every barrel of wine. *Annals of Dublin*.

The customs business of Ireland was transferred to the London board Jan. 6, 1830

CUTLERY. See *Steel*.

CUTTING-OUT MACHINES. Wearing apparel was first cut out by machinery in England in the factory of Messrs. Hyams in 1853. The machine, invented by Mr. Frederick Osbourn, consists of a reciprocating vertical knife working through a slot in the table that supports the pile of cloth to be cut. The cloth being pressed up to the edge of the knife by the attendant, the knife will sever it in the direction of the lines marked on the upper layer. This system of cutting out is now generally adopted in the slop-work trade, and, with the aid of the sewing-machine (*which see*), has tended greatly to improve the condition of the persons employed in the manufacture of wearing apparel for the home and foreign markets.

CYANOGEN, a colourless gas, (composed of nitrogen and carbon,) derived from Prussian blue, irritating to the nose and eyes, was discovered by Gay Lussac in 1814: an important chemical event.

CYCLE. That of the sun is the twenty-eight years before the days of the week return to the same days of the month. That of the moon is nineteen lunar years and seven intercalary months, or nineteen solar years. The cycle of Jupiter is sixty years, or sexagenary. The Paschal cycle, or the time of keeping Easter, was first calculated for the period of 532 years by Victorius, A.D. 463. *Blair*. See *Calippic Period*.

CYCLOPÆDIA. See *Encyclopædia*.

CYCLOPEAN MASONRY, a term given to very ancient buildings in Greece, Italy, and Asia Minor, probably the work of the Pelasgi, more than 1000 B.C.

CYMBAL. The oldest known musical instrument was made of brass, like a kettle-drum, and some think in the same form, but smaller. Xenophon mentions the cymbal as invented by Cybele, who, we are told, used it in her feasts, about 1580 B.C. The festivals of Cybele were introduced by Scamander, with the dances of the Corybantes, at Mount Ida, 1546 B.C.

CYMRI or **KYMRI** (hence Cambria), the name of the ancient British who belonged to the great Celtic family, which came from Asia and occupied a large part of Europe about 1500 B.C. About A.D. 640 Dyvnwal Moelmud reigned "*King of the Cymry*." See *Wales*.

CYNICS, a sect of philosophers founded by Antisthenes, (396 B.C. *Diog. Laert.* 365 B.C. *Clinton*.) who professed to condemn all worldly things, even all sciences, except morality; were very free in reprehending vice; lived in public, and practised great obscenities without blushing. Diogenes was one.

CYNOSCEPHALÆ (*dogs' heads*, so named from the shape of the heights), in Thessaly, where Pelopidas and the Thebans defeated Alexander tyrant of Phæræ and the Thessalians, 364 B.C. (Pelopidas being slain); and where the consul Flaminius totally defeated Philip V. of Macedon, 197 B.C., and ended the war.

CYPRESS, *Cupressus Sempervirens*, a tree whose wood has an agreeable smell, and scarcely ever decays or takes the worm; it was originally found in the isle of Cyprus. The Athenians buried their heroes in coffins made of this wood, of which many of the Egyptian mummy-chests were also fabricated. The ancients planted it in cemeteries. The cypress was brought to England about A.D. 1441. The deciduous cypress, or *Cupressus disticha*, came from North America before the year 1640.

CYPRUS, an island in the Mediterranean, whose inhabitants anciently were much given to love and pleasure. *Pliny*. It was divided among several petty kings till the time of Cyrus of Persia, who subdued them. It was taken by the Greeks 477 B.C., and ranked among the proconsular provinces in the reign of Augustus. Conquered by the Saracens, A.D. 648; but recovered by the Romans, in 957. Cyprus was reduced by Richard I. of England, in 1191. He gave it to Guy de Lusignan, who became king in 1192, and whose descendants reigned till the last, Catherine de Cornaro, sold it to the Venetians, 1489, from whom it was taken by the Turks, 1571. They still retain it.

CYR, ST., near Versailles, where a conventual college for ladies was founded by Madame De Maintenon in 1686. It is now a military college.

CYRENAIC SECT, founded by Aristippus the Elder, 365 B.C. They maintained the doctrine that the supreme good of man in this life is pleasure, particularly that of the senses; and said that even virtue ought to be commended only because it gave pleasure.

CYRENE (N.W. Africa), a Greek colony, founded by Battus about 630 B.C. Aristæus, who was chief of the colonists here, gave the city his mother's name. It was also called Pentapolis, on account of its five towns; namely, Cyrene, Ptolemais, Berenice, Apollonia, and Arsinoë. It was conquered by Ptolemy Soter I., who placed many Jews here (286 B.C.). Cyrene was left by Ptolemy Apion to the Romans, 97 B.C. It is now a desert. Some Cyrenaic sculptures were placed in the British Museum in July, 1861.

CYZICUS (Asia Minor). In the Peloponnesian war, the Lacedæmonian fleet under the command of Mindarus, assisted by Pharnabazus, the Persian, was encountered by the Athenians under Alcibiades, and defeated with great slaughter, near Cyzicus. Mindarus was slain 410 B.C. *Plutarch.* 408 B.C. *Lenglet.*

CZAR, from Cæsar, title assumed by the sovereigns of Russia. Ivan Basilowitz having achieved great triumphs over the Tartars took the title of Tzar or Czar about 1482. The eldest son is called Czarowitz, and the empress Czarina.

D.

DACIA, a Roman province, part of Hungary and the adjoining provinces. After many contests it was subdued by Trajan, A.D. 106, when Decebalus, the Dacian leader, was killed in battle. Dacia was abandoned to the Goths by Aurelian, in 270; subdued by the Huns, 376; by Scythians, 566; by Charlemagne; and by the Magyars, in the ninth century.

DAGHISTAN (S.W. Asia), was conquered by the czar Peter, 1723; restored to Persia, 1735; but re-annexed to Russia by Alexander I., 1813.

DAGUERREOTYPE PROCESS, invented by Daguerre, 1838. See *Photography*.

DAHLIA. This beautiful flower was brought from Mexico, of which it is a native, in the present century. It was first cultivated by the Swedish botanist, professor Dahl, and soon became a favourite in England. In 1815, about two months after the battle of Waterloo, it was introduced into France, and the celebrated florist André Thouine suggested various practical improvements in its management. The botanist Georgi shortly before introduced it at St. Petersburg; hence the dahlia is known in Germany as the *Georgina*.

DAHRA (Algeria). In June, 1845, about 600 Kabyles at war with the French were suffocated in a cave by smoke, the fire having been kindled by order of general Pellissier, now duke of Malakhoff. They had fired on the messenger bearing an offer of a truce. The massacre was condemned by marshal Soult, the minister of war, but justified by marshal Bugeaud.

DALECARIANS (Sweden), revolted against Christian of Denmark, 1521, and placed Gustavus Vasa on the throne of Sweden.

DALMATIA, an Austrian province, N.E. of the Adriatic Sea, was finally conquered by the Romans, 34 B.C. The emperor Diocletian erected his palace at Spalatro, and retired there, A.D. 305. Dalmatia was held in turns by the Goths, Hungarians, and Turks, till its cession to Venice in 1699. By the treaty of Campo Formio in 1797 it was given to Austria. In 1805 it was incorporated into the kingdom of Italy, and gave the title of duke to marshal Soult. In 1814 it reverted to Austria.

DALTONISM. See *Colour*, note.

DAMASCUS (Syria), a city in the time of Abraham, 1913 B.C. (*Gen.* xiv.), consequently one of the most ancient in the world. It was taken by David (1040 B.C.) but retaken shortly after, and became the capital of Syria under Benhadad and his successors, 951 B.C. In 740 B.C. it was taken by Tiglath-Pileser, king of Assyria. From the Assyrians it passed to the Persians, and from them to the Greeks under Alexander; and afterwards to the Romans, about 70 B.C. It was taken by the Saracens, A.D. 633; by the Turks in 1075; and was destroyed by Tamerlane in 1400. In a journey to this place the apostle Paul was miraculously converted, and here he began to preach the gospel about A.D. 52.—Damascus now is the capital of a Turkish pachalic. It was taken by Ibrahim Pacha in 1832. The disappearance of a Greek priest, named Father Tommaso, from here, Feb. 1, 1840, led to the torture of a number of Jews, suspected of his murder, and to a cruel persecution of that people, which caused remonstrances from many states of Europe. On July 9, 10, and 11, 1860, in consequence of a dispute between the Druses and Maronites, the Mahomedans massacred above 3000 Christians and destroyed the houses, rendering vast numbers of persons homeless and destitute. A large number were rescued by Abd-el-Kader, who held the citadel. Summary justice was executed for these crimes by Fuad Pasha; in Aug. and Sept. 160 persons of all classes were executed, including the Turkish governor; and 11,000 were made soldiers by conscription.

DAMASK LINENS AND SILKS were first manufactured at Damascus; hence the name. They were beautifully imitated by the Dutch and Flemish weavers; and the manufacture was brought to England by artisans who fled from the persecution of the cruel duke of Alva, between 1571 and 1573. *Anderson*.

DAMASK ROSE, transplanted from Damascus, was brought here from the south of Europe and Marseilles by Dr. Linacre, physician to Henry VIII., about 1540.

DAMIENS' ATTEMPT. Louis XV. of France was stabbed with a knife in the right side by Damiens, a native of Arras, Jan. 5, 1757. The culprit endured the most excruciating tortures, nearly similar to those of the regicide Ravallac, and was then broken on the wheel, March 28 following. See *Ravallac*.

DAMIETTA (Lower Egypt), was built about 1250. Here it is said was first manufactured the cloth termed *dimity*.

DAMON AND PYTHIAS (or Phintias), Pythagorean philosophers. When Damon was condemned to death by the tyrant Dionysius of Syracuse, about 387 B.C., he obtained leave to go and settle some domestic affairs, on the promise of returning at the appointed time of execution, and Pythias became surety for the performance of his engagement. When the fatal hour approached, Damon did not appear, and Pythias surrendered himself, and was led away to execution; but at this critical moment Damon returned to redeem his pledge. Dionysius was so struck with their fidelity that he remitted the sentence and entreated them to permit him to share their friendship.

DANCE OF DEATH. The triumph of death over all ranks of men was a favourite subject with the artists of the middle ages, and appears in rude carvings and pictures in various countries. The *Chorea Machabæorum* or *Danse Macabre* was the first printed representation, published by Guyot Marchand, a bookseller of Paris, in 1485. Holbein's celebrated *Dance of Death* (concerning the authorship of which there has been much controversy) was printed at Lyons in 1538; and at Basil, 1594. Since then many editions have appeared; one with an introduction and notes was published by Mr. Russell Smith in 1849.—The term *Dance of Death* was also applied to the frensied movements of the Flagellants, who had

sometimes skeletons depicted on their clothing, about the end of the 14th century. The *Dancing Mania*, accompanied by aberration of mind and distortions of the body, was very prevalent in Germany in 1374. In Italy it was termed Tarantism, as supposed to be caused by the bite of the Tarantule spider, and abounded in the 15th century. The music and songs employed for its cure are still preserved.

DANCING to the measure of time was invented by the Curetes, 1534 B.C. *Eusebius*. The Greeks were the first who united the dance to their tragedies and comedies. Pantomimic dances were first introduced on the Roman stage, 22 B.C. *Usher*. Dancing by cinque paces was introduced into England from Italy, A.D. 1541. In modern times the French were the first who introduced *ballets analogues* in their musical dramas. The country dance (*contredanse*) is of French origin, but its date is not precisely known. *Spelman*. The waltz and quadrille were introduced into England about 1813. See *Morice Dance*.

DANE-GELD, or DANEGELD, a tribute paid to the Danes to stop their ravages in this kingdom; first raised by Ethelred II. in 991, and again in 1003; and levied after the expulsion of the Danes to pay fleets for clearing the seas of them. The tax was suppressed by Edward the Confessor in 1051; revived by William the Conqueror, 1068; and formed part of the revenue of the crown, until abolished by Stephen, 1136. Every hide of land, *i.e.* as much as one plough could plough, or as *Bede* says, maintain a family, was taxed at first 1s., afterwards as much as 7s.

DANES. See *Denmark*. Their invasions were a scourge to England for nearly three hundred years. During their attacks upon Britain and Ireland they made a descent on France, where, in 895, under Rollo, they received presents under the walls of Paris. They returned and ravaged the French territories as far as Ostend in 896. They attacked Italy in 903. Neustria was granted by the king of France to Rolla and his Normans (North-men), hence Normandy, in 911. The invasions of England and Ireland were as follows:—

First hostile appearance of the Danes	A.D. 783	Ravage Cornwall, Devon, and Dorset	A.D. 982
They land near Purbeck, Dorset	787	And ravage Essex and Suffolk	990
Descend in Northumberland; are repelled, and perish by shipwreck	794	Said to assume the title <i>lord dane</i> about	991
They invade Scotland and Ireland	795, 796	Their fleet defeated after a breach of treaty, purchased by money	992
They enter Dublin with a fleet of 60 sail and possess themselves of Dublin, Fingal, and other places	798	They land in Essex, and in the west, and are paid a sum of money (£6,000 <i>l.</i>) to quit the kingdom	994
They take the Isle of Sheppey	832	A general massacre of the Danes by order of Ethelred II.	Nov. 13, 1002
Defeated at Hengeston, in Cornwall, by Egbert	836	Swein revenges the death of his countrymen, and receives 36,000 <i>l.</i> (which he afterwards demands as an annual tribute) to depart	1003
They land in Kent from 350 vessels, and take Canterbury and London	851	Their fleet anchors at Isle of Wight	1006
They descend on Northumberland, and take York	867	They make fresh inroads, and defeat the Saxons in Suffolk	1010
They defeat the Saxons at Merton	871	They sack Canterbury, imprison the archbishop, and kill the inhabitants	1011
They take Wareham and Exeter	876	Vanquished at Clontarf, Ireland (see <i>Clontarf</i>)	1014
They take Chippenham: but 120 of their ships are wrecked	877	Their conquest of England completed	1017
Defeated; Guthrum their leader becomes Christian, and many settle in England	878	They settle in Scotland	1020
Alfred enters into a treaty with them	882	They land again at Sandwich, carrying off much plunder to Flanders	1047
Their fleet totally destroyed by Alfred at Apple-dore	894	They burn York and kill 3000 Normans	1069
Defeated near Isle of Wight	897	Once more invade England to aid a conspiracy; but compelled to depart	1074
They invade and waste Wales	900		
Defeated by Edward the Elder	922		
They defeat the people of Leinster, whose king is killed	956		

DANGEROUS ASSOCIATIONS (IRELAND) BILL. See *Roman Catholic Association*.

DANTZIC (N. Germany), a commercial city in A.D. 997; according to other authorities, built by Waldemar I. in 1165. Poland obtained the sovereignty of it in 1454. Seized by the king of Prussia, and annexed to his dominions in 1793. It surrendered to the French after a siege of four months, May, 1807; and by the treaty of Tilsit was restored to its former independence, under the protection of Prussia and Saxony. Dantzic was besieged by the allies in 1812; and, after a gallant resistance, surrendered to them, Jan. 1, 1814. By the treaty of Paris it again reverted to the king of Prussia. Awful inundation here, owing to the Vistula breaking through its dykes, by which 10,000 head of cattle and 4000 houses were destroyed, and a vast number of lives lost, April 9, 1829.

DANUBE (German, Donau; anciently Ister, in its lower part). Except the Wolga, the largest river in Europe, rising in the Black Forest and falling into the Black Sea. Its navigation has been considered an object of great importance, from the time of Trajan to the present time. Part of Trajan's bridge at Gladova still remains. It was destroyed by

Adrian, to prevent the barbarians entering Dacia. Steam navigation was projected on this river by count Szenechyi in 1830, and in that year the first steam-boat was launched at Vienna, and the Austrian company was formed shortly after. The Bavarian company was formed in 1836. Charlemagne, in the eighth century, contemplated uniting the Danube and Rhine by a canal, and actually began a work which was lately completed by the Bavarian government. At the peace of 1856 the free navigation of the Danube was secured.

DANUBIAN PRINCIPALITIES ; WALLACHIA and MOLDAVIA ; capitals, Bucharest and Jassy. These provinces formed part of the ancient Dacia, which was conquered by Trajan about A.D. 103, and abandoned by Aurelian about 270. For some time after they were alternately in the possession of the barbarians and the Greek emperors ; and afterwards of the Hungarians. In the thirteenth century they were subdued by the Turks, but permitted to retain their religious customs, &c. In 1812 part of Moldavia was ceded to Russia. The provinces having participated in the Greek insurrection in 1821, were afterwards severely treated by the Turks ; but by the treaty of Adrianople in 1829 they were placed under the protection of Russia. In June, 1849, the Porte appointed as hospodars prince Stirbey for Wallachia, and prince Ghika for Moldavia, who retired from their governments when the Russians crossed the Pruth, and entered Moldavia in July 2, 1853. See *Russo-Turkish War*. The Russians quitted these provinces in Sept. 1854, and an Austrian army entered (by virtue of a convention between the sultan and Austria), and remained there till March, 1857.* Prince Alexander Cousa was elected prince of Moldavia, Jan. 17, and of Wallachia, Feb. 5, 1859. The population of the two was 4,200,000 in 1860.

DARDANELLES, THE, are two castles, one called Sestos, in Romania, the other called Abydos, in Natolia, commanding the entrance of the strait of Gallipoli. They were built by the emperor Mahomet IV. in 1659, and were named Dardanelles from the contiguous town Dardanus.—The gallant exploit of forcing the passage of the Dardanelles was achieved by the British squadron under admiral sir John Duckworth, Feb. 19, 1807 ; but the admiral was obliged to repass them, which he did with great loss and immense damage to the fleet, March 2, following, the castles of Sestos and Abydos hurling down rocks of stone, each or many tons weight, upon the decks of the British ships. The allied English and French fleets passed the Dardanelles at the sultan's request, Oct. 1853.

DARIC, a Persian gold coin, issued by Darius, hence its name, about 538 B.C. About 556 cents. *Knowles*. It weighed two grains more than the English guinea. *Dr. Bernard*.

DARIEN, ISTHMUS OF, Central America. About 1694, William Paterson, founder of the Bank of England, published his plan for colonising Darien. In consequence a company was formed in 1695 and three ill-fated expeditions sailed there in 1698 and 1699, from Scotland, where 400,000*l.* had been raised. The first consisted of 1200 young men of all classes, besides women and children. The enterprise not having been recognised by the English government, the settlements were threatened by the Spaniards, to whom they were finally surrendered, March 30, 1700. Paterson and a few survivors from famine and disease, had set off shortly before the arrival of the second expedition. Several years after, a sum of 398,085*l.* was voted by parliament to the survivors as "Equivalent money." A sum of money was also voted to Paterson ; but the bill was rejected in the house of lords. See *Panama*.

DARK AGES, a term applied to the period of time called the *Middle Ages* ; according to Hallam, comprising about 1000 years—from the invasion of France by Clovis, A.D. 486, to that of Naples by Charles VIII. 1495. During this time learning was at a low ebb.

DARTFORD (Kent). Here commenced the insurrection of Wat Tyler, 1381. A convent of nuns, of the order of St. Augustin, endowed here by Edward III., 1355, was converted by Henry VIII. into a royal palace. The first paper-mill in England was erected at Dartford by sir John Speilman, a German, in 1590 (*Stow*), and about the same period was erected here the first mill for splitting iron bars. The powder-mills here were blown up four times between 1730 and 1738. Various explosions have since occurred, in some cases with loss of life to many persons : Oct. 12, 1790 ; Jan. 1, 1795 ; and more recently.

DARTMOUTH (Devon). Burnt by the French in the reigns of Richard I. and Henry IV. In a third attempt (1404), the invaders were defeated by the inhabitants, assisted by the

* After the peace of 1856, much discussion and even dissension arose between the European powers with respect to the government of these principalities. It was finally settled at the eighteenth sitting of the Paris conference, Aug. 19, 1858. There were to be two hospodars, elected by elective assemblages, and the suzerainty of Turkey was to be preserved. In February, 1859, Alexander Cousa was elected hospodar of both principalities, and the election was acknowledged by the allies as an exceptional case (Sept. 6). The definitive union of the provinces was acknowledged by the porte in Dec. 1861. On June 20, 1862, M. Catargi, the president of the council of ministers, was assassinated as he was leaving the chamber of deputies.

valour of the women. The French commander, Du Chastel, three lords, and thirty-two knights were made prisoners. In the war of the parliament, Dartmouth was taken after a siege of four weeks, by prince Maurice, who garrisoned the place for the king (1643); but it was retaken by general Fairfax by storm in 1646.

DATES were affixed to grants and assignments 18 Edw. I. 1290. Before this time it was usual at least to pass lands without dating the deed of conveyance. *Lewis*. Numerous instruments of assignment enrolled among our early records establish this fact. The date is determined by the names of the parties, particularly that of the grantor: the possession of land was proof of the title to it. *Hardie*. A useful glossary of the dates given in old charters and chronicles will be found in Nicolas's "Chronology of History."

DAUPHIN. It is a vulgar error to suppose that, by the treaty of 1343, which gave the full sovereignty of Dauphiny to the kings of France, it was stipulated that the eldest son of the king should bear the title of dauphin. So far from it, the first dauphin named in that treaty was Philip, second son of Philip of Valois. *Hénault*. The late duke of Orleans, eldest son of Louis-Philippe, was not called the dauphin.

DAVID'S, Str. (S.W. Wales), the ancient Menapia, now a poor decayed place, but once the metropolitan see of Wales, and archiepiscopal. When Christianity was planted in Britain, there were three archbishops' seats appointed, viz. London, York, and Caerleon upon Usk, in Monmouthshire. That at Caerleon being too near the dominions of the Saxons, was removed to Menew, and called St. David's, in honour of the archbishop who removed it, A.D. 519. St. Sampson was the last archbishop of the Welsh; for he, withdrawing himself on account of a pestilence to Dôle, in Brittany, carried the pall with him; but his successors preserved the archiepiscopal power, although they lost the name. In the reign of Henry I. these prelates were forced to submit to the see of Canterbury. *Beatson*. Present income 4500*l*.

RECENT BISHOPS OF ST. DAVID'S.

1800. Lord George Murray, died June 3, 1803.	1825. John Banks Jenkinson, died July 7, 1840.
1803. Thomas Burgess, translated to Salisbury, June, 1825.	1840. Connop Thirlwall (PRESENT bishop, 1862).

DAVID'S DAY, Sr., March 1, is annually commemorated by the Welsh, in honour of St. David. Tradition states that on St. David's birthday a great victory was obtained by the Welsh over their Saxon invaders; that the Welsh soldiers were distinguished by order of St. David by a leek in their cap. In memory of this circumstance, the Welsh still wear a leek in their hats on the 1st of March.

DAVIS'S STRAIT (N. America), discovered by the English navigator, John Davis, on his voyage to find a N. W. passage, between 1585 and 1587. He made two more voyages for the same purpose, and afterwards performed five voyages to the East Indies. In the last he was killed by Japanese pirates, in the Indian seas, on the coast of Malacca, Dec. 27, 1605.

DAY. Day began at sunrise among most of the northern nations, and at sunset among the Athenians and Jews. Among the Romans, day commenced at midnight, as it now does among us. The Italians in many places, at the present time, reckon the day from sunset to sunset, making their clocks strike twenty-four hours round, instead of dividing the day, as is done in all other countries, into equal portions of twelve hours. This mode is but partially used in the larger towns of Italy; most public clocks in Florence, Rome, and Milan, being set to the hour designated on French or English clocks. The Chinese divide the day into twelve parts of two hours each. Our civil day is distinguished from the astronomical day, which begins at noon, is divided into twenty-four hours (instead of two parts of twelve hours), and is the mode of reckoning used in the Nautical Almanack. At Rome, day and night were first divided in time by means of water-clocks, the invention of Scipio Nasica, 158 B.C.

DEACONS (*literally servants*), an order of the Christian priesthood, which took its rise from the institution of seven deacons by the Apostles, which number was retained a long period in many churches, about A.D. 53. (*Acts* vi.) The original deacons were Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolas. The qualifications of a deacon are mentioned by St. Paul (A.D. 65), 1st *Timothy* iii. 8—13.

DEACONESSES, or ministering widows, are mentioned in early Christian history. Their qualifications are given in 1 *Tim.* v. 9, A.D. 65. Their duties were to visit the poor and sick, assist at the agapæ or love feasts, admonish the young women, &c. The office was discontinued in the Western church in the fifth and six centuries, and in the Greek church about the twelfth, but has been recently revived in Germany.

DEAD, PRAYERS FOR, began about A.D. 190. *Eusebius*. See *Prayer*.

DEAF AND DUMB. The first systematic attempt to instruct the deaf and dumb was made by Pedro de Ponce, a Benedictine monk of Spain, about A.D. 1570. Bonet, also a monk, published a system at Madrid in 1620. Dr. Wallis published a work in England on the subject in 1650. The first regular academy for the deaf and dumb in Britain was opened in Edinburgh in 1773. In modern times the abbé de l'Épée (1712-89), and his friend and pupil the abbé Sicard of Paris (1742-1822); the rev. Mr. Townsend and Mr. Baker, of London; Mr. Braidwood of Edinburgh; and surgeon Orpen, of Dublin, have laboured with much success in promoting the instruction of the deaf and dumb. The asylum for the deaf and dumb children was opened in London through the exertions of Mr. Townsend, in 1792; one in Edinburgh by Mr. J. Braidwood, in 1810; and one in Birmingham by Mr. T. Braidwood, in 1815. The asylum at Claremont, Dublin, was opened in 1816. In 1851, there were in Great Britain, 12,553 deaf and dumb out of a population of 20,959,477.

DEAN, FOREST OF, Gloucestershire. Anciently it was wooded quite through, and of great extent; and in the last century, though much curtailed, was twenty miles in length and ten in breadth. It was famous for its oaks, of which most of our former ships of war were made. The memorable riots in this district, when more than 3000 persons assembled in the forest, and demolished upwards of fifty miles of wall and fence, throwing open 10,000 acres of plantation, took place on June 8, 1831.

DEATH, PUNISHMENT OF. Drowning in a quagmire was a punishment among the Britons, about 450 B.C. *Stow*. The ancients inflicted death by crucifixion, and even women suffered on the cross. Mithridates, a Persian soldier, who boasted that he had killed Cyrus the Younger, at the battle of Cumaxa, was by order of Artaxerxes Mnemon eighteen days in a state of torture exposed to the action of the sun. Maurice, the son of a nobleman, was hanged, drawn, and quartered for piracy, the first execution in that manner in England, 25 Hen. III. 1241. The punishment of death was abolished in a great number of cases by sir R. Peel's acts, 4 to 10 Geo. IV. 1824-9; and by the criminal law consolidation acts of 1861, was confined to treason and wilful murder. See *Rasvaillac*, *Boiling*, *Burning*, *Hanging*, *Forgery*, and *Execution*.

DEATHS, REGISTERS OF. See *Bills of Mortality and Registers*.

DEBT. See *National Debt*.

DEBTORS. See *Bankrupts and Insolvents*. Debtors have been subjected to imprisonment in almost all countries and times; and until the passing of the later bankrupt laws and insolvent acts, the prisons of these countries were crowded with debtors to an extent that is now scarcely credible. It appears by parliamentary returns that in the eighteen months subsequent to the panic of December, 1825, as many as 101,000 writs for debts were issued from the courts in England. In the year ending 5th Jan. 1830, there were 7114 persons sent to the several prisons of London; and on that day, 1547 of the number were yet confined. On the 1st of Jan. 1840, the number of prisoners for debt in England and Wales was 1732; in Ireland the number was under 1000; and in Scotland under 100. The operation of statutes of relief, and other causes, considerably reduced the number of imprisoned debtors. When the new Bankruptcy Act (abolishing imprisonment for debt except when fraudulently contracted) came into operation, in Nov. 1861, a number of debtors who had been confined, were released. In 1862 the removal of the Queen's Bench Prison was proposed to parliament. Arrest of Absconding Debtors bill, 14 & 15 Vict. c. 52, 1852. See *Arrest*.

DEBUSCOPE, an instrument of French origin, somewhat similar to the kaleidoscope, said to be useful for devising patterns for calico-printers, &c., made its appearance in 1860.

DECAMERONE (10 days). See *Boccaccio*.

DECEMBER (from *decem*, ten), the tenth month of the year of Romulus, commencing in March. In 713 B.C. Numa introduced January and February before March, and thenceforward December became the twelfth of the year. In the reign of Commodus, A.D. 181-192, December was called, by way of flattery, Amazonius, in honour of a courtesan whom that prince had loved, and had painted like an Amazon. The English commenced their year on the 25th December, until the reign of William the Conqueror. See *Year*.

DECEMVIRI, or Ten Men, who were appointed to draw up a code of laws, and to whom for a time the whole government of Rome was committed, 451 B.C. The laws they drew up were approved by the senate and general assembly of the people, written on ten metallic tables, and set up in the place where the people met (*comitium*), 450 B.C. The decemviri at first ruled well, but the tyranny of Appius Claudius towards Virginia occasioning an insurrection, they were forced to resign; and consuls were again appointed, 449 B.C.

DECENNALIA, festivals instituted by Augustus, 17 B.C., celebrated by the Roman emperors every tenth year of their reign, with sacrifices, games, and largesses. *Livy*. And celebrated by Antoninus Pius, A.D. 148. They do not appear to have been continued after the reigns of the Cæsars.

DECIMAL SYSTEM OF COINAGE, WEIGHTS, &c., was established in France in 1790, and shortly after in some other countries. Sir John Wrottesley brought the subject before the British parliament, Feb. 25, 1824, but it was not till May, 1838, that a commission of inquiry was appointed at the instance of the then chancellor of the exchequer, Mr. Spring Rice, since lord Monteagle. In June 20, 1843, another commission was appointed. Both consisted of eminent scientific men, and both reported strongly in favour of the change. A committee of the house of commons reported to the same effect, Aug. 1, 1853. Mr. Gladstone, however, while admitting the advantages of the system, thought its introduction premature. In June, 1854, the Decimal association was formed for the purpose of obtaining the adoption of the system. In Nov. 1855, another commission for inquiry was appointed, consisting of lords Monteagle and Overstone and Mr. J. G. Hubbard, who published a preliminary report (with evidence), but expressed no opinion on the subject. The decimal currency was adopted in Canada, Jan. 1, 1858. An International Decimal association was formed in 1855. The new weights and measures bill, passed in 1862, is an approximation to the decimal system. The decimal coinage was adopted by Denmark in 1861.

DECLARATION OF RIGHTS. See *Rights*.

DECORATIVE ART. The true principles of decoration enunciated by A. W. Pugin, in his "Designs" published in 1835, have since been greatly advanced by Owen Jones, Redgrave, and others. A Decorative Art society, founded in 1844, existed for a short time only.

DE COURCY'S PRIVILEGE, that of standing covered before the king, granted by king John to John de Courcy, baron of Kingsale, and his successors, in 1203. He was the first nobleman created by an English sovereign, 27 Hen. II. 1181; and was entrusted with the government of Ireland, 1185. The privilege has been exercised in most reigns, and was allowed to the baron of Kingsale by Will. III., Geo. III. and by Geo. IV. at his court held in Dublin, in Aug. 1821. The present baron is the 29th in succession.

DECRETALS. The decretals formed the second part of the canon law, or collection of the pope's edicts and decrees and the decrees of councils. The first of these acknowledged to be genuine is a letter of Siricius to Himerus, the bishop of Spain, written in the first year of his pontificate, A.D. 385. *Howel*. Certain false decretals were used by Gregory IV. in 837. The decretals of Gratian, a Benedictine (a collection of canons), were compiled in 1150. *Hénault*. Five books were collected by Gregory IX. 1227; a fifth by Boniface VIII. in 1297; the Clementines by Clement V. in 1313; employed by John XXII. in 1317: the Extravagantes range from 1422 to 1483.

DEDICATION of the Jewish tabernacle took place 1490 B.C.; of the temple 1004 B.C.; of the second temple, 515 B.C. The Christians under Constantine built new churches, and dedicated them with great solemnity, in A.D. 331, *et seq.* The dedication of books (by authors to solicit patronage, or testify respect) began in the time of Mæcenas, 17 B.C. He was the friend and counsellor of Augustus Cæsar, and a patron of genius and learning; hence it is customary to style any nobleman, imitating his example, a Mæcenas.

DEED, a written contract or agreement. The formula, "I deliver this as my act and deed," occurs in a charter of A.D. 933. *Fosbroke*. Deeds in England were formerly written in the Latin and French languages: the earliest known instance of the English tongue having been used is the indenture between the abbot of Whitby and Robert Bustard, dated at York, in 1343. See *English*.

DEFAMATION. The jurisdiction of the ecclesiastical courts on this subject was abolished by 18 & 19 Vict. c. 41 (1855).

DEFENCE OF THE REALM ACT was passed in August, 1860, in consequence of the unsettled state of Europe, aggravated by the doubtful policy of the emperor Napoleon. See *Portification*.

DEFENDER OF THE FAITH (*Fidei Defensor*), a title conferred by Leo X. on Henry VIII. of England, because the king wrote a tract in behalf of the Church of Rome, then accounted *Domicilium fidei Catholicae*, and against Luther, who had just begun the Reformation in Germany, Oct. 9, 1521. The title is still retained by the British sovereign.

DEFENDERS, a faction in Ireland, which arose out of a quarrel between two residents of Market-hill, July 4, 1784. Each was soon aided by a large body of friends, and many battles ensued. On Whit-Monday, 1785, an armed assemblage of one of the parties (700

men), called the *Nappagh Fleet*, prepared to encounter the *Bawn Fleet*, but the engagement was prevented. They subsequently became religious parties, Catholic and Presbyterian, distinguished as *Defenders* and *Peep-o'-day-boys*: the latter were so named because they usually visited the dwellings of the Defenders at daybreak in search of arms. *Sir Richard Musgrave*.

DEGREES. Eratosthenes attempted to determine the length of a geographical degree about 250 B.C. *Snellius*. *Collegiate degrees* are coeval with universities. Those in medicine are traced up to A.D. 1384; in music to 1463. See *Latitude* and *Longitude*.

DEI GRATIA. See *Grace of God*.

DEIRA, a part of the Anglo-Saxon kingdom of Northumbria. See *Britain*.

DEISM or **THEISM** (Greek, *theos*, Latin, *deus*, God), the belief in a God. About the middle of the sixteenth century some gentlemen of France and Italy termed themselves *deists*, to disguise their opposition to Christianity by a more honourable appellation than that of Atheism (*which see*). Deists reject revelation and profess to go by the light of nature, believing that there is a God, a providence, vice and virtue, and an after-state of punishments and rewards: they are sometimes called free-thinkers. The most distinguished deists were first Herbert, baron of Cherbury, in 1624; then Hobbes, Tindal, Morgan, lord Bolingbroke, Hume, Holcroft, and Godwin.

DELEGATES, COURT OF. Appeals to the pope in ecclesiastical causes having been forbidden (see *Appeals*), those causes were for the future to be heard in this court, established by stat. 24 Henry VIII. 1532; soon afterwards the pope's authority was superseded altogether in England. *Stow*. This court was abolished; and appeals now lie to the Judicial Committee of the Privy Council, as fixed by 3 & 4 Will. IV. c. 41 (1833). See *Arches*.

DELFT (S. Holland), a town founded by Godfrey le Bossu, about A.D. 1074; famous for the earthenware known by its name; first manufactured here about 1310. The sale of Dutch delft greatly declined after the introduction of potteries into Germany and England. Delft was an important place during the struggle against Spain. The renowned Grotius was born here, April 10, 1583; and here the great William prince of Orange was assassinated, July 10, 1584, by Gerard.

DELHI, the once great capital of the Mogul empire, and chief seat of the Mahomedan power in India; it was taken by Timour in 1399. It is now in decay, but contained a million of inhabitants in 1700. In 1739, when Nadir Shah invaded Hindostan, he entered Delhi: 100,000 of the inhabitants perished by the sword, and plunder to the amount of 62,000,000*l.* sterling is said to have been collected. The same calamities were endured in 1761, on the invasion of Abdalla, king of Candahar. In 1803, the Mahrattas, aided by the French, took Delhi; but were afterwards defeated by general Lake, and the aged Shah Aulum, emperor of Hindostan, was restored to his throne with a pension. See *India*, 1803. On May 10, 1857, a mutiny arose in the sepoy regiments at Meerut. It was soon checked; but the fugitives fled to Delhi, and combined with other troops there, seized on the city; proclaimed a descendant of the Mogul as king, and committed most frightful atrocities. The rebels were anxious to possess the chief magazine, but after a gallant defence it was exploded by order of lieutenant Willoughby, who died of his wounds shortly after. The other heroes in this exploit were lieutenants Forrest and Rayner, and the gunners Buckley and Scully. Delhi was shortly after besieged by the British, but was not taken till Sept. 20, following. The final struggle began on the 16th; brigadier (since sir Archdale) Wilson being the commander. Much heroism was shown; the gallant deaths of Salkeld and Home at the explosion of the Cashmere gate created much enthusiasm. The old king and his sons were captured soon after: the latter were shot, and the former after a trial was sent for life to Rangoon. See *India*, 1857.

"DELICATE INVESTIGATION," THE, into the conduct of the princess of Wales (afterwards queen of England, as consort of George IV.), was commenced by a committee of the privy council, under a warrant of inquiry, dated May 29, 1806. The members were lord Grenville, lord Erskine, earl Spencer, and lord Ellenborough. The inquiry, of which the countess of Jersey, sir J. and lady Douglass, and other persons of rank were the prompters, and in which they conspicuously figured, led to the publication called "*The Book*;" afterwards suppressed. The charges against the princess were disproved in 1807, and again in 1813; but not being permitted to appear at court, she went on the continent in 1814.

DELLA CRUSCA ACADEMY of Florence merged into the Florentine in 1582.—The **DELLA CRUSCA SCHOOL**, a term applied to some English persons residing at Florence, who wrote and printed a quantity of inferior sentimental poetry and prose in 1785. They came to England where their works were popular for a short time, but were severely satirised by Gifford in his "*Baviad and Mæviad*" (1794-5).

DELOS, a Greek isle, in the *Ægean* sea. Here the Greeks, during the Persian war, 470 B.C., established their common treasury, which was removed to Athens, 461.

DELPHI (N. Greece), celebrated for its enigmatical oracles delivered by Pythia, in the temple of Apollo, which was built, some say, by the council of the Amphictyons, 1263 B.C. The priestess delivered the answer of the god to such as came to consult the oracle, and was supposed to be suddenly inspired. The temple was burnt by the Pisistratidæ, 548 B.C. A new temple was raised by the Alemaonidæ. It was plundered by the people of Phocis of 20,000 talents of gold and silver; and Nero carried from it 500 costly statues. The first Delphic, or sacred war, concerning the temple, began 449 B.C.; the second arose through Delphi being attacked by the Phocians, 356 B.C.

DELPHIN CLASSICS, a collection of thirty-nine of the Latin authors, in 60 volumes, made for the use of the dauphin (*in usum Delphini*) son of Louis XIV., and published in 1674-91. Ausonius was added in 1750. The duc de Montausier, the young prince's governor, proposed the plan to Huet, bishop of Avranches, the dauphin's preceptor; and he, with other learned persons, including Madame Dacier,* edited all the Latin classics except Lucan. Each author is illustrated by notes and an index of words. An edition of the Delphin Classics, with additional notes, &c., was published by Mr. Valpy of London, early in the present century.

DELUGE. The deluge was threatened in the year of the world 1536; and began Dec. 7, 1656, and continued 377 days. The ark rested on Mount Ararat, May 6, 1657; and Noah left the ark, Dec. 18, following. The year corresponds with that of 2348 B.C. *Blair*. The following are the epochs of the deluge according to Dr. Hales:—

Septuagint	B.C. 3246	Persian	B.C. 3103	Playfair	B.C. 2352	Petavius	B.C. 2329
Jackson	3170	Hindoo	3102	Usher	2348	Strauchius	2293
Hales	3155	Samaritan	2998	English Bible	—	Hebrew	2288
Josephus	3146	Howard	2698	Marsham	2344	Vulgar Jewish	2104

In the reign of OGYGES, king of Attica, 1764 B.C., a deluge so inundated Attica, that it lay waste for nearly 200 years. *Blair*. Buffon thinks that the Hebrew and Grecian deluges were the same, and arose from the Atlantic and Bosphorus bursting into the valley of the Mediterranean.† The fabulous deluge of DEUCALION is placed 1503 B.C. according to *Eusebius*. It was often confounded by the ancients with the general flood; but it was 845 years posterior to that event, and was merely a local inundation occasioned by the overflowing of the river Pineus, whose course was stopped by an earthquake between the mounts Olympus and Ossa. Deucalion, who then reigned in Thessaly, with his wife Pyrrha, and some of their subjects, saved themselves by climbing up Mount Parnassus.

DEMERARA AND ESSEQUIBO, colonies in Guiana, South America, founded by the Dutch, 1580, were taken by the British, under major-general Whyte, April 22, 1796, but were restored at the peace of 1802. They again surrendered to the British under general Grinfield and commodore Hood, Sept. 1803, and became English colonies in 1814.

DEMOCRATS, advocates for government by the people themselves (*demos*, *people*, and *kratein*, *to govern*), a term adopted by the French republicans in 1790 (who termed their opponents *aristocrats*, from *aristos*, *bravest* or *best*). The name *Democrats* has been adopted by the pro-slavery party in N. America (the southern states). The abolitionists are called *Republicans*. Into these two great parties a number of smaller ones were absorbed at the presidential election in 1856. In 1860 the Republicans formed "Wide-awake" clubs for electioneering purposes, and succeeded in getting their candidate, Abraham Lincoln, elected president, Nov. 4. See *United States*, 1860.

DENARIUS, the chief silver coin among the Romans, weighing the seventh part of a Roman ounce, and value 7½*d.* sterling, first coined about 269 B.C., when it exchanged for ten ases (see *As*). In 216 B.C. it exchanged for sixteen ases. A pound weight of silver was coined into 100 denarii. *Digby*. A pound weight of gold was coined into twenty denarii aurei in 206 B.C.; and in Nero's time into forty-five denarii aurei. *Lempriere*.

DENIS, Sr., an ancient town of France, near Paris, famous for its abbey and church, the former abolished at the revolution: the latter the place of sepulture of the French kings, from its foundation, by Dagobert, in 613; 's a small, beautiful Gothic edifice. On the 12th October, 1793, the republicans demolished most of the royal tombs, and emptied the leaden

* This beautiful and gifted woman translated *Callimachus* at the age of twenty-three; and also *Anacreon*, *Sappho*, *Plautus*, *Terence*, and *Homer*. She died in 1720.

† A general deluge was predicted to occur in A.D. 1524, and arks were built: but the season happened to be a fine and dry one.

coffins into the dunghills, melting the lead for their own use. By a decree of Bonaparte, dated Feb. 20, 1806, the church (which had been turned meanwhile into a cattle-market!) was ordered to be cleansed out and re-decorated as "the future burial place of the emperors of France." On the return of the Bourbons, more restorations were effected, and when the duc de Berri and Louis XVIII. died, both were buried there. •

DENMARK (N. Europe). The most ancient inhabitants were Cimbri and Teutones, who were driven out by the Jutes or Goths. The Teutones settled in Germany and Gaul; the Cimbrians invaded Italy, where they were defeated by Marius. The peninsula of Jutland obtains its name from the Jutes; and the name of Denmark is supposed to be derived from *Dan*, the founder of the Danish monarchy, and *mark*, a German word signifying country. For their numerous invasions of Britain, &c., see *Danes*. Population of the kingdom of Denmark in 1860, 1,600,551; of the duchies of Schleswig, Holstein, and Lauenburg, 1,004,473; of the colonies, 120,283.

Reign of Setold, first king	B.C. 60	Victory of the Danes over the Holsteiners and Germans	April 10, 1849
The Danish Chronicles mention 18 kings to the time of Ragnar Lodbrog	A.D. 750	Several conflicts with varying success, ...	June, —

KINGS OF DENMARK.

- | | |
|--|--|
| 803. Sigurd Snogole. | 985. Suemon, or Sweyn, the Forked-beard. |
| 824. Hardicanute I. | 1014. Harold III. |
| 855. Gormo, the Old; reigned 53 years. | 1016. Canute II. the Great, king of Denmark and England. |
| 936. Harold II. surnamed Blue Tooth. | |

DENMARK, *continued.*

1035. Canute III.'s son, Hardicanute of England.
 1042. Magnus, surnamed the Good, of Norway.
 1047. Suonon or Sweyn II.
 1073. [Interregnum.]
 1076. Harold called the Simple.
 1080. Canute IV.
 1086. Olaus IV. the Hungry.
 1095. Eric I. styled the Good.
 1103. [Interregnum.]
 1105. Nicholas I. killed at Sleswick.
 1135. Eric II. surnamed Harefoot.
 1137. Eric III. the Lamb.
 1147. [Suonon or Sweyn III. beheaded.]
 1147. Canute V. until 1157.
 1157. Waldemar, styled the Great.
 1182. Canute VI. surnamed the Pious.
 1202. Waldemar II. the Victorious.
 1241. Eric IV.
 1250. Abel; assassinated his elder brother Eric; killed in an expedition against the Frisians.
 1252. Christopher I.: poisoned.
 1259. Eric V.
 1286. Eric V.
 1320. Christopher II.
 1334. [Interregnum of seven years.]
 1340. Waldemar III.
 1375. [Interregnum.]
 1376. Olaus V.
 1387. Margaret, styled the "Semiramis of the North," queen of Sweden, Norway, and Denmark.
 1397. Margaret and Eric VII. (Eric XIII. of Sweden.)
 1412. Eric VII. reigns alone; obliged to resign both crowns.
 1438. [Interregnum.]
 1440. Christopher III. king of Sweden.
 1448. Christian I. count of Oldenburg (*first of the present dynasty*), elected king of Scandinavia, which comprehended Denmark, Sweden, and Norway; succeeded by his son,
 1481. John; succeeded by his son,
 1513. Christian II. called the Cruel, and the "Nero of the North;" among other enormous crimes he caused all the Swedish nobility to be massacred: dethroned for his tyranny in 1523; died in a dungeon in 1559.
 [In this reign Sweden succeeded in separating itself from the crown of Denmark.]
 1523. Frederick I. duke of Holstein, uncle to Christian II.; a liberal ruler.
 1534. Christian III. son of Frederick; established the Lutheran religion; esteemed the "Father of his People."
 1559. Frederick II. son of Christian III.
 1588. Christian IV. son,
 1648. Frederick III.; changed the constitution from an elective to an hereditary monarchy vested in his own family.
 1670. Christian V. son of Frederick III.; succeeded by his son,
 1699. Frederick IV.; leagued with the czar Peter and the king of Poland against Charles XII. of Sweden.
 1730. Christian VI. his son.
 1746. Frederick V. his son: married the princess Louisa of England, daughter of George II.
 1766. Christian VII. his son. See p. 219.
 1784. Regency. The prince Frederick declared regent, in consequence of the mental derangement of his brother.
 1808. Frederick VI. previously regent, now king.
 1839. Christian VIII. son of Frederick, brother of Christian VII.
 1848. Frederick VII. son of Christian VIII.; Jan. 20; born Oct. 6, 1808. The present king (1862).
 [Separated from his first wife, Sept. 1837; from his second wife, Sept. 1846; married *morganatically* Louisa, countess of Danner, Aug. 7, 1850.]
 [Heir: Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, born April 8, 1818.]

DENNEWITZ (Prussia), where a remarkable victory was obtained by marshal Bernadotte (afterwards Charles XIV., king of Sweden), over marshal Ney, Sept. 3, 1813. The loss of the French exceeded 16,000 men, and several eagles; of the allies, 6000. The defeat of Napoleon at Leipzig, on the 18th of October following, closed his disastrous campaign.

DENOMINATIONS, THE THREE (presbyterians, congregationalists or independents, and baptists), were organised in 1727 as an association, with the privilege of direct appeal to the reigning sovereign of Great Britain.

DEODAND (Latin, "*to be given to God*"): formerly anything (such as a horse, carriage, &c.), which had caused the death of a human being, became forfeit to the sovereign or lord of the manor, and was to be sold for the benefit of the poor. The forfeiture was abolished by 9 & 10 Vict. c. 62 (1846).

D'EON, CHEVALIER, who had acted in a diplomatic capacity in several countries, and been minister plenipotentiary from France in London, was affirmed to be a *female*, at a trial at the King's Bench in 1771, in an action to recover wagers as to his sex. He subsequently wore female attire: but at his death it was fully manifested that he was of the male sex.

DEPARTMENTS. See *France*.

DEPTFORD (near London). The hospital here was incorporated by Henry VIII., and called the Trinity-house of Deptford Strand; the brethren of Trinity-house hold their corporate rights by this hospital. Queen Elizabeth dined at Deptford on board the *Pelican*, the ship in which Drake had made his first voyage round the globe, April 4, 1581. The Deptford victualling-office was burnt Jan. 16, 1748-9; the store-house, Sept. 2, 1758; the red-house, Feb. 26, 1761; and the king's-mill, Dec. 1, 1755. Peter the Great of Russia lived at Evelyn's house, Say's court, while learning ship-building, &c. in 1698.

DEPUTIES, CHAMBER OF, the title given to the French legislative assembly, from the restoration of the Bourbons in 1814 till 1852; when it took the name of *Corps Législatif*.

DERBY was made a royal burgh by Egbert (about 828). Alfred expelled the Danes from it and planted a colony in 880. His heroic daughter, Ethelfleda, again expelled the

Danes in 918. William I. gave Derby to his illegitimate son William Peveril. Lombe's silk-throwing machine was set up in 1718; and in 1756 Jedediah Strutt invented the Derby ribbed stocking-frame. The young Pretender reached Derby Dec. 3, 1745, and retreated thence soon after.*—The *Derby day* (see *Races*) is the second day (Wednesday) of the Grand Spring Meeting at Epsom in the week following Trinity Sunday.

DERBY ADMINISTRATIONS: the first formed after the resignation of lord John Russell, Feb. 21, 1852: the second after that of lord Palmerston, Feb. 19, 1858.

FIRST ADMINISTRATION, Feb. 27, 1852.
First lord of the treasury, earl of Derby; †
Lord chancellor, lord St. Leonards (previously sir Edward Sugden).
President of the council, earl of Lonsdale.
Lord privy seal, marquess of Salisbury.
Chancellor of the exchequer, Benjamin Disraeli.
Home, foreign, and colonial secretaries, Mr. Spencer Horatio Walpole, earl of Malmesbury, and sir John Pakington.
Board of control, John Charles Herries.
Board of trade, Joseph Warner Henley.
Postmaster-general, earl of Hardwicke.
Secretary-at-war, William Beresford.
First commissioner of works and public buildings, lord John Manners.
 Robert Adam Christopher, lord Colchester, &c.

SECOND ADMINISTRATION, Feb. 25, 1858.
First lord of the treasury, earl of Derby.
Lord chancellor, lord Chelmsford (previously sir F. Thesiger).
Chancellor of the exchequer, B. Disraeli.

Secretaries—foreign, earl of Malmesbury; *home*, Spencer H. Walpole (resigned March, 1859); T. Sotherton Estcourt; *colonies*, lord Stanley;—in June, 1858, sir E. Bulwer Lytton; *war*, col. Jonathan Peel.

Presidents—of the council, marquess of Salisbury: *of board of control (India)*, 1, earl of Ellenborough (who resigned in May, 1858; he had sent a letter, on his own authority, censuring the proclamation of lord Canning to the Oude insurgents; the government hardly escaped a vote of censure); 2, in June, 1858, lord Stanley;—*board of trade*, Mr. Joseph W. Henley (resigned in March, 1859); earl of Donoughmore;—*board of works*, lord John Manners.

Lord privy seal, earl of Hardwicke.
First lord of the admiralty, sir John S. Pakington.
Postmaster, lord Colchester.
Chancellor of the Duchy of Lancaster, duke of Montrose.

[This ministry resigned in consequence of a vote of want of confidence June 11, 1859; it was succeeded by the Palmerston-Russell cabinet, *which see*.]

DERRICKS are lofty portable crane-like structures, used on land and water for lifting enormous loads, and in some cases depositing them at an elevation. They are extensively used in the United States, and were introduced into England as floating derricks for raising sunken vessels by their inventor, A. D. Bishop, in 1857.

DERRY (N. Ireland), a bishopric first planted at Ardfrath; thence translated to Maghera; and in 1158 to Derry. The cathedral, built in 1164, becoming ruinous, was rebuilt by a colony of Londoners who settled here in the reign of James I. The see is valued in the king's books at 250*l.* sterling; but it has been one of the richest sees in Ireland. *Beaton*. The see of Raphoe has been added to Derry. See *Bishops*; *Londonderry*.

DESIGN, SCHOOLS OF, established by government, began at Somerset-house, London, in 1837.

DESPARD'S CONSPIRACY. Colonel Edward Marcus Despard, a native of Ireland, and Broughton, Francis, Graham, Macnamara, Wood, and Wrattan, conspired to seize the king's person on the day of his meeting parliament, Jan. 16, 1803, to destroy him, and overturn the government. A special commission was issued on Feb. 7, and they suffered death on the top of Horsefonger-lane gaol, Southwark, Feb. 21, 1803. Between thirty and forty persons of inferior order, some of them soldiers in the foot guards, were taken into custody on Nov. 16, 1802, for this conspiracy, which caused great consternation at the time.

DETROIT (N. America), the oldest city in the west, was built by the French about 1670.

DETTINGEN (Bavaria), **BATTLE OF**, June 16, 1743, between the British, Hanoverian, and Hessian army (52,000), commanded by king George II. of England and the earl of Stair, and the French army (60,000), under marshal Noailles and the duc de Grammont. The French passed a defile, which they should have merely guarded. The duc de Grammont with his cavalry charged the British foot with great fury, but was received with such intrepidity, that he was obliged to give way, and to repossess the Maine, losing 5000 men.

DEVONPORT. See *Dockyards* and *Plymouth*.

* **DERBY TRIALS.** Brandreth, Turner, Ludlam senior, Ludlam junior, Weightman, and others, convicted at this memorable commission of high treason, Oct. 15, 1817; and Brandreth, Turner, and the elder Ludlam executed, Nov. 7, following. Twenty-three were tried, and twelve not tried. *Phillips*. Twenty-one prisoners were indicted at Derby for the murder of several miners in the Red-soil mine; but were acquitted on the ground that the mischief was not wilful, March 23, 1834.

† Born 1799; as lord Stanley, M.P., for Stockbridge in 1820; chief secretary for Ireland 1830-33; secretary for the colonies, 1833-4, and 1841-5.

DEVONSHIRE'S, DUKE OF, AND MR. PITT'S ADMINISTRATION, formed Nov. 16, 1756, and resigned April 5, 1757.

First lord of the treasury, William, duke of Devonshire.
Chancellor of the exchequer, hon. Henry Bilson Legge.
Lord president, earl Granville.
Privy seal, earl Gower.

Secretaries of state, earl of Holderness and Mr. Pitt (afterwards earl of Chatham, the virtual premier).
 Rt. hon. George Grenville, earl of Halifax, viscount Rutland and Grafton, earl of Rochfort, viscount Barrington, &c. The great seal in commission.

DEW, the modern theory respecting its formation was put forth by Dr. Wells in his treatise published in 1814.

DIADEM, the band or fillet worn by the ancients instead of the crown, and consecrated to the gods. At first it was made of silk or wool, set with precious stones, and was tied round the temples and forehead, the two ends being knotted behind, and let fall on the neck. Aurelian was the first Roman emperor who wore a diadem, A.D. 272. *Tillemont*.

DIALS. Invented by Anaximander, 550 B.C. *Pliny*. The first dial of the sun seen at Rome was placed on the temple of Quirinus by L. Papius Cursor, when time was divided into hours, 293 B.C. *Blair*. In the times of the emperors almost every palace and public building had a sun-dial. They were first set up in churches in A.D. 613. *Lenglet*. Dial of Ahaz, *Isaiah* xxxviii. 8.

DIALYSIS, an important method of chemical analysis, depending on the different degrees of diffusibility of substances in liquids, was made known in 1861, by its discoverer, Mr. T. Graham, the Master of the Mint.

DIA-MAGNETISM, the property possessed by certain bodies of behaving differently to iron, when placed between two magnets. The phenomena, previously little known, were reduced to a law by Faraday in 1845.

DIAMOND NECKLACE AFFAIR. In 1785, Bœhmer, the court jeweller of France, offered the queen, Marie Antoinette, a diamond necklace, for 64,000*l*. The queen desired the necklace, but feared the expense. The countess de la Motte (of the ancient house of Valois) forged the queen's signature, and by pretending that the queen had an attachment for him, persuaded the cardinal de Rohan, the queen's almoner, to conclude a bargain with the jeweller for the necklace for 56,000*l*. De la Motte thus obtained the necklace and made away with it. For this she was tried in 1786, and sentenced to be branded on the shoulders and imprisoned for life. She accused in vain the celebrated Italian adventurer, Cagliostro, of complicity in the affair, he being then intimate with the cardinal. She made her escape and came to London, where she was killed by falling from a window-sill, in attempting to escape an arrest for debt.—De Rohan was tried and acquitted, April 14, 1786.—The public in France at that time suspected the queen of being a party to the fraud. Talleyrand wrote at the time, "I shall not be surprised if this miserable affair overturn the throne."

DIAMONDS were first brought to Europe from the East, where the mine of Sumbulpoor was the first known; and where the mines of Golconda were discovered in 1534. This district may be termed the realm of diamonds. The mines of Brazil were discovered in 1728. From these last a diamond, weighing 1680 carats, or fourteen ounces, was sent to the court of Portugal, and was valued by Mr. Romeo de l'Isle at the extravagant sum of 224 millions; by others it was valued at 56 millions; its value was next stated to be 3½ millions but its true value (it not being brilliant) is 400,000*l*. Diamonds were found in the Ural mountains in 1829.

The great RUSSIAN diamond weighs 193 carats, or 1 oz. 12 dwts. 4 gr. troy. The empress Catherine II. offered for it 104,16*l*. 13*s*. 4*d*. besides an annuity for life to the owner of 204*l*. 13*s*. 4*d*. which was refused; but it was afterwards sold to Catherine's favourite, count Orloff, for the first-mentioned sum, without the annuity, and was by him presented to the empress on her birth-day, 1772; it is now in the sceptre of Russia.

The PIRI diamond weighed 136 carats, and after cutting 106 carats: it was sold to the king of France for 125,000*l*. in 1720.

The PIGOTT diamond was sold for 9500 guineas, May 10, 1802.

The diamond called the MOUNTAIN OF LIGHT, or KOHINOOR, was found in the mines of Golconda, in 1550, and is said to have belonged in turn to Shah Jehan, Aurungzebe, Nadir Shah, the Afghan rulers, and afterwards to the Sikh chief Runjeet Singh. Upon the abdication of Dhuleep Singh, the last

ruler of the Punjab, and the annexation of his dominions to the British empire, in 1849, the Kohinoor was surrendered to the queen. It was accordingly brought over and presented to her, July 3, 1850. It was shown in the Great Exhibition, 1851. Its original weight was nearly 800 carats, but it was reduced by the unskillfulness of the artist, Hortensio Borghese, a Venetian, to 279 carats. A general idea may be formed of its shape and size, by conceiving it as the pointed half (rose cut) of a small hen's egg. The value is scarcely computable, though two millions sterling have been mentioned as a justifiable price, if calculated by the scale employed in the trade. This diamond was re-cut in London in 1852, and now weighs 102½ carats.

A diamond termed the STAR OF THE SOUTH, was brought from Brazil, in 1855, weighing 254½ carats, half of which is lost by cutting.

DIAMONDS, *continued.*

INFLAMMABILITY OF DIAMONDS.

Boetius de Boot conjectured that the diamond was inflammable, 1609. *Boyle*.
 Discovered that when exposed to a high temperature it gave an acrid vapour, in which a part of it was dissipated, 1673. *Boyle*.
 Sir Isaac Newton concluded from its great refracting power, that it must be combustible. 1675.
 Averani demonstrated, by concentrating the rays of the sun upon it, that the diamond was exhaled in

vapour, and entirely disappeared, while other precious stones merely grow softer, 1695.
 It has been ascertained by Guyton, Davy, and others, that although diamonds are the hardest of all known bodies, they yet contain nothing more than pure charcoal, or carbon. Diamonds were charred by the intense heat of the voltaic battery—by M. Dumas, in Paris, and by Professor Faraday, in London, in 1848.

DIANA, TEMPLE OF (at Ephesus), long accounted one of the seven wonders of the world, was built at the common charge of all the Asiatic states, 552 B.C. The chief architect was Ctesiphon; and Pliny says that 220 years were employed in completing this rich temple. It was 425 feet long, 225 broad, and was supported by 127 columns (60 feet high, each weighing 150 tons of Parian marble), furnished by so many kings. It was set on fire, on the night of Alexander's nativity, by an obscure individual named Eratostratus, who confessed on the rack, that the sole motive which had prompted him to destroy so magnificent an edifice was the desire of transmitting his name to future ages, 356 B.C. The temple was rebuilt, but again burnt by the Goths, in their naval invasion, A.D. 256 or 262. *Univ. Hist.*

DICE. The invention of dice is ascribed to Palamedes, of Greece, about 1244 B.C. The game of Tali and Tessera among the Romans was played with dice. Stow mentions two entertainments given by the city of London, at which dice were played.* Act to regulate the licences of makers, and the sale of dice, 9 Geo. IV. 1828.

DICHROSCOPE, an optical apparatus, described by the inventor, professor Dove of Berlin, in 1860, who intended it to represent interferences, spectra in different coloured lights, polarisation of light, &c.

Dictators were supreme and absolute magistrates of Rome, appointed to act in critical times. Titus Lartius Flavius, the first dictator, was appointed, 498 B.C. This office, illustrious in the the first ages of the republic, became odious by the usurpations of Sylla and Julius Cæsar; and after the death of the latter, the Roman senate, on the motion of the consul Antony, passed a decree, which for ever forbade a dictator to exist in Rome, 44 B.C., but Augustus became perpetual dictator, 27 B.C., as *Imperator*.

DICTIONARY. A standard dictionary of the Chinese language, containing about 40,000 characters, most of them hieroglyphic, or rude representations, somewhat like our signs of the zodiac, was perfected by Pa-out-she, who lived about 1100 B.C. *Morrison*. The oldest Greek dictionary is the *Onomastikon* of Julius Pollux, written about 120 B.C.; a Latin one was compiled by Varro, born 116 B.C. The first noted polyglot dictionary, perhaps the first, is by Ambrose Calepini, a Venetian friar, in Latin; he wrote one in eight languages about A.D. 1500. *Niceron*. The *Lexicon Heptaglotton* was published by Edmund Castell, in 1659. The *Promptorium Puerorum*, an English-Latin vocabulary published by Pynson in 1499, is said to be the earliest of the kind. The great dictionary of the English language, by Samuel Johnson, who was truly called the "Leviathan of Literature," appeared in 1755. Francis Grose's *Dictionary of the Vulgar Tongue* was compiled in 1768; and from this period numerous dictionaries have been added to our store of literature. Richardson's English dictionary appeared in 1836. The Philological Society of London in 1859 issued "proposals for a new English dictionary." The following academies have published large dictionaries of their respective languages: the French academy, first in 1694; the Spanish, 1726; the Italian academy (della Crusca), 1729; and the Russian, 1789-94. Schwan's great German-French dictionary appeared in 1782. See *Encyclopædia*.

DIDYMIUM, a rare metal, discovered by Mosander in 1841. It appears to be always associated with lanthanum and cerium.

DIEPPE (N. France). This town was bombarded by an English fleet, under admiral Russell, and laid in ashes, July 1694. It was again bombarded in 1794; and again, together with the town of Granville, by the British, Sept. 14, 1803.

* In 1357 the kings of Scotland and France, being prisoners, and the king of Cyprus on a visit to Edward III. a great tournament was held in Smithfield, and afterwards Henry Picard, mayor of London, "kept his hall against all comers that were willing to play at dice and hazard. The lady Margaret, his wife, did keepe her chamber to the same intent." The mayor restored to the king of Cyprus 50 marks which he had won from him, saying, "My lord and king, be not aggrieved; for I covet not your gold; but your play," &c. *Stow*.

"DIES IRÆ" ("Day of Wrath"), a Latin Mediæval hymn on the Day of Judgment, is ascribed to various authors, amongst others to pope Gregory the Great (died about 604); St. Bernard (died 1153); but is generally considered to have been composed by Thomas of Celano (died 1255), and to have been used in the Roman service of the mass before 1385.

DIET OF THE GERMAN EMPIRE (in which the supreme court of authority of the empire may be said to have existed) was composed of three colleges: one of electors, one of princes, and one of imperial towns, and commenced with the edict of Charles IV. 1356. See *Golden Bull*. Diets otherwise constituted had long previously been held on important occasions. The diet of Wurtzburg, which proscribed Henry the Lion, was held in 1180; that of Worms, at which Luther was present, in 1521; that of Spire, to condemn the Reformers, in 1529; and the famous diet of Augsburg, in 1530. The league of the German princes, called the Confederation of the Rhine, fixed the diet at Frankfort, July 12, 1806. Germany is now governed by a diet of 38 members, having votes varying from four to one each. Diets were held in 1848 and 1850, at Frankfort (*which see*).

"DIEU-DONNÉ," the name given in his infancy to *Louis le Grand*, king of France, because the French considered him as the gift of Heaven; the queen, his mother, having been barren for twenty-three years previously, 1638. *Voltaire*. One of the popes of Rome, who obtained the tiara in 672, was named *Adeodatus*, or God's gift, and had the character of a pious and charitable pontiff.

DIEU ET MON DROIT ("God and my right") the royal motto of England, was the parole of the day, given by Richard I. of England to his army at the battle of Gisors, in France, 1198. The French army was signally defeated; and in remembrance, Richard made "*Dieu et mon droit*" the royal motto.

DIFFERENTIAL ENGINE. See *Calculating Machine*.

DIGEST. The first collection of Roman laws under this title was prepared by Alfenus Varus, the civilian, of Cremona, 66 B.C. *Quintil*. The Digest, so called by way of eminence, was the collection made by order of the emperor Justinian, 529: it made the first part of the Roman law and the first volume of the civil law. Quotations from it are marked with a ff. *Pardon*. A digest of the statute law of England is now strongly recommended (1862).

DIGITS. Arithmetical figures were known to the Arabian Moors about A.D. 900; and were introduced by them into Spain in 1050, and thence into England about 1253. The digit is any whole number under 10: 1, 2, &c., are called the nine digits. In astronomy, the digit is a measure used in the calculation of eclipses, and is the twelfth part of the luminary eclipsed. See *Figures*.

DILETTANTI, SOCIETY OF, was established in 1734 by several noblemen and gentlemen (viscount Harcourt, lord Middlesex, duke of Dorset, &c.), who had travelled and who were desirous of encouraging a taste for the fine arts in Great Britain. The society published, or aided in publishing, Stuart's Athens (1762—1816), Chandler's Travels (1775-6), and several other finely illustrated works, having aided the authors in their investigations. The members dine together from time to time at the Thatched-house tavern, St. James's.

DIMITY. See *Damietta*.

DIOCESE. The first division of the Roman empire into dioceses, at that period civil governments, is ascribed to Constantine, A.D. 323; but Strabo remarks that the Romans had the departments called dioceses long before. In England the principal dioceses are coeval with the establishment of Christianity; of twenty-eight dioceses, twenty are suffragan to the diocese of Canterbury, and six to that of York. See *Bishops*, and the sees severally.

DIOCLETIAN ERA (called also the era of Martyrs, on account of the persecution in his reign) was used by Christian writers until the introduction of the Christian era in the sixth century, and is still employed by the Abyssinians and Copts. It dates from the day on which Diocletian was proclaimed emperor at Chalcedon, August 29, 284.

DIOPTRIC SYSTEM. See *Lighthouses*.

DIORAMA. This species of exhibition, which had long been admired at Paris, was first opened in London by MM. Bouton and Daguerre, Sept. 29, 1823. The diorama differs from the panorama in this respect, that, instead of a circular view of the objects represented, it exhibits the whole picture at once in perspective. It was not successful commercially, and was sold in 1848. The building in Regent's Park was purchased by sir S. M. Peto in 1855 to be used as a Baptist chapel. It is the handsomest dissenters' chapel in London.

DIPHTHERIA (from the Greek *diphthera*, a membrane), a disease which has the essential character of developing a false membrane on any integument, particularly on the

mucous membrane of the throat. It was so named by Bretonneau of Tours in 1820. From its prevalence in Boulogne, it has been termed the Boulogne sore-throat; many persons were affected with it in England at the beginning of 1858.

DIPLOMACY, the art of managing the relations of foreign states by means of ambassadors, envoys, consuls, &c. See *Ambassadors*. New regulations for the British diplomatic service were issued, Sept. 5, 1862.

DIPLOMATICS, the foreign term for the science of Palæography or ancient writings; valuable works on this subject have been compiled by Mabillon (1681), De Vaines (1774), Astle (1781), De Wailly (1838), and other antiquaries.

"**DIRECTORY FOR THE PUBLIC WORSHIP OF GOD**" was drawn up at the instance of the parliament by an assembly of divines at Westminster in 1644, after the suppression of the Book of Common Prayer. The general hints given were to be managed with discretion; for the Directory prescribed no form of prayer, or manner of external worship, and enjoined the people to make no responses except *Amen*. It was adopted by the parliament of Scotland in 1645, and many of its regulations are still observed.

DIRECTORY, THE FRENCH, was installed at the Little Luxembourg at Paris under a new constitution of the government, Nov. 1, 1795, and held the executive power four years. It was composed of five members (M.M. Lipeaux, Letourneur, Rewbel, Barras, and Carnot), and ruled in conjunction with two chambers, the Council of Ancients and Council of Five Hundred (*which see*). It was deposed by Bonaparte, who, with Cambacérès and Siéyès, assumed the government, as three consuls, the first as chief, Nov. 9, 1799. See *Consuls*.

DISCIPLINE, ECCLESIASTICAL, originally conducted according to the divine commands in *Matt.* xviii. 15, *1 Cor.* v., *2 Thess.* iii. 6, and other of these scripture texts, was gradually changed to a temporal character, as it now appears in the Roman and Greek churches. The "First Book of Discipline" of the presbyterian church of Scotland was drawn up by John Knox and four ministers in Jan. 1560-1. The more important "Second Book" was prepared with great care in 1578 by Andrew Melville and a committee of the leading members of the general assembly. It lays down a thoroughly presbyterian form of government; defines the position of the ecclesiastical and civil powers, &c.

DISCOUNT. See *Bank of England*.

DISPENSARIES, to supply the poor with medical advice and medicines, began in London with the Royal General Dispensary, established in St. Bartholomew's Close, in 1770. It relieved about 20,000 persons in 1861. See *Low's Charities*.

DISPENSATIONS, ECCLESIASTICAL, were first granted by pope Innocent III. in 1200. These exemptions from the discipline of the Church, with indulgences, absolutions, &c., led eventually to the Reformation in Germany in 1517, and in England in 1534 *et seq.*

DISPENSING POWER OF THE CROWN (setting aside statutes), asserted by some of our sovereigns, especially by James II. in 1686, was abolished in 1689. However it has been on certain occasions exercised, as in the case of embargoes upon ships, the Bank Charter act, &c. See *Indemnity*.

DISSECTION. See *Anatomy*.

DISSENTERS, the modern name of the *Puritans* and *Nonconformists* (*which see*). In 1851, in London alone, the number of chapels, meeting-houses, &c., for all classes of dissenters, amounted to more than 554. (The Church of England had 458; Roman Catholics, 35.) The great act (9 Geo. IV. c. 17) for the relief of dissenters from civil and religious disabilities was passed May 9, 1828. By this act, called the Corporation and Test Repeal act, so much of the several acts of preceding reigns as imposed the necessity of receiving the sacrament of the Lord's Supper as a qualification for certain offices, &c., was repealed. By 6 & 7 William IV. c. 85 (1836), dissenters acquired the right of solemnising marriages at their own chapels or at a registry office. See *Worship*.

DISTAFF, the staff to which hemp, flax, wool, or other substances to be spun is fastened. The art of spinning with it, at the small wheel, first taught to English women by Anthony Bonavisa, an Italian. *Stow*. The distaff is used as an emblem of the female sex.

DISTILLATION, and the various chemical processes dependent on the art, are generally believed to have been introduced into Europe by the Moors about A.D. 1150; their brethren of Africa had them from the Egyptians. See *Brandy*. The distillation of spirituous liquors was in practice in Great Britain in the 16th century. *Burns*. The processes were improved by Adam of Montpellier in 1801. M. Payen's work (1861) contains the most recent improve-

ments. 118 licences to distillers were granted in the year ending March 31, 1858, for the United Kingdom.

DIVINATION. In the Scriptures and ancient authors different kinds of divination are mentioned. See *Augury, Delphi, Magi, Witchcraft, &c.*

DIVINE RIGHT OF KINGS, the absolute and unqualified claim of sovereigns to the obedience of their subjects, a doctrine which is totally foreign to the genius of the English constitution, was defended by many persons of otherwise opposite opinions, *e.g.* by Hobbes the free-thinker (1642), by Salmasius (1640), by sir Robert Filmer in his *Patriarcha* in 1680, and by the High Church party generally about 1714; but opposed by Milton (1651), Algernon Sydney, and others.

DIVING-BELL (first mentioned, though obscurely, by Aristotle, 325 B.C.) was first used in Europe, A.D. 1509. It is said to have been used on the coast of Mull, in searching for the wreck of part of the Spanish Armada, before A.D. 1662. Halley (about 1721) greatly improved this machine, and was, it is said, the first who, by means of a diving-bell, set his foot on the ground at the bottom of the sea. Smeaton made use of the diving-bell in improving Ramsgate harbour 1779-88. Mr. Spalding and his assistants going down in a diving-bell in Ireland were drowned, June 1, 1783. The *Royal George* man-of-war, which was sunk off Portsmouth in 1782, was first surveyed by means of a diving-bell in May, 1817. Latterly it has been employed in submarine surveys. The first diving-belle was the wife of captain Morris, at Plymouth, who descended in one a few years ago.

DIVINING ROD (*Virgula Divina, Baculatorius*), formed of wood or metal, was formerly believed, even by educated persons, to have the property of indicating the position of minerals and springs of water. Instances of its alleged possession have been given so recently as 1851 by Dr. H. Mays in his work on "Popular Superstitions."

DIVINITY. See *Theology*.

DIVORCE FOR ADULTERY (of early institution) was put in practice by Spurius Carvilius Ruga at Rome, 234 B.C. At this time morals were so debased, that 3000 prosecutions for adultery were enrolled. Divorces are of two kinds; one, *à vinculo matrimonii* (total divorce); the other, *à mensâ et thoro* (from board and bed). Divorces were attempted to be made of more easy obtainment in England in 1539. The bill to prevent women marrying their seducers was brought into parliament in 1801. In April, 1853, the commissioners on the law of divorce issued their first report.* By 20 & 21 Vict. c. 85 (1857), the jurisdiction of the ecclesiastical courts respecting divorce, &c., was abolished, and the Divorce and Matrimonial Causes court was instituted, to consist of three judges, the judge of the Probate court to be one (if possible). On May 10, 1858, a full court sat, viz. Lord Campbell, chief baron Pollock and sir Cresswell Cresswell, judge of the Probate court, when five marriages were dissolved. The above-mentioned act was amended by acts passed in 1858-60, in consequence of the increase of the business of the court. See *Marriage*. An act respecting divorces in Scotland was passed in 1861.

DIZIER, St. (N.E. France). Here a siege was sustained for six weeks against the army of the emperor Charles V., 1544. The allies here defeated the French, under Napoleon; Jan. 27 and March 26, 1814.

DOBRUDSCHA, the N.E. corner of Bulgaria; in 1854 the scene of the earlier incidents of the Russo-Turkish war (*which see*).

DOCETÆ, a sect of the first century A.D., said to have held that the body of Jesus Christ was an appearance, not a reality.

DOCKS OF ENGLAND. They are said to be the most extensive and finest in the world. The following are the principal commercial docks :—

Commercial Docks, Rotherhithe, originated about 1660.	East India Docks were commenced in 1803; and opened, Aug. 4, 1806.
West India Docks were commenced, Feb. 3, 1800; and were opened, Aug. 27, 1802, when the <i>Henry Addington</i> , West Indiaman, first entered them, decorated with the colours of the different nations of Europe.	St. Katherine Docks began, May 3, 1827; and 2500 men were daily employed on them until they were opened, Oct. 25, 1828.
London Docks were commenced, June 26, 1802; and opened, Jan. 20, 1805.	Victoria Docks (in Plaistow marshes) were completed in 1855.
	Magnificent docks at Liverpool and Birkenhead erected 1850-57.

* In 1857 there had been in England, since the Reformation, 317 divorces by act of parliament; in Scotland, by the law, 174 divorces since 1846. From the establishment of the Divorce court, to March, 1859, 37 divorces had been granted out of 288 petitions; from Nov. 1860 to July 1861, 164. They are now very frequent.

DOCK-YARDS, ROYAL. There are seven chief dock-yards in England and Wales, and others in various of our colonies.

Woolwich was an extensive one in 1509.
Deptford dock-yard founded about 1513.
Chatham dock-yard was founded by queen Elizabeth.
Portsmouth dockyard established by Henry VIII.
Plymouth dock, now Devonport,* about 1689.
Sheerness dock-yard was built by Charles II. after

the insult of the Dutch, who burnt our men-of-war at Chatham in 1667. A fire occurred at Sheerness dock-yard on board the *Camperdown*, Oct. 9, 1840. Milford-Haven dock-yard, 1790; removed to Pembroke in 1814.
The Dock-yard battalions have been named since 1847.

DOCTOR. Doctor of the Church was a title given to Athanasius, Basil, Gregory Nazianzen, and Chrysostom, in the Greek Church; and to Jerome, Augustin, Ambrose, and Gregory the Great, in the Romish Church, A.D. 373 *et seq.* In later times the title has been conferred on certain persons with distinguishing epithets: viz. Thomas Aquinas (Angelicus), Bonaventura (Seraphicus), Alexander de Hales (Irrefragabilis), Duns Scotus (Subtilis), Roger Bacon (Mirabilis), William Occam (Singularis), Joseph Gerson (Christianissimus), Thomas Bradwardine (Profundus), and so on. Doctor of the law was a title of honour among the Jews. The degree of doctor was conferred in England, 8 John, 1207. *Spelman.* Some give it an earlier date, referring it to the time of the Venerable Bede and John de Beverley, the former of whom, it is said, was the first that obtained the degree at Cambridge about A.D. 725.

DOCTORS' COMMONS, the college for the professors of civil and canon law residing in London; the name of Commons is given to it from the civilians communing together as in other colleges. It was founded by Dr. Henry Hervie in 1568; but the original college was destroyed in the great fire of 1666; in 1672 it was rebuilt on the old site.† After the great fire, and until 1672, the society held its courts at Exeter house, in the Strand. It was incorporated by charter in June, 1768. *Cooté.* Till 1857 the causes taken cognisance of here were blasphemy, divorces, bastardy, adultery, penance, tithes, mortuaries, probate of wills, &c. See *Ecclesiastical Courts, Civil Law, &c.*

DOCTRINAIRES, a name given since 1814 to a class of politicians in France (Guizot, Duc de Broglie and others), who upheld the constitutional principles as opposed to arbitrary monarchical power. The party came into office in 1830 under Louis Philippe, and fell with him in 1848. The term has been applied in this country to the writers in the "Westminster Review" (1824 *et seq.*), Bentham, Molesworth, and others.

DODONA, EPIRUS. The temple of Jupiter here, renowned for its oracle, was destroyed by the Ætolians, 219 B.C.

DOG. Buffon considers the shepherd's dog as "the root of the tree," assigning as his reason that it possesses from nature the greatest share of instinct. The Irish wolf-dog is supposed to be the earliest dog known in Europe, if Irish writers be correct. Dr. Gall mentions that a dog was taken from Vienna to England; that it escaped to Dover, got on board a vessel, landed at Calais, and, after accompanying a gentleman to Mentz, returned to Vienna. Statute against dog-stealing, 10 Geo. III. 1770. Dog-tax imposed, 1796, and again in 1808; now (1862) 12s. a year. The employment of dogs in drawing carts and burthens in London was abolished, 1839; in the United Kingdom, 1854. See *Greyhound*. Dog-shows were held in London in 1861 and 1862, when numerous specimens of all kinds were exhibited.

DOG-DAYS. The canicular or dog-days commence on the 3rd of July and end on the 11th of August. The rising and setting of Sirius or the dog-star‡ with the sun has been erroneously regarded as the cause of excessive heat and of consequent calamities.

DOGE, the title of the duke of Venice, which state was first governed by a prince so named, Anafesto Paululio, or Pauluccio, A.D. 697. See *Venice*. The Genoese chose their first doge, Simone Boccanegra, in 1339. *Muratori.*

* Great fire in the dock-yard at Devonport, by which the *Talavera*, of 74 guns, the *Imogene* frigate, of 28 guns, and immense stores, were destroyed; the relics and figure heads of the favourite ships of Boscawen, Rodney, Duncan, and other naval heroes, which were preserved in a naval museum, were also burnt, Sept. 27, 1840; the loss was estimated at 200,000*l.*

† In February, 1568, Dr. Henry Hervie, dean of the arches and master of Trinity Hall (a seminary founded at Cambridge chiefly for the study of the civil and canon laws) procured from the dean and chapter of the diocese of London a lease of Montjoy House and other buildings in the parish of St. Bene't, Paul's Wharf, for the accommodation of the society. The courts over which he presided, the prerogative court of Canterbury, that of the bishop of London, and also the court of admiralty (except for criminal cases), were thenceforward held in the buildings thus assigned, and the whole place, for an obvious reason, received the appellation of "Doctors' Commons." *Cooté's English Civilians.*

‡ Mathematicians assert that Sirius, or the Dog-Star, is the nearest to us of all the fixed stars; and they compute its distance from our earth at 2,200,000 millions of miles. They maintain that a sound would not reach our earth from Sirius in 50,000 years; and that a cannon-ball, flying with its usual velocity of 480 miles an hour, would consume 523,211 years in its passage thence to our globe.

DOGGERBANK (German Ocean). Here a gallant but indecisive battle was fought between the British, under admiral sir Hyde Parker, and the Dutch, Aug. 5, 1781.

DOGGET'S COAT AND BADGE. The annual rowing match upon the Thames, thus called, originated in this way: Mr. Thomas Dogget, an eminent actor of Drury-lane, on the first anniversary of the accession to the throne of George I., Aug. 1, 1715, gave a waterman's coat and silver badge to be rowed for by six young watermen in honour of the day, and bequeathed at his death a sum of money, the interest whereof was to be appropriated annually, for ever, to the same purpose. The candidates start, at a signal given, at that time of the tide when the current is strongest against them, and row from the Old Swan, London Bridge, to the White Swan at Chelsea.

DOIT. A silver Scottish penny, of which twelve were equal to a penny sterling. Some of those struck by Charles I. and II. are in the cabinets of the curious. The circulation of "doydekyns" (small Dutch coins) was prohibited by statute in 1415.

DOM-BOC or DOOM-BOOK (*Liber Judiciales*), the code of law compiled by king Alfred from the West-Saxon collection of Ina and other sources. Alfred reigned from 871 to 901.

DOME'S-DAY BOOK or DOOM'S-DAY (*Liber Censualis Angliæ*), a book of the general survey of England, commenced in the reign of William I. 1080, and completed by five justices in 1086. It was intended to be a register whereby to determine the right in the tenure of estates; and from it the question whether lands be ancient demesne or not, is sometimes still decided. The book is still preserved in the Chapter-house, Westminster-abbey, fair and legible, consisting of two volumes, a greater and lesser, wherein all the counties of England, except Northumberland, Durham, Westmoreland, and Cumberland, are surveyed. "This Dome's-day book was the tax-book of king William." *Camden*. It was printed in four vols. folio, with introductions, &c., 1783—1816. The taxes were levied according to this survey till 13 Hen. VIII., 1522, when a more accurate survey was taken, called by the people the New Doom's-Day Book. Photographic copies of various counties were published in 1861.

DOMINGO, St., a city in Hayti, the seat of the Dominican republic, independent from 1844-61. It has been much troubled by the emperors of Hayti, especially by Faustin I., dethroned in 1858. Its last president, general José Valverde, was elected in 1858. Population 200,000. See *Hayti*. In March, 1861, a number of Spanish emigrants landed in St. Domingo; a cry for its annexation to Spain was raised, and St. Domingo was incorporated with that monarchy, May 20, 1861.

DOMINICA (W. Indies), discovered by Columbus in his second voyage on Sunday, Nov. 3, 1493. It was taken by the British in 1761, and was confirmed to them by the peace of 1763. The French took Dominica in 1778, but restored it at the subsequent peace in 1783. It suffered great damage by a tremendous hurricane in 1806; and by hurricanes since.

DOMINICAL LETTER, noting the Lord's day, or Sunday. The seven days of the week, reckoned as beginning on the 1st of January, are designated by the first seven letters of the alphabet, A, B, C, D, E, F, G; and the one of these which denotes Sunday is the Dominical letter. If the year begin on Sunday, A is the Dominical letter; if on Monday, G; on Tuesday, F; and so on. Generally to find the Dominical letter call New Year's day A, the next B, and go on thus until you come to the first Sunday, and the letter that answers to it is the Dominical letter; in leap years count two letters.

DOMINICAN REPUBLIC. See *Domingo*.

DOMINICANS, formerly a powerful religious order (called in France, Jacobins, and in England, *Black friars*), founded in order to put down the Albigenses and other heretics by St. Dominic, approved by Innocent III. in 1215, and confirmed by Honorius III. in 1216, under St. Austin's rules and the founder's particular constitution. In 1276 the corporation of London gave the Dominicans two whole streets near the Thames, where they erected a large convent, whence that part is still called Blackfriars.

DONATISTS, an ancient puritanical sect, began about A.D. 313—318, with an African bishop, Donatus, who was jealous of Cæcilian, bishop of Carthage: it became extinct in the seventh century. The Donatists held that the Father was above the Son, and the Son above the Holy Ghost; and that there was no virtue in the form of the Church. Their discipline was severe, and those who joined their sect were re-baptized.

DOOM'S-DAY BOOK. See *Dome's-day Book*.

DORADO. See *El Dorado*.

DORCHESTER (now a village near Oxford) was once a bishopric, said to have been founded in A.D. 625. The first bishop, Birinus, was called the apostle of the West Saxons. The see continued for upwards of 460 years. In 1092, Remigius, its last prelate, transferred it to Lincoln (*which see*).—Much excitement was caused by six Dorchester labourers being sentenced to transportation, March 17, 1834, for administering illegal oaths.

DORIANS, a people of Greece, claimed their descent from Dorus, son of Hellen. Their migration to the Peloponnesus took place 1104 B.C. They sent out many colonies.

DORIC ORDER OF ARCHITECTURE, the most ancient of the five, used by the Dorians, a Greek people. It is lighter than the Tuscan, and is called the second order.

DORT, or **DORDRECHT** (Holland). Here happened an awful inundation of the Meuse in 1421, through the breaking down of the dykes. In the territory of Dordrecht 10,000 persons perished; and more than 100,000 round Dullart, in Friesland, and in Zealand. In the last two provinces upwards of 300 villages were overflowed, and the tops of their towers were long after seen rising out of the water. Dort is famous for the Protestant synod held in 1618-19; a general assembly, to which deputies were sent from England, and all the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Arminius, principally upon points of justification and grace. This synod condemned the tenets of Arminius.

DOUAY (N. France) was taken from the Spaniards by Louis XIV. in 1667; by the duke of Marlborough in 1710; and retaken by the French next year. This town gives its name to the Roman Catholic edition of the Bible in use, by the consent of the popes, as the only authorised English version; its text is explained by the notes of Roman Catholic divines. The Old Testament was first published by the English college at Douay in 1609; the New had been published at Rheims in 1582. The English college for Roman Catholics was founded in 1568 by William Allen, afterwards cardinal. *Dodd*.

DOURO, a river (separating Spain and Portugal) which, after a desperate struggle between Wellington's advanced guard under Hill, and the French under Soult, was successfully crossed by the former on May 12, 1809. So sudden was the movement, that Wellington at 4 o'clock sat down to the dinner prepared for the French general. *Atison*.

DOVER (Kent). Here Julius Cæsar made his first landing in England, Aug. 26, 55 B.C. Its original castle is said to have been built by him soon after; but this is disputed. The works were strengthened by Alfred and succeeding kings, and rebuilt by Henry II. The earliest named constable is Leopoldus de Bertie, in the reign of Ethelred II., followed by earl Godwin, Odo the brother of William I., &c. In modern times, this office, and that of warden of the Cinque Ports, has been frequently conferred on the prime minister for the time being,—e.g., lord North, Mr. Pitt, lord Liverpool, and the duke of Wellington; the earl of Dalhousie, late governor-general of India, was appointed in Jan. 1853, and died Dec. 19, 1860. The present constable is lord Palmerston, appointed March, 1861.

The priory was commenced by archbishop Corboyl, or Corbois about 1130
At Dover king John resigned his kingdom to Pandolf, the pope's legate . . . May 13, 1213
The pier was projected by Henry VIII. . . in 1533
Charles II. landed here from his exile, May 25, 1660
The foot-barracks were burnt down by an accidental fire . . . July 30, 1800

A large part of the cliff fell, Nov. 27, 1810, and Jan 13, 1853
Railway to London opened . . . May 6, 1854
A telegraph wire laid down experimentally between Dover and Calais (see *Submarine Telegraph*), Aug. 28, 1850; telegraph completed, Nov. 13, 1851

DOWER, the gifts of a husband for a wife before marriage (*Genesis xxxiv. 12*). The portion of a man's lands or tenements which his wife enjoys for life after her husband's death. By the law of king Edmund, a widow was entitled to a moiety of her husband's lands or tenements for her life, A.D. 941. The widows of traitors, but not those of felons, are debarred their dower by statute 5 Edw. VI. 1551. The last Dower act passed in 1833.

DOWN (N.E. Ireland), **BISHOPRIC OF**. An ancient see, whose first bishop was St. Cailan, in 499. At the instance of John de Courcy, the conqueror of Ulster, the cathedral, although previously consecrated to the Trinity, was dedicated to St. Patrick about 1183. The sepulchre of St. Patrick (who was buried here in 493, in the abbey of Saul, founded by himself) brought this place into great repute. The see was united with that of Connor in 1441 (see *Connor*); and the see of Dromore was united to both by the provisions of the Irish Church Temporalities act, 3 & 4 Will. IV. c. 37, Aug. 14, 1833. The cathedral of Downpatrick was destroyed by Lord Grey, lord deputy of Ireland; for this and other crimes he was impeached and beheaded in 1541. *Beatson*.

DRACO, LAWS OF. When Draco was archon of Athens (621 B.C.) he made a code of laws which, on account of its severity, was said to be written in blood. Idleness was punished with as much severity as murder; the smallest transgression, he said, deserved death; and no more rigorous punishment could be found for atrocious crimes. These laws were set aside by Solon's, 594 B.C.

DRAFTS, or CHEQUES. By 19 & 20 Vict. c. 25 (1856), drafts crossed with a banker's name are payable only to or through the same banker. This act was passed in consequence of a decision to the contrary in the case of *Carlton v. Ireland*, Dec. 12, 1855. By 21 & 22 Vict. c. 79 (1858), the crossing is made a material part of a cheque; but bankers are not held responsible when the crossing does not plainly appear.* By 21 & 22 Vict. c. 20 (1858), a penny stamp was ordered to be affixed to banker's drafts, commencing May 25.

DRAGOONS. The name is supposed to have been derived from dragon, "because mounted on horseback with lighted match he seemeth like a fiery dragon." *Meyrick*. The **DRACONARI** were horse-soldiers, who bore dragons for ensigns. The first regiment of *dragoons* was raised in England, it is believed, in 1681. "King Charles II. at the Restoration established a regiment of Life Guards, to which he added a regiment of *Horse Guards*, and two regiments of Foot Guards; and a third regiment of Foot Guards was raised at Coldstream, on the borders of Scotland." *Captain Curling*.

DRAINAGE OF LAND, in England, is of early date—remains of British works being still extant in the Fens district. The truly national works began in 1621, when Cornelius Vermuyden, the Dutch engineer, was invited to England. Amidst much opposition, he and his successors drained the districts termed the Great Levels. See *Levels*. In the present century great progress has been made in drainage. In 1861 was passed "an act to amend the laws relative to the drainage of land for agricultural purposes." See *Sewers*.

DRAKE'S CIRCUMNAVIGATION. Sir Francis Drake sailed from Plymouth Nov. 15, 1577, and sailing round the globe, returned to England, after many perilous adventures, Nov. 3, 1580. He was vice-admiral under lord Howard, high admiral of England, in the conflict with the Spanish Armada, July 19, 1588.

DRAMA, ANCIENT. We owe both forms of composition, tragedy and comedy, to the Greeks.

The first comedy performed at *Athens*, by Susarion and Bolon, on a moveable scaffold . . . B.C. 562
The chorus introduced . . . 556
Tragedy first represented at *Athens* by Thespis, on a waggon (*Arund. Marb.*) . . . 536
Thespis of Icaria, the inventor of tragedy, performed at *Athens Alceis*, and was rewarded with a goat (*Pliny*) . . . 536
Æschylus introduced suitable dresses and a stage . . . 436
The drama was first introduced into *Rome* on occasion of a plague which raged during the consulate of C. Sulpicius Petionius and C. Licinius Stolo: the magistrates to appease the incensed deities, instituted the games called the *Scenici*, which were amusements entirely new: actors from *Etruria* danced, after the Tuscan manner, to the flute. . . 364

Anaxandrides was the first dramatic poet who introduced intrigues upon the stage; he composed about a hundred plays, of which ten obtained the prize; he died . . . B.C. 340
Subsequently came satires accompanied with music set to the flute; and afterwards plays were represented by Livius Andronicus, who, abandoning satires, wrote plays with a regular and connected plot. He first gave singing and dancing to different performers; he danced himself, and gave the singing to a younger exhibitor . . . 240
The greatest ancient dramatic writers were—*Greek*, *Æschylus*, *Sophocles*, *Euripides* (tragedy), and *Aristophanes* (comedy), 525—427; *Latin*, *Plautus* and *Terence* (comedy), 184—160; *Seneca* (tragedy) . . . 7 B.C.—A.D. 65

DRAMA, MODERN, arose early in the rude attempts of minstrels and buffoons at fairs in France, Italy, and England. Stories from the Bible were represented by the priests, and were the origin of sacred comedy. *Warton*.

Gregory Nazianzen, an early father of the Church, is said to have constructed a drama on the Passion of Christ, to counteract the profanities of the heathen stage, about A.D. 364
Fitzstephen, in his "Life of Thomas à Becket," asserts that—"London had for its theatrical exhibitions holy plays, and the representation of miracles, wrought by holy confessors." He died . . . about 1190
The Chester Mysteries † were performed about 1270
Plays were performed at Clerkenwell by the

parish clerks, and "miracles" were represented in the fields, in . . . 1397
Allegorical characters were introduced in the reign of Henry VI.
Individual characters were introduced in Henry VII.'s reign.
Skelton and others wrote "Moralities" about 1500
The first regular drama acted in Europe was the "Sophonisba" of Trissino, at Rome, in the presence of pope Leo X. (*Voltaire*) . . . 1515
The first royal licence for the drama in England

* In the case of *Simmonds v. Taylor*, May, 1858, it was decided, on appeal to the court of exchequer, that the crossing formed no part of the draft. The crossing had been erased, and the money paid to the holder of the draft who had stolen it.

† The Coventry, Chester, Townley, and other mysteries have been printed during the present century.

DRAMA, MODERN, *continued.*

was to master Burbage, and four others, servants to the earl of Leicester, to act plays at the Globe, Bankside 1574
Shakspeare began to write about 1590
A licence granted to Shakspeare and his associates in 1603
Plays were opposed by the Puritans in 1633, and were afterwards suspended until the Restoration in 1660
Two companies of regular performers were licensed by Charles II. Killigrew's and sir William Davenant's. The first was at the Bull, Vere-street, Clare-market, which was immediately afterwards removed to Drury-lane; the other in Dorset-gardens, 1662. Till

this time, boys performed women's parts; but Mrs. Coleman (the first female on the stage) had performed *Ianthe* in Davenant's *Siege of Rhodes*, in 1656
Sir William Davenant introduced operas, and both companies united, 1682, and continued together till 1694, when a schism under Betterton led to the opening of a theatre in Lincoln's-inn-fields, the parent of Covent-garden 1695
Act for the revision of plays and for licensing them previously to being performed 1737
Author's Dramatic Copyright Protection act, 3 Will. IV. c. 15 June, 1833
See *Theatres, Covent-garden, Drury-lane, and Copyright.*

DRAMATIC COLLEGE, for the benefit of distressed actors and their children, was proposed July 21, 1858, at the Princess's Theatre, by Messrs. C. Dickens, Thackeray, C. Kean, B. Webster, and others. Mr. Henry Dodd's offer of land and money, with certain stipulations, was declined. The Queen is the patron. The first stone of the building was laid by the Prince Consort, June 1, 1860; and on Sept. 29, 1862, seven annuitants were installed.

DRAPIER'S LETTERS, published in 1724, by dean Swift, against *Wood's Halfpence* (*which see*).

DREAMS are mentioned in Scripture, *e.g.*, Joseph's and Pharaoh's, 1715 B.C. (*Gen.* xxxvii. and xli.), and Nebuchadnezzar's, 603 and 570 B.C. (*Daniel* ii. and iv.). The first attempt to interpret dreams and omens is ascribed to Amphiptyon of Athens, 1497 B.C. A remarkable modern instance is attested in the Life of Thomas, lord Lyttelton.*

DRED SCOTT CASE. See *United States*, 1857.

DREPANUM (Sicily). Near this place the Carthaginian admiral Adherbal totally defeated the Roman fleet under P. Claudius, 249 B.C.

DRESDEN, termed the German Florence, became the capital of Saxony in 1548. Peace of Dresden, between Saxony, Prussia, and the queen of Hungary, confirming the treaties of Berlin and Breslau, signed Dec. 25, 1745. Dresden was taken by Frederick of Prussia in 1756; by the Austrians in 1759; and bombarded in vain by Frederick, in July, 1760. Here severe contests took place between the allied army under the prince of Schwarzenberg, and the French army commanded by Napoleon, Aug. 26 and 27, 1813. The allies, 200,000 strong, attacked Napoleon in his position at Dresden, and the event had nearly proved fatal to them, but for an error in the conduct of general Vandamme. They were defeated with dreadful loss, and were obliged to retreat into Bohemia; but Vandamme pursuing them too far, his division was cut to pieces, and himself and all his staff made prisoners. In this battle, general Moreau received his mortal wound, while in conversation with the emperor of Russia. Marshal St. Cyr, and 25,000 French troops, surrendered Dresden to the allies, Nov. 11, 1813. During a political commotion, the king of Saxony resigned the royal authority, and prince Frederick, his nephew, was declared regent, Sept. 9 *et seq.* 1830. See *Saxony*. An insurrection here on May 3, 1849, was repressed on the 6th.

DRESDEN CHINA. The fine porcelain ware known as Dresden china was invented by M. Boeticher, at the time an apothecary's boy, 1700. Services of this ware have cost many thousands of pounds each. A costly service, each piece exquisitely painted, with battles, &c., was presented to the duke of Wellington by the king of Prussia, in 1816, and was the finest in England.

DRESS. The attire of the luxurious Hebrew women is censured in *Isaiah* iii., about 760 B.C. The costume of the Grecian and Roman ladies was comely and graceful. The women of Cos, whose country was famous for the silkworm, wore a manufacture of cotton and silk of so beautiful and delicate a texture, and their garments, which were always white, were so clear and thin, that their bodies could be seen through them. *Ovid.* Excess in dress was restrained by a law in England, in the reign of Edward IV., 1465; and in the

* Lord Lyttelton dreamt or had a vision, that a young female, dressed in white, solemnly warned him of his dissolution in three days from that time. On the third day, his lordship had a party to spend the evening with him, and about the time predicted, he observed to the company present, that "he believed he should jockey the ghost;" but in a few minutes afterwards he was seized with a sudden faintness, carried to bed, and rose no more. He died in 1779, aged 35. Some assert that he committed suicide.

reign of Elizabeth, 1574.* *Slow*. Fairholt's "Costume in England" contains a history of dress with numerous illustrations derived from MSS., the works of Strutt, &c.

DREUX (N.W. France). Here Montmorenci defeated the Huguenots under Condé, Dec. 19, 1562.

DRINKING-FOUNTAINS. Many were erected in Liverpool in 1857. An association for their erection in London was formed in April, 1859, by lord John Russell, the earl of Carlisle, Mr. Gurney, and others. The first of the numerous fountains since erected is that near St. Sepulchre's church, Skinner-street, on April 21, 1859. The magnificent fountain in Victoria-park, London, was inaugurated by the donor, Miss Burdett Coutts, June 8, 1862.

DRILLING-MACHINES, in agriculture. One was invented by Jethro Tull, early in the last century.

DROGHEDA (Central Ireland, E.), formerly Tredagh, a place of great importance, having the privilege of coining money. In the reign of Edward VI., an act, yet unrepealed, was passed for the foundation of a university here. The town was besieged several times in the contests between 1641 and 1691. Cromwell took it by storm, and put the governor, sir A. Aston, and the whole of the garrison, to the sword, Sept. 11, 1649. More than 3000 men, most of them English, perished. It surrendered to William III. in 1690.

DROMORE, BISHOPRIC OF (N.E. Ireland). Its founder was St. Coleman, descended from a sept of the Arads; he was first bishop, about 556; the cathedral is dedicated to the Redeemer. By an extent returned 15 James I., this see was valued in the king's books at 50*l*. The learned Jeremy Taylor was bishop of Down and Connor in 1660, and of this see in 1661. Dromore has been united to Down through the Irish Church Temporalities act, 3 & 4 Will. IV., passed 1833.

DROWNING. The punishment of death by drowning is very ancient, and general. The Britons inflicted death by drowning in a quagmire, before 450 B.C. *Slow*. It is said to have been inflicted on eighty intractable bishops near Nicomedia, A.D. 370; and to have been adopted as a punishment in France by Louis XI. The wholesale drownings of the royalists at Nantes, in 1794, by the brutal Carrier, were termed *Noyades*. Societies for the recovery of drowning persons were first instituted in Holland, A.D. 1767. The second society is said to have been formed at Milan, in 1768; the third in Hamburg, in 1771; the fourth at Paris, in 1772; and the fifth in London, in 1774. Similar societies have been instituted in other countries. The motto of the Royal Humane Society in England is very appropriate: *Lateat scintillula forsan*—"A small spark may perhaps lie hid."

DRUIDS, an order of priesthood, among the ancient Germans, Gauls, and Britons, so named from their veneration for the oak (*Brit. dero*). They had the administration of sacred things, were the interpreters of the gods, and supreme judges. They headed the Britons who opposed Cæsar's first landing, 55 B.C. They were exterminated by the Roman governor, Suetonius Paulinus, when defending their country, A.D. 58-61.

DRUM: the invention is ascribed to Bacchus, who, according to Polyænus, "gave his signals of battle with cymbals and drums." It was an oriental invention, brought by the Moors into Spain, A.D. 713. *Le Clerc*. The braces on the sides, to vary the sound, are of later date. *Ashe*. In navigation, the drum, or drum-capstan, for weighing anchors, was invented by sir S. Morland, in 1685. *Anderson*.

DRUMMOND LIGHT. See *Lime-light*.

DRUMCLOG (W. Scotland). Here the Covenanters defeated Graham of Claverhouse, on June 1, 1679. An account of the conflict is given by Walter Scott, in "Old Mortality."

* Sir Walter Raleigh, we are told, wore a white satin-pinked vest, close-sleeved to the wrist, and over the body a brown doublet finely flowered, and embroidered with pearls, and in the feather of his hat a large ruby and pearl drop at the bottom of the sprig in place of a button. His breeches, with his stockings and ribbon garters, fringed at the end, all white; and buff shoes, which on great court days were so gorgeously covered with precious stones, as to have exceeded the value of 660*o*l.; and he had a suit of armour of solid silver, with sword and belt blazing with diamonds, rubies, and pearls. King James's favourite, the duke of Buckingham, could afford to have his diamonds tacked so loosely on, that when he chose to shake a few off on the ground, he obtained all the fame he desired from the pickers-up, who were generally *les Dames de la Cour*. We may here mention a novel dress, the *BLOOMER COSTUME*, introduced into America in 1849, by Mrs. Ann Bloomer, and worn there by many of the women. It resembled male attire, being an open-fronted jacket and loose trousers, the latter wide like those of the Turk, but gathered in at the ankles. The Bloomer dress was first adopted by a few females in the western parts of London, in August, 1851; but though it was recommended by some American ladies in popular lectures, it was soon afterwards totally discontinued.

DRUNKARDS were severely punished by many of the early nations. They were to be excommunicated in the early church, A.D. 59 (1 *Cor.* vii.). In England, a canon law forbade drunkenness in the clergy, A.D. 747. Constantine, king of Scots, punished it with death, 870. By 21 James I., c. 7, 1623, a drunkard was liable to a penalty of five shillings, or six hours in the stocks.

DRURY-LANE THEATRE derives its origin from a cock-pit, which was converted into a theatre in the reign of James I. It was rebuilt, and called the Phoenix; and Charles II. granted an exclusive patent to Thomas Killigrew, April 25, 1662. The actors were called the king's servants, and ten of them, who were called gentlemen of the great chamber, had an annual allowance of ten yards of scarlet cloth, with a suitable quantity of lace. The theatre, with sixty adjoining houses, was burnt down in 1672; and a new edifice was built in its room by sir Christopher Wren, in 1674. The interior was rebuilt by Mr. Adams, and was re-opened Sept. 23, 1775. The Drury-lane Theatrical Fund was originated by David Garrick in 1777. In 1791, the theatre was pulled down; it was rebuilt and opened March 12, 1794. It was totally destroyed by fire, Feb. 24, 1809; and was rebuilt and opened Oct. 10, 1812. See *Theatres and Drama*.

DRUSES, a warlike people dwelling among the mountains of Lebanon, derive their origin from a fanatical Mahometan sect which arose in Egypt about 996, and fled to Palestine, to avoid persecution. They now retain hardly any of the religion of their ancestors: not practising circumcision, prayers, or fasting; but eating pork and drinking wine. In the middle of 1860, in consequence of disputes (in which doubtless both parties were to blame), the Druses attacked their neighbours the Maronites (*which see*), whom they massacred, it was said, without regard to age or sex. Peace was made in July; but in the meantime a religious fury seized the Mahometan population of the neighbouring cities, and a general massacre of Christians ensued. See *Damascus and Syria*. Fuad Pacha with Turkish troops; and general Hautpoul with French auxiliaries, invaded Lebanon in Aug. and Sept. The Druses surrendered, giving up their chiefs, several of whom were tried and condemned to die, in Jan. 1861. The British government engaged to endeavour to moderate the severity of this sentence. It was then stated that the Christians had also massacred the Druses.

DUBLIN, capital of Ireland, anciently called Aschled, said to have been built A.D. 140. It obtained its present name from Alpinus, a lord or chief among the Irish, whose daughter, Auliana, having been drowned at the ford where now Whitworth-bridge is built, he changed the name to Auliana, by Ptolemy called Eblana (afterwards corrupted into Dublana), that she might be had in remembrance. Alpinus is said to have made this place his residence, about A.D. 155, when he brought "the then rude hill into the form of a town." See *Ireland*.

DUBLIN, ARCHBISHOPRIC OF. It was united to Glendalagh in 1214. It is supposed that the bishopric of Dublin was founded by St. Patrick, in 448. Gregory, bishop in 1121, became *archbishop* in 1152. George Browne, an Augustine friar of London (deprived by queen Mary in 1554), was the first Protestant archprelate of this see. Dublin has two cathedrals, Christ Church, and St. Patrick's. The revenue was valued, in the king's books, 30 Hen. VII. at 534l. 15s. 2d. Irish. Kildare, on its last avoidance, was annexed to Dublin, 1846. See *Bishops*.

DUCAT, a coin so called because struck by dukes. *Johnson*. First coined by Longinus, governor of Italy. *Procopius*. First struck in the duchy of Apulia, 1140. *Du Cange*. Coined by Robert, king of Sicily, in 1240.

DUELLING took its rise from the judicial combats of the Celtic nations. The first duel in England, William count of Eu and Godfrey Baynard, took place A.D. 1096. Duelling in civil matters was forbidden in France, 1305. The present practice of duelling arose in the challenge of Francis I. to the emperor Charles V. 1528. The fight with small swords was introduced into England, 29 Eliz. 1587. Proclamation that no person should be pardoned who killed another in a duel, 30 Charles II. 1679.* Duelling was checked in the army, 1792; and has been almost abolished in England, by the influence of public opinion aided by the prince consort. A society "for the discouraging of duelling" was established in 1845. See *Battel*, *Wager of*, and *Combat*.

MEMORABLE DUELS.		A.D.	
Between the duke of Hamilton and lord Mohun, fought	Nov. 15, 1712	Colonel Fullerton and lord Shelburne; the latter wounded	March 22, 1780
[This duel was fought with small swords in Hyde Park. Lord Mohun was killed upon the spot, and the duke expired of his wounds as he was being carried to his coach.]		Rev. Mr. Allen and Lloyd Dulany; the latter killed	June 18, 1782
Capt. Peppard and Mr. Hayes; latter killed	1728	Colonel Thomas of the Guards and colonel Gordon; colonel Thomas killed.	Sept. 4, 1783
Messrs. Hamilton and Morgan; former killed	1748	Lord Macartney and major-gen. Stuart; the former wounded	June 8, 1786

Lieut. Willis and major Impey; the major killed	Aug. 26, 1801	Mr. Bric, barrister, and Mr. Hayes; the former killed	Dec. 26, 1790
Rt. hon. George Ogle and Bernard Coyle, eight shots; no fatality	1802	Rev. Mr. Hodson and Mr. Grady; the latter wounded	Aug. 1827
Sir Richard Musgrave and Mr. Todd Jones; sir Richard wounded	June 8, 1790	Major Edgeworth and Mr. Henry Grattan; an affair; and no meeting	Sept. 1790
Colonel Montgomery and captain Mac Namara; the former killed	April 6, 1803	Mr. Long Wellesley and Mr. Crespiigny; neither wounded	1828
General Hamilton and colonel Aaron Burr; the general killed, greatly lamented (in America)	1804	Duke of Wellington and the earl of Winchelsea; no injury	March 21, 1829
Lord Camelford and captain Best; lord Camelford killed	March 10, 1790	Lieut. Crowther and captain Helsham; the former killed	April 1, 1790
Surgeon Fisher and lieut. Torrens; the latter killed	March 22, 1806	Mr. William Lambrecht and Mr. Oliver Clayton; the latter killed	Jan. 8, 1830
Baron Hompesch and Mr. Richardson; the latter severely wounded	Sept. 21, 1790	Captain Smith and Mr. O'Grady; the latter killed	March 18, 1790
Sir Francis Burdett and Mr. Paul; the former wounded	May 5, 1807	Mr. Storey and Mr. Mathias; the latter wounded	Jan. 22, 1833
Mr. Alcock and Mr. Colclough; the latter killed; the survivor lost his reason	June 8, 1790	Mr. Maher and Mr. Colles	Jan. 22, 1790
M. de Granpree and M. Le Pique, in balloons, near Paris, and the latter killed	May 3, 1808	Sir John W. Jeffcott and Dr. Hennis; the latter mortally wounded, and died on the 18th	May 10, 1790
Major Campbell and captain Boyd; latter murdered; (former hanged, Oct. 2, 1808)	June 23, 1790	Charles Wellesley Ashe and sir Charles Hampton	Sept. 11, 1834
Lord Paget and captain Cadogan; neither wounded	May 30, 1809	Lord Alvanley and Mr. Morgan O'Connell; two shots each	May 4, 1835
Lord Castlereagh and Mr. George Canning; the latter wounded	Sept. 22, 1790	Sir Colquhoun Grant and lord Seymour; no fatality	May 29, 1790
Mr. George Payne and Mr. Clarke; the former killed	Sept. 6, 1810	Mr. Roebuck, M.P., and Mr. Black, editor of the <i>Morning Chronicle</i> ; two shots each	Nov. 19, 1790
Captain Boardman and ensign de Balton; the former killed	March 4, 1811	Mr. Ruthven and Mr. Scott; and Mr. Ruthven and Mr. Close (Mr. Scott's second), the latter wounded	May 23, 1836
Lieut. Stewart and lieut. Bagnal; the latter mortally wounded	Oct. 7, 1812	The earl of Cardigan and captain Tuckett, 11th Regt.; two shots each; the latter wounded, (for this the earl was tried in the house of lords and acquitted, Feb. 16, 1841)	Sept. 12, 1840
Mr. Edward Maguire and lieut. Blundell; the latter killed	July 9, 1813	Captain Boldero and hon. Craven Berkeley; no fatality	July 15, 1842
Mr. Hatchell and Mr. Morley	Feb. 12, 1814	Colonel Fawcett and captain Munroe; former killed	July 1, 1843
Capt. Stackpole (of <i>Stavira</i> frigate) and lieut. Cecil; the captain killed (arose on account of words spoken four years previously)	April, 1790	Lieut. Seton and lieut. Hawkey; the former killed	May 20, 1845
Mr. D. O'Connell and Mr. D'Esterre; Mr. D'Esterre killed	Feb. 1, 1815		
Colonel Quentin and colonel Palmer	Feb. 7, 1790		
Mr. O'Connell and Mr. Peel; an affair, no meeting	Aug. 31, 1790		

DUKE, Latin *dux*, a title first given to generals of armies. In England during Saxon times, the commanders of armies were called *dykes*, *duccs*. *Camden*. In *Genesis* xxxvi. some of Esau's descendants are termed *dukes*. The title lay dormant from the Conquest to the reign of Edward III. who conferred it on his eldest son, Edward the Black Prince, by the style of the duke of Cornwall, A.D. 1337. Robert de Vere was created marquess of Dublin and duke of Ireland, 9 Rich. II. 1385. The first duke created in Scotland was by king Robert III., who created David, prince of Scotland, duke of Rothesay, a title which after-

wards belonged to the king's eldest son, A.D., 1398, and is now borne by the prince of Wales. Cosmo de' Medici was created *grand-duke* of Tuscany, the first of that rank, by pope Pius V. in 1569. *Duke-duke* was a title given to the house of Sylvia, in Spain, on account of its possessing many duchies.

DULWICH COLLEGE (Surrey), called God's-gift College, founded by Edward Alleyn, an eminent comedian, was completed and solemnly opened Sept. 13, 1619. Alleyn was its first master, and died in 1626. A fine gallery to contain the Bourgeois collection of pictures, bequeathed by sir Francis Bourgeois, was annexed in 1813. In 1857 the college was ordered to be reconstituted. Two schools were established; and the number of the almspeople increased. In 1860 the annual income was 11,482*l*.

DUMB. See *Deaf and Dumb*.

DUMBLANE OR DUNBLANE (Perth), near which took place a conflict called the battle of Sheriffmuir, between the royalist army and the Scots rebels, the former commanded by the duke of Argyle, and the latter by the earl of Mar, Nov. 13, 1715. The duke had 4000 veteran troops; the earl had 8000 men, but all newly raised; the loss was equal on both sides, and each claimed the victory.

DUNBAR (Haddington). Here the Scottish army and John Baliol were defeated by the earl of Warrene, and Scotland was subdued, April 27, 1296. Here also Cromwell obtained a signal victory over the Scots, in arms for Charles II., Sept. 3, 1650.

DUNCIAD, the celebrated satirical poem by Alexander Pope, was published in 1728.

DUNDALK (Louth, Ireland). In 1318, at Foughart near this place, was defeated and slain Edward Bruce, who had invaded Ireland in 1315. The walls and fortifications of Dundalk were destroyed in 1641. It was taken by Cromwell in 1649. The first cambric manufacture in Ireland was established in this town by artisans from France in 1727.

DUNDEE (E. Scotland), a flourishing port on the Tay. The site was given by William the Lion (reigned 1165—1214), to his brother David, earl of Huntingdon, who built or strengthened the castle, and erected a large church, the tower of which, 156 feet high, still remains. The town was taken by the English in 1385; pillaged by Montrose, 1645; stormed by Monk in 1651; and was visited by queen Victoria in 1844. It has thriven amazingly since the peace in 1815, principally through its extensive linen manufactories; at one of these (Edwards's) a steam explosion took place on April 15, 1859, when twenty persons were killed. Claverhouse, viscount Dundee (killed 1689), had a house here. Population in 1861, 90,425.

DUNGAN-HILL (Ireland). Here the English army, commanded by colonel Jones, signally defeated the Irish, of whom 6000 are said to have been slain, while the loss on the side of the English was inconsiderable, July 10, 1647.

DUNKIRK (N. France). This town, founded in the seventh century, was taken from the Spaniards by the English and French, and put into the hands of the English, June 1658, the last year of Cromwell's administration. It was sold by Charles II. for 500,000*l*. to Louis XIV., Oct. 17, 1662. The French king made Dunkirk one of the best fortified ports in the kingdom; but all the works were demolished, and the basins filled up, in conformity with the treaty of Utrecht in 1713. The French afterwards resumed the works, but they were ordered to be demolished at the peace of 1763. They continued thus till the peace of 1783, when they were again resumed. The English attempted to besiege this place; but the duke of York, who commanded, was defeated by Hoche, and forced to retire with loss, Sept. 7, 1793. Made a free port in 1816.

DUNMOW (Essex), a town famous for the tenure of the manor, "that whatever married couple will go to the priory, and kneeling on two sharp-pointed stones, will swear that they have not quarrelled nor repented of their marriage within a year and a day after its celebration, shall receive a fitch of bacon." This custom was instituted by Robert de Fitzwalter, in the reign of Henry III. 1244.*

DUNSINANE (Perthshire). On the hill was fought the battle between Macbeth thethane of Glamis, and Siward, earl of Northumberland, 1054. Edward the Confessor had sent Siward on behalf of Malcolm III., whose father Duncan, the thane and usurper had

* The earliest recorded claim for the bacon was in 1445, since when to 1855 it had only been demanded five times. The last claimants previous to 1855 were John Shakeshanks and his wife, who established their right to it, June 20, 1751: they made a large sum by selling slices of the fitch to those who were witnesses of the ceremony, there being 5000 persons present. The claim was revived on July 19, 1855, when fitches were awarded to Mr. and Mrs. Barlow, of Chipping-Ongar and the Chevalier Chatelaine and his lady. The lord of the manor opposed the revival, but Mr. W. Harrison Ainsworth, the novelist, and some friends, defrayed the expense, and superintended the ceremonials. Endeavours have been made to perpetuate the custom. A fitch was awarded in 1860.

murdered. Macbeth was defeated, and it was said was pursued to Lumphanan, in Aberdeenshire, and there slain, 1056.

DUPPLIN (Perthshire). Here Edward Balliol and his English allies totally defeated the Scots under the earl of Mar, Aug. 11, 1332, and obtained the crown for three months.

DURHAM, an ancient city, the *Dunholme* of the Saxons, and *Durême* of the Normans. The palatine privileges, granted to the bishop by the Danish Northumbrian prince Guthrum, were taken by the crown in June 1836. Durham was ravaged by Malcolm of Scotland in 1070, and was occupied by the Northumbrian rebels in 1569; and by the Scots in 1640. In 1650 Cromwell quartered his Scotch prisoners in the cathedral. Near Durham on Oct. 17, 1346, was fought the decisive battle of Neville's cross (*which see*). The BISHOPRIC was removed to Durham from Chester-le-street in 995; whither it had been transferred from Lindisfarne or Holy Island, on the coast of Northumberland, in 634, in consequence of the invasions of the Danes. The bones of St. Cuthbert, the sixth bishop, were brought from Lindisfarne, and interred in Durham cathedral. This see, deemed the richest in England, was valued in the king's books at 2821*l*. Present income, 8000*l*. The college, founded in 1290, was abolished at the Reformation. In 1657 Cromwell established a college which was suppressed at the Restoration. The present *University* was established in 1831, opened in 1833, and chartered in 1837.

RECENT BISHOPS OF DURHAM.

1791. Hon. Shute Barrington, died in 1826.	1856. Charles Thomas Longley, became abp. of York, May, 1860.
1826. Wm. Van Mildert (the last prince-bishop), died Feb. 21, 1856.	1860. Hon. H. Montagu Villiers (trans. from Carlisle), died Aug. 10, 1861.
1836. Edward Maltby, resigned in 1856; died July 3, 1859, aged 90.	1861. Charles Baring (PRESENT bishop).

DURHAM LETTER. See *Papal Aggression*.

DUTCH REPUBLIC. See *Holland*.

DUUMVIRI, two Roman patricians appointed by Tarquin the Proud 520 B.C. to take care of the books of the Sibyls, which were supposed to contain the fate of the Roman empire. The books were placed in the Capitol, and secured in a chest under the ground. The number of keepers was increased to ten (the Decemviri) 365 B.C., afterwards to fifteen; the added five called *quinque viri*.

DWARFS: ANCIENT. Philotas of Cos, distinguished about 330 B.C. as a poet and grain-marian, was so diminutive that he always carried leaden weights in his pockets, to prevent his being blown away by the wind. He was preceptor to Ptolemy Philadelphus. *Ælian*. Julia, niece of Augustus, had a dwarf named Coropas, two feet and a hand's breadth high; and Andromeda, a freed-maid of Julia's, was of the same height. *Pliny*. Aug. Cæsar exhibited in his plays a man not two feet in stature. *Sueton*. Alypius of Alexandria, a logician and philosopher, was but one foot five inches and a half high; "he seemed to be consumed into a kind of divine nature." *Vos, Instit.* MODERN. John de Estrix, of Mechlin, was brought to the duke of Parma, in 1592, when he was 35 years of age, having a long beard. He was skilled in languages, and not more than three feet high. Jeffrey Hudson, an English dwarf, when a youth of 18 inches high was served up to table in a cold pie, before the king and queen, by the duchess of Buckingham, in 1626. He challenged Mr. Crofts, who had offended him, to fight a duel, but the latter came to the ground armed only with a squirt: this led to another meeting, when the dwarf shot his antagonist dead, 1653. Count Borowlaski, a Polish gentleman, of great accomplishments and elegant manners, well known in England, where he resided many years, was born in Nov. 1739. His growth was at one year of age, 14 inches; at six, 17 inches; at twenty, 33 inches; and at thirty, 39. He had a sister, named Anastasia, seven years younger than himself, and so much shorter that she could stand under his arm. He visited many of the courts of Europe, and died in England at the great age of 98, in 1837. The celebrated "Tom Thumb," exhibited as a dwarf in England, 1846 *et seq.*, was afterwards acknowledged to have been younger than originally stated.

DYEING. The discovery of the art is attributed to the Tyrians, about 1500 B.C. The English sent their goods to be dyed in Holland, till the art was brought to them from the Low Countries in 1608. "Two dyers of Exeter were flogged for teaching their art in the north" (of England), 1628. A statute against abuses in dyeing passed in 1783. The art has been greatly improved by chemical research in the present century. A discovery of Dr. Stenhouse in 1848, led to M. Marnas procuring *mauve* from lichens; and Dr. Hofmann's production of aniline from coal-tar, has led to the invention of a number of beautiful dyes (mauve, magenta red, &c.). See *Aniline*.

E.

EAGLE, an ancient coin of Ireland, made of a base metal, and current in the first years of Edward I. about 1272; was so named from the figure impressed upon it. The *American* gold coinage of eagles, half eagles, and quarter eagles, began Dec. 6, 1792; an eagle is of the value of 10 dollars, or about two guineas.—The *standard of the eagle* was borne by the Persians, at Cunaxa, 401 B.C. The Romans carried gold and silver eagles as ensigns, and sometimes represented them with a thunderbolt in their talons, on the point of a spear; at 102 B.C. Charlemagne added the second head to the eagle for his arms, to denote that the empires of Rome and Germany were united in him, A.D. 802. The eagle was the standard of Napoleon I., and is that of Napoleon III.; as well as of Austria, Russia, and Prussia.—The **WHITE EAGLE**, an order of knighthood, was instituted in 1325, by Uladislaus, king of Poland; that of the **BLACK EAGLE** in 1701, by the elector of Brandenburg, Frederick I., on his being crowned king of Prussia; and that of the **RED EAGLE** in 1705 and 1712 by George prince of Brandenburg-Anspach.

EARL. The *comes* or earl introduced at the conquest superseded the Saxon earldorman, and continued the highest rank in England, until Edward III. created dukes in 1337 and 1351, and Richard II. created marquesses (1385), both having precedency above earls. Earls had anciently, for the support of their state, the third penny out of the sheriff's court, issuing out of the pleas of the shire whereof they had their title, as in ancient times there were no counts or earls but had a county or shire for his earldom. Upon the increase of earls their revenue ceased, and their powers were abridged.—Alfred used the title of earl as a substitute for king. William Fitz-Osborn was made earl of Hereford by William the Conqueror, 1066. Gilchrist was created earl of Angus, in Scotland, by king Malcolm III. in 1037. Sir John de Courcy created baron of Kinsale and earl of Ulster in Ireland, by Henry II. 1181.

EARL MARISCHAL of Scotland was an officer who commanded the cavalry, whereas the constable commanded the whole army; but they seem to have had a joint command, as all orders were addressed to "our constable and marischal." The office was never out of the Keith family. It was reserved at the Union; and when the heritable jurisdictions were bought, it was in the crown, being forfeited by the rebellion of George Keith, earl marischal, in 1715.

EARL MARSHAL of England. The eighth great officer of state. This office, until it was made hereditary,

always passed by grant from the king. The rank was lord marshal only, until Richard II. in 1397 granted letters patent to the earl of Nottingham, by the style of earl marshal. In 1672, Charles II. granted to Henry lord Howard the dignity of earl marshal, with power to execute the same by deputy. Gilbert de Clare was created lord marshal by king Stephen, 1135. The last lord marshal was John Fitz-Allan, lord Maltravers. *Camden; Ashmole's Instit.* The Earl Marshal's court was abolished in 1641.

EARRINGS are very ancient. They were worn by Jacob's children, 1732 B.C. (*Gen.* xxxv. 4).

EARTH. See *Globe*.

EARTHENWARE was in use among the Egyptians and Greeks 1390 B.C.; made by the Romans, 715 B.C. The art was revived and improved at Faenza, in Italy, A.D. 1310. Wedgwood's patent ware was first made in 1762. See *China* and *Etruria*. The duty on earthenware was taken off in 1860.

EARTHQUAKES. The theory of earthquakes has not yet been formed with any degree of certainty. Anaxagoras supposed that earthquakes were produced by subterraneous clouds bursting out into lightning, which shook the vaults that confined them, 435 B.C. *Diog. Laert.* Kircher, Des Cartes, and others, supposed that there were many vast cavities under ground which have a communication with each other, some of which abound with waters, others with exhalations, arising from inflammable substances, as nitre, bitumen, sulphur, &c. These opinions continued to be supported till 1749-50, when an earthquake was felt at London, and several parts of Britain. Dr. Stukeley and Dr. Priestley attributed them to electricity. In many cases, however, it appears probable that the immense power of water converted into steam by subterraneous fires must contribute to augment the force which occasions earthquakes. An elaborate Catalogue of Earthquakes, with commentaries on the phenomena, by R. and J. W. Mallet, was published by the British Association in 1858-9. In 1860 the velocity of their propagation was estimated by Mr. J. Brown at between 470 and 530 feet per second. The following are quoted from the best sources: *

* Mrs. Somerville states that about 255 earthquakes have occurred in the British isles; all slight. To avoid the effects of a shock predicted by a madman, for the 8th of April, 1750, thousands of persons, particularly those of rank and fortune, passed the night on the 7th in their carriages and in tents in Hyde Park.

EARTHQUAKES, *continued.*

One which made Eubœa an island	425	At Grand Cairo, half of the houses and 40,000 persons swallowed up	1754
Ellice and Bula in the Peloponnesus swallowed up	372	Quito destroyed	April, 1755
One at Rome, when, in obedience to an oracle, M. Curtius, armed and mounted on a stately horse, leaped into the dreadful chasm it occasioned (<i>Livy</i>)	358	Great earthquake at Lisbon. In about eight minutes most of the houses and upwards of 50,000 inhabitants were swallowed up, and whole streets buried. The cities of Coimbra, Oporto, and Braga, suffered dreadfully, and St. Ubes was wholly overturned. In Spain, a large part of Malaga became ruins. One half of Fez, in Morocco, was destroyed, and more than 12,000 Arabs perished there. Above half of the island of Madeira became waste; and 2000 houses in the island of Meteline, in the Archipelago, were overthrown: this awful earthquake extended 5000 miles; even to Scotland*	Nov. 1, —
Duras, in Greece, buried with all its inhabitants; and twelve cities in Campania also buried	345	In Syria, extended over 10,000 square miles; Balbec destroyed	1759
Lydimachia and its inhabitants totally buried	283	At Martinico; 1600 persons lost their lives, Aug. 1767	1767
Epheesus and other cities overturned	17	At Guatemala, which, with 8000 inhabitants, was swallowed up	July 7, 1773
One accompanied by the eruption of Vesuvius; the cities of Pompeii and Herculaneum buried	79	A destructive one at Smyrna	1778
Four cities in Asia, two in Greece, and two in Galatia overturned	107	At Tauris: 15,000 houses thrown down, and multitudes buried	1780
Antioch destroyed	113	Messina and other towns in Italy and Sicily overthrown; 40,000 persons perished Feb. 5, 1783	1783
Nicomedia, Casarea, and Nicea overturned	126	Archindschan wholly destroyed, and 12,000 persons buried in its ruins	1784
In Asia, Pontus, and Macedonia, 150 cities and towns damaged	357	At Borgo di San Sepolero; many houses and 1000 persons swallowed up	Sept. 30, 1789
Nicomedia again demolished, and its inhabitants buried in its ruins	358	Another fatal one in Sicily	1791
One felt by nearly the whole world	543	In Naples; Vesuvius overwhelmed the city of Torre del Greco	June, 1794
At Constantinople; its edifices destroyed, and thousands perished	557	In Turkey, where, in three towns, 10,000 persons lost their lives	—
In Africa; many cities overturned	560	The whole country between Santa Fé and Panama destroyed, including Cusco and Quito, 40,000 people buried in one second Feb. 4 to 20, 1797	1797
Awful one in Syria, Palestine, and Asia; more than 500 towns were destroyed, and the loss of life surpassed all calculation	742	At Constantinople which destroyed the royal palace and an immensity of buildings, and extended into Romania and Wallachia, Sept. 26, 1800	1800
In France, Germany, and Italy	801	A violent one felt in Holland	Jan. 1804
Constantinople overturned; all Greece shaken	936	At Frosolone, Naples; 6000 lives lost	July 26, 1805
One felt throughout England	1089	At the Azores; a village of St. Michael's sunk, and a lake of boiling water appeared in its place	Aug. 11, 1810
One at Antioch; many towns destroyed; among them, Marisem and Mamistria	1114	Awful one at Caracas (<i>which see</i>)	March 26, 1812
Catania in Sicily overturned, and 15,000 persons buried in the ruins	1137	Several throughout India; district of Kutch sunk: 2000 persons buried	June, 1819
One severely felt at Lincoln	1142	Genoa, Palermo, Rome, and many other towns greatly damaged; thousands perished	—
At Calabria; one of its cities and all its inhabitants overwhelmed in the Adriatic Sea	1186	One in Calabria and Sicily	Oct. 1826
One again felt throughout England	1274	In Spain; Murcia and numerous villages devastated; 6000 persons perished	March 27, 1829
In England; the greatest known there, Nov. 14, 1318	1456	In the duchy of Parma: no less than 40 shocks were experienced at Borgotaro; and at Pontremoli many houses were thrown down, and not a chimney was left standing Feb. 14, 1834	1834
At Naples; 40,000 persons perished	1456	In Calabria, Cosenza and villages destroyed: 1000 persons buried	April 29, 1835
At Lisbon, 1500 houses, and 30,000 persons buried in the ruins; several neighbouring towns engulfed with their inhabitants Feb. 1531	1531	In Calabria; 1000 buried at Rossano, &c., Oct. 12, 1836	1836
One felt in London: part of St. Paul's and the Temple churches fell	1580	In many cities of Southern Syria, by which hundreds of houses were thrown down, and thousands of lives lost	Dec. —
In Japan, several cities made ruins, and thousands perish	1596	At Martinique, nearly half of Port Royal destroyed, nearly 700 persons killed, and the whole island damaged	Jan. 11, 1839
Awful one at Calabria	1638	At Ternate: the island made a waste, and thousands of lives lost	Feb. 14, 1840
One in China, when 300,000 persons were buried in Pekin alone	1662	Awful and destructive earthquake at Mount	
One severely felt in Ireland	1690		
One at Jamaica, which totally destroyed Port Royal, whose houses were engulfed forty fathoms deep, and 300 persons perished	1692		
One in Sicily, which overturned 24 cities and towns and 300 villages. Of Catania and its 18,000 inhabitants, not a trace remained; more than 100,000 lives were lost	1693		
Palermo nearly destroyed; 6000 lives lost	1726		
Again in China; and 100,000 people swallowed up at Pekin	1731		
In Hungary; a mountain turned round	1736		
One at Palermo, which swallowed up a convent; but the monks escaped	1740		
Lima and Callao demolished; 18,000 persons buried in the ruins	Oct. 28, 1746		
In London, a slight shock, Feb. 8; but severer shock	March 8, 1750		
Adrianople nearly overwhelmed	1752		

* At the time of this great earthquake, a singular phenomenon happened at the hot-well at Bristol: the water suddenly became as red as blood, and so very turbid that it could not be drunk. The water also of a common well, which had been remarkably clear, at once turned as black as ink, and continued unfit for use nearly a fortnight. The tide, likewise, in the river Avon flowed back, contrary to its natural course; and various other effects of some unknown convulsion in the bowels of the earth were perceived in different places. But all-conjecture as to the cause of these extraordinary circumstances was vain, till the news arrived of the earthquake at Lisbon having happened on the same day, which gave a satisfactory solution to the several phenomena.

EARTHQUAKES, *continued.*

Ararat, in one of the districts of Armenia : 3137 houses were overthrown, and several hundred persons perished July 2, 1840	Several villages in Central Europe destroyed, July 25, 26, 1855
Great earthquake at Zante, where many per- sons perished Oct. 30, —	Jeddo nearly destroyed Nov. 11, —
At Cape Haytien, St. Domingo, which destroyed nearly two-thirds of the town; between 4000 and 5000 lives were lost May 7, 1842	At the island of Great Sanger, one of the Moluc- cas, volcanic eruption and earthquake, nearly 3000 lives lost March 12, 1856
At Point à Pitre, Guadaloupe, which was en- tirely destroyed Feb. 8, 1843	In the Mediterranean: at Cândia, 500 lives lost; Rhodes, 100; and other islands, 150 Oct. 12, —
At Rhodes and Macri, when a mountain fell in at the latter place, crushing a village, and destroying 600 persons March, 1851	In Calabria, * Montemurro and many other towns destroyed, and about 22,000 lives lost in a few seconds Dec. 16, 1857
At Valparaiso; where more than 400 houses were destroyed April 2, —	Corinth nearly destroyed Feb. 21, 1858
In South Italy; Melfi almost laid in ruins; 14,000 lives lost Aug. 14, —	At Quito; about 5000 persons killed, and an immense amount of property destroyed, March 29, 1859
At Philippine Isles; Manila nearly destroyed, Sept. and Oct. 1852	At Erzeroum, Asia Minor; above 1000 persons said to have perished June 2, —
In N.W. of England, slight Nov. 9, —	At San Salvador; many buildings destroyed, no lives lost Dec. 8, —
Thebes in Greece nearly destroyed Sept. 1853	In Cornwall, slight Oct. 21, 1859; Jan. 13, 1860
St. Salvador, S. America, destroyed April 16, 1854	At Perugia, Italy, several lives lost May 8, 1861
Anasaca, in Japan, and Simoda in Nippon, destroyed; Jeddo much injured Dec. 23, —	At Mendoza, South America; about two-thirds of the city and 7000 lives lost March 20, —
Broussa, in Turkey, nearly destroyed Feb. 28, 1855	In Greece, N. Morea, Corinth and other places injured Dec. 26, —

EAST ANGLES. The kingdom of the East Angles (the sixth of the Heptarchy) was commenced by Uffa, A.D. 575, and ended with Ethelbert in 792. See *Britain*. Of this name was an ancient see founded by St. Felix, who converted the East Angles in 630. It was removed to Norwich, *which see*.

EAST INDIES, &c. See *India*. **EAST SAXONS.** See *Britain*.

EASTER. The festival observed by the church in commemoration of Our Saviour's resurrection. So called in England from the Saxon goddess *Eostre*. The festival of Easter was instituted about A.D. 68; the day for the observance of it was fixed in England by St. Austin, in 597. After much contention between the eastern and western churches it was ordained by the council of Nice, A.D. 325, to be observed on the same day throughout the whole Christian world. Easter is the first Sunday after the first full moon that occurs after the 21st of March. The dispute between the old British church and the new Anglo-Saxon church was settled about 664.—Easter Sunday, in 1863, April 5.

EASTER ISLAND, in the Pacific Ocean, was discovered by Davis in 1686; it was visited by Roggewein, in 1722, and from him obtained the name it now bears; it was visited by captain Cook, in 1774. At the south-east extremity is the crater of an extinguished volcano, about two miles in circuit and 800 feet deep.

EASTERN (or GREEK) CHURCH. See *Greek Church*.

EASTERN EMPIRE, commenced under Valens, A.D. 364, and ended in the defeat and death of Constantine XII. the last Christian emperor, May 29, 1453. Mahomet II. resolved to dethrone him, and obtain Constantinople, and took it by assault after a siege of fifty-eight days. The unfortunate emperor, seeing the Turks enter by the breaches, threw himself into the midst of the enemy and was cut to pieces; the children of the imperial house were massacred and the women reserved. See *Turkey*.

Maximus, the tyrant, defeated and slain by Theodosius A.D. 388	It is besieged by the Saracens, whose fleet is destroyed by the Greek fire. See <i>Greek Fire</i> . 673
Public schools instituted, and Theodosius II. endeavours to restore learning 425	Second siege of Constantinople by the Arabs 716
The Circus factions slaughter each other 445	Great pestilence 746-9
Constantinople besieged by Vitalianus, whose fleet is burned with a brazen speculum by Proclus 514	Alexius Angelus, brother of Isaac II., revolts, puts out the emperor's eyes, and ascends the throne A.D. 1195
Turkish empire begins in Asia 545	Constantinople is taken by the Latins, who restore Isaac with his son 1203
Power of the popes begins, by concessions of Phocas 636	Usurpation of Alexis Duca (or Mourzoufle) 1204
The Persians besiege Constantinople 636	The French and Venetians take Constantinople by storm 1204
The Arabs besiege it 668	Latin emperors rule from 1204 to 1261

* In the course of 75 years, from 1783 to 1857, the kingdom of Naples lost, at least, 111,000 inhabitants, by the effects of earthquakes, or more than 1500 per year, out of an average population of 6,000,000!

EASTERN EMPIRE, *continued.*

Constantinople recovered from the Latins by the Greek emperors. A.D. 1261
 Turks (under Örcan) enter Europe, 1332; settle in Thrace 1356
 Amurath I. takes Adrianople 1361

Bajazet I. conquers Wallachia 1391
 Mahomet II. takes Constantinople: Constantine XII. killed: end of the Eastern Empire, May 29, 1453.
 See Turkey.

EMPERORS OF THE EASTERN EMPIRE.

364. Valens.
 379. Theodosius I. a Great.
 395. Arcadius, the son of Theodosius.
 408. Theodosius II. succeeded his father.
 450. Marcian, a Thracian of obscure family.
 457. Leo I. the Thracian.
 474. Leo the Younger, died the same year.
 → Zeno, called the *Isaurian*.
 491. Anastasius I. an Illyrian, of mean birth.
 528. Justin I. originally a private soldier.
 527. Justinian founder of the Digest.
 565. Justin II. nephew of Justinian.
 578. Tiberius II. renowned for his virtues.
 582. Maurice, the Cappadocian: murdered with all his children, by his successor,
 602. Phocas the Usurper, a centurion, whose crimes and cruelties led to his own assassination in 610.
 610. Heraclius, by whom Phocas was dethroned.
 641. Heraclonas-Constantine, reigned a few months; poisoned by his step-mother Martina.
 — Constant II.; assassinated in a bath.
 668. Constantine III. Pogonatus.
 685. Justinian II. son of the preceding; abhorred for his exactions, debaucheries, and cruelties: dethroned and mutilated by his successor
 695. Leontius: dethroned and mutilated by Tiberius Aspimar.
 698. Tiberius III. Aspimar.
 705. Justinian II. restored. Leontius and Tiberius degraded in the Hippodrome, and put to death. Justinian slain in 711.
 711. Philippicus-Bardanes: assassinated.
 713. Anastasius II.: fled on the election of Theodosius in 716; afterwards delivered up to Leo II. and put to death.
 716. Theodosius III.
 718. Leo III. the Isaurian.
 [In this reign (726) commences the great iconoclastic controversy; the alternate prohibition and restoration of images involves the peace of several reigns.]
 741. Constantine IV. Copronymus, son of the preceding; succeeded by his son,
 775. Leo IV.
 820. Constantine V. and his mother Irene.
 790. Constantine, alone, by the desire of the people, Irene having become unpopular.
 792. Irene, again, jointly with her son and afterwards alone, 797: deposed for her cruelties and murders, and exiled.
 802. Nicephorus I. surnamed Logothetes: slain.
 811. Staurachius: reigns a few days only.
 — Michael I.: defeated in battle, abdicates the throne, and retires to a monastery.
 813. Leo V. the Armenian: killed in the temple at Constantinople on Christmas-day, 820, by conspirators in the interest of his successor,
 820. Michael II. the Stammerer.
 829. Theophilus, son of Michael.
 842. Michael III. surnamed Porphyrogenitus, and the Son, son of the preceding: murdered by his successor,
 867. Basilus I. the Macedonian.
 886. Leo VI. styled the Philosopher.
 911. Alexander and Constantine VI., Porphyrogenitus, brother and son of Leo, the latter only six years of age; the former dying in 912, Zoë, mother of Constantine, assumes the regency.

919. Romanus Lecapenus usurps the imperial power, and associates with him his sons:
 920. Christopher, and
 928. Stephen and Constantine VII.
 [Five emperors now reign: of these, Christopher dies in 931; Romanus is exiled by his sons, Constantine and Stephen, who are themselves banished the next year.]
 945. Constantine VII. now reigns alone: poisoned by his daughter-in-law, Theophania, 959.
 959. Romanus II. son of the preceding: this monster, who had contrived his father's death, banishes his mother, Helena.
 963. Nicephorus II. Phocas: marries Theophania, his predecessor's consort, who has him assassinated.
 969. John I. Zimisces, celebrated general: takes Basilus II. and Constantine VIII. sons of Romanus II., as colleagues; John dies, supposed by poison, and
 976. Basilus II. and Constantine VIII. reign alone: the former dies in 1025; the latter in 1028.
 1028. Romanus III. Argyropulus; poisoned by his profligate consort Zoë, who raises
 1034. Michael IV. the Paphlagonian, to the throne: on his death Zoë places
 1041. Michael V. surnamed Calaphates, as his successor: him she dethrones, has his eyes put out, and marries
 1042. Constantine IX. Monomachus, who, and Zoë, reign jointly: Zoë dies in 1050.
 1054. Theodora, widow of Constantine.
 1056. Michael VI. Stratiotes, or Strato: deposed.
 1057. Isaac I. Comnenus: abdicates.
 1059. Constantine X. surnamed Duca.
 1067. Eudocia, consort of the preceding, and Romanus IV. surnamed Diogenes, whom she marries, reign to the prejudice of Michael, Constantine's son.
 1071. Michael VII. Parapinaces, recovers his throne, and reigns jointly with Constantine XI.
 1078. Nicephorus III.; dethroned by
 1081. Alexius I. Comnenus, succeeded by
 1118. John Comnenus, his son, surnamed Kalos: died of a wound from a poisoned arrow.
 1143. Manuel I. Comnenus, son of John.
 1180. Alexius II. Comnenus, son of the preceding, under the regency of the empress Maria, his mother.
 1183. Andronicus I. Comnenus, causes Alexius to be strangled and seizes the throne: put to death by
 1185. Isaac II. Angelus-Comnenus, who is deposed, imprisoned, and deprived of his eyes by his brother,
 1195. Alexius III. Angelus, called the Tyrant: this last deposed in his turn, and his eyes put out; died in a monastery.
 1203. Isaac IV. again, associated with his son, Alexius IV.: deprived.

LATIN EMPERORS.

- 1204 Baldwin I. earl of Flanders, on the capture of Constantinople by the Latins, elected emperor: made a prisoner by the king of Bulgaria, and never heard of afterwards.
 1206. Henry I. his brother: dies in 1217.
 1216. Peter de Courtenay, his brother-in-law.
 1221. Robert de Courtenay, his son.
 1228. Baldwin II. his brother, a minor, and John de

EBIONITES, Heretics who denied the divinity of Christ, in the second century. The Ebionites seem to have been a branch of the Nazarenes. *Eusebius*. The Ebionites were of two kinds : one, who believed that our Saviour was born of a virgin, and observed all the precepts of the Christian religion, but added the ceremonies of the Jewish people ; the other, who believed that Christ was born after the manner of all mankind, and denied his divinity. *Pardon*. Photinus revived the sect in 342.

EBONITE (vulcanised india-rubber). See *Caoutchouc*.

EBRO, a river in Spain, the scene of a signal defeat of the Spaniards by the French, near Tudela, Nov. 23, 1808 ; and also of several important movements of the allied British and Spanish armies during the Peninsular war (1809 and 1813).

ECCLESIASTICAL COMMISSIONS. One was appointed by queen Elizabeth, 1584 ; by James I. in Scotland, 1617 ; by the English parliament in 1641 ; and by James II. to coerce the universities in 1687. The present Ecclesiastical Commissioners (bishops, deans, and laymen) were appointed in 1835, and incorporated in 1836.

ECCLESIASTICAL COURTS. There existed no distinction between lay and ecclesiastical courts in England until after the Norman conquest, A.D. 1066. See *Arches and Consistory Courts*. Till the establishment of the Divorce and Probate courts (*which see*), the following were the causes cognisable in ecclesiastical courts : blasphemy, apostasy from Christianity, heresy, schism, ordinations, institutions to benefices, matrimony, divorces, bastardy, tithes, incests, fornication, adultery, probate of wills, administrations, &c.

ECCLESIASTICAL STATE, or **STATES OF THE CHURCH**. See *Rome, Modern*.

ECCLESIASTICAL TITLES BILL. See *Papal Aggression*.

ECHOES. The time which elapses between the utterance of a sound and its return must be more than one-twelfth of a second, to form an echo. The whispering gallery of St. Paul's is a well-known example. The echo of Westminster-bridge once obtained a dramatic fame.

ECKMÜHL (Bavaria), the site of a battle between the main armies of France (75,000) and Austria (40,000) ; the one commanded by Napoleon and marshal Davoust (hence prince d'Eckmühl), the other by the archduke Charles, April 22, 1809. Napoleon adopted his usual plan of breaking through the enemy's lines, to which the Austrian position afforded too great facility ; and the conflict terminated in the disastrous defeat of the Imperialists, whose loss of this battle led to other immediate reverses.

ECLÉCTICS (from Greek, *eklego*, I choose). Ancient philosophers called *Analogetici*, and also *Philalethes*, or the lovers of truth. Without attaching themselves to any sect, they chose what they judged good from each : of them was Potamon of Alexandria, about A.D. 1. *Dryden*. Also a sect, so called in the Christian church, who considered the doctrine of Plato conformable to the spirit of Christianity.

ECLIPSE. See *Races*.

ECLIPSES. The revolution of eclipses was first calculated by Calippus, the Athenian, 336 B.C. The Egyptians said they had accurately observed 373 eclipses of the sun, and 832 of the moon, in the period from Vulcan to Alexander, who died 323 B.C. The theory of eclipses is said to have been known to the Chinese before 120 B.C. The first eclipse recorded happened March 19, 721 B.C. at 8' 40" P.M. according to Ptolemy ; it was lunar, and was observed with accuracy at Babylon. A list of eclipses to the year A.D. 2000 is given in "*L'Art de Vérifier les Dates*."

ECLIPSES, *continued.*

REMARKABLE ECLIPSES :—

OF THE SUN.			
That predicted by Thales.* See <i>Italy</i> (Pliny, lib. ii. 9)	B.C.	585	Remarkable one, central and annular in the interior of Europe. Sept. 7, 1802
One at Athens (<i>Thucydides</i> , lib. iv.)		424	Total eclipses of the sun—July 17, 1833; July 8, 1842; July 28, 1851.
Total one; three days' supplication decreed at Rome (<i>Livy</i>)		188	An annular eclipse; it was seen and photographed at Oundle; but not seen well at other places March 15, 1858
One general at the death of Jesus Christ (<i>Josephus</i>)	A.D.	33	Total eclipse of the sun; well seen by Mr. G. B. Airy, astronomer royal, and others in Spain; Mr. Warren De la Rue took photographs, July 18, 1860
One observed at Constantinople		958	[The same eclipses (about 70) recur in a period of 18 years 10½ days.]
In France, when it was dark at noon-day (<i>Du Fresnoy</i>)	June 29,	1033	
In England; a total darkness (<i>Wm. Malmsb.</i>)	March 20,	1140	
Again; the stars visible at ten in the morning (<i>Camden</i>)	June 23,	1191	
The true sun, and the appearance of another, so that astronomers alone could distinguish the difference by their glasses		—	OF THE MOON.
Again; total darkness ensued		1331	The first, observed by the Chaldeans at Babylon (<i>Ptolemy</i> iv.) B.C. 721
A total one; the darkness so great that the stars shone, and the birds went to roost at noon (<i>Oldmixon's Annals of George I.</i>)	April 22,	1715	A total one observed at Sardis (<i>Thucydides</i> vii.) 413
			Again, in Asia Minor (<i>Polybius</i>) 219
			One at Rome, predicted by Q. Sulpitius Gallus (<i>Livy</i> xlv.) 168
			One terrified the Roman troops and quelled their revolt (<i>Tacitus</i>) A.D. 14

EDDAS, two books containing the Scandinavian Mythology (or history of Odin, Thor, Frea, &c.), written about the eleventh and twelfth centuries. Translations have been made into French, English, &c. MSS. of the Eddas exist at Copenhagen and Upsal.

EDDYSTONE LIGHT-HOUSE, off the port of Plymouth, erected by the Trinity-house to enable ships to avoid the Eddystone rock. It was commenced under Mr. Winstanley, in 1696; was finished in 1699; and was destroyed in the dreadful tempest of Nov. 27, 1703, by which Mr. Winstanley and those with him perished. It was rebuilt by act of parliament, 4 Anne, 1706, and all ships were obliged to pay one penny per ton inwards and outwards towards supporting it: This light-house was burnt in 1755; and one on a better plan was erected by Mr. Smeaton, and finished Oct. 9, 1759. Of this last, the woodwork was burnt in 1770, but it was afterwards renewed with stone, and has continued uninjured since 1774.

EDGEHILL FIGHT (Oct. 23, 1642), Warwickshire, between the royalists and the parliament army, was the first engagement of importance in the civil war. Charles I. was present. Prince Rupert commanded the royalists, and the earl of Essex the parliamentarians. The earl of Lindsay, one of Charles's generals, who headed the foot forces, was mortally wounded, and taken prisoner. The king's army lost 5000 dead, with vast numbers of wounded and prisoners. Owing to the great loss on both sides the action produced no decisive consequence, though the parliament claimed the victory.

EDICTS, public ordinances and decrees, usually set forth by sovereigns; the name originated with the Romans. The PERPETUAL EDICT: Salvius Julianus, of Milan, a civilian at Rome (the author of several treatises on public right), was employed by the emperor Adrian to draw up this edict or body of laws for the Prætors, A.D. 132.

EDICT OF NANTES, by which Henry IV. of France granted toleration to his Protestant subjects, April 13, 1598, was confirmed by Louis XIII. in 1610, and by Louis XIV. in 1652. It was revoked by Louis XIV. Oct. 22, 1685. This unjust and impolitic act cost France 50,000 Protestant families, and gave to England 50,000 industrious artisans. Some thousands, who brought with them the art of manufacturing silks, settled in Spitalfields, where their descendants yet remain; others planted themselves in Soho and St. Giles's, and pursued the art of making crystal glasses and various fine works in which they excelled; among these, jewellery, then little understood in England.

EDINBURGH, the metropolis of Scotland, derives its name—in ancient records *Dun Edin*, "the hill of Edin"—from its castle, founded or rebuilt by Edwin, king of Northumbria, who having greatly extended his dominions, erected it for the protection of his newly acquired territories from the incursions of the Scots and Picts, A.D. 626. But it is said the castle was first built by Camelon, king of the Picts, 330 B.C. It makes a conspicuous appearance, standing at the west end of the town, on a rock 300 feet high, and, before the use of great guns, was a fortification of considerable strength.

* Mr. Airy thinks the date should be 610. Others, 603 B.C. It is the one recorded by Herodotus as interrupting a battle between the Medes and Lydians.

EDINBURGH, *continued.*

Christianity introduced, (reign of Donald I.) A.D.	201	South Bridge commenced	A.D. 1785
Edinburgh taken by the Anglo-Saxons	482	Royal College of Surgeons incorporated	1788
Retaken by the Picts	695	First stone of the university laid	Nov. 16, 1789
City fortified, and castle rebuilt by Malcolm Canmore	1074	Robertson, the historian, dies here	June 11, 1793
Besieged by Donald Bain	1093	Bridewell, Calton-hill, erected	1796
Holyrood abbey founded by David I.	1128	Holyrood, an asylum to Louis XVIII. and his brother, afterwards Charles X.	1795 to 1799
Edinburgh constituted a burgh	**	New bank commenced	June 3, 1801
Castle surrendered to Henry II.	1174	<i>Edinburgh Review</i> (by Francis Jeffrey, Rev. Sidney Smith, Henry Brougham, and others) published	Oct. 1, 1832
A parliament held here under Alexander II.	1215	New system of police established	1805
City taken by the English	1296	Alarming riots here	Dec. 31, 1811
Grant of the town of Leith	1329	Nelson's monument completed	1815
Surrenders to Edward III.	1356	Gas company incorporated	1818
Burnt by Richard II.	1385	Water company incorporated	1819
And by Henry IV.	1401	Professor Playfair dies	July 20, —
Made the capital city; James II. first king crowned here	1437	Society of Arts instituted	1821
Execution of the earl of Athol	1437	Union Canal completed	1822
Annual fair granted by James II.	1447	George IV.'s visit	Aug. 14-20, —
City strengthened by a wall	1450	Foundation of the great national monument of Scotland laid	—
Charter of James III.	1477	Royal Institution erected	1823
Edinburgh made the metropolis of Scotland by king James III.	1482	Destructive fires	June and Nov. 1824
Royal College of Surgeons incorporated	1505	Scottish Academy founded	1826
Charter of James IV.	1508	Lord Melville's monument erected	1828
[The Palace of Holyrood is built in the reign of James IV.]		Edinburgh and Dalkeith Railway opened	July, 1831
High school founded	1518	Statue of George IV. erected	1832
A British force, landing from a fleet of 200 ships, burns both Edinburgh and Leith, May.	1544	Death of sir Walter Scott	Sept. 21, —
Leith is again burnt, but Edinburgh is spared	1547	Chambers's Edinburgh Journal published	—
Marriage of Queen Mary and lord Darnley	1565	Association of the Fine Arts	1833
David Rizzio murdered	1566	The British Association meets here	Sept. 8, 1834
Lord Darnley blown up in a private house by gunpowder	Feb. 10, 1567	Edinburgh, Leith, and Granton Railway commenced	1836
Mary marries James, earl of Bothwell, May 15.	—	Art-union of Scotland	1837
Civil war on account of Mary's forced resignation	1570	Monument to sir Walter Scott commenced	1840
Death of John Knox	1572	Society of Arts, founded 1821; incorporated	1842
University chartered. See <i>Edinburgh University</i>	April 24, 1582	Edinburgh & Glasgow Railway opened	Feb. 27, —
Bothwell's attempt on Holyrood-house, Dec. 27.	1591	Queen Victoria visits Edinburgh, &c.	Aug. 31-Sept. 15, —
Riot in the city; the mob attacks the king	1596	New College instituted	1843
James VI. leaves Edinburgh, as king of England, April 5, 1603; he revisits it	May 16, 1617	North British Railway commenced	1844
Heriot's Hospital founded	1624	The monument to the political martyrs of 1793-4, laid by Mr. Hume	Aug. 21, —
Charles I. visits Edinburgh	1633	Walter Scott's monument completed	1845
Parliament house finished	1640	British Association meets again	July 31, 1850
Charles again visits the city	1641	The queen again visits Edinburgh (one of her many visits to Scotland), and holds her court at the ancient Holyrood-house	Aug. 30, —
The castle is surrendered to Cromwell by Dundas	1650	Prince Albert lays the foundation-stone of the Scotch national gallery	Aug. 31, —
Coffee-houses first opened	1677	Meeting for vindication of Scottish rights, &c.	Nov. 2, 1853
Merchants' Company incorporated	1681	Old buildings in Lawn-market burnt	Aug. 5, 1857
College of Physicians incorporated	—	Act passed for building new Post Office, July	1858
Earl of Argyll beheaded	June 30, 1685	National Gallery opened	March 21, 1859
African and East India Company incorporated	1695	Agitation against Ministers' Annuity tax, Sept.	—
Bank of Scotland founded	—	The tax was abolished in 1860; and other arrangements made which did not give satisfaction: riots were renewed	Nov. 1860
Union of the kingdoms	1707	Lord Brougham elected chancellor of the university, Edinburgh	Nov. 1, 1859
Royal bank founded	1727	20,000 Volunteers reviewed by the queen, in Queen's Park	Aug. 7, 1860
Board of trustees of trade and manufactures appointed	—	Edinburgh Industrial Museum act passed	Aug. 28, —
Royal Infirmary incorporated	1736	Edinburgh visited by Empress Eugenie	Nov. 20, —
Affair of Captain Porteous (see <i>Porteous</i>)	—	The Prince Consort lays the foundation of the new Post Office and the Industrial Museum,	Oct. 23, 1861
Medical Society instituted	1737	Fall of a house in High-street, 35 persons killed	Nov. 24, —
The young Pretender occupies Holyrood	1745	Accident on Edinburgh and Glasgow railway—17 killed; above 100 wounded	Oct. 13, 1862
Modern improvements commenced	1753		
Magistrates assigned gold chains	1754		
Royal Exchange completed	1761		
Foundation of the North Bridge	Oct. 21, 1763		
Theatre Royal erected	1769		
Great fire in the Lawn-market	1771		
Register-office, Princes-street, commenced	1774		
Great commotion against popery	1779		
Society of Antiquaries	1780		
Royal Society instituted	1783		

EDINBURGH, BISHOPRIC OF, was created by Charles I. when that monarch was in Scotland in 1633; and William Forbes, one of the ministers of Edinburgh, was made first bishop. The king allotted the parishes of the shires of Edinburgh, Linlithgow, Haddington, and a part of Berwick and of Stirlingshire, to compose the see. The sixth and last prelate

was Alexander Ross, who was ejected on the abolition of episcopacy, at the period of the revolution, in 1689. Edinburgh became a post-revolution bishopric in 1720. See *Bishops*.

EDINBURGH UNIVERSITY. A college was commenced by the town council of Edinburgh, in 1581, for which queen Mary had given the site of ancient religious houses, and Robert Reid, bishop of Orkney, the funds in 1558. In 1582 the university was chartered by James VI. afterwards James I. of England. The first principal was appointed in 1585. The foundation stone of the new buildings was laid by Francis, lord Napier, grand-master of the masons of Scotland, Nov. 16, 1789. In 1845, the library contained upwards of 80,000 volumes, besides numerous curious and rare MSS. and documents.

EDOM. See *Idumæa*.

EDUCATION. The art of developing the physical, intellectual, and moral faculties of man, has occupied the greatest minds in all ages, such as Plato, Aristotle, Cicero, Quintilian, Bacon, Milton, Locke, Rousseau, &c. In England the earliest schools for the lower classes were those attached to the monasteries; for the higher classes halls and colleges were gradually founded (see *Oxford* and *Cambridge*).

William of Wykeham planted the school at Winchester, whence arose his colleges at that place and Oxford. A.D. 1373
 Eton College was founded by Henry VI. . . . 1440
 In the thirty years following the reformation education was greatly promoted, and many grammar schools were erected and endowed by Edward VI. and Elizabeth. . . . 1560
 Westminster school founded by Elizabeth Queen Anne was the zealous friend of education. While princess she founded the Grey-coat school, Westminster, in 1698, and cordially supported the setting up parochial charity schools (one of which had been established in 1688 at St. Margaret's, Westminster). Nearly 2000 of these schools were established in Great Britain and Ireland, principally by the instrumentality of the Society for the Promotion of Christian Knowledge. . . . 1741
 Mr. Robert Raikes originated *Sunday Schools* about 1781
 In 1833 there were 16,828 of these schools, with 1,548,800 scholars
 Sunday School Union was formed in . . . 1802
 Joseph Lancaster, a young Quaker, began to instruct the children of the poor 1796
 He had 90 pupils before he was 18 years old, and 1000 pupils in . . . 1798
 To provide teachers he invented the monitorial system. In consequence of his exertions the present British and Foreign School Society was founded with the name of the "Royal Lancasterian Institution," &c. . . . 1805
 This being unexclusive was followed by the institution of the Church of England "National Society for educating the Poor" on Dr. Bell's system . . . 1811
 Infant Schools began . . . about 1815
 The Charity Commission, appointed at the instance of Mr. (now lord) Brougham, published their reports on Education in 37 volumes folio . . . 1819-40
 In 1834 the government began annual grants

(the first 20,000*l.*), which continued till 1839, when the committee of the Privy Council on Education was constituted for the distribution of the money. The grant for Great Britain in 1852 was 150,000*l.*; 1856-7, 451,213*l.*; 1860, 798,951*l.*; 1861, 803,794*l.* For Ireland, 1860, 270,721*l.*; 1861, 285,377*l.* From 1839 to 1860 3,655,067*l.* were granted for education. The grant for education, science, and art, in 1861, was 1,358,996*l.*

In 1836, the Home and Colonial School Society was instituted, and about 1843 were formed the Voluntary School Society and the Congregational Board of Education. In 1851 out of a population of 17,927,609 there were 2,466,481 day scholars.

Ragged School Union established . . . 1844
 A great Educational conference took place at Willis's Rooms, the Prince Consort in the chair . . . June 22-24, 1857

The Industrial Schools act passed in Middle Class Examinations from the University of Oxford began in the summer of . . . 1858

The examiners granted the degree of A.A. to many persons at Liverpool, Leeds, &c.; similar examinations from Cambridge took place in the autumn, and are to be continued.
 Report of commissioners on popular education (appointed 1858), published March 18, 1861, led to the Minute of the Committee of the Privy Council on Education, establishing a Revised Code of Regulations, adopted July 21, 1861, to come into operation, after March 31, 1862. It decreed regular examinations of the pupils, payment by results, evening schools for adults, and other changes, which raised a storm of opposition from the clergy and schoolmasters. The subject was much agitated in parliament (March 25, 28, 1862); but eventually a compromise was effected May 5, 1862. Official instructions for the administration of the Revised Code issued . . . Sept. 1862

EGALITÉ (*Equality*). See *Orleans*.

EGGS. The duty on imported eggs was repealed in 1860, whereby the revenue lost about 20,000*l.* a year.

EGYPT.* The early seat of political civilisation. First Epoch; the dynasty of its Pharaohs, or "great kings," commenced with Mizraim, the son of Ham, second son of Noah, 2188 B.C. to the conquest by Cambyzes, 525 B.C. 2nd Epoch, to the death of Alexander the Great, and establishment of the Ptolemies, 323 B.C. 3rd Epoch, to the death of Cleopatra and the subjugation by the Romans, 30 B.C.

* Three most magnificent works on Egypt have been published: in France (commenced by Napoleon, and the savans who accompanied him to Egypt), *Description de l'Égypte*, 1809-22; in Italy, Rosellini's *Monumenta dell' Egitto*, 1832-44; and in Prussia, Lepsius' *Denkmäler aus Ägypten*, 1848-56. All these are in the Library of the Royal Institution of Great Britain, London.

EGYPT, *continued*.

Menes	B.C. 3893 or	3643	He sends an army of 50,000 men across the desert to destroy the temple of Jupiter Ammon, but they all perished in the burning sands (<i>Justin</i>)	524
Mizraim builds Memphis (<i>Blair</i>)		2188	Egypt revolts from the Persians; again subdued by Xerxes (<i>Blair</i>)	487
Egypt made four kingdoms, viz.: Upper Egypt, Lower Egypt, This, and Memphis (<i>Abbe Lenglet, Blair</i>)		2126	A revolt under Inarus (<i>Blair</i>)	493
Athotes invents hieroglyphics		2112	Successful revolt under Amyrteus, who is proclaimed king (<i>Lenglet</i>)	414
Busairis builds Thebes (<i>Usher</i>)		2111	Egypt again reduced by Ochus, king of Persia, and its temples pillaged (<i>Usher</i>)	350
Osymandyas, the first warlike king, passes into Asia, conquers Bactria, and causes his exploits to be represented in sculpture and painting (<i>Usher, Lenglet</i>)		2100	Alexander the Great enters Egypt, wrests it from the Persians, and builds Alexandria (<i>Blair</i>)	332
The Phœnicians invade Lower Egypt, and hold it 260 years (<i>Usher</i>); the dynasty of Shepherd kings begins		2080	Ptolemy I. Lagus, or Soter	323
The Lake of Moeris constructed		1938	Philadelphus, Ptolemy II. reigns (under whom Egypt flourishes): he completes the Pharos of Alexandria (<i>Blair</i>)	—
The patriarch Abraham visits Egypt		1920	The Septuagint version of the Old Testament made about this time	—
Syphons introduce the use of the common letters (<i>Usher</i>)		1891	The famous library of Alexandria also dates about this period (<i>Blair</i>)	283
Mennon invents the Egyptian letters (<i>Blair, Lenglet</i>)		1822	Ambassadors first sent to Rome	269
Amonophis I. is acknowledged the king of all Egypt (<i>Lenglet</i>)		1821	Ptolemy III. Euergetes reigns, 247; overruns Syria, and returns laden with rich spoils and 2500 statues and vessels of gold and silver, which Cambyases had taken from the Egyptian temples (<i>Blair</i>)	246
Joseph is sold into Egypt as a slave		1728	Ptolemy IV. Philopator	222
He interprets the king's dreams		1715	Ptolemy V. Epiphanes	205
His father and brethren settle here		1706	Ptolemy VI. Philometor	181
Rameses II., or Sesostris, reigns: he extends his dominion by conquest over Arabia, Persia, India, and Asia Minor (<i>Lenglet</i>)		1618	At the death of Philometor, his brother Physcon (Ptolemy VII.) marries his queen, and on the day of his nuptials murders the infant son of Philometor in his mother's arms	146
Settlement of the Ethiopians (<i>Blair</i>)		1615	Here repudiates his wife, and marries her daughter by his brother (<i>Blair</i>)	130
Rameses, who imposed on his subjects the building of walls and pyramids, and other labours, dies (<i>Lenglet</i>)		1492	His subjects, wearied by his cruelties and crimes, demolish his statues, set fire to his palace, and he flies from their fury (<i>Blair</i>)	129
Amonophis II. is overwhelmed in the Red Sea, with all his army (<i>Lenglet, Blair</i>)		—	He murders his son by his new queen; also his son by her mother, sending the head and limbs of the latter as a present to the parents on a feast-day	—
Reign of Egyptus, from whom the country, hitherto-called Mizraim, is now called Egypt (<i>Blair</i>)		1485	Yot, defeating the Egyptian army, he recovers his throne; and dies	128
Reign of Thucoris (the Proteus of the Greeks), who had the faculty of assuming whatever form he pleased, as of a lion, a dragon, a tree, water, fire		1189	Pestilence from the putrefaction of vast swarms of locusts; 800,000 persons perish in Egypt	—
[These fictions were probably intended to mark the profound policy of this king, who was eminent for his wisdom, by which his dominions flourished. <i>Blair</i> .]			Ptolemy VIII. Soter II.	117
Pseusennes (Shishak) enters Palestine, ravages Judea, and carries off the sacred vessels of the temple		971	Alexander I.	107
The dynasty of kings called <i>Tanites</i> begins with Potubastes (<i>Blair</i>)		825	Ptolemy VIII. restored	89
The dynasty of <i>Saites</i> (<i>Blair</i>)		781	Revolt in Upper Egypt; Thebes destroyed after a siege of three years (<i>Diod. Siculus</i>)	82
Sebacon (the Ethiopian) invades Egypt, subdues the king, Bocchoris, whom he orders to be roasted alive (<i>Usher</i>)		737	Alexander II. and Cleopatra I.	81
The Dodekarchy (12 rulers) expelled by Psammetichus the Powerful		650	Ptolemy IX. Auletes	80
He invests Azoth, which holds out for 19 years, the longest siege in the annals of antiquity (<i>Usher</i>)		647	Berenice and Tryphæna	58
Necho begins the famous canal between the Arabic gulf and the Mediterranean sea (<i>Blair</i>); this canal abandoned after costing the lives of 120,000 men (<i>Herodotus</i>)		610	Auletes restored, 55: leaves his kingdom to Ptolemy, and Cleopatra (<i>Blair</i>)	51
Nebuchadnezzar of Babylon deposes Apries		600	During a civil war between Ptolemy and Cleopatra II., Alexandria is besieged by Cæsar, and the library nearly destroyed by fire (<i>Blair</i>)	47
Apries taken prisoner and strangled in his palace (<i>Diod. Siculus</i>)		581	Cæsar defeats the king, who, in crossing the Nile, is drowned; and the younger Ptolemy and Cleopatra reign	46
The philosopher Pythagoras comes from Samos into Egypt, and is instructed in the mysteries of Egyptian theology (<i>Usher</i>)		571	Cleopatra poisons her brother, and reigns alone	43
The line of the Pharaohs ends in the murder of Psammetichus by Cambyases (<i>Blair</i>)		535	She appears before Marc Antony, to answer for this crime. Fascinated by her beauty, he follows her into Egypt	40
Dreadful excesses of Cambyases; he puts the children of the grandes, male and female, to death, and makes the country a waste (<i>Herodotus</i>)		526	Antony defeated by Octavius Cæsar at the battle of Actium (<i>Blair</i>)	31
		524	Octavius enters Egypt; Antony and Cleopatra kill themselves; and the kingdom becomes a Roman province	30
			Egypt wrested from the eastern emperor Heraclius, by Omar, caliph of the Saracens	639

* The epoch of the reign of Sesostris is very uncertain: Blair makes it fall 133 years later. As to the achievements of this monarch they are supposed to have been the labours of several kings attributed by the Egyptian priests to Sesostris alone, whose very existence, indeed, is doubted.

EGYPT, *continued.*

Saladin establishes the dominion of the Mamelukes A.D. 1171
 Selim I. emperor of the Turks, takes Egypt 1517
 It is governed by beys till a great part of the country is conquered by the French, under Bonaparte 1799
 The invaders dispossessed by the British, and the Turkish government restored 1801
 Mehmet Ali massacres the Mamelukes and obtains the supreme power 1811
See Syria and Turkey.

The viceroy visits Italy, France, and England May—Sept., returns to Alexandria Oct. 1, 1862

HEREDITARY VICEROYS (nearly independent).

1811. Mehmet Ali, abdicated,
 1848. Ibrahim Pacha (his son), Sept. 1.
 — Abbas (his son), Nov. 10.
 1854. Said (his uncle), July 13. (THE PRESENT viceroy 1862.)
 [I-Hami, son of Abbas, died Sept. 1860.
 Toussoun, son of Said, is about 8 years old, 1862.]

EGYPTIAN ERA. The old Egyptian year was identical with the era of Nabonassar, beginning Feb. 26, 747 B.C. and consisted of 365 days only. It was reformed 30 B.C., at which period the commencement of the year had arrived, by continually receding, to the 29th of August, which was determined to be in future the first day of the year. To reduce to the Christian era, subtract 746 years 125 days.

EIKÖN BASILIKĒ ("the Portraiture of His Sacred Majesty in his Solitudes and Sufferings"), a book of devotion formerly attributed to king Charles I., but now generally believed to have been written partially, if not wholly, by bishop Gauden, and possibly approved by the king: it was published in 1648, and sold with great rapidity.

EISENACH DECLARATION. *See Germany, 1859.*

EISTEDDFODD. *See Bards.*

ELBA, ISLE OF (on the coast of Tuscany), taken by Lord Nelson in 1796; but abandoned 1797. Elba was conferred upon Napoleon (with the title of emperor) on his relinquishing the throne of France, April 5, 1814. He secretly embarked hence with about 1200 men in hired feluccas, on the night of Feb. 25, 1815, and landed in Provence, March 1, to recover the Imperial crown. *See France, 1815.* Elba was resumed by the grand duke of Tuscany, July, 1815.

ELDERS (in Greek, *presbuteroi*), in the early church equivalent with *episcopoi*, or bishops. (*See 1 Tim. iii. and Titus i.*) The Elders in the Presbyterian churches are laymen.

EL DORADO (the "Gilded Man"). When the Spaniards had conquered Mexico and Peru, they began to look for new sources of wealth, and having heard of a golden city ruled by a king or priest, smeared in oil and rolled in gold dust (which report was founded on a merely annual custom of the Indians), they organised various expeditions into the interior of South America, which were accompanied with disasters and crimes, about 1560. Raleigh's expeditions in search of gold in 1596 and 1617 led to his fall.

ELEATIC SECT, founded by Xenophanes, of Colophon, about 535 B.C. He had been banished to Sicily on account of his wild theory of God and Nature. He supposed that the stars were extinguished every morning and rekindled at night; that eclipses were occasioned by a partial extinction of the sun; that there were several suns and moons for the convenience of the different climates of the earth, &c. *Strabo.*

ELECTOR PALATINE. *See Palatinate.*

ELECTORS for members of parliament for counties were obliged to have forty shillings a-year in land, 8 Hen. VI. 1429. Among the acts relating to electors are the following: Act depriving excise and custom-house officers and contractors with government of their votes, 1782. Act to regulate polling, 1828. Reform in parliament act (*see Reform Bill*), 1832. County elections' act, 1836. *See Bribery.* The forty shilling freeholders in Ireland lost their privilege in 1829. By an act passed in 1861, university electors are permitted to vote by sending balloting papers.

ELECTORS OF GERMANY. Originally, all the members of the Germanic body made choice of their head; but amidst the violence and anarchy which prevailed for several centuries in the empire, seven princes (the archbishops of Mentz, Treves, and Cologne, the king of Bohemia, the electors of Brandenburg and Saxony, and the elector Palatine), who possessed the greatest power, assumed the exclusive privilege of nominating the emperor. *Dr. Robertson.* An eighth elector (Bavaria), was made in 1648; and a ninth, Hanover, in 1692. The number was reduced to eight in 1777; and was increased to ten at the peace of Luneville, in 1801. The electorship ceased on the dissolution of the German empire, when the crown of Austria was made hereditary, 1804-1806. *See Germany.*

ELECTRICITY,—from the Greek *Elektron*, electrum, amber. The electrical properties of rubbed amber are said to have been known to Thales, 600 B.C. See *Magnetism*.

- FRICTIONAL OR STATIC ELECTRICITY.** •
- Gilbert records that other bodies besides amber generate electricity when rubbed, and that all substances may be attracted. . . . A.D. 1600
- Otto von Guericke constructs the first electric machine (a globe of sulphur) about . . . 1647
- Boyle publishes his electrical experiments . . . 1676
- Stephen Grey, aided by Wheeler, discovered that the human body conducts electricity, that electricity acts at a distance (motion in light bodies being produced by frictional electricity at a distance of 666 feet); the fact of electric induction, and other remarkable phenomena . . . 1720-36
- Dufay originates his dual theory of two electric fluids: one *vitreous*, from rubbed glass, &c., the other *resinous*, from rubbed amber, resin, &c.; and showed that two bodies similarly electrified repel each other, and attract bodies oppositely electrified . . . about 1733
- The Leyden jar (vial or bottle), discovered by Kleist, 1745, and by Cunnous and Muschenbroek, of Leyden; Winckler constructed the Leyden battery . . . 1746
- Desaguliers classifies bodies as electrics and non-electrics . . . 1742
- Important researches of Watson, Canton, Becquerel, and Nollet . . . 1740-7
- Franklin announces his theory of a single fluid forming the vitreous electricity positive, and the resinous negative, 1747; and demonstrates the identity of the electric spark and lightning, drawing down electricity from a cloud by means of a kite* . . . June 1752
- Professor Richmann killed at St. Petersburg while repeating Franklin's experiments, Aug. 1753
- Beccaria publishes his researches on atmospheric electricity, 1758; and Æpinus his mathematical theory . . . 1759
- Electricity developed by fishes investigated by Ingenhousz, Cavendish, and others, about 1773
- Eichenberg produces his electrical figures . . . 1777
- Electro-statics*: Coulomb applies the torsion balance to the measurement of electric force
- Electro-chemistry*—water decomposed by Cavendish, Fourcroy, and others . . . 1787-90
- Discoveries of Galvani and Volta (see *Voltaic Electricity*, below) . . . 1791-3
- (Ersted, of Copenhagen, discovers electro-magnetic action (see *Electro-Magnetism*, below) . . . 1819
- Thermo-Electricity* discovered by Seebeck: it was produced by heating pieces of copper and bismuth soldered together, 1821; the thermo-electrometer invented by Snow Harris, 1827; the thermo-multiplier constructed by Melloni and Nobili . . . 1831
- Faraday produces a spark by the sudden separation of a coiled keeper from a permanent magnet (see *Magneto-Electricity*, below) . . . —
- Wheatstone calculates the velocity of electricity, on the double fluid theory, to be 288,000 miles a second; on the single fluid theory, 576,000 miles a second . . . 1834
- Armstrong discovers, and Faraday explains the electricity of high pressure steam—which produces the hydro-electric machine . . . 1840
- ELECTRIC MACHINES.** Otto von Guericke obtained sparks by rubbing a globe of sulphur, about 1647; Newton, Boyle, and others used glass about 1675; Hawksbee improved the machine, about 1709; Bose introduced a metallic conductor, 1733; Winckler contrived the cushion for the rubber, 1741; Gordon employed a glass cylinder, 1742; for which a plate was substituted about 1770; Canton introduced amalgam for the rubber, 1751;
- Van Marum constructed an electric machine at Haarlem, said to have been the most powerful ever made, 1785; Dr. H. M. Nood set up at the Panopticon, Leicester-square, London, a very powerful electric machine and Leyden battery (in possession of Mr. Edwin Clark, 1862) . . . A.D. 1855
- The *Hydro-electric* machine, by Armstrong, was constructed . . . 1840
- The **ELECTROPHORUS**, a useful apparatus for obtaining frictional electricity, was invented by Volta in 1775, and improved by him in 1782
- ELECTROMETER** and **ELECTROSCOPE**, as the terms signify, are apparatus for ascertaining the presence and quantity of electrical excitation. Pith-balls were employed in various ways as electroscopes by Gilbert, Canton, and others. Dr. Milner invented an electrometer similar to Peltier's, 1782. The gold leaf electrometer was invented by Rev. A. Bennet, 1789, and improved by Singer, about 1810; Leno's discharging electrometer is dated 1767; Henley's 1772; Bohnenberger's electroscope, 1820; Peltier's induction electrometer, about 1848
- GALVANISM OR VOLTAIC ELECTRICITY, AND ELECTRO-MAGNETISM.**
- Sulzer noticed a peculiar sensation in the tongue when silver and lead were brought into contact with it and each other . . . 1762
- Madame Galvani observed the convulsion in the muscles of frogs when brought into contact with two metals, in 1789; about 1810; Galvani, after studying the phenomena, laid the foundation of the galvanic battery . . . 1791
- Volta announced his discovery of the "Voltaic pile," composed of discs of zinc and silver, and moistened card . . . 1800
- By the Voltaic pile, Nicholson and Carlisle decompose water, and Dr. Henry decomposes nitric acid, ammonia, &c. . . . —
- Behrens forms a dry pile of 80 pairs of zinc, copper, and gilt paper . . . 1805
- By means of the large Voltaic battery of the Royal Institution, London, Davy decomposes the alkali potash, and evolves the metal potassium . . . 1807
- Zamboni constructs a dry pile of paper discs coated with tin on one side and peroxide of manganese on the other . . . 1809
- Children's battery fuses platinum, &c. . . . —
- Davy exhibits the Voltaic arc . . . 1813
- Wollaston's thimble battery ignites platinum wire . . . 1815
- Galvanometers invented by Ampère and by Schweigger, 1820; by Cumming, 1821; De la Rive, 1824; Ritchie (torsion), 1830; Joule (magnetic), 1843.
- Ohm enunciates his formulæ relating to the galvanic current . . . 1827
- Improvement in constructing the Voltaic battery made by Wollaston, 1815; Becquerel, 1820; Sturgeon, 1830; J. F. Daniell, 1836; Grove (nitric acid, &c.), 1839; Jacob, 1840; Smee, 1840; Bunsen (carbon, &c.), 1842; Grove (gas battery), 1842.
- Faraday demonstrates the nature of electro-chemical decomposition, and the principle that the quantity and intensity of electric action of a galvanic battery depends on the size and number of plates employed . . . 1834
- Wheatstone invents his Electro-magnetic Chronoscope . . . 1840
- ELECTRO-MAGNETISM** begins with Ersted's discovery of the action of the electric current on the magnetic needle, 1819; proved by

* In 1748, at a pic-nic, he "killed a turkey by the electric spark, and roasted it by an electric jack before a fire kindled by the electric bottle."—*Penny Cyclopædia*.

ELECTRICITY, *continued.*

Ampère, who exhibits the action of the Voltaic pile upon the magnetic needle, and of terrestrial magnetism upon the Voltaic current; he also arranges the conducting wire in the form of a helix or spiral, invents a galvanometer, and imitates the magnet by a spiral galvanic wire . . . A.D. 1820
 Arago magnetised a needle by the electric current, and attracted iron filings by the connecting wire of a galvanic battery . . . —
 Faraday discovers the electro-magnetic rotative force developed in a magnet by Voltaic electricity, 1821; experiments on the induction of a Voltaic current . . . 1834
 Sturgeon makes a bar of soft iron magnetic by surrounding it with coils of wire, and sending an electric current through the wire . . . 1837
 Becquerel invents an electro-magnetic balance . . . —
 Breguet uses electro-magnetic force to manufacture mathematical instruments . . . about 1854
MAGNETO-ELECTRICITY (the converse of Ørsted's discovery of Electro-magnetism), discovered by Faraday, who produced an electric spark by suddenly separating a coiled keeper from a permanent magnet; and found that an electric current existed in a copper disc rotated between the poles of a magnet . . . 1831
 The *Magneto-electric* machine arose out of Faraday's discovery, and was first made at Paris by Pixii, 1832; and in London by Saxton . . . 1833

ELECTRIC TELEGRAPH.*
 The transmission of electricity by an insulated wire was shown in the middle of the last century, by Watson and others.
 Telegraphic arrangements were devised by Lesargue, 1744; Betancourt, 1787; Cavallo, 1795; Salva, 1796; Schœnnering, exhibited, Aug. 29, 1809; Ronalds . . . 1816
 Ampère invents his telegraphic arrangement, employing the magnetic needle and coil, and the galvanic battery . . . 1820
 F. Ronalds publishes an account of his electric telegraph . . . 1823
 Professor Wheatstone constructs an electro-magnetic apparatus, by which 30 signals are conveyed through nearly 4 miles of wire, June, 1836
 Telegraphs invented by Schilling, Gauss, and Weber (magneto-electric) 1833; by Steinheil and by Masson, 1837; by Morse . . . 1837
 The magnetic needle telegraph patented by W. F. Cooke and C. Wheatstone . . . June 12, 1838
 Mr. Cooke set up the telegraph line on the Great Western Railway from Paddington to West Drayton, 1838-9; on the Blackwall line, 1840; and in Glasgow . . . 1841
 Professor Wheatstone's alphabetical printing telegraph patented . . . —
 The first telegraph line in America set up from Washington to Baltimore . . . 1844
 The murderer Tawell apprehended by means of the telegraph . . . 1845
 The Electric Telegraph company established (having purchased Cooke and Wheatstone's telegraphic inventions) . . . 1846
 Gutta-percha suggested as an insulator by Faraday . . . 1847
 Over-house electric telegraphs (first erected at Paris) set up between their premises in the City and West End by Messrs. Waterlow in 1857; extended throughout London . . . 1859-62
 House's printing telegraph, 1846; Bain's electro-

chemical telegraph, 1846; Hughes's system, 1855; the American combination system (of the preceding) which can convey 2000 words an hour, adopted by the American Telegraph company . . . Jan. 1859
 Wheatstone's automatic printing telegraph patented . . . 1860
 Professor Charles Wheatstone, in 1840, drew plans of a projected *submarine telegraph* between Dover and Calais. In 1847 Mr. John Watkins Brett submitted a similar plan to Louis Philippe without success; but in 1850 he obtained permission from Louis Napoleon to make a trial. This took place on Aug. 28, 1850. The connecting wires were placed on the government pier in Dover harbour, and in the *Goliath* steamer were coiled about 30 miles in length of telegraphic wire, enclosed in a covering of gutta-percha, half an inch in diameter. The *Goliath* started from Dover, unrolling the telegraphic wire as it proceeded, and allowing it to drop to the bed of the sea. In the evening the steamer arrived on the French coast, and the wire was run up the cliff at cape Griznez to its terminal station, and messages were sent to and fro between England and the French coast. But the wire in settling into its place in the sea-bottom, crossed a rocky ridge, and snapped in two, and thus the enterprise for that time failed. New arrangements were soon made, and on a scale of greater magnitude; and the telegraph was opened, Nov. 13, 1851. On that day the opening and closing prices of the funds in Paris were known on the London Stock Exchange within business hours, and guns were fired at Dover by communication from Calais.
 The Dover and Ostend line laid down . . . May, 1853
 Communications were complete between Dover and Ostend in May, 1853; Holyhead and Howth, June, 1852; Paris to Bastia, Nov. 1854; London to Constantinople, May, 1858; Aden and Suez, May, 1859; Malta to Alexandria . . . Sept. 28, 1861

ATLANTIC TELEGRAPH. A plan to unite Europe and America by telegraph was entered at the government registration office in June 1845, by Mr. J. Watkins Brett, who made proposals to the government, which were not accepted. This plan was attempted to be carried out by a company in 1857 and 1858, with the concurrence of the British and American governments. 2500 miles of wire were manufactured and tested in March, 1857. The laying it down commenced at Valentia, in Ireland on August 5. The vessels employed were the *Niagara* and *Susquehanna* (American vessels), and the *Leopard* and *Agamemnon* (British vessels). After sailing a few miles the cable snapped. This was soon repaired; but on Aug. 11, after 300 miles of wire had been paid out, it snapped again, and the vessels returned to Plymouth. In 1858 a second attempt to lay the cable failed through a violent storm on June 20-21; but the third voyage was successful. On Aug. 5 the junction between the two continents was completed by the laying down of 2050 miles of wire from Valentia in Ireland to Newfoundland. The first two messages, on Aug. 5, were from the queen of England to the president of the United States, and his reply.

* The Electric Telegraph may be said to have run a race with Time, and beaten him. New Orleans is westward of New York, and the clocks are thus later in the former city than in the latter, in proportion to the difference of longitude. When the *Atlantic* made her first return voyage from Liverpool, a brief abstract of her news was telegraphed to New Orleans at a few minutes *after* noon (New York time): it reached its destination at a few minutes *before* noon (New Orleans time), and was published in the New Orleans papers on the evening of the very day when the ship arrived at New York: the evening papers of New York and New Orleans gave the same news at the same hour (April, 1850).

ELECTRICITY, *continued.*

This event caused great rejoicing in both countries; but unfortunately the insulation of the wire gradually became more faulty, and on Sept. 4 the power of transmitting intelligence utterly ceased. A new company was formed, 1865; the subject still agitated, 1862

It is stated that there are now in work 15,000 miles of Electric Telegraph wire in Great Britain; 80,000 on the continent of Europe; and 48,000 in America; and altogether about 150,000 miles laid down in the world, July; —

ELECTRIC CLOCK, &c. Professor Wheatstone invented an electro-magnetic telegraph clock in 1840. Clocks worked by electricity, invented by Mr. Alexander Bain, Mr. Shepherd, and others, appeared in the Exhibition of 1851. An Electric clock, with four dials, illuminated at night, was set up in front of the office of the Electric Telegraph company, in the Strand, London, July 1852. A Time ball was set up by Mr. French in Cornhill in 1856. In 1860, Mr. C. V. Walker so connected the clock of the Greenwich Observatory with that of the South-eastern station, London, that they could be controlled by electricity.

ELECTRIC LIGHT. Apparatus for regulating the electric light were first devised and shown by Staitte and Petrie in 1848; by Foucault soon after. Jules Duboseq's *Electric Lamp* (the most perfect of the kind) appeared at the Paris Exhibition in 1855; and was first employed by professor Tyndall, at the Royal Institution, London, for illustrating lectures on light and colours, in 1856. M. Serrin, of Paris, exhibited his improved Electric Lamp, in 1862. The *Magneto-electric* light (the most brilliant artificial light yet produced), by means of apparatus devised by professor Holmes, was successfully tried in 1858 and 1859, at the South Foreland Lighthouse, Dover. In April, 1861, the French government ordered eight lighthouses on their coast to be illuminated by electric light. M.M. Dumas and Benoit constructed an electric light safety lamp in . . . 1862

ELECTRIC LOOM. M. Bonelli, of Turin, in 1854, devised a plan of employing magnets and

electro-magnets in weaving, thereby superseding the tedious and costly Jacquard system of cards. His loom was set up in London in 1859, and lectured upon at the Royal Institution by professor Faraday, on . . . June 8, 1860

ELECTRO-PHYSIOLOGY was not much cultivated after the discoveries of Galvani in 1790, till about 1830, when the researches of Matteucci commenced; all the phenomena of Electro-physiology or animal electricity being considered by Volta as due to an ordinary electric current. Fowler experimented on animals with galvanism, 1793, and Aldini, 1796: who produced muscular contractions in a criminal recently executed, 1803; Cre did the same, 1818. Du Bois Reymond lectured on animal electricity at the Royal Institution, and showed the existence of an electric current developed by action of the human muscles, in 1855

ELECTRO-TYPE. Mr. Palmer, of Newgate-street, London, patented inventions by which engravings may not only be copied from other engraved plates, but the engraving itself actually produced, by electrical agency, and one process he termed *glyphography*, 1841-2

ELECTRO-TYPE OR DEPOSIT. Mr. Spencer in England and Professor Jacobi in Russia, made the first successful experiments in this art in 1837 and 1838. Since then, Mr. A. Smee and others have perfected the processes. In 1840 Mr. Ruolz and Mr. Elkington applied it to gilding and silver plating. Since 1850, printing-types and woodcuts, and casts from them, have been electrotyped with copper, and the process is now largely adopted in the arts.

Messrs. C. Wheatstone and F. A. Abel experiment on the application of electricity to military purposes in . . . 1861

The **Electro-Block Company** established, 1860; by their processes the enlargement and reduction of engravings, obtained by india-rubber, can be immediately transferred to a lithographic stone, and multiplied at pleasure. Leech's engravings, so enlarged, were coloured by himself and exhibited in . . . 1862

ELEPHANT, in the earliest times trained to war. The history of the Maccabees informs us, that "to every elephant they appointed 1000 men armed with coats of mail, and 500 horse: and upon the elephants were strong towers of wood," &c. The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size, presented by the king of France to our Hen. III., in 1238. *Baker's Chron.* But Polyænus states that Cæsar brought one to Britain 54 B.C., which terrified the inhabitants greatly.

ELEUSINIAN MYSTERIES, the most celebrated of the religious ceremonies of Greece, were instituted at Athens by Eumolpus, 1356 B.C. If any one revealed them, it was supposed that he had called divine vengeance upon him, and he was put to death. They were introduced from Eleusis into Rome, and lasted about 1800 years, and were at last abolished by Theodosius the Great, A.D. 389. The laws were—1. To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilisation of mankind one of the beneficial effects of the Eleusinian mysteries.

ELGIN MARBLES were derived chiefly from the Parthenon, a temple of Minerva on the Acropolis at Athens, of which they formed part of the frieze and pediment, built by Phidias about 500 B.C. Thomas lord Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; they were purchased of him by the British government for 35,000*l.* and placed in the British Museum, in 1816.*

ELIS, a Greek state in the Peloponnesus, founded by the Heraclidæ, 1103 B.C. Here Iphitus revived the Olympic games, 884. The city of Elis was built, 471; and surrendered

* The ship conveying them was wrecked near Cerigo. Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and succeeded in recovering them from the sea.

to the Spartans in a war, 399. Elis joined the Achaean league, 274; and with the rest of Greece was subjugated by the Romans in 146 B.C.

ELL, a Flemish and German measure. The English ell contained 45 inches; the Flemish from 27 to 30 inches. It was so named from *ulna*, the arm, and was fixed to this precise length by king Henry I. in 1101. The old French ell, or *aune*, was 46·790 inches.

ELLISON GALLERY. In 1860 Mrs. Elizabeth Ellison presented to the South Kensington Museum a series of 50 original water-colour drawings, by the first masters.

ELOPEMENT. A wife who departs from her husband, loses her dower by the statute of Westm.—except her husband, without coercion of the church, be reconciled to her, 1285. Earlier laws punished elopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, “by a river issuing from two fountains,” in the fifth century, and placed over it St. Asicus, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardern, Drumclive, and others of less note, were also annexed to Elphin, which became one of the richest sees in Ireland. It is valued in the king’s books, by an extent returned 28 Eliz., at 103*l.* 18*s.* sterling. The see is now united to Kilmore, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELY, an island in Cambridgeshire, on which a church was built about A.D. 673, by Etheldreda, queen of Egrid, king of Northumberland; she also founded a religious house, filled it with virgins, and became herself first abbess. The Danes ruined the convent about 870; but a monastery was built in 879, and filled with monks, on whom king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby the abbey of Ely became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108. His successor was the first prelate, A.D. 1109. It is valued in the king’s books at 2134*l.* 18*s.* 5*d.*, present stated income, 5500*l.*

RECENT BISHOPS OF ELY.

1781. James York, died Aug. 26, 1808.

1808. Thomas Dampier, died May 13, 1812.

1812. Bowyer Edw. Sparke, died April 4, 1836.

1836. Joseph Allen, died March 20, 1845.

1845. Thomas Turton (PRESENT bishop).

ELZEVIRS, a celebrated family of printers, in Holland, whose reputation is based on pocket editions of the classics, beautifully and correctly printed, in the 16th and 17th centuries. Their first book is dated 1683.

EMANCIPATION. See *Roman Catholics* and *Slavery*.

EMBALMING. The ancient Egyptians believed that their souls, after many thousand years, would inhabit their bodies, if these were preserved entire. Hence arose their practice of embalming the dead. The embalmed bodies are called *mummies*, some of which, buried 3000 years ago, are perfect to this day. “The physicians embalmed Israel,” B.C. 1689. Gen. i. 2. See *Mummies*.*

EMBANKMENTS of earth were erected by the ancients, for preservation from their enemies and the inundations of the tide. Those of the Egyptians are described by Herodotus and Strabo. To the Romans are attributed not only the first dykes of Holland, made in the first century A.D., but also the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these valuable works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale’s “History of Embanking” first appeared in 1662. See *Drainage and Levels*. Since 1830, many millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish *embargar*, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, Jan. 14, 1801. See *Armed Neutrality*.

* The most perfect specimens of modern embalming are preserved in the museum of the Royal College of Surgeons, one being the body of the wife of Van Butchell, preserved by John Hunter by injecting camphorated spirits of wine, &c., into the arteries and veins; and the other, the body of a young woman, who died about 1780 of consumption, in the Lock Hospital. The method of embalming royal personages in modern times is fully described in “Hunter’s Posthumous Works.” He died in 1793.

EMBER WEEKS, observed in the Christian church in the third century, to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. In the English church the *Ember days* are the Wednesday, Friday, and Saturday, after,—the first Sunday in Lent, Whit-sunday, Sept. 14 (Holy Cross), and Dec. 13.

EMBROIDERY. Its invention is usually ascribed to the Phrygians; but we learn from Homer, and other ancient authors, that the Sidonians particularly excelled in this decorative species of needlework. Of this art very early mention is made in the Scriptures, 1491 B.C. *Exodus* xxxv. 35, and xxxviii. 23. See *Bayeux Tapestry*. Embroidery is now done by machinery.

EMERALD, a precious stone, of a green colour, is found in the East and in Peru; inferior ones in other places. It has been alleged that there were no true emeralds in Europe before the conquest of Peru; but there is a genuine emerald in the Paris Museum, taken from the mitre of Pope Julius II. who died in 1513, and Peru was not conquered till 1545; hence it is inferred that this emerald was brought from Africa, or the East.

EMIGRANTS. The French aristocracy and clergy began to leave their country in July, 1789, at the breaking out of the revolution: their estates were confiscated in December. A large number returned in 1802, after the peace of Amiens.

EMIGRATION. Phœnician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea (see *Magno Græcia*, *Marseilles*, &c.). The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819.

Emigrations to North American Colonies, West Indies, Cape of Good Hope, New South Wales, Swan River, Van Diemen's Land, &c., in 1820-30, according to official returns, 154,291; in 1830-40, 277,695.

In 1846, From England . . . 87,611.	From Ireland . . . 38,813.	From Scotland . . . 3,227.	Total, 129,851.

---	--

EMILY ST. PIERRE. See *United States*, 1862.

EMINENCE, a title conferred upon cardinals by pope Urban VIII. Jan. 10, 1630, as more honourable than "Excellency." Previously cardinals had the title of *Illustrissimi*. *Ashe*. The grand-master of Malta also obtained this title. *Pardon*.

EMIR, a title of the caliphs among the Turks and Persians, first awarded to the descendants of Mahomet, by his daughter Fatima, about A.D. 650. *Ricaud*. To such only was originally given the privilege of wearing the green turban.

EMLY, an Irish see, said to have been founded by St. Patrick. Emly was called Imelacabair; St. Ailbe was the first bishop in A.D. 448. It is now an inconsiderable village. In 1568, the see was united to Cashel. See *Cashel*.

EMPALEMENT. This mode of executing criminals, mentioned by Juvenal, and often inflicted in Rome, is still used in Turkey and Arabia. In England the dead bodies of murderers were sometimes staked in this manner, previously to being buried.

EMPEROR, from *Imperator* (ruler), a title conferred on victorious Roman generals.

Augustus Caesar the first Roman emperor n.c. 27	The Czar the first emperor of Russia A.D. 1722
Valens first emperor of the east A.D. 364	Napoleon Bonaparte first emperor of the French 1804
Charlemagne first emperor of Germany crowned by Leo III. 800	Don Pedro IV. of Portugal the first emperor of Brazil 1825
Othman I. founder of the Turkish empire, the first emperor of Turkey 1296	Faustin I. the first emperor of Hayti in 1849; deposed 1859

EMPIRICS, early physicians, who contended that all reasoning respecting the animal economy was useless, and that experience and observation alone were the foundation of medicine. The sect of Empirics was instituted by Acron of Agrigentum, about 473 B.C.

ENAMELLING. The origin of this art is doubtful. It was practised by the Egyptians, Chinese, and other nations, and was known in England in the time of the Saxons. At Oxford is an enamelled jewel, which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about A.D. 887. Limoges enamelled ware was popular in the 16th century.*

ENCÆNIA, Greek festivals kept on days on which cities were built and temples consecrated; and, in later times, as at Oxford, at the celebrations of founders and benefactors. *Oldisworth*. They were feasts celebrated by the Jews on the 25th of the ninth month, in commemoration of the cleansing or purifying the temple by the Maccabees, which had been polluted by Antiochus Epiphanes, 131 B.C.

ENCAUSTIC PAINTING, the art of enamelling or painting by fire. *Bailey*. Painting with burnt wax was known to the ancients. This art, after having been lost, was revived by M. Bachelier, 1749, by count Caylus, 1765, and by Miss Greenland in 1785 and 1792.

ENCUMBERED ESTATES (Ireland). In July 1849, an act was enacted, to enable any owner of land, or of a lease of land for not less than sixty years unexpired, subject to encumbrance, to apply, within three years from the passing of the act, to commissioners appointed under it to direct a sale of such property. The commissioners held their first court in Dublin, Oct. 24, 1849; and property to an immense amount has already changed hands under the act. The court became extinct July 28, 1858. A new court was established under the Landed Estates act, 21 & 22 Vict. c. 72 (1858). The number of estates sold up to 1858 was 2380, producing twenty-two millions of pounds. In 1854 a similar act was passed for the West Indies.

ENCYCLOPÆDIA, or **CYCLOPÆDIA**, a general dictionary of art, science, and literature. This name has been given to a work by Abulpharagius in the 13th century. *Hofmann's Lexicon Universale* first appeared in 1677, and Bayle's *Dictionnaire* in 1696. The earliest English encyclopedia appears to be the *Lexicon Technicum* of John Harris, 1704-10.

Cornelle's Dictionnaire des Arts	A.D. 1694	Chambers' Cyclopædia (edited by Rees)	A.D. 1786
Chambers' Cyclopædia	1728	Rees' Cyclopædia	1802-19
Zedler's Universal Lexicon	1732-50	Brockhaus's Conversations-Lexicon, 1st edition	1818
Encyclopédie (by Diderot and D'Alembert)	1751-80	(new edition generally publishing)	
[The contributors were termed ENCYCLOPÉDISTES, and their bold writings are believed to have hastened the outbreak of the French Revolution in 1789.]		Encyclopædia Metropolitana	1829-45
Encyclopædia Britannica, first edition	1773	Cabinet Cyclopædia (a collection of treatises)	1829-46
(the eighth completed, 1861.)		Penny Cyclopædia	1833-46
Encyclopédie Méthodique (by Pancouck)	1781-1830	Knight's English Cyclopædia	1853-61
		Chambers' Cyclopædia (now publishing) began	1859
		Ersch; and Gruber's Allgemeine Encyclopædie, began 1818; 125 vols. published, ...	1861

ENDERBY LAND. See *Southern Continent*.

ENDOSMOSIS. M. Dutrochet, about 1826, found that if two fluids, gases or vapours, of unequal density, are separated by an animal or vegetable membrane, the denser will attract the less dense through the medium. This property he called *endosmose*, when the attraction is from the outside to the inside, and *exosmose*, when it operates from the inside to the outside. By this discovery many natural phenomena are more clearly understood. *Brande*.

ENFIELD MUSKET. See *Fire Arms*.

ENGHIEN, or **STEENKIRK** (S.W. Belgium). Here the British under William III. were defeated by the French under marshal Luxemburg, July 24, 1692.—A victory obtained here by the great Condé first gave the ducal title to a prince of the house of Bourbon Condé. Their descendant, the duc d'Enghien, was seized in Baden by order of Bonaparte, conveyed to Vincennes, and, after a hasty trial, shot by torch-light, immediately after condemnation, March 20, 1804. The body was exhumed, March 20, 1816.

ENGINEERS. This name is of modern date, as engineers were formerly called Trench-masters. Sir William Pelham officiated as Trench-master in 1622. The chief engineer was called camp-master-general in 1634. Captain Thomas Rudd had the rank of chief engineer to the king about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, April 25, 1787. It has a colonel-in-

* On June 19, 1862, Madame Rachel sued captain Carnegie for 928l. for enamelling his wife's face: and was non-suited.

chief, 16 colonels-commandant, and 16 colonels. *Civil Engineering* began to be eminent in the middle of the last century, when Smeaton began the Eddystone lighthouse, and Brindley the Bridgewater canal. Since then the Rennies, Telford, the Stephensons and Brunels, Locke, and others have constructed the breakwaters, docks, bridges, railways, tunnels, &c., which are the marvel of our age.* The first society of Civil Engineers was formed by Smeaton and others in 1793, and was afterwards termed the *Smeatonian Society* of Civil Engineers. It published 3 vols. of Transactions, and still exists.—The Institution of Civil Engineers was established in 1818, and obtained a charter in 1828.—The Institution of Mechanical Engineers, which has its head-quarters in Birmingham, was established in 1847. The first president was George Stephenson, the second his son Robert.

ENGLAND, so named by order of Egbert, first king of England, in a general council held at Winchester, A.D. 829. This appellation had been used as far back as A.D. 688, but had never been, until then, ratified by any assembly of the nation. It came from *Angles*, a tribe of Saxons, and *land*, the Saxon for country. See *Anglo-Saxons*. England and Wales were united A.D. 1283: Scotland was united to them in 1707, when the three were styled Great Britain. Ireland was incorporated with them, by the act of Legislative Union, Jan. 1, 1801, and the whole were called the United Kingdom of Great Britain and Ireland. See *King*. For previous history see *Britain*, and for further details see separate articles. See also *Population*.

First hostile appearance of the Danes	A.D. 783	Death of Wickliffe	A.D. 1385
Reign of Alfred, who defeats the invaders in 56 pitched battles	871	Murder of Richard II. at Pomfret castle	1399

KINGS AND QUEENS OF ENGLAND (*See article King of England.*)

BEFORE THE CONQUEST.

827. Egbert, first sole monarch, so reigned ten years; succeeded by his son
 837. Ethelwolf; succeeded by his son
 857. Ethelbald, called the Second; died 20 Dec. 860; succeeded by his next brother
 866. Ethelbert; died in 866, and was succeeded by
 866. Ethelred, third son of Ethelwolf; died April 27, 871; succeeded by
 871. Alfred, surnamed the Great, fourth son of Ethelwolf, died 21st or 28th Oct. 901.
 901. Edward the Elder; succeeded his father Alfred; died in 925.
 925. Athelstan, eldest son of the last king; died Oct. 17, 940.
 940. Edmund I., fifth son of Edward the Elder; died to death from a wound received in an affray, May 26, 946.
 946. Edred, brother of Edmund,* died in 955, and was succeeded by
 955. Edwy, eldest son of Edmund; died of grief in 958. In this reign Dunstan, a turbulent and ambitious priest, ruled the king, who afterwards banished him.
 958. Edgar, styled the Peaceable, brother of Edwy; died July 1, 975.
 975. Edward the Martyr, his son, stabbed at Corfe Castle, at the instance of his mother-in-law Elfrida, March 18, 979.
 979. Ethelred II.; succeeded his half-brother Edward; retired.
 1013. Sweyn, proclaimed king; died Feb. 3, 1014; succeeded by his son
 1014. Canute the Great; while absent in Denmark, the exiled king returned.
 1015. Ethelred *restored*; died April 24, 1016, succeeded by his son,
 1016. Edmund Ironside; divided the kingdom with Canute; murdered at Oxford, Nov. 30, 1016; reigned seven months.
 — Canute *again*; married Emma, widow of Ethelred; died in 1035.
 1035. Harold I., his natural son; a cruel prince; died April 14, 1039.
 1039. Hardicanute, son of Canute and Emma; died of repletion at a marriage feast.
 1042. Edward the Confessor, son of Ethelred and Emma, died Jan. 5, 1066, naming William of Normandy his successor.
 1066. Harold II., son of earl Godwin; reigned nine months; killed near Hastings, Oct. 14, 1066.

THE NORMANS.

- William the Conqueror; crowned Dec. 25; died at Rouen, Sept. 9, 1087.
 1087. William II. Rufus; reign began,* Sept. 26; killed by an arrow, Aug. 2, 1100.

1100. Henry I. Beaucerk, his brother; reign began Aug. 5; died of a surfeit, Dec. 1, 1135.
 1135. Stephen earl of Blois, nephew of Henry: the empress Maud, daughter of Henry, contended with him for the crown: reign began Dec. 26; died Oct. 25, 1154.

THE PLANTAGENETS.

1154. Henry II. *Plantagenet*, grandson of Henry and son of Maud; reign began Dec. 19; married Eleanor of France; died July 6, 1189.
 1189. Richard I. *Cœur de Lion*, his son; reign began Sept. 3; died of a wound, April 6, 1199.
 1199. John, the brother of Richard; reign began May 27; married Isabella d'Angoulême; died Oct. 19, 1216.
 1216. Henry III. son of John; reign began Oct. 28; married Eleanor of Provence; died Nov. 16, 1272.
 1272. Edward I. son of Henry, surnamed *Longshanks*; reign began Nov. 20; married Eleanor of Castile; endly, Margaret of France; died July 7, 1307.
 1307. Edward II. son of Edward I.; reign began July 8; married Isabella of France; de-throned Jan. 20, 1327; *murdered* at Berkeley Castle, Sept. 21, following.
 1327. Edward III. his son; reign began Jan. 25; married Philippa of Hainault; died June 21, 1377.
 1377. Richard II. son of Edward the Black Prince, and grandson of Edward III.; reign began June 22; married Anne of Austria; endly, Isabella of France; de-throned Sept. 29, 1399; *murdered* at Pomfret Castle, Feb. 10, following.

HOUSE OF LANCASTER.

1399. Henry IV. cousin of Richard II.; reign began Sept. 30; married Joan of Navarre; died March 20, 1413, succeeded by
 1413. Henry V. his son; reign began March 21, married Catherine of France; died Aug. 31, 1422.
 1422. Henry VI. his son; reign began Sept. 1; married Margaret of Anjou; deposed March 4, 1461; *murdered* by Richard, duke of Gloucester, in the Tower, June 20, 1471.

HOUSE OF YORK.

1461. Edward IV.; married lady Elizabeth Grey; died April 9, 1483.
 1483. Edward V. his son; deposed June 25, 1483, and *murdered* in the Tower by Gloucester; reigned two months and thirteen days.
 — Richard III. brother of Edward IV.; began to reign June 26; *slain* at Bosworth, Aug. 22, 1485.

* The regnal dates are those given by sir H. Nicolas. The Norman and early Plantagenet kings reckoned their reigns from the day of their coronation; the later Plantagenets from the day after the death of their predecessor. With Edward VI. began the present custom of beginning on the death of the preceding sovereign.

ENGLAND, *continued.*

HOUSE OF TUDOR.

1485. Henry VII. ; began to reign Aug. 22 ; married Elizabeth of York ; died April 21, 1509.
1509. Henry VIII. his son ; began to reign April 22 ; died Jan. 28, 1547.
1547. Edward VI. son of Henry VIII. (by Jane Seymour), died July 6, 1553.
1553. Jane ; July 6 to 17. Beheaded Feb. 12, 1554.
- Mary, daughter of Henry (by Catherine of Arragon), married Philip of Spain ; died Nov. 17, 1558.
1558. Elizabeth, daughter of Henry (by Anna Boleyn), died March 24, 1603.
- HOUSE OF STUART.
1603. James I. of England, and VI. of Scotland, son of Mary, queen of Scots ; married Anne, princess of Denmark ; died March 27, 1625.
1625. Charles I. his son ; married Henrietta of France ; beheaded at Whitehall, Jan. 30, 1649.
1649. COMMONWEALTH. Oliver Cromwell made protector, Dec. 12, 1653 ; died Sept. 3, 1658.
1658. Richard Cromwell, his son, made protector, Sept. 4 ; resigned April 22, 1659.
1660. Charles II. son of Charles I. ; married the Infanta Catherine of Portugal ; died Feb. 6, 1685.
1685. James II. his brother ; married 1st, Anne Hyde ; 2ndly, the princess of Modena ;
- abdicated by flight, Dec. 11, 1688 ; died in exile, Aug. 6, 1701.
- 1688-9. Interregnum.
1689. William III. prince of Orange, and Mary his queen, daughter of James ; began their reign, Feb. 13, 1689 ; Mary died Dec. 28, 1694 ; William died of a fall from his horse March 8, 1702.
1702. Anne, second daughter of James ; married George, prince of Denmark ; died without issue, Aug. 1, 1714.
- HOUSE OF HANOVER. (See *Brunswick and Este*.)
1714. George I. elector of Hanover and duke of Brunswick-Luneburg ; son of Sophia, who was daughter of Elizabeth, the daughter of James I. ; married the princess Sophia ; died June 11, 1727.
1727. George II. his son ; married to Wilhelmina-Caroline of Brandenburg-Anspach ; died Oct. 25, 1760.
1760. George III. grandson of George II. ; married Charlotte of Mecklenburg-Strelitz ; died Jan. 29, 1820.
1820. George IV. his son ; married Caroline of Brunswick ; died June 26, 1830.
1830. William IV. brother of George IV. ; married Adelaide of Saxe-Meiningen ; died June 20, 1837.
1837. Victoria, the reigning queen, WHOM GOD PRESERVE.

THE ROYAL FAMILY OF ENGLAND.

THE QUEEN,* Alexandrina VICTORIA, only daughter of Edward, duke of Kent ; † born May 24, 1819 ; succeeded to the throne on the decease of her uncle, William IV., June 20, 1837. Crowned at Westminster, June 28, 1838. Married (Feb. 10, 1840) to her cousin, Francis-ALBERT-Augustus-Charles-Emmanuel, duke of Saxe, prince of Saxe-Coburg and Gotha, born Aug. 26, 1819 (ordered, June 20, 1857, to be styled *Prince Consort*) : elected chancellor of the University of Cambridge, Feb. 28, 1847 ; died Dec. 14, 1861.

ISSUE.

1. Victoria-Adelaide-Mary-Louisa, princess royal, born Nov. 21, 1840 ; married to prince Frederick-William of Prussia, Jan. 25, 1858 (dowry 30,000*l.* and annuity of 8000*l.*). Issue : Frederick-William, Jan. 27, 1859 ; Charlotte, July 24, 1860 ; a prince, Aug. 14, 1862.
2. Albert-Edward, prince of Wales, duke of Saxony, duke of Cornwall and Rothesay, earl of Chester and Carrick, baron of Renfrew, and lord of the Isles, born Nov. 9, 1841. See *Wales*.
3. Alice-Maud-Mary, born April 25, 1843 ; married prince Louis of Hesse-Darmstadt, July 1, 1862. (dowry, 30,000*l.*, annuity, 6000*l.*)
4. Alfred-Ernest, born August 6, 1844 : entered the "Euryalus" as midshipman, Aug. 31, 1868.
5. Helena-Augusta-Victoria, born May 25, 1846.
6. Louisa-Carolina-Alberta, born March 18, 1848.
7. Arthur-Patrick-Albert, born May 1, 1850.
8. Leopold-George-Duncan-Albert, born April 7, 1853.
9. Beatrice-Mary-Victoria-Feodore, born April 14, 1857.

THE QUEEN'S AUNT and **COUSINS**, Augusta, duchess (widow of the late duke) of Cambridge ; born July 25, 1797. *Her son*, George, duke of Cambridge, commander-in-chief, born March 26, 1819 ; and *her daughters*, Augusta, grand duchess of Mecklenburg-Strelitz, born July 19, 1822 ; and the princess Mary of Cambridge, born Nov. 27, 1833.

ENGLAND, NEW (North America), comprising the states of New Hampshire, Connecticut, Massachusetts, and Rhode Island, was settled by the Puritans who were driven from Europe at the beginning of the 17th century by religious persecution. The first attempt to form a settlement was made in 1607, which was named New England by captain Smith, in 1614. Settlement of the Plymouth company in 1620.

ENGLISH LANGUAGE is traced from the Frisian variety of the Teutonic or Germanic branch of the great Indo-European family.

Celtic prevailed in England	A.D. 1	Norman French combining with Saxon	1066-1200
Latin introduced	1-450	English in course of formation	1209-1500
Saxon prevails	450-1066	English formed	1550
Latin re-introduced by missionaries	596	Law pleadings were made in English by order	

* On Nov. 1, 1858, the queen was proclaimed throughout India as "Victoria, by the grace of God, of the united kingdom of Great Britain and Ireland, and of the colonies and dependencies thereof, in Europe, Asia, Africa, America, and Australasia, QUEEN, defender of the faith," &c.

† He was born Nov. 2, 1767 ; and died Jan. 23, 1820. He married Victoria-Maria-Louisa, (widow of the prince of Leiningen, sister of Leopold, king of the Belgians, and aunt to the prince-consort), May 29, 1818. She was born Aug. 17, 1786, and died March 16, 1861.

ENGRAVING. The earliest writers mention engraved seals and seal rings, and there still exist many antique engravings equal to later productions of similar artists. Engraving from plates and wood is chiefly of modern invention, having its origin about the middle of the fifteenth century. Engraving on glass was perfected to an art by Bourdier, of Paris, 1799. The copyright to engravings has been protected by several statutes: among the principal are the acts 16 & 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict. Aug. 6, 1844, and 15 Vict. May 28, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanised india rubber, was shown by the Electro-printing block company in 1860. See *Lithography* and *Photo-Galvanography*.*

ENGRAVING ON COPPER. Prints from engraved copper-plates made their appearance about A.D. 1450, and were first produced in Germany. Masso, surnamed Finiguerra, is considered to have been the first Italian engraver about 1440. The earliest date known of a copper-plate engraving is 1461. Rolling-presses for working the plates were invented in 1545. Of the art of etching on copper by means of *aqua-fortis*, Francis Mazzuoli, or Parmegiano, is the reputed inventor, about A.D. 1532. *De Piles*.

ENGRAVING ON WOOD began with the *brief mahlers*, or manufacturers of playing-cards, about A.D. 1400. See *Printing*. The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Durer (1471-1528) and Lucas Van Leyden, 1497. It was much improved in England by Bewick and his brother, and pupils, Nesbitt, Anderson, &c., 1789, *et seq.* The earliest

wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date A.D. 1423.

ENGRAVING ON SOFT STEEL, to be hardened afterwards, was introduced into England by Messrs. Perkins and Heath of Philadelphia, 1819.

MEZZOTINTO is said to have been discovered by Col. de Siegen, who engraved a portrait of princess Amelia of Hesse in mezzotinto in 1643; it was improved by prince Rupert in 1648; sir Christopher Wren further improved it in 1662. *Aquatinta*, by which a soft and beautiful effect is produced, was invented by the celebrated French artist, St. Non, about 1662; he communicated his invention to Le Prince. Barabbe of Paris was distinguished for his improvements in this kind of engraving, 1763. *Chiar-oscuro* engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491. See *Zinc*, &c.

ENLISTMENT. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less than twenty-four hours, and then they are at liberty to withdraw upon their returning the enlistment or bounty money, and 21s. costs. Enlistment, formerly most arbitrary, is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines.

ENNIKILLKEN (N. W. Ireland). This town made an obstinate defence against the army of Elizabeth, 1595, and against James II., 1689. 1500 Ennikilleners met general M'Carty

* "In Lyra Germanica," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

with 6000 men (of whom 3000 were slain, and nearly all the rest made prisoners), they losing but twenty men, July 20, 1689. The dragoon regiment, the "Inniskillingers," is recruited here.

ENOCH, Book of, an Apocryphal work, quoted by the Fathers, disappeared about the 8th century. A MS. Ethiopic version was found in Abyssinia by Bruce and brought to England in 1773. Archbishop Lawrence published an English translation in 1821, and the Ethiopic text in 1838.

ENTOMOLOGY, the Science of Insects, mainly based upon the arrangement of Linnæus, 1739. Ray's "Method of Insects" was published in 1705. The Entomological Society of London was instituted in 1833; it is devoted chiefly to the study of insects found in Great Britain; and inquiries into the best methods of destroying noxious insects, and making known such as are useful. The best modern works on entomology are those of Kirby and Spence, Burmeister, Johnston, and Westwood.

ENVELOPES for letters came into general use shortly after the establishment of the penny postal system in 1840. Machinery for manufacturing these useful and elegant articles was patented by Mr. George Wilson in 1844; and by Messrs. E. Hill and Warren De la Rue in 1845.

ENVOYS AT COURTS. Ministers in dignity below ambassadors. *Sir T. Herbert*. Envoys enjoy the protection, but not the ceremonies of ambassadors. Envoys Extraordinary are of modern date. *Wiquefort*. The court of France denied to them the ceremony of being conducted to court in the royal carriages, A.D. 1639. Many of the ministers of England at foreign courts are called Envoys Extraordinary.

EPACT is the excess of the solar month above the lunar synodical month, 1 day, 11 hours, 15 minutes, 57 seconds, the lunar month being only 29 days, 12 hours, 44 minutes, 3 seconds; and the excess of the solar year above the lunar synodical year (nearly 11 days), the lunar year being 354 days.

EPHESUS (in Asia Minor), a city founded by the Ionians about 1043 B.C. It was subdued by Cyrus in 544 B.C.; it revolted from the Persians 501 B.C.; and was destroyed by an earthquake in A.D. 17. Paul preached here A.D. 55, 56 (*Acts xviii. xix.*). His epistle to the Ephesians is dated A.D. 64. See *Diana, Temple of*, and *Seven Churches*.

EPHORI, powerful magistrates of Sparta, five in number, said to have been first created by Theopompus to control the royal power, between 770 and 720 B.C.

EPIC POEMS (from Greek *epos*, a song), narratives in verse. Eminent examples :

Homer's "Iliad" and "Odyssey" (<i>Greek</i>), between 8th and 10th century B.C. (See <i>Homer</i>)	Camoens's "Lusiad" (<i>Portuguese</i>)	A.D. 1569
Virgil's "Æneid" (<i>Latin</i>)	Tasso, "Jerusalem Delivered" (<i>Italian</i>)	1581
Ovid's "Metamorphoses" (<i>Latin</i>)	Spenser's "Faery Queen"	1590-6
Dante (died 1321), "Divina Commedia" (<i>Italian</i>), published	Milton, "Paradise Lost"	1667
Ariosto, "Orlando Furioso" (<i>Italian</i>)	Voltaire, "Henriade" (<i>French</i>)	1728
	Walter Scott, "Lay of the Last Minstrel," &c.	1805

EPICUREAN PHILOSOPHY. Epicurus of Gargettus, near Athens, about 300 B.C., taught that the greatest good consists in a happiness springing from virtue alone, as tending to prevent disquiet; but the name has since been given to those who derive happiness from sensual pleasure.

EPIGRAMS derive their origin from the inscriptions placed by the ancients on their tombs. Marcus Valerius Martialis, the celebrated Latin epigrammatist, who flourished about A.D. 83, is allowed to have excelled all others, ancient or modern, in the tasteful and pointed epigram.—The following Latin epigram, on the miracle of Our Saviour in turning water into wine at Cana (*John iii.*) is given as an example :

"Vidit et erubuit lymphæ pudica Deum." The modest water saw its God, and blushed. *Crashaw*, d. 1650.

EPIPHANY. This feast (Jan. 6), vulgarly called Twelfth Day, celebrates the arrival of the wise men of the East, and the manifestation of the Saviour to the world, by the appearance of a miraculous blazing star, which conducted the Magi to the place where he was to be found; instituted A.D. 813. *Whately*.

EPIRUS (Northern Greece). Its early history is very obscure.

The first Pyrrhus (Neoptolemus) settled in Epirus, after the Trojan war, 1170 B.C., and was killed in the temple of Delphi, about B.C. 1165	His expedition into Italy: he defeats the Romans, 280; again, 279; subdues Sicily	B.C. 278
Pyrrhus the great reigns, 295; he takes Macedonia from Demetrius, 290; compelled to yield it to Lysimachus	He invades Italy again, and is totally defeated by Curius Dentatus	274
	He takes Macedonia from Antigonus	273

EPIRUS, *continued*.

He unsuccessfully invades Sparta	B.C.	272	Its conquest by the Romans	B.C.	167
He enters Argos, and is killed by a tile, thrown			at him from a house top by a woman		
Philip unites Epirus to Macedon		220	Epirus annexed to the Ottoman empire	A.D.	1466
			An insurrection put down		1854

EPISCOPACY. See *Bishops*.

EPITAPHS were inscribed on tombs by the Jews, Greeks, and Romans. Mr. T. J. Pettigrew published a collection entitled "*Chronicles of the Tombs*," in 1857.

EPITHALAMIUM, the nuptial song at the marriage of two persons of distinction. Tysias or Tisias, the lyric poet, is said to have been the first writer of a nuptial complimentary song or epithalamium. He received the name of Stesichorus, from the alterations made by him in music and dancing, 536 B.C. *Bossuet*.

EPOCH, a point of time made remarkable by some event, from which subsequent years are reckoned, by historians and chronologers. See *Eras*.

Creation	B.C.	4004	Building of Rome	B.C.	753
Deluge		2348	The birth of Christ	A.D.	1
1st Olympiad		776	The Hegira (or flight of Mahomet)		622

EQUATOR (or ECUADOR), a South American republic founded in 1831, when the Columbian republic was divided into three; the other two being Venezuela and New Granada. The population of Equator is about 1,040,400, of which 76,000 are in Quito, the capital. General Franco, president, Aug. 21, 1859; defeated in battle by general Flores, Aug. 1860. President in 1861, J. C. Moreno.

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year; about March 21, the *vernal* equinox, and Sept. 22, the *autumnal* equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF (the Courts of the Lord Chancellor, the Vice-Chancellors, and the Master of the Rolls), the office of which is to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The Supreme Court of Session in Scotland combines the functions of the English courts of law and equity.

ERAS. Notices of the principal eras will be found in their alphabetical order; a few only need be mentioned here.

Era of <i>Nabonassar</i> , after which the astronomical observations made at Babylon were reckoned, began Feb. 26, B.C.	747	The Romans reckoned from the building of their city, 753 B.C.; and afterwards from the 16th year of the emperor Augustus (see <i>Cæsars</i>), which reckoning was long used by the Spaniards.
Era of the <i>Seleucidæ</i> (used by the Maccabees) commenced	312	The Mahometans began their era from the <i>Hegira</i> , or flight of their prophet from Mecca
The <i>Olympiads</i> belong to the Grecians, and date from the year 776 B.C.; but they subsequently reckoned by Indictions, the first beginning A.D. 313; these, among chronologers, are still used. See <i>Indictions</i> .		A.D. 622 See <i>Calendar</i> , <i>Creation</i> , <i>Anno Domini</i> .

ERASTIANISM, a term applied to the opinions of Thomas Lieber (latinised *Erastus*), a German physician (1523-84), who taught that the church had no right to exclude any person from the ordinances of the Gospel, or to inflict excommunication, &c. Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage, are now termed Erastians.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrupted by erasure with the knife is to be henceforth received in the court of chancery. The errors must be corrected with the pen.

ERFURTH (Central Germany), was founded in A.D. 476; and its university established about 1390. Erfurth was ceded to Prussia in 1802. It capitulated to Murat, when 14,000 Prussian troops surrendered, Oct. 16, 1806. In this city Napoleon and Alexander met, and offered peace to England, Sept. 27, 1808. The French retreated to Erfurth from Leipsic, Oct. 18, 1813. A German parliament met here in March and April 1850.

ERICSSON'S CALORIC ENGINE. See *Caloric Ship Ericsson*.

ESCHEATS. Land or other property that falls to a lord within his manor by forfeiture or death. The escheator observes the rights of the king in the county whereof he is escheator. *Cowel.* In London a court of escheats was held before the lord mayor to recover the property of a bastard who died intestate, for the king; such a court had not been held in the city for 150 years before—July 16, 1771. *Phillips.*

ESCURIAL (25 miles N.W. of Madrid), the palace of the kings of Spain, one of the largest and most magnificent in the world, was commenced by Philip I. in 1563 and completed in 1586; the first expenditure upon its erection was 6,000,000 of ducats. It is built in the form of a gridiron in honour of St. Lawrence, on whose day (Aug. 10, 1557) the Spaniards gained the victory of St. Quentin. It forms a vast square of polished stone, paved with marble. According to the computation of Francisco de los Santos, it would take more than four days to go through all its rooms and apartments, the length of the way being reckoned above 120 English miles. Alvarez de Colmenar also asserts that there are 14,000 doors, and 11,000 windows.

ESPIERRES (or Point-à-Chin, Flanders). The French under Pichegru here attacked the allied English and Austrian army (100,000 men) commanded by the duke of York, and were repulsed after a long and desperate engagement, losing many killed and wounded, and prisoners, and several pieces of cannon, May 22, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578; and abolished in 1791.

ESQUIRES. Among the Greeks and Romans esquires were armour-bearers to, or attendants on, a knight. *Blount.* In England the king created esquires by putting about their necks the collar of SS, and bestowing upon them a pair of silver spurs. A British queen is recorded as having married the *armiger*, or esquire of her deceased husband. The distinction of esquire was first given to persons of fortune not attendant upon knights, A.D. 1345. *Stow.*

“**ESSAYS AND REVIEWS**,” by six clergymen and one layman of the church of England (the Revs. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo vol. in March, 1860. The book did not excite much attention at first, but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and led to the prosecution of the Revs. R. Williams and H. B. Wilson (now pending, 1862). The most remarkable amongst the works put forth in opposition (in 1862) are the “*Aids to Faith*,” edited by the bishop of Gloucester (W. Thomson), and “*Replies to Essays and Reviews*,” edited by the bishop of Oxford (S. Wilberforce).

ESSEX, KINGDOM OF. See *Britain*.

ESSLING, BATTLE OF. See *Asperne*.

ESTE, HOUSE OF. Boniface, count of Lucca and duke of Tuscany about A.D. 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II., marquess of Italy and lord of Este, born about 996, who married first Cunegonda of the house of Guelf, by whom he had Guelf, duke of Bavaria, the ancestor of the house of Brunswick (see *Bavaria and Brunswick*); and secondly Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

ETHER was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether, from the chloride of tin, by Courtanvaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by *inhaling ether* the patient is rendered unconscious of pain, is due to Dr. Charles T. Jackson, of Boston, U.S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice under Dr. Jackson's directions (1846). See *Chloroform* and *Amylene*.

ETHICS (Greek term for *Morals*). The works of Plato, Aristotle, and Confucius contain ancient systems. The New Testament is the code of Christian ethics. Paley's *Moral Philosophy* appeared in 1785, and Whewell's *Elements of Morality* in 1845.

ETHIOPIA. The name was applied anciently rather vaguely to countries the inhabitants of which had *sun-burnt* complexions, in Asia and Africa; but it is now considered to apply properly to the modern Nubia, Sennaar, and northern Abyssinia. Many pyramids exist at Napata, the capital of Meroë, the civilised part of ancient Ethiopia.

The Ethiopians settle near Egypt	B.C. 1615	Tirhakah, king of Ethiopia, marches against	
Zerah, the Ethiopian, defeated by Asa	941	Sennacherib	B.C. 710

ETHIOPIA, *continued.*

Ptolemy Euergetes extended his conquests in Ethiopia . . . B.C. 225
Candace, queen of Meroë, advancing against

the Roman settlements at Elephantine defeated and subdued by Petronius . . . A.D. 22-23

ETHNOLOGY, the study of the relations of the different divisions of mankind to each other, is of recent origin. Balbi's *Ethnographic Atlas* was published in 1826, and Dr. Prichard's great work, *Researches on the Physical History of Mankind*, 1841-7. The Ethnological Society, established in 1843, publishes its transactions. Dr. R. G. Latham's works, on the Ethnology of the British empire, appeared in 1851-2.

ETNA, MOUNT (Sicily). Here were the fabled forges of the Cyclops : and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B.C., and Thucydides speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 125, 121 and 43, B.C. *Livy*. Eruptions A.D. 40, 254, and 420. *Carrera*. One in 1012. *Geoffrey de Viterbo*. Awful one which overwhelmed Catania, when 15,000 inhabitants perished in the burning ruins, 1169. Eruptions equally awful and destructive, 1329, 1408, 1444, 1536, 1537, 1564, and in 1669, when tens of thousands of persons perished in the streams of lava which rolled over the whole country for forty days. Eruptions in 1766, 1787, 1809, 1811, and in May 1830, when several villages were destroyed, and showers of lava reached near to Rome. The town of Bronte was destroyed, Nov. 18, 1832. Another violent eruption occurred in August and September, 1852.

ETON COLLEGE (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanberry, confessor to Henry VI. (bishop of Bangor, in 1448), was the first provost. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, are elected, on the first Tuesday in August, to King's College, Cambridge, and are removed there when there are vacancies, according to seniority. In Dec. 1860 there were in all 820 scholars. See *Cambridge*. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill, once in three years : the donations collected on the road (sometimes as much as 800*l.*) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The *montem* was discontinued in Jan. 1847. The regatta is taking its place.

ETRURIA (or **TUSCIA**, hence the modern name Tuscany), an ancient province of Italy, whence the Romans in a great measure derived their laws, customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porsena of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus 396 B.C. A truce between the Romans and Etrurians for forty years was concluded 351 B.C. The latter and their allies were defeated at the Vadimonian lake 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining show the degree of civilisation to which they had attained. See *Tuscany*.—*Etruria*, the site of Mr. Wedgwood's porcelain works, &c., was founded in 1771.

EUBŒA, the largest island in the *Ægean* sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, being its most valuable foreign possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Charonea, 338, it became subject to Macedon. It was made independent by the Romans in 194 ; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

EUCLID, ELEMENTS OF. Euclid was a native of Alexandria, and flourished there about 300 B.C. The *Elements* are not wholly his ; for many of the invaluable truths and demonstrations they contain were derived from Thales, Pythagoras, Eudoxus, and others. Euclid was the first to reduce them to regular order, and probably interwove many theorems of his own. The *Elements* were first printed at Basil by Simon Grynæus, in A.D. 1533.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it, was invented by Dr. Priestley, in 1772.

EUNUCHS are first mentioned among the Egyptian and Assyrian nations. The first princess who employed them was Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the late Eastern Empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, Sept. 14, 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It

was attacked Feb. 17, 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which however was Selim Pasha, the commander of the Egyptian contingent.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphues; the Anatomy of Wit," by John Lyly, published 1581.

EUROPE, the smallest of the three divisions of the old continent; area, nearly 3,800,000 square miles; population, 270,000,000 (1861). For the history, see various countries.

EURYMEDON, a river in Pamphylia, near which Cimón, son of Miltiades, destroyed the Persians' fleet at Cyprus, and defeated the land forces of the Persians, 466 B.C.

EUSTACE, ST. (Lower Canada). The rebels were defeated here, Dec. 19, 1837, and compelled to surrender their arms. Their chiefs fled.

EUSTATIA, ST. (West Indies). This island was settled by the Dutch in 1632; it was taken by the French in 1689; by the English in 1690; and again by the British forces under admiral Rodney and general Vaughan, Feb. 3, 1781. It was recovered by the French under the marquis de Bouillé, Nov. 26, same year; and was again captured by the British in 1801 and 1810; but restored to the Dutch at the peace in 1814.

EUTYCHIAN HERESY, so called from Eutyches, an abbot of Constantinople, who asserted in 448 A.D. that there was but one nature in Christ, the human having been absorbed in the divine. It was condemned by councils—at Constantinople in the same year, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradaeus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EUXINE. See *Black Sea*.

EVANGELICAL, a term applied to a portion of the clergy of the Church of England (also called the low church), who profess to preach the gospel more purely than their brethren, termed the high church party. See *Church of England*.

EVANGELICAL ALLIANCE, founded by sir Culling Eardley Smith and others in 1845, with the view of promoting unity among all denominations of protestant Christians against Romanism and infidelity. It holds annual meetings. It met in Sept. 1857 at Berlin, (graciously received by the king); Sept. 1858 at Liverpool; Sept. 1859, at Belfast, during the religious revivals; Nov. 1861 at London.

EVANGELISTS. Mark and Matthew wrote their gospels in A.D. 44; Luke in 55; and John in 97. In 95, John was thrown into a caldron of boiling oil at Rome, whence, being taken out unhurt, he was banished to the isle of Patmos, and there, in the year 96, he wrote the *Apocalypse*, and died in 100. *Butler*.

EVENING SCHOOLS for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala in Wales by the Rev. T. Charles in 1811.

EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, Aug. 4, 1265, when the earl his son, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know his rank, but was saved by his timely exclamation, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

EVIL MAY-DAY, (May 1, 1517,) thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. "The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to Westminster, but they crying 'mercy, mercy!' were all pardoned by the king (Henry VIII.), which clemency gained him much love." *Delaine*.

EXAMINATIONS of persons preliminary to their employment in the civil service has been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations."

EXARCHS, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, A.D. 548.—They ruled from 568 to 752, when Eutychus, the last, was overcome by Astolphus the Lombard.

EXCHANGE. One called *Collegium Mercatorum*, existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent. See *Royal Exchange*.

EXCHEQUER, an institution of great antiquity, consisting of officers whose functions are financial and judicial: the chancellor of the exchequer is the first of these, and he formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III. about 1221. The exchequer stopped payment from Jan. to May 24th, Charles II. 1673. *Stow*. The English and Irish exchequers were consolidated in 1816. See *Chancellors of the Exchequer*.

EXCHEQUER BILLS. The government securities so called were first issued in 1697, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and, being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer, they usually bear a premium.*

TELLERS OF THE EXCHEQUER. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been dis-

continued since their last avoidance in Oct. 1826, or by surrender or abolition, in Oct. 1834), there were the four lucrative offices of *tellers* of the exchequer, also abolished, Oct. 10, 1834.†

COMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. The first comptroller-general was Sir John Newport, appointed Oct. 11, 1834.—34,438*l.* *per annum* have been saved to the state by the retrenchments in this department of the government.

EXCHEQUER CHAMBER, COURT OF. Erected by Edward III. in 1357. It was remodelled by Elizabeth, in 1584, and then made to comprise the judges of all the courts. This court is for error from the judgments of the courts of Queen's Bench, Common Pleas, and Exchequer of pleas in actions commenced therein. Remodelled by act 11 Geo. IV. & 1 Will. IV. c. 70, July 23, 1830. The Exchequer office, Westminster, was instituted by Henry IV. in 1399.

EXCHEQUER, COURT OF. Instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the Common Pleas until they were separated, 16 John, 1215. *Coke's Reports*. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat. Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common law between subject and subject. The judges are styled barons. *Beatson*. There are a chief and four puisne barons; the fifth judge having been added July 23, 1830. The office of Cursitor Baron was abolished in 1856, by 18 & 19 Vict. c. 86.‡

CHIEF BARONS OF THE EXCHEQUER.

1689. Sir Robert Atkins. April 10.
1695. Sir Edward Ward. June 10.
1714. Sir Samuel Dodd. Nov. 22.
1716. Sir Thomas Bury. June 11.
1722. Sir James Montagu. May 9.
1723. Sir Robert Eyre. Dec. 5.
1725. Sir Geoffrey Gilbert. June 1.
1726. Sir Thomas Pengelly. Oct. 29.
1730. Sir James Reynolds. April 30.
1738. Sir John Comyn. July 7.
1740. Sir Edmund Probyn. Nov. 24.
1742. Sir Thomas Parker. Nov. 29.
1772. Sir Sydney Stafford Smythe. Oct. 29.

1777. Sir John Skynner. Dec. 17.
1787. Sir James Eyre. Jan. 26.
1793. Sir Archibald Macdonald. Feb. 12.
1813. Sir Vicary Gibbs. Nov. 8.
1814. Sir Alexander Thompson. Feb. 24.
1817. Sir Richard Richards. April 22.
1824. Sir William Alexander. Jan. 9.
1831. John lord Lyndhurst. Jan. 18. Previously lord chancellor; again lord chancellor, 1834.
1834. Sir James Scarlett. Dec. 24. Created lord Abinger, Jan. 1835.
1844. Sir Frederick Pollock. April 15. The **PRESENT** (1862) Chief Baron.

CHIEF BARONS OF THE EXCHEQUER IN IRELAND.

1690. John Hely. Dec. 5.
1695. Robert Doyne. May 10.
1703. Nehemiah Donnellan. Dec. 27.
1706. Richard Freeman. June 25.
1707. Robert Rochfort. June 12.
1714. Joseph Deane. Oct. 14.
1715. Jeffrey Gilbert. June 16.

1722. Bernard Hale. June 9.
1725. Thomas Dalton. Sept. 2.
1730. Thomas Marlay. Sept. 29.
1741. John Bowes. Dec. 21.
1757. Edward Willis. March 11.
1766. Anthony Foster. Sept. 5.
1777. James Dennis (aflds. baron Tracton). July 3.

* Robert Aslett, a cashier of the Bank of England, was tried in 1803 at the Old Bailey for embezzling exchequer bills, and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 320,000*l.* Mr. Beaumont Smith was tried for forging exchequer bills to the amount of 350,000*l.*, pleaded guilty, and was sentenced to transportation, Dec. 4, 1841.

† John Jeffreys Pratt, earl and marquess Camden, was appointed a teller of the exchequer, when a commoner in 1780, and held the appointment until his death in 1840. During nearly half of this long term he relinquished the income arising from the office, amounting in the whole to upwards of a quarter of a million sterling, and placed it at the service of the state, as it annually accrued.

‡ In process of time the court of exchequer (the preceding court) became gradually enlarged in its jurisdiction, until at length it was not merely a revenue court and one at common law between subject and subject, but one in which suits in equity were also instituted. In fact, until the act, 5 Vict. c. 5, 1841, the court of exchequer possessed a triple jurisdiction; but by this statute, its equity business was transferred to the court of chancery.

EXCHEQUER, COURT OF, *continued.*

1782. Walter Hussey Burgh. July 2.	1831. Henry Joy. Jan. 6.
1783. Barry Yelverton (afterwards viscount Avonmore). Nov. 29.	1838. Stephen Woulfe. July 20.
1805. Standish O'Grady (afterwards viscount Guilla-more). Oct. 5.	1840. Maziere Brady. Feb. 11.
	1846. David Richard Pigott. Sept. 1. Tho PRESENT (1862) Chief Baron.

EXCISE. The system was established in England by the Long Parliament about 1643, to support the parliamentary forces against Charles I. It was continued under Charles II. The present system was settled about 1733. The duty was arbitrarily levied upon liquors and provisions. The old excise office was built on the site of Gresham College in 1774; the present is at Somerset-house. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782. Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others, of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 & 18 Vict. c. 27, July 3, 1854. The excise duties were further modified in 1860. See *Revenue*.

AMOUNT OF THE EXCISE REVENUE OF GREAT BRITAIN IN THE FOLLOWING YEARS.

(Great Britain)	1830 (United Kingdom)	1848 (United Kingdom)
1744 £3,754,072	1834 16,877,292	1850 14,316,084
1786 5,540,114	1837 14,518,142	1855 16,389,486
1808 19,867,914	1840 12,607,766	1857 16,685,604
1820 26,364,702	1845 13,585,583	1859 18,144,118
1827 (United Kingdom) 20,995,324	1847 12,883,678	1861 17,266,586

EXCLUSION BILL (to exclude the duke of York, afterwards James II., from the throne), was passed by the commons, but rejected by the lords in 1679. The revival of the question led to the dissolution of parliament in 1681.

EXCOMMUNICATION, an ecclesiastical anathema, or interdict from Christian communion, founded on *Matt.* xviii. 17; *1 Cor.* v., &c. It was originally instituted for preserving the purity of the church, but ambitious ecclesiastics have converted it by degrees into an engine for promoting their own power. The Catholic church excommunicates by *Bell, Book, and Candle* (*which see*). The popes have carried their authority to such excess as to excommunicate and depose sovereigns. See *Interdict*.

Gregory VII. excommunicated the emperor Henry IV.; and absolved his subjects from their allegiance	1077	Julius II., 1510; Francis I. by Leo X., 1521; Henry VIII. of England by Clement VII. in 1527, and by Paul III. in 1535; and Elizabeth by Paul IV.	1558
Innocent III. excommunicated John of England, placing the country under an interdict	1208-14	The emperor of France, the king of Sardinia, and others, were virtually excommunicated (but not by name) on account of the annexation of the Romagna by Sardinia, March 29, 1860	
Gregory IX. excommunicated the emperor Frederic II. four times between	1228-45		
Louis XII. of France was excommunicated by			

EXECUTIONS. See *Crime*. In the reign of Henry VIII. (38 years) it is shown that no less a number than 72,000 criminals were executed. *Stow*. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe, the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to 312; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London (formerly generally at Tyburn), has been in front of Newgate since 1783. The dissection of the bodies of executed persons was abolished in 1832.

EXECUTIONS IN LONDON.

EXECUTIONS, *continued.*

EXECUTIONS OF REMARKABLE CRIMINALS.

Jack Sheppard, highwayman; Tyburn, Nov. 16, 1724	[Immediately after her execution, great sensation was caused by its being universally believed that this young creature suffered innocently. She denied her guilt on the scaffold, and thousands believing her, accompanied her funeral. In the "Annual Register" for 1857, p. 143, it is stated on the authority of Mr. Gurney, that she confessed the crime to Mr. James Upton, a baptist minister, shortly before her execution.]
Lord Bahaerino and others, rebellion; Tower-hill Aug. 18, 1746	Captain Grant, Irish robber; Maryborough, Aug. 16, 1816
Lord Lovat, rebellion; Tower-hill March 30, 1747	John Cashman, Spa-fields riots; Skinner-street, March 12, 1817
Eugene Aram, murder; York Aug. 6, 1759	Murderers of the Lynch family, Wild-geese-lodge affair; Ireland July 19, —
Theodore Gardelle, murder; Haymarket, April 4, 1760	The three Ashcrofts, father and sons, murder; Lancaster Sept. 8, —
Karl Ferrers, murder of his steward; Tyburn, May 5, —	Brandreth and others, high treason; Derby, Nov. 7, —
John Perrott, fraudulent bankrupt; Smithfield, Nov. 11, 1761	Charles Hussey, murder of Mr. Bird and his housekeeper; Pennenden-heath Aug. 3, 1818
John M'Naughten, esq., murder of Miss Knox; Strabane Dec. 13, —	John Scanlan, esq., murder of Ellen Hanley; Limerick March 16, 1820
Elizabeth Brownrigg, murder of her apprentice; Tyburn Sept. 14, 1766	Arthur Thistlewood, John Brunt, James Ings, John Davidson, Richard Tidd (see <i>Cato-street</i>); Old Bailey May 1, —
Daniel and Robert Perreau, wine-merchants, forgery; Tyburn Jan. 17, 1776	John Chennell, Thomas Cicerat, murder of Mr. Chennell, senr.; Godalming Aug. 17, —
Rev. Dr. Dodd, found guilty of forging a bond, in the name of Lord Chesterfield, for £2000: the highest influence was exerted to save him, but when the case came before the council, the minister of the day said to George III., "If your majesty pardon Dr. Dodd, you will have murdered the Perreus;" Tyburn June 27, 1777	Murderers of Miss Thompson; Dublin May 3, 1821
Rev. Henry Hackman, murder of Miss Reay; Tyburn April 18, 1779	David Haggart, famous robber; Edinburgh, June 11, —
Capt. John Donellan, murder of sir Theodosius Boughton; Warwick April 2, 1781	Josiah Cadman, forgery; Old Bailey Nov. 21, —
Mrs. Phoebe, celebrated murderess; Old Bailey, Dec. 11, 1797	Samuel Greenwood, highway robbery; Old Bailey Dec. 27, 1822
Sir Edwd. Crosbie, high treason; Ireland, June 4, 1798	John Thurtell, murder of Mr. Weare; Hertford, Jan. 9, 1824
Messrs. Sheares, high treason; Dublin, July 12, 1799	John Wayne, forgery; Old Bailey Feb. 24, —
Gallopington Dick, highway robbery; Aylesbury, April 4, 1800	Hen. Fauntleroy, esq., banker, forgery; Old Bailey Nov. 30, —
Governor Wall, murder of serjeant Armstrong; Old Bailey Jan. 28, 1802	Probert (an accomplice of Thurtell's in the murder of Mr. Weare; he became approver), horse-stealing; Old Bailey June 20, 1825
Mr. Crawley, murder of two females; Dublin, March 16, —	Spitalfields gang, highway robbery; Old Bailey, Nov. 29, 1826
George Foster, murder of his wife and child; Old Bailey Jan. 18, 1803	Chas. Thos. White, arson; Old Bailey Jan. 2, 1827
Colonel Despard, high treason; Horse-monger-lane Feb. 21, —	*Edward Lowe, coining; Old Bailey Nov. 22, —
John Hatfield (a rank impostor, who married, by means of the most odious deceit, the celebrated "Beauty of Butternere"), forgery; Carlisle Sept. 3, —	Catherine Walsh, murder of her child; Old Bailey April 14, 1828
Robert Emmett, high treason; Dublin, Sept. 20, —	†William Rea, highway robbery; Old Bailey, July 4, —
Richard Patch, murder of Mr. Bligh; Horse-monger-lane April 8, 1806	William Corder, murder of Maria Marten; Bury St. Edmund's Aug. 8, —
John Holloway, Owen Haggerty; murder of Mr. Steele; Old Bailey (thirty of the spectators of this execution were trodden to death, and numbers were pressed, maimed, and wounded) Feb. 22, 1807	Joseph Hunton, quaker, forgery; Old Bailey, Dec. 8, —
T. Simmons, the man of blood, murder; Hertford March 7, 1808	Burke, the murderer (see <i>Burking</i>); Edinburgh, Feb. 16, 1829
Major Campbell, murder of capt. Boyd in a duel; Armagh Oct. 2, —	Anne Chapman, murder of her child; Old Bailey June 30, —
Capt. Sutherland, murder; Execution-dock, June 29, 1809	Stewart and wife, noted murderers; Glasgow, July 24, —
Richard Armitage, forgery; Old Bailey, June 24, 1811	Thomas Maynard, the last executed for forgery; Old Bailey Dec. 31, —
John Bellingham, murder of Mr. Perceval; Old Bailey May 18, 1812	Mr. Cornyn, burning his own house; Ennis, March 18, 1830
Philip Nicholson, murder of Mr. and Mrs. Bonar; Pennenden-heath Aug. 23, 1813	John Bishop, Thomas Williams, murder of a poor Italian boy (see <i>Burking</i>); Old Bailey, Dec. 5, 1831
Francis Tuite, murder of Mr. Goulding; Dublin, Oct. 9, —	Elizabeth Cooke, burking of Cath. Walsh; Old Bailey Jan. 9, 1832
Charles Callaghan, murder of Mr. Merry; Horse-monger-lane April 2, 1814	John Smith, James Pratt, unnatural crime; Old Bailey April 8, 1835
William Sawyer, murder of Jack Hackett; Old Bailey May 15, —	Maryanne Burdock, remarkable case of poisoning; Bristol April 15, —
Eliza Fenning, administering poison; Old Bailey July 26, 1815	

* He was the last coiner drawn on a sledge to the scaffold.

† Captain Charles Montgomery was ordered for execution this day for forgery; but he took a dose (an ounce-and-a-half) of prussic acid, to save himself from the ignominy of the gallows, and was found dead in his cell.

EXECUTIONS, *continued.*

John Pegsworth, murder; Old Bailey, March 7, 1837	Lagava, Bartelano, and Pettrick, murder of two officers and piracy; Winchester. Dec. 23, 1856
James Greenacre, murder of Hannah Brown; Old Bailey May 2, —	Dedea Redanics, murder of two girls at Dover; Maidstone Jan. 1, 1857
William Lees, murder of his wife; Old Bailey, Dec. 16, 1839	Thomas Mansell (after seven months' respite), murder of a soldier; Maidstone July 6, —
François Benj. Courvoisier, murder of lord W. Russell; Old Bailey July 6, 1840	Capt. H. Rogers, murder of A. Rose, a black, with great cruelty; Liverpool Sept. 12, —
Josiah Misters, wounding Mr. Mackreth; Shrewsbury April 2, 1841	Thomas Davis, murder of wife; Old Bailey, Nov. 16, —
Robert Blakesley, murder of Mr. Burdon; Old Bailey Nov. 15, —	John Wm. Beale, murder of Charlotte Pugsley, his sweetheart; Taunton Jan. 12, 1858
John Delahunt, murder of Thomas Maguire; Dublin Feb. 5, 1842	James Thomson, <i>alias</i> Peter Walker, murder of Agnes Montgomery by poison—discovered by a child; Paisley Jan. 14, —
Daniel Good, murder of Jane Jones; Old Bailey, May 23, —	Christian Sattler, a German, murder of inspector Thain; Old Bailey Feb. 10, —
William Crouch, murder of his wife; Old Bailey, May 27, 1844	Giovanni Lani, murder of Heloise Thaubin; Old Bailey April 26, —
James Tapping, murder of Emma Whiter; Old Bailey March 24, 1845	John B. Bicknell, murder of his grandfather and grandmother; Taunton Aug. 24, —
John Tawell, murder of Sarah Hart; Aylesbury, March 28, —	Hen. Reid, murder of wife; Kirkdale Jan. 1, 1859
Thomas Henry Hocker, murder of Mr. Delarue; Old Bailey April 28, —	Wm. Burgess, murder of his daughter; Taunton, Jan. 4, —
Joseph Connor, murder of Mary Brothers; Old Bailey June 2, —	Joseph Castle, murder of his wife; Bedford, March 31, 1860
John Platts, murder of Collis; Derby April 1, 1847	William Youngman, murder of his sweetheart Mary Streeter, and of his mother and two brothers on Aug. 16; Horsomonger-lane, Sept. 4, —
Catherine Foster, murder of her husband; Bury St Edmund's April 17, —	James Mullins, murder of Mrs. Emsley at Stepney; Old Bailey Nov. 19, —
James Bloomfield Rush, murder of Messrs. Jerm. sen. and jun.; Norwich April 21, 1849	James Johnson, murder of two non-commissioned officers; Winchester Jan. 1, 1861
Fred. George Manning, and his wife Maria Manning, murder of O'Connor; Horsomonger-lane Nov. 13, —	Matthew and Charles Wedmore, murder of their aunt; Taunton April 5, —
James Barbour, murder of Robinson; York Jan. 15, 1853	Wm. Cogan, murder of his wife; Old Bailey, Oct. 14, —
Henry Horler, murder of his wife; Old Bailey, Jan. 15, —	Thos. Jackson, a soldier, murder of sergeant John Dickson; Winchester Dec. 27, —
Grant, Quin, and Coomey, murder of Thomas Bateson; Monaghan April 10, 1854	Wm. Charlton, engine-driver, murdered Jane Emmerson, to obtain the money she had saved for her funeral; Carlisle March 15, 1862
Emanuel Bartholemey, murder of Mr. Moore and C. Collard; Old Bailey Jan. 22, 1855	G. J. Gilbert, brutal murder of Miss M. S. Hall on her way to church; Winchester Aug. 4, —
William Bousfield, murder of his wife and three children; Old Bailey March 30, 1856	William Taylor, murder of Mr. Meller from revenge: he previously killed his own children; Kirkdale Sept. 13, —
William Palmer (of Rugeley), murder of J. P. Cook by poison; Stafford June 14, —	Catherine Wilson, murder of Mrs. Soames by poison (and of several other persons); Old Bailey Oct. 20, —
William Dove, murder of his wife by poison; York Aug. —	
Joseph Jenkins, <i>alias</i> Robert Marley, murder of Cope, a shopman, in Westminster; Old Bailey Dec. 15, —	
William Jackson, murder of two children; Chester Dec. 20, —	

EXETER (Devonshire), said to have been early honoured with the name of *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian: its present name is derived from *Excestre*, "the castellated city of the Exe." It was for a considerable time the capital of the West Saxon kingdom. The BISHOPRIC anciently constituted two sees, Devonshire (founded about A.D. 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin. In 1046 the sees were united. St. Petroc was the first bishop of Cornwall, before 900; Cædolphus, the first bishop of Devonshire, 905; and Leofric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan: Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see 1049; valued in the king's books at 500*l.* per annum. Present stated income 2700*l.*

Alfred invested the city held by the Danes, and compelled them to capitulate . . . A.D. 877 and 894
 Exeter sacked by Swegn . . . 1003
 Besieged by William the Conqueror . . . 1067
 The castle surrendered to king Stephen . . . 1136
 The city first governed by a mayor . . . 1200

 A mint established by James II. . . 1688

EXETER, *continued.*

Water-works erected	1694	New city prison built	1818
The sessions house built	1773	The last of the ancient gates removed	—
The new bridge built	1778	The subscription rooms opened	1820
The theatre erected	1783	The public baths erected	1821
Lunatic asylum founded	1795	Mechanics' institution opened	1825
County gaol built	1796	New cemetery commenced	1837
Subscription library founded	1807	Railway to Bristol opened	May 1, 1844
Devon and Exeter institution for the promotion of science established	1813	Great fire, 20 houses burnt	Aug. 2, —
		Another great fire	April 26, 1847

RECENT BISHOPS OF EXETER.

1803. John Fisher, translated to Salisbury in 1807.	1820. William Carey, translated to St. Asaph, March 1830.
1807. Hon. George Pelham, translated to Lincoln, Sept. 1820.	1830. Christopher Bethell, translated to Bangor, 1830.
	1830. Henry Philpotts (PRESENT) bishop.

EXETER CHANGE (London), was built by Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquiss of Exeter near its site, and running from Wellington-street to Catherine-street, with a passage, on each side of which are shops for fancy articles, was opened in 1845. This place, sometimes called the "Wellington arcade," forms a communication between the two streets mentioned, and is 12 feet wide, 20 feet in height, and 60 in length.

EXETER COLLEGE (Oxford), was founded by Walter Stapleton, bishop of Exeter, in 1314. The college buildings consist of a handsome quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious, scientific, and other institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c. Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the Church of England.

EXHIBITION OF 1851. The original idea of a *National Exhibition** is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking." See *Crystal Palace*.

Royal commission appointed Jan. 3, 1850
 A subscription list opened, headed by the queen for 1000l.
 Civic banquets in support of the plan, at London, March 21-22, and at York Oct. 25, —
 The building designed by Joseph Paxton, commenced Sept. 26, —
 Many persons admitted to it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs. Fox and Henderson Feb. 1851
 Reception of goods began Feb. 12, and the sale of season tickets Feb. 25, —
 The Exhibition publicly opened by Her Majesty, May 1, —
 The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defy all numerical calculation.

The palace continued open above twenty-three weeks, altogether 144 days (May 1 to Oct. 15), within which time it was visited by 6,170,000 persons, averaging 43,536 a day, whose admission at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,107l. including season tickets, leaving a surplus, after payment of expenses, of about 150,000l.

The greatest number of visitors in one day was 109,760 (Oct. 8); and at one time (2 o'clock, Oct. 7) were, 93,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but (it should be recollected) within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals, as having been gathered together, it may be said in *one room*.

The Exhibition was closed to the public, Oct. 11, 1851†

EXHIBITION OF 1862. A proposal in 1858 for another Great Exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The scheme was revived in April 1860, when the prince-consort engaged to guarantee 10,000l. if 240,000l. should be subscribed for by other persons. On Feb. 22, 1861, a charter was granted to the

* Industrial exhibitions began with the French; *Expositions* having been organised and opened at Paris in 1798, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage in 1828, near Charing Cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1849.

† Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence &c. (*which see*).

following persons as commissioners: Earl Granville, the Marquess of Chandos, E. W. Dilke, jun. and Thomas Fairbairn. The guarantee fund amounted to 349,000*l.* in Nov. 1860, and to 452,300*l.* on Aug. 22, 1862. The building was erected on 25½ acres of ground at South Kensington, according to a design by capt. Fowke, by Messrs. Kelk & Lucas; made over to the commissioners on Feb. 12, 1862; and opened by the duke of Cambridge and a distinguished company on May 1. The Jurors' awards of medals were announced in the building on July 11. The Exhibition is to be finally closed on Nov. 15.—(*Oct.* 1862.)

EXODUS (Greek, *way out*), a term applied to the departure of the Israelites from Egypt 1491 B.C.; and described in the book *Exodus*. Chronologers vary in the date of this event: the LXX. give 1614; Hales, 1648; Wilkinson, 1495; Bunsen, 1320 or 1314.

EXPEDITIONS, BRITISH. Many are described under their respective heads: *e.g.*

France, near Port l'Orient	Oct. 1, 1746	Ferrol, in Spain	Aug. 1800
Cherbourg	Aug. 7, 1758	Egypt (<i>Abercrombie</i>)	March. 1801
St. Malo; 4000 men lost	Sept. 1758	Copenhagen	Sept. 1807
Quiberon Bay (<i>French emigrants</i>)	1796	Walcheren (<i>unfortunate</i>)	July, 1809
Ostend (<i>all made prisoners</i>)	May, 1798	Bergen-op-Zoom	March 8, 1814
Heider Point and Zuyder Zee	Sept. 1799	Crimea	Sept. 1854

EXPORTS. Edward III. by his encouragement of trade turned the scale so much in favour of English merchandise, that by a balance taken in his time, the exported commodities amounted to 294,000*l.* and the imported to only 38,000*l.* See *Revenue*. The declared value is of infinitely less amount than the official.

OFFICIAL VALUE OF EXPORTS FROM GREAT BRITAIN TO ALL PARTS OF THE WORLD, *VIZ.* :—

1700	£6,097,120	1810	£45,869,839	1840	£97,402,726
1750	10,130,991	1820	51,733,113	1845	131,564,593
1775	16,326,363	1830	66,735,445	1850	175,126,766
1800	38,120,120	1835	78,376,732	1851	190,397,810

TOTAL DECLARED VALUE OF BRITISH AND IRISH PRODUCE EXPORTED.

1851	£74,448,722	1855	£95,688,085	1857	£122,155,237	1860	£135,891,227
1853	98,933,781	1856	115,826,948	1859	130,440,427	1861	125,115,133

EX OFFICIO INFORMATIONs are those filed by the attorney-general, *by virtue of his office*, without applying to the court where they are filed for leave, or giving the defendant an opportunity of showing cause why they should not be filed. *Cabinet Lawyer*. They were used by the Liverpool administration about 1817—19. William Hone was tried on criminal information, Dec. 18-20, 1817, and acquitted. The British bank directors were thus tried, 1857.

EYLAU (Prussia), where on Feb. 7, 8, 1807, the French defeated the Russians, in one of the most bloody contests of the war. Napoleon commanded in person. Both armies by this and other battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel. The victor lost 15,000 men; the Russian loss in slain alone was 20,000.

EYRE (old French for *ire*, to go). The itinerant court of justices, the justices in Eyre, was instituted by Henry II. 1176; and when the forest laws were in force, its chief justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is believed to have been in 1671. *Beatson*.

F.

FABII. A noble and powerful family at Rome, who derived their name from *faba*, a bean, because some of their ancestors cultivated this pulse; they were said to be descended from Fabius, a supposed son of Hercules, and were once so numerous that they took upon themselves to wage war against the Veientes. They came to a general engagement near the Cremera, in which all the family, consisting of 306 men, were slain in a sudden attack, 477 B.C. There only remained one, whose tender age had detained him at Rome, and from him arose the noble Fabii in the following ages. Fabius *Cunctator* (the delayer), kept Hannibal in check for some time without coming to an engagement, 217, 216 B.C.

FABLES. "Jotham's fable of the trees (*Judges* ix., about 1209 B.C.) is the oldest extant, and as beautiful as any made since." *Addison*. Nathan's fable of the poor man (2 *Sam.* xii., about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnoo Sarma, called Pilpay, are the most beautiful, if not the most ancient in the world. *Sir William Jones*. The well-known

Æsop's fables (*which see*), supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of Æsop. The fables of Lafontaine (1700) and Gay (1727) are justly celebrated.

FACTIONS. Among the Romans (who were mostly spectators only of the games), factions were parties that fought on chariots in the circus, and who were distinguished by their different colours, as green, blue, red, and white; to which Domitian added two others, one in coats embroidered with gold, a second wearing scarlet, about A.D. 90. At Constantinople, the higher ranks took part in the games, and both the emperors and people had generally greater inclination for some particular colour.*

FACTORIES, establishments supplied with machinery for producing manufactures of all kinds, have immensely increased in this country since 1815. In consequence of a report to parliament, the Factory act was passed in 1833, regulating the hours of labour, &c. No child is to be employed under nine years of age, except in silk factories. Other acts regulating factories have been passed since.

FAIRLOP OAK, a celebrated tree with a trunk 48 feet in circumference, the growth of five centuries in the forest of Hainault, Essex, blown down in February, 1820. Its extended branches covered a space of more than 300 feet in circumference; and beneath them a fair was annually held on the first Friday in July. This fair originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon. Every year added to the number of persons; and in a short time a fair was begun.

FAIRS AND WAKES are of Saxon origin, and were instituted in England by Alfred, A.D. 886. *Spelman*. They were established by order of Gregory VII. in 1078, and termed *Feria*, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, &c. They were called wakes from the people making merry during the vigil or eve. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror.

FALCONRY in England cannot be traced with certainty until the reign of king Ethelbert, the Saxon monarch, A.D. 850. *Pennant*. It is said that the grand seignior at one time kept six thousand falconers in his service. Recent attempts have been made to revive falconry (1862).

FALCZI, PEACE OF, concluded between Russia and Turkey, July 2, 1711, the Russians giving up Azoph and all their possessions on the Black Sea to the Turks. The Russians were saved from imminent destruction by the address of Catherine the empress. In 1712 the war was renewed, and terminated by the peace of Constantinople, April 16, 1712.

FALERNIAN WINE, celebrated by Virgil and Horace, was the produce of Falernus, or, as called by Martial, Mons Massicus, in Campania. Horace in his *Odes* boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from the same consuls, 14 B.C. The Opimian wine is said to have been kept for 200 years.

FALKIRK (Sterlingshire, Scotland), the site of a victory by the English under Edward I. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 of the latter were slain, July 22, 1298. A battle was fought here between the royal forces and prince Charles Stuart, in which the former were defeated, Jan. 17, 1746.

FALKLAND ISLANDS, a group in the South Atlantic, belonging to Great Britain. Seen by Americus Vesputius; and visited by Davis, 1592. Taken possession of by France, 1764. The French were expelled by the Spaniards; and in 1771, Spain gave up the sovereignty to England. Not having been colonised by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America, the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. *McCulloch*.

FAMILY COMPACT. See *Bourbon*.

FAMILY OF LOVE, a society, called also Philadelphians, from the love they professed to bear to all men, even the most wicked. They assembled at Brew-house yard, Nottingham.

* In Jan 532, a conflict took place, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora, formerly a courtesan. The blues and greens united for a day or two against the emperor, taking *Nika!* (overcome!) for a watchword, from which the sedition has been named. The blues soon repented, and massacred nearly all the greens. The games were suppressed for a time.

Their founder was a fanatic named David George, an Anabaptist, of Holland, who propagated his doctrine in Switzerland, where he died in 1556. After this event the tenets of the society were declared to be impious, and George's body and books were ordered to be burned by the hangman. See *Agapemonians*.

FAMINES. The famine of the seven years in Egypt began 1708 B.C. *Usher*; *Blair*.

Famine at Rome, when thousands of people threw themselves into the Tiber	B.C. 436	One in England and France (<i>Rapin</i>)	1353
Awful famine in Egypt	A.D. 42	Again, one so great, that bread was made from fern-roots (<i>low</i>)	1438
At Rome, attended by plague	262	One throughout these islands	1365
In Britain, so grievous that people ate the bark of trees	272	Awful one in France (<i>Voltaire</i>)	1693
In Scotland, and thousands die	306	One general in these realms	1748
In England, where 40,000 perish	310	One which devastates Bengal	1771
Awful one in Phrygia	370	At Cape de Verde: 16,000 persons perish	1775
In Italy when parents ate their children (<i>Du- fresnoy</i>)	450	One grievously felt in France	1789
In England, Wales, and Scotland	739	One severely felt in England	1795
Again, when thousands starve	829	Again, throughout the kingdom	1801
Again, which lasts four years	954	At Drontheim, owing to Sweden intercepting the supplies	1813
Awful one throughout Europe	1016	Scarcity of food severely felt by the Irish poor 1814, 1816, 1822, 1831, 1846, in consequence of the failure of the potato crop. Grants by parliament, to relieve the suffering of the people, were made in the session of 1847, the whole amounting to ten millions sterling.	
In England, 21 William I.	1087	In N. W. provinces of India, thousands starving. (See <i>India</i> .)	Jan.—March 1861
In England and France: this famine leads to a pestilential fever, which lasts from	1193 to 1193		
Another famine in England	1251		
Again, so dreadful that the people devoured the flesh of horses, dogs, cats, and vermin	1375		
One occasioned by long rains	1335		

FAN. The use of the fan was known to the ancients; *Cape hoc flabellum, et ventulum huic sic facito*. "Take this fan, and give her thus a little air." *Terence, Eunuchus*, B.C. 166.

—Fans, together with muffs, masks, and false hair, were first devised by the harlots in Italy, and were brought to England from France. *Stow*. The fan was used by females to hide their faces at church. *Pardon*. In the British Museum are fan-handles and other articles of Egyptian manufacture, used anciently by women.

FARCE, a short comic drama, usually of one or two acts. One by Otway is dated 1677. The best English farces (by Foote, Garrick, Bickerstaff, &c.) appeared from about 1740 to 1780. This species of dramatic entertainment originated in the droll shows which were exhibited by charlatans and their buffoons in the open street. See *Drama*.

FARNESE FAMILY became important through the elevation of Alexander Farnese to the papacy as Paul III. He gave his natural son Peter the duchy of Parma, and his descendants ruled there till the death of Antony without issue in 1731. Alexander prince of Parma was governor of the Netherlands in 1579.

FARTHING. One of the earliest of the English coins. Farthings in silver were coined by king John; the Irish farthing of his reign is of the date of 1210, and is valuable and rare. Farthings were coined in England in silver by Henry VIII. First coined in copper by Charles II. 1665; and again in 1672, when there was a large coinage of copper money. Half-farthings were first coined in the reign of Victoria, 1843. See *Queen Anne's Farthings*.

FASTS. Observed by most nations from the remotest antiquity; by the Jews (2 *Chron.* xx. 3); by the Ninevites (*Jonah* iii.). A fast was observed by the Jews on the great day of atonement, *Lev.* xxiii. 1490 B.C. The first Christian ministers were ordained with fasting (A.D. 45), *Acts* xiii. 2. Annual fasts, as that of Lent, and at other stated times, and on particular occasions to appease the anger of God, began in the Christian church, in the second century, A.D. 138. Fast days are appointed by the Reformed churches in times of war and pestilence (as March 21, 1855, for the Russian war, and Oct. 7, 1857, for the Indian Mutiny). See *Abstinence*.

FATHERS OF THE CHURCH. A term applied to the earlier Christian writers. The following are the principal:

SECOND CENTURY.	Greek.	Latin.	Athanasius, d.	373	Cyril of Alexandria, d. 444
Justin Martyr, d. abt. 166		Tertullian, d. abt.	220	Ephrem Syrus, d. abt. 378	
Irenæus, d. abt.	200	Minutius Felix, fl. abt. 230	230	Basil, d.	379
Athenagoras.		Cyprian, d.	258	Cyril of Jerusalem, d. 386	Arnobius, fl.
				Gregory Nazianzen, d. 389	Lactantius, d. abt.
				Gregory Nyssen, d. abt. 394	330
				Epiphanius, d.	402
				Chrysostom, d.	407
					Jerome, d.
					420
					Augustine, d.
					430

FATIMITES. See *Ali* and *Mahometanism*.

FATS are oils solid at ordinary temperatures. The researches of Chevreul since 1824 on their chemical nature are very important. See *Candles*.

FAUSTUS, a renowned professor of the black art, magic, flourished about the end of the 15th century. Chap-books respecting him have been in circulation since that time. Goethe's celebrated poem, "Faust," first appeared in 1790.

FEASTS AND FESTIVALS. The "Feasts of the Lord," viz. those of the Passover, Pentecost, Trumpets, and Tabernacles, were instituted 1490 B.C. (*Leviticus*, ch. xxiii.) The Feast of the Tabernacles was celebrated with the greatest magnificence for fourteen days, upon the dedication of the temple of Solomon, 1004 B.C. Hezekiah (726 B.C.) and Josiah (623) kept the feast of Passover in a most solemn manner. In the Christian Church the feasts of Christmas, Easter, Ascension, and the Pentecost, or Whitsuntide, are said to have been first ordered to be observed by all Christians, A.D. 68. Rogation days were appointed in 469. Jubilees in the Romish Church were instituted by Boniface VIII. in 1300. See *Jubilees*. For fixed festivals observed in the Church of England, as settled at the Reformation, *et seq.*, see Book of Common Prayer.

FEBRUARY (from *Februus*, an old Italian divinity), the second month of the year, in which was celebrated Februa, a feast in behalf of the manes of deceased persons, when sacrifices were performed, and the last offices were paid to the shades of the dead. This month, with January, was added to the year, previously but ten months, by Numa, 713 B.C. See *Calendar and Year*.

FECIALES, or FETIALES, heralds of Rome, twenty in number, to denounce war or proclaim peace, instituted by Numa, about 712 B.C. When the Romans thought themselves injured, one of this body was empowered to demand redress; and after thirty-three days, if submission were not made, war was declared, and the Feciales hurled a bloody spear into the territories of the enemy, as a sign of intended hostilities.

FEDERAL STATES are those united by treaty as one state, without giving up self-government—as in Switzerland. The term Federal was given to the Northern States of America during the great conflict in 1861-2.

FEEJEE ISLANDS, or FIJI, in the Pacific Ocean, about 1500 miles from Sydney. There are 80 inhabited islands, the largest about 360 miles in circumference, with 20,000 inhabitants. The islands were offered by the chiefs to the British government, July, 1859; but not accepted. In 1860 the house of commons granted 1680*l.* for expenditure in these islands.

FELONY, in English law (says Blackstone, in 1765) comprises every species of crime which occasions the forfeiture of land and goods.

FENCING was introduced into England from France, where it had long before been taught. Fencing-schools having led to duelling in England, were prohibited in London by statute 13 Edw. I. 1285. In 1859 there were eight teachers of fencing in London.

FERE-CHAMPENOISE (France). Here the French army under Marmont, Mortier, and Arrighi, were surprised and defeated by the Austrians under the prince of Schwartzenberg, March 25, 1814, after a heroic resistance. Paris surrendered to the allies six days after.

FERIÆ LATINÆ were solemn festivals at Rome, instituted by Tarquin the Proud, about 534 B.C. The principal magistrates of forty-seven towns of Latium assembled on a mount near Rome, where they and the Roman authorities offered a bull to Jupiter Latiæ.

FERMENTATION, termed one of the most mysterious processes in nature by Gay Lussac, who showed that in the process of fermentation, 45 lbs. of sugar are resolved into 23 of alcohol and 22 of carbonic acid. His memoir appeared in 1810. In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere.

FERNS (Ireland), an ancient bishopric, once archiepiscopal. St. Eden was seated here in A.D. 598. Leighlin and Ferns were united in 1600; and by the Church Temporalities' act, passed Aug. 1833, both were united to the bishopric of Ossory. See *Ossory*.—FERNS, an order of cryptogamous plants, now much cultivated in Wardian cases, *which see*, and see also *Nature Printing*.

FEROZESHAH (India). The British, commanded by sir Hugh Gough, attacked the entrenchments of the Sikhs, and carried by storm their first line of works, Dec. 21, 1845; but night coming on, the operations were suspended till daybreak next day, when their second line was stormed by general Gilbert, and 74 guns captured. The Sikhs advanced to retake their guns, but were repulsed with great loss, and retreated towards the Sutlej, Dec. 22; and recrossed that river unmolested, Dec. 27. The British loss was reckoned at 2415.

FERRARA, a city in the Papal States, formerly part of the Exarchate of Ravenna, under the Emperors of the East. It was subdued by the Lombards in the 8th century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1208 it fell into the hands of the house of Este (*which see*), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the long-claimed sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Cæsar, became duke of Modena. The French under Massena took Ferrara in 1796; but it was restored to the pope in 1814. An Austrian garrison held it from 1849; it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860.

FERRARS' ARREST. Mr. George Ferrars, a member of parliament, being in attendance on the house, was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their serjeant to require his release, which was resisted, and an affray taking place, his mace was broken. The house in a body repaired to the Lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrars from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members to this day from arrest;—1542. *Hollinshed.*

FERRO. The most western of the Canary Isles, from whose west point some geographers have taken their first meridian. This island was known to the ancients, and was rediscovered in 1402. See *Canary Islands*.

FERROËL (N.W. Spain). Upwards of 10,000 British landed near Ferrol under the command of sir James Pulteney, in August 1800. They gained possession of the heights; notwithstanding which the British general, despairing of success, on account of the strength of the works, re-embarked his troops. His conduct, which was in opposition to the opinion of his officers, was very much condemned in England. The French took seven sail of the line here, Jan. 27, 1809.

FESCENNINE VERSES were rude extemporary dialogues, frequently licentious, in favour among the ancient Etruscans, and still popular in Italy.

FESTIVALS. See *Feasts*.

FÊTE DE DIEU, a feast of the Roman church in honour of the real presence in the Lord's Supper, kept on the Thursday after Trinity Sunday; established by Urban IV., 1264. Berengarius, archbishop of Angers, was opposed to the doctrine of transubstantiation when it was first propagated, and to atone for his crime a yearly procession was made at Angers, which was called *la fête de Dieu*, 1019.

FÊTE DE VERTU, an annual assemblage, chiefly of young persons, to whom were adjudged rewards for industry and virtue. These fêtes, held at Nuneham, in Oxfordshire, begun by lady Harcourt in 1789, continued till her death.

FEUDAL LAWS. The tenure of land by suit and service to the lord or owner of it was introduced into England by the Saxons, about A.D. 600. The slavery of this tenure was increased under William I. in 1068. This was done by dividing the kingdom into baronies, and giving them to certain persons, requiring them to furnish the king with money, and a stated number of soldiers. The vassalage was restored, but limited by Henry VII., 1495; abolished by statute 12 Charles II. 1663. The feudal system was introduced into Scotland by Malcolm II. in 1008. The hereditary jurisdictions were finally abolished in that kingdom, 20 Geo. II. 1746-7. The feudal laws, established in France by Clovis I. about 486, were discontinued by Louis XI. in 1470.

FEUILLANTS, a religious order founded by Jean de la Barrière in 1577 at the abbey of Feuillant near Toulouse, and settled in Paris in 1587.—Also members of a society formed in Paris by La Fayette and others in 1789, to counteract the intrigues of the Jacobins, so named from the Feuillant convent, where they met. A body of Jacobins burst into their hall and obliged them to separate, Dec. 25, 1791.

FEZ (in the ancient *Mauritania*, Africa), founded by Edris, a descendant of Mahomet, about A.D. 787, was long capital of the kingdom of Fez. After long-continued struggles, it was annexed to Morocco about 1548. Leo Africanus describes it as containing more than seven hundred temples, mosques, and other public edifices, in the twelfth century.

FICCTIONS. See *Romances*.—FICCTIONS IN LAW were invented by the lawyers in the reign of Edward I. as a means of carrying cases from one court to another, whereby the courts became checks to each other. *Hume*. Lord Mansfield, in the court of King's Bench, emphatically declared, that "NO FICTION OF LAW SHALL EVER SO FAR PREVAIL AGAINST THE REAL TRUTH, AS TO PREVENT THE EXECUTION OF JUSTICE," May 31, 1784.

FIEF. See *Feudal Laws*.

FIELD OF THE CLOTH OF GOLD, the name given to a plain near Ardres, a small town near Calais, in France, on which Henry VIII. met Francis I. of France, June 7-25, 1520. The nobility of both kingdoms displayed their magnificence with much emulation and profuse expense, and many involved themselves in great debts in consequence. Paintings of the embarkation and interview are at Windsor Castle.

FIESEHI'S ATTEMPT ON LOUIS-PHILIPPE. See *France*, 1835.

FIFTH-MONARCHY MEN about 1645 supposed the period of the Millennium to be just at hand, when Jesus should descend from heaven, and erect the fifth universal monarchy. They proceeded so far as to elect Jesus Christ king at London. Cromwell dispersed them, 1653. *Kearsley*. Another rising was suppressed in Jan. 1661.

FIG-TREE (*Ficus Carica*). Brought from the south of Europe, before A.D. 1548. The Botany-Bay Fig, *Ficus Australis*, brought from N.S. Wales in 1789.

FIGURES. See *Arithmetic*, and *Digits*.

FILES are mentioned (1 *Sam.* xiii. 21) B.C. 1093. The manufacture of them has attained to great perfection, by means of File-cutting Machinery. That set up by Mr. T. Greenwood of Leeds, in 1859, was invented by M. Bernot of Paris. It is said that the price of files made by it are reduced from 3*d.* to 4*d.* per dozen.

FILIBUSTERS, a name given to the Freebooters who plundered the coasts of America in the 17th century. See *Buccaneers*. It has been applied to Walker and other adventurers from the United States, who within the last few years endeavoured to obtain possession of Central America. See *Nicaragua*.

FILTERERS. A plan for purifying corrupted water was patented by Wm. Wollcott in 1675. Other modes followed. James Peacock's method of filtration was patented in 1791.

FINES AND RECOVERIES, conferring the power of breaking ancient entails and alienating estates. The practice began in the reign of Edward IV., but was not, properly speaking, law, till the statute of Henry VII. which, by correcting some abuses that attended the practice, gave indirectly a sanction to it, 1489. *Hume*. Fines and recoveries were abolished in 1833.

FINE ARTS. See *Arts*, *Paintings*, *Sculpture*, *Engraving*, &c.

FINLAND, a Russian principality. In the middle of the 12th century, was conquered by the Swedes, who introduced Christianity. It was several times conquered by the Russians (1714, 1742, and 1808), and restored (1721 and 1743); but in 1809 they retained it by treaty. See *Abo*. Its political constitution was confirmed by the czar in 1809, 1825, and 1855. Population in 1859, 1,724,193.

FIRE is said to have been first produced by striking flints together. The poets supposed that fire was stolen from heaven by Prometheus. Heracitus about 596 B.C. maintained that the world was created from fire, and deemed it to be a god omnipotent.

FIRE-ANNIHILATOR, an apparatus invented by Mr. T. Phillips, and made known by him in 1849. When put in action, steam and carbonic acid are formed, which extinguish flame. It has not been found universally successful.

FIRE-ARMS. (See *Artillery and Cannon*.) The first small fire-arms were a species of cannon, borne by two men. See *Revolver*.

Fire-arms made at Perugia, in Italy . . . A.D. 1364
Employed by the Burgundians in the defence
of Arras . . . 1414
Edward IV. when he landed at Ravenspur, is
said to have been accompanied by 300
Flemings armed with hand-guns . . . 1471
At the battle of Morat, the Swiss are said to
have had 10,000 men armed with fire-arms . . . 1476
Fire-arms were used at the siege of Berwick . . . 1521
The Petronel (from *poitrine*, the chest)-or Ar-
quebuse came into use, 1480; and the Musket,
employed in the armies of the emperor
Charles V. . . about —
All these were of very rude construction, being
first discharged by a lighted match, after-

wards, about 1517, by a wheel-lock, then by
the flint
The match-lock and wheel-lock were superseded
by the flint-lock, in the reign of William III.
about 1692
The rev. Mr. Forsythe patented the percussion
principle of igniting gunpowder in muskets
by means of detonating powder. . . 1807
Perussion caps came into general use between
1820 and 1830
The old musket, familiarly called *Brown Bess*,
was superseded by the Enfield rifle, which is
likely to give way to Lancaster's smooth-
bored rifle . . . 1858

FIRE-ARMS, *continued*.

SMALL ARMS OF THE BRITISH SERVICE, 1854.

Percussion musket; pattern, 1842.	after experiments at the royal manufactory,
Victoria carbine (for cavalry).	Enfield Lock.
Regulation rifle musket; pattern, 1851.	Artillery carbine; pattern, 1842.
Enfield rifle musket, adopted for the service in 1853	

FIRE-ENGINES are mentioned by Pliny, A.D. 70. A "Water-bow" was patented by Thos. Grent in 1632, one was constructed by John Vander Heyden, about 1663. Bramah's engine was patented in 1793, and many others since.

FIRE-ESCAPES have been patented by David Marie (1766), Joachim Smith (1773), and by many other persons. The Royal Society for the Protection of Life from Fire was first established in 1836; its object was not fully attained till 1843, when it was re-organised, beginning with six escape stations in London; in March 1859, it possessed 67, since then the number has been increased. In 1861 it was stated that 84 lives had been saved by the conductors. In 1858, 504 fires had been attended, and 57 persons rescued by the society's officers. Versmann's composition for rendering washing dresses *fire-proof* was published about 1860.

FIRE-SHIPS were first used in the 13th century. Among the most formidable contrivances of this kind ever used, was an explosion vessel to destroy a bridge of boats at the siege of Antwerp, in 1585. The first use of them in the English navy was by Charles, lord Howard of Effingham, in the engagement of the Spanish Armada, July, 1588. *Rapin*.

FIRE-WATCH, or Fire-Guard of London, was instituted Nov. 1791.—The FIRE-BRIGADE was established in London in 1832 by Mr. R. Bell Forde, a director of the Sun Fire-office. It then had 80 men and 19 stations. In 1862 it had 127 men and 20 stations. In May, 1862 a commission recommended the establishment of a Police Fire-Brigade.

FIRE-WORKS* are said to have been familiar to the Chinese in remote ages. They were invented in Europe at Florence about A.D. 1360; and were exhibited as a spectacle in 1588.

Macaulay states that the fire-works let off in England at the peace of Ryswick, in 1697, cost 12,000*l*. Very grand fire-works were let off from a magnificent building erected in the Green-park, London, at the peace of Aix-la-Chapelle, signed April 30, 1748. At an exhibition of fire-works in Paris, June 21, 1770, in honour of the marriage of the dauphin, after wards Louis XVI., more than 1000 persons perished by pressure and drowning, through a panic.

The display of fire-works, under the direction of sir Wm. Congreve, on the celebration of the general peace, and to commemorate the centenary accession of the family of Brunswick to the British throne, surpassed all previous exhibitions, Aug. 1, 1814.

A grand display of this kind (at a cost of 10,000*l*.), to celebrate the peace with Russia, May 29, 1856.

FIRES IN LONDON. The conflagration of a city, with all its tumult of concomitant distress, is one of the most dreadful spectacles which this world can offer to human eyes. *Dr. Johnson*.

REMARKABLE FIRES IN OR NEAR LONDON.

A great part of the city destroyed, including St. Paul's cathedral A.D. 662 and 1087	In Southwark, 60 houses burnt A.D. 1676
One at London-bridge, began on the Southwark side, and was communicated to the other side, and hemmed in a numerous crowd. Of those who threw themselves into boats and barges, about 3000 were drowned. A great part of the city north and south was burnt, 14 John 1212	In Wapping, 150 houses burnt, 50 lives lost 1715
The Great Fire, whose ruins covered 436 acres, extended from the Tower to the Temple-church, and from the north-east gate to Holborn-bridge. It began at a baker's house in Pudding-lane, behind Monument-yard, and destroyed in the space of four days, 89 churches (including St. Paul's), the city gates, the Royal Exchange, the Custom House, Guildhall, Sion College, and many other public buildings, besides 13,200 houses, laying waste 400 streets. About 200,000 persons encamped in Islington and Highgate fields. (See <i>Monument</i>). Sept. 2-6, 1666	Custom House burnt 1718
	At Shadwell, 50 houses burnt Sept. 10, 1736
	In Cornhill ward, 200 houses burnt; this fire began in Change-alley, and was the most terrible since the great fire of 1666, March 25, 1748
	At Covent Garden, 50 houses 1759
	In Smithfield, 28 houses burnt 1761
	At Shadwell, 30 houses burnt —
	In Throgmorton-street, 20 houses 1774
	At Wapping, 20 houses 1775
	At Hermitage-stairs, 31 houses 1779
	At Horselydown, 30 houses, besides many warehouses and ships April 30, 1780
	Newgate, &c., by the Gordon mob June, —
	In the Strand, 40 houses 1781
	In Aldersgate-street, 40 houses; the loss exceeding 100,000 <i>l</i> Nov. 5, 1783
	The Opera-house June 17, 1788
	At Rotherhithe, 20 houses Oct. 12, 1790

* In consequence of explosions frequently occurring at fire-work makers (particularly one on July 12, 1858, at Mr. Bennett's in the Westminster-road, Lambeth, when five lives were lost, and about 300 persons seriously injured, and much property destroyed), it was determined to enforce 9 & 10 Will. III., cap. 7, (1697), an act to prevent the throwing and forming of squibs, serpents, and other fire-works. An act regulating the making of fire-works, was passed in 1860.

FIRES IN LONDON, *continued.*

Again, when many ships and 60 houses were consumed	Sept. 14, 1791	Premises of Messrs. Saville and Edwards, printers, Chandos-street, destroyed	Sept. 30, 1853
Pantheon, Oxford-street	June 14, 1792	Premises of Townend and Co., Bread-street, destroyed; loss about 100,000l.	Dec. 31, 1854
At Wapping, 630 houses, and an East India warehouse, in which 35,000 bags of saltpetre were stored: the loss 1,000,000l.	July 21, 1794	Messrs. Cubitt's premises, Pimlico	Aug. 17, 1854
Astley's Amphitheatre	Sept. 17, —	Whittington club-house	Dec. 3, —
St. Paul's church, Covent garden	Sept. 12, 1795	Premises of Messrs. Routledge, Messrs. Rennie, &c., Blackfriars-road; loss, one life and 150,000l.	Feb. 16, 1855
At Shadwell, 20 houses burnt	Nov. 4, 1796	Of Etna steam battery at Messrs. Scott Russell's works; loss about 220,000l.	May 3, —
In the Minories, 30 houses	March 23, 1797	Pavilion theatre	Feb. 13, 1856
In the King's Bench, 50 residences	July 14, 1799	Covent-garden theatre	March 5, —
Near the Customs, three West India warehouses; loss 300,000l.	Feb. 11, 1800	Messrs. Scott Russell's (third fire), much valuable machinery destroyed	March 12, —
At Wapping, 30 houses	Oct. 6, —	Messrs. Dolbe's premises, Fleet-street	April 1, —
In Store-street, Tottenham-court-road, immense property destroyed	Sept. 27, 1802	Shad Thames flour mill; loss about 100,000l.	July 17, —
The great tower over the choir of Westminster-abbey burnt	July 9, 1803	Messrs. Broadwood's, pianoforte-makers, Westminster	Aug. 22, —
Astley's again, and 40 houses	Sept. 1, —	Premises of Messrs. Almond's, army accoutrement makers, and others, in St. Martin's lane; estimated loss 20,000l.	Nov. 9, —
Frith-street, Soho, lasted several days, many houses destroyed	Dec. 2, —	Messrs. Pickford's premises, at Chalk Farm station	June 9, 1857
Surrey Theatre	Aug. 12, 1805	Gilbert-street, Bloomsbury; 25 lives lost	March 28, 1858
Covent-garden theatre	Sept. 20, 1805	Limehouse; Messrs. Forest, Dixon's, &c., premises destroyed and Blackwall railway arches; insured	June 19-20, —
Drury-lane theatre	Feb. 24, 1809	Fresh wharf; 25,000l. worth of silk	June 21, —
In Conduit-street; Mr. Windham, in aiding to save Mr. North's library, received an injury which caused his death	July 9, —	London docks; great explosion; man killed by fright; loss about 150,000l.	June 29, —
In Bury-street, St. Mary-axe, half the street made ruins	June 12, 1811	Great James-street, Marylebone; six lives lost	Feb. 26, 1859
Custom House, warehouses, and public records destroyed	Feb. 12, 1813	Messrs. Hubbuck and Co., Lime-street; one life and a large amount of property	May 20, —
At Rotherhithe; 60 houses and several ships destroyed, loss 80,000l.	March 16, 1820	West Kent wharf and New Hibernia wharf; destroyed property valued at 200,000l.; fire lasted nearly a month; commenced Aug. 17, 1860	—
At Mile-end; loss 200,000l.	Jan. 22, 1821	St. Martin's hall, built for Mr. Hullah, and other premises destroyed	Aug. 6, —
In Smithfield; loss 100,000l.	Aug. 14, 1822	Thames Iron-works, Blackwall	Aug. 31, —
In Red-lion-street, 15 houses	June 6, 1823	Kilburn church, Maida-hill, destroyed	Nov. 29, 1861
Argyle rooms destroyed	Feb. 5, 1830	Surrey Music-hall destroyed	June 11, 1861
English Opera-house, &c., burnt	Feb. 16, —	Cotton's wharf and depot and other wharves near Tuoley-street containing oil and other combustible substances, took fire about half-past four p.m. June 22, and continued burning for a month. Several persons were killed, including James Braidwood, the able superintendent of the London Fire-brigade; the loss of property was estimated at 2,000,000l.	—
Houses of Parliament consumed	Oct. 16, 1834	Davis's wharf, Horselydown, burnt; loss about 15,000l.	Aug. 1, —
Fenning's wharf, London-bridge, &c.; loss 250,000l.	Aug. 30, 1836	Near Paternoster-row; Messrs. Longman's booksellers, Messrs. Knight's, tallow-melters, and others; loss, above 50,000l.	Sept. 4, —
The Royal Exchange destroyed	Jan. 10, 1838	At Campden-house, Kensington, pictures and other valuable property of Mr. Woolley destroyed	March 23, 1862
At Wapping, 12 houses	June 16, 1840	Mr. Boor's, druggist, Bishopsgate-street; explosion; two-lives lost	June 7, —
Canterwell church	Feb. 7, 1841	Great Cumberland-street, Hyde-park; Mr. Barrett and two daughters burnt	Aug. 15, —
Astley's theatre again	June 8, —	There were 953 fires in 1854; 1113 in 1857; 1214 in 1858 (38 lives lost); 1183 fires in 1861. Several fires were occasioned by careless use of coal-oils in 1861-62.	—
At the Tower; the armoury and 280,000 stand of arms, &c., destroyed	Oct. 30, 1841		
Raggett's hotel, Dover-street, Piccadilly; several eminent persons perished	May 27, 1843		
Several houses in New-square, Lincoln's-inn	Jan. 14, 1849		
Olympic theatre	March 29, —		
One in St. Martin's-lane, (at a publican's named Ben Caunt) three lives lost	Jan. 15, 1851		
Fire at Duke's-street, London-bridge; property lost estimated at 60,000l.	Feb. 19, —		
At the Rose and Crown, Love-lane, City, four lives lost	May 18, —		
Foot of London-bridge, four large hop warehouses burnt, loss 450,000l.	June 23, —		
Collard and Co., pianoforte-makers, Camden-town; loss 60,000l.	Dec. 19, —		
The warehouses of Messrs. Pawson, St. Paul's Churchyard, burnt	Feb. 24, 1853		
Works of Gutta Percha Company, near City-road; loss 100,000l.	June 5, —		
Kirkman's piano-forte manufactory	Aug. 10, —		
Messrs. Scott Russell and Co.'s works, Millwall; loss 100,000l.	Sept. 10, —		

FIRE-WORSHIPPERS. See *Parsees*.

FIRST-FRUITS were offerings which made a large part of the revenues of the Hebrew priesthood. First-fruits (called *ANNATES*, from *annus*, a year), in the Roman church, originally the profits of one year of every vacant bishopric, afterwards of every benefice, were first claimed by pope Clement V. in 1306; and were collected in England in 1316: but chronologers differ on this point. The exaction was submitted to till the 26th of Hen. VIII. 1534, when the first-fruits were assigned, by act of parliament, to the king and

his successors. Mary gave up the Annates once more to the popes (1555); but Elizabeth resumed them (1559). They were granted together with the tenths, to increase the incomes of the poor clergy, by queen Anne, in 1703. The offices of First-fruits, Tenths, and queen Anne's Bounty, were consolidated by 1 Vict. c. 20. 1838. See *Augmentation of Poor Livings*. Annates were long resisted in France, but not totally suppressed till 1789.

FISHERIES. Laws for their protection were enacted by Edward I. in 1284, and by his successors. The rights of the English and French fishermen were defined by treaty in 1839. See *Herring, Whale, and Newfoundland Fisheries*. In 1860 great progress had been made in France in producing fish in ponds by M. Coste and others. Commissioners were engaged in examining British fisheries in 1860.

Fishmongers' company of London, incorporated	1384	Fish-machines, for conveying fish by land to	
Fishing towns regulated by an act passed in	1542	London, set up in 1761; and supported by	
Fishing on our coast forbidden by statute to		parliament	1764

on the coasts of Britain	1636	The Irish Fishery Company formed in	Dec. 1818
Corporation of Free British fisheries instituted	1750		

FITZWILLIAM MUSEUM (Cambridge), founded by Richard viscount Fitzwilliam, who died in 1816, and bequeathed his collection of books, pictures, &c., to the university, with 100,000*l.* to erect a building to contain them. This was begun by G. Basevi in 1838, and finished by Cockerell.

FIVE-HUNDRED, COUNCIL OF, established by the new French constitution, Aug. 22, 1795, was unceremoniously dissolved by Napoleon Bonaparte, Nov. 10, 1799.

FIVE-MILE ACT, an oppressive statute passed in the 17th year of Chas. II. Oct. 1665. It obliged non-conformist teachers, who refused to take the non-resistance oath, not to come within five miles of any corporation where they had preached since the act of oblivion (unless they were travelling), under the penalty of 50*l.* They were relieved by Will. III. in 1689.

FLAG. The flag acquired its present form in the sixth century, in Spain; it was previously small and square. *Ashe*. It is said to have been introduced there by the Saracens, before whose time the ensigns of war were extended on cross pieces of wood. *Pardon*. The term flag is more particularly used at sea, to denote to what country a ship belongs, and the quality of its commander. The *honour-of-the-flag salute* at sea was exacted by England from very early times; but it was formally yielded by the Dutch in A.D. 1673, at which period they had been defeated in many actions. Louis XIV. obliged the Spaniards to lower their flag to the French, 1680. *Hénault*. After an engagement of three hours between Tourville and the Spanish admiral Papachin, the latter yielded by firing a salute of nine guns to the French flag, June 2, 1688. *Idem*. See *Salute at Sea* and *Union Jack*.

FLAGELLANTS, SECT OF. A general plague, which swept away a vast multitude of people, gave rise to this fanatic sect. *Hénault*. They established themselves at Perouse, A.D. 1268. They maintained that there was no remission of sins without flagellation, and publicly lashed themselves, until the blood flowed from their naked backs. Pope Clement VI. declared them heretics in 1349; and 90 of them and their leader, Conrad Schmidt, were burnt, 1414. In 1574 Henry III. of France joined this sect for a short time.

FLAMBEAUX, FEAST OF. See *Argos*.

FLANDERS, the principal part of the ancient Belgium, which was conquered by Julius Cæsar, 51 B.C. It became part of the kingdom of France in 843, and was governed by counts subject to the king, from 862 till 1369, the first being Baldwin, *Bras de Fer*, who is said to have introduced the cloth manufacture. In 1204, Baldwin IV. became emperor at Constantinople. In 1369 Philip duke of Burgundy married Margaret, the heiress of count Louis II. After this, Flanders was subjected alternately to Burgundy (1384), Austria (1477), and Spain (1555). In 1580 it declared its independence, but afterwards returned to its allegiance to the house of Austria. In 1713 it was included in the empire of Germany. France obtained a part of Flanders by treaty in 1659 and 1679. See *Burgundy, Netherlands, and Belgium*.

FLAT-BUSH, BATTLE OF. See *Long Island*.

FLATTERY CAPE (on the western coast of North America) was so named by captain Cook, because at a distance it had promised to him a harbour, which it did not yield him upon his near approach, in 1778. This disappointment was severely felt by his crew, who at the time were in want of provisions.

FLAX was brought from Egypt to Gaul about 1 B.C.; and was ordered to be grown in England, by statute, 24 Hen. VIII. 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill, which was invented in Scotland about 1750. See *Hemp*. In 1851 chevalier Claussen patented a method of "cottoning" flax.

FLEECE. See *Golden Pleece*.

FLEET-PRISON, MARKET, &c. (London), were built over the small river Fleta, now used as a common sewer. In the reign of Henry VII. this river was navigable to Holborn-bridge; and the obelisk in Fleet-street denotes the extent of it in 1775. The *prison* for debtors was founded in the first year of Richard I. It was the place of confinement for those who had incurred the displeasure of the Star Chamber; and persons were committed here for contempt of the court of Chancery. It was burnt down by the prisoners, June 7, 1780.* It was pulled down in 1845 (and the debtors removed to the Queen's Bench Prison). *Fleet-market*, originally formed in 1737, was removed, and the site named Farringdon-street in 1829. A new market was opened Nov. 20, 1829. The granite obelisk in Fleet-street, to the memory of alderman Waithman, was erected June 25, 1833.

FLEUR-DE-LIS, the emblem of France, said to have been brought from heaven by an angel to Clovis, he having made a vow that if he proved victorious in a pending battle with the Alemanni near Cologne, he would embrace Christianity, A.D. 496. It was the national emblem till the revolution in 1789, when the tricolour (white, red, and blue) was adopted.

FLEURUS (Belgium), the site of several battles: (1.) On Aug. 30, 1622, between the Catholic league, under Gonzales de Cordova, and the Protestant union (indecisive). (2.) When the prince of Waldeck was defeated by Luxembourg, July 1, 1690. (3.) Between the allies under the prince of Coburg, and the French revolutionary army commanded by Jourdan. The allies, with an army of 100,000 men, had for their object the relief of Charleroi, when they were met on the plains of Fleurus, and signally defeated. Between 8000 and 10,000 were killed, wounded, and taken prisoners; and Jourdan was enabled to form a junction with the French armies of the Moselle, the Ardennes, and the north. In this memorable battle the French made use of a balloon to reconnoitre the enemy's army, an experiment which, it is said, contributed to the success of the day, June 26, 1794. (4.) The battle of Ligny (*which see*) is also called the battle of *Fleurus*.

FLIES. There was an extraordinary fall of these insects in London, covering the clothes of passengers in the streets, in which they lay so thick, that the impressions of the people's feet were visible on the pavements, as they are in a thick fall of snow, A.D. 1707. *Chamberlain*. In the United States of America is an insect commonly called the *Hessian fly*, from the notion of its having been brought there by the Hessian troops in the service of England in the American war of independence; its ravages were very extensive on the wheat in 1777; but the injury to the crops was much less after.—Before and during the severe attack of cholera at Newcastle in Sept. 1853, the air was infested with small flies.

FLINTS, in form like arrow-heads, and considered by him to have been shaped by human hands, were found in 1847, near Amiens, by M. Boucher de Perthes. His theory, which gives a much higher antiquity to man than is usually received, was much opposed; but latterly has been received by some eminent geologists.

FLOATING BATTERIES. See *Batteries*, and *Gibraltar, Siege of*, 1781.

FLODDEN-FIELD (Northumberland). The site of a battle on Sept. 9, 1513, between the English and Scots; in consequence of James IV. of Scotland having taken part with Louis XII. of France against Henry VIII. of England. James, the most of his nobles, and upwards of 10,000 of his army were slain; while the English, who were commanded by the earl of Surrey, lost only persons of small note.

FLOGGING. Wm. Cobbett in 1810, and John Drakard in 1811 were punished for publishing censures on flogging in the army. By orders issued Nov. 9, 1859, this mode of punishment is virtually abolished in the army (see *Army*); and on Dec. following, it was ordered that first-class seamen should not be flogged, except after a trial.

FLOODS. See *Inundations*.

* **FLEET MARRIAGES.** Illicit marriages were celebrated here to an amazing extent. Between the 10th of October, 1704, and Feb. 12, 1705, there were celebrated 2954 marriages in the Fleet, without licence or certificate of banns. Twenty or thirty couple were sometimes joined in one day, and their names concealed by private marks, if they chose to pay an extra fee. Pennant, at a later period, describes the daring manner in which this nefarious traffic was carried on. He says, that in walking by the prison in his youth, he has been often accosted with, "Sir, will you please to walk in and be married?" And he states that painted signs, of a male and female hand conjoined, with the inscription, "Marriages performed within," were common along the building. This glaring abuse was put an end to by the Marriage act, in 1753.

FLORAL HALL, adjoining Covent garden theatre, is a large conservatory 220 feet long, 75 feet wide, and 55 feet high, erected from designs by Mr. E. M. Barry, was opened with the volunteers' ball, March 7, 1860. It was opened as a flower-market May 22, 1861.

FLORALIA, annual licentious games at Rome in honour of Flora, instituted about 752, but not celebrated with regularity till about 174 B.C.

FLORENCE (*Florentia*), capital of Tuscany (*which see*). It is said to have been founded by the soldiers of Sylla (80 B.C.), and enlarged by the Roman Triumviri. It was destroyed by Totila (about A.D. 541), and was rebuilt by Charlemagne, 781. It became an independent republic about 1198, and was long disturbed by factions. The power of the Medici began about 1420; and in 1530 the liberty of Florence was lost by the appointment of Alexander de' Medici as perpetual governor. In 1569 Cosmo de' Medici was created grand-duke of Tuscany. See *Tuscany*. This city is truly the seat of the arts. In its palaces, universities, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy, and *Accademia della Crusca* (established 1582), were instituted to enrich the literature and improve the language of Tuscany; the latter was so named because it rejects like *bran* all words not purely Tuscan: both are now united under the former name. Here Dante was born in 1265, and Savonarola burnt in 1498. King Victor Emanuel entered Florence in triumph April 17, 1860. The Florence Exhibition of Italian Industrial products was opened by king Victor Emmanuel, Sept. 15, 1861.

FLORES, or Isle of Flowers (one of the Azores, *which see*). Discovered by Vanderberg, in 1439; and settled by the Portuguese in 1448.

FLORIDA, a peninsula, one of the Southern States of North America, first discovered by Sebastian Cabot in A.D. 1497. It was visited by Ponce de Leon, the Spanish navigator, April 2, 1512, in a voyage he had absurdly undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them! Florida was conquered by the Spaniards under Ferdinand de Soto, in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in 1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1702; again by general Oglethorpe in 1740; ceded to the British crown in 1763; taken by the Spaniards in 1781; and guaranteed to them in 1783. Revolution in 1810, when the American government took means for occupying the country: and after a tedious negotiation, it was finally ceded* by Spain to the United States in 1820-21; and admitted into the Union in 1845, from which it seceded in Dec. 1860. See *United States*.

FLORIN, a coin first made by the Florentines. A *florin* was issued by Edward III., which was current in England at the value of 6s. in 1337. *Camden*. This English coin was called *florin* after the Florentine coin, because the latter was of the best gold. *Ashe*. The florin of Germany is in value 2s. 4d.; that of Spain 4s. 4d.; that of Palermo and Sicily, 2s. 6d.; that of Holland, 2s. *Ayliffe*. A silver coinage of florins (value 2s.) was issued by proclamation of queen Victoria, August, 1849.

FLOWERS. The taste for flowers came, it is said, from Persia to Constantinople, and was imported thence to Europe for the first time in the 16th century. From the reign of Henry VII. to that of Elizabeth, our present common flowers were, for the most part, introduced into England. The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by George Morris, in 1792. The introduction of the following plants to our gardens has been traced or guessed at. A very great number have been introduced from Australia, &c., during the present century.

	A.D.		A.D.		A.D.
Acacia, N. America, before	1640	Christ's thorn, Africa, before	1596	Dryandria, New Holland	1801
Alspice shrub, Carolina	1726	Canary bell-flower, Canaries	1656	Evergreen, thorn, Italy	1629
Aniseed tree, Florida, about	1766	Canary convolvulus, Canaries	1690	Everlasting, great-flowered,	
Arbor Vitæ, Canada, before	1596	Carnation, Flanders	1567	Cape	1781
Arctopus, Cape of Good Hope	1774	Ceanothus, blue, New Spain	1818	Everlasting, giant, Cape	1793
Auricula, Switzerland	1567	Convolvulus, many-flowered	1779	Fernbush, sweet, N. America	1711
Azarole, S. Europe, before	1640	Coral tree, Cape	1816	Fox-glove, Canaries	1663
Bay, royal, Madeira	1665	Coral tree, bell-flowered, Cape	1791	Fuchsia fulgens, Mexico, about	1835
Bay, sweet, Italy, before	1548	Coral tree, tremulous, Cape	1789	Geranium, Flanders	1531
Camellia, China	1811	Creeper, virginian, N. America	1603	Gillyflower, Flanders	1561
Chaste tree, Sicily, before	1570	Dahlia, China	1803	Gold-plant, Japan	1793

* In 1803, the American government purchased Louisiana from the French, of which they contended West Florida formed a part. On the revolution, and in consequence of this purchase, Spain, unable to defend the country, ceded the whole of Florida to the United States, to which it was finally annexed after the negotiation above mentioned.

FLUORINE, a gaseous element, obtained from fluor spar; first collected over mercury by Priestley. Its property of corroding all vessels is so great that it is separated with great difficulty. It was named by Ampère in 1810. Its chemical history was further elucidated by Davy (1809), Berzelius (1824), and succeeding chemists. The corroding property of fluoric acid was employed in the arts in 1760, by Schwankhard of Nuremberg. *Gmelin*.

FLUSHING, SIEGE OF. See *Walcheren Expedition*.

FLUTE, a most ancient instrument, known to the Greeks. It has been improved by Böhm in Germany, and by Rudell and Rose in London. See *Music*.

FLUXIONS, a branch of the higher mathematics, invented by Newton, 1669, similar to the differential calculus described by Leibnitz, 1684. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place. The first elementary work on fluxions in England is a tract of twenty-two pages in *A New Short Treatise of Algebra, together with a Specimen of the Nature and Algorithm of Fluxions*, by John Harris, M.A. London, 1702.

FLYING, ARTIFICIAL, has been attempted in all ages. Friar Bacon maintained the possibility of the art of flying, and predicted it would be a general practice, A.D. 1273. Bishop Wilkins says (1651), it will yet be as usual to hear a man call for his *wings* when he is going on a journey, as it is now to hear him call for his boots! About 1800 sir George Cayley experimented on the subject, and in 1843 Mr. Henson invented a flying machine: but nothing has yet been devised capable of serving a practical purpose.

FONTAINEBLEAU, near the Seine, France. The Royal Palace founded by Robert le Pieux about 999, enlarged and adorned by successive kings, was completed by Louis Philippe, 1837-40. Fontainebleau was entered by the Austrians, Feb. 17, 1814. Here Napoleon resigned his dignity, April 4, and bade farewell to his army, April 5, 1814.

Peace concluded between France, Denmark, &c.	A.D. 1679	Treaty between Napoleon and the royal family of Spain	Oct. 27, 1807
Treaty between the emperor of Germany and Holland	Nov. 8, 1785	Concordat between Napoleon and pope Pius VII.	Jan. 25, 1813

FONTENOY, near Tournay, in Belgium, the site of a battle on April 30 (May 11, N.S.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland.* The battle was fought

* The king Louis XV. and the dauphin were present at this great battle. The success of the British at the commencement of it is still quoted by military men as the best illustration of the extraordinary power of a column. The advance of the Austrians during several hours at the battle of Marengo (fought June 14, 1800) was compared to it by Bonaparte.

with great obstinacy, and the carnage on both sides was considerable, the allies losing 12,000 men, and the French nearly an equal number of lives; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died), was carried about to all the posts in a litter, assuring his troops that the day would be their own.

FONTHILL-ABBEY, Wiltshire, the mansion of Wm. Beckford, author of "Vathek," and son of alderman Beckford. He died in 1844. Within this edifice (which alone cost 273,000*l.*) were collected most costly articles of virtu, the rarest works of the old masters, and the finest specimens of the arts. The sale of the abbey and its contents to Mr. Farquhar took place in 1819; 7200 catalogues, at a guinea each, were sold in a few days. On Dec. 21, 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

FONTS. Formerly the baptistery was a small place partitioned off in a church within which a large font was placed, where the persons to be baptized (frequently adults) were submerged. Previously, lakes and rivers were resorted to for immersion. Fonts are said to have been set up about A. D. 167.

FOOLS, FESTIVALS OF, were held at Paris on the first of January, where, we are told, all sorts of absurdities and indecencies were committed, from A. D. 1198 to 1438. Fools or licensed jesters were kept at court in England (and at other courts in Europe), and were tolerated up to the time of Charles I. 1625.

FORBES MACKENZIE'S ACT (16 & 17 Vict. c. 67), "for the better regulation of public-houses in Scotland," was passed in 1853, and is said to be much evaded. It permits grocers to sell spirits, &c., as usual, but forbids drinking on the premises, which is to be confined to places duly licensed. Much dram-drinking previously took place in grocers' shops.

FORCE. See *Conservation and Correlation*.

FOREIGNERS. See *Alien*.

FOREIGN ENLISTMENT ACT, 59 Geo. III. c. 69 (1819), forbids Englishmen to enter the service of a foreign state, without licence from the king or privy council. In 1606 Englishmen were forbidden to enter foreign service, without taking an oath not to be reconciled to the pope.

FOREIGN LEGION. Foreigners have frequently been employed as auxiliaries in the pay of the British government. (See *Hessians*.) An act (18 & 19 Vict. c. 2), for the formation of a Foreign Legion as a contingent in the Russian war (1855), was passed Dec. 23, 1854.* The queen and prince Albert reviewed 3500 soldiers, principally Swiss and Germans, at Shorncliffe, Aug. 9, 1855. On the peace in 1856, many were sent to the Cape of Good Hope; but, not prospering, returned.

FOREIGN ORDERS. No British subject is permitted to accept a foreign order from the sovereign of any foreign country, or wear the insignia thereof, without her Majesty's consent,—Regulations published in London Gazette, May 10, 1855.

FORESTS. There were in England, even in the last century, as many as 68 forests, 18 chases, and upwards of 780 parks. The New Forest in Hampshire was made by William I. who for that purpose destroyed 36 parishes, pulled down 36 churches, and dispeopled the country for 30 miles round, A. D. 1079-85. *Stow*.†

FORESTS, CHARTER OF THE, *Charta de Foresta*, granted by Henry III. in 1217, was founded on *Magna Charta*, granted by king John, June 15, 1215.

FORFARSHIRE STEAMER, on its passage from Hull to Dundee, on Sept. 6, 1838, was wrecked in a violent gale, and thirty-eight persons out of fifty-three perished. The Outer-Fern Lighthouse keeper, James Darling, and his heroic daughter Grace, ventured out in a tremendous sea in a coble, and rescued several of the passengers.

FORGERY. The forging deeds, or giving forged deeds in evidence, was made punishable by fine, by standing in the pillory, having both ears cut off, the nostrils slit up and seared,

† The endeavour to enlist for this legion, in 1854, in the United States, gave great offence to the American government. Mr. Crampton, our envoy, was dismissed May 28, 1856, in spite of all the judicious pacific efforts of lord Clarendon. Lord Napier was sent out as our representative in 1857.

‡ The commissioners appointed to inquire into the state of the woods and forests, between A. D. 1787 and 1793, reported the following as belonging to the crown, viz. —In Berkshire, Windsor Forest, and Windsor Great and Little Park. In Dorset, Cranburn Chase. In Essex, Waltham or Epping and Hainault Forest. In Gloucestershire, Dean Forest. In Hampshire, the New Forest, Alice Holt, Woolmer Forest, and Bere Forest. In Kent, Greenwich Park. In Middlesex, St. James's, Hyde, Bushy, and Hampton-court Parks. In Northamptonshire, the Forests of Whittlebury, Salcey, and Rockingham. In Nottingham, Sherwood Forest. In Oxford, Whichwood Forest. In Surrey, Richmond Park. Several of these have been disforested since 1857, viz., Hainault Whichwood, and Whittlebury.

the forfeiture of land and perpetual imprisonment, 5 Eliz. 1562. Since the establishment of paper credit, a multitude of statutes have been enacted.*

Forgery first punished by death	A.D. 1634	Statutes reducing into one act all such forgeries as shall henceforth be punished with death . . .	1830
Forging letters of attorney, for the transfer of stock, made a capital felony	1722	The punishment of forgery with death ceases, except in cases of forging or altering wills or powers of attorney to transfer stock . . .	1832
Mr. Ward, M.P., a man of wealth, expelled the house of commons for forgery, May 16, 1726; and consigned to the pillory	March 17, 1727	These cases also reduced to transportable offences	1837
Value of forged notes presented to the bank during ten years, from Jan. 1, 1801, nominally 101,661 <i>l.</i> <i>Bank Returns.</i>		A barrister, Jem Seward, and others, tried for forging numerous drafts on bankers, March 5, 1857	
The bank prosecuted 142 persons for forgery or the uttering of forged notes	1817	The law respecting forgery amended in	1861
Thos. Maynard was the last person executed for forgery	Dec. 31, 1829	[See <i>Executions</i> (for forgery)].	

FORKS were in use on the continent in the thirteenth and fourteenth centuries. *Voltaire*. This is reasonably disputed. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in Italy, and adds "I myself have thought it good to imitate the Italian fashion since I came home to England," A.D. 1608. The manufacture of two-pronged forks at Sheffield began early in the 18th century. Three-pronged forks are much more recent. Silver forks came into use in England about 1814.

FORMA PAUPERIS. A person having a just cause of suit, certified as such, yet so poor that he cannot meet the cost of maintaining it, has an attorney and counsel assigned him on his swearing that he is not worth 5*l.* by stat. 11 Henry VII. 1495.—This act has been remodelled, and now persons may plead *in forma pauperis* in the courts of law.

FORT ERIE (Upper Canada). This fortress was taken by the American general Browne, June 3, 1814. After several conflicts it was evacuated by the Americans, Nov. 5, 1814. This place is now considerably strengthened.

FORTH AND CLYDE CANAL was commenced July 10, 1768, under the direction of Mr. Smeaton, and opened July 28, 1790. A communication is formed between the eastern and western seas on the coast of Scotland.

FORTIFICATION. The Phœnicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Durer first wrote on the science of fortification in 1527; and great improvements were made by Vauban (1737) and others. The fortifications of Paris, the most recent work claiming notice, were completed in 1846. See *Paris*. In Aug. 1860 the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment. The whole estimated expense for fortifications is 9,500,000*l.* In 1862 an endeavour was made in parliament to suspend the progress of the work.

FORTUNE-TELLERS. Fortune-telling is traced to the early astrologers, by whom the planets Jupiter and Venus were the supposed betokeners of happiness and success. The Sibyllæ were women who flourished in different parts of the world, and who were said to have been inspired by heaven. See *Sibyls* and *Gypsies*. Augury and divination led to palmistry, professed by modern fortune-tellers. *Ashe*. In England the laws against this species of imposition upon the credulity of the weak and ignorant were at one time very severe. A declaration was published in France, Jan. 11, 1680 of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. *Hénault*. Fortune-tellers, although liable by the act of 1824 to be imprisoned as rogues and vagabonds, still flourish in England.

FORTY-SHILLING FREEHOLDERS. See *Freeholders*.

* It appears, from official returns, that the first forger on the bank of England was Richard William Vaughan, a linen-draper of Stafford, in 1728, before which time, from the establishment of the bank, a period of sixty-six years, no attempt at this species of forgery had been made. Vaughan employed a number of artists on different parts of the notes fabricated, which had all the appearance of being genuine. The criminal had filled up twenty of the notes, and had deposited them in the hands of a young lady of high respectability, whom he was on the point of marrying, as a proof of his being a man of substance. Bank-notes having been in circulation so long previously, and none having been before counterfeited, no suspicion of these notes was entertained. One of the artists was the informer and accuser.

FOTHERINGAY CASTLE (Northamptonshire). Built about 1400. Here Richard III. of England was born, in 1450; and here Mary queen of Scots was tried, Oct. 11-14, 1586, and beheaded Feb. 8, 1587, after a captivity of almost nineteen years in England. It was demolished by order of her son, James I. of England, in 1604.

FOUGHARD, near Armagh, N. Ireland. Here Edward brother of Robert Bruce, after invading Ireland, was defeated by sir John Bermingham in 1318. Bruce was killed by Roger de Maupis, a Burgess of Dundalk.

FOUNDLING HOSPITALS. A species of foundling hospital was set up at Milan in A.D. 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be "children of the state."—The foundling hospital at Moscow, founded by Catherine II., in 1763, is an immense edifice, in which about 12,000 children are received annually. Foundling hospitals are comparatively of recent institution in England, where it would appear, none existed when Addison wrote in 1713. The London foundling hospital was projected by Thomas Coram, a benevolent sea-captain, incorporated by charter from George II. in October, 1739, and opened June 2, 1756. It succours about 500 infant children. Coram's statue was put up in 1856.—The Foundling Hospital in Dublin was instituted in 1704; in this charity there had been received, according to parliamentary returns, in the thirty years preceding Jan. 1825, as many as 52,150 infants; of these 14,613 had died infants—25,859 were returned as dead from the country, where they were out nursing—730 died in the infirmary after returning—322 died grown children—total deaths, 41,524; so that 10,626 only escaped this fate. Owing to this mortality, and from certain moral considerations, the internal department was closed by order of government, March 31, 1835.

FOUNTAINS are apparatus, natural or artificial, by which water is made to spring upwards. The Fountain of Hero of Alexandria was invented about 150 B.C. Among the remarkable fountains at Rome, are the Fontana di Trevi, constructed for pope Clement XII. in 1735; the Fontana Paolina, erected for pope Paul V. in 1612; and Fontana dell' Acqua Felice, called also the Fountain of Moses. The fountains in the palace gardens at Versailles, made for Louis XIV., and the Grand Jet d'Eau, at St. Cloud, are exceedingly beautiful. There are above 100 public fountains in Paris, the most striking being the Château d'Eau on the Boulevard St. Martin (by Girard, 1811), and that at the Palais Royal. London is not remarkable for fountains; the largest are those in Trafalgar-square, which were constructed in 1845, after designs by sir Charles Barry. There are beautiful fountains at Chatsworth in Derbyshire, the seat of the duke of Devonshire. The magnificent fountains at the Crystal Palace, Sydenham, were first publicly exhibited on June 18, 1856, in the presence of the queen and 20,000 spectators.

FOURIERISM, a social system devised by M. Charles Fourier (who died in 1837). The Phalanstery (or association of 400 persons living in one edifice) was to be so arranged as to give the highest amount of happiness, at the lowest cost. All attempts to realise the system have failed; caused, it is said, by the smallness of the scale on which they were tried.

FOX AND GRENVILLE ADMINISTRATION. See "*All the Talents' Administration.*"

FOX-GLOVE. The canary fox-glove (*Digitalis Canariensis*), from the Canary islands, A.D. 1698. The Madeira fox-glove came here in 1777. The fox-grape shrub (*Vitis Vulpina*), from Virginia, before A.D. 1656.

FRANCE was known to the Romans by the name of *Gaul* (which see). In the decline of their power it was conquered by the Franks, a people of Germany, then inhabiting Franconia, where they became known about A.D. 240. These invaders gave the name to the kingdom (*Franken-ric*, Franks' kingdom); but the Gauls, being by far the most numerous, are the real ancestors of the modern French. Previous to the revolution, France was divided into 40 governments. In 1790 it was divided into 83, and subsequently into 130 departments, including Corsica, Geneva, Savoy, and other places, chiefly conquests. In 1815 the departments were reduced to 86; in 1860, they were raised to 89, by the cession of Savoy and Nice.* For details of important events, see separate articles.

The Franks settle in that part of Gaul, till late called Flanders, about A.D. 478
Clovis, 481; defeats Syagrius and the Gauls at

Bonaparte made consul for life	Aug. 2,	—	Ministry of marshal Soult, duke of Dalmatia,	Oct. 11,	—
Declaration of war against England	May 22,	1803	Bergeron and Benoît tried for an attempt on the life of Louis-Philippe; acquitted March 18,	1833	—
Conspiracy of Moreau and Pichegru against Bonaparte, Feb. 15; the latter was found strangled in prison. (See <i>Georges</i>)	April 6,	1804	The duchess of Berry, who has been delivered of a female child, and asserts her secret marriage with an Italian nobleman, is sent off to Palermo	June 9,	—
Duke of Enghien shot	March 20,	—	Death of La Fayette	May 20,	1834
France formed into an Empire under Napoleon,	May 18,	—	Marshal Gerard takes office	July 15,	—
He is crowned king of Italy	May 26,	1805	M. Dupuytren dies	Feb. 8,	1835
He defeats the allies at Austerlitz	Dec. 2,	—	Duc de Broglie, minister	Feb.	—
And the Prussians at Jena	Oct. 14,	1806	Fieschi attempts the king's* life	July 28,	—
New nobility of France created	March 1,	1808	He is executed	Feb. 6,	1836
Holland united to France	July 9,	1810	Louis Alibaud fires at the king on his way from the Tuileries, June 25; guillotined	July 11,	—
War with Russia declared	June 22,	1812	Ministry of count Molé, in room of M. Thiers,	Sept. 6,	—
Victory at Borodino	Sept.	—	Attempted insurrection at Strasburg by Louis Napoleon (now emperor), Oct. 30; he is sent to America	Nov. 13,	—
Disastrous retreat	Oct.	—	Prince Polignac and others set at liberty from Ham, and sent out of France	Nov. 23,	—
Triple alliance of Austria, Russia, and Prussia, against France	Sept. 9,	1813	Meunier fires at the king on his way to open the French Chambers	Dec. 27,	—
The British pass the Bidassoa, and enter France,	Oct. 7,	—	Talleyrand dies	May 17,	1838
Surrender of Paris (see <i>Battles</i>) to the allied armies	March 31,	1814	Marshal Soult at the coronation of the queen of England	June 28,	—
Abdication of Napoleon	April 5,	—	Death of the duchess of Württemberg (daughter of Louis-Philippe), a good sculptor	Jan. 2,	1839
Bourbon dynasty restored, and Louis XVIII. arrives in Paris	May 3,	—	M. Thiers, minister of foreign affairs	March 1,	1840
Napoleon arrives at Elba	May 3,	—	The Chambers decree the removal of Napoleon's remains from St. Helena to France†	May 12,	—
Quits Elba, and lands at Cannes	March 1,	1815			
Arrives at Fontainebleau	March 20,	—			
Joined by all the army	March 22,	—			
The allies sign a treaty for his subjugation,	March 25,	—			
He abolishes the slave-trade	March 29,	—			
Leaves Paris for the army	June 12,	—			
Is defeated at Waterloo	June 18,	—			
Returns to Paris, June 20; and abdicates in favour of his infant son	June 22,	—			
Intending to embark for America, he arrives at Rochefort	July 3,	—			

* He fired an infernal machine as the king rode along the lines of the National Guard, on the Boulevard du Temple, accompanied by his three sons and suite. The machine consisted of twenty-five barrels, charged with various species of missiles, and lighted simultaneously by a train of gunpowder. The king and his sons escaped; but marshal Mortier, duke of Treviso, was shot dead, many officers were dangerously wounded, and upwards of forty persons killed or injured.

† By the permission of the British government, these were taken from the tomb at St. Helena, and embarked on the 16th of October, 1840, on board the *Belle Poule* French frigate, under the command of the prince de Joinville; the vessel reached Cherbourg on November 30th; and on December 15th the body was deposited in the *Hôtel des Invalides*. The ceremony was witnessed by 1,000,000 of persons; 150,000

		Emperor's address to the Austrian ambassador. (see <i>Austria</i>)	Jan. 4, 1859

* The subscriptions at London to relieve the sufferers amounted to 43,000l. Sir Jamsotjee Jejeebhoy, of Bombay, gave 500l. for the same purpose.

† Felix Orsini, a man of talent and energy, intensely devoted to endeavouring to obtain Italian independence, was born Dec. 1819; studied at Bologna in 1837; joined a secret society in 1843; was arrested and condemned to the galleys for life in 1844; was released in 1845, took part in the Roman revolution in 1848, when he was elected a member of the assembly; and on the fall of the republic, fled to Genoa in 1849, and came to England in 1852. Entering into fresh conspiracies, he was arrested in Hungary, Jan. 1855, and sent to Mantua; he escaped thence and came to England in 1856, where he associated with Kossuth, Mazzini, &c.; delivered lectures, and where he devised the plot for which he suffered. In his will he acknowledged the justice of his sentence.

‡ In Oct. 1858, the comte published a pamphlet entitled "*Un Débat sur l'Inde*," in which he eulogised English institutions and depreciated those of France. He was condemned and sentenced to six months' imprisonment and a fine of 3000 francs, but was pardoned by the emperor, Dec. 2. The comte appealed against the sentence of the court, and was again condemned; but acquitted of a part of the charge. The sentence was once more remitted by the emperor (Dec. 21). In Oct. 1859 the comte published a pamphlet entitled "*Pie IX. et la France en 1849 et 1859*," in which England is severely censured for opposition to popery.

* The marriage took place in America, on Dec. 24, 1863; but was annulled, and Jerome married the princess Catherine of Wurtemberg, Aug. 12, 1867; their children are the prince Napoleon and the princess Mathilde (see p. 291).

FRANCE, continued.

KINGS OF FRANCE.

MEROVINGIAN RACE.

418. Pharamond.
 428. Clodion, the Hairy; his supposed son.
 438. Meroveus, or Mérovée, son-in-law of Clodion.
 458. Childeric, son of Mérovée.
 481. Clovis the Great, his son, and the real founder of the monarchy. *Hénauld*. He left four sons, who divided the empire:
 521. Childobert; Paris.
 — Clodomir; Orleans.
 — Thierry; Metz; and
 — Clotaire; Soissons.
 534. Theodebert; Metz.
 548. Theodebald, succeeded in Metz.
 558. Clotaire; now sole ruler of France. Upon his death the kingdom was again divided between his four sons: viz.
 561. Charibert, ruled at Paris.
 — Gontram, in Orleans and Burgundy.
 — Sigebert at Metz, and
 — Chilperic at Soissons } both assassinated.
 575. Childobert II.
 584. Clotaire II.; Soissons.
 595. Thierry II., son of Childobert; in Orleans.
 — Theodebert II.; Metz.
 612. Clotaire II.; became sole king.
 628. Dagobert the Great, son of Clotaire II.: he divided the kingdom, of which he had become sole monarch, between his two sons:—
 638. Clovis II., has Burgundy and Neustria.
 — Sigobert II. has Austrasia.
 656. Clotaire III., son of Clovis II.
 670. Childeric II.: he became king of the whole realm of France: assassinated with his queen, and his son Dagobert, in the forest of Lavri. *Hénauld*.
 [At this time Thierry III. rules in Burgundy and Neustria, and Dagobert II. son of Sigebert, in Austrasia. Dagobert is assassinated, and Thierry reigns alone. *Hénauld*.]
 691. Clovis III. Pepin, mayor of the palace, rules the kingdom in the name of this sovereign, who is succeeded by his brother.
 695. Childobert III., surnamed the Just: in this reign Pepin also exercises the royal power.
 711. Dagobert III. son of Childobert.
 716. Chilperic II. (Daniel): he is governed, and at length deposed, by Charles Martel, mayor of the palace, whose sway is now unbounded.
 719. Clotaire IV., of obscure origin, raised by Charles Martel to the throne; dies soon after, and Chilperic is recalled from Aquitaine, whither he had fled for refuge. *Hénauld*.
 720. Chilperic II., restored: he shortly afterwards dies at Noyon, and is succeeded by
 — Thierry IV., son of Dagobert III., surnamed *de Chelles*: died in 737. Charles Martel now rules under the new title of "duke of the French." *Hénauld*.
 737. Interregnum, till the death of Charles Martel, in 741: and until
 742. Childeric III., son of Chilperic II., surnamed the Stupid. Carloman and Pepin, the sons of Charles Martel, share the government of the kingdom in this reign.

THE CARLOVINGIANS.

752. Pepin the Short, son of Charles Martel: he is succeeded by his two sons,

768. Charlemagne and Carloman: the former, surnamed the Great, crowned EMPEROR OF THE WEST, by Leo III. in 800. Carloman reigned but three years.
 814. Louis I. *le Débonnaire*, EMPEROR: dethroned, but restored to his dominions.
 840. Charles, surnamed the Bald, KING; EMPEROR in 875: poisoned by Zedechas, a Jewish physician.
 877. Louis II., the Stammerer, son of Charles the Bald, KING.
 879. Louis III. and Carloman II.: the former died in 882; and Carloman reigned alone.
 884. Charles III. *le Gros*: a usurper, in prejudice to Charles the Simple.
 887. Eudes, or Hugh, count of Paris.
 898. Charles III. (or IV.), the Simple; deposed, and died in prison in 929: he had married Edgiva, daughter of Edward the Elder, of England, by whom he had a son, who was afterwards king.
 922. Robert, brother of Eudes: crowned at Rheims; but Charles marched an army against him, and killed him in battle. *Hénauld*.
 923. Rudolf, duke of Burgundy: elected king: but he was never acknowledged by the southern provinces. *Hénauld*.
 936. Louis IV. *d'Outremer*, or Transmarine (from having been conveyed by his mother into England), son of Charles III. (or IV.) and Edgiva: died by a fall from his horse.
 954. Lothaire, his son: he had reigned jointly with his father from 952, and succeeded him, at 15 years of age, under the protection of Hugh the Great: poisoned.
 986. Louis V., the Indolent, son of Lothaire: also poisoned, it is supposed by his queen, Blanche. In this prince ended the race of Charlemagne.

THE CAPETS.

987. Hugh Capet, the Great, count of Paris, &c., eldest son of Hugh the Abbot: he seizes the crown, in prejudice to Charles of Lorraine, uncle of Louis Transmarine. From him this race of kings is called Capetings, and Capetians.
 996. Robert II., surnamed the Sage, son of Hugh: died lamented.
 1031. Henry I. son of Robert.
 1060. Philip I. the Fair, and *l'Amoureux*; succeeded at eight years of age, and ruled at fourteen.
 1108. Louis VI., surnamed the Just, or *le Gros*.
 1137. Louis VII., his son, surnamed the Young, to distinguish him from his father, with whom he was for some years associated on the throne.
 1180. Philip II. (Augustus); succeeds to the crown at fifteen; crowned at Rheims in his father's lifetime.
 1223. Louis VIII., *Cœur de Lion*, son of Philip.
 1226. Louis IX., called St. Louis; ascended the throne at fifteen under the guardianship of his mother, who was also regent; died in his camp before Tunis, and was canonised.
 1270. Philip III., the Hardy, son of Louis IX.: died at Perpignan.
 1285. Philip IV., the Fair: ascended the throne in his 17th year.
 1314. Louis X., surnamed *Hutin*, an old French word, signifying headstrong, or mutinous. *Hénauld*.

* This great prince wore only a plain doublet in winter, made of an otter's skin, a woollen tunic, fringed with silk, and a blue coat or casock: his hose consisted of transverse bands or filets of different colours. He would march with the greatest rapidity from the Pyrenean mountains into Germany, and from Germany into Italy. The whole world echoed his name. He was the tallest and the strongest man of his time. In this respect he resembled the heroes of fabulous story; but he differed from them, as he thought that force was of use alone to conquer, and that laws were necessary to govern. Accordingly, he enacted several laws after the form observed in those days, that is, in mixed assemblies, composed of a number of bishops and the principal lords of the nation. *Eginhart*.

FRANCE, *continued.*

- 1316 John, a posthumous son of Louis X.: lived a few days only.
 — Philip V. the Long (on account of his stature): brother of Louis X.
 1322. Charles IV., the Handsome: this king and Louis X., John, and Philip V., were kings of Navarre.

HOUSE OF VALOIS.

1328. Philip VI., de Valois, grandson of Philip the Hardy (called the Fortunate).
 1350. John II., the Good: died suddenly in the Savoy in London.
 1364. Charles V., surnamed the Wise.
 1380. Charles VI., the Beloved.
 1422. Charles VII., the Victorious.
 1461. Louis XI.: able but cruel.
 1483. Charles VIII., the Affable.
 1498. Louis XII., *duke of Orleans*, surnamed the Father of his People.
 1515. Francis I. of *Angoulême*: called the Father of Letters.
 1547. Henry II.: died of a wound received at a tournament, when celebrating the nuptials of his sister with the duke of Savoy, accidentally inflicted by the comte de Montmorency.
 1559. Francis II.: married Mary Stuart, afterwards Queen of Scots: died next year.
 1560. Charles IX.: Catherine of Medicis, his mother, obtained the regency.
 1574. Henry III.: elected king of Poland; last of the house of Valois, murdered, Aug. 1, 1589, by Jacques Clement, a Dominican Friar.

HOUSE OF BOURBON.

1589. Henry IV., the Great, of Bourbon, king of Navarre: murdered by Francis Ravaillac.
 1610. Louis XIII., the Just, son of the preceding.
 1643. Louis XIV., the Great, also styled *Dieuxonné*.
 1715. Louis XV., the Well-beloved; his great grandson.
 1774. Louis XVI., his grandson; ascended the throne in his 20th year; married the archduchess Marie-Antoinette, of Austria, in May, 1770. Dethroned, July 14, 1789; guillotined, Jan. 21, 1793; and his queen, Oct. 16 following.
 1793. Louis XVII., son of Louis XVI. Though numbered with the kings, this prince never

reigned: he died in prison, supposed by poison, June 8, 1795, aged 10 years 2 months.

THE REPUBLIC.

1792. The NATIONAL CONVENTION (750 members,) first sitting, Sept. 21.
 1795. The DIRECTORY (Lareveillière Lépaulx, Letourneur, Rewbell, Barras, and Carnot) nominated Nov. 1; abolished, and Bonaparte, Ducos, and Siéyès appointed an executive commission, Nov. 1799.
 1799. The CONSULATE. Napoleon Bonaparte, Cambacérès, and Lebrun appointed consuls, Dec. 24. Napoleon appointed consul for ten years, May 6, 1802; for life, Aug. 2, 1802.

FRENCH EMPIRE.†

1804. Napoleon (Bonaparte) I., born Aug. 15, 1769. He married, first, Josephine, widow of Alexis, vicomte de Beauharnais, March 8, 1796 (who was divorced Dec. 16, 1809, and died May 29, 1814); 2nd, Maria-Louisa of Austria, April 2, 1810 (she died Dec. 17, 1847). He renounced the thrones of France and Italy, and accepted the Isle of Elba for his retreat, April 5, 1814.
 1815. Napoleon again appears in France, March 1. He is defeated at Waterloo: and finally abdicates in favour of his infant son, June 22. Banished to St. Helena, where he dies, May 5, 1821. (See note, p. 285).

BOURBONS RESTORED.

1814. Louis XVIII. (*comte de Provence*), next brother of Louis XVI., born Nov. 17, 1755; married Marie-Josephine-Louise of Savoy. Entered Paris, and took possession of the throne, May 3, 1814; obliged to flee, March 20, 1815; returned July 3, same year: died Sept. 16, 1824, leaving no issue.
 1824. Charles X. (*comte d'Artois*), his brother: born Oct. 9, 1757; married Marie-Thérèse of Savoy; deposed July 30, 1830. He resided in Britain till 1832, and died at Gratz, in Hungary, Nov. 6, 1836.
Heir: Henry, duc de Bordeaux, called comte de Chambord, son of the duc de Berry, born Sept. 29, 1820.

* On Monday, the 21st of January, 1793, at eight o'clock in the morning, this unfortunate monarch was summoned to his fate. He ascended the scaffold with a firm air and step; and raising his voice, he said, "Frenchmen, I die innocent of the offences imputed to me. I pardon all my enemies, and I implore of Heaven that my beloved France —;" At this instant the inhuman Santerre ordered the drums to beat, and the executioners to perform their office. When the guillotine descended, the priest exclaimed, "Son of St. Louis! ascend to Heaven." The bleeding head was then held up, and a few of the populace shouted "*Vive la République!*" The body was interred in a grave that was immediately afterwards filled up with quick lime, and a strong guard was placed around until it should be consumed. *Hist. French Revolution.*

† THE BONAPARTE FAMILY.

[The name appears at Florence and Genoa in the 13th century: in the 15th a branch settles in Corsica.]
 CHARLES BONAPARTE, born March 29, 1746, died Feb. 24, 1785. He married in 1767, Letitia Ramolina (born Aug. 24, 1750, died Feb. 1836): ISSUE,
 JOSEPH, born Jan. 7, 1768, made king of Two Sicilies, 1805; of Naples alone, 1806; of Spain, 1808; resides in United States, 1815; comes to England, 1832; settles in Italy, 1841; dies at Florence, July 28, 1844.
 NAPOLEON I., emperor, born Aug. 15, 1769 (see above).
 LUCIEN, prince of Canino, born 1775: at first aided his brother Napoleon, but opposed his progress towards universal monarchy. He was taken by the English on his way to America, and resided in England till 1814. He died at Viterbo, June 30, 1840. His son Charles (born 1803, died 1857) was an eminent naturalist.
 LOUIS, born Sept. 3, 1778; made king of Holland, 1806; died July 15, 1846. By his marriage with Hortense Beauharnais (daughter of the empress

Josephine), in 1802, he had three sons: Napoleon Louis (born 1803; died 1807); Louis Napoleon (born 1804, died 1831); and

CHARLES-LOUIS-NAPOLEON, born April 20, 1808; attempted a revolt at Strasbourg, Oct. 30, 1836; sent to America, Nov. 13, 1836; repairs to London, Oct. 14, 1838; lands at Boulogne with fifty followers, Aug. 6, 1840; condemned to imprisonment for life, Oct. 6, 1840; escapes from Ham, May 25, 1846; arrives at Boulogne, March 2, 1848; elected deputy, June 8; and takes his seat, Aug. 27; elected emperor as Napoleon III., Dec. 2, 1852.

JEROME, born Nov. 15, 1784; king of Westphalia, Dec. 1, 1807-1814: made governor of the Invalides, 1848; and marshal, 1850; died, June 24, 1860; his children are

NAPOLEON, born Sept. 9, 1822, married princess Clotilde of Savoy, Jan. 30, 1859; ISSUE,
 Napoleon-Victor-Jerome, born July 18, 1862.
 MATHILDE, born May 27, 1820; married to prince A. Demidoff in 1841.

FRANCE, *continued.*

HOUSE OF ORLEANS. (See *Orleans*.)
 1830. Louis-Philippe, son of the celebrated duke of Orleans, called *Égalité*; born Oct. 6, 1773; married Nov. 25, 1809, Maria-Amelia, daughter of Ferdinand I. (IV.) king of the Two Sicilies. Raised to the throne as king of the French, Aug. 9, 1830; deposed Feb. 24, 1848. Died in exile, in England, Aug. 26, 1850.
Heir: his grandson, Louis-Philippe, comte de Paris, born Aug. 24, 1838.

NEW REPUBLIC.

1848. The revolution commenced in a popular insurrection at Paris, Feb. 22, 1848. The royal family escaped by flight to England, a provisional government was established, monarchy abolished, and France declared a republic.
 — Charles-Louis-Napoleon Bonaparte, declared by the National Assembly (Dec. 20) *PRESIDENT* of the republic of France; and proclaimed next day, Dec. 20; elected for ten years, Jan. 15, 1852.

FRENCH EMPIRE REVIVED.

[1821. Napoleon II. * (Napoleon-Joseph), son of Napoleon I. and Maria-Louisa, archduchess of Austria; born March 20, 1811; created king of Rome. On the abdication of his father, he was made duke of Reichstadt, in Austria; and died at the palace of Schoenbrunn, July 22, 1832, aged 21.]
 1852. Napoleon (Charles-Louis) III., Dec. 2 (formerly president), the *PRESENT* (1862) emperor of the French. (See note, p. 291).
Empress: Eugénie-Marie (a Spaniard, formerly countess of Téba), born May 5, 1826; married Jan. 29, 1853.
Heir: Napoleon-Eugène-Louis-Jean-Joseph, born March 16, 1856.
 [On Dec. 18, 1852, the succession, in default of issue from the emperor, was determined in favour of prince Jérôme-Napoleon and his heirs male.]

FRANCE, *ISLE OF.* See *Mauritius*.

FRANCHE COMTÉ, successively part of the kingdom and duchy of Burgundy and the kingdom of France, was given to Philip II. of Spain as the dowry of Isabella of France, whom he married in 1559. It was conquered and retained by Louis XIV. in 1674.

FRANCHISE. A privilege or exemption from ordinary jurisdiction; and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as they were formerly in England. See *Sanctuaries*. In 1429 the *ELECTIVE FRANCHISE* for counties was restricted to persons having at least 40s. a-year in land, and resident.

FRANCIS' ASSAULT ON THE QUEEN. John Francis, a youth, fired a pistol at queen Victoria, as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, May 30, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, June 17 following, but was afterwards transported for life.

FRANCISCANS. An order of Roman Catholic friars, called also Grey friars, founded by Francis de Assisi, about 1209, or, according to some authorities, about 1220. Their rules were chastity, poverty, obedience, and very austere regimen. In 1226 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses, A.D. 1536-38. Most of their communities lived on alms.

FRANKFORT-ON-THE-MAIN (Central Germany). Many ages a free city; it was taken and retaken several times during the French wars, and held by Bonaparte from 1803 to 1813, when its independence was guaranteed by the allied sovereigns.

The diet of the princes of Germany established here by the Rhenish confederation 1806
 Appointed capital of the Germanic confederation 1815
 The Frankfort diet publish a federative constitution March 30, 1848

The plenipotentiaries of Austria, Bavaria, Saxony, Hanover, Wurtemberg, Mecklenburg, &c., here constitute themselves the council of the Germanic diet Sept. 1, 1850
 Population in 1859, 67,975. See *Germany*.

FRANKFORT-ON-THE-ODER (N. Germany); a member of the Hanseatic league, suffered much from marauders in the middle ages, and in the thirty years' war. The university was founded in 1506, and incorporated with that of Breslau in 1811. Near Frankfort, on Aug. 12, 1759, Frederick of Prussia was defeated by the Russians and Austrians. See *Cunnersdorf*.

FRANKING LETTERS. The privilege of letters passing free of postage was claimed by parliament (almost from the first institution of the post-office), 1660. The privilege was restricted in 1837, and abolished on the introduction of the uniform penny postage, Jan. 10, 1840. The queen was among the first to relinquish her privilege.

FRANKLIN, the English freeholder in the middle ages. See "The Franklin's Tale," in Chaucer's *Canterbury Tales* (written about 1364).

* Decreed to be so termed by the present emperor on his accession.

FRANKLIN'S ARCTIC EXPEDITION. Sir John Franklin, with captains Crozier and Fitzjames, in H.M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on an arctic expedition of discovery and survey, from Greenhithe, on May 24, 1845. Their last despatches were from the Whalefish islands, dated July 12, 1845. Their protracted absence caused intense anxiety throughout Europe, and numerous expeditions were sent from England and elsewhere in search of them to various parts of the polar regions. Quantities of coals, provisions, clothing, and other comforts, were deposited in such places in the Arctic seas as the crews of the *Erebus* and *Terror* discovery ships might visit, so as to afford them immediate relief, by our own and by the American government, by lady Franklin, and numerous private persons. The *True Love*, captain Parker, which arrived at Hull, Oct. 4, 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships as late as the previous March, beset or frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her Majesty's government, on March 7, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny. (Nos. 5 & 6, p. 294.) In 1853, eight years had elapsed since the receipt of any authentic intelligence of Franklin and his companions, and anxiety was beginning to be felt respecting the state of the expeditions under captain Collinson and sir E. Belcher (see Nos. 4 & 11, p. 294). In October, captain Inglefield returned in the *Phoenix*, bringing despatches from sir E. Belcher, &c. The *Investigator*, and sir E. Belcher's squadron, were safe; but no traces of Franklin's party had been met with. Lieutenant Bellet* was unfortunately drowned in August while voluntarily conveying despatches to sir E. Belcher. Captain M'Clure had left the *Herald* (10) at Cape Lisburne, July 31, 1850. On Oct. 8, the ship was frozen in, and so continued for nine months. On Oct. 26, 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. passage. In Sept. 1851, the ship was again fixed in ice, and so remained till lieutenant Pim and a party from captain Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown. In the spring of 1853, Dr. Rae again proceeded towards the magnetic pole, and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party, namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal, and that four months later, in the same season, they had found the bodies of thirty men (some buried) who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish River of Back. Dr. Rae arrived in England on Oct. 22, 1854, with the melancholy relics, which have since been deposited in Greenwich Hospital.† After mature deliberation, in April, 1854, sir E. Belcher determined to abandon his ships, and gave orders to that effect to all the captains under his command; and captain Kellett gave similar orders to captain M'Clure of the *Investigator*. The vessels had been abandoned in June‡ when the crews of the *Phoenix* and *Talbot* (under captain Inglefield) arrived (19). On their return to England the captains were all tried by court-martial and honourably acquitted, Oct. 17-19, 1854. The fate of captain Collinson in the *Enterprise* (4) was still uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence in Aug. 21, 1854, and had sailed immediately in hopes of getting up with captain Maguire in the *Plover* (1), which had sailed two days previously. Captain Collinson having failed in getting through the ice in 1850 with captain M'Clure, returned to Hong Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in May 1855. All appear to have nobly and ably performed their allotted work in the above expeditions; and the loss of life has been exceedingly small. The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June, 1855, which returned Sept. following. Some more

* A monument has been erected to his memory at Greenwich. His journal was published in 1854.

† Dr. Rae and his companions received 10,000*l.* for discovering these remains, as the first clue.

‡ Captain Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to captain H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton, Dec. 12, 1856; was visited by her Majesty on the 16th, and formally surrendered on the 30th.

remains of Franklin's party were found. During the last expedition, captain M'Clintock's (see 21, below), on May 6, 1859, lieutenant Hobson found at Point Victory, near Cape Victoria, beside a cairn, a tin-case, containing a paper, signed April 25, 1848, by captain Fitzjames, which certified that the ships *Erebus* and *Terror*, on Sept. 12, 1846, were beset in lat. $70^{\circ} 05' N.$, and long. $98^{\circ} 23' W.$; that sir John Franklin died June 11, 1847; and that the ships were deserted April 22, 1848. Captain (since sir Leopold) M'Clintock continued the search, and discovered skeletons and other relics. His journal was published in Dec. 1859; and on May 28, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.

SEARCH FOR SIR JOHN FRANKLIN.

1. H.M.S. *Plover*, capt. Moore (afterwards under capt. Maguire), sailed from Sheerness to Behring's Straits, in search . . . Jan. 1, 1848
2. Land expedition under sir John Richardson and Dr. Rae, of the Hudson's Bay Company, left England . . . March 25, —
[Sir John Richardson returned to England in 1849, and Dr. Rae continued his search till 1851.]
3. Sir James Ross, with the *Enterprise* and *Investigator* (June 12, 1848), having also sailed in search to Barrow's Straits, returned to England (Scarborough) . . . Nov. 3, 1849
4. The *Enterprise*, capt. Collinson, and *Investigator*, commander M'Clure, sailed from Plymouth for Behring's Straits . . . Jan. 20, 1850
[Both of these ships proceeded through to the westward.]
5. Capt. Austin's expedition, viz.: *Resolute*, capt. Austin, C.B.; *Assistance*, capt. Ommanney; *Intrepid*, lieutenant Bertie Cator, and *Pioneer*, lieutenant Sherard Osborn, sailed from England for Barrow's Straits . . . April 25, —
[Returned Sept. 1851.]
6. The *Lady Franklin*, capt. Penny; and *Sophia*, capt. Stewart, sailed from Aberdeen for Barrow's Straits . . . April 13, —
[Returned home Sept. 1851.]
7. The AMERICAN expedition in the *Advance* and *Rescue*, under lieutenant De Haven and Dr. Kane (son of the judge), towards which Mr. Grinnell subscribed 30,000 dollars, sailed for Lancaster Sound and Barrow's Straits; after drifting in the pack down Baffin's Bay, the ships were released in 1852 uninjured, May 25, —
8. The *Eliz*, sir John Ross, fitted out chiefly by the Hudson Bay Company, sailed to the same locality . . . May 22, —
[Returned in 1851.]
9. H.M.S. *North Star*, commander Saunders, which had sailed from England in 1849, wintered in Wolstenholme Sound, and returned to Spithead . . . Sept. 28, —
10. H.M.S. *Herald*, capt. Kellett, C.B., which had sailed in 1848, made three voyages to Behring's Straits, and returned in . . . 1852
Lieut. Pim went to St. Petersburg with the intention of travelling through Siberia to the mouth of the river Kolyma; but was dissuaded from proceeding by the Russian government . . . Nov. 18, —
[The *Enterprise* and *Investigator* (see No. 4 above) not having been heard of for two years.]
11. Sir Edward Belcher's expedition, consisting of—*Assistance*, sir Edward Belcher, C.B.; *Resolute*, capt. Kellett, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. M'Clintock; and *Pioneer*, capt. Sherard Osborn, sailed from Woolwich . . . April 15, 1852

[This expedition had arrived at Beechy Island, Aug. 14, 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS.

- Lady Franklin, from her own resources, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four separate private expeditions:
12. The *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow's Straits . . . June 5, 1850
[Returned Oct. 1, 1850.]
 13. The *Prince Albert*, Mr. Kennedy, accompanied by lieutenant Bellot of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet . . . June 4, 1851
[Returned Oct. 1852.]
 14. The *Isabel*, commander Inglefield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, July 6, and returned . . . Nov. 1852
 15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits . . . 1853
 16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April, met with it . . . Aug. —
 17. The second AMERICAN expedition, the *Advance*, under Dr. Kane, early in . . . June —
 18. The *Phoenix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieutenant Bellot, sailed in May, and returned in . . . Oct. —
 19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in . . . Oct. 1854
 20. The third AMERICAN expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Eringo*, and another vessel under the command of lieutenant H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon, May 31, 1855
[On May 17, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement: on their way home in a Danish vessel, they fell in with lieutenant Hartstene, Sept. 18: and arrived with him at New York, Oct. 11, 1855. Dr. Kane visited England in 1856. He died in 1857.]
 21. The eighteenth British expedition (equipped by Lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir) F. B. M'Clintock, R.N. (see No. 11), sailed from Aberdeen, July 1, 1857; returned . . . Sept. 22, 1859

FRANKS, signifying the free,—tribes which came from the N.W. Germany, first known about A.D. 240. See *France*.

FRATRICELEI (Little Brethren), a sect of the middle ages, founded originally by Franciscan monks of the stricter sort. Having been censured by the pope, they seceded; and their numbers increased. They were condemned by a papal bull in 1317; and suffered

persecution ; but were not extinct till the 16th century. They resembled the "Brethren of the Free Spirit."

FRAUDULENT TRUSTEES ACT, 20 & 21 Vict. c. 54, was passed in 1857, in consequence of the delinquencies of sir John D. Paul, the British Bank frauds, &c. It was brought in by sir R. Bethell, attorney-general, and is very stringent.

FRAUNHOFER'S LINES. See *Spectrum*.

FREDERICKSHALD (Norway), memorable by Charles XII. of Sweden being killed by a cannon-shot before its walls, while examining the works. He was found with his hand upon his sword, and a prayer-book in his pocket, Dec. 11, 1718.

FREE CHURCH (of Scotland *) was formed by an act of secession of nearly half the body from the national church of Scotland, May 18, 1843. The difference arose on the question of the right of patrons, who claim the right of intruding their own nominees into the livings. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been received by subscription. In 1853 there were 850 congregations. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.*, from which was paid the sum of 138*l.* each to 700 ministers.

FREEHOLDERS. Those under forty shillings per annum were not qualified to vote for members of parliament by 8 Hen. VI. c. 7, 1429. Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV. 1828 ; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege, passed April 13, 1829 ; Reform Bill, 2 & 3 Will. IV. 1832. County elections act, 7 Will. IV. 1836. See *Chandos Clause*.

FREE TRADE principles triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Since 1846 the exports have been tripled.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." Masonry is traced by some to the building of Solomon's temple ; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the sixth century, as a protection against Christian fanatics. Its introduction into these realms has been fixed at the year A.D. 674 ; by others it is assigned an earlier date. It has been said that many of our Gothic cathedrals were built by freemasons ; but the term had a different meaning in those days. The grand lodge at York was founded 926. Freemasonry was interdicted in England, 1424 ; but it afterwards rose into great repute. In 1717, the grand lodge of England was established ; that of Ireland was established in 1730 ; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738. The Freemasons' hall, London, was built 1775 ; the charity was instituted 1788.

FRENCH LANGUAGE is mainly based on the rude Latin which prevailed in the nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the ninth the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française, established by Richelieu in 1634, published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I. 1066. Law pleadings were changed from French to English in the reign of Edward III. 1362. *Stow*.

* The Rev. H. Hampton, one of the curates of Islington, having been dismissed, a part of his congregation erected a temporary church. The bishop of London after inquiry refused to license it. On this the congregation declared itself to be the *Free Church of England*. Eventually, he left the neighbourhood, and re-entered the establishment. The building has since been licensed on behalf of the Church of England.

FRENCH REVOLUTIONARY CALENDAR. In the year 1792, the French nation adopted a new calendar, professedly founded on philosophical principles; but they merely changed the minor details, and commenced the year at a different period. The first year of the era of the republic began on Sept. 22, 1792; but its establishment was not decreed until the 4th Frimaire of the year II., Nov. 24, 1793. The calendar existed until the 10th Nivose, year of the republic XIV., Dec. 31, 1805, when the Gregorian mode of calculation was restored by Napoleon.

AUTUMN.			SPRING.		
Vendemiaire . . .	Vintage month	Sept. 22 to Oct. 21.	Germinal . . .	Sprouts' month	Mar. 21 to April 19.
Brunaire . . .	Fog month	Oct. 22 to Nov. 20.	Floréal . . .	Flowers' month	April 20 to May 19.
Frimaire . . .	Sleet month	Nov. 21 to Dec. 20.	Prairial . . .	Pasture month	May 20 to June 18.
WINTER.			SUMMER.		
Nivose . . .	Snow month	Dec. 21 to Jan. 19.	Messidor . . .	Harvest month	June 19 to July 18.
Pluviose . . .	Rain month	Jan. 20 to Feb. 18.	Fervidor . . .	Hot month	July 19 to Aug. 17.
Ventose . . .	Wind month	Feb. 19 to Mar. 20.	Fructidor . . .	Fruit month	Aug 18 to Sept. 16.

SANSULOTTIDES, OR FEASTS DEDICATED TO

Le Travail . . .	Labour . . .	Sept. 19.			

FRENCHTOWN (Canada), was taken from the British by the American general Winchester, Jan. 22, 1813, during the second war with the United States of America. It was retaken by the British forces under general Proctor, immediately afterwards, and the American commander and troops were made prisoners.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt and Italy, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated. See *Stereochromy*.

FRIDAY, the sixth day of the week; so called from Friga, the Scandinavian Venus. She was the wife of Thor, and goddess of peace, fertility, and riches; and with Thor and Odin, composed the supreme council of the gods. See *Good Friday*.

FRIEDLAND (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon in person, on June 14, 1807. The allies lost eighty pieces of cannon and about 18,000 men; the French about 10,000 men. This battle led to the peace of Tilsit, by which Russia lost no territory, but Prussia was obliged to surrender nearly half her dominions.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1642; and visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who gave them their present name on account of the friendly disposition of the natives, 1773. Subsequent voyagers describe them as capable of the most ferocious conduct.

FRIENDLY SOCIETIES. These useful institutions originated in the clubs of the industrious classes about 1793. Since they sprang into importance they have been regulated and protected by various legislative enactments. In 1850 preceding acts were consolidated, and other acts have since passed (the latest in 1860). They have now, with other similar institutions, more than twenty millions sterling in the public funds. They are now regulated by acts passed in 1855 and 1858.

FRIENDS. See *Quakers*. **FRIENDS OF THE PEOPLE** associated to obtain parliamentary Reform, 1792.

FRIESLAND: East (N. Germany), formerly governed by its own counts. On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in

1806, and afterwards to the French empire : but was awarded to Hanover in 1814. The English language is said to be mainly derived from the old Frisian dialect.—FRIESLAND, West, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (sometimes, though rarely, written *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FROBISHER'S STRAITS, named from its discoverer, sir Martin Frobisher, the first Englishman who tried to find a north-west passage to China in 1576, and after exploring the coast of New Greenland, entered this strait. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. The delusion led to a third expedition ; but all of them proved fruitless. He was killed at the taking of Brest in 1594.

FRONDE, CIVIL WARS OF THE, in France, in the minority of Louis XIV. (1648-53), during the government of the queen Anne of Austria and cardinal Mazarine, between the followers of the court and the nobility, and the parliament and the citizens. The latter were called *Frondeurs* (*stingers*), it is said, from an incident in a street quarrel. In a riot on Aug. 27, 1648, barricades were erected in Paris.

FROSTS. The following are some of the most remarkable :—

The Euxine Sea frozen over for 20 days . . . A.D.	401	his whole army, horse and foot, with large trains of artillery and baggage . . .	1658
A frost at Constantinople, when the two seas there were frozen a hundred miles from the shore . . . Oct. 763—Feb.	764	The forest trees, and even the oaks in England, split by the frost; most of the hollies were killed; the Thames was covered with ice eleven inches thick; and nearly all the birds perished *	1684
A frost in England on Midsummer-day is said to have destroyed the fruits of the earth . . .	1035	The wolves, driven by the cold, entered Vienna, and attacked the cattle, and even men . . .	1691
Thames frozen for 14 weeks . . .	1063	Three months' frost, with heavy snow, from December to March, 8 Anne . . .	1709
Dreadful frosts in England from Nov. to April, The Catagat entirely frozen . . .	1076	A fair held on the Thames, and oxen roasted; this frost continued from Nov. 24 to Feb. 9 . . .	1716
Baltic passable to travellers for six weeks . . .	1323	One which lasted 9 weeks, when coaches piled upon the Thames, and festivities and diversions of all kinds were enjoyed upon the ice. This season was called the "hard winter" . . .	1740
The Baltic frozen from Pomerania to Denmark, In England, when all the small birds perished, The ice bore riding upon it from Lübeck to Prussia . . .	1402	From Dec. 25 to Jan. 16, and from Jan. 18 to 22; most terrible in its effect . . .	1766
Severe frost, when the large fowl of the air sought shelter in the towns of Germany . . .	1426	One general throughout Europe. The Thames was passable opposite the Custom House, from Nov. to Jan. . . .	1789
The river frozen below London bridge to Gravesend, from Nov. 24 to Feb. 10 . . .	1433	One from Dec. 24, 1794, to Feb. 14, 1795, with the intermission of one day's thaw . . .	1795
The Baltic frozen, and horse passengers crossed from Denmark to Sweden . . .	1434	Intense frosts all December . . .	1796
The winter so severe in Flanders that the wine distributed was cut by hatchets . . .	1460	Severe frost in Russia † . . .	1812
Carriages passed over from Lambeth to Westminster . . .	1468	Booths erected on the Thames; the winter very severe in Ireland . . .	1814
Wine in Flanders frozen into solid lumps . . .	1515	The frost so intense in parts of Norway, that quicksilver freezes, and persons exposed to the atmosphere lose their breath . . .	1849
Sledges drawn by oxen travelled on the sea from Rostock to Denmark . . .	1544	Very severe frost in London, Jan. 14 to Feb. 24; and very cold weather up to June 26 † . . .	1855
The Scheldt frozen so hard as to sustain loaded waggons . . .	1548	Very severe frost from Dec. 20, 1860, to Jan. 5, 1861. ‡ See <i>Cold</i> .	
The Rhine, Scheldt, and Venice frozen . . .	1565		
Fires and diversions on the Thames . . .	1594		
The rivers of Europe and the Zuyder Zee frozen; ice covers the Hellespont . . .	1607		
Charles X. of Sweden crossed the Little-Belt over the ice from Holstein to Denmark, with	1622		

FROST'S INSURRECTION. See *Newport*.

FRUITS. Several varieties of fruit are mentioned as having been introduced into Italy, 70 B.C. *et seq.* Exotic fruits and flowers of various kinds, previously unknown in England, were brought thither between the years 1500 and 1578. See *Gardening and Flowers*.

* "The frost this year was terrible. It began in the beginning of December, 1683. The people kept trades on the Thames as in a fair, till February 4, 1684. About forty coaches daily plied on the Thames as on drye land. Bought this book at a shop upon the ice in the middle of the Thames."—*Entry in the memoranda of a Citizen*.

† The frost in Russia in 1812 surpassed in intenseness that of any winter in that country for many preceding years, and was very destructive to the French army in its retreat from Moscow, at the close of that memorable year. Napoleon commenced his retreat on the 9th November, when the frost covered the ground, and the men perished in battalions, and the horses fell by hundreds on the roads. What with the loss in battle, and the effects of this awful and calamitous frost, France lost in the campaign of this year more than 400,000 men.

‡ On February 22, fires were made on the Serpentine, Hyde Park. A traffic on the ice of 35 miles long, was established in Lincolnshire.—During the frost of 1860-1, bonfires were lit on the Serpentine, dancing took place, fireworks were let off, &c.

FRUITS, *continued*.

Almond-tree, Barbary abt. A.D. 1548	Lime, American, before A.D. 1752	Pine-apple, Brazils . . . A.D. 1568
Apples, Syria . . . 1522	Melons, before . . . 1540	Pippins, Netherlands . . . 1525
Apple, custard, N. America . 1726	Mulberry, Italy . . . 1520	Plums, Italy . . . 1522
Apple, osage, ditto . . . 1818	Mulberry, white, China, abt. 1596	Pomegranate, Spain, before . 1548
Apricots, Epirus . . . 1540	Mulberry, the red, N. America, before . 1629	Quince, Austria . . . 1573

Grapes, Portugal . . . 1528	Pears, uncertain . . . *	
Lemons, Spain . . . 1554		
Limes, Portugal . . . 1554		

FUENTES D'ONORE (Central Spain). On May 2, 1811, Massena crossed the Agueda, with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He, however, determined to fight rather than give up the blockade of Almeida. After much fighting, night came on, and put an end to the battle. Next day, Massena was joined by Bessières with a body of the Imperial guard; and on May 5, the enemy made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

FUGGER, an illustrious German family (the present head being prince Leopold Fugger Babenhäuser), derives its origin from John Fugger, a master weaver in Augsburg in 1370; and its wealth by trade, and by money-lending to monarchs, especially the emperors.

FUGITIVE SLAVE BILL was passed by the American legislature in 1850. It imposes a fine of 1000 dollars and six months' imprisonment on any person harbouring fugitive slaves or aiding in their escape. This law was declared to be unconstitutional by the judges of the Superior Court on Feb. 3, 1855. It is carried into effect with great difficulty, and is not received by the state of Massachusetts. See *Slavery in America*.

FUMIGATION. Acron, a physician of Agrigentum, is said to have first caused great fires to be lighted, and aromatics to be thrown into them to purify the air; and thus to have stopped the plague at Athens and other places in Greece, about 473 B.C.

FUNDS. To the Venetians is ascribed the origin of the funding system, in A.D. 1171. Public funds were raised by the Medici family at Florence, in 1340. Our funding system, or the method of raising the supplies for the public service in England, by anticipations of the public revenues (the origin of the national debt), was introduced by William III. after the Revolution, 1690. *Mortimer*. The Three *per cent.* annuities were created in 1726. The Three *per cent.* consols were created in 1731. The Three *per cent.* reduced, 1746. Three *per cent.* annuities, payable at the South Sea-house, 1751. Three-and-a-half *per cent.* annuities created, 1758. Long annuities, 1761. Four *per cent.* consols, 1762. Five *per cent.* annuities, 1797 and 1802. Five *per cents.* reduced to four, 1822. Old Four *per cents.* reduced to Three-and-a-half, in 1824. Farther reductions were made in 1825, 1830, 1834, 1841, and 1844: the maximum being now Three-and-a-half *per cent.* See *Stocks and Sinking Fund*.

FUNERALS. A tax was laid on funerals in England, 1793. The Romans pronounced harangues over their dead, when eminent for rank, great deeds, and virtues. Theopompus obtained a prize for the best *funeral oration* in praise of Mausolus, 353 B.C. Popilia was the first Roman lady who had an oration pronounced at her funeral, which was done by her son, Crassus; and it is observed by Cicero that Julius Cæsar did the like for his aunt Julia and his wife Cornelia. In Greece, Solon was the first who pronounced a funeral oration, according to Herodotus, 580 B.C. David lamented over Saul and Jonathan, 1056 B.C., and over Abner, 1048 B.C. 2 *Sam.* i. & iii. Among the late instances of *public funerals*, voted by parliament as national demonstrations of respect, are the following: duke of Rutland's in Ireland, Nov. 17, 1787; Lord Nelson's, Jan. 9, 1806; Wm. Pitt's, Jan. 22, 1806; Chas. Jas. Fox's, Oct. 10, 1806; Richard Brinsley Sheridan's, July 13, 1816; George Canning's, Aug. 16, 1827; and the duke of Wellington's, Nov. 18, 1852.—*Funeral Games*, among the Greeks, were chiefly horse-races; and among the Romans, processions, and mortal

combats of gladiators around the funeral pile. These games were abolished by the emperor Claudius, A.D. 47.

FURS were worn by Henry I., about A.D. 1125. Edward III. enacted that all persons who could not spend 100*l.* a year, should be prohibited this species of finery, 1337.

G.

GABELLE (from *Gabe*, a gift), a term applied to various taxes, but afterwards restricted to the old duty upon salt, first imposed by Philip the Fair on the French in 1286. *Duruy*. Our Edward III. called Philip of Valois, who first levied the tax, the author of the *Salic* law (from *sal*, salt). The assessments were unequal, being very heavy in some provinces and light in others; owing to privileges and exemptions purchased from the sovereigns in early periods. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the Revolution; during which it was abolished (1790).

GÆLIC designates the northern branch of the Celtic languages, viz., Irish, Erse or Highland Scottish, and Manx. The Dean of Lismore's book (written 1511-51) contains ancient Gaelic poetry, specimens of which were published with translations in 1862 by Rev. T. M'Lachlan.

GAETA (the ancient Cajeta), a strongly fortified Neapolitan seaport, has undergone several remarkable sieges. It was taken by the French in 1799 and 1806, and by the Austrians in 1815 and 1821. Here the pope, Pius IX., took refuge in 1848, and resided more than a year. Here also Francis II. of Naples, with his queen and court, fled, when Garibaldi entered Naples, Sept. 7, 1860; and here he remained till the city was taken by the Sardinian general Cialdini, Feb. 13, 1861, after a severe siege, uselessly prolonged by a French fleet remaining in the harbour. Cialdini was created duke of Gaeta.

GAGGING BILL, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted in 1795, when the popular mind was much excited. In Nov. 1819, soon after the Manchester affray, a bill for restraining public meetings and cheap periodical publications was popularly called "a gagging bill." Statutes coercing popular assemblies, particularly in Ireland, have been also so designated.

GALATIA, an ancient province of Asia Minor. In the third century B.C. the Gauls under Brennus invaded Greece, crossed the Hellespont, and conquered the Troas 278; were checked by Atalua in a battle about 239; and then settled in what was called afterwards Gallogrecia and Galatia. The country was annexed to the Roman empire B.C. 25, on the death of the king Amyntas. Paul's Epistle to the Galatians was probably written A.D. 58.

GALLERIES. See *National, Louvre, and Versailles*.

GALL, ST. (in Switzerland.) The abbey was founded in the seventh century, and was surrounded by a town in the tenth. St. Gall became a canton of the Swiss Confederation in 1815.

GALLEYS. The ancient galleys, with three rows of rowers, *tri-remes*, were invented by the Corinthians, 786 B.C. *Blair*. Galleys were mentioned by most of the Roman authors. They are chiefly used, in modern times, by the states bordering on the Mediterranean. The terms "galley-slave," and "condemned to the galleys," arose from these "sea-vessels" having from 25 to 30 benches on each side, manned by four or five slaves to each bench, sentenced to this slavery as a punishment for crime. In France they had a general of galleys, of whom the baron de la Garde was the first, 1544. *Hénault*.

GALLICIA, a province, N.W. SPAIN, was conquered by D. Junius Brutus, 136 B.C., and by the Vandals, A.D. 419; and was frequently subdued by successive invaders. In 1065, on the death of Ferdinand I. king of Castile and Leon, when his dominions were divided, his son Garcia became king of Galicia. Ruling tyrannically, he was expelled by his brother Sancho; returned at his death in 1072; was again expelled by his brother Alfonso, in 1073; and died in prison in 1091. Alfonso, son of Urraca, queen of Castile, was made king of Galicia by her in 1109. He defended his mother, a dissolute woman, against her husband, Alfonso VII., and at her death, in 1126, acquired Castile, and once more re-united the kingdoms.—GALLICIA IN POLAND. East Galicia was acquired by the emperor of Germany at the partition in 1772; and West Galicia, at that of 1795. The latter was ceded to the grandduchy of Warsaw in 1809; but recovered by Austria in 1814. See *Poland*, note.

GALLIPAGOS, islands ceded to the United States by Ecuador, Nov. 3, 1854, the British, French, and other powers protesting against it.

GALLIPOLI, a seaport in Turkey in Europe, 128 miles west of Constantinople. It was taken by the Turks in 1357, and fortified by Bajazet I. The first division of the French army engaged in the Russo-Turkish war, under general Canrobert, here encamped in April and May, 1854.

GALOCHEES, *French* for overshoes, formerly of leather; but since 1843 made of vulcanised India rubber. The importation of *Galoches* was prohibited by 3 Edw. IV. c. 4 (1463).

GALVANISM AND GALVANO-PLASTICS. See under *Electricity*.

GALWAY (W. Ireland). The ancient settlers here were divided into thirteen tribes, a distinction not yet forgotten. It was taken by Richard de Burgo in 1232. In 1690 Galway declared for king James, but it was invested and taken by general Ginckel immediately after the decisive battle of Aughrim, July 12, 1691. Here is one of the new colleges, endowed by government for the advancement of learning in Ireland, pursuant to act 8 & 9 Vict. c. 66 (1845), inaugurated Oct. 30, 1849. See *Colleges*. In 1858 the sailing of mail steam packets from Galway to America begun; but the subsidy ceased in May, 1861, through the company's breach of contract, which occasioned much discussion in parliament.

GAME LAWS are a remnant of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast, and loss of eyes, for a stag, buck, or boar. The clergy protested against ameliorations of these laws, under Henry III. The first Game act passed in 1496. Game certificates were first granted with a duty in 1784-5. Several statutes to prevent the destruction of game have been passed. The Game act (1 & 2 Will. IV. c. 32) greatly modifying all previous laws, was passed in 1831. By it the sale of game is legalised at certain seasons. By the Game Poaching Preventive act, passed in 1862, greatly increased powers were given to the county police.

GAMES. Those of Greece and Rome will be found under their respective heads. The candidates for athletic games in Greece were dieted on new cheese, dried figs, and boiled grain, with warm water, and no meat. The games were leaping, foot-races, darting, quoits, wrestling, and boxing. See *Capitoline, Isthmian, Olympic, Pythian, Secular games, &c.*

Gaming was introduced into England by the Saxons; the loser was often made a slave to the winner, and sold in traffic like other merchandise. *Camden*.

Act prohibiting gaming to all gentlemen (and interdicting tennis, cards, dice, bowls, &c., to inferior people, except at Christmas time), 33 Hen. VIII.

Gaming-houses licensed in London . . . 1541

Act to prevent excessive and fraudulent gaming, when all private lotteries, and the games of Faro, Bassot, and Hazard were suppressed, 13 Geo. II. . . 1739

The profits of a well-known gaming-house in London for one season have been estimated at 150,000*l.* In one night a million of money is said to have changed hands at this place. *Leigh*. The lord chancellor refused a bank-rump his certificate, because he had lost five pounds at one time in gaming. . . July 17, 1788

Three ladies of quality convicted in penalties of 50*l.* each for playing at Faro . . . March 11, 1797
Gaming-houses were licensed in Paris, until 1836
Any person losing, by betting or playing, more than 100*l.* at any one time, is not compellable to pay the same, 16 Charles II. . . 1663
Bonds or other securities given for money won at play, not recoverable; and any person losing more than 10*l.* may sue the winner to recover it back, 9 Anne . . . 1710
Amended laws respecting games and wagers, 8 & 9 Vict. c. 109, 1845; by 3 Geo. IV. c. 114, a gaming-house keeper is to be imprisoned with hard labour; and by 2 & 3 Vict. gaming-houses may be entered by the police, and all persons present taken into custody.
Betting-houses suppressed . . . 1853
Public gaming-tables suppressed at Wiesbaden and other places in Germany . . . 1861-2

GAMUT. The invention of the scale of musical intervals (commonly termed *do ut, re, mi, fa, sol, la*; to which *si* was added afterwards), for which the first seven letters of the alphabet are now employed, is ascribed to Guido Aretino, a Tuscan monk, about 1025.

GANGES CANAL, for irrigating the country between the Ganges and Jumna. The main line (525 miles long) was opened in 1854. When completed, it will be 900 miles in length, and will irrigate not less than 1,470,000 acres. It is the greatest work of the kind in the world. Its estimated cost is 1,555,548*l.* The immense difficulties in its execution were overcome by the skill and perseverance of its engineer, sir Proby Cautley.

GAOL DISTEMPER. See *Old Bailey*.

GARDENING. The first garden, Eden, was planted by God. See *Gen. ii*. Gardening was one of the first arts that succeeded the art of building houses. *Walpole*. Gardens were highly valued by the ancients. The Scriptures abound with allusions to them, particularly the Song of Solomon and the Prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan Villa is circumstantially described (about A.D. 100). The Romans doubtless introduced gardening into Britain (about A.D. 100), and it was kept up afterwards by the various religious orders. Its

cultivation as an art in England is dated from the commencement of the 16th century, when many Flemings came to England in consequence of the persecutions of Philip II. Miller's valuable dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; London's valuable Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829. See *Botany, Flowers, Fruits*.

GARTER, ORDER OF THE, owes its origin to Edward III., who, with a view of recovering France, was eager to draw the best soldiers of Europe into his interest, and thereupon, projecting the revival of king Arthur's round table, he proclaimed a solemn tilting, to invite foreigners and others of quality and courage to the exercise. The king, upon New Year's day, 1344, published royal letters of protection for the safe coming and returning of such foreign knights as had a mind to venture their reputation at the joust and tournaments about to be held. The place of the solemnity was Windsor; a table was erected in the castle of 200 feet diameter, in imitation of king Arthur's at Winchester, and the knights were entertained at the king's own expense of 100*l.* a week. In 1346, Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner; he, in memory of these exploits, instituted this order, April 23, 1349. The following were the

ORIGINAL KNIGHTS, 1350.
Edward, prince of Wales (called the Black Prince).
Henry, duke of Lancaster.
Thomas, earl of Warwick.
Piers, capital de Buch.
Ralph, earl of Stafford.
William, earl of Salisbury.
Roger, earl of Mortimer.

Sir John Lisle.
Barth, lord Burghersh.
John, lord Beauchamp.
John, lord Mohun, of Dunstar.
Hugh, lord Courtenay.
Thomas, lord Holland.
Lerd Grey, of Codnore.
Sir Richard Fitz-Simon.
Sir Miles Stapleton.

Sir Thomas Wale.
Sir Hugh Wrotesley.
Sir Nele Lorin.
John, lord Chandos.
Sir James Audley.
Sir Otho Holland.
Sir Henry Earn.
Sir San Daubrichcourt.
Sir Walter Paveley.

Edward gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French—"Honi soit qui mal y pense,"—Evil be to him who evil thinks. The knights are installed at Windsor; and were styled *Equites aureæ Periscelidis*, knights of the golden garter. *Bealson*. The honour was conferred on the sultan of Turkey in 1856. The office of GARTER KING AT ARMS was instituted by Henry V. in 1420, and is one of considerable honour; he carries the rod and sceptre at every feast of St. George.* *Spelman*. The order of the garter in Ireland was instituted in imitation of that of England, by Edward IV. in 1466; but was abolished by an act of parliament, 10 Hen. VII. 1494. *Ashmole's Instit.* The number of knights was increased in 1786. Many knights were admitted in 1814.

GASCONY, S. W. France, a duchy, part of Aquitaine, *which see*.

GAS-LIGHTS: the inflammable aëriform fluid, carburetted hydrogen, evolved from coal, was described by Dr. Clayton in 1739. *Phil. Trans.*

Application of coal gas to the purposes of illumination tried by Mr. Murdoch, in Cornwall . . . 1792
Gaslight introduced at Boulton and Watt's foundry, in Birmingham . . . in 1798
Permanently used at the cotton-mills of Phillips and Lee, Manchester (1000 burners lighted) 1805
Introduced in London, at Golden-lane, Aug. 16, 1807; Pall Mall, 1800; generally through London 1814
Mr. David Pollock, father of the chief baron, was governor of the first chartered gas company, and an energetic supporter of it.
Lyceum Theatre lit with gas as an experiment by Mr. Winsor, 1803; the Haymarket not till 1853
Gas first used in Dublin, 1818; the streets generally lighted . . . Oct. 1825

Sydney, in Australia, was lit with gas May 25, 1841
The gas-pipes in and round London extend upwards of 2000 miles, and are daily increasing.
It was said in 1860, that of the gas supply of London a leakage of 9 per cent. took place through the faulty joints of the pipes.—The sale of gas is regulated by acts passed in 1860
Processes to obtain illuminating gas from water have been patented by Cruickshanks (1839), White (1849), and others.
Gas-meters patented by John Malam (1820), Sir W. Congreve (1824), Samuel Clegg (1830), Nathan Dofries (1838), and others.

GAS-MACHINE, in which gases generated by electricity are employed, was constructed by Lenoir of Paris in 1860, and is in course of trial as a motive power. Furnaces in which gases are used as fuel were devised by Mr. C. W. Siemens, and employed in glass works, &c., in 1861.

GATESHEAD, a borough in Durham, on the Tyne, opposite Newcastle. At Gateshead-fell, William I. defeated Edgar Atheling in 1068. It was made a parliamentary borough by the reform bill in 1832. Between twelve and one o'clock, Oct. 6, 1854, a fire broke out in

* The patron saint of England. The order, until king Edward VI.'s time, was called the order of St. George. His figure on horseback, represented as holding a spear, and killing the dragon, was first worn by the knights at the institution. It is suspended by a blue ribbon across the body from the shoulder.—St. George was a tribune in the reign of Diocletian, and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, April 23, 290.—On that day, in 1192, Richard I. defeated Saladin.

a worsted manufactory here, which shortly after set fire to a bond warehouse containing a great quantity of nitre, sulphur, &c., causing a terrific explosion, felt at nearly twenty miles' distance, and totally destroying many buildings, and burying many persons in the ruins. At the moment of the explosion, large masses of blazing material flew over the Tyne and set fire to many warehouses in Newcastle. About fifty lives were lost, and very many persons were seriously wounded. The damage was estimated at about a million pounds.

GAUGES, BROAD AND NARROW, IN RAILWAYS. Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad, adopted on the Great Western railway; and Mr. R. Stephenson, Joseph Locke, and others, of the narrow, that now almost universally adopted.

GAUGING, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law, 27 Edw. III. 1352.

GAUL, Gallia, the ancient name of France and Belgium. The natives, termed by the Greeks Galatæ, by the Romans Galli or Celtæ, came originally from Asia, and invading Eastern Europe, were driven westward, and settled in Spain (in Gallicia), North Italy (Gallia Cisalpina), France and Belgium (Gallia Transalpina), and the British isles (the lands of the Cymry or Gaels).

The Gauls under Brennus defeat the Romans at the river Allia, and sack Rome; are defeated and expelled by Camillus, July 13, B.C.	390	And by Probus A.D. 275; 277	
The Gauls overrun Northern Greece, 280 B.C.; are beaten at Delphi, 279; and by Sosthenes, king of Macedonia	277	Who introduces the culture of the vine	281
They assist Hannibal	218, &c.	Maximian defeats the Franks	288
The Romans conquer Gallia Cisalpina, 220; invade Gallia Transalpina, with various success, 121-58	118	Constantine proclaimed emperor in Gaul	306
They colonise Aix (123 B.C.); and Narbonne	118	Julian arrives to relieve Gaul, desolated by barbarians; defeats the Alemanni at Strasburg	357
Julius Cæsar subdues Gaul in 8 campaigns	58-50	Julian proclaimed emperor at Paris, 360; dies	363
Lyons founded	41	Gaul harassed by the Alemanni	365-377
Druids' religion proscribed by Claudius	A.D. 43	Invasion and settlement of the Burgundians, Franks, Visigoths, &c.	406-450
Adrian visits and favours Gaul, hence called Restorer of the Gauls	120	The Huns under Attila defeated by Aëtius near Chalons	451
Introduction of Christianity	160	Ægidius, the last Roman commander, murdered	464
Christians persecuted	177, 202, 257, 286, 288	Childeric the Frank takes Paris	—
The Franks and others defeated by Aurelian	241	End of the Roman empire of the West, and establishment of the kingdom of the Franks. (See <i>France</i> .)	476

GAUNTLET, an iron glove, first introduced in the 13th century, perhaps about 1225. It was a part of the full suit of armour, being the armour for the hand. It was commonly thrown down as a challenge to an adversary.

GAUZE, a fabric much prized among the Roman people, A.D. 1. "Brocadoes and damasks, and tabbies and gauzes, have been lately brought over" (to Ireland). *Dean Swift*, in 1698. The manufacture of gauze and articles of a like fabric, at Paisley, in Scotland, was commenced about 1759.

GAVEL-KIND. The custom of dividing paternal estates in land equally among male children, without any distinction, is derived from the Saxons, about A.D. 550. This usage is almost universal in Kent, where it was first practised. By the Irish law of gavel-kind even bastards inherited. *Davies*. Not only the lands of the father were equally divided among all his sons, but the lands of the brother also among all his brethren, if he had no issue of his own. *Law Diet*.

GAZETTES. See *Newspapers*.

GAZA, a city of the Philistines, of which Samson carried off the gates about 1120 B.C. (*Judges* xvi.) It was taken by Alexander, after a long siege, 332; and near to it Ptolemy defeated Demetrius Poliorcetes, 312 B.C. It was taken by Saladin, A.D. 1170; and by Bonaparte, March, 1799.

GEMS. The ancient Greeks excelled in cutting precious stones, of which many specimens are extant. The art was successfully revived in Italy in the 15th century. In Feb. 1860, Herz's Collection of Gems were sold for 10,000*l*. The rev. C. King published his "Antique Gems" in 1860. Artificial gems have been recently produced by chemists (Ebelmen, Deville, Wöhler, and others) 1858-62.

GENEALOGY (from the Greek *genea*, birth, descent), the art of tracing pedigrees, &c. The earliest pedigrees are those contained in the 5th, 10th, and 11th chapters of Genesis. The first book of Chronicles contains many genealogies. The pedigree of Christ is given in *Matt.* i. and *Luke* iii. Many books on the subject have been published in all European countries: one at Magdeburg, *Theatrum Genealogicum*, by Henningses, in 1598. Anderson, *Royal Genealogies*, London, 1732.—*Sims' Manual for the Genealogist*, &c., 1856, will be found a useful guide. The works of Collins (1756 *et seq.*), Edmondson (1764-84), and Nicolas

(1825 and 1857), on the British peerage, are highly esteemed. The Genealogical society, London, was established in 1853.

GENERAL ASSEMBLY. See *Church of Scotland*.

GENERAL WARRANTS. See *Warrants*.

GENERALS. Matthew de Montmorency was the first officer honoured with the title of general of the French armies, A.D. 1203. *Hénault*. It is observed by M. Balzac that cardinal Richelieu first coined the word *Generalissimo*, upon his taking the supreme command of the French armies in Italy, in 1629. See *Commanders-in-Chief*.

GENEVA, a town of the Allobroges, a Gallic tribe, 58 B.C.; became part of the empire of Charlemagne, about A.D. 800; afterwards part of the kingdom of Burgundy.

The Republic founded in	A.D. 1512	pense of their journey, and to purchase them

GENS-D'ARMES were anciently the king's horseguards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light-horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the person of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441. The younger sons of Scottish nobles were usually the captains of this guard. The names gens-d'armes was afterwards given to the police; but becoming obnoxious, was changed to "Municipal Guard" in 1830.

GENTLEMEN (from *gens*, a race or clan). The Gauls observing that during the empire of the Romans the *Scularis* and *Gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well descended about A.D. 1430. *Sidney*. Gentlemen by blood were those who could show four descents from a gentleman, who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. It was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his Majesty's Honourable Corps of Gentlemen-at-Arms, March 17, 1834. *Curling*.

GEOGRAPHY. The first records we have of geographical knowledge are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing

the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Hæd.* The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. It was first brought to Europe by the Moors of Barbary and Spain, about A.D. 1201. *Lenglet.* The invention of the mariner's compass is the important connecting link between ancient and modern geography. The modern maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, A.D. 1489. Geography is now divided into mathematical, physical, and political. The study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The Royal Geographical Society of London was established in 1830; that of Paris, in 1821.

GEOLOGY, the science of the earth, has been the subject of philosophical speculations from the time of Homer; and is said to have been cultivated in China many ages before the Christian era. It occupied the attention of Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino, Majoli, and others (1597), Steno (1666), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals, and, though difficult, it would not be impossible to raise a *chronology out of them*."

Burnet's "Theory of the Earth," appeared in 1690, Whiston's in 1696.

Buffon's geological views (1745) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Gesner (1758), Michell (1760), Staspe (1762-73), Pallas and Saussure (1793-1800).

Werner (1775) ascribed all rocks to an *aqueous* origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Laue, &c.—Hutton (1785), supported by Playfair (1801), warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the agency of fire. The rival parties were hence termed Neptunists and Vulcanists.

William Smith, the father of British geology (who had walked over a large part of England) drew

up a Tabular View of British Strata, in 1799, and published his Geological Map of England and Wales, 1812-15.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; and sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville proposed to establish a school of mines there, but failed, in 1804-7.

In 1807 the Geological Society of London was established, which by collecting a great mass of new data greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton. To its Transactions and Journal we must refer for the future history of Geology.)

In 1835 Mr. (afterwards Sir Henry) De la Beche suggested the establishment of the present museum of Geology, which began at Craig's Court, and which was removed to its present position in Jermyn Street. To him is also due the valuable Geological Maps formed on the ordnance survey. The building was erected by Mr. Pennethorne, and opened in 1851. Attached to the museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died April 13, 1855, and was succeeded by sir R. I. Murchison. A similar institution was established at Calcutta, in 1840, by the E. I. Company. The English standard works on Geology at the present time are those of Lyell, Phillips, De la Beche, Murchison, Mantell, and Ansted (1862).

Geologists are now making great progress by bringing to their aid a knowledge of chemistry and natural philosophy, thus dispelling many old crude theories.—The strata composing the earth's crust may be divided into two great classes: 1st, those due to the agency of water; 2nd, to the action of fire, which may be subdivided as follows:

Aqueous formations, stratified, rarely crystalline	{ Sedimentary or Fossiliferous rocks.
	{ Metamorphic or Unfossiliferous.
Igneous formations, unstratified, crystalline	{ Volcanic, as Basalt, &c.
	{ Plutonic, as Granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series,—

The Palæozoic (most ancient forms of life), or Primary	The Neozoic or Cainozoic (more recent forms of life), or Tertiary.
The Mesozoic (middle life period), or Secondary.	

TABULAR VIEW OF FOSSILIFEROUS STRATA.

NEOZOIC;	
I. POST TERTIARY:	
A. Post-Pliocene:

GEOLOGY, *continued.*

- Freshwater and Marine beds; Barton Clays; Bracklesham Sands; London, Plastic, and Thanet Clays. [*Palms, Birds, &c.*]
- III. SECONDARY, OR MESOZOIC SERIES:
- E. 9-14. *Cretaceous Group*: Maestricht beds.—Chalk with Flints, Chalk without Flints, Chalk Marl, Upper Green Sand, Gault, Lower Green Sand. [*Fish, Mollusks, &c.*]
15. *Wealden Group*: Weald Clay, Hastings Sand. [*Iguanodon, Hylæosaurus, &c.*] [16-23. JURASSIC.]
- F. *Oolitic Group*: 16-18. Upper: Purbeck Beds, Portland Stone and Sand, Kimmeridge Clay. [*Fish.*]
- 19, 20. Middle: Calcareous Grit, Coral Rag, Oxford Clay, Kelloway Rock.
- 21, 22. Lower: Cornbrash, Forest Marble, Bradford Clay, Great Oolite, Stonesfield Slate, Fuller's Earth, Inferior Oolite. [*Ichthyosaurus, Plesiosaurus, Pterodactyl.*]
- G. 23. *Lias*: Lias Clay and Marl Stone. [*Equisetum, Amphibia, Labyrinthodon.*]
- H. *Triassic Group*: 24. Upper: Variegated Marl. 25. Middle or Muschelkalk (wanting in England). [*Ammonites, Corals, Nothosaurus, Nautilus.*]
26. Lower: Variegated Sandstone of Lanca-shire and Cheshire.
- IV. PRIMARY OR PALEOZOIC SERIES:
- I. 27. *Permian Group*, or Magnesian Limestone, Marl Slates, Red Sandstone and Shale. [*Firs, Fishes, Amphibia.*]
- K. 28, 29. *Carboniferous Group*, Upper and Lower: Coal Measures, Millstone Grit, Mountain Limestone. [*Ferns, Calamites, Coal.*]
- L. 30, 31. *Devonian Group*, Upper and Lower: Tilestones, Cornstones, and Marls, Quartzose Conglomerates.
- M. 32, 33. *Silurian Group*, Upper and Lower: Lud-low Shales, Aymestry Limestone, Wen-lock Limestone, Wenlock Shale, Caradoc Sandstone, Llandello Flags. [*Sponges, Corals, Trilobites, Shells.*]
- N. 34, 35. *Cambrian Group*, Upper and Lower: Bala Limestone, Festiniog Slates, Bangor Slates and Grits, Wicklow Rock. [*Ferns, Sigillaria, Stigmara, Calamites, and Cryptogamia.*]
- O. 36. *Laurentian*, (from the river St. Lawrence, in Canada): Gneiss, estimated to be 40,000 feet thick in Canada. Isle of Lewis, N.W. Scotland. [*Indications of life in Canada.*]

GEOMETRY, so termed from its original application to measuring the earth. Its origin is ascribed to the Egyptians; the annual inundations of the Nile having given rise to it by carrying away the landmarks; and the boundaries of farms. Thales introduced geometry into Greece about 600 B.C. Euclid's Elements were compiled about 300 B.C. The doctrine of curves originally attracted the attention of geometers from the conic sections, which were introduced by Plato about 390 B.C. The conchoid curve was invented by Nicomedes, 220 B.C. The science of geometry was taught in Europe in the thirteenth century. Books on geometry and astronomy were destroyed in England, as infected with magic, 7 Edw. VI. 1552. *Stow*. Simson's celebrated edition of Euclid first appeared in 1756.

GEORGE. A gold coin current at 6s. 8d. in the reign of Henry VIII. *Leake*.

GEORGE, ST. See *Wrecks*.

GEORGES' CONSPIRACY, in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, April 6. The conspirators were tried, June 9, when seventeen were sentenced to death, and many to imprisonment. Moreau was suffered to leave France, and was escorted from the Temple to embark for America, June 22. In 1813 he was killed before Dresden (*which see*).

GEORGIA, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander 323 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the third century. In the eighth century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan, Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the fourteenth to the eighteenth centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler, Heraclius, surrendered his territories to the czar in 1799; and in 1802, Georgia was declared to be a Russian province.—GEORGIA, IN NORTH AMERICA, was settled by gen. Oglethorpe, in 1732. Separating from the congress of America, it surrendered to the British, December, 1778; and its possession was of vast importance to the royalists in the then war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, Jan. 18, 1861. See *United States*.—GEORGIA, in the Pacific, was visited by captain Cook in 1775.

GEORGIUM SIDUS, a planet, discovered by Herschel, and so named by him in honour of George III., March 13, 1781. It was for some time called, from its discoverer, "Herschel," but is now generally named Uranus. Its distance from us is ascertained to be 1800 millions of miles. Pursuing his discoveries respecting this planet, Herschel ascertained it to be surrounded, like Saturn, with rings, and to have six satellites.

GERMAIN'S, ST., near Paris, where James II. of England resided, after his abdication, in 1689, and where he died, Sept. 16, 1701.

GERMANIC CONFEDERATION, constituted by the Allies, 1815, in place of the Confederation of the Rhine (*which see*), now consists of—

The empire of Austria; the kingdoms of Prussia, Hanover, Bavaria, Saxony, and Wurtemberg; 7 grand-duchies (Baden, Hesse, &c.); 8 duchies (Brunswick, &c.); 12 principalities and 1 lordship; 4 free cities (Frankfort, Hamburg, Bremen, and

Lübeck); the Danish duchies (Schleswig and Holstein); the duchies of Luxemburg and Lemberg belonging to Holland. Population of the whole, in 1853, about 434 millions.—Baron Kubeck von Kubau, *President* since May 29, 1859.

GERMANY (*Germania and Alemania*), anciently, as now, divided into several independent states. The Germans long withstood the attempts of the Romans to subdue them: and although that people conquered some parts of the country, they were expelled before the close of the third century. In the fifth century the arms of the Huns and other tribes prevailed over the greater portion of Germany. These were subjugated by Charlemagne in the latter part of the eighth century. He took the title of emperor, entailing the dignity upon his family; but after his race became extinct in 911, the rank was made elective. A member of the house of Austria was elected (almost uninterruptedly) from 1437 until 1804. Germany was divided into circles in 1512; formed into the *Confederation of the Rhine*, in 1804, and into the *Germanic Confederation* in 1815. See both articles, Austria, &c.

The Teutones united with the Cymry defeat the Romans in Illyria B.C. 113
After varying success, are defeated by Marius 102
Hermann or Arminius destroys the Roman legion under Varus A.D. 9
reat irruption of Germanic tribes into Gaul 450 &c.
Charlemagne after a long contest subdues the Saxons, who become Christians 772-785
He is crowned emperor of the West at Rome 800
He adds a second head to the eagle, to denote that the empires of Rome and Germany are united in him 802

The famous edict, called the Golden Bull, by Charles IV. 1356
Sigismund, king of Bohemia, elected emperor. He betrays John Huss and Jerome of Prague, who are burned alive (*see Bohemia*) 1414-16
Sigismund being driven from the throne, Albert II., duke of Austria, succeeds 1437
Era of the Reformation (*see Luther*) 1517
German bible and liturgy published by Luther 1522-46
War with the pope—the Germans storm Rome 1527
Diet at Spire 1529
Confession of Augsburg 1530
League of Smalcalde 1531

The anabaptists seize Munster, 1534; but are suppressed, and John of Leyden slain A.D. 1536
Death of Luther 1546
War with protestants 1546-52
Who are helped by Henry II. of France—Peace of Religion at Passau 1552
Abdication of Charles V. 1556
The thirty years' war begins between the Evangelic union under elector palatine, and the Catholic league under the duke of Bavaria 1618
Battle of Prague, which ruined the elector palatine Nov. 8, 1620
Battle of Lutzen—death of Gustavus-Adolphus 1632
End of the thirty years' war: treaty of Westphalia, establishing religious toleration 1648
John Sobieski, king of Poland, defeats the Turks in many battles, and obliges them to raise the siege of Vienna 1683
The peace of Carlowitz with the Turks 1699
War with France, &c.; Marlborough's victory at Blenheim Aug. 13, 1704
Peace of Utrecht 1713
The Pragmatic Sanction (*which see*) 1722
The reign of Charles VI. is chiefly occupied with wars against the Turks, and in establishing the Pragmatic Sanction in favour of the succession of his daughter Maria-Theresa, married to the duke of Lorraine 1711-42
Francis I., duke of Lorraine, marries the heiress of Austria, the celebrated Maria-Theresa, queen of Hungary (1736), and is elected emperor 1745
Joseph II. extends his dominions by the dismemberment of Poland 1772
Francis I. joins in the second partition of Poland 1795
[In the ruinous wars between Germany and France, the emperor loses the Netherlands, all his territories west of the Rhine, and his states in Italy, 1793, *et seq.*]
Francis II. assumes the title of emperor of Austria Aug. 11, 1804
Dissolution of the German empire; formation of the Confederation of the Rhine July 12, 1806
Congress of Vienna 1814 and 1815
The Germanic confederation (*which see*) formed. The Zollverein (*which see*) formed 1818
Insurrection in Vienna, &c. (*see Austria, Hungary, &c.*) 1848
The king of Prussia takes the lead as an agitator, to promote the reconsolidation of the German empire, by a proclamation March 27, —
German national assembly meet at Frankfort, May 18, —
Revolt in Schleswig and Holstein (*see Denmark*) March, —

GERMANY, *continued.*

German national assembly elects the king of Prussia emperor of Germany . . . March 28, 1849
 He declines the honour . . . April 3, —
 He recalls the Prussian members of the assembly . . . May 14, —
 The Frankfort assembly transfers its sittings to Stutgardt . . . May 30, —
 Treaty at Vienna between Austria and Prussia for the formation of a new central power for a limited time; appeal to be made to the governments of Germany . . . Sept. 30, —
 Protest of Austria against the alliance of Prussia with some of the smaller German states . . . Nov. 12, —
 Treaty of Munich between Bavaria, Saxony, and Wurtemberg, for a revision of the German union . . . Feb. 27, 1850
 Parliament meets at Erfurt . . . March, —
 The king of Wurtemberg denounces the insidious ambition of Prussia . . . March 15, —
 German diet meets at Frankfort . . . May 10, —
 Hesse-Cassel refuses to send a representative to Erfurt . . . June 7, —
 Hesse-Darmstadt withdraws from the Prussian league . . . June 20, —
 Austria calls an assembly of the German confederation at Frankfort . . . July 19, —
 Which meets at Frankfort . . . Sept. 2, —
 Austrian, Bavarian, and Prussian forces enter Hesse-Cassel. See *Hesse-Cassel* . . . Nov. 12, —
 Conferences on German affairs at Dresden, Dec. 23, 1850, to May 15, 1851
 Conference of the Diet at Nuremberg, relative to a general code of commerce for Germany, Jan. 15, 1857
 Great excitement in Germany at the French successes in Lombardy—warlike preparations in Bavaria, &c. . . May and June, 1859

Meeting of new liberal party in Eisenach, in Saxe-Weimar. Seven resolutions put forth recommending that the imperfect federal constitution be changed; that the German diet be replaced by a strong central government; that a national assembly be summoned; and that Prussia be invited to take the initiative . . . Aug. 14, 1859
 This proposal not accepted by Prussia, and warmly opposed by Hanover . . . Sept. —
 The Austrian minister, Rechberg, severely censuring the duke of Saxe-Gotha, for a liberal speech, Sept. 4; and accusing the Prussian government of favouring the liberals, meets with cutting retorts . . . Sept. —
 The Federal Diet maintain the Hesse-Cassel constitution of 1852 against Prussia, March 24, 1860
 Meeting of the French emperor and the German sovereigns at Baden, June 16, 17; and of the czar, and the emperor of Austria and the regent of Prussia at Toplitz . . . July 26, &c., —
 Meeting at Coburg in favour of German unity against French aggression . . . Sept. 5, —
 Dispute with Denmark respecting the rights of Holstein and Schleswig . . . Nov. —
 Meeting of the German National Association at Heidelberg . . . Aug. 23, 1861
 Subscriptions received for the creation of a German fleet . . . Sept. and Oct., —
 The National Association meet at Berlin; they recommend the formation of a united federal government, with a central executive, under the leadership of Prussia . . . March 13, 1862
 Deputies from the German states meet at Weimar, and declare that the greatest want of Germany is its formation into one federal state . . . Sept. 28, 29, —

KINGS AND EMPERORS OF GERMANY.

CARLOVINGIAN RACE.

800. Charlemagne.
 814. Louis *le Débonnaire*, king of France,
 840. Lothaire, or Lothar son of Louis: died in a monastery at Treves.
 855. Louis II. son of Lothaire.
 875. Charles II., called the Bald, king of France: poisoned by his physician, Zedechias, a Jew. *Hénault.*
 877. [Interregnum.]
 880. Charles III. *le Gros*: crowned king of Italy; deposed: succeeded by
 887. Arnulf, or Arnoul: crowned emperor at Rome in 896.
 899. Louis III. called IV.: the last of the Carolingian race in Germany.

SAXON DYNASTY.

911. Otho, duke of Saxony: refused the dignity on account of his age.
 — Conrad I. duke of Franconia.
 918. Henry I. surnamed the Fowler, son of Otho, duke of Saxony; king.
 936. Otho I. styled the Great, son of Henry. Many writers withhold the imperial title from him until crowned by pope John XH. in 962.
 973. Otho II. the Bloody; so stigmatised for his cruelties: massacred his chief nobility at an entertainment to which he had invited them; wounded by a poisoned arrow.
 983. Otho III. surnamed the Red, his son, yet in his minority; poisoned.
 1002. Henry II. duke of Bavaria, surnamed the Holy, and the Lame.

1024. Conrad II. surnamed the Salique.
 1039. Henry III. the Black, son of Conrad II.
 1056. Henry IV. son of the preceding: a minor, under the regency of his mother Agnes: deposed by his son and successor.
 1106. Henry V.: married Maud or Matilda, daughter of Henry I. of England.
 1125. Lothaire II. surnamed the Saxon.
 1138. [Interregnum.]

HOUSE OF HOHENSTAUFEN, OR OF SUABIA.

— Conrad III. duke of Franconia.
 1152. Frederick Barbarossa; one of the most splendid reigns in the German annals; drowned by his horse throwing him into the river Saleph.
 1190. Henry VI. his son, surnamed Asper, or the Sharp: it was this emperor that detained Richard I. of England a prisoner in his dominions.
 1198. Philip, brother to Henry: assassinated at Bamberg by Otto, of Wittelsbach.
 1208. Otho IV. surnamed the Superb, recognised as king of Germany, and crowned as emperor the next year: excommunicated and deposed.
 1212. Frederick II. king of Sicily, the son of Henry VI.: deposed by his subjects, who elected Henry, landgrave of Thuringia. Frederick died in 1250, naming his son Conrad his successor, but the pope gave the imperial title to William, earl of Holland.
 1247. William, earl of Holland, died 1256.
 1250. Conrad IV.* son of Frederick.

* His son Conradin was proclaimed king of Sicily, which was, however, surrendered to his uncle Manfred, 1254; on whose death it was given by the pope to Charles of Anjou in 1263. Conradin, on the invitation of the Ghibeline party, entered Italy with a large army, and was defeated at Tagliacozzo, Aug. 23, 1268, and beheaded at Naples, Oct. 29, thus ending the Hohenstaufen family.

GERMANY, *continued.*

1256. [Interregnum.]
 1257. Richard, earl of Cornwall, and Alphonso, of Castile, nominated emperors.
- HOUSES OF HAPSBURG, LUXEMBURG, AND BAVARIA.
 1273. Rodolph, count of Hapsburg; the first of the Austrian family.
1291. [Interregnum.]
 1292. Adolphus, count of Nassau, to the exclusion of Albert, son of Rodolph: deposed: slain at the battle of Spires.
 1298. Albert, duke of Austria, Rodolph's son: killed by his nephew at Rheinfels.
 1308. Henry VII. of Luxemburg.
 1313. [Interregnum.]
 1314. Louis IV. (III.) of Bavaria, and Frederick III. of Austria, son of Albert, rival emperors: Frederick died in 1330.
 1330. Louis reigns alone.
 1347. Charles IV. of Luxemburg. In this reign was given at Nuremberg, in 1356, the famous *Golden Bull*, which became the fundamental law of the German empire.
 1378. Wenceslas, king of Bohemia, son of Charles, twice imprisoned; and at length forced to resign: but continued to reign in Bohemia.
 1400. Frederick, duke of Brunswick: assassinated immediately after his election, and seldom placed in the list of emperors.
 — Rupert, count palatine of the Rhine; crowned at Cologne; died in 1410.
 1410. Jossus, marquess of Moravia; chosen by a party of the electors: died the next year.
 — Sigismund, king of Hungary, elected by another party. On the death of Jossus, he is recognised by all parties; king of Bohemia, in 1419.
- HOUSE OF AUSTRIA.
 1438. Albert II., surnamed the Great, duke of Austria, and king of Hungary and Bohemia: died Oct. 27, 1439.
 1439. [Interregnum.]
1440. Frederick IV., surnamed the Pacific; elected emperor, Feb. 2; but not crowned until June, 1442.
 1493. Maximilian I., son of Frederick: died in 1519. In 1477 he married Mary of Burgundy.— Francis I. of France and Charles I. of Spain became competitors for the empire.
 1519. Charles V. (I. of Spain), son of Joan of Castile and Philip of Austria, elected: resigned both crowns, and retired to a monastery, where he died soon after.
 1558. Ferdinand I., brother to Charles; succeeded by his son,
 1564. Maximilian II., king of Hungary and Bohemia; succeeded by his son,
 1576. Rodolph II.
 1612. Matthias, brother of Rodolph.
 1619. Ferdinand II., his cousin, son of the archduke Charles; king of Hungary.
 1637. Ferdinand III., son of the preceding emperor, succeeded by his son,
 1658. Leopold I.
 1705. Joseph I., son of the emperor Leopold.
 1711. Charles VI., brother to Joseph; succeeded by his daughter,
 1740. Maria-Theresa, queen of Hungary and Bohemia, whose right to the empire was sustained by England.
 1742. Charles VII., elector of Bavaria, whose claim was supported by France; rival emperor, and contested succession.
 [This competition for the throne of Germany gave rise to an almost general war. Charles died in Jan. 1745.]
 1745. Francis I. of Lorraine, grand-duke of Tuscany, consort of Maria-Theresa.
 1765. Joseph II., son of the emperor Francis and of Maria-Theresa.
 1790. Leopold II., brother to Joseph; succeeded by his son,
 1792. Francis II. In 1804 this prince became emperor of Austria only, as Francis I.
 See Austria.

					1861

GHENT, an ancient city in Belgium, built about the seventh century. During the middle ages it became very rich. John, third son of Edward III. of England, was born here in 1340 (hence named *John of Gaunt*), during the revolt under Van Artevelde, a brewer, against the earl Louis, 1379-83. Ghent rebelled against the emperor Charles V., 1539, for which it was severely punished in 1540.—The "Pacification of Ghent" (when the north and south provinces of the Netherlands united against Spain) was proclaimed, Nov. 8, 1576, and broken up in 1579. Ghent was taken by the duke of Marlborough in 1706, and several times taken and retaken by the contending armies during the French wars. The PEACE OF GHENT, between Great Britain and America, was signed Dec. 24, 1814.

GHIBELINES. See *Guelphs*.

GHIZNEE, or GHUZNEE (East Persia), the seat of the Gaznevdes, who founded the city A.D. 969. They were expelled by the Seljuk Tartars in 1038. The British, under sir J. Keane, attacked the citadel of Ghiznee, at two o'clock in the morning, July 23, 1839; it was one of the strongest fortresses in Asia, and was commanded by a son of the ex-king of Cabul. At three o'clock the gates were blown in by the artillery, and, under cover of a heavy fire, the infantry forced their way into the place, and succeeded at five o'clock in fixing the British colours on its towers.—It capitulated to the Afghans, March 1, 1842, who were defeated Sept. 6, 1842, and general Nott re-entered Ghiznee next day.

GIANTS. Og, king of Bashan was of the remnant of the giants: his bedstead being nine cubits long (about 16½ feet). Goliath of Gath's "height was six cubits and a span." (1 Sam. xvii. 4.) The emperor Maximin (A.D. 235) was eight feet and a-half in height; he was also of great bulk, and used the bracelet of his wife as a ring for his thumb, and his shoe was longer by a foot than that of an ordinary man. *Zuinglius*. Some say between seven and eight feet; others above eight. "The tallest man that hath been seen in our age was one named Gabara, who, in the days of Claudius the late emperor, was brought out of Arabia. He was nine feet nine inches high." *Pliny*. John Middleton, of Hale, in Lancashire, born in 1578, was nine feet three inches high.* Patrick Cotter, the celebrated Irish giant, born in 1761, was eight feet seven inches in height; his hand from the commencement of the palm to the extremity of the middle finger, measured twelve inches, and his shoe was seventeen inches long: he died in September, in 1806, in his 46th year. Big Sam, the porter of the Prince of Wales, at Carlton-palace, was near eight feet high, and performed as a giant in the romance of *Cymon*, at the Opera-house, while the Drury-lane company had the use of that theatre until their own was rebuilt in 1809. M. Brice, a native of the Vosges, now in London (Sept. 1862), is seven feet six inches high. Giants' bones, 17, 18, 20, and 30 feet high, were once reported to have been found; but geologists now prove them to be the remains of colossal animals.—The battle of Marignano (1515) has been termed the "battle of the Giants."

GIAOUR, Turkish for Infidel, a term applied to all who do not believe in Mahomedanism.—Byron's poem, "the Giaour" was published in 1813.

GIBRALTAR. The ancient Calpe (which, with Abyla on the opposite shore of Africa, obtained the name of the Pillars of Hercules), a town on a rock in South Spain, on which is placed a British fortress, whose immense strength excites wonder and admiration, and renders it impregnable. The height of the rock, according to Cuvier, is 1437 English feet. It was taken by the Saracens under Tarik, whence its present name (*Gibel-al-Tarik*, Mountain of Tarik), in A.D. 711. In the year 1462 the king of Castile took Gibraltar from the Moors.

Gibraltar attacked by the British under sir George Rooke, the prince of Hesse-Darmstadt, sir John Leake, and admiral Byng, July 21st, and taken on the 24th A.D. 1704
Besieged by the Spanish and French; they lose 40,000 men, and the victorious English but 1000 Oct. 11, —
The Spaniards again attack Gibraltar, and are repulsed with great loss 1720
They again attack it with a force of 20,000 men, and lose 5000, while the loss of the English is only 300 1727
Memorable siege by the Spaniards and French, whose prodigious armaments† (the greatest ever brought against a fortress) were wholly overthrown. The siege continued from July, 1779 to Feb. 1783

Royal battery destroyed by fire Nov. 1800
Engagement between the French and English fleets in the bay; the *Hannibal* of 74 guns lost, July 6, 1801
The *Royal Carlos* and *St. Hermenegildo* Spanish ships, each of 112 guns, blew up, with their crews, at night-time, in the Straits here, and all on board perished July 12, —
A malignant disease caused a great mortality here in 1804
A dreadful plague raged 1805
A malignant fever raged Aug. 1814
Again, when a proclamation issued for closing the courts of justice and places of public worship Sept. 5, 1828
The fatal epidemic ceased Jan. 12, 1829

GILDING, said to have been first practised at Rome, about 145 B.C. The capitol was the first building on which this enrichment was bestowed. *Pliny*. Of gold leaf for gilding, the Romans made but 750 leaves, four fingers square, out of a whole ounce. *Pliny*. It consequently was more like our plating. *Trusler*. A single grain of gold may now be stretched out under the hammer into a leaf that will cover a house. *Dr. Halley*. Gilding with leaf gold on *bole ammoniac* was first introduced by Margaritone in 1273. The art of gilding on wood, previously known, was improved in 1680. See *Electrotype*.

* It is reported that one of the Irelands took him to London, and introduced him, dressed up in a very fantastic style, to king James the First. On his return from London, a portrait was taken of him, which is preserved in the Library of Brazenose College, at Oxford: and Dr. Plot gives the following account of him:—"John Middleton, commonly called the Child of Hale, whose hand, from the carpus to the end of his middle finger, was seventeen inches long; his palm eight inches and a-half broad; and his whole height nine feet three inches, wanting but six inches of the size of Goliath."—*Nat. Hist. of Staffordshire*, p. 295.

† In one night their floating batteries were destroyed with red-hot balls, and their whole line of works annihilated by a sortie from the garrison, commanded by general Elliot, Nov. 27, 1781. The enemy's loss in munitions of war, on this night alone, was estimated at upwards of 2,000,000. sterling. The army amounted to 40,000 men. But their grand defeat by a garrison of only 7000 British, occurred Sept. 13, 1782. The duke of Crillon commanded 12,000 of the best troops of France. 1000 pieces of artillery were brought to bear against the fortress, besides which there were 47 sail of the line, all three deckers; 10 great floating batteries, esteemed invincible, carrying 212 guns; innumerable frigates, xebecs, bomb-ketches, cutters, and gun and mortar boats; while small craft for disembarking the forces covered the bay. For weeks together, 6000 shells were daily thrown into the town; and on a single occasion, 8000 barrels of gunpowder were expended by the enemy.

GIN, ardent spirit flavoured with the essential oil of juniper berry. The act for laying an excise upon gin passed July 14, 1736. It had been found, in the preceding year, that in London alone 7044 houses sold gin by retail; and it was so cheap that the poor could intoxicate themselves for one penny. The heavy excise of five shillings per gallon, and obliging all retailers to take out a licence, in a great measure put a stop to this depopulating evil. *Salmon*. About 1700 of these houses were suppressed in London in 1750. *Clarke*.

GIPSIES. See *Gypsies*.

GIRAFFE, or CAMELOPARD. This beautiful animal, a native of the interior of Africa, was well known to the ancients. In 1827, one was brought to England for the first time as a present to George IV. It died in 1829. On May 25, 1835, four giraffes, obtained by M. Thibaut, were introduced into the Zoological Gardens, Regent's Park; where a young one was born in 1839.

GIRONDISTS, the name of a party which played an important part in the French revolution, and was principally composed of deputies from the department of the Gironde. At first they were ardent republicans, but after the cruelty of Aug. and Sept, 1792, they laboured strenuously to restrain the cruelties of the Mountain party, to whom they succumbed. Their leaders, Brissot, Vergniaud, and many others, were guillotined Oct. 31, 1793, at the instigation of Robespierre. Lamartine's eloquent "*Histoire des Girondins*," published in 1847, tended to hasten the revolution in 1848.

GISORS, BATTLE OF (France), on Sept. 20, 28, or Oct. 10, 1198, between the armies of France and England. The former was signally defeated by Richard I., who commanded the English, and whose parole for the day, "*Dieu et mon droit*"—"God and my right," from that time has been the motto to the royal arms of England.

GLADIATORS were originally malefactors, who fought for their lives, or captives who fought for freedom. They were exhibited at the funeral ceremonies of the Romans, 263 B.C., probably following the Greek custom of sacrificing to the manes of deceased warriors the prisoners taken in battle. Gladiator fights afterwards exhibited at festivals, about 215 B.C. When Dacia was reduced by Trajan, 1000 gladiators fought at Rome in celebration of his triumph for 123 days, A.D. 103. These combats were suppressed in the East by Constantine the Great, A.D. 325, and in the West by Theodoric in 500. *Lenglet*.

GLANDELAGH, BISHOPRIC OF (Ireland), has been united to the archbeparchy of Dublin since the year A.D. 1214. St. Keiven seems to have been the founder of this see; he resigned in 612. Glandelagh is now commonly known by the name of the Seven Churches, from the remains of so many buildings contiguous to the cathedral.

GLASGOW (Lanarkshire), the largest city in Scotland. Its prosperity was immensely increased after the union in 1707, in consequence of its obtaining some of the American trade. Population in 1707 about 12,000; in 1861, 394,857.

Erected into a burgh	A.D. 1180	The Royal Exchange, a most sumptuous edifice, opened	Sept. 3, 1829
Charter was obtained from James II.	1451	Great fire, loss 150,000l.	Jan. 14, 1832
University founded by bishop Turnbull about	1454	The Glasgow lotteries, the last drawn in Britain, were granted by licence of parliament to the commissioners for the improvement of Glasgow. The third and final Glasgow lottery was drawn in London, at Coopers' Hall, Aug. 28, 1834. Their repetition was forbidden by 4 Will. IV. c. 37	1834
Made a royal burgh by James VI.	1611	British Association meet here	1840
Town wasted by a great fire	1632	Wellington's statue erected	Oct. 8, 1844
Charter of William and Mary.	1690	False alarm of fire at the theatre, when 70 persons are crushed to death	Feb. 17, 1849
Glasgow <i>Courant</i> published	1715	Failure of Western Bank of Scotland, and City of Glasgow banks, and other firms	Nov. 1857
First vessel sailed to America for its still great import, tobacco	1718	In which great frauds were discovered	Oct. 1858
Great Shawfield riot	1725	New waterworks at Loch Katrine opened by the queen	Oct. 14, 1859
Calico printing begun	1742	[To supply 50 million gallons a day; engineer, J. F. Bateman; cost about 1,000,000l., independent of the price paid for old works.]	
Plundered by rebels	1745	Glasgow visited by the empress of the French, ...	Nov. 27, 1860
Theatre opened	1764		
Power-loom introduced	1773		
Theatre burnt	1780		
Chamber of Commerce formed	1783		
Trades' Hall built	1791		
Spinning machinery by steam introduced	1795		
Anderson's University founded	1796		
New college buildings erected	1811		
Great popular commotion	April, —		
Trials for treason followed	July, —		
Theatre again burnt	Jan. 1829		

GLASGOW, BISHOPRIC OF. Kennet, in his *Antiquities*, says it was founded by St. Kentigern, *alias* Mungo, in 560; while others affirm that Mungo was a holy man who had a cell here, and whose sanctity was held in such veneration that the church was dedicated

to him. Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow, in 583. This prelacy became archiepiscopal in 1491, and ceased at the Revolution. Glasgow is now a post-revolution bishopric. The cathedral was commenced in 1121, and has been beautified and improved at various periods since. It has a noble crypt. See *Bishops*.

GLASITES (IN SCOTLAND) AND SANDEMANIANS (IN ENGLAND), names given to a small body of Christians, whose tenets (professedly derived from the Holy Scriptures alone) are set forth in the "Testimony of the King of Martyrs" published by John Glas, a minister of the Church of Scotland in 1727, and in his son-in-law Robert Sandeman's "Letters on Theron and Aspasio" (1755). Churches were formed by them on what were considered the primitive models, about 1728 in Scotland, and about 1755 in England, and later, 1792, some of which still exist. They hold that justifying faith is the gift of God, and not to be taught or acquired by man; that it must and will always produce love to God and good works; and also, that all Christ's commandments are to be obeyed, and none others to be added. They partake of the Lord's supper and hold love-feasts weekly (see *Agape*), and meet during the week for mutual exhortation. They avoid eating blood, &c., in accordance with *Acts* xv. 29. They erected a new meeting-house at Barnsbury, London, N., in 1862.

GLASS. The Egyptians are said to have been taught the art of making glass by Hermes. The discovery of glass took place in Syria. *Pliny*. Glass-houses were erected in Tyre, where glass was a staple manufacture for many ages. This article is mentioned among the Romans in the time of Tiberius; and we know from the ruins of Pompeii, that windows were formed of glass before A.D. 79. Italy had the first glass windows; next France, whence they came to England. Used for windows in private houses in the reign of Henry II. 1177, but imported. *Anderson*. Glass is said to have been brought to England in 676 by Benedict Biscop, abbot of Wearmouth. The manufacture was established in England at Crutched-friars, and in Savoy, in 1557. *Stowe*. The duties on glass were entirely remitted, 1845. Great improvements have been made in the manufacture, through the immense increase of chemical knowledge in the present century; professor Faraday published his researches on the manufacture of glass for optical purposes in 1830.

GLASS, PAINTING ON. This was a very early art. It was practised at Marseilles in a beautiful style, about A.D. 1500. It is said that we had the art in England towards the twelfth century. It reached to a state of great perfection about 1530.

GLASS-PLATE. For coach windows, mirrors, &c., made at Lambeth by Venetian artists, A.D. 1673, under the patronage of Villiers duke of Buckingham. This branch of the manufacture was improved by the French, who made very large plates; and further improvements in it were made in Lancashire, in 1773, when the British Plate Glass Company was established. There are now several large factories of plate-glass in England, and the principal shops in London have large plate-glass windows, many being single panes.

GLASTONBURY. The first Christian church in Britain was, according to monkish history, erected here, about A.D. 60; and according to the like authority, this place was the residence of Joseph of Arimathea about that time. A church was built here by Ina about 718. The town and abbey burnt, 1184. An earthquake did great damage in 1276. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals, with the abbots of Reading and Colchester, for refusing to take the oath of supremacy to Henry VIII. 1539.

GLENCOE, MASSACRE OF. This was the horrible massacre of the unsuspecting inhabitants, the Macdonalds, merely for not surrendering before the time stated in king William's proclamation, viz. Dec. 31, 1691. Sir John Dalrymple the master, afterwards earl of Stair, their inveterate enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was executed with the blackest treachery. The 120 soldiers were hospitably received by the Highlanders. On Feb. 13, 1692, the massacre began. About 60 men were brutally slain; and many women and children, their wives and offspring, were turned out naked in a dark and freezing night, and perished by cold and hunger. This black deed was perpetrated by a part of the earl of Argyle's regiment. It excited great indignation in England; and an inquiry was set on foot in 1695, but no capital punishment followed.

GLOBE. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true cause of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe: that Venus was the morning and

evening star ; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun ; Venus, Mercury, Mars, Jupiter, Saturn, and the sphere of the stars, about 506 B.C. Aristarchus, of Samos, maintained that the earth turned on its own axis, and revolved about the sun ; which doctrine was held by his contemporaries as so absurd, that the philosopher had nearly lost his life by his theory, 280 B.C. To determine the figure of the earth, a degree of latitude has been measured in different parts of the world by eminent philosophers ; for this purpose Bouguer and La Condamine were sent to Peru, and Maupertuis and others to Lapland, in 1735. France and Spain were measured by Mechain, Delambre, Biot, and Arago, between 1792 and 1821. Measurements have been also made in India by col. Everest, and published in 1830. Experiments have been made by pendulums to demonstrate the rotation of the earth by Foucault in 1851 ; and to determine its density, in 1826, 1828, and 1854, by Mr. G. B. Airy, the Astronomer Royal. See *Circumnavigators*.

GLOBES, ARTIFICIAL. It is said that a celestial globe was brought to Greece from Egypt, 368 B.C., and that Archimedes constructed a planetarium about 212 B.C. The globe of Gottorp is a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising, and setting, is shown. The outside is a terrestrial globe. This machine is called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713 ; it was nearly destroyed by fire in 1757 ; but it was afterwards reconstructed. *Coze*. The globe at Pembroke-hall was erected by Dr. Long ; it far surpasses the other, being eighteen feet in diameter, and thirty persons can sit conveniently within it while it is in motion. In 1851, Mr. Abrahams erected in Leicester-square, for Mr. Wyld, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July 1861, the models were sold.

GLOBE THEATRE, BANKSIDE (London). See *Shakspeare's Theatre*.

GLOIRE, French steam frigate. See *Navy, French*.

GLORY. The glory or nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, were adopted from the Cæsars and their flatterers, by whom they were used in the first century. The doxology of the prayer *Gloria Patri* was ordained in the Church of Rome, and was called doxology because it began with *doxa, glory*, A.D. 382.

GLOUCESTER. Once a Roman colony (*Glevum*), built by Arviragus, A.D. 47, in honour of Claudius Cæsar, whose daughter he had married. In 1278-9 the statutes of Gloucester were passed at a parliament held by Edward I. This city was incorporated by Henry III. ; it was fortified by a strong wall, which was demolished, after the Restoration, in 1660, by order of Charles II., as a punishment for the obstinate resistance of the city to Charles I., in 1643, under col. Massey. The Gloucester and Berkeley canal was completed in April 1827. Gross bribery took place here at the election for the parliament in 1859.

GLOUCESTER, SEE OF. One of the six bishoprics erected by Henry VIII. in 1541, and formerly part of the diocese of Worcester. It was united to that of Bristol in 1836. The cathedral church which belonged to the abbey was dissolved by that king, and its revenues were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books, this bishopric is valued at 315*l.* 17*s.* 2*d.* *per annum*. Present income 5000*l.*

RECENT BISHOPS OF GLOUCESTER.

1802. George Isaac Huntingford, translated to Hereford, June, 1815.	1830. James Henry Monk, died.
1815. Hon. Hen. Ryder, translated to Lichfield, 1824.	1856. Charles Earing, translated to Durham, Sept. 1861.
1824. Christopher Bethell, translated to Exeter, 1830.	1861. Wm. Thomson (PRESENT bishop, 1862).

GLOVES. In the middle ages, the giving of a glove was a ceremony of investiture in bestowing lands and dignities ; and two bishops were put in possession of their sees by each receiving a glove, A.D. 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated

in 1556. Embroidered gloves were introduced into England in 1580, and are still presented to judges at maiden assizes.

GLUCINUM (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Bussy obtained the rare metal glucinum in 1828. *Gmelin*.

GLUCOSE. See *Sugar*.

GLUTEN, an important ingredient of grain, particularly wheat. * It contains nitrogen, and has been therefore termed the *vegeto-animal principle*. Its discovery is attributed to Beccaria, an Italian philosopher of the eighteenth century.

GLYCERINE, discovered by Scheele about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the "father of the fatty acids." It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts.

GNOSTICS (from the Greek *gnōsis*, knowledge), who pretended to extraordinary illumination, appeared soon after the preaching of Christianity, and endeavoured to combine its simple principles with the Platonic and other philosophies. Among their teachers were Saturnius, 111; Basilides, 134; and Valentine, 140. Priscillian, a Spaniard, was burnt at Treves as a heretic, in 384, for endeavouring to revive Gnosticism.

GOBELIN-TAPESTRY, so called from a noted house at Paris, formerly possessed by famous wool-dyers, whereof the chief, called Giles Gobelin, who lived in the reign of Francis I., is said to have found the secret of dyeing scarlet, which was from him called the scarlet of the Gobelins; the house and the river beside it also took the same name. This house was purchased by Louis XIV. for a manufactory of all manner of curious works for adorning the royal palaces, under the direction of Colbert, especially tapestry, designs for which were drawn by the celebrated Le Brun, by appointment of the king, A.D. 1666.

"**GOD BLESS YOU !**" We are told that in the time of pope Pelagius II. a plague raged at Rome, of so fatal a nature that persons seized with it died sneezing and gaping; whence came the custom of saying "*God bless you !*" when a person sneezes, and of Roman Catholics making the sign of the cross upon the mouth when any one gapes, A.D. 582. *Nouv. Dict.*

"**GOD SAVE THE KING.**" This national melody is said to have been composed by John Bull, Mus. D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe the melody to Henry Carey, about 1743. It has been claimed by the French. The extensive controversy on the subject is summed up in Chappell's "*Popular Music of the Olden Time*" (1859).

GODERICH, VISCOUNT, HIS ADMINISTRATION. He* (afterwards earl of Ripon) became first minister on the death of Mr. Canning, Aug. 8, 1827. Resigned Jan. 1828.

Duke of Portland, *president of the council*.

Lord Lyndhurst, *lord chancellor*.

Earl of Carlisle, *lord privy seal*.

Viscount Dudley, Mr. Huskisson, and the marquess of Lansdowne, *foreign, colonial, and home secretaries*.

Lord Palmerston, *secretary-at-war*.

Mr. Wynn, *president of the India board*.

Mr. Charles Grant (afterwards lord Glenelg), *board of trade*.

Mr. Herries, *chancellor of the exchequer*.

Mr. Tierney, *master of the mint, &c.*

GODFATHERS AND GODMOTHERS. The Jews are said to have had godfathers in the circumcision of their sons; but there is no mention of them in scripture. In the Christian Church sponson in baptism arose in the desire of assuring that the child should be of the religion of Christ. Some consider it to be derived from the Roman law. It was first ordained to be used, according to some, by pope Alexander; according to others, by Sixtus; and others refer it to Telesphorus, about A.D. 130, and others to Hyginus about 140. In Roman Catholic countries bells have godfathers and godmothers at their baptism.

GODOLPHIN ADMINISTRATION. The earl of Godolphin became prime minister to queen Anne, May 8, 1702; received the treasurer's staff two days afterwards; resigned Aug. 8, 1710; and died 1712. See *Administrations*.

Sidney, lord (afterwards earl) Godolphin, *treasury*.

Thomas, earl of Pembroke and Montgomery, *lord president*.

John Sheffield, marquess of Normanby, afterwards duke of Normanby and Buckingham, *privy seal*.

Hon. Henry Boyle, *chancellor of the exchequer*.

Sir Charles Hedges and the earl of Nottingham (the latter succeeded by the right hon. Robert Harley, created earl of Oxford in 1704), *secretaries of state, &c.*

* Born 1782, held various inferior appointments from 1809 to 1818, when he became president of the board of trade; was chancellor of the exchequer from 1818 to April, 1827, when he became colonial secretary, which office he held in the Grey cabinet, Nov. 1830; created earl of Ripon, 1833; died, 1859.

GODWIN'S OATH. "Take care you are not swearing Godwin's oath." This caution to a person taking a voluntary and intemperate oath, or making violent protestations, had its rise in the following circumstance related by the monks: Godwin, earl of Kent, was tried for the murder of prince Alfred, brother of Edward the Confessor, and pardoned, but died at the king's table while protesting with oaths, his innocence of the murder; supposed by the historians of those times to have been choked with a piece of bread, as a judgment from Heaven, having prayed it might stick in his throat if he were guilty of the murder, A.D. 1053. *Guth. Hist. Eng.*

GODWIN SANDS. These are sand-banks off the east coast of Kent, and occupy a space that was formerly a large tract of ground belonging to Godwin, earl of Kent, the father of king Harold II. This ground was afterwards given to the monastery of St. Augustin at Canterbury; but the abbot neglecting to keep in repair the wall that defended it from the sea, the whole tract was drowned in the year 1100, leaving these sands, upon which many ships have been wrecked. *Salmon.*

GOLD.* The purest and most ductile of all the metals, for which reason it has, from the earliest ages, been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it it is alloyed with copper or silver: our coin consists of twenty-two carats of pure gold, and two of copper. In the early ages no metals were used but those found pure, as gold, silver, and copper. By 17 & 18 Vict. c. 96 (1854), gold wares are allowed to be manufactured at a lower standard than formerly; wedding rings excepted, by 18 & 19 Vict. c. 60 (1855). See *Coin of England and Guineas*.

GOLD COIN. A.D.
First certain record of gold coined in England, 1257
First regular gold pieces struck. 1344
The florin struck, and the method of assaying gold established, 1354; the standard altered, 1527
All the gold money called in, and re-coined, and the first window-tax imposed to defray the expense and deficiency in the re-coining, 7 Will. III. 1695
Guineas first coined in 1673; reduced in currency value from 22s. to 21s. in 1717
Broad-pieces called in, and re-coined into guineas. 1732
The gold coin brought into the Mint by proclamation in 1773-6, amounted to about 15,563,593*l.*; the expense of collecting, melting, and re-coining it, was 754,019*l.*
Act for weighing gold coin passed. June 13, 1774
"The quantity of gold that passed through the Mint, since the accession of queen Elizabeth to the throne, in 1558, to the beginning of 1840, is 3,353,561 pounds weight, troy. Of this, nearly one-half was coined in the reign of George III., namely, 1,593,078 pounds weight, troy. The value of the gold coined in the reign of that sovereign was 74,501,586*l.*"
Professor Paraday.
The weight of gold coined in Victoria's reign, from June, 1837 to Jan. 1848, was 746,452 lb.; the value of this amount coined was 29,886,457*l.* Gold coined in 1853 (when Australian gold came in), 12,664,125*l.*; in 1854, 4,354,201*l.*; in 1855, 9,245,254*l.*; in 1856, 6,476,000*l.*
GOLD MINES. Gold is found most abundantly in Africa, Japan, and South America, in which last gold was discovered by the Spaniards in 1492, from which time to 1731 they imported into Europe 6000 millions of pieces of eight, in register gold and silver, exclusively of what were unregistered.

A piece of gold weighing ninety marks, equal to sixty pounds troy (the mark being eight

ounces), was found near La Paz, a town of Peru, 1730.

Gold was discovered in Malacca in 1731; in New Andalusia in 1785; in Ceylon 1800; and it has been found in Cornwall, and in the county of Wicklow in Ireland.

The Ural or Oural mountains of Russia long produced gold in large quantity.

Gold discovered in California, 1847; and in Australia, 1851. On April 28, 1858, a nugget, said to weigh 146 pounds, was shown to the queen. See *California and Australia* severally.

Gold discovered in what is now termed New Columbia in 1856; much emigration there in 1858.

Gold discovered in New Zealand, and in Nova Scotia in 1861.

GOLD WIRE was first made in Italy about A.D. 1350. An ounce of gold is sufficient to gild a silver wire above 1300 miles in length; and such is its tenacity that a wire the one-eighteenth part of an inch will bear the weight of 500 lb. without breaking. *Powersoy.*

A single grain of gold may be extended into a leaf of fifty-six square inches, and gold leaf can be reduced to the 300,000th part of an inch, and gilding to the ten-millionth part. *Kelly's Cambist.*

GOLD ROBBERY. Three boxes, hooped and sealed, containing gold in bars and coin to the value of between 18,000*l.* and 20,000*l.* were sent from London, May 15, 1855. On their arrival in Paris, it was found that ingots to the value of 12,000*l.* had been abstracted, and shot substituted, although the boxes bore no marks of violence. Many persons were apprehended on suspicion; but the police obtained no trace till Nov. 1856. Three men named Pierce, Burgess, and Tester, were tried and convicted Jan. 13-15, 1857, on the evidence of Edward Agar, an accomplice. They had been preparing for the robbery for eighteen months previous to its perpetration.

GOLD FISH. Brought to England from China in 1691; but not common till 1723.

GOLDEN BULL. See *Bulls*.

GOLDEN FLEECE (see *Argonauts*), ORDER OF THE. Philip the Good, duke of Burgundy, in A.D. 1429, instituted a military order by this name. The number of knights was

* The amalgamation of gold is described by Pliny (about A.D. 77) and Vitruvius (about A.C. 27). The alchemist Basil Valentine (in the 15th century) was acquainted with the solution of the chloride of gold and fulminating gold. Andreas Cassius in 1685, described the preparation of gold purple, which was then adapted by Kunkel to make red glass, and to other purposes. *Gmelin.* Gold has been subjected to the researches of eminent chemists, such as Berzelius and Faraday, up to the present day.

thirty-one. The king of Spain afterwards became grand master of the order, as duke of Burgundy. It was said to have been instituted on account of the immense profit the duke made by wool. The first solemnities were performed at Burgos, at this duke's marriage with Isabel of Portugal. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Anle ferit, quam flamma micat.*" At the end of the collar hung a golden-fleece, with this device, "*Pretium non vile laborum.*" The order afterwards became common to all the princes of the house of Austria, as being descended from Mary, daughter of Charles the Bold, last duke of Burgundy.

GOLDEN HORDE, a name given to the Mongolian Tartars who established an empire in Kaptehak (or Kibzak), now S. E. Russia, about 1224, their ruler being Batou, grandson of Gengis Khan. They invaded Russia, and made Alexander Newski grand-duke, 1252. At the battle of Bielawisch, in 1481, they were crushed by Ivan III. and his allies the Nogai Tartars.

GOLDEN NUMBER, the cycle of nineteen years, or the number which shows the years of the moon's cycle; its invention is ascribed to Meton, of Athens, about 432 B.C. *Pliny*. To find the golden number or year of the lunar cycle, add one to the date and divide by nineteen, then the quotient is the number of cycles since Christ, and the remainder is the golden number.

GOLDSMITHS' COMPANY (London) began about 1327, and incorporated 16 Rich. II. 1392. The mark or date of the Goldsmiths' company wherewith to stamp standard silver and gold wares is made by letters from A to U, changed every year, commenced in 1796. The old hall was taken down in 1829, and the present magnificent edifice was opened in 1835. See *Assay*.

GOOD FRIDAY (probably God's Friday). From early time this has been held as a solemn fast, in remembrance of the crucifixion of our Saviour on Friday, April 3, A.D. 33. Its appellation of *good* appears to be peculiar to the church of England; our Saxon forefathers denominated it *Long Friday*, on account of the great length of the offices observed and fastings enjoined on this day.

GOODWIN. See *Godwin*.

GOOJERAT (India). On Feb. 21, 1849, lord Gough, with 25,000 men and 100 guns, attacked the enemy, numbering 60,000 men with 59 guns. The Sikh chief was strongly posted between two river courses, which protected his flanks, and yet allowed him good manœuvring space to retire either on the east or west side of the town of Goojerat, which afforded shelter and protection to his rear. The fight began at seven in the morning. By four o'clock the enemy had been driven from every post, and was in general retreat, which the field artillery and cavalry converted into a total rout and flight. They were pursued with great slaughter for about fifteen miles, and next morning an adequate force took up the direct pursuit. Some of the enemy's guns, and the whole of their ammunition and camp equipage, fell into the hands of the British. Shere-Singh escaped with only 8000 men. Goojerat was taken, and also Jailum and Rhotas. The loss on the British side was 100 killed and 900 wounded.

GOOSE AT MICHAELMAS. This custom has thus been accounted for, and though the fact has been contradicted, it is yet pertinaciously, but erroneously maintained. Queen Elizabeth, on her way to Tilbury Fort on Sept. 29, 1588, dined at the ancient seat of sir Neville Umfreyville, near that place; and among the dishes which the knight had provided for her entertainment were two geese. The queen ate heartily, and asking for a bumper of burgundy, drank "*Destruction to the Spanish Armada!*" At the moment that she returned the tankard to the knight, news arrived that the Spanish fleet had been destroyed by a storm. She immediately took another bumper, and was so much pleased with the event, that every year after on that day she had a goose served up. The court made it a custom, and the people the fashion ever since.—"*The custom is of much older date, and is equally observed on the continent as in England.*" *Clavis Calendaria*.

GORDIAN KNOT. The knot made of the thongs that served as harness to the waggon of Gordius, a husbandman, who was afterwards king of Phrygia. Whosoever loosed this knot, the ends of which were not discoverable, the oracle declared should be ruler of Persia. Alexander the great cut away the knot with his sword until he found the ends of it, and thus, in a military sense at least, interpreted the oracle, 330 B.C.

GORDON'S "NO POPERY" MOB, occasioned by the zeal of lord George Gordon. On Jan. 4, 1780, he tendered the petition of the Protestant Association to lord North, and on June 2, headed the mob of 40,000 persons who assembled in St. George's Fields, under the

name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob once raised could not be dispersed, but proceeded to the most daring outrages, pillaging, burning, and pulling down the chapels and houses of the Roman Catholics first, but afterwards of several other persons; breaking open prisons and setting the prisoners free; even attempting the Bank of England; and in a word totally overcoming the civil power for nearly six days. On June 3rd, the Roman Catholic chapels and numerous mansions were destroyed, the Bank attempted, and gaols opened,—among these were the King's Bench, Newgate, Fleet, and Bridewell prisons; on the 5th, thirty-six fires were seen blazing at one time. At length by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled. In the end, 210 of the rioters were killed, and 248 wounded, of whom 75 died afterwards in the hospitals. Many were tried, convicted, and executed. Lord George was tried for high treason, Feb. 5, 1781, but was acquitted.

GORÉE, a station near Cape Verd, on the coast of Africa, planted by the Dutch, A.D. 1617. It was taken by the English admiral Holmes in 1663; and was ceded to France by the treaty of Nimeguen in 1678. Goree was again taken by the British in 1758, 1779, 1800, and 1804. Governor Wall, formerly governor of this island, was hanged in London, Jan. 28, 1802, for the murder of sergeant Armstrong, committed by him while in command at Goree in 1782.

GOREY (S.E. Ireland). Near here the king's troops were defeated by the Irish rebels with considerable loss, on June 4, 1798.

GORGET, the ancient breast-plate, was very large, varying in size and weight. The present diminutive breast-plate came into use about 1660. See *Armour*.

GORILLA, a large ape of West Africa, in anatomical structure the nearest approach to man of any known animals. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called *Gorullai* by the navigator Hanno, in his Periplus, about 400 or 500 B.C. In 1847 a sketch of a gorilla's cranium was sent to Professor Owen by Dr. Savage, then at the Caboon river. Preserved specimens have been recently brought to Europe, and a living one died on its voyage to France. In 1859 Professor Owen gave an able summary of our knowledge of this creature at the Royal Institution, London; and 1861 several skins and skulls of gorillas were there exhibited by M. Du Chaillu, who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

GOSELLERS, the name given to the followers of Wickliffe, who first attacked the errors of popery, about A.D. 1377. *Bishop Burnet*. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, &c., and is called the father of the Reformation. *Watkins*.

GOSELS, THE. St. Matthew and Mark wrote their gospels A.D. 44; Luke his in 55; and John his in 96-97. *Butler*. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates" still exists; its object being to assist in forming and supporting clerical parochial libraries.

GOTHIC ARCHITECTURE began about the ninth century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.
ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church; St. Peter's, Lincolnshire.
GOTHIC ANGLO-NORMAN—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, &c.
EARLY ENGLISH, OR POINTED—A.D. 1135 to 1272—Temple church, London; parts of Winchester, Wells, Salisbury, and Durham cathedrals, and Westminster Abbey.
POINTED, called Pure Gothic—A.D. 1272—to 1377—Exeter cathedral, Waltham Cross, &c., St. Stephen's, Westminster.

FLORID POINTED—A.D. 1377 to 1509—Westminster Hall; King's College, Cambridge; St. George's chapel, Windsor; Henry VII.'s chapel, Westminster.
ELIZABETHAN—A.D. 1509 to 1625—Northumberland House, Strand; Windsor Castle, Hatfield House, schools at Oxford.
Revival of Grecian architecture about 1625, Banqueting House, Whitehall, &c.
The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

GOTHLAND, an isle in the Baltic Sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679.

GOTHS, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They attacked the Roman empire A.D. 251; and were defeated by Claudius, 320,000 being slain, A.D. 269. After the destruction of the Roman empire by the Heruli, the *Ostrogoths*, under Theodoric, became masters of the greater part of Italy, where they retained their dominion till A.D. 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

GOWRIE CONSPIRACY. A young Scotch nobleman, John, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James VI. and seize the government. For this purpose he decoyed the king into Gowrie house, in Perth, on Aug. 6, 1600. The plot was frustrated, and the earl and his brother, Alexander Ruthven, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the Raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio in 1566.

GRACE AT MEAT. The table was considered by the ancient Greeks as the altar of friendship, and held sacred upon that account. They would not partake of any meat until they had first offered part of it, as the first fruits, to their gods. The short prayer said before, and by some persons after meat, in all Christian countries, from the earliest times, is in conformity with Christ's example, *John vi. 11, &c.*

GRACE, a title first assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, A.D. 431, (probably from 1 *Cor. xv. 10*), by the Carlovingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. It was taken by the king of Prussia in Oct. 1861, and created much adverse comment.

GRÆCIA, MAGNA, colonies planted by the Greeks, 974—748 B.C. See *Italy*.

GRAFTON'S, DUKE OF, ADMINISTRATION, succeeded that of lord Chatham, Dec. 1767. Terminated by lord North becoming prime minister in 1770. See *North's Administration*.

Augustus Henry, duke of Grafton, first lord of the treasury (born 1735; died, 1811).
Frederick, lord North, chancellor of the exchequer.
Earl Gower, lord president.
Earl of Chatham, lord privy seal.
Earl of Shelburne and viscount Weymouth, secretaries of state.

Sir Edward Hawke, first lord of the admiralty.
Marquess of Granby, master-general of the ordnance.
Lords Sandwich and Le Despencer, joint postmasters-general.
Lord Hertford, duke of Ancaster, Thomas Townshend, &c.
Lord Camden, lord chancellor.

GRAHAM'S DIKE (Scotland). A wall built in A.D. 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Frith of Forth to the Clyde. The eminent historian Buchanan relates that there were considerable remains of this wall in his time; and some vestiges of it are to be seen even to this day.

GRAMMARIANS. Anciently, the most eminent men in literature were denominated grammarians. A society of grammarians was formed at Rome so early as 276 B.C. *Blair*. Apollodorus of Athens, Varro, Cicero, Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar (*Brevis Institutio*), 1513; Lindley Murray's English grammar, 1795; Cobbett's English grammar, 1818.—Harris's *Hermes* was published in 1750, Horne Tooke's *Epea Pteroenta*, or the "*Divisions of Purley*," in 1786, both excellent treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error."

GRAMMAR SCHOOLS. See *Education*.

GRAMPIAN HILLS (central Scotland). Near the *Mons Grampius* of Tacitus, the Scots and Picts under Galgacus were defeated by the Romans under Agricola, A.D. 79.

GRAMPOUND (Cornwall). For bribery and corrupt practices in this borough, in 1819, several persons were convicted, among them sir Manasseh Lopez, who was sentenced by the court of king's bench to a fine of 10,000*l.* and two years' imprisonment. Grampound was disfranchised in 1821.

GRANADA, a city of Spain, was subdued by the Moors in the tenth century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the great captain Gonsalvo de Cordova, in 1492. In 1609 and 1610, the industrious Moors were expelled from Spain, by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada*.

GRANARIES. The Romans formed granaries in seasons of plenty, to secure food for the poorer citizens, who were provided with corn from these reservoirs, in necessitous times, at the public cost. There were three hundred and twenty-seven granaries in Rome. *Unit. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two storehouses for seacoal to hold 4000 loads, thereby to prevent the sudden dearness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow*.

GRAND ALLIANCE, between England, the emperor, and the States-General; signed at Vienna, May 12, 1689, to which Spain and the duke of Savoy afterwards acceded.

GRAND-DUKE. See *Duke*.

GRAND JUNCTION CANAL (central England), joins several others, and forms a communication between the Thames, Severn, Mersey, and Trent, and the four principal seaports, London, Liverpool, Bristol, and Hull. The canal commences at Braunston, on the west borders of Northamptonshire, and enters the Thames near London,—1793-1801.

GRAND PENSIONARY, a chief state functionary in Holland, in the sixteenth century. In the constitution given by France to the Batavian republic, previously to the erection of the kingdom of Holland, the title was revived, and given to the head of the government, April 29, 1805, Rutger Jan Schimmelpenninck being made the Grand Pensionary. See *Holland*.

GRANICUS (a river, N. W. Asia Minor), near which on May 22, 334 B.C., Alexander the Great signally defeated the Persians. The Macedonian troops (30,000 foot and 5000 horse), crossed the Granicus in the face of the Persian army (600,000 foot and 20,000 horse). *Justin*. The victors lost fifty-five foot soldiers and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and other great towns submitted to the conqueror.

GRANSON, near the lake of Neufchatel, Switzerland, where Charles the Bold, duke of Burgundy, was defeated by the Swiss, April 5, 1476.

GRAPES. Previously to the reign of Edward VI. grapes were brought to England in large quantities from Flanders, where they were first cultivated about 1276. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton-court palace is a vine, stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in girth; it was planted in 1769. *Leigh*.

GRAPHITE (from the Greek *graphein*, to write), a peculiar form of mineral carbon, with a trace of iron, improperly termed black lead and plumbago. In 1809 sir Humphry Davy investigated into the relations of three forms of carbon, the diamond, graphite, and charcoal. A rude kind of black lead pencil is mentioned by Gesner in 1565. Interesting results of the late sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862.

GRATES. The hearths of the early Britons were fixed in the centre of their halls. The fire-place originally was perhaps nothing more than a large stone depressed below the level of the ground to receive the ashes. There were arched hearths among the Anglo-Saxons; and chafing dishes were most in use until the general introduction of chimneys about 1200. See *Chimneys and Stoves*.

GRAVELINES (N. France). Here the Spaniards, aided by an English fleet, defeated the French, on July 13, 1558.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about A.D. 38. Kepler investigated the subject about 1615; and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence about 1633; but the great law on this subject was laid down by Newton about 1687.

GREAT BRITAIN. See *Britain, England, Wales, Scotland, Population, &c.* The stupendous iron steam vessel, GREAT BRITAIN, commanded by captain Hosken, formerly a naval officer, sailed from the Mersey, Liverpool, July 26, 1845, and arrived at New York, Aug. 10. She sailed to the same place in the forenoon of Sept. 22, 1846, with a large cargo of goods and 185 passengers, the greatest number that had ever sailed to America by steam. The same evening the passengers were suddenly alarmed by a concussion, as if the vessel had

struck upon a rock, and soon discovered that she was aground in Dundrum bay, in Ireland. They were landed in safety, but all attempts to get the vessel off were ineffectual, and she lay stranded until Aug. 27, 1847, when Messrs. I. Brunel, jun., and Bremner, the engineers, succeeded in getting her off, she having sustained little damage from the shock, or the waves rolling over her for nearly a year.

GREAT EASTERN, &c. See *Steam*. The EASTERN COUNTIES RAILWAY assumed the name of GREAT EASTERN in 1862. The GREAT NORTHERN RAILWAY station at King's-cross, London, was opened in Oct. 1852. The GREAT WESTERN RAILWAY between London and Bristol was opened June 30, 1841.

GREAT SEAL OF ENGLAND. The first seal used by Edward the Confessor was called the broad seal, and affixed to grants of the crown, A.D. 1048. *Baker's Chron.* The most ancient seal with arms on it is that of Richard I. James II. when fleeing from London in 1688 dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street, into which some thieves broke, and carried it away, with other property, March 24, 1784, a day before the dissolution of parliament; it was never recovered. It was replaced on the next day. A new seal was brought into use on the union with Ireland, Jan. 1, 1801. A new seal for Ireland was brought into use, and the old one defaced, Jan. 21, 1832.

GREECE. The Greeks are said to have been the progeny of Javan, fourth son of Japheth. Greece was so called from a very ancient king named Grecus; and from another king, Hellen, the son of Deucalion, the people were called Hellenes. From Hellen's sons Dorus and Æolus, came the Dorians and Æolians; another son Xuthus was father of Achæus and Ion, the progenitors of the Achæans and Ionians. Homer calls the inhabitants indifferently Myrmidons, Hellenes, and Achæans. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, Thessaly, and the islands. The principal states of Greece were Athens, Sparta, Corinth, Thebes, Arcadia, and afterwards Macedon (*all which see*). The limits of modern Greece are much more confined. Greece became subject to the Turkish empire in the fifteenth century. The population of the present kingdom, established in 1829, was 1,067,216 in 1856.

KING OF GREECE.

1832. Otho I., prince of Bavaria, born June 1, 1815; elected king, May 7, 1832; under a regency till June 1, 1835; married Nov. 22, 1836,

to Maria Frederica, daughter of the grand duke of Oldenburg; deposed, Oct. 23, 1862. No issue.

GREEK CHURCH, or Eastern Church, claims priority, as using the language in which the Gospel was first promulgated. Some of its forms and ceremonies are similar to those of

* The wretched assassins (Oct. 20, 1831) were immured within close brick walls, built around them up to their chins, and supplied with food in this lingering torture until they died.

the Roman Church ; but it disowns the supremacy of the pope, and is strongly opposed to many others of the doctrines and practices of its rival. It is the established religion of Russia. See *Fathers of the Church*.

Catechetical school at Alexandria, (Origen, Clemens, &c.)	A.D. 180-254	The struggle with the Mahometans begins	634
Rise of Monachism	about 300	The Maronite sect begins to prevail	676

First council of Nice (See <i>Councils</i>)	325	Iconoclastic controversy begins	726
Ulphilas preaches to the Goths	about 376	Pope Gregory II. excommunicates the emperor Leo, which leads to the separation of the Eastern (Greek) and Western (Roman) churches	729
Nestorius condemned at the council of Ephesus	431	Foundation of the church in Russia: conversion of princess Olga, 955; of Vladimir	988
Monophysite controversy; churches of Egypt, Syria, and Armenia separate from the church of Constantinople	461	The Maronites join the Roman Church	1182
Close of the school of Athens; Extinction of the Platonic theology	529	Re-union of the churches at the council of Lyons, 1274; again separated	1277
The Jacobite sect established in Syria by Jacobus Baradaeus	about 541	The patriarchate of Moscow established 1582; suppressed in	1762

GREEK FIRE, a combustible composition of matter (now unknown, but thought to have been principally naphtha), said to have been invented by Callinicus, an ingenious engineer of Heliopolis, in Syria, in the seventh century, in order to destroy the Saracens' ships, which was effected by the general of the fleet of Constantine Pogonatus, and 30,000 men were killed. This fire burnt in water, and diffused itself on all sides; and nothing but oil, or a mixture of vinegar, urine, and sand, could quench it. It was blown out of long tubes of copper, and shot out of cross-bows, and other spring instruments. The invention, long kept a secret at Constantinople, was at last acquired by the Turks.

GREEK LANGUAGE. It was first studied in Europe about A.D. 1450; in France, 1473; William Grocyn, or Grokeyn, a learned English professor of this language, travelled to acquire its true pronunciation, and introduced it at Oxford, where he had the honour to teach Erasmus, who himself taught it at Cambridge in 1510. *Wood's Athen. Oxon.* England has produced many eminent Greek scholars, of whom may be mentioned Richard Bentley, died 1742; professor Porson, who died in 1808; Dr. Parr, who died in 1825; and Dr. C. Burney, who died in 1817.

EMINENT GREEK AUTHORS. (See also *Fathers and Philosophy*.)

Homer flourished	B.C. 962-927	Plato	B.C. 429-347	Strabo	A.D. 10

GREEN-BAG INQUIRY took its name from a *Green Bag*, full of documents of alleged seditions, laid before parliament by lord Sidmouth, Feb. 1817. Secret committees presented their reports, Feb. 19; and bills were brought in on the 21st to suspend the *Habeas Corpus* act, and prohibit seditious meetings then frequent.

GREEN-CLOTH BOARD OF, in the department of the lord-steward of the household. Attached to this board was an ancient court (abolished in 1849), which had jurisdiction of all offences committed in the verge of the court. The table whereat the court sat was covered with a green cloth.

GREENLAND (an extensive Danish colony in North America) was discovered by some Icelanders, under Eric Raude, about A.D. 980, and so named from its verdure, superior to that of Iceland. It was visited by Frobisher in 1576. The first ship from England to Greenland was sent for the whale-fishery by the Muscovy Company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, who suffered incredible hardships till the following year, when the company's ships brought them home. *Trindal*. The Greenland Fishing Company was incorporated, in 1693. — Hans Egede, a Danish missionary, founded a new colony, called *Godthaab*, or Good Hope, in 1720-3; and other missionary stations have been since established. Scoresby surveyed Greenland in 1821; and capt. Graats, by order of the king of Denmark, in 1829-30.

GREENOCK (W. Scotland). Charters were granted in 1635 and 1670 to John Shaw, of the barony of Greenock. Prior to 1697, it was an inconsiderable fishing station; but during

that year the Scottish Indian and African Company resolved to erect salt-works in the Frith, and hence arose the attention of sir John Shaw, its superior, to the maritime advantages of its situation. It was erected into a burgh of barony in 1757. The erection of the new quay was entrusted to James Watt, about 1773. East India harbour was built 1805-19, and Victoria harbour 1840-50.

GREEN PARK (near Buckingham palace, London), forms a part of the ground enclosed by Henry VIII. in 1530, and is united to St. James's and Hyde parks by the road named Constitution-hill. Over the arch at the entrance, the Wellington statue was placed in 1846. On the north side was a reservoir of the Chelsea water-works, which was filled up in 1856.

GREENWICH HOSPITAL stands on the site of a royal residence in the time of Edward I. (1300) much enlarged by his successors. Here were born Henry VIII. and his daughters Mary and Elizabeth, and here his son Edward VI. died. The palace was the favourite summer residence of queen Elizabeth, and Charles II. intended to build a new palace here on a very grand scale, and accordingly erected one wing of this grand edifice, but died before any other part of the design was finished. In this state it remained till Mary and William III. formed the plan of making the palace useful to the kingdom, and the hospital was instituted in 1694. The forfeited estate of the attainted earl of Derwentwater (beheaded in 1716) was bestowed upon it. Sixpence per month was at first contributed by every seaman, and the payment was advanced to one shilling, from June 1797. This hospital lodges about 3000 old and disabled seamen (2710 in 1853), and possesses a revenue exceeding 70,000*l.* per annum. A charter was granted to it in Dec. 1775. The chapel, the great dining-hall, and a large portion of the buildings appropriated to the pensioners, were destroyed by fire, Jan. 2, 1779. The chapel was rebuilt in 1789. Greenwich fair was discontinued, April 1857.

GREENWICH OBSERVATORY was built at the solicitation of sir Jonas Moore and sir Christopher Wren, by Charles II., on the summit of Flamsteed-hill, so called from the great astronomer of that name, the first astronomer-royal here. The English began to compute the longitude from the meridian of this place, 1675; some make the date 1679. This observatory contains among other instruments a transept circle by Troughton; a transit instrument of eight feet by Bird; two mural quadrants of eight feet, and Bradley's zenith sector. The telescopes are forty and sixty inch achromatics, and a six-feet reflector. In 1852, an electric telegraph signal ball in the Strand was completed, and put in connection with Greenwich observatory.

ASTRONOMERS-ROYAL.

John Flamsteed	1675	John Pond	1811
Dr. Halley	1719	George Biddell Airy	1835
Dr. Bradley	1742	(The PRESENT Astronomer Royal, under whose able superintendence the apparatus have been greatly increased and improved, 1862.)	
Dr. N. Bliss	1762		
Dr. Nevil Maskelyne	1764		

GREGORIAN CALENDAR (see *Calendar*) was ordained to be adopted by pope Gregory XIII. in 1582, when it was introduced into the Roman Catholic states of Europe: and into other states, 1699 to 1710. England, Denmark, and Sweden, rejected this calendar: but England adopted it in 1752.

GREGORIAN CHANT (plain chant) was invented by pope Gregory I. about 599.

GRENADA. See *Granada* and *New Granada*.

GRENADES, a powerful missile of war, so named from *Granddo*, Spanish, invented in 1594. It is a small hollow globe, or ball, of iron, about two inches in diameter, which being filled with fine powder and set on fire by a fusee at a touchhole, the case flies into shatters, to the damage of all who stand near.

GRENADIERS. The Grenadier corps was a company armed with a pouch of hand-grenades, established in France in 1667; and in England in 1685. *Brown*.

GRENVILLE ADMINISTRATION succeeded the Bute administration, in April, 1763; and resigned in July, 1765. See *Administrations*, 1763; and *All the Talents*.

Rt. hon. George Grenville (born 1712, died 1770), <i>first lord of the treasury and chancellor of the exchequer</i> .	Marquess of Granby, <i>ordnance</i> .
Earl Granville (succeeded by the duke of Bedford), <i>lord president</i> .	Lord Holland (late Mr. Fox), <i>paymaster</i> .
Duke of Marlborough, <i>privy seal</i> .	Rt. hon. Welbore Ellis, <i>secretary-at-war</i> .
Earls of Halifax and Sandwich, <i>secretaries of state</i> .	Viscount Barrington, <i>treasurer of the navy</i> .
Earl Gower, <i>lord chamberlain</i> .	Lord Hillsborough, <i>first lord of trade</i> .
Lord Egmont, <i>admiralty</i> .	Lord Henley (afterwards earl of Northampton), <i>lord chancellor</i> .
	Duke of Rutland, lords North, Trevor, Hyde, &c.

GRESHAM COLLEGE (London), founded by sir Thomas Gresham, in 1575. He was the founder of the Royal Exchange, and left a portion of his property in trust to the City and the Mercers' Company to endow this college for, among other uses, lectures in divinity, astronomy, music, and geometry, and readers in civil law, physic, and rhetoric, and to promote general instruction; he died 1579. The lectures, commenced in Gresham's house near Broad-street, June 1597 (where the Royal Society first met in 1645), continued, with interruption, till 1710. The buildings were pulled down in 1768, and the Excise-office erected on its site. The lectures were then read in a room over the Royal Exchange for many years: on the rebuilding of the present exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, Nov. 2, 1843. It cost above 7000*l*.

GREYNA-GREEN MARRIAGES. Greytna is the nearest and most accessible point in Scotland from the sister kingdom; and in its neighbourhood fugitive marriages were contracted. The practice was begun by a tobaccoist named John Paisley, who lived to a great age, and died in 1814. His first residence was at Megg's Hill, on the common or green betwixt Greytna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was lately the principal officiating priest.* The General Assembly, in 1826, vainly attempted to suppress this system, but an act, passed in 1856, made these marriages illegal after that year.

GREY ADMINISTRATION succeeded the Wellington administration, in Nov. 1830. It carried the Reform bill (*which see*), and terminated July 1834.

Earl Grey, † *first lord of the treasury.*

Viscount Althorpe, *chancellor of the exchequer.*

Marquess of Lansdowne, *president of the council.*

Earl of Durham, *privy seal.*

Viscounts Melbourne, Palmerston, and Goderich, *home, foreign, and colonial secretaries.*

Sir James Graham, *admiralty.*

Lord Auckland and Mr. Charles Grant (*afterwards, 1830, lord Glenelg*), *boards of trade and control.*

Lord Holland, *duchy of Lancaster.*

Lord John Russell, *paymaster of the forces.*

Duke of Richmond, earl of Carlisle, Mr. Wynne, &c.

Lord Brougham, *lord chancellor.*

GREYTOWN. See *Mosquito Coast.*

GROAT, from the Dutch *groat*, a coin of the value of fourpence. *Ray.* Groats were the largest silver currency in England until after 1351, and were coined in almost all reigns. Fourpenny pieces were coined in 1836 to the value of 70,884*l*.; in 1837, 16,038*l*. None was coined in 1861.

GROCERS, one of the oldest trades in England. The word anciently meant "ingrossers or monopolisers," as appears by a statute 37 Edw. III. 1363: "Les Marchauntz nomez engrossent totes maners de merchandises vendables." The Grocers' Company, one of the twelve chief companies of London, was established in 1345, and incorporated in 1429.

GROCHOW, BATTLE OF, near Praga, a suburb of Warsaw, between the Poles and Russians, Feb. 25, 1831. After an obstinate contest, continuing the whole of one day and great part of the next, the Poles remained masters of the field of battle. The Russians shortly after retreated, having been foiled in their attempt to take Warsaw. They are said to have lost 7000 men, and the Poles 2000. See *Poland*, 1861.

GROG, sea-term for rum and water, derived its name from admiral Edward Vernon, who wore program breeches, and was hence called "Old Grog." About 1745, he ordered his sailors to dilute their rum with water.‡

GUADALOUPE, a West India island, discovered by Columbus in 1493. The French took possession of it in 1635, and colonised it in 1664. Taken by the English in 1759, and restored in 1763. Again taken by the English in 1779, 1794, and 1810. The allies, in order to allure the Swedes into the late coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France at the peace in 1814.

* The ceremony was brief. The parson (a tobaccoist or blacksmith) asked the anxious lovers whence they came, and what parish they belonged to, in order to register their answers; they were next asked if they were willing to receive each other for better for worse, &c. This being ascertained, and a wedding-ring passed between them, they were declared to be married persons. The fees paid to the parson are said to have been sometimes very handsome—so much as a hundred pounds having been occasionally paid him for his five minutes' work.

† Born March 13, 1764; M.P., as Charles Grey, in 1786; first lord of the admiralty and afterwards foreign secretary in 1806; resigned in 1806 on account of his favouring Roman Catholic emancipation; died July 17, 1845.

‡ He did great service in the West Indies, by taking Porto Bello, Chagre, &c.; but by his disagreement with the commander of the land forces, the expedition against Carthagena in 1743, it is said, failed. He was dismissed the service for writing two pamphlets attacking the admiralty; he died Oct. 30, 1757.

GUAD-EL-RAS (N.W. Africa). Here the Spaniards signally defeated the Moors, March 23, 1860, after a severe conflict : general Prim manifested great bravery, for which he was ennobled. The preliminaries of peace were signed on the 25th.

GUANO, or HUANO (the Peruvian term for manure), the excrement of sea-birds that swarm along the coasts of Peru and Bolivia, and also of Africa and Australia. Humboldt was one of the first by whom it was brought to Europe on ascertaining its value in agriculture. The importation of Guano into the United Kingdom appears to have commenced in 1842. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa) ; 243,016 tons in 1851 (of which 6522 tons came from Western Australia.).

GUARDS. The custom of having guards is said to have been introduced by Saul, 1093 B.C. *Eusebius*. Guards about the persons of European kings is an early institution. Body guards were appointed to attend the kings of England, 2 Hen. VII. 1485. Horse Guards were raised 4 Edw. VI. 1550. The three regiments, 1st, 2nd, and 3rd Foot Guards were raised in 1660, and the command of them given to colonel Russell, general Monk, and lord Linlithgow. The 2nd regiment, or Coldstream, was the first raised. See *Coldstream*. These guards were the beginning of our standing army. The Horse Grenadier guards first troop, raised in 1693, was commanded by general Cholmondeley ; the second troop was raised in 1702, and was commanded by lord Forbes ; this corps was reduced in 1783, the officers retiring on full pay. See *Horse Guards*, *Yeomen*, *National* and *Imperial Guards*.

GUATIMALA. A republic in Central America, declared independent March 21, 1847. President (1862), General Raphael Carrera, elected 1851. Population, about 850,000.

GUEBRES. See *Parsees*.

GUELPHS AND GHIBELINES, names given to the papal and imperial factions whose conflicts destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is uncertain ; but it is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*) ; and Henry nephew of Welf, or Guelph, duke of Bavaria, in 1138. The former was successful ; but the popes, and many of the Italian cities, took the side of his rival. *Hic Guelph* and *Hic Ghibelin*, are said to have been used as war-cries in 1139. The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou.—Guelph is the name of the present royal family of England. See *Brunswick*. The Guelphic order of knighthood was instituted for the kingdom of Hanover by the prince regent, afterwards George IV., in 1816.

GUERNSEY. See *Jersey*.

GUEUX (beggars), a name given by the comte de Barlaimont to the 300 Protestant deputies from the Low Countries, headed by Henri de Brederode and Louis of Nassau, who petitioned Margaret governess of the Low Countries to abolish the inquisition, April 5, 1666. The deputies at once assumed the name as honourable ; and immediately organised an armed resistance to the government. See *Holland*.

GUIANA (N.E. coast of South America), was explored by sir Walter Raleigh, in 1596 and 1617. The French settlements here were formed in 1626-43 ; and the Dutch, 1627-67. Demerara and Essequibo were ceded to Great Britain in 1814. See *Demerara*.

GUIENNE, a French province, was part of the dominions of Henry II. through his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

GUILDHALL (London), was built in 1411. After its re-erection (in 1669), through the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was not erected until 1789. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton. The hall can contain 7000 persons, and is used for city feasts. Here were entertained the allied sovereigns in 1814, and Napoleon III., April 19, 1855.

GUILLOTINE invented (about 1785) by Joseph Ignatius Guillotin, an eminent physician and senator, esteemed for his humanity. He designed to render capital punishment less painful by decapitation, and felt greatly annoyed at the instrument being called by his name. He was imprisoned during the revolutionary troubles, and ran some hazard of being subjected to its deadly operation ; but (contrary to a prevailing opinion) escaped, and lived to become one of the founders of the Academy of Medicine at Paris, and died in 1814, greatly respected.

—A somewhat similar instrument may be seen in an engraving accompanying the *Symbolicæ Questiones* (called the *Mannaia*). It is said to have been used in Italy, at Halifax, England (see *Halifax*), and in Scotland, there called the Maiden and the Widow.

GUINEA (W. coast of Africa) was discovered by the Portuguese about 1460. From their trade with the Moors originated the Slave trade. Sir John Hawkins was the first Englishman who made a merchandise of the human species. *Bell*. He was assisted in his enterprise by a number of English gentlemen, who subscribed money for the purpose. He sailed from England in Oct. 1562, with three ships, proceeded to the coast of Guinea, purchased or forcibly seized 300 negroes, sold them profitably at Hispaniola, and returned home richly laden with hides, sugar, ginger, and other merchandise, in Sept. 1563. This voyage led to other similar enterprises. *Hakluyt*. See *Slave Trade*.

GUINEAS, English gold coin, so named from having been first coined of gold brought by the African Company from the coast of Guinea in 1663, valued then at 20s.; but worth 30s. in 1695. Reduced at various times; in 1717 to 21s. In 1810 guineas were sold for 22s. 6d.; in 1816, for 27s. In 1811 an act was passed forbidding their exportation and their sale at a price above the current value, 21s. The first guineas bore the impression of an elephant; having been coined of this African gold. Since the issue of sovereigns in July 1817, guineas have not been coined.

GUINEGATE; BATTLE OF. See *Spurs*.

GUN-COTTON, a highly inflammable and explosive substance, invented by professor Schönbein of Basel, and made known by him in 1846. It is purified cotton steeped in a mixture composed of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. Dr. Boettinger and others also lay claim to the discovery.* See *Collodion*.

GUNPOWDER. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about A.D. 1320. But many writers maintain that it was known much earlier in various parts of the world.† Some say that the Chinese possessed the art a number of centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magiæ*. He died in 1292 or 1294.

GUNPOWDER PLOT. The memorable conspiracy known by this name, for springing a mine under the houses of parliament, and destroying the three estates of the realm—king, lords, and commons, there assembled, was discovered on Nov. 4, 1605. It was projected by Robert Catesby, and several persons of rank were leagued in the enterprise. Guy Faux was detected in the vaults under the house of lords preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed; Guy Faux, sir Everard Digby, Rockwood, Winter, and others, died by the hands of the executioner, Jan. 30, 31, 1606. Henry Garnett, a Jesuit, was executed as an accomplice, May 3, following. An anonymous letter sent to lord Monteagle led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained in the late houses of parliament till 1825, when it was converted into offices.

GUNS. See *Artillery*.

GUTTA PERCHA. This highly useful substance is procured from the sap of the Isonandra Gutta, a large forest tree, growing in the Malayan Peninsula and on the islands near it. It was made known in England, by Drs. D. Almeida and Montgomery, at the Society of Arts, in 1843. As a non-conductor of electricity it has become an invaluable aid in constructing the submarine telegraph.

GUZERAT, a state in India, founded by Mahmoud the Gaznevide about 1020, was conquered by Akbar in 1572; and became subject to the Mahrattas 1732 or 1752.

* The diet of Frankfort voted, Oct. 3, 1846, a recompense of 100,000 florins to professor Schönbein and Dr. Boettinger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive; but its use, as a substitute for gunpowder, in gunnery, is still a matter of uncertainty, as the ignition of the cotton is not under the same control. Of its utility, however, in blasting and mining operations, not the slightest doubt can exist. Though cheaper and more powerful than gunpowder, it is still inferior to it in many respects.

† A scientific inquirer, W. Hunter, after a careful examination of the question, in 1847, thus states the result:—"July and August, 1346, may therefore be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

GUY'S HOSPITAL, London. Thomas Guy, a wealthy bookseller, after bestowing immense sums on St. Thomas's, determined to be the sole founder of another hospital. At the age of seventy-six, in 1721, he commenced the erection of the present building, and lived to see it nearly completed, it costing him 18,793*l*. In addition, he endowed it with 219,499*l*. In 1829, 196,115*l*. were bequeathed to this hospital by Mr. Hunt, to provide accommodation for 100 additional patients.

GYMNASIUM, a place where the Greeks performed public exercises, and where also philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing, the athletes were often naked (*gymnos*), whence the name. They anointed themselves with oil to brace their limbs, and to render their bodies slippery, and more difficult to be grasped. The first modern treatise on the subject of gymnastics was published in Germany in 1793. A London Gymnastic society, formed 1826, did not flourish. In 1862 M. Ravenstein set up another gymnastic association.

GYMNOSOPHISTÆ, a sect of philosophers in India, who lived naked, as their name implies: for thirty-seven years they are said to have exposed themselves in the open air to the heat of the sun, the inclemency of the seasons, and the coldness of the night. They were often seen in the fields, fixing their eyes full upon the disc of the sun from the time of its rising to the hour of its setting. Sometimes they stood whole days upon one foot in burning sand. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and who inured themselves to the greatest tortures without uttering a groan, or expressing any fear. *Pliny*.

GYPSIES, or **EGYPTIANS**, in French *Bohèmes*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*; a nation of vagrants supposed by some to be descendants of Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century. Although expelled from France in 1560, and from most countries soon after, they are yet found in every part of Europe, as well as in Asia and Africa. In England an act was made against their itinerancy, in 1530; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month, contrary to the statute. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, they are still, like the Jews, in their manners, customs, visage, and appearance, almost wholly unchanged. Their pretended knowledge of futurity still gives them power over the superstitious and ignorant. The Bible has been translated into the gypsy dialects. Esther Faa was crowned queen of the gypsies at Blyth, on Nov. 18, 1860.

GYROSCOPE (from *gyrore*, to revolve), the name of a now popular rotatory apparatus (1859), invented by Fessel of Cologne (1853), since improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope exhibits the combined effects of the centrifugal and centripetal forces, and the remarkable results of the cessation of either. It thus illustrates the great law of gravitation.

H.

HAARLEM, Holland, an ancient town, was taken by the duke of Alva, in July, 1573, after a siege of seven months. He violated the capitulation by butchering half the inhabitants. The lake was drained in 1849-51.

HABEAS CORPUS. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, May 27, 1679.* This act (founded on the old common law) is next in importance to *Magna Charta*, for so long as the statute remains in force no subject of England can be detained in prison, except in cases wherein the detention is shown to be justified by the law. The *Habeas Corpus* act can alone be suspended by the authority of parliament, and then for a short time only, and when the emergency is extreme. In such a case, the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being

* By this act, if any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, who shall determine whether his committal be just. The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861.

assigned. *Blackstone*. In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

Act suspended for a short time in A.D. 1689, 1696, 1708
Suspended for Scots' rebellion . . . 1715-6
Suspended for twelve months . . . 1722
Suspended for Scots' rebellion in . . . 1744-5
Suspended for American war . . . 1777-9
Again by Mr. Pitt, owing to French revolution 1794
Suspended in Ireland, on account of the great
rebellion . . . 1798
Again, and in England . . . Aug. 28, 1799
Suspended on a division, 189 against 42, ma-
jority 147 . . . April 14, 1801

Again, on account of Irish insurrection . . . 1803
Again, owing to alleged secret meetings (see
Greco Bag) . . . Feb. 21, 1817
Bill to restore the *Habeas Corpus* brought into
parliament . . . Jan. 28, 1818
Suspended in Ireland, owing to the insurrec-
tion in that kingdom . . . July 24, 1848
Restored there, the rebellion having been
suppressed . . . March 1, 1849

HACKNEY COACHES. In France, a strong kind of cob-horse (*haquenée*) was let out on hire for short journeys: these were latterly harnessed (to accommodate several wayfarers at once) to a plain vehicle called *coche-à-haquenée*; from this some derive the name, but others derive it from *hack*. The legend that traces their origin to Hackney, near London, is a vulgar error. See *Cabriolets* and *Omnibuses*.

Four were set up in London by a capt. Bailey
in 1625; their number soon increased.
They were limited by the star-chamber in 1635;
restricted to 200 in 1637 and in . . . 1652
The number was raised to 400, in 1662; to 700,
in 1694; to 800, in 1715; to 1000, in 1771; to
1100, in 1814; and finally, to 1300, in . . . 1815
One-horse hackney carriages (afterwards cab-
riolets) permitted to be licensed . . . —
All restriction as to number ceased, by 2 Will.
IV., 1831. (The original fare was 1s. a mile). 1833

Two hundred *Hackney Chairs* were licensed . . . 1711
Office removed to Somerset-house . . . 1782
Coach-makers made subject to a licence . . . 1785
Lost and Found Office for the recovery of prop-
erty left in hackney coaches, established by
act 55 Geo. III. . . 1815
All public vehicles to be regulated by the act
16 & 17 Vict. cc. 33, 127, by which they are
placed under the control of the commissioners
of police . . . June and Aug. 1853

HAGUE, capital of the kingdom of Holland, once called the finest *village* in Europe; the place of meeting of the States-General, and residence of the former earls of Holland since 1250, when William II. built the palace here.

Here the States abrogated the authority of
Philip II. of Spain, 1580, and held a conference
upon the five articles of the remon-
strants, which occasioned the synod of Dort. 1610
Treaty of the Hague entered into with a view
to preserve the equilibrium of the North,
signed by England, France, and Holland,
May 21, 1659
Witt torn in pieces here . . . Aug. 20, 1762

The French took possession of the Hague, Jan.
1795; favoured by a hard frost, they marched
into Holland, where the inhabitants and
troops declared in their favour, a general
revolution ensued, and the stadtholder and
his family were compelled to leave the
country and escape to England . . . 1795
The Hague evacuated in . . . Nov. 1813
The stadtholder returns here . . . Dec. —

HAILEYBURY COLLEGE, wherein students were prepared for service in India; it was founded by the East India Company in 1800, and was closed Dec. 31, 1857.

HAINAULT, a province in Belgium, anciently governed by counts hereditary, after Regnier I., who died in 916. The count John D'Arennes became count of Holland in 1299. Hainault henceforth partook of the fortunes of Flanders.

HAINAULT FOREST (Essex), a celebrated forest, in which stood the ancient Fairlop oak, (*which see*) was disafforested in 1851.

HAIR. By the northern nations, and in Gaul, hair was much esteemed, and hence the appellation *Gallia comata*; and cutting off the hair was inflicted as a punishment among them. The royal family of France held it as a particular mark and privilege of the kings and princes of the blood, to wear long hair artfully dressed and curled. "The clerical tonsure is of apostolic institution!" *Isidorus Hispalensis*. Pope Anicetus forbade the clergy to wear long hair, A.D. 155. Long hair was out of fashion during the protectorate of Cromwell, and hence the term *Round-heads*. It was again out of fashion in 1795; and very short hair was in mode in 1801. Hair-powder came into use in 1590; and in 1795 a tax was laid upon persons using it, which yielded at one time 20,000*l.* per annum. The tax is now 1*l.* 3*s.* 6*d.* for each person annually. See *Beard*.

HAITI. See *Hayti*.

HALICARNASSUS, in Caria (Asia Minor), the reputed birth-place of Herodotus, 484 B.C., and the site of the tomb of Mausolus, erected 352. It was taken by Alexander, 334. See *Mausoleum*.

HALIDON HILL, near Berwick, where on July 19-20, 1333, the English defeated the Scots, the latter losing upwards of 14,000 slain, among whom were the regent Douglas and

a large number of the nobility, while a comparatively small number of the English suffered. Edward III. placed Edward Balliol on the throne of Scotland.

HALIFAX (Yorkshire). The woollen manufacture was established here in the fifteenth century. It became very great, and prodigious quantities of cloth, kerseys, shallons, &c., being continually on the tenters and liable to be stolen, the town, at its first incorporation, was empowered to punish capitally any criminal convicted of stealing to the value of upwards of thirteen pence halfpenny, by a peculiar engine, which beheaded the offender in a moment. King James I. in 1620 took this power away. See *Guillotine*. In 1857 Mr. J. Crossley announced his intention of founding a college here; and Mr. F. Crossley presented the town with a beautiful park.

HALIFAX ADMINISTRATION. The earl of Halifax became minister in the first year of the reign of George I., Oct. 1714, and died in 1715. This ministry was succeeded by Robert Walpole's.

Charles, earl of Halifax, *first lord of the treasury* (succeeded on his death by the earl of Carlisle).
William, lord Cowper, afterwards earl Cowper, *lord chancellor*.
Daniel, earl of Nottingham, *lord president*.
Thomas, marquess of Wharton, *privy seal*.

Edward, earl of Oxford, *admiralty*.
James Stanhope, afterwards earl Stanhope, and Charles, viscount Townshend, *secretaries of state*.
Sir Richard Onslow, *chancellor of the exchequer*.
Dukes of Montrose and Marlborough, lord Berkeley; rt. hon. Robt. Walpole, Mr. Pulteney, &c.

HALLELUJAH AND AMEN. Hebrew expressions frequently used in the Jewish hymns: from the Jewish they came into the Christian Church. The meaning of the first is *Praise the Lord*, and of the second *So be it*. They are said to have been first introduced by Haggai, the prophet, about 520 B.C.; and their introduction from the Jewish into the Christian Church is ascribed to St. Jerome, one of the primitive Latin fathers, about A.D. 390.

HALYS (a river, Asia Minor), near which a battle was fought between the Lydians and Medes. It was interrupted by an almost total eclipse of the sun, which occasioned a conclusion of the war between the two kingdoms, May 28, 585 B.C. (the fourth year of the 48th Olympiad). *Pliny, Nat. Hist.* ii. Others give the date 584, 603, and 610 B.C. This eclipse is said to have been predicted many years before by Thales of Miletus. *Herodotus* i. 75.

HAMBURG, a free city, N. W. Germany, founded by Charlemagne, about A.D. 809. It joined the Hanseatic League in the thirteenth century, and became a flourishing commercial city. Population in 1860, 229,941.

It obtained the title of a free imperial city by permission of the dukes of Holstein, 1296; was subject to them till 1618; purchased its total exemption from their claims . . . A.D. 1768
France declared war upon Hamburg for its treachery in giving up Napper Tandy (see Tandy) . . . Oct. 1799
British property sequestered . . . March, 1801
Hamburg taken by the French after the battle of Jena in . . . 1806
Incorporated with France . . . 1810

Evacuated by the French on the advance of the Russians into Germany . . . 1813
Restored to independence by the allied sovereigns . . . May, 1814
Awful fire here, which destroyed numerous churches and public buildings, and 2000 houses; it continued for three days . . . May 4, 1842
Half the city inundated by the Elbe . . . Jan. 1, 1855
A new constitution demanded by the citizens, and granted by the senate . . . July, 1860
The new assembly (of 191 members) first met, Dec. 6, —

HAMPTON-COURT PALACE (Middlesex). Built by Cardinal Wolsey on the site of the manor-house of the knights-hospitallers. In 1525, he presented it to his royal master, Henry VIII.; it being, perhaps, the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, Oct. 12, 1537; here his mother, Jane Seymour, died, Oct. 24 following; and here Mary, Elizabeth, Charles, and others of our sovereigns, resided. Most of the old apartments were pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. In this palace was held, Jan. 14-16, 1604, the conference between the Presbyterians and the clergy of the Established Church, which led to a new translation of the Bible. See *Conference*.

HANAPER OFFICE (of the court of Chancery), where writs relating to the business of the subject, and their returns, were anciently kept in *hanaperio* (in a hamper); and those relating to the crown, in *parva бага* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The hanaper was originally a wicker basket, with a cover and a lock, and made for easy removal from place to place. The office was abolished in 1842.

HANAU (Hesse-Cassel), where a division of the combined armies of Austria and Bavaria, of 30,000 men, under General Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from Leipsic, Oct. 30, 1813. The French suffered very severely, though the allies were compelled to retire.

HANDEL'S COMMEMORATIONS. The *first* musical festival in commemoration of this illustrious composer was held in Westminster abbey, May 26, 1784. It was the grandest display of the kind ever attempted in any nation, king George III. and queen Charlotte, and above 3000 persons being present. The band contained 268 vocal, and 245 instrumental performers, and the receipts of three successive days were 12,746*l*. These concerts were repeated in 1785, 1786, 1790, and 1791.

Second great commemoration, in the presence of king William IV. and queen Adelaide, when there were 644 performers, June 24, 26, and 28, 1834. This commemoration led to the formation of the Sacred Harmonic Society at Exeter Hall. This society, in conjunction with the Crystal Palace Company, projected the festival of 1859. Grand Behcarsals June 15, 17, 19, 1857, and on July 2, 1858.

Fourth great Handel festival at the Crystal Palace on the centenary of his death. Performances: Messiah, June 20; Selections, 22; Israel in Egypt, 24, 1859, when the prince-consort, the king of the

Belgians, and 26,827 persons were present. There were 2765 vocal and 393 instrumental performers, and the performance was highly successful. The receipts amounted to about 33,000*l*., from which there were deducted 18,000*l*. for expenses; of the residue (15,000*l*.), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's harpsichord, original scores of his oratorios, and other interesting relics, were exhibited.

Fifth Handel festival at the Crystal Palace: 4000 performers; highly successful; June 23, 25, 27, 1862.

HANDKERCHIEFS, wrought and edged with gold, used to be worn in England by gentlemen in their hats, as favours from young ladies, the value of them being from five to twelve pence for each, in the reign of Elizabeth, 1558. *Stow's Chron.* Handkerchiefs were of early manufacture, and are mentioned in our oldest works. Those of the celebrated Paisley manufacture were first made in that town in 1743.

HANGING, DRAWING, AND QUARTERING. The first infliction of this barbarous punishment took place upon a pirate named William Marise, a nobleman's son, 25 Hen. III. 1241. Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, stripped naked, and their bodies marked for quartering, and then pardoned, 25 Hen. VI. 1447. *Stow.* The last execution in this manner was that of the Cato-street conspirators (*which see*), May 1, 1820. The punishment of death by hanging has been abolished in numerous cases. *See Death.* Hanging in chains was abolished in 1834.

HANGO BAY (Finland). On June 5, 1855, a boat commanded by lieut. Geneste left the British steamer, *Cossack*, with a flag of truce, to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregularity to have been on the side of the English, has not been substantiated.

HANOVER, a kingdom, formerly an electorate, N. W. Germany. Hanover is composed of territories which formerly belonged to the dukes of Brunswick (*which see*). Population in 1859, 1,850,000.

Hanover became the ninth electorate . . . A.D. 1692
Suffered much during the seven years' war, 1756-63
Seized by Prussia . . . April 3, 1801
Occupied by the French . . . June 5, 1803
Delivered to Prussia in . . . 1805
Part of it annexed to Westphalia . . . 1810
Regained for England by Bernadotte . . . Nov. 6, 1813
Erected into a kingdom . . . Oct. 12, 1814
The duke of Cambridge appointed lieutenant-governor, and a representative government established . . . Nov. 1816

Visited by George IV. . . . Oct. 1821
Ernest, duke of Cumberland, succeeded to the throne . . . June 20, 1837
He granted a constitution with electoral rights, 1848; which was annulled in obedience to the decree of the Federal diet . . . April 12, 1855
The king claims from England crown jewels, which belonged to George III. (value about 120,000*l*.) . . . 1857
Arbitration: the jewels given up . . . Jan. 1858
The Stade dues suppressed . . . June 12, 1861

ELECTORS AND KINGS OF HANOVER.

1692. Ernest-Augustus, youngest son of George, that son of William, duke of Brunswick-Luneburg, who obtained by lot the right to marry (*see Brunswick*). He became bishop of Osnaburg in 1662, and in 1679 inherited the possessions of his uncle John, duke of Calenberg; created **Elector** of Hanover in 1692. [He married in 1659, the princess Sophia, daughter of Frederick, elector palatine, and of Elizabeth, the daughter of James I. of England. In 1701, Sophia was declared next heir to the British crown, after William III., Anne and their descendants.]
1698. George-Lewis, son of the preceding; married his cousin Sophia, the heiress of the duke of Brunswick-Zell. Became king of Great Britain, Aug. 1, 1714, as **GEORGE I.**

1727. George-Augustus, his son (**GEORGE II.** of England), June 11.
1760. George-William-Frederick, his grandson (**GEORGE III.** of England), Oct. 25.

KINGS OF HANOVER. *See Accession.*

1814. George-William-Frederick (the preceding sovereign), first king of Hanover, Oct. 12
1820. George-Augustus-Frederick, his son (**GEORGE IV.** of England), Jan. 29
1830. William-Henry, his brother (**WILLIAM IV.** of England), June 26.
[Hanover separated from the crown of Great Britain.]
1837. Ernest-Augustus, duke of Cumberland, brother to William IV. of England, on whose demise

HANOVER *continued.*

he succeeded (as a distinct inheritance) to the throne of Hanover, June 20.
1851. George V. (born May 27, 1819), son of Ernest: ascended the throne on the death of his

father, Nov. 18. The PRESENT (1862) king of Hanover.

Heir: Prince Ernest-Augustus, born Sept. 25, 1845.

HANSE TOWNS. A commercial union called the Hanseatic League (from *hansa*, association) was formed by a number of port towns in Germany, in support of each other against the piracies of the Swedes and Danes: this association began about 1140, and the league was signed 1241. At first it consisted only of towns situate on the coasts of the Baltic Sea, but its strength and reputation increasing, there was scarce any trading city in Europe but desired to be admitted into it, and in 1370 it consisted of sixty-six cities, besides forty-four confederates. They proclaimed war against Waldemar, king of Denmark, about the year 1348, and against Eric in 1428, with forty ships, and 12,000 regular troops besides seamen. This gave umbrage to several princes, who ordered the merchants of their respective kingdoms to withdraw their effects. The Thirty years' war in Germany (1618-48) broke up the strength of the association. In 1630, the only towns of note of this once powerful league, retaining the name, were Lübeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries, in the fifteenth century. The many privileges they enjoyed by treaty in England were abolished by Elizabeth in 1578.

HAPSBURG (or **HABSBURG**), HOUSE OF, the family from which the imperial house of Austria sprang in the seventh century. Hapsburg was an ancient castle of Switzerland, on a lofty eminence near Schintznach. Rodolph, count of Hapsburg, became archduke of Austria, and emperor of Germany, A.D. 1273. See *Germany and Austria*.

HARBOURS. England has many fine natural harbours: the Thames (harbour, dock, and dépôt), Portsmouth, Plymouth, &c. Acts for the improvement of harbours, &c., were passed in 1847, 1861, and 1862.

HARFLEUR (seaport, N.W. France) was besieged by Henry V., and taken Sept. 22, 1415.

HARLAW (Aberdeenshire), the site of a desperate indecisive battle between the earl of Mar, with the royal army, and Donald, the lord of the Isles, July 24, 1411. This conflict was very disastrous to the nobility, some houses losing all their males.

HARLEIAN LIBRARY, containing 7000 manuscripts, was bought by the right hon. Mr. secretary Harley, afterwards earl of Oxford and Mortimer, and is now in the British Museum. A large portion of this nobleman's life was spent in adding to its literary stores, in the collection of which he expended a great part of the wealth which his public employments had enabled him to accumulate. He died May 21, 1724. The Harleian Miscellany, a selection from the MSS. and Tracts of his library, was published in 1744 and 1808.

HARMONIC STRINGS. Pythagoras is said to have invented harmonic strings, in consequence of hearing four blacksmiths working with hammers, in harmony, whose weights he found to be six, eight, nine, and twelve; or rather by squares, as thirty-six, sixty-four, eighty-one, and one hundred and forty-four.—The **HARMONICA**, or musical glasses; airs from the tone of them were first formed by an Irish gentleman named Puckeridge. *Franklin.* The instrument was improved by Dr. Franklin in 1760.

HARMONISTS, a sect of enthusiasts founded in Württemberg by Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage only a civil contract. They emigrated to America, not finding toleration in Germany, and built New Harmony in Indiana in 1815. The enthusiastic Robert Owen purchased this town, about 1823; but ultimately failed in his scheme of a "social" community, and returned to England to propagate his doctrines. See *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed wind instrument, like the accordion in the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The harmoniums best known in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, however, Mr. W. E. Evans, of Cheltenham, produced his English Harmonium, then termed the Organ-Harmonica. By a succession of improvements he has produced a fine instrument, with diapason quality, and great rapidity of speech, without any loss of power. *English Cyclopædia.*

HARNESS, the leathern dressings used for horses to draw chariots, and also chariots, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes*, about 1487 B.C.

HARO, CRY OF. The *Clameur de Haro* is derived from Raoul, the French name for Rollo, ancestor of our Norman princes of England, whose equity was not inferior to his valour, and whose very name had an effect upon his subjects, even after his death. This cry was set up, because Rollo had administered justice with such exactness, that those who had injury done them used to call out *A Raoul!* By virtue of this cry, the person who met an adverse party in the streets, obliged him to go before the judge, who decided their differences, at least provisionally. *Hénault.*

HARP. It is traced to the earliest nations. David played the harp before Saul, 1063 B.C. 1 *Sam.* xvi. 23. The lyre of the Greeks is the harp of the moderns. The Romans had their harp; so had the Jews, but it had very few strings. The Cimbri or English Saxons had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more-ancient harps, with wire.*

HARPER'S FERRY (Virginia). See United States, 1859-62.

HARRISON'S TIME-PIECE. Mr. John Harrison, an ingenious mechanic of Foulby, near Pontefract, was the inventor of this celebrated instrument. In 1714, the government offered rewards for methods of determining the longitude at sea; in consequence, Harrison came to London. His first time-piece was produced in 1735; his second in 1739; his third in 1749; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of Longitude, was produced a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, for further improvements in his chronometer in following years, amounting to more than 24,000*l.* in all. See *Clocks and Watches.*

HARROGATE (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Shingsby in 1571: a dome was erected over the well at the expense of lord Rosslyn in 1786. There are two other chalybeate springs, called the Alum well and the Towit spa. The most noted of the mineral springs is the sulphureous well, discovered in 1783. The theatre was erected in 1788; and there are an assembly-room and a library. The Bath hospital was erected by subscription in 1825.

HARROW-ON-THE-HILL SCHOOL (Middlesex†), founded and endowed by John Lyon in 1590, and distinguished as one of the first classical seminaries in England. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Sir R. Peel the statesman and lord Byron the poet were educated here.

HARTLEY COAL MINE (Northumberland). Celebrated for a dreadful and hitherto unparalleled accident on Jan. 16, 1862. One of the beams of the engine at the mouth of the ventilating shaft broke, and a mass of iron weighing about 12 tons fell down the shaft, destroying the brattice dividing the shaft, and carrying down so large a quantity of earth and timber as to kill two men that were ascending the shaft, and bury alive about 215 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by the public, from the queen to the humblest classes; about 50,000*l.* having been collected on behalf of the bereaved families. The coroner's verdict expressed the necessity of there being two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast-iron.

HARTWELL (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, Oct. 6, 1807, and took up his residence at Gosfield Hall, in Essex, and afterwards came to Hartwell, living in retirement, as the count de Lille. His consort died here in 1810. On his restoration to the throne, he embarked at Dover for France, April 24, 1814. See *France.*

HASTINGS (Sussex). At Battle, near this place, more than 30,000 were slain in the battle between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, Oct. 14, 1066. William was soon after crowned king of England. The

* One of the most ancient harps existing is that of Bryan Boiroimbe, monarch of Ireland: it was given by his son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde: it then came into possession of the family of De Burgh: next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

† The church may be seen for many miles round, and thus gave rise to the well-known *bon-mot* of Charles II., who cut short some theological discussion that took place in his presence relative to the claims of religious sects to the title of the visible church, by declaring "that the visible church was the parish church of Harrow, which could be seen everywhere."

day of this battle was, also, the anniversary of Harold's birth. He and his two brothers were interred at Waltham Abbey, Essex.

HASTINGS' TRIAL. Warren Hastings,* governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanors, but acquitted, although he had committed many acts during his government which, it was thought, ought to have led to a different result. Among other charges against him, was his acceptance of a present of 100,000*l.* from the nabob of Oude (see *Chunar, Treaty of*). The trial lasted seven years and three months, commencing Feb. 13, 1788, terminating in his acquittal, April 25, 1795. Mr. Sheridan's celebrated speech on the impeachment excited great admiration.

HATFIELD'S ATTEMPT ON THE LIFE OF GEORGE III. May 11, 1800, a field-day in Hyde-park. During a review a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near the king. On the evening of the same day, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him; upon his trial he was found to be deranged, and was sentenced to be confined as a lunatic during the remainder of his life. He died Jan. 23, 1841, aged 69 years.

HATS. See *Caps*. First made by a Swiss at Paris, A.D. 1404. They are mentioned in history at the period when Charles VII. made his triumphal entry into Rouen, in 1449. He wore a hat lined with red velvet, and surmounted with a rich plume of feathers. It is from this reign that the general use of hats and caps is to be dated, at least in France, which henceforward began to take place of the chaperons and hoods that had been worn before in France. *Hennault*. Hats were first manufactured in England by Spaniards, in 1510; before this time both men and women wore close-knit woollen caps. *Stow*. Very high-crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty was laid upon hats in 1784, and again in 1796; it was repealed in 1811. Silk hats began to supersede beaver about 1820.

HATTERAS EXPEDITION. See *United States*, 1861.

HAVANNAH (capital of Cuba, West Indies). Founded by Velasquez, 1511; was taken by lord Albemarle, Aug. 14, 1762; restored, 1763; the remains of Columbus were brought from St. Domingo and deposited in the cathedral here, 1795.

HAVRE-DE-GRAVE (N.W. France), was defended for the Huguenots by the English in 1562; who, however, were expelled in 1563. It was bombarded by Rodney, July 6 to 9, 1759; by sir Richard Strachan, May 25, 1798; and blockaded, Sept. 6, 1803. The attempts of the British to burn the shipping here failed, Aug. 7, 1804.

HAWAII. See *Owhyhee*.

HAWKERS AND PEDLARS were first licensed in 1697. They are now licensed by commissioners, appointed in 1810. Expense of licences reduced in 1862.

HAYMARKET (Westminster). The hay market here, opened in 1664, was removed to Cumberland-market, Jan. 1, 1831. The Haymarket Theatre was originally opened in 1702. See *Theatres*.

HAYTI, OR HAÏTI, Indian name of St. Domingo, a West India island, discovered by Columbus in Dec. 1492, and named Hispaniola. Before the Spaniards finally conquered it, they are said to have destroyed, in battle or cold blood, 3,000,000 of its inhabitants, including women and children. General Fabre Geffrard became president of the republic of Hayti, Jan. 15, 1859.

Hayti seized by the filibusters and French bucciniers 1630
The French government took possession of the whole colony 1677
The negroes revolt against France Aug. 23, 1791
And massacre nearly all the whites 1793
The French directory recognise Toussaint l'Ouverture as general-in-chief 1794
The eastern part of the island ceded to France by Spain 1795
Toussaint establishes an independent republic in St. Domingo May 9, 1801
He surrenders to the French May 7, 1802
And is conducted to France, where he dies 1803

A new insurrection, under the command of Dessalines; the French quit the island, Nov. 1803
Dessalines proclaims the massacre of all the whites, March 29; crowned emperor as Jacques I. Oct. 8, 1804
He is assassinated, and the isle is divided, Oct. 17, 1806
Henry Christophe, a man of colour, president in Feb. 1807; crowned emperor by the title of Henry I., while Pethion rules as president at Port-au-Prince March, 1811
Numerous black nobility and prelates created. —
Pethion dies, and Boyer is elected president, May, 1818

* He was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company. He died a privy-councillor in 1818.

HAYTI, or HAITI, *continued.*

Christophe commits suicide, Oct. 1820; the two states united under Boyer as regent for life, Nov. 1820; who is recognised by France in 1825
 Revolution: Boyer deposed 1843
 St. Domingo declares itself an independent republic, Feb. 1844; recognised by France 1848
 Hayti proclaimed an empire under its late president Solouque, who takes the title of Faustin I., Aug. 26, 1849; crowned, April 18, 1852

Faustin attacking the republic of St. Domingo repulsed Feb. 1, 1856
 Revolution in Hayti: general Geffard proclaimed, president of the republic of Hayti, Dec. 22, 1858
 Faustin abdicates Jan. 1859
 Sixteen persons executed for a conspiracy against Geffard Oct. —
 St. Domingo declares for reunion with Spain, March 18; accepted by the queen May 20, 1861

HEAD ACT. See *note to article Ireland*, A.D. 1465.

HEALTH, GENERAL BOARD OF, was appointed by the act for the promotion of the public health, passed in 1848. See *Sanitary Legislation*. This board was reconstructed in Aug. 1854, and sir B. Hall was placed at its head with a salary of 2000*l.*; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. The expenses for the year 1856-7 were 12,325*l.* In 1858 this board was incorporated into the privy-council establishment; Dr. Simon being retained as medical officer.

HEARTH, or CHIMNEY, TAX, on every fire-place or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l.* a year. It was abolished by William and Mary at the Revolution in 1689; but was imposed again, and again abolished.

HEAT (called by French chemists Caloric). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forth his theory of latent heat (which heat he said was absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford espoused the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory has been further substantiated by the independent researches of Dr. J. Mayer of Heilbronn, and of Mr. Joule of Manchester, in 1843, who assert that heat is the equivalent of work done. It is now called the dynamical or mechanical theory of heat. In 1854, professor Wm. Thomson of Glasgow published his researches on the dynamical power of the sun's rays. The minds of philosophers are still engaged on this subject.

HEBREWS. See *Jews*.

HEBRIDES (anciently named Hebudes), Western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and annexed to the Scottish crown in 1540 by James V.

HEBRON (in Palestine). Here Abraham resided, 1860 B.C.; and here David was made king of Judah, 1048 B.C. On April 7, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham, Isaac, Jacob, and their wives, and Joseph.

HECATOMB, a sacrifice among the ancients of a hundred oxen, more particularly observed by the Lacedæmonians when they possessed a hundred capital cities. In the course of time this sacrifice was reduced to twenty-three oxen; and in the end, to lessen the expense, goats and lambs were substituted for oxen. *Potter*.

HECLA, MOUNT. Its first eruption is recorded as having occurred A.D. 1004. About twenty-two eruptions have taken place, according to Olsson and Paulson. The most dreadful and multiplied convulsions of this great volcanic mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. For particulars of an eruption in 1784-5, see *Iceland*. The mount was in a state of violent eruption from Sept. 2, 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoriae of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE, dates from the flight of Mahomet from Mecca to Medina, on the night of Thursday, the 15th July, A.D. 622. The era commences on the following day, viz., the 16th July. Some chronologists computed this era from the 15th July, but Cantemir has given examples proving that, in most ancient times, the 16th was the first day. 33 of its lunar years were equal to 32 of those of the vulgar era.

HEIDELBERG, in Germany, was the capital of the Palatinate, 1362-1719. The protestant electoral house becoming extinct in 1693, a bloody war ensued, in which the famous castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated Heidelberg Tun, constructed in 1343, when it contained twenty-one pipes of wine. Another was made in 1664 which held 600

hogsheads. This was emptied and knocked to pieces by the French in 1688 ; but a new and larger one, fabricated in 1690, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine, is now mouldering in a damp vault, quite empty.

HELDER POINT, in Holland. The fort and the Dutch fleet lying in the Texel surrendered to the British forces under the duke of York and sir Ralph Abercrombie, acting for the prince of Orange. In the action, 540 British were killed, Aug. 30, 1799. The place was relinquished, in October following. See *Bergen*.

HELEN, a Grecian princess, according to the Greek mythology, daughter of Jupiter and Leda, and sister of the heroes Castor and Pollux. She was so celebrated for her beauty as to be demanded in marriage by the chief of the Greek princes. She chose Menelaus, king of Sparta, for her husband ; but was induced to elope from him by Paris, son of Priam, king of Troy. This led to the Trojan war, which lasted 1193 to 1183 B.C.

HELENA, St., (an island in the South Atlantic Ocean) was discovered by the Portuguese under Juan de Nova Castilla, on the festival of St. Helena, May 21, 1502. The Dutch were afterwards in possession of it until 1600, when they were expelled by the English. The British East India Company settled here in 1651 ; and the island was alternately possessed by the English and Dutch, until 1673, when Charles II., on Dec. 12, assigned it to the company once more. St. Helena was made the place of Napoleon's captivity, Oct. 16, 1815 ; and it became the scene of his death, May 5, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides. See *France*, 1840. The house and tomb are now under the charge of the French government, having been purchased.

HELGOLAND, an island in the North Sea, taken from the Danes by the British, Sept. 5, 1807 ; made a dépôt for British merchandise ; confirmed to England by the treaty of Kiel, Jan. 14, 1814. Though a mere rock, it is an important possession.

HELIOGRAPHY (from *helios*, the sun). See *Photography*.

HELIOMETER, &c., an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743 ; applied by M. Bouguer, in 1747.

HELIOSCOPE, (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye) was invented by Christopher Scheiner in 1625.

HELIOSTAT, an instrument, the object of which is to make a sunbeam stationary, or apparently stationary, invented by Gravesande about 1719. It has been greatly improved by Malus and others. A new one, constructed by MM. Foucault and Duboscq, was exhibited at Paris in October, 1862.

HELLENES, the Greek race, which supplanted the Pelasgians, from the 15th to the 11th century B.C., derive their name from Helen, king of Phthiotis, about 1600 B.C. They separated into the Dorians, Æolians, Ionians, and Achæians. See *Greece*.

HELLESPONT, a narrow arm of the sea betwixt Europe on the west, Asia on the east, the Propontis, or Sea of Marmora, northward, and the Ægean Sea, now the Archipelago, southward. The present name is the Strait of the Dardanelles. The Hellespont took its original name from Helle, daughter of Athamas, king of Thebes, who was drowned here. It is celebrated for the loves of Hero and Leander : Leander was drowned in a tempestuous night as he attempted to swim across the Hellespont, and Hero, in despair, threw herself into the sea, 627 B.C. *Strabo ; Herodotus*. See *Xerxes*.

HELL-FIRE CLUBS. Three impious associations which existed for some time ; suppressed by an order in council. Upwards of forty persons of quality of both sexes belonged to them. They met at Somerset-house, at a house in Westminster, and at another in Conduit-street, Hanover-square, 1721.

HELMETS. Among the Romans the helmet was provided with a vizor of grated bars, to raise above the eyes, and heavier to lower for eating ; the helmet of the Greeks was round, that of the Romans square. Richard I. of England wore a plain round helmet ; and after this monarch's reign most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. *Gwillim*.

HELOTS, *captives*, derived by some from the Greek *helen*, to take ; by others from Helos, against the inhabitants of which the Spartans bore desperate resentment for refusing to pay tribute, 883 B.C. The Spartans, it is said, not satisfied with the ruin of their city, reduced the Helots to the most debasing slavery ; and called all the slaves of the state, and the prisoners of war, *Helots*, and exposed them to every species of contempt and ridicule. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C. They are considered to have been four-fifths of the inhabitants of Sparta. In the Peloponnesian

war the Helots behaved with uncommon bravery, and were rewarded with their liberty, 431 B.C. Yet this act of justice did not last long; and the sudden disappearance of 2000 unammited slaves was attributed to the Lacedemonians. *Herodotus*.

HELVETII, a Celto-Germanic people, who inhabited what is now called Switzerland. Invading Gaul, 61 B.C., they were opposed and beaten by Julius Cæsar, 85 B.C., near Geneva.

HELVETIAN REPUBLIC. Switzerland having been conquered by the French in 1797, a republic was established in 1798 with this title. See *Switzerland*.

HEMP AND FLAX. Flax was first planted in England, when it was directed to be sown for fishing-nets, A.D. 1533. "Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *Sir John Smolair*. The annual importation of these articles now amounts to about 100,000 tons. More than 180,000 lbs. of tough hemp are used in the cordage of a first-rate man-of-war, including rigging and sails.

HEPTARCHY.* The Heptarchy (or government of seven kings) in England was gradually formed from A.D. 455, when Hengist became the king of Kent. The Heptarchy terminated in A.D. 828, when Egbert reduced the other kingdoms, and became sole monarch of England. For the several kingdoms of the Heptarchy, see *Britain and Octarchy*.

HERACLIDÆ, the descendants of Hercules, who were expelled from the Peloponnesus about 1200 B.C., but reconquered in 1103-4 or 1109 B.C. The return of the Heraclidæ into the Peloponnesus is a famous epoch in chronology, all the history preceding that period being accounted fabulous.

HERALDRY. Signs and marks of honour were made use of in the first ages of the world. *Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French a lion, and afterwards the fleur-de-lis, *which see*. Heraldry, as digested into an art, and subjected to rules, may be ascribed, in the first instance, to Charlemagne, about the year 800; and in the next to Frederick Barbarossa, about the year 1152; it began and grew with the feudal law. *Sir George Mackenzie*. The great English works on heraldry are those of Barcham, or Barkham, published by Gwillim (1610), and Edmondson (1780).

HERALDS' COLLEGE. To Edward III. 1340, is attributed the appointment of two heraldic kings-at-arms for the south and north (Surroy, Norroy). Richard III. endowed the college in 1484; and Philip and Mary enlarged its privileges, and confirmed them by letters patent. Formerly in many ceremonies the herald represented the king's person, and therefore wore a crown, and was always a knight. This college has an earl marshal, 3 kings of arms (Garter, Clarenceux, and Norroy), 6 heralds (Richmond, Lancaster, Chester, Windsor, Somerset, and York), 4 pursuivants, and 2 extra heralds. See *Earl Marshal*, and *Kings-at-Arms*. The building in Doctors' Commons, London, was erected in 1683 by sir Christopher Wren, after the great fire in 1666.

HERAT, on the confines of Khorasân, a strong city called the key of Afghanistan, capital of a state formed by Shah Mahmoud, in 1818. Population in 1830, 100,000. The Persians were baffled in an attempt to take it in 1838; but took it Oct. 25, 1856, in violation of a treaty made in 1853. In consequence, war ensued between Great Britain and Persia. Peace was made in April, 1857 (see *Persia*). Herat was restored July 27 following. It is said to be now besieged by the Ameer of Cabul (Oct. 1862).

HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, Aug. 23 or 24 A.D. 79; successive eruptions laid them still deeper under the surface. All traces of them were lost until excavations began in 1711; and in 1713 many antiquities were discovered. In 1738 excavations were resumed, and works of art and monuments, and memorials of civilised life, were discovered. 150 volumes of MSS. were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Poffici. The "*Antichità di Ercolano*," 8 vols. folio, were published by the Neapolitan government, 1757-92.

HERERA (Arragon). Here Don Carlos, in his struggle for his hereditary right to the throne of that kingdom, at the head of 12,000 men, encountered and defeated general Buerens, who had not much above half that number of the queen of Spain's troops. Buerens lost about 1000 in killed and wounded, Aug. 24, 1837.

* There were at first nine or ten Saxon kingdoms, but Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler as Northumberland.

HEREFORD, an ancient British city, was made the seat of a bishopric about A.D. 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Æthelbert, king of the East Saxons, who was treacherously made away with by his intended mother-in-law, the queen of Mercia. The see is valued in the king's books at 768*l. per annum*. Present income, 4200*l.*

RECENT BISHOPS OF HEREFORD.

1803. Folliott H. W. Cornwall, translated to Worcester, 1808.	1832. Hon. Edward Grey, died June 24, 1837.
1808. John Luxmoore, translated to St. Asaph, 1815.	1837. Thomas Musgrave, translated to York, Dec. 1847.
1815. George Isaac Huntingford, died April 29, 1832.	1847. Renn D. Hampden (the present bishop, 1862).

HERETICS (from the Greek *hairesis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," A.D. 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about A.D. 41. This was followed by the Manichees, Nestorians, Arians, &c. Formerly the term heresy denoted a particular sect; now heretics are those who propagate their private opinions in opposition to the Roman Catholic Church. *Bacon*. Tens of thousands of them have suffered death by torture in Roman Catholic countries. *Burnet*. See *Inquisition*. Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where none daring to relieve them they died of hunger and cold, 1160. *Speed*. At one period in the reign of Henry VIII., to be in possession of Tindal's Bible constituted heresy. Certain laws against heretics were repealed, 25 Hen. VIII. 1534-5.—The last person executed for heresy in Britain was Thomas Aikenhead, at Edinburgh, 1696. The orthodox Mahomedans are Sunnites; the heretics are Shiites, Druses, &c.

HERITABLE AND MOVABLE RIGHTS, in the Scottish law, denote what in England is meant by real and personal property; *real* property in England answering nearly to the heritable rights in Scotland, and *personal* property to the movable rights. Scotch heritable jurisdictions (*i.e.* feudal rights), valued at 164,232*l.*, were brought up in 1747 (20 Geo. II. c. 43), and restored to the crown.

HERMAS, author of "the Shepherd" a Christian apocryphal book, by some supposed to have been written about 131 A.D. Others believe Hermas to be the person mentioned in *Romans* xvi. 14.

HERMITS. See *Monachism*.

HERO, BRITISH MAN-OF-WAR. See *Wrecks*, 1811.

HERRING-FISHERY was largely encouraged by the Scotch so early as the ninth century. The herring statute was passed in 1357. The mode of preserving herrings by pickling was discovered about 1397, and gave rise to a branch of commerce. *Anderson*. The British Herring-Fishery Company was instituted Sept. 2, 1750. A scientific commission in relation to the fishery was appointed in 1862.

HERRINGS, BATTLE OF THE, fought Feb. 12, 1429, when the English were besieging Orleans, obtained its name from an incident occurring at the time. The duc de Bourbon, in attempting to intercept a convoy of salt fish, on the road to the English camp before Orleans, was severely beaten.

HERSCHEL TELESCOPE, THE. Sir W. Herschel's seven, ten, and twenty-feet reflectors were made about 1779. He discovered the Georgium Sidus (*which see*) March 21, 1781, and a volcanic mountain in the moon, in 1783; and about this time laid the plan of his great forty-feet telescope, which he completed in 1789, when he discovered two other volcanic mountains, emitting fire from their summits. In 1802, he, by means of his telescopes, was enabled to lay before the Royal Society a catalogue of 5000 new nebulae, nebulous stars, planetary nebulae, and clusters of stars which he had discovered. The great telescope was taken down in 1822, and one of 20 feet focal length erected by sir J. Herschel, who afterwards took it to the Cape of Good Hope and with it made his valuable observations.

HERULI, a German tribe, which ravaged Greece and Asia Minor in the 3rd century after Christ. Odoacer, their leader, overwhelmed the western empire and became king of Italy, 476. He was defeated and put to death by Theodoric the Ostrogoth, 491-3.

HERZEGOVINA, a province of European Turkey, N. of the principality of Montenegro. In Dec. 1861, an insurrection against the Turks broke out, fostered by the prince of Montenegro, which led to a war. It was subdued; and on Sept. 23, 1862, Vucalovitch, chief of the insurgents, gave in his submission on behalf of his countrymen to Kurschid Pasha, and an amnesty was granted.

HESSE (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne ; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1597, Hesse was divided into Hesse-Cassel and Hesse-Darmstadt, under his sons William and George. Their descendants played an eminent part in the convulsions of Germany during the 17th and 18th century.* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy ; which titles were retained in 1814. In 1806 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1814 the electorate was re-established. Population of electoral Hesse, in 1859, 726,700 ; of the grand duchy, in 1858, 845,571.

HESSE-CASSEL.

1847. The elector Frederic-William I.,† Nov. 20 (born Aug. 20, 1802), now reigning (1862).
Heir : his son, Augustus, born Sept. 21, 1859.

HESSE-DARMSTADT.

1848. The grand-duke Louis III., June 16 (born June 9, 1806), now reigning (1862).
Heir : his brother Charles (born April 23, 1809), whose son Louis married the princess Alice of England, July 1, 1862.

HESSE-HOMBURG. This landgraviate was established in the person of Frederic, son of George of Hesse-Darmstadt, in 1596. His descendant Augustus Frederic married May 7, 1818, Elizabeth, daughter of George III. of England, who had no issue. This landgraviate was absorbed into the grand duchy of Hesse in 1806, but re-established in 1815 with additional territories. The landgrave Ferdinand (born April 26, 1783) succeeded his brother, Sept. 8, 1848, and now reigns (1862). Population in 1858, 25,746.

HEWLEY'S CHARITY. See *Unitarians*.

HEXHAM (Northumberland). The see of Hexham was founded in the infancy of the Saxon church ; it had ten bishops successively, but by reason of the spoil and rapine of the Danes, it was discontinued ; the last prelate appointed A.D. 810. The BATTLE OF HEXHAM, in which the Yorkist army of Edward IV. obtained a complete victory over the Lancastrian army of Henry VI., was fought May 15, 1464.

HIBERNIA. See *Ireland*. The ship *Hibernia*, captain Brenn, bound from Liverpool to New South Wales, with 232 persons on board, of whom 208 were passengers going out as settlers, was destroyed at sea by fire, kindled through the negligence of the second mate,—in W. long. 22° and S. lat. 4°. 150 lives were lost through the insufficiency of the boats to contain more than a third of the people on board : Feb. 15, 1833.

HIEROGLYPHICS (Sacred engravings), picture-writing, the expression of ideas by representation of visible objects, used chiefly by the Egyptians. Young, Champollion, and others (in the present century), have done much to elucidate Egyptian hieroglyphics. Hieroglyphic characters were invented by Athotes, 2112 B.C. *Usher*.

HIGH AND LOW CHURCH. These sections in the church of England began in the reigns of Anne and George I., and still continue. Dr. Sacheverel, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons (preached Aug. 14, and Nov. 9, 1709), to rouse the apprehensions of the people for the safety of the church, and to excite hostility against the dissenters. His friends were called High Church, and his opponents Low Church,

* Six thousand Hessian troops arrived in England, in consequence of an invasion being expected in 1756. The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the last century, and served in Ireland during the rebellion in 1798.

† The elector of Hesse had, in 1850, remodelled the constitution given to his people in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for the ensuing year, 1851, was laid before it. The chamber called, unanimously, for a regular budget, that it might examine into, and discuss, its items. The elector dissolved the chamber, and declared the whole of his dominions in a state of siege and subject to martial law, Sept. 7, 1850. In the end he was obliged to flee to Hanover, and subsequently to Frankfurt ; and on Oct. 14, he formally applied to the Frankfurt diet for assistance to re-establish his authority in Hesse. On Nov. 6 following, an Austro-Bavarian force of 10,000 men with 20 pieces of artillery entered Hesse-Cassel, under the command of prince Thurn-und-Taxis, who fixed his headquarters in Hanau ; and on the next day a Prussian force entered Cassel. The elector returned to his capital, Dec. 27, 1850, the taxes having been previously collected under threats of imprisonment. The Austro-Bavarian and Prussian troops afterwards evacuated the electorate. In 1852, the constitution of 1831 was abolished and a new one established.—The elector and his chamber are still in a state of disagreement. Although the German federal diet affirmed the constitution of 1852, on March 14, 1860, the elector granted a new one on May 30. This, however, did not give satisfaction. Further contests ensued. In May, 1862, there was danger of an armed Prussian intervention, the king having been insulted by the Hesse ministry. In June a new ministry was formed, and the legislative chambers assembled on Oct. 27.

or moderate men, 1720. The queen, who favoured Sacheverel, presented him with the valuable rectory of St. Andrew's, Holborn. He died in 1724.

HIGH COMMISSION, COURT OF, an ecclesiastical court erected by 1 Eliz. c. 1, 1559, by which all spiritual jurisdiction was vested in the crown. This court originally had no power to fine or imprison; but under Charles I. and archbishop Laud, it assumed enormous and illegal powers, and was one of the grievances complained of by the parliament, by whom it was abolished in 1641.

HIGH PRIEST. See *Priest*.

HIGH TREASON. The highest offence known to the law, and in regulating the trials for which was enacted the memorable statute, so favourable to British liberty, the 25th of Edward III. 1352. By this statute two living witnesses are required in cases of high treason: it arose in the refusal of parliament to sanction the sentence of death against the duke of Somerset: it is that which regulates indictments for treason at the present day. By the 40th Geo. III. 1800, it was enacted that where there was a trial for high treason in which the overt act was a direct attempt upon the life of the sovereign, such trial should be conducted in the same manner as in the case of an indictment for murder.*

HIGHNESS. The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter-mentioned king, the title of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange, in 1644; this prince had previously only the distinction of Excellency. *Hénault*: Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644. *Idem*.

HIGHWAYS. See *Roads*.

HIMERA (Sicily). Here (in 480 B.C.) Theron and Gelon of Agrigentum defeated the Carthaginians; and here the latter defeated Agathocles, of Syracuse, 310 B.C.

HINDOO ERA (see *Calî-yuga*) began 3101 B.C., or 756 before the Deluge, in 2348. The Hindoos count their months by the progress of the sun through the zodiac. The Samoat era begins 56 B.C.; the Saca era A.D. 79.

HIPPOTAMUS (Greek, *river-horse*), a native of Africa, known to, but incorrectly described by ancient writers. Hippopotami were exhibited at Rome by Antoninus, Commodus, and others, about A.D. 138, 180, and 218. The first brought to England arrived May 25, 1850, and is now in the Zoological Gardens, Regent's-park, London; another (a female, four months old), was placed there in 1854. Two young ones born at Paris, in May 1858 and June 1859, were killed by their mother.

HISPANIOLA. See *Hayti*.

HISTOLOGY (from *histos*, a web), the science which treats of the tissues which enter into the formation of animals and vegetables; mainly prosecuted by the aid of the microscope. Professor Quekett's Lectures on Histology were published in 1852 and 1854.

HISTORY. Previously to the invention of letters the records of history are vague, traditionary, and erroneous. The Bible, the Parian Chronicle, the histories of Herodotus and Ctesias, and the poems of Homer, are the foundations of early *ancient* history. Later *ancient* history is considered as ending with the destruction of the Roman empire in Italy, A.D. 476; and *modern* history dates from the age of Charlemagne, about A.D. 800. There was not a professorship of modern history in either of our universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II.

HOBART TOWN, or **HOBARTON**, a sea-port, and the capital of Van Diemen's Land. It stands on the west bank of the Derwent, at the foot of the Table Mountain, and was established in 1804, by colonel Collins, the first lieutenant-governor of the island, who died here in 1810. See *Van Diemen's Land*.

HOCHKIRCHEN (Saxony), where on Oct. 14, 1758, the Prussian army, commanded by Frederick II., was surprised in his camp, and defeated by the Austrians commanded by

* The last two cases of persons executed for high treason were 1st, William Cundell, *alias* Connell, and John Smith. They were tried on a special commission, Feb. 6, 1812, being two of fourteen British subjects taken in the enemy's service in the Isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vierey Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, now lord Brougham, defended the prisoners. The defence was, that they (the prisoners) had assumed the French uniform for the purpose of aiding their escape to England. The two above-mentioned were hanged and beheaded on the lodge of Horsemonger-lane gaol on March 16, 1812. All the other convicts were pardoned upon condition of serving in colonies beyond the seas. 2nd, the *Cato Street Conspirators* (which see), May 2, 1820.

count Daun. Field-marshal Keith, an illustrious Scotsman, in the service of Prussia, was killed; he was so much respected, that count Daun and Lacy, the Austrian generals, shed tears on beholding his corpse, and ordered its interment with military honours.

HOCHSTADT, a city on the Danube, in Bavaria, near which several important battles have been fought: (1.) Sept. 20, 1703, when the Imperialists were defeated by the French and Bavarians, under Marshal Villars and the elector of Bavaria. (2.) Aug. 13, 1704, called the battle of Blenheim (*which see*). (3.) June 19, 1800, when Moreau totally defeated the Austrians, and avenged the defeat of the French at Blenheim.

HOGUE. See *La Hogue*.

HOHENLINDEN (Bavaria), **BATTLE OF**, Dec. 3, 1800, between the Austrian and French armies, the latter commanded by general Moreau. The Imperialists were defeated with great loss in this hard-fought battle, their killed and wounded amounting to 10,000 men, and their loss in prisoners to 10,000 more. The forces opposed were nearly equal in numbers. The peace of Lunerville followed.

HOHENSTAUFEN, **HOUSE OF**. See *Germany and Guelfs*.

HOHENZOLLERN, **HOUSE OF**. See *Prussia*.

HOLLAND (signifies *Hollow land*, or, some say, *Wooded land*), a kingdom N.W. Europe, the chief part of the northern Netherlands. It is composed of land rescued from the sea, and is defended by immense dykes. It was inhabited by the Batavi in the time of Caesar, who made a league with them. It became part of the province of Gallia Belgica, and afterwards part of the kingdom of Austrasia. From the 10th to the 15th century it was governed by counts under the German emperors. In 1861, the population of the kingdom in Europe was 3,521,416; of the colonies, 18,175,910.

Thierry (or Dieterich) I., first count of Holland

A.D. 936
The parties termed *Hooks*, (followers of Margaret
countess of Holland,) and *Cod-fish*, (supporters
of her son William, who endeavoured to
supplant her,) create a civil war, which lasts
many years. 1347
Holland united to Hainault, 1299; and Brabant,
1426; annexed to Burgundy by duke Philip,
who wrests it from his niece Jaqueline, of Hol-
land, daughter of the last count, 1436; annexed
to Austria through the marriage of Mary of
Burgundy with the archduke Maximilian. 1477
Government of Philip of Austria, 1495; of
Margaret of Austria and Charles V., 1506;
of Philip II. 1555
Philip II. establishes the Inquisition; the Hol-
landers having zealously embraced the re-
formed doctrines: the Confederacy of Gueux
(Beggars) formed by the nobles against it. 1566
Commencement of the revolt under William,
prince of Orange. 1572
The pacification of Ghent—union of the north
and south provinces. 1576
The seven northern provinces contract the
league of Utrecht. 1579
And declare their independence. Sept. 29, 1580
Assassination of William of Orange
July 10 (June 30) 1584
The ten southern provinces conquered by the
prince of Parma. 1585
The provinces solicit help from England and
France; expedition of the earl of Leicester;
English and Dutch disagree. 1585-7
Battle of Zutphen—sir Philip Sidney killed,
Sept. 22, 1586
Prince Maurice appointed stadtholder. 1587
Death of Philip II. His son Philip III. cedes
the Netherlands to Albert of Austria, and
the infant Isabella. 1598
Campaigns of Maurice and Spinola. 1599-1604
Maurice defeats the archduke at Nieuport, July 2,
The independence of the United Provinces
recognised; truce for twelve years. 1600
April 9, (March 30), 1609
Batavia in Java built. 1610
Fierce religious dissensions between the Armi-
nians and Gomarists. 1610-19

Maurice favours the latter and intrigues for
royal power. 1616
Synod of Dort; persecution of the Arminians, 1618-19
Execution of the illustrious Barneveldt, May 13, 1619
Renewal of the war; Maurice saves Bergen-op-
Zoom. 1622
His tyrannical government; plot against him;
sixteen persons executed. 1623
His death; his brother Frederick succeeds him
and annuls the persecution. 1625
Manhattan, now New York, North America,
founded; massacre of English at Amboyna,
East Indies. 1624
Victories of Van Tromp, who takes two Spanish
fleets off the Downs. Sept. 16 and Oct. 21, 1639
Peace of Westphalia, the republic recognised
by Europe. 1648
War with England—naval actions—Blake de-
feats De Ruyter, Oct. 22; but is surprised by
Van Tromp, who takes some English ships
and sails through the channel with a broom
at his mast-head. Nov. 29, 1652
Indecisive sea-fights, June 12-14; death of Van
Tromp, July 21; peace follows. 1653
Victorious war with Sweden. 1659
Another war with England. 1665
Indecisive sea-fights, June 1-4; victory of
Monk over De Ruyter. July 25, 1666
Triple alliance of England, Holland, and
Sweden against France. 1668
Charles II. basely deserts Holland, and unites
with France. 1670
The French overrun Holland. 1671
Desperate condition of the States—the popu-
lace massacre the De Witts—William III.
made stadtholder. 1672
The French repelled by the sluices being opened
Indecisive campaigns. 1673-7
William marries princess Mary of England. 1677
Peace with France (Nimeguen). 1678
William becomes king of England. 1689
Sanguinary war with France. 1689-96
Peace of Ryswick signed. Sept. 11, 1697
Death of William. March 8, 1702
No stadtholder appointed—administration of
Heinsius. 1702
War against France and Spain; campaigns of
Marlborough. 1702-13

HOLLAND, *continued.*

- Peace of Utrecht March 30, 1714
 Holland supports the empress Maria-Theresa 1743-8
 Peace of Aix-la-Chapelle Oct. 1748
 War with England for naval supremacy—Holland loses colonies 1781-4
 Civil wars in the Low Countries 1787-9
 The French republican army march into Holland; the people declare in their favour 1793
 Unsuccessful campaign of the duke of York with France 1794
 The Batavian republic established in alliance with France 1795
 Battle of Camperdown, Duncan signally defeats the Dutch Oct. 11, 1797
 The Texel fleet, of twelve ships of the line, with thirteen Indianen, surrenders to the British admiral, Duncan, without firing a gun Aug. 28, 1799
 A new constitution is given to the Batavian republic; the chief officer (R. J. Schimmelpenninck) takes the title of Grand Pensionary April 26, 1805
 Holland erected into a kingdom, and Louis Bonaparte declared king June 5, 1806
 The ill-fated Walcheren expedition 1809
 Louis abdicates July 1, 1810
 Holland united to France July 9, —
 Restored to the house of Orange, and Belgium annexed to its dominions Nov. 18, 1813
- The prince of Orange proclaimed sovereign prince of the united Netherlands Dec. 6, 1813
 Religious discord between Holland and the southern provinces 1817, &c.
 The revolution in Belgium Aug. 25, 1830
 Belgium separated from Holland July 12, 1831
 Holland makes war against Belgium Aug. 3, —
 Treaty between Holland and Belgium, signed in London April 19, 1839
 Abdication of William I. Oct. 7-10, 1840
 Death of the ex-king William I. Dec. 12, 1844
 Louis Bonaparte, count de St. Leu, ex-king of Holland, dies of apoplexy at Leghorn, July 25, 1846
 The king agrees to political reform, March; a new constitution granted April 17, 1848
 Death of William II. Mar. 17, 1849
 Re-establishment of a Roman Catholic hierarchy announced March 12, 1853
 Great inundations: 40,000 acres submerged and nearly 30,000 villagers made destitute, Jan. and Feb. 1861
 Great fire at Endschedé, the Manchester of Holland, loss about a million pounds, May 7, 1862
 The states general pass a law for the abolition of slavery in the Dutch West Indies, Oct. 5, — [To commence July 1, 1863.]

PRINCES OF ORANGE (*see Orange*) STADTHOLDERS.

1502. Philibert de Chalon.
 1530. René de Nassau, his nephew.
 1544. William of Nassau, styled the Great, cousin to René, recovers the principality of Orange in 1559. Nominated STADTHOLDER in 1579; killed by an assassin hired by Philip II. of Spain, July 10, 1584.
 1584. Philip-William, his son: stolen away from the university of Louvain; the Dutch would never suffer him to reside in their provinces: died in 1618.
 1618. Maurice, the renowned general; became STADTHOLDER in 1587; he was a younger son of William by a second marriage.
 1625. Frederick Henry (brother) STADTHOLDER.
 1647. William II., STADTHOLDER: married Mary, daughter of Charles I. of England, by whom he had a son, who succeeded in 1672.
- [1650-72. The States govern without a stadtholder.]
 1660. William-Henry: STADTHOLDER in 1672; married Mary, eldest daughter of James II. of England, 1677.
 1702-47. No stadtholder.
 1702. John-William, nephew of William III., loses the principality of Orange, which is annexed to France.
 1747. William-Henry becomes HEREDITARY STADTHOLDER. He married princess Anne of England: succeeded by his son.
 1751. William IV.; retired on the invasion of the French in 1795; died in 1806.
 1795. [Holland and Belgium united to the French republic.]
 1806. William-Frederick succeeded his father.

KINGS OF HOLLAND AND THE NETHERLANDS.

1806. Louis Bonaparte, made king of HOLLAND by his brother Napoleon, June 5, 1806; abdicated, July 1, 1810.
 1810. [Holland again united to France.]
 1813. House of Orange restored. William-Frederick, prince of Orange, born 1772, proclaimed Dec. 6, 1813; took the oath of fidelity as sovereign prince, March 30, 1814; assumed the style of king of the NETHERLANDS, March 16, 1815; formally abdicated in favour of his son, Oct. 7, 1840; died Dec. 12, 1843.
 1840. William II.; born Dec. 6, 1792; succeeded on his father's abdication; died March 17, 1849.
 1849. William III., son of the preceding; born Feb. 19, 1817. THE PRESENT (1862) king.
Heir: Prince William, born Sept. 4, 1840.

HOLLAND, NEW. *See Australia and Australasia.*

HOLMFIRTH FLOOD. The Bilbury reservoir above Holmfirth, near Huddersfield, in Yorkshire, suddenly burst its banks, and levelled to the ground four mills, many ranges of houses and other buildings, destroying the lives of more than 90 persons, and devastating property estimated at from half a million to 800,000*l.*, and throwing upwards of 7000 individuals out of work, Feb. 5, 1852.

HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the ninth century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family now reigns in Denmark.

From a younger branch (the dukes of Holstein-Gottorp) descended, through marriage, the kings of Sweden from 1751—1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814. On May 28, 1831, constituent assemblies were granted for the duchies. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia: war ensued, which lasted till 1850. See *Denmark*. The agitation in the duchies encouraged by Prussia, revived in 1857, and still continues. The Germans in Schleswig desire it to be made a member of the German confederation, like Holstein; and both duchies demand a local government more independent of Denmark, which changes are naturally resisted by that power. Population in 1860, 1,004,473.

HOLY ALLIANCE, was ratified at Paris, Sept. 26, 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions and future conduct, with a view to perpetuating the peace they had achieved, and then enjoyed. The compact was severely censured in this country by many, who believed it to be opposed to rational liberty.

HOLY GHOST. See *Esp'rit, St.*

HOLY ISLAND. See *Lindisfarne*.

HOLY MAID OF KENT.—Elizabeth Barton was incited by the Roman Catholic party to hinder the Reformation, by pretending to inspirations from heaven. She foretold that Henry VIII. would die a speedy and violent death if he divorced Catherine of Spain and married Anne Boleyn, and direful calamities to the nation. She and her confederates were hanged at Tyburn, April 20, 1534. *Rapin*.

HOLY PLACES IN PALESTINE. The possession of these places has been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed in the hands of the Latin monks, under the protection of the French government, by a treaty with the then sultan; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from some of the sacred buildings, which were committed to the care of the Greeks by a hatti-scheriff, or imperial ordinance. In 1808 the holy sepulchre was partially destroyed by fire, and rebuilt by the Greeks, who thereon claimed additional privileges, and thus caused fresh dissensions. In 1819 the Russian and French governments interfered, and sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; but an arrangement was prevented by the Greek revolution in 1821. In 1850 the subject was again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly. The result of the commission was, that a firman was issued by the Porte, March 9, 1852, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, &c., as in former times. The French government acquiesced in this decision, though with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. Shortly after, M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of March 9, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments, March, 1853. On Feb. 28, Prince Menschikoff arrived at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made those demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. See *Russo-Turkish War*.

HOLY ROOD. The festival of the Holy Rood, or Cross, was instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about A.D. 615. The feast of the finding (or invention) of the Cross is on May 3; that of the exaltation of the Cross, Sept. 14. At Boxley abbey, in Essex, was a crucifix, called the *Rood of Grace*; at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, March 9, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. Great improvements were made in 1857. The Queen held her court here, Aug. 30, 1850.

HOLY WARS. See *Crusades*.

HOLY WATER is said to have been used in churches as early as A.D. 120. *Ashe*.

HOMELDEN (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), Sept 14, 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMER'S ILIAD AND ODYSSEY. The misfortunes of Troy furnish the two most perfect Epic poems in the world, written by the greatest poet that has ever lived; about 915 B.C. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Ulysses after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C. Among the thousands of volumes burnt at Constantinople, A.D. 477, are said to have been the works of Homer written in golden letters on the great gut of a dragon, 120 feet long.

HOMICIDE. This crime was tried at Athens by the Areopagites, 1507 B.C. He that killed another at any public exercise of skill, or who killed another that lay hid to do a person mischief of a grievous nature, was not deemed guilty. He who killed a man taken with another's wife, sister, daughter, or concubine, or he that killed a man who, without just grounds, assaulted another violently, was not deemed a homicide. Among the Jews, wilful murder was capital; but for chance-medley the offender was to fly to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Num. xxxv.*) 9 Geo. IV. c. 31 (1828), distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness. See *Murder*.

HOMILIES (*Greek*) were sermons or discourses in early Christian times delivered by the bishop or presbyter, in a homely manner, for the common people.—The Book of Homilies drawn up by archbishop Crammer, 1547; and another prepared by an order of convocation, 1563, were ordered to be read in those churches that were not furnished with a minister sufficiently learned to compose proper discourses, to prevent unsound doctrine being taught. *Stow*.

HOMOEOPATHY, a medical hypothesis promulgated at the commencement of the present century by the late Dr. Samuel Hahnemann, of Leipsic (died 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system; and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, are employed, it is said, with efficacy. The real merits of the system consists in its inducing the patient to regulate his diet and habits according to the dictates of common sense.—The Hahnemann hospital was opened in Bloomsbury-square, Sept. 16, 1850.

HOMOUSION AND HOMOIOUSION (*Greek*, same essence, and similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, A.D. 325; the Arians adopted the latter at Seleucia, 359.

HONDURAS, one of the republics of Central America (*which see*). Great Britain ceded the Bay Islands to Honduras, Nov. 28, 1859. Its present president, general Guardiola, was re-elected for four years, Feb. 1, 1860. Population, about 350,000 (1860).

HONEY-MOON. Among the ancients a beverage prepared with honey, such as that known as mead, and as metheglin, in England, was a luxurious drink. It was a custom to drink of diluted honey for thirty days, or a moon's age, after a wedding-feast, and hence arose the term *honey-moon*, of Teutonic origin. Attila the Hun drank, it is said, so freely of *hydromel* on his marriage-day, that he died of suffocation, A.D. 453.

HONG-KONG, an island off the coast of China, was taken by capt. Elliott, Aug. 23, 1839, and ceded to Great Britain, Jan. 20, 1841. Its chief town is Victoria, built in 1842, and erected into a bishopric in 1849. Sir John Bowring, governor from 1854 to 1859, resumed the office in Nov. 1860.

HONI SOIT QUI MAL Y PENSE, "Evil be to him who evil thinks." It is said that the countess of Salisbury, at a ball at court, happening to drop her garter, the king, Edward III., took it up, and presented it to her with these words, which afterwards became the motto of the garter; but this statement is unsupported by sufficient authority.—The order was instituted, April 23, 1349.

HONOUR. Temples were erected to Honour by the Romans. The first was built by Scipio Africanus, about 197 B.C.; and others were raised to her worship by C. Marius, about 102 B.C.—The *Legion of Honour* was created by Bonaparte in 1802.

HOOKS AND CODFISH. See *Holland*, 1347

HOOPS. See *Crinoline*.

HOPS. Introduced from the Netherlands, into England, about A.D. 1524, and used in brewing; but the physicians having represented that they were unwholesome, parliament was petitioned against them, and their use was prohibited in 1528. *Anderson*. At present there are between 50,000 and 60,000 acres, on an average, under the culture of hops in England. They are grown chiefly in Herefordshire, Kent, and Worcestershire. In the year ending Jan. 5, 1853, there were 46,157½ acres under hops in England and Wales, which paid 447,144*l.* duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported. The duty on hops was repealed in 1862, after many applications.

HORATH AND CURIATII. The Romans and the Albans, contesting for superiority, chose three champions on each side to determine it. The three Horatii (Roman knights) and the Curiatii (Albans) engaged in the combat, which, by the victory of the Horatii, united Alba to Rome, about 669 B.C.

HORN; HORNPIPE. The horn is thought to be, next to the reed, the earliest wind instrument, and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *piib-corn*, that is, hornpipe, about A.D. 1300. *Spencer*.

HORNE TOOKE, &c. The trial of Messrs. Hardy, Tooke, Joyce, Thelwall, and others, on a charge of high treason, caused a great sensation in England. They were taken into custody on May 20, 1794. Mr. Hardy was the first who was put to the bar, Oct. 29, same year; and, after a trial which lasted eight days, he was honourably acquitted. John Horne Tooke was next tried, and was acquitted, Nov. 20; and Mr. Thelwall also was acquitted, Dec. 5; all the other accused persons, were discharged. Acts were passed to prohibit Mr. Thelwall's political lectures in 1795. See *Gagging Bills* and *Thelwall*.

HOROLOG. See *Clocks*.

HORSE.* The people of Thessaly were excellent equestrians, and probably were the first, among the Greeks at least, who rode upon horses, and broke them in for service in war; whence arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen;" 1014 B.C. 1 *Kings*. iv. 26. The power of the horse is equal to that of five or six men. *Smeaton*. The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the ninth century horses were only shod in the time of frost. The practice of shoeing was introduced into England by William I. 1066. In England there are two millions of draught and pleasure horses, and one hundred thousand agricultural horses, which consume the produce of seven millions of acres. The horse-tax was imposed in 1784, and was then levied on all saddle and coach horses in England. Its operation was extended, and its amount increased, in 1796; and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000*l.* per year. See *Race-Horses*.

HORSE GUARDS. They were instituted in the reign of Edward VI. 1550, and revived by Charles II. 1661. The first troop of the Horse Grenadier Guards was raised in 1693, and

* In March, 1858, Mr. J. S. Rarey, an American, made a great sensation in London by taming vicious and wild horses, and even a zebra from the Zoological Gardens. His system is founded on a profound study of the disposition of the animal, and on kindness. He initiated many illustrious persons in his method (on March 20, 1858, lord Palmerston and twenty others), binding them to secrecy; from which they were released in June, 1858, when his book was reprinted in England without his consent. In July, 1859, he was engaged to instruct cavalry officers and riding-masters of the army. On Jan. 12, 1860, he gave a lecture to the London cabmen, which was well received; and in May same year he received a present of 20 guineas from the Society for the Prevention of Cruelty to Animals.

was commanded by general Cholmondeley; and the second troop, commanded by lord Forbes, was raised in 1702. There was a reduction of the Horse and Grenadier Guards, and Life Guards, as now established, were raised in their room, May 26, 1788. *Phillips*. The present edifice called the Horse Guards was erected by Ware about 1730. In the front are two small arches, where horse-soldiers, in full uniform, daily mount guard. In a part of the building is the office of the commander-in-chief.

HORTICULTURAL SOCIETIES. Horticulture, the art of cultivating gardens, is a late word in our dictionaries (from *hortus* and *cultura*), and was first used by Evelyn. The (now Royal) Horticultural society of London was founded in 1804, and was incorporated April 17, 1809; the Edinburgh society in 1809; and that of Dublin in Jan. 1817. The transactions of the London society (1812, &c.) have attracted great attention. In 1822 the planting of the society's garden at Chiswick was begun. The annual exhibitions there date from 1831. Of late years the society has not been prosperous, and in 1859 the library was sold; but in July a proposal for laying out a garden for the society, on the Brompton estate belonging to the Crystal Palace commissioners, received the support of the queen, nobility, &c., and Mr. Nesfield's design was adopted in May, 1860. On June 5, 1861, the new gardens were opened by the prince consort, who planted a *Wellingtonia gigantea* (*which see*). The queen also planted one on July 24 following.

HOSIERY. See *Stockings* and *Cotton*.

HOSPITALERS. See *Malta*.

HOSPITALS, originally *Hospitia* for the reception of travellers. That at Jerusalem, built by the knights of St. John 1112, was capable of receiving 2000 guests, and included an infirmary for the sick. The richly endowed "five royal hospitals," under "the pious care of the lord-mayor of London," &c., are, St. Bartholomew's, St. Thomas's, Bridewell, Bethlehem, and Christ's. See *Infirmaries*. The Royal Dispensary in Aldersgate-street was the first established, 1770.

HOST, ELEVATION OF THE, introduced into Roman Catholic worship, and prostration enjoined, in A.D. 1201. Pope Gregory IX. was the first pontiff who decreed a bell to be rung as a signal for the people to betake themselves to the adoration of the host, 1228, which is done to this day. *Rees*. The supposed miracle of the consecrated host being visibly changed into the body of our Lord, is referred by Hénault to 1290.

HOURS. The day began to be divided into hours from the year 293 B.C., when L. Papirius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*), 158 B.C., the time was called at Rome by public criers. The Chinese divide the day into twelve parts of two hours each. The Italians reckon twenty-four hours round, instead of two divisions of twelve hours each, as we do. In England, the measurement of time was, in early days, alike uncertain and difficult: one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours: these candles are said to have been invented by Alfred, clocks and hour-glasses not being then known in England, A.D. 886. For the *Hours of Prayer*, see *Breviary*.

HOUSE DUTY was imposed in 1695. Its rate was frequently changed till its repeal in 1840 (3 & 4 Will. 4. c. 39). It was re-imposed as a substitute for the window tax, in 1851.

HOUSE OF COMMONS, LORDS, &c. See *Parliament*, *Lords*, and *Commons*.

HOWARD FAMILY. John Howard, son of Margaret, the heiress of the Mowbrays, was created earl marshal and the 7th duke of Norfolk in 1483. He was slain with his master,

Richard III. at Bosworth, Aug. 22, 1485. His son, was restored to the earldom of Surrey in 1489; in reward for having gained the victory of Flodden, Sept. 9, 1513, he was created the 8th duke of Norfolk in 1514. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. Henry Fitzalan Howard, now the 21st duke of Norfolk, and the 18th of the Howard family, was born in 1847.

HUDSON'S BAY, discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, A.D. 1610; but, in fact, this part of North America may more properly be said to have been discovered by Frobisher in the reign of Elizabeth, although Hudson ventured further north. The latter, passing the winter in this bay on his fourth voyage, was, with four others, thrown by his sailors into a boat, and left to perish. The Hudson's-Bay Company obtained a charter in 1670. The renewal of their licence which expired in 1859, was decided against by the government. The forts were destroyed by the French in 1686 and 1782.

HUE AND CRY. The old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710. *Ashe*.

HUGUENOTS, a term derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Genevese Calvinist; applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy in 1562 (March 1), when the Civil Wars began, which lasted with some intermission till the edict of Nantes in 1598, revoked in 1685. The massacre of St. Bartholomew's day, Aug. 24, 1572, occurred during a truce. See *Calvinists*, *Bartholomew*, and *Edict*.

HULSEAN LECTURES (on Theology), were instituted at Cambridge by the will of the rev. John Hulse, who died in 1790. They began in 1820, when twenty lectures were given by the rev. Christopher Benson. In 1830 the number was reduced to eight.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned, was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes, and Cogan, but principally by the last three. The society has 221 receiving-houses, all of which are supplied with perfect and excellent apparatus, and designated by conspicuous boards, announcing their object. The principal receiving-house was erected in 1794, on a spot of ground given by his majesty George III. on the north side of the Serpentine river, Hyde-park. The motto of this society is appropriate—"Lateat scintillula forsan"—"a small spark may perhaps lie concealed." See *Drowning*.

HUMILIATI, a congregation of religious of the church of Rome, formed by some Milanese who had been imprisoned by Frederick I. 1162. The order had more than ninety monasteries; but it was abolished for luxury and cruelty by pope Pius V. and their houses were given to the Dominicans, Cordeliers, and other communities, in 1570.

HUMMING-BIRDS. Mr. Gould's beautiful collection of the skins of these birds was exhibited at the Zoological Gardens in 1851. His elaborate work on them in five folio volumes, with richly coloured plates, was completed in 1862.

HUNDREDS, a Danish institution; a hundred being a part or division of a shire, so called, as is supposed, from its having been composed of a hundred families, at the time the counties were originally divided by king Alfred, about A.D. 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor. *Law Dictionary*.

HUNGARY, part of the ancient Pannonia and Dacia, was subjected to the Romans about A.D. 106, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns, under Attila. See *Huns* and *Attila*. On his death, in 453, the Ostrogoths, Gepidæ, and Lombards at times held the country, which was however acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 894 the country was settled by a Scythian tribe named Vîngouros or Ungri (whence the German name *Ungarn*), and the Magyars of Finnish origin. The chief of the latter, Arpad, was the ancestor of a line of kings (see *below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, A.D. 934. The line of Arpad became extinct in 1309, when Charles Robert of Anjou ascended the throne. In 1526 it accrued to the house of Austria, in which it was made hereditary in 1687. War with Turkey was frequent from the 15th to the 18th century. The

Magyars have of late much intermingled with the German and Slavonic races. See *Austria*. Population (without the army) in 1857, 9,900,785.

Stephen, founder of the monarchy of Hungary, embraces and establishes Christianity and subdues the slaves, &c., receives the title of <i>Apostolic king</i> from the pope A.D.	997	Hungary declares itself a free state; Kossuth supreme governor April 14,	1849
The Poles overrun Hungary	1061	The Hungarians defeat the Imperialists before Gran April 18,	—
Dreadful ravages of the Tartars under the sons of Jenghis Khan, throughout Hungary, Bohemia, and Russia, 1241 & seq.	—	March of the Russian army through Galicia to assist the Austrians May 1,	—
Bela III. introduces the Greek civilisation 1174, &c.	—	The Austro-Russian troops defeat the Hungarians who retreat across the Waag June 21,	—
Victories of Louis the Great in Bulgaria, Servia, and Dalmatia	1344-82	Battle of Acs between the Hungarians and Austrians July 10,	—
He marches into Italy and avenges the murder of his brother, Andrew king of Naples	1348	Hungarians defeat Jellachich July 14,	—
Sanguinary anarchy: Elizabeth, queen of Louis, is drowned; and King* Mary, the daughter, marries Sigismond, of Brandenburg	1382	The Hungarians defeated by the Russians; Görgéy retreats after three days' battle, July 15,	—
They govern with great severity	1382-92	Battle before Komorn, between the insurgents and the Austro-Russian army July 16,	—
Sigismond's atrocious cruelties compel his subjects to invite the assistance of the Turks	1393	The insurgents under Bem enter Moldavia July 23,	—
Battle of Nicopolis: Bajazet vanquishes Sigismond and a large army Sept. 28,	1396	Again defeated by the Russians July 31,	—
Sigismond obtains the crown of Bohemia, and is elected emperor of Germany	1410	Utter defeat of the Hungarian army before Temeswar by gen. Haynau Aug. 9,	—
Albert of Austria succeeds to the throne of Hungary	1437	Görgéy and his army surrender to the Russians Aug.	—
Victories of the great John Hunniades (illegitimate son of Sigismond) over the Turks	1442-4	Kossuth, Bem, &c., escape to the Turkish frontiers, and are placed under the protection of Turkey at New Orsova (see <i>Turkey</i>), Aug. 21,	—
Who obtained a truce for 10 years	1444	Komorn surrenders to the Austrians; close of the war Sept. 27,	—
Which is broken by Ladislas king of Hungary (at the instigation of the pope). He is defeated and slain with a great part of his army, and the papal legate at Varna Nov. 10,	—	Batthyany tried at Pesth, and shot; many other insurgent chiefs put to death Oct. 6,	—
John Hunniades escapes and becomes regent (for Ladislas son of Albert).	1444-53	Amnesty granted to the Hungarian insurgents, who return home Oct. 16,	—
He raises the siege of Belgrade, July 14, and dies Sept. 10,	1456	Bem dies at Aleppo Dec. 10,	1850
The Hungarians insult the Turkish ambassadors, and war ensues: Solymán II. takes Buda	1526	The country remains in an unsettled state; many executions	1853-5
Disastrous battle of Mohatz (<i>which see</i>) Aug. 29,	1526	Crown of St. Stephen and royal insignia discovered and sent to Vienna Sept. 8,	1853
Hungary becomes subject to the house of Austria (see <i>Germany</i>)	—	Amnesty for political offenders of 1848-9, July 12,	1856
John Sobieski defeats the Turks in several battles, and raises the siege of Vienna Oct.	1683	During the Italian war in 1859, an insurrection in Hungary was in contemplation, and communications took place between Louis Napoleon and Kossuth; which circumstances it is said led the emperor of Austria to accede to the peace of Villafranca so suddenly, and shortly afterwards to promise many reforms and to grant more liberty to the Protestants in Hungary Aug.-Oct.	1859
Prince Louis of Baden defeats the Turks at Salenkemen Aug. 19,	1691	Recall of archduke Albert, general Benedek appointed governor April,	1860
Prince Eugene defeats them at Zenta, Sept. 11,	1697	Demand for restoration of the old constitution; re-union of the Banat and Voivodina with Hungary; coronation of the emperor at Pesth; and the nomination of a palatine (one of three persons to be chosen by the nation), ... Oct.	—
The duke of Lorraine retakes Buda (<i>which see</i>)	1686	Charter restoring the old constitution promised, ... Oct. 20,	—
Peace of Carlowitz	1699	Schinnerling appointed minister; new concessions promised Dec. 13,	—
Servia and Wallachia ceded to Turkey at the peace of Belgrade	1739	National conference at Gran Dec.	—
The Hungarians enthusiastically support Maria Theresa against France and Bavaria	1740	Demand for the constitution of 1848 Jan.	1861
The Protestants permitted to have churches in Hungary	1784	The emperor promulgates a new liberal constitution for the empire Feb. 26,	—
Hungarian academy established	1825	Which does not satisfy the Hungarians, March, Hungarian diet opened April 6,	—
The people some time discontented with their Austrian rulers, at length break out into a formidable rebellion	1848	Meeting of the Reichsrath at Vienna: no deputies present from Hungary or Croatia, April 29,	—
Murder at Pesth of the recently appointed military governor, count Lamberg, by a mob; the Hungarian diet appoint a provisional government under Kossuth and Batthyany, Sept. 28; the Hungarians defeat the Ban of Croatia Sept. 29,	—	Count Teleki (see <i>Austria</i> , 1860) found dead in his bed at Pesth; intense excitement, May 8,	—
The diet denounces as traitors all who acknowledge the emperor of Austria as king of Hungary Dec. 8,	—	The diet votes an address to the emperor, desiring restoration of the old constitution July 5,	—
The insurgents defeated by the Austrians at Szalkszó	—	The military begin to levy the taxes July,	—
They are defeated at Mohr by the ban Jellachich Dec. 29,	—	Imperial rescript refusing the entire independence of Hungary, July 21; the diet protests, Aug. 20; and is dissolved by imperial decree, ... Aug. 21,	—
Buda-Pesth taken by Windischgrätz Jan. 5,	1849		
Bem defeats the Austrians at Hermannstadt, Jan. 21,	—		

* The Hungarian people have or had an irreconcilable aversion to the name of *queen*; and consequently whenever a female succeeded to the throne of Hungary, she reigned with the title of *king*. Thus in 1382, when Mary came to the crown, she was styled *King Mary*. *Prag, Hist. Regum Hungarie*.

HUNGARY, *continued.*

The archbishop of Gran, the primate, indignantly protests against the act of the imperial government. Sept.-Oct. 1861
He is summoned to Vienna, but stands firm, Oct. 25, —

The magistrates in the comitat at Pesth resign; military government established; passive resistance of the nobility Dec. 1861
Reported adoption of conciliatory policy by the emperor Oct. 1862

KINGS OF HUNGARY.

997. St. Stephen, duke of Hungary (son of Geisa); he establishes the Roman Catholic religion, (1000) and receives from the pope the title of Apostolic King, still borne by the emperor of Austria, as king of Hungary.
1038. Peter, the German : deposed.
1041. Abu or Owen.
1044. Peter, again : again deposed, and his eyes put out.
1047. Andrew I. : deposed.
1061. Bela I. : killed by the fall of a ruinous tower.
1064. Salamon, son of Andrew.
1075. Geisa I. son of Bela.
1077. Ladislas I. surnamed the Pious.
1095. Coloman, son of Geisa.
1114. Stephen II. surnamed Thunder.
1131. Bela II. : had his eyes put out.
1141. Geisa II. : succeeded by his son,
1161. Stephen III. : and Stephen IV. (anarchy).
1174. Bela III. : succeeded by his son,
1195. Emeric : succeeded by his son,
1204. Ladislas II. : reigned six months only.
1205. Andrew II. son of Bela III.
1235. Bela IV.
1270. Stephen IV. (or V.) his son.
1272. Ladislas III. : killed.
1290. Andrew III. surnamed the Venetian, son-in-law of Rodolph of Hapsburg, emperor of Germany.
1309. Charobert, or Charles-Robert (of Anjou).
1342. Louis I. the Great; elected king of Poland in 1370.
1382. Mary, called *King Mary*, daughter of Louis the Great.
1387. Mary and her consort Sigismund : the latter became king of Bohemia, and was elected emperor in 1410.
1392. Sigismund alone (on the death of Mary).
1437. Albert, duke of Austria; married Elizabeth, daughter of Sigismund, and obtains the thrones of Hungary, Bohemia, and Germany; dies suddenly.
1439. Elizabeth alone : she marries,
1440. Ladislas IV. king of Poland, of which kingdom he was Ladislas VI. : slain at Varna.
1444. [Interregnum.]
1445. John Hunniades, regent.
1458. Ladislas V. posthumous son of Albert : poisoned.
— Matthias-Corvinus, son of Hunniades, an able sovereign.
1490. Ladislas VI. king of Bohemia : the emperor Maximilian laid claim to both kingdoms.
1526. Louis II. of Hungary (I. of Bohemia) : loses his life at the battle of Mohatz.
John Zapolski, waivode of Transylvania, elected by the Hungarians, and supported by the sultan Solymán; by treaty with Ferdinand, he founds the principality of Transylvania, 1536.
Ferdinand I. king of Bohemia, brother to the emperor Charles V. ; rival kings.
1536. Ferdinand alone : elected emperor of Germany in 1558.
1561. Maximilian, son of Ferdinand; emperor in 1564.
1573. Rodolph, son of Maximilian; emperor in 1576.
1609. Matthias II. his brother; emperor in 1612.
1619. Ferdinand II. his cousin, emperor.
1625. Ferdinand III. son of the preceding; emperor in 1637.
1647. Ferdinand IV. ; died in 1654, three years before his father.
1655. Leopold I. son of Ferdinand III. ; emperor in 1658.
1687. Joseph I. his son : emperor in 1705.
1711. Charles VI. (of Germany), brother of Joseph, and nominal king of Spain, succeeded by his daughter,
1740. Maria-Theresa, empress; survived her consort, Francis I., emperor, from 1765 until 1780. See *Germany*.
1780. Joseph II. her son, emperor in 1765; succeeded to Hungary on the death of his mother.
1790. Leopold II. brother of Joseph II., emperor : succeeded by his son,
1792. Francis I. (Francis II. as emperor of Germany) : in 1804 he became emperor of Austria only.
1835. Ferdinand V. son of Francis : Ferdinand I. as emperor of Austria.
1848. Francis-Joseph, nephew of the preceding : succeeded on the abdication of his uncle, Dec. 2, 1848. The PRESENT (1862) king of Hungary and emperor of Austria.

HUNGERFORD BRIDGE.* The elegant suspension foot bridge over the Thames from Hungerford-stairs to the Belvedere road; Lambeth, opened May 1, 1845, was taken down in July, 1862, to make way for the Charing Cross railway-bridge. The market (opened in July, 1833) was removed at the same time.

HUNS, a race of warlike Asiatics, said to have conquered China, about 210 B.C., and to have been expelled therefrom about A.D. 90. They invaded Hungary about 376, and drove out the Goths. Marching westward, under Attila, they were thoroughly beaten at Chalons by the consul Aëtius, 451. See *Attila*.

HUSSARS, light cavalry in Poland and Hungary, about 1600 : and as they were more fitted for a hasty enterprise than a set battle, they are supposed to have taken their name from the *huzzas* or shout they made at their first onset. They were generally opposed to the Turkish horse, "and were oddly clothed, having the skins of tigers and other wild beasts hanging on their backs against bad weather, and wore fur caps, with a cock's feather."

* It was 14 feet wide, and 1342 feet long; the length of the central span, between the two piers, 696 feet; the height of the two towers 55 feet above the footway, and 34 above high water; the piers were in the Italian style, with the chains passing through the attic of each. The cost of the masonry was 60,000*l.*; of the ironwork, exceeding 700 tons in weight, 17,000*l.*; of the approaches, 13,000*l.*; total 102,245*l.* Architect, I. K. Brunel.

Pardon. Hussars became the name of a British force in the last century (1759), very differently attired.

HUSSITES. After the death of Huss,* many of his followers took up arms, in 1419, and formed a political party under John Ziska, and burnt the city of Tabor. They defeated the emperor Sigismund several times 1420-22: but after being worsted in 1434 at Bömischbrod, they entered into negotiations, which ended in the Compact of Prague. They were again defeated by Albert of Austria in 1438. The pacific portion of the Hussites existed in the time of Luther, and were called "Bohemian Brethren."

HUSTINGS (said to be derived from *House Court*, and to have been the name of an assembly among the Anglo-Saxons). A very ancient court of the city of London. It is the supreme court of judicature, as the court of common council is of legislature, of that metropolis. *Allen.* The court of *Hustynys* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, A.D. 1052. *Bohun's Privilegia Londinii.* Winchester, Lincoln, York, &c., were also granted Hustings courts.

HUTCHINSONIANS included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire; they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, "*Moses' Principia*," was published in 1724. He derived all things from the air, whence he said proceeded fire, light, and spirit, types of the Trinity. He invented in 1712 a time-piece for finding the longitude, and died in 1737.

HYDE PARK, W. (London), the ancient Manor of Hyde, belonging to the abbey of Westminster, became crown property at the dissolution of religious houses in 1539. It was sold by order of parliament in 1652; but was resumed by the king at the restoration in 1661. It comprises about 394 acres, surrounded by drives, with a large winding sheet of water, called the Serpentine. There are eight entrances.

Colossal statue of Achilles, cast from cannon taken in the battles of Salamanca, Vittoria, Toulouse, and Waterloo, and inscribed to "Arthur, Duke of Wellington, and his brave companions in arms, by their countrywomen," erected on June 18, 1822
Hyde Park Corner Entrance erected 1828
Marble Arch from Buckingham palace set up at Cumberland gate March 29, 1851
Crystal palace erected for the exhibition of 1851
Disturbances in consequence of a Sunday bill having been brought before parliament by

lord Robert Grosvenor, which was eventually withdrawn, Sundays, June 25, and July 1 & 8, 1855
Riotous meetings held here, on account of the high price of bread, Sundays, Oct. 14, 21, 28, —
Democratic meetings on the Reform question, March, 1859
The queen reviewed 18,450 volunteers June 23, 1860
Great meeting of admirers of Garibaldi, Sept. 28;
who are violently attacked by the Irish;
many persons wounded Oct 5, 1862
Public meetings in the park henceforth prohibited Oct 9, —

HYDRAULIC PRESS. See under *Hydrostatics*.

HYDROGEN (from *hydōr*, water). In 1781 Cavendish and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently Lavoisier decomposed water into its elements. One volume of oxygen combines with two volumes of hydrogen, and forms water. Hydrogen is never found in the free state. It was at first called *inflammable air*. *Gmelin.*

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the fifth century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann.* Hypatia was torn to pieces, A.D. 415, and Archimedes was killed in 212 B.C.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by the Arabs in the 10th century. The present system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia; and though he is considered as its founder, the rational part of the doctrine was understood and maintained by the eminent Dr. Sydenham, before 1689. Priessnitz died, Nov. 26, 1851. *Brande.*

HYDROSTATICS were probably first studied in the Alexandrian school about 300 B.C.

Pressure of fluids discovered by Archimedes, about B.C.	250	The correct theory of fluids and oscillation of waves, explained by Newton	1714
The forcing pump and air fountain invented by Hero	about 120	A scientific form was given to hydro-dynamics, by Bernouilli	1738
Water-mills were known about A.D.	1	Joseph Bramah's hydrostatic or hydraulic press patented first in	1785
The science revived by Galileo	about 1600		
The theory of rivers scientifically understood in	1697		

* The clergy having instigated the pope to issue a bull against heretics, John Huss (born in Bohemia in 1373), a zealous preacher of the Reformation, was cited to appear before a council of divines at Constance,

HYGROMETER, an instrument for measuring the moisture in the atmosphere. That by Saussure (who died in 1799) is most employed. It consists of a human hair boiled in caustic ley, and acts on the principle of absorption. *Brande.*

HYMNS. Religious songs, or odes, have been used in worship in all ages. The song of Moses is the most ancient, 1491 B.C. (*Exod.* xv.) The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were usually accompanied with trumpets, drums and cymbals. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col.* iii. 16). Hilary, the bishop of Arles, in France, is said to have been the first who composed hymns to be sung in Christian churches, about A.D. 431. The hymns of Dr. Watts (died 1748), and of John Wesley (died 1791), and his brother Charles, are much used by English dissenters.

I.

IAMBIC VERSE. Iambe, an attendant of Metanira, wife of Celeus, king of Sparta, when trying to exhilarate Ceres, while the latter was travelling over Attica in quest of her daughter Proserpine, entertained her with jokes, stories, and poetical effusions; and from her, free and satirical verses have been called *Iambics*. *Apollodorus.* Iambic verses were first written about 700 B.C., by Archilochus, who had courted Neobulë, the daughter of Lycambes; but after a promise of marriage the father preferred another suitor, richer than the poet; whereupon Archilochus wrote so bitter a satire on the old man's avarice, that he hanged himself. *Herodotus.*

IBERIA. See *Georgia*.

ICE. Galileo was the first who observed ice to be lighter than the water which composed it, and therefore to float: about 1597.* See *Congelation*, where is noticed the ice-making machines of Harrison and of Siebe. In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham, Fresh, and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,640 tons were sent from Boston alone in 1854. In New York, in 1855, 305,000 tons were stored up, of which 20,000 were for exportation.

ICELAND (North Sea), discovered by Norwegian chiefs about A.D. 861; according to some accounts, it had been previously visited by a Scandinavian pirate. It was peopled by the Norwegians in 874, and has belonged to Denmark since 1397. Christianity was introduced about 996†; and protestantism about 1551.

"**ICH DIEN**," I serve. The motto under the plume of ostrich feathers found in the helmet of the king of Bohemia after he was slain at the battle of Cressy, at which he served as a volunteer in the French army. Edward the Black Prince, in veneration of his father, Edward III., who commanded that day, though the prince won the battle, adopted this motto, which has ever since been borne with the feathers, by the heirs to the crown of England; but not as prince of Wales, which many have erroneously maintained: Aug. 26, 1346.

ICONIUM (Syria). Here Paul and Barnabas preached, A.D. 38. Soliman the Seljuk founded a kingdom here in 1074, which lasted till 1307, when it was conquered by the Turks. It had been subdued by the Crusaders in 1097 and 1190. See *Konia*.

ICONOCLASTS (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about A.D. 300) was begun about 726, and occasioned many insurrections in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all

the emperor Sigismund sending him a safe-conduct. He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, July 6, 1415. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, May 30, 1416, although he also had a safe-conduct.

* *Regelation* and other properties, exhibited by professor Faraday, in 1850, are still the subject of investigation by eminent physicists of the present day, especially Tyndall, J. D. Forbes, and Wm. Thomson.

† In 1784-5, there occurred here the most tremendous volcanic eruption on record; it was accompanied by violent wind and rain, and a darkness of the heavens; and it was feared that the island would fall to pieces. Three fire-spouts broke out on Mount Skapta, which, after rising to a considerable height in the air, formed a torrent of red-hot lava that flowed for six weeks, and ran a distance of 60 miles to the sea, in a broken breadth of nearly 12 miles; 12 rivers were dried up; 21 villages totally overwhelmed by fire or water; and 34 others were materially injured. See *Hecla*.

the painters and statuary from the Eastern Empire, 832. The Iconoclasts were finally excommunicated in 869. This controversy led to the separation of the Greek and Latin churches. In the contests between the Iconoclasts and their opponents thousands perished. —Many images in churches were destroyed in England and Scotland during the Reformation and the Civil war, 1641-8.

IDES. In the Roman Calendar, the ides meant the thirteenth day of each month, except in March, May, July, and October, in which months it was the fifteenth day, because in these four it was six days before the nones, and in the other months four days. The Ides of March was the day on which Julius Cæsar was assassinated in the senate house by Brutus, Cassius, Casca, and other conspirators, 44 B.C.

IDIOTS. It is shown by returns (about 1855), that exclusively of lunatics, there were in England, pauper idiots, or idiots protected in national institutions, males, 3372; females, 3893; total, 7265. In England there is one lunatic or idiot in every 1033 individuals; in Wales there is one in every 807; in Scotland, one in 731; and in Ireland, one in 812. For laws relating to idiots, see *Lunacy*. The Idiot Asylum at Earlswood, near Reigate, Surrey, began in 1847.

IDOLS. The public worship of idols was introduced by Ninus, king of Assyria, 2059 B.C. *Vossius*. Images are mentioned in *Gen.* xxxi. 19, 30, 1739 B.C. The Jews frequently deserted the worship of God for idols till their captivity, 588 B.C. Constantine, emperor of Rome, ordered all the heathen temples to be destroyed, and all sacrifices to cease, A.D. 330. *Dufresnoy*. The Saxons re-established idolatry in 473. It gave way in Britain, after the coming of Augustin, 599. See *Iconoclasts*, *Week*.

IDSTADT (N. Germany). Here the armies of Holstein and Schleswig were defeated by the Danes, July 25, 1850.

IDUMÆA, the country of the Edomites, the descendants of Esau, the brother of Jacob; see *Gen.* xxxvi., *Josh.* xxiv. 4.

The Edomites prevent the Israelites from passing through their country B.C. 1453	They join the Chaldeans against Judah, and are anathematized in <i>Psalms</i> cxxxvii. about 570
They are subjugated by David 1040	John Hyrcanus, the Maccabee, subjugates and endeavours to incorporate them with the Jews 125
They revolt against Ahaziah, 892; and are severely defeated by Amaziah 827	Herod the Great, son of Antipater an Idumaean, king of Judæa 40

ILIUM (Asia Minor). A city was built here by Dardanus, and called Dardania, 1480 B.C. Troy (*which see*), another city, was founded by Troas, about 1341 B.C.; and Ilus, his successor, called the country *Ilium*.

ILLUMINATED BOOKS. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity; and illuminated pages are, many of them, exquisitely painted. Varro wrote the lives of 700 illustrious Romans, which he embellished with their likenesses, about 70 B.C. *Plin. Nat. Hist.* Some beautiful missals and other works were printed in the fifteenth and sixteenth centuries, *et seq.*; and fine imitations have lately appeared.

ILLUMINATI, heretics who sprang up in Spain, where they were called Alumbrados, about A.D. 1575. After their suppression in Spain, they appeared in France. One of their leaders was friar Anthony Buchet. Their chief doctrine was that they obtained grace and perfection by their sublime manner of prayer. A secret society bearing this name, opposed to tyranny and priestcraft, was founded at Ingoldstadt, Bavaria, by Dr. Adam Weishaupt, in May, 1776. It was suppressed in 1784-5.

ILLYRIA (now Dalmatia, Croatia, and Bosnia), after several wars (from 230 B.C.) was made a Roman province, 167 B.C.

IMAGE WORSHIP. See *Iconoclasts*.

IMMACULATE CONCEPTION. See *Conception*.

IMMORTALS (Greek, *athanatoi*), a name given to the flower of the Persian army, limited to 10,000 in number, and recruited from the nobility alone, about 500 B.C. The name was also given to the body-guard of the emperors at Constantinople in the 4th and 5th centuries.

IMPEACHMENT. The first impeachment by the commons house of parliament, and the first of a lord chancellor, Michael de la Pole, earl of Suffolk, was in 1386. By statute 12 & 13 Will. & Mary it was enacted, that no pardon under the great seal shall be pleaded to an impeachment by the commons in parliament, 1700.

IMPEACHMENT, *continued.*

Impeachment of Warren Hastings, Feb. 13, 1788, to April 25, 1795; an acquittal.
Impeachment of lord Melville, April 29; acquittal, June 12, 1806.
Inquiry into the charges preferred by colonel Wardle against the duke of York, Jan. 27 to March 20, 1809; acquittal

Trial of Caroline, queen of George IV., by bill of pains and penalties, before the house of lords, commenced Aug. 16, Mr. Brougham entered on her majesty's defence, Oct. 3; and the last debate on the bill took place Nov. 10, 1820. See *Queen of George IV.*

IMPERIAL GUARD of France, was created by Napoleon from the Guard of the Convention, the Directory, and the Consulate, when he became emperor in 1804. It consisted at first of 9775 men, but was afterwards enlarged. It was subdivided in 1809 into the old and young guard. In Jan. 1814, it numbered 102,706. It was dissolved by Louis XVIII. in 1815, but revived by Napoleon III. in 1854. It took part in the Crimean war in 1855.

IMPERIAL PARLIAMENT. See *Commons, Lords, Parliament, and Reform.*

IMPORTS OF MERCHANDISE. The following is a statement of the amount of imports into Great Britain, at different periods in the last and present century. It shows, with the statement of the value of British exports (see *Exports*), the vast progressive increase of our commercial intercourse with other countries:—

VALUE OF IMPORTS INTO GREAT BRITAIN, FROM ALL PARTS OF THE WORLD.

In 1710	£4,753,777.	In 1820	£36,514,564	In 1851	£103,579,582
1750	7,289,582.	1830	46,245,241	1856	172,544,154
1775	14,815,855.	1840	62,004,000	1857	187,844,441
1800	30,570,605	1845	85,281,958	1859	179,182,355
1810	41,136,135	1850	95,252,084	1861	217,351,881

IMPOSTORS. The names and pretensions of religious, political, and other impostors would fill a volume; they have been of every country, of every age. The following are among the most extraordinary:—

Aldebert, a Gaul, who, in A.D. 743, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and forests, and to live in imitation of John the Baptist. He was condemned by a council at Rome in 745.

Mahomet promulgated his creed, A.D. 604. See *Mahometanism.*

Gonzalvo Martin, a Spaniard, pretended to be the angel Michael in 1359; he was burnt by the inquisition in Spain in 1360.

George David, son of a waterman at Ghent, styled himself the son of God, sent into the world to adopt children worthy of heaven: he denied the resurrection, preached against marriage, in favour of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Basle, 1556, promising to rise again in three years.

Otreleif, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another child had been substituted in his place: he was supported by the arms of Poland: his success astonished the Russians, who invited him to the throne, and delivered into his hands, Feodor, the reigning czar, and all his family: his imposture being discovered, he was assassinated in his palace, 1606.

Sabbata Levi, a Jew of Smyrna, amused the Turks and Jews a long time at Constantinople and other places, by personating our Saviour, 1666.

IMPOSTORS EXTRAORDINARY IN BRITISH HISTORY.

A man pretending to be the Messiah, and a woman assuming to be the Virgin Mary, were burnt, 1222. In 1487, Lambert Simnel, tutored by Richard Simon, a priest, supported by the duke of Burgundy, personated the earl of Warwick. Simnel's army was defeated by Henry VII., and he was made a scullion in the king's kitchen.

For Perkin Warbeck's imposture in 1492, see *Warbeck*.

Elizabeth Barton, styled the Holy Maid of Kent, spirited up to hinder the Reformation, by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain, and married Anne Boleyn. She and her confederates were hanged at Tyburn, 1534.

In 1553 (first year of Mary's reign, after her marriage with Philip of Spain), Elizabeth Croft, a girl 18 years of age, was secreted in a wall, and with a whistle, made for the purpose, uttered many seditious speeches against the queen and the prince, and also against the mass and confession, for which she did penance.

William Hacket, a fanatic, personated our Saviour, and was executed for blasphemy, 1591.

Valentine Greatrix, an Irish impostor, who pretended to cure all diseases by stroking the patient: his imposture deceived the credulous, and occasioned very warm disputes in Ireland and England about 1666. Boyle and Flamsteed believed in him.

Dr. Titus Oates. See *Oates*.

Robert Young, a prisoner in Newgate, forged the hands of the earls of Marlborough, Salisbury, and other nobility, to a pretended association for restoring king James: the lords were imprisoned, but the imposture being detected, Young was fined 1000*l.*, and put in the pillory, 1692. He was afterwards hanged for coining.

Three French refugees pretend to be prophets, and raise tumults; convicted as impostors, Nov. 1707. Mary Tofts of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr. St. Andre, surgeon to the king), that they espoused her cause, 1726.

The Cock-lane ghost imposture by William Parsons, his wife, and daughter, 1762. See *Cock-lane Ghost*. Johanna Southcote, who proclaimed her conception of the Messiah, and had a multitude of followers; she died, Dec. 27, 1814.

W. Thom. See *Thomites*.

Joseph Smith. See *Mormonites*.

IMPRESSMENT OF SEAMEN, affirmed by sir M. Foster to be of ancient practice. The statute 2 Rich. II. speaks of impressment as a matter well known, 1378. The first commission for it was issued 29 Edw. III. 1355. Pressing, either for the sea or land service, declared to be illegal by the British parliament, Dec. 1641. None can be pressed into the king's naval service above 55, nor under 18. No apprentices nor landsmen who have not served at sea for three or two years. No masters of merchants' ships, first-mates of 50 tons, and boatswains and carpenters of 100 tons. No men employed by the public boards, and none except by an officer with a press warrant. Impressment was not resorted to in the Russian war, 1854-5.

IMPRISONMENT FOR DEBT. See *Arrest, Debtors*, and *Ferrars' Arrest*.

IMPROPRIATION (applying ecclesiastical property to lay purposes). On the suppression of abbeys in 1539, their incomes from the great tithes were distributed among his courtiers by Henry VIII. ; and their successors constitute 7597 lay impropiators.

INCENDIARIES. The punishment for arson was death by the Saxon laws and Gothic constitutions. In the reign of Edward I. incendiaries were burnt to death. This crime was made high treason by statute 8 Hen. VI. 1429 : and it was denied benefit of clergy, 21 Hen. VIII. 1528. Great incendiary fires commenced in and about Kent, in August, 1830 ; and in Suffolk and other counties since. The punishment of death was remitted, except in special cases, in 1827 (see *Arson*). The acts relating to this crime were amended in 1837 and 1844.

INCOME TAX. In 1512, parliament granted a subsidy of two-fifteenths from the commons, and two-tenths from the clergy, to enable the king to enter on a war with France. *Rapin.* In 1798 Mr. Pitt proposed and carried, amid great opposition, increased taxes "as an aid for the prosecution of the war" with France. On Jan. 9, 1799, this act was repealed, and graduated duties on income imposed, beginning with 6*ol.* per annum. In Aug. 1803, was passed the "property tax" which levied a rate of 5 per cent. on all incomes above 15*ol.* and lower rates on smaller incomes. In 1805, it was increased to 6½ per cent. ; and in 1806, was raised to 10 per cent. embracing the dividends at the bank. It produced—

In 1804, at 1*s.* in the pound £4,650,000
In 1805, at 1*s.* 3*d.* ditto 5,937,500

In 1806, at 2*s.* in the pound £11,500,000
And subsequently 16,548,985

The tax produced from lands, houses, rentages, &c., 8,657,937*l.* ; from funded and stock properties, 2,885,505*l.* ; the profits and gains of trade, 3,831,088*l.* ; and salaries and pensions, 1,174,456*l.* : total, sixteen millions and a half. Repealed March, 1816.

Sir Robert Peel's bill imposing the present tax at a rate of 7*d.* in the pound (2*l.* 18*s.* 4*d.* per cent.) per *ann.* to subsist for three years, passed June 22, 1842. It produced about 5,350,000*l.* a-year ; and enabled sir Robert Peel to repeal about 12,000,000*l.* of indirect taxes.

Renewed for three years in March, 1845 : and March, 1848.*

Continued for one year in 1851 and 1852. The tax of 7*d.* limited to seven years (till 1860) ; to be gradually reduced in amount ; but all incomes from 10*ol.* to 15*ol.* made liable to 5*d.* in the pound for all that period : the tax also extended to Ireland, June, 1853.

In consequence of the breaking out of the war, the rate was doubled, 1854.

2*d.* more added to the tax on incomes above 15*ol.*,

and 1½*d.* on those between 10*ol.* and 15*ol.* ; the former being 1*s.* 4*d.*, the latter 11½*d.* in the pound, 1855.

The former assessment reduced to 7*d.*, the latter to 5*d.*, 1857.

Both become 5*d.*, 1858.

The former raised to 7*d.* the latter to 6½*d.* ; and the tax on incomes, derived from lands, tenements, &c., raised from 3½*d.* to 5½*d.* for England, and from 2½*d.* to 4*d.* for Scotland and Ireland, July, 1859.

The assessment on incomes raised—to those above 10*ol.* to 7*d.* ; to those above 15*ol.* to 10*d.*

[The object of the increase was to provide for a deficiency occasioned by extra expenditure for defending the country, April, 1860.]

A committee to inquire into the working of the income tax appointed, Feb. 14, 1861.

Reduction of the last assessment from 7*d.* to 6*d.*, and from 10*d.* to 9*d.* for three-quarters of the financial year 1861-2.

The rates of 6*d.* and 9*d.* to continue, April 1862.

NET PRODUCE OF THE INCOME TAX.

1842	£571,055	1854	£7,456,025	1859	£5,891,439
1844	5,191,597	1855	13,718,185	1860	12,666,655
1846	5,395,391	1856	15,717,155	1861	9,687,750
* 1850	5,383,037	1857	14,808,328		
1852	5,509,637	1858	7,335,796		

INCUMBERED ESTATES. See *Encumbered Estates*.

INCURABLES. The Royal Hospital for incurables, founded by Dr. Andrew Reed, at Carshalton in Surrey, in 1850, has since been removed to Putney.

INDEMNITY BILL, by which the minister of the crown, or the government generally, is relieved from the responsibility of measures adopted in extreme and urgent cases without

* Large meetings assembled in Trafalgar-square, London, March 6, 7, 1848 (for the ostensible purpose of opposing the Income Tax) ; rioting ensued, which was soon quelled.

the previous sanction of parliament. One was passed April 19, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27); March 10, 1818. In 1848 and 1857 bills of indemnity were passed for the suspension of the Bank Charter act by the ministry.

INDEPENDENTS, or CONGREGATIONALISTS. They are such as hold that each church or congregation is independent of all others, and may govern itself in religious matters. They say there is no absolute occasion for synods or councils, whose resolutions may be taken to be wise and prudent advice, but not as decisions to be peremptorily obeyed; they affirm that one church may advise or reprove another; but has no authority to excommunicate or censure. Robert Brown preached these views in 1585, but, after 32 imprisonments, conformed to the Established Church. A church was formed in London in 1593, when there were 20,000 Independents. They were driven, by persecution, to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of Independency. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, who was himself of their views, obtained them toleration, in opposition to the Presbyterians.—The Independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the Congregational Union of England and Wales, formed in 1831, published their "Declaration of Faith, Order, and Discipline," in 1833. In 1851, they had 3244 chapels in England and Wales. See *Worship*. The first Independents in Scotland were the Glasites, *which see*.

INDEX EXPURGATORIUS, a catalogue of the books prohibited by the church of Rome, first made by the Inquisitors, and approved by the council of Trent, 1559. The Index of heretical books, by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595. Most of the celebrated works of France, Spain, Germany, and England are still prohibited.

INDIA, or HINDOSTAN. The Hindoo histories ascribe their origin to a period ages before the ordinary chronologies. A race of kings is mentioned as reigning 2300 B.C. Buddhism is said to have been introduced 956 B.C. Many ancient nations, particularly the Tyrians and Egyptians, carried on much commerce with India. It was conquered by Darius Hystaspes, who formed an Indian satrapy, in 512 B.C., and by Alexander 327 B.C., and subsequently the intercourse between India and the Roman empire was very great. The authentic history of Hindostan is reckoned to commence with the conquests of Mahmud Ghazni, A.D. 1004. *Rennell*. See *Bengal, Bombay, Calcutta, Madras, and Oude*, for further details.* For the new route to India see *Waghorn*.

Ruption of the Mahometans, under Mahmud
 Ghazni about A.D. 1004
 Patna, or Afghan empire, founded 1205
 Invasion of Genghis Khan, one of the most
 bloody conquerors of the world; 14,000,000
 of the human race perish by his sword under
 the pretence of establishing the worship of
 one god, 1222: he died 1227
 The Mogul Tartars, under the conduct of the
 celebrated Timour, or Tamerlane, invade
 Hindostan, and take Delhi; defeat the Indian
 army; conquer Hindostan, and butcher
 100,000 of its people 1398-9
 The passage to India discovered by Vasco de Gama 1497
 The first European settlement (Portuguese)
 established by him at Cochim (S. coast) 1502
 Conquest of the country completed by the
 sultan Baber, founder of the Mogul empire 1525
 Prosperous reign of the illustrious Akbar, the
 greatest prince of Hindostan 1556-1605
 Reign of Jehanghir 1605-27
 Reign of Shah Jehan 1627-58
 Sevajee establishes the Mahratta power 1650-80
 Aurungzebe dethrones his father: his dominions
 extend from 10 to 35 degrees in latitude, and
 nearly as much in longitude, and his revenue
 amounts to 32,000,000*l.* sterling 1658-1707

Shah Alum succeeds Aurungzebe, 1707; killed, 1712
 Jehannder Shah dethroned and killed 1712
 Feruk Shore assassinated 1717
 Invasion of the Persian Nadir Shah or Kouli
 Khan: at Delhi he orders a general massacre,
 and 150,000 persons perish; carries away
 treasure amounting to 125,000,000*l.* sterling, 1739
 Mahommed Shah dies 1747
 Defeat of the last imperial army by the Rohillas, 1749
 [The Mogul empire now became merely nominal,
 distinct and independent sovereignties being
 formed by numerous petty princes. The em-
 perors were of no political consequence from
 this period. In 1761, Shah Alum II. attacking
 the English was defeated at Patna. In 1764,
 after the battle of Buxar, he was thrown upon
 the protection of the English, who established
 him at Allahabad. After the victory at Delhi
 in 1803, gen. Lake restored the aged monarch
 to a nominal sovereignty, which descended at
 his death to his son, Akbar Shah. Akbar
 died in 1837, and was succeeded by the last
 king of Delhi (his son), who received a pen-
 sion of about 125,000*l.* per annum. He joined
 the mutiny in 1857; was tried in 1858, and
 transported to Rangoon.]

* British India extends from 8° to 34° N. lat. and from 70° to 90° E. long. (exclusive of the Burmese additions). The population is about 50 millions; that of the whole peninsula about 176 millions. Cotton was planted in 1839, and the tea-plant in 1834. Railways and the electric telegraph are being rapidly constructed, and canals for irrigation. See *Ganges Canal*. The Indian revenue in the year 1854-5 was 20,371,450*l.* The expenditure, 22,915,160*l.* In 1858-9, the revenue was 36,060,788*l.*; expenditure, 49,642,355*l.*

INDIA, *continued.*

BRITISH POWER IN INDIA.	
Attempt made to reach India by the north-east and north-west passages	A.D. 1528
Sir Francis Drake's expedition	1579
Levant company make a land expedition to India	1589
First adventure from England	1591
First charter to the London company of merchants. (See <i>India Company</i>).	1600
Factories established at Surat	1612
Sir Thomas Roe, first English ambassador, arrives	1615
French company established	1664
They settle at Pondicherry	1668
Calcutta purchased	1668
War between the English and French in India	1746-9
English besiege Pondicherry, the seat of the French government, without success	1748
Clive takes Arcot	1751
Peace made	1754
Soverndroog and other strongholds of the pirate Angria taken. (See <i>Angria</i>)	1756
Capture of Calcutta by Surajah Dowla. (See <i>Calcutta and Blackhole</i>)	—
Calcutta retaken by Clive; he defeats the soubah at Plassey	June 20, 1757
Colonel Clive's force was but 3000 men, and the soubah's 50,000. By this victory he acquired all Bengal, and numerous conquests followed.	—
Fort William, the strongest fort in India, built, French successful under Tally	1758
But lose nearly all their power	1759
Hyder Ali acquires the sovereignty of Mysore	1761
Conquest of Patna	Nov. 6, 1763
Battle of Buxar (which see)	Oct. 23, 1764
The nabob becomes subject to the English	1765
Lord Clive obtains the Durranny by an imperial grant, which constitutes the company the receivers of the revenue of Bengal, Bahar, and Orissa, and gives the British the virtual sovereignty of these countries	Aug. 12, 1765
Treaty with Nizam Ali: the English obtain the northern Circars	Nov. 12, 1766
Hyder Ali ravages the Carnatic	Jan. 1769
Frightful famine in Bengal	1770
Warren Hastings becomes governor of Bengal, India Bill: supreme court established. (See <i>India Bills</i>)	April 13, 1772
Accusations commence against Warren Hastings; he is accused of taking a bribe from a concubine of Meer Jaffer (see <i>Hastings</i>)	May 30, 1775
Nuncomar, a Brahmin, accuses Warren Hastings of receiving bribes	March 12, 1776
Is hanged for forgery	Aug. 5, 1776
Pondicherry taken	Oct. 12, 1778
The strong fortress of Gwalior taken by major Popham	Aug. 4, 1780
Hyder Ali overruns the Carnatic, and defeats the British	Sept. 20, 1780
He takes Arcot	Oct. 31, 1781
Hyder Ali signally defeated by sir Eyre Coote, Warren Hastings accused of taking more bribes. (See <i>Chunar</i>)	July 1, 1781
Bussy lands with a French detachment, March, War with Hyder Ali aided by the French	Sept. 19, 1782
Hyder Ali overthrown by Coote	June 2, 1782
Death of Hyder, and accession of his son, Tippoo Saib	Dec. 21, 1782
Tippoo, who had taken Cuddalore, now takes Bednore	April 30, 1783
Pondicherry restored to the French, and Trincomalee to the Dutch	—
Peace with Tippoo	March 11, 1784
War with Tippoo renewed	1790
Bangalore taken. (See <i>Bangalore</i>)	March 21, 1791
Definitive treaty with Tippoo; his two sons hostages	March 19, 1792
Civil and criminal courts erected	A.D. 1793
Pondicherry again taken	—
Tippoo's sons restored	March 29, 1794
First dispute with the Burmese: adjusted by general Erskine	1795
Government of lord Mornington, afterwards marquess Wellesley	May 17, 1798
Seringapatam stormed by general Baird; Tippoo Saib killed	May 4, 1799
Mysore divided	June 22, 1800
Victories of the British; the Carnatic conquered, The nabob of Furruckabad cedes his territories to the English for a pension	June 4, 1802
Mahratta war. Victories of sir Arthur Wellesley and general Lake	1803
Wellesley's first great victory, at Assaye, Sept. 23, Pondicherry (restored 1801) retaken	Dec. 1804-5
War with Holkar	1804-5
Capture of Bhurtপুর, and complete defeat of Holkar	April 2, 1805
The marquess dies	Oct. 5, 1805
The Mahratta chief, Scindiah, defeated by the British; treaty of peace	Nov. 23, 1805
Treaty with Holkar	Dec. 23, 1805
Sepoy mutiny at Vellore; 800 sepoy executed	July, 1806
Cumona surrenders	Nov. 21, 1807
Mutiny at Seringapatam quelled	Aug. 23, 1809
Act by which the trade to India was thrown open; that to China remaining with the company	July, 1813
War with Nepal	1814-15
Holkar defeated by sir T. Hislop	Dec. 21, 1817
Pindari war. English successful	1817-18
Peace with Holkar	Jan. 6, 1818
Burmese war. The British take Rangoon, May 5, Lord Combermere commands in India	1824
Malacca ceded, and Singapore purchased	—
Mutiny at Barrackpore, many sepoy killed	Nov. 1824
General Campbell defeats the Burmese near Proome	Dec. 25, 1825
Bhurtপুর stormed by lord Combermere	Jan. 18, 1826
Peace with the Burmese	Feb. 24, 1826
[They pay 1,000,000 sterling, and cede a great extent of territory.]	—
Abolition of suttees, or the burning of widows. (See <i>Suttee</i>)	Dec. 7, 1829
Act opening the trade to India, and tea trade, &c., to China, forming a new era in British commerce	Aug. 28, 1833
Rajah of Coorg deposed: Coorg annexed, Apr. 10, The natives first admitted to the magistracy	May 1, 1834
The Nawab Shunsoodoon put to death for the murder of Mr. Frazer, British resident, Oct. 8, 1835	1835

		Oude annexed. (See <i>Oude</i>)	Feb. 7, —
		MUTINY OF THE NATIVE ARMY.	
		Mutinies in the Bengal Army: at Barrackpore, &c., several regiments disbanded	March, 1857
		"India is quiet throughout."— <i>Bombay Gazette</i>	May 1, —

* Runjeet Singh, long the ruler of the Sikhs and the Punjab, lived in amity with the British. After his death, June 27, 1839, several of his successors (children and grandchildren) were in turn assassinated. During the minority of his grandson Duleep Singh, the favourite of the Maha Rancee, Lall Singh, ruled; and finding the army ungovernable, sanctioned the unprovoked attack on the British as given above.

INDIA, continued.

Mutiny at Meerut* (near Delhi). The mutineers seize Delhi, where they commit dreadful outrages, and proclaim the king of Delhi emperor	May 10, &c., 1857	Havelock marches to Lucknow and relieves the besieged residency: retires and leaves Outram in command; Neill killed	Sept 25, 26, 1857

General Nicholson's victory at Nujuffghur (he dies Sept. 23)	Aug. 25, —	The rebels defeated by sir H. Rose (the heroic Ranees of Jhansi killed), June 17; Gwalior retaken and Scindiah reinstated	June 19, —
Assault of Delhi took place Sept. 14; the city taken, Sept. 20; the king captured, Sept. 21; his son and grandson slain by colonel Hodson	Sept. 22, —		
Sir James Outram joins Havelock and serves under him	Sept. 16, —		

* On the introduction of the improved (Enfield) musket in the Indian army, greased cartridges had been brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit however gradually arose in the Bengal native army. In March several regiments were disbanded, followed by others, till in June the army had lost by disbandment and desertion, about 30,000 men. On April 5, a sepoy, and on April 20, a jemadar, or native lieutenant, were executed. At the end of May 34 regiments were lost. In April, 85 of the 3rd Bengal native cavalry at Meerut refused to use their cartridges. On May 9, they were committed to gaol. On Sunday, the 10th, a mutiny in the native troops broke out; they fired on their officers, killing col. Finnis and others. They then released their comrades, massacred many Europeans, and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi, *which see*.

† At the end of June the native troops at the following places were in open mutiny: Meerut, Delhi, Ferozepore, Allyghur, Roorkee, Murdaun, Lucknow, Cawnpore, Nasseerabad, Nermuch, Jhansi, Hissar, Jhansi, Mehidpore, Jullundur, Azimgur, Futehghur, Jaunpore, Bareilly, Shahjehanpore, Allahabad. At the stations printed in italics, European women and children were massacred. — The Relief Fund for the sufferers in India was commenced Aug. 25, 1857. The queen, Louis Napoleon, and the sultan, gave each 1000. In Nov. 1857, 280,749l. had been collected; in Nov. 1858, 433,620l. In Dec. 1861, 140,000l. had been distributed to sufferers in India; and 100,000l. to those at home; 246,069l. remained for the benefit of widows and orphans. A Fast was observed on Oct. 7.

‡ Born April 5, 1795; educated at the Charterhouse, London, where he was called "old Philo;" went to India, 1823; served in the Burmese war, 1824; and in the Sikh war, 1845. He was a member of a Baptist Church.

§ Lord Ellenborough, the minister for India, sent, unknown to his colleagues, a despatch severely censuring this proclamation. This despatch became public and led to his resignation and very nearly to the defeat of the ministry, a vote of censure being moved for in both houses of parliament, but not carried.

INDIA, *continued.*

Tantia Topce heads a division of the rebels	1858	Sir Hugh Rose takes command of the Indian army, which is amalgamated with the British army	July, 1860
Rajahs of Jeypore, &c., surrender; Rohilkund and other provinces tranquillised	July, —	Lord Clyde quits India, and arrives in London	July 13, —

Hon. John Adam	Jan. 13, 1823	James, earl of Elgin appointed Aug. 1861
Rt. hon. George Canning, relinquished the appointment.		
William, lord (afterwards earl) Amherst, Aug. 1, —		

INDIA COMPANY, EAST. The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized on his own; but his information gave rise to a mercantile voyage, and the company's first charter, in Dec. 1600, which was renewed in 1609, 1657, 1661, 1693, and 1744. Their stock in 1600 consisted of 72,000*l.*, when they fitted out four ships; meeting with success, they continued to trade. India stock sold at 500*l.* for a share of 100*l.* in 1683. A new company (the "English") was chartered in 1698, and the old (the "London") suspended from trading for three years; the two were united in 1702. In 1744 the privileges of the company were continued till 1783. In Aug. 1772, the affairs of the company were brought before parliament, and a committee exposed a series of intrigues and crimes. As remedial measures, two acts were passed in June, 1773. The one authorised a loan of 1,000,000*l.* to the company; the other (celebrated as the *India bill*) effected most important changes in the constitution of the company and its relations to India. A governor-general was appointed to reside in Bengal, to which the other presidencies were now made subordinate; a supreme court of judicature was instituted at Calcutta: the salary of the governor was fixed at 25,000*l.* per year; that of the council at 10,000*l.* each; and of the chief judge at 8000*l.*: the affairs of the company were controlled; all the departments were re-organised, and all the territorial correspondence was henceforth to be laid before the British ministry. Mr. Pitt's bill appointing the Board of Control (*which see*), passed May 18, 1784. The Company's charter was renewed for 20 years in 1793 and in 1813; in the latter year the trade with India was thrown open. In 1833 the trade to China also was opened and the Charter was renewed till 1854. In 1853 the government of India was continued in the hands of the company till parliament should otherwise provide. In consequence of the mutiny of 1857, and the disappearance of the company's army, the government of India was transferred to the crown, by the act 21 & 22 Vict. c. 106, which received the royal assent, Aug. 2, 1858.† The Board of Control was abolished and a Council of State for India was instituted. The company's political powers ceased on Sept. 1: and the queen was proclaimed as Queen of Great Britain and the Colonies, &c., in the principal places in India, on Nov. 1, amid much enthusiasm.—The EAST INDIA-HOUSE was built in 1726, and enlarged and a new front erected in 1799; sold with the furniture in 1861; and pulled down in Sept. and Oct. 1862. The MUSEUM was removed to Fife-house, Whitehall, and opened on July 24, 1861.

INDIA, COUNCIL OF, established in 1858 in the place of the Board of Control (*which see*). It consists of 15 members (salary 1200*l.* a-year), eight of whom are appointed by the queen, and seven elected by the directors of the East India Company. The members may not sit

* Several of these appointments are those of governors-general provisionally, having been first in rank in the council, and holding office on the resignation of the governors-general, or pending their arrival and assumption of the government: as, for instance, sir Alured Clarke, sir George Hilario Barlow, hon. William Butterworth Bayley, William Wilberforce Bird, &c. The appointments of governors-general were, of course of earlier date than their assumption of office.

† Lord Palmerston brought in a bill for the purpose on Feb. 12, which was accepted by the house on Feb. 18. He resigned on the following day, and the bill dropped. A similar bill was introduced by Mr. Disraeli on March 12; but many of its details being objected to, it was withdrawn. On lord John Russell's proposition, the house proceeded to consider the matter by way of resolutions; and on June 17, lord Stanley brought in the above mentioned bill, being the third on the subject introduced during the session.

in parliament. The council met first on Sept. 3, when lord Stanley, secretary of state for India, presided. In June, 1859, he resigned, and was succeeded by sir Charles Wood. The members of the *first* council are here recorded :—

ELECTED.
Charles Mills.
John Shepherd.
Sir J. Weir Hogg.
Elliot Macnaghten.
Ross D. Mangles.

William J. Eastwick.
Henry T. Prinsep.

APPOINTED.
Sir Frederick Currie.
Sir Henry Rawlinson.

Sir R. Hussey Vivian.
J. Pollard Willoughby.
Sir John Lawrence.
Sir Henry Montgomery.
Sir Proby Montgomerie, and
Wm. Arbuthnot.

INDIANS occupying the south-western parts of the United States, in direct connexion with the government in 1861, were numbered at 239,506. The larger tribes are the Cherokees (22,000), the Choctaws (18,000), the Creeks (13,550), and the Chickasaws (5000). A large proportion are in comfortable circumstances, and have schools and churches; other tribes are the Delawares, Sacs, Foxes, Shawnees, Sioux, and Ioways. With regard to the North American civil war, in 1861, the Choctaws joined the Confederates, who permit two Choctaw delegates to sit in Congress; the first being Sampson Folsom and Eastman Loman; but the principal chief of the Cherokees on May 4, 1861, issued a proclamation of neutrality, which has been maintained with great difficulty.

INDIA RUBBER. See *Cacoutchouc*.

INDICTION, a cycle of tributes orderly disposed for fifteen years, not known before the time of Constantine. The first examples in the Theodosian code are of the reign of Constantius, who died 361.—In memory of the great victory obtained by Constantine over Mezentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha A.D. 313, Jan. 1. *Gregory*. They were first used by the Latin church in 342.

INDIGO. Before the American colonies were established, all the indigo used in Europe came from the East Indies; and, until the discovery of a passage round the Cape of Good Hope, it was conveyed, like other Indian products, partly through the Persian Gulf, and partly by land to Babylon, or through Arabia, and up the Red Sea to Egypt. The real nature of indigo was so little known in Europe, that it was classed among minerals, as appears by letters-patent for erecting works to obtain it from mines in the principality of Halberstadt, dated Dec. 23, 1705; yet what Vitruvius and Pliny called *indicum* is supposed to have been our indigo. *Beckmann*. The first mention of indigo occurs in English statutes in 1581. The first brought to Europe was procured from Mexico. Its cultivation was begun in Carolina, in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1845, 10,127,488 lbs.; in 1850, 70,482 cwt.; in 1859, 63,237 cwt.; in 1861, 83,109 cwt. The use of coal-tar dyes will no doubt lessen the consumption of indigo. See *Aniline*.

INDULGENCES in the ROMISH CHURCH, commenced by Leo III. about A.D. 800, were granted in the eleventh century by Gregory VII., and by Urban II., &c., in the twelfth century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo. X. published general indulgences throughout Europe, which led to the Reformation in Germany. Indulgences sometimes were for the pardon of sins past, present, and future. They were written upon parchment, and sealed or signed by the pope and his delegates. *Ashc*.

INDUSTRIAL SCHOOLS ACT, 21 & 22 Vict. c. 48 (1857), was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children.

INFANTICIDE, FEMALE, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it is now gradually decreasing in India. On Nov. 12, 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, Nov. 14, 1853.

INFANTRY, the modern term for foot soldiers, the management of which was much improved during the wars of Charles V. and Francis I. in the sixteenth century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment which is termed the 100th. The number now reaches to 109, including the British army in India.

INFANT SCHOOLS began in London in 1818.

INFERNAL MACHINE. See *France*, 1800, and 1835.

INFIRMARIES. Ancient Rome had no houses for the cure of the sick. Diseased persons, however, were carried to the temple of Æsculapius for a cure, as Christian believers were taken to churches which contained wonder-working images. Benevolent institutions

for the accommodation of travellers, the indigent and sick, were first introduced with Christianity, and the first infirmaries or hospitals were built close to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the eleventh century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann*. See *Hospitals*.

INFUSORIA. See *Animalcules*.

INGOUR, a river rising in the Caucasus and falling into the Black Sea. Omar Pasha, marching to the relief of Kars, crossed this river on Nov. 6, 1855, with 10,000 men, and attacked the Russians 12,000 strong, encamped on the left bank, who after a struggle retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory-black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made by them of vermilion and various kinds of gum. **INDIAN INK** is brought from China, and must have been in use by the people of the east from the earliest ages, most of the artificial Chinese productions being of very great antiquity. It is usually brought to Europe in small quadrangular cakes, and is composed of a fine black and animal glue. *Beckmann*. **INVISIBLE OR SYMPATHETIC INKS** are fluids which, when written with, will remain invisible until after a certain operation. Various kinds were known at very early periods. Ovid (A.D. 2) teaches young women to deceive their guardians by writing to their lovers with new milk, and afterwards making the writing legible with ashes or soot. Receipts for preparing invisible ink were given by Peter Borel, in 1653, and by Le Mort, in 1669. *Beckmann*.

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000), near the old fort of Inkermann, before daybreak, Nov. 5, 1854. The latter kept their opponents at bay till the arrival of 6000 French. The Russians were then driven back, leaving behind 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie, and Torrens were among the slain.—On Nov. 15, 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkermann, and caused great loss of life.

INNS OF COURT (London). Inns of court were established at different periods, in some degree as colleges for teaching the law. The Temple (of which there were three societies, namely, the Inner, the Middle, and the Outer) was originally founded, and the Temple church built, by the Knights Templars, 32 Hen. II. 1185. The Inner and Middle Temple were made inns of law in the reign of Edw. III. about 1340; the Outer not until the reign of Elizabeth, about 1560. *Stow's Survey*. The following inns were founded, viz:—

Barnard's Inn, an inn of Chancery	A.D. 1445	Lyon's Inn	A.D. 1420
Clement's Inn, 18 Edw. IV.	1478	New Inn, 1 st Hen. VII.	1485
Clifford's Inn, 20 Edw. III.	1345	Serjeants' Inn, Fleet-street	1429
Furnival's Inn, 8 Eliz.	1563	Serjeants' Inn, Chancery-lane	1566
Gray's Inn, 32 Edw. III.	1357	Staple Inn, 4 Hen. V.	1415
Lincoln's Inn, 4 Edw. II.	1312	Thavies' Inn, 10 Hen. VIII.	1519

INOCULATION. See *Small Pox*. Lady Mary Wortley Montagu introduced inoculation from small-pox to England from Turkey. In 1718 she had her own son inoculated at Adrianople, with perfect success; and she was allowed to have it tried, for the first time in England, on seven condemned criminals, 7 Geo. I. 1721. In 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and other clergy from that period until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale of London inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. Inoculation was forbidden by law in 1840. *Vaccine* inoculation was introduced by Dr. Jenner, Jan. 21, 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. An hospital for inoculation was erected in 1746. See *Sheep*.

INQUISITION, OR HOLY OFFICE. Previous to Constantine (A.D. 306) heresy and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, A.D. 382. Priscillian was put to death about 385. Justinian decreed the doctrines of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800, the power of the western bishops was enlarged, and

courts were established for trying and punishing spiritual offenders, even with death. In the twelfth century many heresies arose, and during the crusades against the Albigenses, Gregory IX. in 1233 established by rules the inquisitorial missions, sent out by Innocent III. some years previously, and committed them into the hands of the Dominicans. Pietro da Verona, the first inquisitor who burnt heretics, was assassinated by an accused gonfalonier, April 6, 1252, and was afterwards canonised. Having fallen into disuse in Spain in the fifteenth century, the Holy Office was reconstituted by Ferdinand and Isabella in 1480. In 1481, nearly 3000 persons were burnt in Andalusia, and 17,000 suffered other penalties. The "Instructions" of the new tribunal were promulgated Nov. 29, 1484. New articles were added in 1488 and 1498, and finally a new series of ordinances in 81 articles was compiled by the inquisitor-general, Valdez, in 1561. The establishment of the Inquisition was resisted in Naples (1546-7), and only introduced into other parts of Italy with jealous limitations by the temporal power. Carnesecchi was executed at Rome, 1567, and Galileo was compelled to abjure his opinions in 1634. The tribunal was abolished in Tuscany and Lombardy in 1787. It was never firmly established and organised in France, and was totally abolished by Henry IV. by the edict of Nantes, 1598. When Louis XIV. revoked that edict (1685) he refused to introduce the Inquisition; but advised his grandson Philip V. to retain it in Spain. It was suppressed in that country, Dec. 4, 1808, by Napoleon, and again by the Cortes, Feb. 12, 1813; but was restored by Ferdinand VII. after his restoration, by an ordinance dated July 21, 1814, to be again finally abolished by the Cortes at the revolution in 1820. Florente states that in 236 years the total amount in Spain of persons put to death by the Inquisition was about 32,000; 291,000 were subjected to other punishments. The last person burnt was at Seville, Nov. 7, 1781, being a woman accused of making a contract with the devil.

INQUESTS. See *Coroner*.

INSANITY. See *Lunatics*.

INSOLVENCY. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act, known as the Great Insolvent act, was taken in England by 50,733 insolvents, from the time of its passing in 1814, to March 1827, a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l.*, might petition the court of Bankruptcy, and propose compositions, and have *pro tem.* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by the new Bankruptcy Act, the business of the Insolvent Debtors' court was transferred to the court of Bankruptcy: and a number of imprisoned debtors were released in Nov. 1861.

INSTITUTE OF FRANCE. On Oct. 25, 1795, the five academies, viz., the French academy, the academy of Inscriptions and Belles Lettres, that of the Mathematical and Physical Sciences, of the Fine Arts, and of the Moral and Political Sciences, were combined in one body under the title of "Institut National," afterwards *Royal*, and now *Impérial*.

INSTITUTION. See *Royal, London, and Civil Engineers*.

INSURANCE ON SHIPS AND MERCHANDISE. Suetonius conjectures that Claudius was the first contriver of the insurance of ships, A.D. 43.

Insurance was in general use in Italy, 1194, and in England . . . 1560
Insurance policies first used in Florence . . . 1523
The first law relating to insurance was enacted . . . 1601
Insurance of houses and goods against Fire, in London, began the year following the Great Fire of London . . . 1667
An office was set up for insuring houses and buildings, principally contrived by Dr. Barton, one of the first and most considerable builders of the city of London . . . —
The first regular office set up in London was the *Hand-in-Hand* . . . 1696
First Life Insurance office (the *Amicable*), established . . . 1706

Sea fire-office established . . . 1710
The first Marine Insurances was the Royal Exchange Insurance, and the London Insurance . . . 1720
Duty first laid on insurances of 1*s.* 6*d.* per 100*l.* insured, 1782: duty increased . . . 1797
In 1857, 1,451,00*l.* were paid as duty for fire insurances on property, amounting to 72,136,585*l.*
There were 33 London fire insurance offices; 25 country offices; 7 Scotch, and 2 Irish . . . 1859
165 such offices in London . . . —
A new Commercial Union fire insurance, founded in consequence of the increased charges of the companies . . . Sept. 1861

INSURRECTIONS. See *Conspiracies, Massacres, Rebellions, Riots, &c.*

INTENDMENT OF CRIMES. In cases of treason, wounding, burglary, &c., where the intention is proved by circumstances, the offence was made punishable as if put into execution, and the designed crime completed, by statute 7 Geo. II. 1734. The rigour of this act was modified by Mr. (afterwards sir Robert) Peel's revision of the statutes 4—10 Geo. IV. 1823—29.

INTERDICT, OR ECCLESIASTICAL CENSURE, seldom decreed till the time of Gregory VII. 1073, but often afterwards in Italy, France, and Germany. When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties save the baptism of infants, and taking the confessions of dying penitents. In 1170, pope Alexander put all England under an interdict; and when king John was excommunicated, in 1208, the kingdom lay under a papal interdict for six years. England was put under an interdict on Henry VIII. shaking off the pope's supremacy, 1535. Pope Sixtus V. published a crusade against queen Elizabeth of England, and offered plenary indulgence to all who should assist in deposing her, in 1588. See *Excommunication*.

INTEREST. The word was first used in an act of parliament of the 21st James I. 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent. The rate fixed by the act was 8*l.* for the use of 100*l.* for a year; in place of usury at 10*l.* before taken. The Commonwealth lowered the rate to 6*l.*, in 1650; and by an act of the 13th of queen Anne, 1713, it was reduced to 5*l.* The restraint having been found prejudicial to commerce, it was totally removed by 17 & 18 Vict. c. 90, 1854.

INTERIM OF AUGSBURG, a decree issued by the emperor Charles V. in 1548, with the view of attempting to reconcile the Catholics and Protestants, in which it entirely failed. It was revoked in 1542. The term *Interim* has been applied to other decrees and treaties.

INTERNATIONAL. See *Copyright* and *Exhibition*.

INUNDATIONS. It would be impossible to record in this volume the numerous catastrophes which class under this head; the following are among the most remarkable.

An inundation of the sea in Lincolnshire laid under water many thousand acres, A.D. 245. *Camden*. Another in Cheshire, by which 5000 persons and an innumerable quantity of cattle perished, 353.

An inundation at Glasgow, which drowned more than 400 families, 758. *Fordun*.

The Tweed overflowed its banks, and laid waste the country for 30 miles round, 836.

A prodigious inundation of the sea on the English coasts, which demolished a number of sea-port towns, and their inhabitants, 1014.

Earl Godwin's lands, exceeding 4000 acres, overflowed by the sea, and an immense sand-bank formed on the coast of Kent, now known by the name of the Godwin Sands, 1100. *Camden*.

Flanders inundated by the sea, and the town and harbour of Ostend totally immersed, 1108. The present city was built above a league from the channel where the old one lies submerged. *Histoire de Flandre*.

More than 300 houses overwhelmed at Winchelsea by an inundation of the sea, 1280.

At the Texel, which first raised the commerce of Amsterdam, 1400.

The sea broke in at Dort, and drowned 72 villages, and 100,000 people (see *Dort*), April 17, 1446.

The Severn overflowed during ten days, and carried away men, women, and children, in their beds, and covered the tops of many mountains; the waters settled upon the lands, and were called the Great Waters for 100 years after, 1 Richard III. 1483. *Hollinshead*. Again, 4 James I. 1607, the waters rose above the tops of the houses, and above 100 persons perished in Somersetshire and Gloucestershire. *Burns*.

A general inundation by the failure of the dikes in Holland, 1530; the number of drowned said to have been 400,000.

At Catalonia, where 50,000 persons perished, 1617.

An inundation in Yorkshire, when a rock opened, and poured out water to the height of a church steeple, 1686. *Vide Phil. Trans.*

Part of Zealand overflowed, 1300 inhabitants were drowned, and incredible damage was done at Hamburg, 1717.

At Madrid, several of the Spanish nobility and other persons of distinction perished, 1723. *Du Fresnoy*. In Yorkshire, a dreadful inundation, called Ripon Flood, 1771.

In Navarre, where 2000 persons lost their lives by the torrents from the mountains, Sept. 1787.

Inundation of the Liffey, which did immense damage in Dublin, Nov. 12, 1787. Again, Dec. 2 and 3, 1802.

Lorca, a city of Mercia, in Spain, destroyed by the bursting of a reservoir, which inundated more than 20 leagues, and killed 1000 persons, besides cattle, April 14, 1802.

At Pesth, near Presburg, the overflow of the Danube, by which 24 villages and their inhabitants were swept away, April, 1811.

In the vicinity of Salop, by the bursting of a cloud during a storm, many persons and much stock perished, May, 1811.

Breadful inundation in Hungary, Austria, and Poland, in the summer of 1813.

Overflow of the Danube; a Turkish corps of 2000 men, on a small island near Widdin, surprised, and met instant death, Sept. 14, 1813.

In Silesia, 6000 inhabitants perished, and the ruin of the French army under Macdonald was accelerated by the floods; also in Poland 4000 lives were supposed to have been lost, same year.

At Strabane, Ireland, by the melting of the snow on the surrounding mountains, most destructive floods were occasioned, Jan. 2, 1816.

In Germany, the Vistula overflowed; many villages were laid under water, and great loss of life and property was sustained, March 21, 1816.

In England 5000 acres were deluged in the Fen countries, in June, 1819.

Inundation at Dantzic, occasioned by the Vistula breaking through some of its dikes, by which 10,000 head of cattle and 4000 houses were destroyed, and numerous lives lost, April 9, 1829.

The "Moray Floods," Aug. 9, 1829, when the Spey and Findhorn rose in some places 50 feet above their ordinary level, and caused great destruction of property. Many lives were lost, and whole families who took refuge on elevated places were with difficulty rescued. *Sir T. D. Lauder*.

At Vienna, the dwellings of 50,000 of its inhabitants laid under water, Feb. 1830.

10,000 houses swept away, and about 1000 persons perished, at Canton, in China, in consequence of an inundation, occasioned by incessant rains. Equal or greater calamity was produced by the same cause in other parts of China, Oct. 1833.

Awful inundation in France; the Saone poured its waters into the Rhone, broke through its banks, and covered 60,000 acres; Lyons was inundated; in Avignon 100 houses were swept away; 218

INUNDATIONS, *continued.*

houses were carried away at La Guillotière : and upwards of 300 at Vaise, Marseilles, and Nismes : the Saone had not attained such a height for 238 years, Oct. 31 to Nov. 4, 1840.

Lamentable inundation at Brentford and the surrounding country ; several lives lost, and immense property destroyed, Jan. 16, 1841.

Disastrous inundation in the centre, west, and south-west of France ; numerous bridges, with the Orleans and Vierzon viaduct, swept away ; the latter had cost 6,000,000 of francs. The damage done exceeded 4,000,000. sterling. The Loire rose twenty feet in one night, Oct. 22, 1846.

Lamentable catastrophe at Holmfirth. See *Holmfirth Flood*, Feb. 4, 1852.

Inundation of the valleys of the Severn and Teme after a violent thunderstorm, Sept. 5, 1852.

Inundations of the basins of the Rhine and the Rhone, overflowing the country to a great extent, Sept. 10, 1852.

Hamburg half-flooded by the Elbe, Jan. 1, 1855.

Inundations in south of France, with immense damage (see *France*), May and June, 1856.

In Holland, nearly 40,000 acres submerged, Jan. 1861.

Great inundation through the bursting of the outfall sluice at St. Germain's, near King's Lynn (see *Levels*), May 4-15, 1862.

Another marshland sluice bursts ; many acres inundated, Oct. 4, 1862.

INVASIONS OF THE BRITISH ISLANDS. See *Britain* and *Danes*. From the death of Edward the Confessor, the following invasions have been effected : all the following were unsuccessful except those marked (s.).

William of Normandy (s.)	Duke of Lancaster (s.)	A.D. 1399	Ireland, Spaniards	A.D. 1601
Sept. 29, A.D. 1066	The French	1416	Duke of Monmouth	1685
The Irish	Queen of Henry VI.	1462	William of Orange (s.)	1688
The Scots	Earl of Warwick (s.)	1470	James II., Ireland	1689
The Scots ; king Malcolm	Edward IV. (s.)	1471	Old Pretender	1708
killed	Queen of Henry VI.	1471	Pretender again	1715
Robert of Normandy	Earl of Richmond (s.)	1485	Young Pretender	1745
The Scots	Lambert Simnel	1487	Ireland. See <i>Thurot</i>	1760
The empress Maud	Perkin Warbeck	1495	Wales, the French	1797
Ireland, by Fitz-Stephen (s.)	Spaniards and Italians, Ire-		Ireland ; the French land at	
Ireland, by Edward Bruce	land	1580	Killala (<i>which see</i>)	1798
Isabel, queen of Edward II. (s.)	Spanish Armada	1588		

INVERNESS, N. W. Scotland, a city of the Picts up to 843. It was taken by Edward I. ; retaken by Bruce, 1313 ; burnt by the Lord of the Isles, in 1411 ; taken by Cromwell in 1649 ; and by prince Charles Edward in 1746. He was defeated at Culloden, about five miles from Inverness, April 16, 1746.

INVESTITURE OF ECCLESIASTICS was a cause of discord between the pope and temporal sovereigns in the middle ages ; and led to actual war between Gregory VII. and the emperor Henry IV., 1075—1085. Henry V. gave up the right, 1111.

INVINCIBLE ARMADA, OR SPANISH ARMADA. See *Armada*.

INVOCATION OF THE VIRGIN AND SAINTS. The practice of the Romish Church of invoking the intercession of saints with God, particularly the prayers to the Virgin, has been traced to the time of Gregory the Great, about A.D. 593. *Ashe*. The Eastern Church began (in the fifth century) by calling upon the dead, and demanding their suffrage as present in the divine offices ; and the Western Church frequently canonised persons the wickedness of whose lives gave them no title to any such honour.

IODINE (from the Greek *iōdēs*, violet-like). This important medicinal substance was discovered by M. de Courtois, a manufacturer of saltpetre at Paris, in 1812. The discovery was pursued with great advantage by M. Clement, 1813. Iodine is very active ; on the application of heat it rises in the form of a dense violet-coloured vapour, easily evaporates, and melts at 220 degrees ; changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow colour, and starch into a purple.

IONIA (in Asia Minor). About 1040 B.C. the Iones, a Pelasgic race, emigrated from Greece and settled here and on the adjoining islands. They built Ephesus, Smyrna, and other noble cities. They were conquered by the great Cyrus, about 548 B.C. ; revolted in 504, but were again subdued. After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors ; was annexed to the Roman empire, and conquered by the Turks.—Ionia was renowned for poets, historians, and philosophers.

IONIAN ISLANDS (on W. coast of Greece), the Republic of the Seven Islands,—Corfu (the capital), Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. These were colonised by the Iones, and partook of the fortunes of the Greek people ; were subject to Naples in the 13th century, and in the 14th to Venice, which ceded them to France in 1797, by the treaty of Campo-Formio. They were seized by the Russians and Turks in 1800 ; and formed into a Republic. They were restored to the French in 1807, but retaken by the English in 1809. By a treaty between Russia and Great Britain they were placed under the

protection of the latter, Nov. 5, 1815. Sir Thomas Maitland became the first lord high commissioner. A constitution was ratified by the prince regent of England for the government of these islands in 1818. A new and very liberal constitution* was granted in 1845. Corfu is the seat of government. Population, in 1858, 246,483.

IONIC ORDER OF ARCHITECTURE. This order, which is an improvement on the Doric, was founded by the Ionians, about 1350 B.C. *Vitruvius* by *Perrault*. The order is ranked by moderns as the third. Its distinguishing characters are, the slenderness and flutings of its column, and the volutes of rams' horns that adorn the capital. The Ionic is airier than the Doric, and at the same time sufficiently grave.

IONIC SECT OF PHILOSOPHERS, founded by Thales of Miletus, 570 B.C. This sect distinguished itself for its deep and abstruse speculations, under the successors and pupils of the Milesian philosopher, Anaximander, Anaximenes, Anaxagoras, and Archelaus, the master of Socrates. The favourite tenet of Thales and his followers was, that water was the origin of all things. Others referred it to air; some to fire. *Blackwall*.

IPSUS (in Phrygia), **BATTLE OF**, 301 B.C., by which Seleucus was confirmed in his kingdom by the defeat and death of Antigonus, king of Asia. On the one side were Antigonus and his son; on the other Seleucus, Ptolemy, Lysimachus, and Cassander. The former led into the field an army of above 70,000 foot, and 10,000 horse, with 75 elephants. The latter's forces consisted of 64,000 infantry, besides 10,500 horse, 400 elephants, and 120 armed chariots. *Plutarch*.

IPSWICH (Suffolk), the Saxon Gippeswic, was ravaged by the Danes, 991. Wolsey was born here, 1471; founded a school in 1525. The port was greatly improved by the erection of wet docks, 1837-42. The railway to London was opened, June 25, 1846.

IRELAND. It is disputed by historians from what nation this country was originally peopled. It seems, however, to be satisfactorily shown that the first colonists were Phœnicians. Some assert that the Partholani landed in Ireland about 2048 B.C.; that the descent of the Damnonii was made about 1463 B.C.; and that this was followed by the descent of Heber and Heremon, Milesian princes, from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings. Ireland was not attacked by the Romans or Saxons. The population, by the census of 1861, was found to be 5,764,543.

Arrival of St. Patrick, about . . . A.D. 432
Christianity established, about . . . 448
The Danes and Normans, known by the name
of Easterlings, or Ostmen, invade Ireland . . . 795
They build Dublin and other cities, about . . . 800
Brian Boiroimhe totally defeats the Danes at
Clontarf . . . April 23, 1014
(In the twelfth century Ireland is divided into
five kingdoms, viz.: Ulster, Leinster, Meath,
Connaught, and Munster, besides a number
of petty principalities, whose sovereigns con-
tinually warred with each other.)
Adrian IV. permitted Henry II. to invade
Ireland, on condition that he compelled every
Irish family to pay a carolus to the holy see,
and held it as a fief of the Church . . . 1156
Dermot Mac Murrough, king of Leinster, is
driven from his throne for his oppression,
and takes refuge in England, where he takes
an oath of fidelity to Henry II. who promises
to restore him . . . 1168
Invasion of the English under Fitz-Stephen . . . 1169

Landing of Strongbow at Waterford . . . A.D. 1170
Henry II. lands near Waterford, and receives
the submission of the princes of the country,
settles the government, and makes his son
John lord of Ireland . . . 1171
Ireland wholly subdued and English laws and
customs introduced by king John . . . 1210
Invasion of Edward Bruce, 1315, who is crowned
king, 1316, defeated and slain at Foughart,
near Dundalk . . . 1318
Lionel, duke of Clarence, third son of Edward
III., marries Elizabeth de Burgh, heiress of
Ulster, which had not hitherto submitted to
the English authority . . . 1361
Richard II. lands at Waterford with a train
of nobles, 4000 men at arms, and 30,000 archers,
and gains the affection of the people by his
munificence, and confers the honour of knight-
hood on their chiefs . . . 1394
Richard again lands in Ireland . . . 1399
The sanguinary Head Act passed at Trim, † by
the earl of Desmond, deputy . . . 1465

* This has been much abused. In consequence of the discontent and unmanageable character of these islanders, it has been seriously proposed that the isles should be given up to Greece, as many of the natives desire. In November 1858, Mr. W. E. Gladstone went out on a commission of inquiry, &c., but nothing important ensued. On Feb. 2, 1859, sir H. Storks became lord high commissioner, and quietness seemed to be restored. However, when the parliament met on March 1, 1861, in reply to the commissioner's speech, an appeal to universal suffrage (for annexation to Greece) was proposed. On March 12, the commissioner prorogued the parliament for six months: In April, 1862, the parliament again declared for annexation to Greece; the commissioner replied firmly, pointing out the great prosperity of the island, but did not prorogue the session.

† This act ordained, "That it shall be lawful to all manner of men that find any thieves robbing by day or night, or going or coming to rob or steal, or any persons going or coming, having no faithful man of good name and fame in their company in English apparel, that it shall be lawful to take and kill those, and to cut off their heads, without any impeachment of our sovereign lord the king. And of any head so cut off in the county of Meath, that the cutter and his ayders there to him cause the said head so cut off to be brought to the portreffe to put it upon a stake or spear, upon the castle of Trim; and that the said portreffe shall testify the bringing of the same to him. And that it shall be lawful for the said bringer of

KINGS AND GOVERNORS OF IRELAND.†

KINGS.		1177. Raymond le Gros, elected by the council, procurator.
979 or 980. Maol Seachlain M. (Malachi) deposed.	—	— John, earl of Moreton (afterwards king John), appointed lord of Ireland.
1001 or 1002. Brian Barony or Boroinhe; slain after totally defeating the Danes at Clontarf, April 23, 1014.	—	— William Fitzadam de Burgo (soneschal).
1014. Maol Seachlain M. restored; dies 1022 or 1023. [Disputed succession.]	—	1185. The earl of Moreton appointed governor.
1058. Donough, or Denis, O'Brian, son.	—	1194. Peter Pipard, appointed lord deputy by Richard I.
1072. Tirlooh, or Furlough, nephew, dies 1086.	—	1215. Geoffrey de Mariscis, appointed governor under the title of custos.
1086-1132. The kingdom divided; fierce contests for it.	—	1252. Prince Edward (Edward I.).
1232. Tordel Vach; killed in battle.	—	* * * *
1166. Roderic, or Roger, O'Connor.	—	1308. Piers de Gaveston, earl of Cornwall, was appointed, by the title of lord lieutenant, 2 Edw. II.
1172. Henry II. king of England; conquered the country, and became lord of Ireland.	—	
[The English monarchs were styled "Lords of Ireland" until the reign of Henry VIII., who first styled himself <i>king</i> .]		
GOVERNORS OF IRELAND.		LORD LIEUTENANTS.†
1173. Hugh de Lacy, lord of Meath, as lord justice.	—	— Piers de Gaveston, earl of Cornwall.
1173. Richard de Clare, earl of Pembroke, as lord warden.	—	1329. James Botiller, earl of Ormond.
		1331. Sir Anthony Lacy.
		* * * *
		1361. Lionel, duke of Clarence.

* Paupers in Irish workhouses in 1849, 620,000; in 1857, 65,000.

Notes in circulation " £3,850,450 " £7,150,000.

Bullion in Irish banks " 1,625,000 " 2,492,000.

† The list of Irish sovereigns, printed in previous editions, has been omitted to make room for valuable authentic matter. The Irish writers carry their succession of kings very high, as high as even before the Flood. The learned antiquary, Thomas James, of the Scots' College of Paris, expressed his wonder that "the learned men of the Irish nation have not, like those of other nations, yet published the valuable remains of their ancient history whole and entire, with just translations, in order to separate what is fabulous and only grounded on the traditions of their poets and bards, from what is *certain history*." "O'Flaherty, Keating, Toland, Kennedy, and other modern Irish historians, have rendered all uncertain, by deducing their history from the Deluge with as much assurance as they deliver the transactions of Ireland from St. Patrick's time."—*Anderson*. The "Annals of the Four Masters," edited by Dr. Donovan, were published in Irish and English in 1838.

‡ Lord justices and deputies are not included in this list. It has been several times proposed to abolish the vicereignty of Ireland, but without success. The last time, March 25, 1858.

IRELAND, *continued.*

- 1369. Sir William de Windsor.
- 1381. Edmund Mortimer, earl of March.
- 1384. King Richard II.
- 1395. Roger Mortimer, earl of March.
- 1399. King Richard II. in person, again.
- Sir John Stanley.
- 1401. Thomas, earl of Lancaster.
- 1413. Sir John Stanley.
- 1414. Sir John Talbot.
- 1424. James, earl of Ormond.
- 1427. Sir John de Grey.
- 1428. Sir J. Sutton, lord Dudley.
- 1431. Sir Thomas Stanley.
- 1438. Leon, lord de Welles.
- 1446. John, earl of Shrewsbury.
- 1449. Richard, duke of York.
- 1462. George, duke of Clarence, for life.
- 1479. Richard, duke of Gloucester (Richard III.)
- 1483. Gerald, earl of Kildare, and in 1496.
- 1485. John de la Pole, earl of Lincoln.
- 1490. Jasper, duke of Bedford.
- 1494. Henry, duke of York, afterwards Henry VIII.
(his deputy, Sir E. Poyning).
- 1496. Gerald, earl of Kildare, and in 1504.
- 1528. Thomas Howard, earl of Surrey.
- 1530. Henry, duke of Richmond.
- 1560. Thomas, earl of Sussex.
- 1598. Robert, earl of Essex.
- 1603. Sir Charles Blount, lord Mountjoy, made earl
of Devonshire.
- 1640. Thos., viscount Wentworth, earl of Strafford.
- 1643. James, marquess of Ormond.
- 1649. Oliver Cromwell.
- 1662. James Butler, duke of Ormond.
- 1669. John Roberts, lord Roberts.
- 1670. J. Berkeley, lord Berkeley.
- 1672. Arthur Capel, earl of Essex.
- 1677. James Butler, duke of Ormond.
- 1685. Henry Hyde, earl of Clarendon.
- 1687. Richard Talbot, earl of Tyrconnel.
- 1690. Henry Sydney, lord Sydney.
- 1695. Henry Capel, lord Capel.
- 1700. Laurence Hyde, earl of Rochester.
- 1703. James Butler, duke of Ormond.
- 1707. Thomas, earl of Pembroke.
- 1709. Thomas, earl of Wharton.
- 1711. James, duke of Ormond, again.
- 1713. Charles, duke of Shrewsbury.
- 1717. Charles, duke of Bolton.
- 1721. Charles, duke of Grafton.

- 1724. John, lord Carteret.
- 1731. Lionel, duke of Dorset.
- 1737. William, duke of Devonshire.
- 1745. Philip, earl of Chesterfield.
- 1747. William, earl of Harrington.
- 1751. Lionel, duke of Dorset, again.
- 1755. William, marquess of Hartington.
- 1757. John, duke of Bedford.
- 1761. George, earl of Halifax.
- 1763. Hugh, earl of Northumberland.
- 1765. Francis, earl of Hertford.
- 1767. George, viscount Townshend, Oct. 14.
- 1772. Simon, earl of Harcourt, Nov. 30.
- 1777. John, earl of Buckinghamshire, Jan. 25.
- 1780. Fred., earl of Carlisle, Dec. 23.
- 1782. Wm. Henry, duke of Portland, April 14.
- George, earl Temple, Sept. 15.
- 1783. Robert, earl of Northington, June 3.
- 1784. Charles, duke of Rutland, Feb. 24; died Oct.
24, 1787.
- 1787. George, marquess of Buckingham (late earl
Temple), again, Dec. 16.
- 1790. John, earl of Westmorland, Jan. 5.
- 1795. William, earl Fitzwilliam, Jan. 4.
- John, earl Camden, March 31.
- 1798. Charles, marquess Cornwallis, June 20.
- 1801. Philip, earl of Hardwicke, May 25.
- 1806. John, duke of Bedford, March 18.
- 1807. Charles, duke of Richmond, April 19.
- 1813. Charles, earl Whitworth, Aug. 26.
- 1817. Charles, earl Talbot, Oct. 9.
- 1821. Richard, marquess Wellesley, Dec. 29.
- 1828. Henry, marquess of Anglesey, March 1.
- 1829. Hugh, duke of Northumberland, March 6.
- 1830. Henry, marquess of Anglesey, again, Dec. 23.
- 1833. Marquess Wellesley, again, Sept. 26.
- 1834. Thomas, earl of Haddington, Dec. 29.
- 1835. Henry, marquess of Normanby, April 23.
- 1839. Hugh, earl Fortescue, April 3.
- 1841. Thomas Philip, earl de Grey, Sept. 15.
- 1844. William, lord Heytesbury, July 12.
- 1846. John William, earl of Besborough, July 9;
died May 16, 1847.
- 1847. Geo. Wm. Frederick, earl of Clarendon, May 26.
- 1852. Archibald William, earl of Eglinton, Feb. 28.
- Edward Granville, earl of St. Germans, Dec.
- 1855. George, earl of Carlisle, March.
- 1858. Archibald, earl of Eglinton, again, Feb.
- 1859. George, earl of Carlisle, again, June. The
PRESENT lord Lieutenant (1862).

IRELAND FORGERIES. In 1796 W. H. Ireland made public the Shakspeare manuscripts which he had forged. The play *Vortigern* was performed at Drury Lane theatre. He shortly after acknowledged the forgery, and published his "Confessions" in 1805. He died in 1835.

IRIDIUM AND OSMIUM. In 1804 Tennant discovered these two rare metals in the ore of platinum, in which, in 1845, Claus discovered a third, Ruthenium.

IRON was found on Mount Ida by the Dactyles, owing to the forest having been burnt by lightning, 1432 B.C. *Arundelian Marbles*. [1407, *Hales*; 1283, *Clinton*.] The Greeks ascribed the discovery of iron to themselves, and referred glass to the Phœnicians. Moses relates that iron was wrought by Tubal-Cain. Iron furnaces among the Romans were unprovided with bellows, but were placed on eminences with the grate in the direction of the prevailing winds. Swedish iron is very celebrated, and Dannemora is the greatest mine of Sweden. British iron was cast by Ralph Page and Peter Baude, in Sussex, in 1543. *Rymer's Fœdera*. Iron-mills were first used for slitting iron into bars for smiths, by Godfrey Bochs, in 1590. Tinning of iron was first introduced from Bohemia in 1681. Till 1740, iron ores were smelted entirely with wood charcoal, which did not entirely give way to coke till 1788. The operation termed *puddling*, and other very great improvements in the manufacture, were invented by Mr. Henry Cort, between 1781 and 1826. From most unfortunate circumstances he did not reap the due reward of his ingenuity. In 1856, Mr. Henry Bessemer made known his method of manufacturing iron and steel, which is considered to possess many advantages.

IRON, *continued.*

IRON PRODUCED IN GREAT BRITAIN.

1740	59 furnaces	17,350 tons.	1820	260 furnaces	400,000 tons.
1788	77 "	61,900 "	1825	374 "	581,367 "
1796	121 "	124,789 "	1840	402 "	1,396,400 "
1802	168 "	227,000 "	1848	623 "	1,998,558 "
1806	227 "	250,000 "	1852	655 "	2,701,000 "

In 1855, 3,217,154 tons of pig iron were produced; in 1857, 3,659,447 tons.

IRON CROWN (of Italy) is of gold, having inside a ring of iron said to have been forged from the nails of Christ's cross, and was made by order of Theudelinde for her husband, Agilulf, king of the Longobards, 591 A.D. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy; Napoleon I. at Milan on May 26, 1805, put it on his head, saying, "*Dieu me l'a donnée; gare à qui y touchera.*" (God has given it to me: woe to him who shall touch it.) He founded the order of the Iron Crown, which still continues. The crown was removed from Monza by the Austrians on April 23, 1859.

IRON-MASK, THE MAN WITH THE.* A mysterious prisoner in France, wearing a mask and closely confined, under M. de St. Mars, at Pignerol, Sainte Marguerite, and afterwards at the Bastille. He was of noble mien, and was treated with profound respect; but his keepers had orders to despatch him if he uncovered. M. de St. Mars himself always placed the dishes on his table, and stood in his presence. He died Nov. 19, 1703.

IRON-PLATED SHIPS. See under *Navy of England.*

IRUN (a frontier village of Spain). On the 16th May, 1837, the British auxiliary legion under general Evans, marched from St. Sebastian to attack Irun (held by the Carlists), which, after a desperate resistance, was carried by assault, May 17.

IRVINGITES, or the followers of the rev. Edward Irving, † who now call themselves the "Holy Catholic Apostolic Church." They use a liturgy (framed in 1842, and enlarged 1853), and have church officers named apostles, angels, prophets, &c. In 1852, lighted candles were placed on the magnificent altar, and burning of incense during prayers was prescribed. The Gothic church in Gordon-square was solemnly opened Jan. 1, 1854. It is said that all who join the church offer it a tenth of their income. They had 30 chapels in England in 1851.

ISAURIA a province in Asia Minor, was retaken from the Saracens by the emperor Leo III., who founded the Isaurian dynasty, which ended with Constantine VI. in 797.

ISERNIA, S. Italy. ere the Sardinian general Ciaffardini defeated the Neapolitans, Oct. 17, 1860.

ISLAMISM. See *Mahometanism*, &c.

ISLE OF FRANCE. See *Mauritius, Man*, &c.

ISLES, BISHOPRIC OF THE. This see contained not only the Hebudes, Hebrides, or Western Isles, but the Isle of Man, which for nearly 400 years had been a separate bishopric. The first bishop of the Isles was Amphibalus, A.D. 360. The Isle of Ily was in former ages a place

* Some conjecture this person to have been an Armenian patriarch forcibly carried from Constantinople (who died ten years before the mask); others that he was the count de Vermandois, son of Louis XIV., although he was reported to have perished in the camp before Dixmude. More believe him to have been the celebrated duke of Beaufort, whose head is recorded to have been taken off before Candia: while still more assert that he was the unfortunate James, duke of Monmouth, who—in the imagination of the Londoners at least—was executed on Tower-hill. There are two better conjectures; he was said to have been either a son of Anne of Austria, queen of Louis XIV., his father being the cardinal Mazarine (to whom that dowager-queen was privately married), or the duke of Buckingham. Or to have been the twin brother of Louis XIV., whose birth was concealed to prevent the civil dissensions in France, which it might one day have caused. The last conjecture was received by Voltaire and many others. It has been more recently conjectured that Fouquet, an eminent statesman in the time of Louis XIV., was the *Masque de Fer*; and a count Matthioli, secretary of state to Charles III., duke of Mantua, is supposed by M. Delort, in a later publication, to have been the victim. The right hon. Agar Ellis (afterwards lord Dover), in an interesting narrative, endeavours to prove Matthioli to have been the person. The mask, it seems, was not made of iron; it was made of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

† Edward Irving was born Aug. 15, 1792, and was engaged as assistant to Dr. Chalmers, at Glasgow, in 1810. In 1822 he attracted immense crowds of most distinguished persons to his sermons at the Scotch church, Hatton-garden. A new church was built for him in Regent-square in 1827. Soon after he pronounced new doctrines on the human nature of Christ: and in 1830 the "Utterances of Unknown Tongues" in his congregation were countenanced by him. He was expelled from the Scotch church, March 15, 1833. His church, "reconstituted with the threefold cord of a sevenfold ministry," was removed to Newmarket-street. He died Dec. 8, 1834.

famous for sanctity and learning, and early the seat of a bishop; it was denominated Icolunkill, from St. Columba, the companion of St. Patrick, founding a monastery here in the sixth century, which was the parent of above 100 other monasteries in England and Ireland. Since the revolution (when this bishopric was discontinued) the Isles have been conjoined to Moray and Ross, or to Ross alone. In 1847, however, Argyll and the Isles were made to form a seventh post-revolution and distinct bishopric. See *Bishops*.

ISMAIL (Bessarabia). After a long siege by the Russians, who lost 20,000 men before the place, the town was taken by storm, Dec. 22, 1790; when Suwarrow, the most merciless warrior of modern times, put the brave Turkish garrison (30,000 men) to the sword, and delivered up Ismail to pillage, and ordered the massacre of 6000 women. By the treaty of Paris in 1856 Ismael was restored to Turkey. It was ceded to Moldavia in 1856.

ISPAHAN was made the capital of Persia by Abbas the Great, in 1590. It ceased to be so in 1796, when Teheran became the capital.

ISRAEL, KINGDOM OF. See *Jews*.

ISSUS (Asia Minor), the site of Alexander's second great battle with Darius, whose queen and family were captured, Oct. 333 B.C. The Persian army, according to Justin, consisted of 400,000 foot and 100,000 horse; and 61,000 of the former and 10,000 of the latter were left dead on the spot, and 40,000 were taken prisoners.

ISTHMIAN GAMES received their name from the isthmus of Corinth, where they were observed: instituted by Sisyphus, about 1406 B.C., in honour of Melicertes, a sea-god. *Length*. They were re-instituted in honour of Neptune by Theseus about 1239 B.C.; and their celebration was held so sacred, that even a public calamity did not prevent it. The games were revived by Julian A.D. 362.

ISTRIA was finally subdued by the Romans, 177 B.C. After various changes it came under the rule of Venice in 1378.

ITALY (either from Italus, an early king, or *italus*, a bull calf) is called the garden of Europe. The invading Pelasgians from Greece, and the Aborigines (Umbrians, Oscans, and Etruscans), combined, form the renowned Latin race, still possessing the southern part of Europe. The ancient history of Italy is soon absorbed into that of Rome, founded 753 B.C., which gradually subdued all the rest of the country. See *Rome*. The principal events in the modern history of Italy are given below. Previous to the fifteenth century it was desolated by intestine wars and the interference of the German emperors; since then, Spain, France, and Germany have struggled for the possession of the country, which has been divided among them several times. Spain predominated in Italy during the sixteenth and seventeenth centuries: but was compelled to yield to the house of Austria at the beginning of the eighteenth. The victories of Bonaparte in 1797-8 changed the government of Italy; but the Austrian rule was re-established at the peace in 1814. In 1848 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily was re-established, March 17, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On Oct. 29, 1861, the internal government was re-organised; the 59 provinces were placed under prefects, subject to four directors-general. In 1861, the population was 21,728,529.—Estimated revenue, 25,000,000*l.*; expenditure, 30,000,000*l.* For details see *Rome* and the various Italian cities throughout the volume.

Italy (Saturnia) fabled to have been ruled by Saturn during the golden age.
Arrival from Arcadia of Oenotrus, 1710 B.C.; and of Evander . . . about B.C. 1240

- Altercation in parliament between Cavour and Garibaldi, April 18; they are reconciled April 25, —
- Bourbonist bands defeated May 7, &c., —
- Prince of Carignan resigns; San Martino appointed lieutenant May 13, —
- Death of count Cavour, aged 52; intense grief of the king and nation June 6, —
- Ricasoli forms a ministry to continue Cavour's policy June 11, —
- The kingdom recognised by France June 24, —
- San Martino resigns the government of Naples; active measures taken against the insurgents and brigands by Cialdini, his successor, appointed July 16, —
- The king opens the exhibition of Italian industry at Florence Sept. 14, —
- The kingdom recognised by Portugal and Belgium Oct. —
- It is divided into fifty-nine prefectures, &c. Oct. 13, —
- Severe skirmishes in the south with brigands and foreign emissaries in the cause of Francis II. Oct. —
- Cialdini retires, and La Marmora becomes lieutenant-general of Naples Nov. 2, —
- Brigandage still prevailing in the south, aided by the king of Naples; insurgents defeated, and many killed Nov. 19, —
- The reactionist warfare continues, the cruelties of the brigands lead to severe reprisals Dec. 1861, and Jan. and Feb. 1862
- The minister Ricasoli compelled to resign by court influence, March 1; Ratazzi forms an administration March 3, —
- The kingdom recognised by Prussia March 1, —
- Surrender of Civitella del Tronto, the last Bourbon fortress in Sicily March 14, —
- Triumphant progress of Garibaldi through Italy, establishing rifle clubs March and April, —
- Mr. J. F. Bishop, an active English Bourbonist propagandist, captured April 2, —
- Conspiracy among the Neapolitan soldiers at Milan suppressed April 19, —
- The king received at Naples with great enthusiasm April 28, —
- The French general Guyon aids in the suppression of the Bourbonist brigands April —
- The kingdom recognised by Russia July 3, —
- Garibaldi proceeds to Sicily; at Marsala he calls for volunteers, giving as his watchword "Rome or death!" July 19, —
- Calls on the Hungarians to rise. July 26, 1862
- The king issues a proclamation against his proceedings, as tending to rebellion Aug. 3, —
- Garibaldi enters Catania, and organises a provisional government Aug. 19, —
- Sicily proclaimed to be in a state of siege, Aug. 21; and put under general Cialdini. Aug. 22, —
- Garibaldi issues his last proclamation; embarks at Catania; lands at Melito, in Calabria, and marches towards Reggio Aug. 24, —
- La Marmora proclaims a state of siege; Garibaldi and his followers fall in with the royalists, under Palavicino, at Aspromonte, where, after a short skirmish, he is wounded and taken prisoner, Aug. 29; removed to Vagnano, near Spezia Sept. 1, —
- Mr. J. F. Bishop sentenced to ten years' imprisonment Sept. 6, —
- General Durando issues a diplomatic circular condemning Garibaldi's proceedings, yet asserting the necessity of the Italian government possessing Rome Sept. 10, —
- A subscription in England enables professor Partridge, of King's College, London, to go to Garibaldi. He states that Garibaldi is progressing satisfactorily Sept. 19, —
- Princess Maria Pia married by proxy to the king of Portugal Sept. 27, —
- Garibaldi issues a rhetorical appeal to the English nation, urging its intervention for the cause of liberty Sept. 28, —
- Inflammatory manifesto addressed to the people of Italy by Joseph Mazzini Sept. —
- Amnesty granted to Garibaldi and his followers Oct. 3, —

KINGS OF ITALY.

476. Odoacer, king of the Heruli, invades Italy, and rules it: he was conquered and slain by
493. Theodoric, king of the Ostrogoths; an able prince. He put to death the philosophers Boethius and Symmachus, falsely accused, about 525.
526. Athalaric, his grandson, dies of the plague.
534. Theodatus elected; assassinated.
536. Vitiges elected.
540. Theodebald elected; assassinated.
541. Totila, or Badilla, a great prince; killed in battle against the imperial army under Narses.
552. Theras falls in battle. Italy subject for a short time to the eastern empire.
568. Alboin, king of the Lombards, with a huge mixed army, conquers Italy; poisoned by his wife Rosamund, for compelling her to drink wine out of a cup formed of her father's skull.
573. Cleoph; assassinated.
575. Autharis; poisoned.
591. Agilulph.
615. Adaloald; poisoned.
625. Arioald.
636. Rotharis; married the widow of Arioald; published a code of laws.
652. Rodwald (son); assassinated.
653. Aribert I. (uncle).
661. Bertharit and Godebert (sons); dethroned by
662. Grimoald, duke of Benevento.
671. Bertharit re-established.
686. Cunibert (son).
700. Luitbert; dethroned by
701. Raginbert.
701. Aribert II. (son).
712. Ausprand elected.
712. Luitprand (son), a great prince, and a favorite of the church.
744. Hildebrand (nephew); deposed.
744. Rachis, duke of Friuli, elected; became a monk.
749. Astolph (brother).
756. Desiderius; quarrelled with the pope Adrian,

ITALY, *continued.*

- who invited Charlemagne into Italy; by whom Desiderius was deposed, and an end put to the Lombard kingdom.
 777. Pepin (son of Charlemagne).
 812. Bernard.
 820. Lothaire (son of Louis le Debonnaire).

EMPERORS.

875. Charles the Bald.
 877. Carloman.
 879. Charles the Fat.
 888. Berenger I.
 889. " and Guy.
 894. " and Lambert.

921. Berenger I. and Rudolph of Burgundy.
 926. Hugh of Provence.
 945. Lothaire II.
 950. Berenger II.; deposed in
 961. By the emperor Otho the Great, who added Italy to the German empire.

MODERN KINGS OF ITALY.

1805. Napoleon proclaimed king of Italy, March 18; crowned at Milan, May 26; abdicated, 1814.
 1861. Victor-Emmanuel II. (of Sardinia), born March 14, 1820. *Heir*: Humbert, prince of Savoy, born March 14, 1844.

Nicolini	1782	1861

IVRY (near Évreux, N. W. France). Here Henry IV. totally defeated the League army, March 14, 1590.

IVORY was brought to Solomon from Tarshish, about 992 B.C. (1 *Kings* x. 22). The colossal statues of Jupiter, Minerva, &c., by Phidias, were formed of ivory and gold, B.C. 444.

J.

J. Introduced into the alphabet by Giles Beys, printer, of Paris, 1550. *Dufresnoy*.

JACOBINS. The original name of the Dominicans (*which see*), and also given to one of the principal parties in the French revolution. The Jacobin club (first called club Breton) originated from a small secret association of about forty gentlemen and men of letters, who had united to discuss political and other questions, and met in the hall of the Jacobin friars at Paris. The club became numerous and popular, and fraternal societies were instituted in all the principal towns of the kingdom. *Burke*. They are represented as having been determined enemies of monarchy, aristocracy, and the Christian religion, and may be regarded as the first grand spring of the revolution. The club was closed Nov. 11, 1794.

JACOBITES. A sect among the eastern Christians, so called from Jacob Baradaeus, a Syrian, about A.D. 541. See *Eutychians*. In England the partisans of James II. (Latin, Jacobus II.) were so named after his expulsion in 1688.

JACOBUS. A gold coin of the former value of twenty-five shillings, so called from king James I. of England, in whose reign it was struck. *L'Estrange*.

JACQUARD LOOM. See *Loom*.

JACQUERIE, a term applied to bands or revolted peasants; first given to a body of them (headed by one Caillot, called Jacques Bonhomme) which ravaged France during the captivity of king John in 1358.

JAFFA, a seaport of Syria, celebrated in scripture as Joppa, whence Jonah embarked (about 862 B.C.), and where Peter raised Tabitha from the dead (A.D. 38); in mythology, the place whence Perseus delivered Andromeda. Jaffa was taken by the Saracens, A.D. 636; by the Crusaders, 1191; and by Bonaparte, in Feb. 1799; the French were driven out by the British in June, same year. Here, according to sir Robert Wilson, were massacred 3800 prisoners by Bonaparte; but this is doubted. Jaffa suffered by an earthquake in Jan. 1837, when it is said that 13,000 persons were killed.

* The following terms are often used with reference to certain periods in the history of Italian literature and art. 1. *Trecento* (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento." 2. *Quattrocento* (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the fifteenth century. During this period Latin was revived, to the prejudice of Italian. 3. *Cinquecento* (five hundred), from about 1480 to 1590. A sensuous style of art, founded on the heathen mythology, began to prevail. 4. *Seicento* (six hundred), from 1590 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. *Seicentisti* is a term of reproach. The *Trecento* and *Cinquecento* were the most flourishing periods.

JAMAICA, a W. India island, discovered by Columbus, May 3, 1494. It was conquered from the Spaniards by admiral Penn, and the land forces commanded by Venables in 1655; the expedition had been planned by Oliver Cromwell against St. Domingo.

An awful earthquake occurred here, June 2, 1692: and the island was desolated by a furious hurricane in 1722; and again in 1734 and 1751	numerous plantations were burnt. Before they were overpowered, the governor, lord Belmore, declared martial law . . . Dec. 22, 1831
In June, 1795, the Maroons, or original natives, who inhabit the mountains, rose against the English, and were not quelled till March, 1796	Emancipation of the slaves . . . Aug. 1, 1834
Tremendous hurricane, by which the whole island was deluged, hundreds of houses washed away, vessels wrecked, and a thousand persons drowned . . . Oct. 1815	An awful fire . . . Aug. 26, 1843
Insurrection of the negro slaves, in which	About 50,000 die of cholera in . . . 1850
	In May 1853, the dissension between the colonial legislature and sir Charles Grey, the governor, occasioned his recall; his successor, sir H. Barkley, arrived . . . Oct. 1853
	PRESENT governor, Charles Henry Darling, esq., appointed . . . 1857

JAMES'S HALL, ST., near Piccadilly, erected for concerts, public meetings, &c., was opened on March 25, 1858, with a concert for the benefit of the Middlesex Hospital. Mr. Owen Jones was the architect. The interior is very beautiful.

JAMES'S PALACE AND PARK, ST., London, was built by Henry VIII., on the site of an hospital of the same name, 1530. It has been the official town-residence of the English court since the fire at Whitehall in 1695. The park was a marsh till Henry VIII. inclosed and laid it out in walks. In 1668 it was much improved by Charles II., who employed Le Nôtre to add several fields, to plant rows of lime-trees, and to lay out the Mall, which is a vista half a mile in length, at that time formed into a hollow smooth walk, skirted by a wooden border, with an iron hoop at the further end, for the purpose of playing a game with a ball called a mall. He formed a canal, 100 feet broad and 2800 long, with a decoy and other ponds for water-fowl. Succeeding kings allowed the people the privilege of walking here, and William III., in 1699, granted the neighbouring inhabitants a passage into it from Spring-gardens. See *Parks*.

The irons and safeguards for the balls removed . . . from the Mall . . . 1752	The inclosure first opened to the public in Jan. 1829; the opening by Carlton-steps in . . . 1831
The drains filled up in . . . 1775	The marble arch that fronted Buckingham palace removed to Cumberland gate, Hyde-park . . . March 29, 1851
A grand display of fireworks took place here at the peace, when the pagoda bridge erected here by sir W. Congreve was accidentally burnt . . . Aug. 1, 1814	An iron bridge over the ornamental water was constructed, and the purity of the water secured by covering the bottom with compost 1857
The park was improved by George IV. in 1827 <i>et seq.</i>	

JANISSARIES (Turkish *ieni tchéri*, new soldiers), an order of infantry in the Turkish army: originally young prisoners trained to arms were first organised by Orcan, and remodelled by his son Amurath I. about 1360; their numbers were increased by later sovereigns. In later days they degenerated from their strict discipline, and have several times deposed the sultan. Owing to an insurrection of these troops on June 14, 1826, when 3000 of them were killed on the spot, the Ottoman army was re-organised, and a firman was issued two days afterwards, declaring the abolition of the Janissaries.

JANSENISTS, persons who embraced the doctrines of Cornelius Jansen, bishop of Ypres, about 1638. Jansen was a prelate of piety and morals, but his "*Augustinus*," a book in which he maintained the Augustine doctrine of free grace, kindled a fierce controversy on its publication in 1640, and was condemned by a bull of pope Urban VIII. The Jesuits were the vehement opponents of Jansenism, which was condemned by Innocent X. in 1653, and by the Bull Unigenitus, issued by Clement XI. in 1713. This bull the French church rejected. The party still exists. See *Port Royalists*.

JANUARY, the first month in our year, derives its name from Janus, a divinity among the early Romans. See *next article*. January was added to the Roman calendar by Numa, 713 B.C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. In 1751 the legal year in England was ordered to begin on Jan. 1, instead of March 25. See *Year*.

JANUS, * **TEMPLE OF**, at Rome, was erected by Romulus, and kept open in time of war, and closed in time of peace. During above 700 years it was shut—under Numa, 714 B.C.;

* Janus was the god of gates and avenues, and in that character held a key in his right hand, and a rod in his left, to symbolise his opening and ruling the year; sometimes he bore the number 300 in one hand, and 65 in the other, the number of its days. At other times he was represented with four heads, and placed in a temple with four equal sides, with a door and three windows on each side, as emblems of the four seasons, and the twelve months over which he presided.

at the close of the first Punic war, 235 B.C. ; and under Augustus, 29, and 25 B.C. ; during that long period of time, the Romans were continually employed in war.

JAPAN, an Asiatic empire, composed of five large and many small islands (*Nippon* the principal). It was visited by Marco Polo, the Venetian traveller, in the thirteenth century ; and by Mendez Pinto, a Portuguese, about 1535 or 1542 ; whose countrymen shortly after obtained permission to found a settlement. The Jesuit missionaries who followed made a great number of converts, who sent a deputation to pope Gregory XIII. in 1582 ; but a fierce persecution of the Christians began in 1590, aggravated it is said by the indiscreet zeal and arrogance of the Jesuits : thousands of the converts suffered death ; and in 1639, the Portuguese were utterly expelled from the empire. The Dutch trade with Japan commenced about 1600 under severe restrictions, and has since been frequently suspended. The learned Engelbert Kämpfer visited Japan in 1690, and published an account of it with plates. In the present century, the seclusion of the Japanese has been broken up.

An American expedition under commodore Parry reaches Jeddo, and is favourably received ; but remains only a few days, July 8, 1853	An attempt made to assassinate the regent, March, 1860
A treaty of commercial alliance concluded between the two countries March, 1854	A Japanese embassy visits Washington, New York, &c., in the U. States, May 14—June 30, —
A similar treaty with the British Nagasaki and Hakodadi opened to European commerce Oct., —	Received by Napoleon III. at Paris, April 13 ; in London, June ; in Holland, Prussia, &c., July—Sept., 1862
Commercial treaty with Russia Aug. 29, 1858	Attack on the British embassy at Jeddo ; some persons wounded July 5, 1861
Lord Elgin visits Japan, with a present of a steamer for the emperor, and is honourably received, July : obtains the treaty of Jeddo, opening Japan to British commerce Aug. 26, —	Japan quiet Dec. —
The secular emperor dies, aged 36 Sept. 16, —	Another attack on the English chargé d'affaires frustrated June 26, 27, 1862
	Japan disturbed ; foreign ministers leave Jeddo Aug. —

JARNAC (W. France). On March 13, 1569, the duke of Anjou, afterwards Henry III. of France, here defeated the Huguenots under Louis, prince of Condé, who was killed in cold blood by Montesquieu. The victor (seventeen years of age), on account of his success here and at Moncontour, was chosen king of Poland. He had his arm in a sling, and a moment before the battle his leg was broken by a kick from a horse.

JASMINE, or JESSAMINE, *Jasminum officinale*, grows in profusion in Persia and other countries of the East. *Ashe*. It was brought hither from Circassia, before A.D. 1548. The Catalonian jasmine came to England from the East Indies, in 1629. The yellow Indian jasmine was brought to these countries in 1656.

JASSY, the capital of Moldavia, frequently occupied by the Russians ; taken by them in 1739 and 1769. A treaty between them and the Turks was signed here Jan. 9, 1792.

JAVA, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619. See *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British Sept. 18, 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June 1813. Java was restored to Holland in 1814. In Aug. 1860, the Swiss soldiers aided by the natives here mutinied, but were soon reduced, and many suffered death.

JEAN DE LUZ, ST. (S. France, near the Pyrenees). Soult's strong position here was taken by general Hill and marshal Beresford, Nov. 10, 1813.

JEDDA, the port of Mecca, Arabia. On June 15, 1858, the fanatic Mahomedans rose and massacred 26 of the Christian inhabitants, among them the English and French consuls and part of their families ; but many fled to the shipping. On the delay of justice, commodore Pullen bombarded the town, July 25 and 26. On Aug. 6, eleven of the assassins were executed ; the ringleaders also were afterwards executed.

JEDDO, or YENDDO, the capital of Japan, on the island of Nippon, contains about 2,000,000 inhabitants. The emperor's palace is said to have a hall of audience supported by pillars of massive gold, and three towers, each nine stories high, covered with gold plates. On Dec. 23, 1854, and Nov. 11, 1855, severe earthquakes occurred : during the latter, 57 temples, 100,000 houses, and about 30,000 persons were destroyed. See *Japan*.

JE MAINTIENDRAI, "I will maintain." The motto of the house of Nassau. When William III. came to the throne of England, he continued this, but added "the liberties of England and the Protestant religion," at the same time ordering that the old motto of the royal arms, "*Dieu et mon droit*," should be retained on the great seal, 1689.

JEMAPPES (N.W. Belgium), the site of the first pitched battle gained by the French republicans (under Dumouriez), in which 40,000 French troops forced 19,000 Austrians, who were entrenched in woods and mountains, defended by redoubts and many cannon, Nov. 6, 1792. The number of killed on each side was reckoned at 5000.

JENA AND AUERSTADT (Central Germany), where two battles were fought, Oct. 14, 1806, between the French and Prussians. The French were commanded at Jena by Napoleon, and at Auerstadt by Davoust; the Prussians by prince Hohenlohe at the former place, and the king of Prussia at the latter. The Prussians were defeated, losing nearly 20,000 killed and wounded, and nearly as many prisoners, and 200 field-pieces; the French lost 14,000 men. Napoleon advanced to Berlin, and issued the Berlin decree (*which see*).

JENNERIAN INSTITUTION, founded 1803. See *Vaccination*.

JERSEY, GUERNSEY, SARK, AND ALDERNEY, appendages to the duchy of Normandy, were united to the crown of England by William I. in 1066. Jersey was attempted by the French in 1779; and on Jan. 6, 1781, a body of French troops surprised the governor, and compelled him to sign a capitulation; but major Pierson, the commander of the English troops, refusing to abide by this forced capitulation, attacked the French, and compelled them to surrender, but was himself killed.

JERUSALEM, called also **SALEM**, 1913 B.C. (*Gen.* xiv. 18). Its king was slain by Joshua, 1451 B.C. It was taken by David, 1048 B.C., who dwelt in the fort, calling it the city of David. See *Jews*.

The first temple founded by Solomon, 1012 B.C.; and solemnly dedicated on Friday . . . Oct. 30, 1004	Jerusalem taken from the Christians by Saladin 1187
Jerusalem taken and razed to the ground by Titus; more than 1,100,000 of the Jews perished . . . A.D. 70	-By the Turks, who drove away the Saracens, 1217 and 1239
A city (called <i>Ælia</i>) built on the ruins by Julius Severus in the time of Adrian . . . 130	Surrendered to the emperor Frederic II. by treaty . . . 1228
The walls rebuilt by the empress Eudoxia . . . 437	Taken by the Turks . . . 1517
Jerusalem taken by the Persians, 614; by the Saracens, 636; and by the Crusaders, when 70,000 infidels were put to the sword; a new kingdom founded . . . 1099	Held by the French under Bonaparte . . . Feb. 1799
	The protestant bishopric of Jerusalem erected, under the protection of Great Britain and Prussia . . . 1841

CHRISTIAN KINGS OF JERUSALEM.

Godfrey of Bouillon A.D. 1099	Sibyl, then his son Baldwin V. A.D. 1185
Baldwin I. 1100	Guy de Lusignan 1186
Baldwin II. 1118	Henry of Champagne 1192
Fulk of Anjou. 1131	Amauri de Lusignan 1197
Baldwin III. 1144	Jeanne de Brienne 1210
Amauri 1162	Emperor Frederic II. 1229-39
Baldwin IV. 1173	

“**JERUSALEM DELIVERED**,” the great Italian epic, by Tasso, was published in 1580.

JESTER. In some ancient works a jester is described as “a witty and jocose person, kept by princes to inform them of their faults, and those of other men, under the disguise of a waggish story.” Several of our ancient kings, particularly the Tudors, kept jesters. Rayhere, the founder of St. Bartholomew’s priory, West Smithfield, London, is said to have been a court jester and minstrel. There was a jester at court in the reigns of James I. and Charles I., but we hear of no licensed jester afterwards.

JESUITS. The society or company of Jesus was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonised. Having been wounded at the siege of Pampeluna, in both legs, in 1521, he devoted himself to theology while under cure, and renounced the military for the ecclesiastical profession. His first devout exercise was to dedicate his life to the Blessed Virgin as her knight; he next made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris in 1534. He presented the institutes of it, in 1539, to pope Paul III., who made many objections to them; but Ignatius adding to the three vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, Sept. 27, 1540, by which the number of members was not to exceed 60. That clog, however, was taken off by another bull, March 14, 1543; and popes Julius III., Pius V., and Gregory XIII. granted the society very great privileges. But though François Xavier, and other missionaries, the first brothers of the order, carried it to the extremities of the habitable globe, it met with great opposition in Europe, particularly in Paris. During the last and present centuries numerous decrees have been issued for the expulsion of the Jesuits by European governments. See *Paraguay* and *Jansenists*.

JESUITS, *continued.*

The society condemned by the Sorbonne, Paris, 1554; expelled from France, 1594; re-admitted, 1603; but after several decrees is totally suppressed in France and its property confiscated. A.D. 1764
 Ordered by parliament to be expelled from England, 1579, 1581, 1586, 1602; and finally by the Relief Act in 1829
 Expelled from—Venice, 1607; Holland, 1708; Portugal, 1759; Spain 1767

Abolished by Clement XIV. (at the meeting of the Bourbon sovereigns) July 21, 1773
 Restored by Pius VI. Aug. 7, 1814
 Expelled from—Belgium, 1818; Russia, 1820; Spain, 1820, 1835; France, 1831, 1845; Portugal, 1834; Sardinia, Austria, and other states, 1848; Italy and Sicily 1860
 The chief of the order appeals to the king of Sardinia for redress of grievances Oct. 24, —

JESUIT'S BARK (*Cortex Peruvianus*), called by the Spaniards fever-wood; discovered, it is said, by a Jesuit, about 1535. Its virtues were not generally known till 1633, when it cured of fever the lady of the viceroy at Peru. The Jesuits gave it to the sick, and hence its name. It was sold at one period for its weight in silver, and was introduced into France in 1649; and it is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680. Sir Hans Sloane introduced it here about 1700. See *Quinine*.

JESUS CHRIST, the SAVIOUR of the World, stated to have been born on Monday, Dec. 25, A.M., 4004, in the year of Rome 752; but this event should be dated four years before the commencement of the common era. See *Nativity*. The following dates are given by ecclesiastical writers. Christ's baptism by John, and his first ministry, A.D. 30. He celebrated the last passover, and instituted the sacrament in its room, on Thursday, April 2. He was crucified on Friday, April 3, at three o'clock in the afternoon. He arose April 5; ascended to heaven from Mount Olivet on Thursday, May 14, following; and the Holy Spirit descended on his disciples on Sunday, the day of Pentecost, May 24, A.D. 33. The divinity of Christ, denied by the Arians, was affirmed by the council of Nice, A.D. 325.

JEWELLERY, worn by most of the early nations, particularly by the Roman ladies. So prodigious was the extravagance of these ladies, that Pliny the elder says, he saw Lollia Paulina (the most beautiful woman of her time, and wife of Caius Cæsar, and afterwards of Caligula) wearing ornaments which were valued at 322,916*l.* sterling. Jewels were worn in France by Agnes Sorel in 1434. The manufacture was extensively encouraged in England in 1685. The standard of gold for jewellery was lowered by parliament in 1854.

JEWISH ERA. The Jews usually employed the era of the Seleucidæ until the fifteenth century, when a new mode of computing was adopted by them. Some insist strongly on the antiquity of their present era. They date from the creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years.

JEWES, a people who derive their origin from Abraham, with whom God made a covenant, 1398 B.C. *Gen.* xvii.

		KINGDOM OF ISRAEL.	
Call of Abram	B.C. 1921		
Isaac born to Abraham	1896	Jeroboam establishes idolatry	B.C. 975

Death of Solomon; the kingdom divided	975		
		KINGDOM OF JUDAH.	
		Shishak, king of Egypt, takes Jerusalem, and pillages the temple	971
		Abijah defeats the king of Israel; 50,000 men are slain in battle	957
		Hazeal desolates Judah	857
		Pekah, king of Israel, lays siege to Jerusalem; 220,000 of the men of Judah are slain in one day	741
		Sennacherib invades Judea, but the destroying angel enters the camp of the Assyrians, and in one night destroys 185,000 of them	710
		Holofernes is killed at the siege of Bethulia by Judith	656

JEWS, *continued.*

- tion day of Richard I., at the instigation of the priests . . . A.D. 1189
- 500 Jews besieged in York castle by the mob, cut each other's throats to avoid their fury . . . 1190
- Jews of both sexes imprisoned; their eyes or teeth plucked out, and numbers inhumanly butchered, by king John . . . 1204
- They circumcise and attempt to crucify a child at Norwich; the offenders are condemned in a fine of 20,000 marks . . . 1235
- They crucify a child at Lincoln, for which eighteen are hanged . . . 1255
- 700 Jews are slain in London, a Jew having forced a Christian to pay him more than 2s. per week as interest on a loan of 20s. *Stow.* . . . 1262
- Statute that no Jew should enjoy a freehold, passed . . . 1269
- Every Jew lending money on interest compelled to wear a plate on his breast signifying that he was a usurer, or to quit the realm. *Stow.* . . . 1274
- 267 Jews hanged and quartered for clipping coin . . . 1278
- 15,660 Jews banished from England. *Rapin.* . . . 1290
- Much pillaged and persecuted in France during the fourteenth and fifteenth centuries.
- A fatal distemper raging in Europe, they are suspected of having poisoned the springs, and numbers are massacred. *Langlet.* . . . 1348
- Jews are banished from Spain, Portugal, and France . . . 1492-94
- After having been banished England 370 years, they are permitted to return by Cromwell, who grants a pension to Manasseh Ben Israel . . . 1657
- Statute to compel them to maintain their protestant children, enacted, Anne . . . 1702
- Bill to naturalise the professors of the Jewish religion in Ireland (where 200 Jews then resided) refused the royal assent . . . 1746
- Statute to naturalise them, passed . . . 1753
- This act repealed on the petition of all the cities in England . . . 1754
- The Jews of Spain, Portugal, and Avignon are declared to be citizens of France . . . 1790
- Sitting of the great Sanhedrim of Paris, convened by the emperor Napoleon . . . Sept. 18, 1806
- London society for promoting Christianity among the Jews . . . 1808
- Alexander of Russia grants land on the sea of Azoph to converted Jews . . . Sept. 1, 1820
- Mr. David Salomons elected sheriff of London (the first Jewish one): an act passed to enable him to act . . . June 24, 1835
- Bill for Jewish emancipation in England, lost on the second reading by a majority in the commons, 228 against 165 . . . May 17, 1836
- Moses Montefiore, esq., elected sheriff of London; and knighted by the queen, being the first Jew on whom that honour has been conferred, . . . Nov. 9, 1837
- Ukase of the emperor of Russia, permitting the title of citizen of the first class to be held by any Jew who renders himself worthy of it . . . 1839
- Owing to the disappearance of a Greek priest, a persecution of the Jews began at Damascus. *See Damascus.* . . . Feb. 1, 1840
- Act to relieve Jews elected to municipal offices from taking oaths, &c. 9 Vict. . . 1846
- Baron Rothschild * returned to parliament for the city of London by a majority of 6619 votes: his opponent, lord John Manners, polling only 3184 . . . July 3, 1849
- Alderman Salomons * elected member for Greenwich . . . June 28, 1851
- The Jews' Oaths of Abjuration bill passed the house of commons . . . July 3, —
- Baron Rothschild again returned for the city of London at the general elections, July, 1852: March, 1857; and again in . . . July, 1857
- Violent outbreak against the Jews in Stockholm . . . Sept. 3, 1852
- The Jewish Oath bill passed in commons, April 15; thrown out in the lords, April 29, 1853
- Alderman Salomons the first Jewish lord mayor of London . . . 1855
- The Jewish Oath bill several times passed in the commons and thrown out in the lords . . . 1854-7
- Edgar Mortara, a Jewish child, forcibly taken from his parents by order of the archbishop of Bologna, on the plea of having been baptized when an infant by a Roman Catholic maid-servant . . . June 24, 1858
- An act passed enabling Jews to sit in parliament, by resolution of the house . . . July, —
- Baron Rothschild takes his seat as M.P. for London on . . . July 26, —†
- The French government having in vain urged Mortara's restoration to his parents, sir Moses Montefiore proceeds to Rome (but obtains no redress) . . . Dec. 22, —
- Alderman Salomons elected M.P. for Greenwich, and baron Rothschild for Hythe . . . Feb. 15, 1859
- Protest respecting the seizure of the boy Mortara signed at London by the abp. of Canterbury, and bishops, noblemen, and gentlemen, sent to the French ambassador, October, and presented to lord John Russell . . . Nov. —
- Oppressive laws against the Jews in the Austrian empire annulled . . . Jan. 6, 10, 1860
- Act passed permitting Jewish M.P.'s to omit from the oath the words "on the faith of a Christian" . . . Aug. 6, —
- Additional political privileges granted to the Jews in Russia, Jan. 26; and in Poland, June, 1862

JOAN OF ARC, THE MAID OF ORLEANS, the celebrated heroine of France, was born at Domremy. The English under the duke of Bedford closely besieging Orleans, Joan of Arc pretended that she had a divine commission to expel them, and Charles VII. entrusted her with the command of the French troops. She raised the siege and entered Orleans with supplies, April 29, 1429; and the English, who were before the place from Oct. 12 preceding, abandoned the enterprise May 8 following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, June 18, 1429. In her various achievements no unfeminine cruelty ever stained her conduct. She was wounded several times herself, but never shed any blood with her own hand. She was taken at the siege of Compiègne, May 25, 1430; and, to the great disgrace of the English, after a trial, was burnt for a witch at Rouen, May 30, 1431. A statue of Joan of Arc, chiselled by the late princess Marie of France, was inaugurated at Orleans, Sept. 13, 1851. *See Patay, Battle of.*

JOHN, ST., KNIGHTS OF. *See Malta.*

JOHN'S, ST. *See Newfoundland.*

* Neither were permitted to sit.

† To commemorate this event the baron endowed a scholarship in the City of London School.

JOHN'S GATE, ST., leading into St. John's-square, Clerkenwell, London, is a fine vestige of monastic building. It was the gate of the priory of St. John of Jerusalem (suppressed in 1540), and is also remarkable as the place where the first number of the *Gentleman's Magazine* was published, March 6, 1731. The house was often visited by Dr. Johnson, Garrick, and their friends.

JOHN DOE AND RICHARD ROE, names well known in the law, as standing pledges for the prosecution of suits. In early times real and substantial persons were required to pledge themselves to answer to the crown for an amercement or fine set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it. And in 1285, 13 Edw. I. sheriffs and bailiffs were, before they made deliverance of the distress, to receive pledges for the pursuing the suit, and for the return of the beasts, if return were awarded. But the whole coming to be a matter of form, the fictitious names of Doe and Roe were used until compliance with the form was declared to be no longer necessary by the Common Law Procedure Act, 15 & 16 Vict. c. 76, 1852.

JOHN O'GROAT'S HOUSE, an ancient house formerly situated on Duncan's Bay Head, the most northerly point in Great Britain, deriving its name from John of Groat, or Groot, and his brothers, originally from Holland, said to have settled here about 1489.*

JOHNSON'S CLUB. A small society of distinguished men, who, about 1763, formed themselves into a friendly club: Goldsmith, Reynolds, Burke, Gibbon, Jones, Garrick, Bennett, Langton, and Topham Beauclerk, with Johnson for president. The opinion formed of a new work by the club was speedily known all over London, and was sufficient to sell off a whole edition in a day, or to condemn the sheets to the trunk-maker and pastrycook.

JOINT-STOCK COMPANIES (good and bad) have been very numerous since 1600, particularly during the present century (especially in 1825 and 1846). Many acts have been passed for their regulation; the most important in 1857 and 1858. See *Companies*.

JOURNALS, PARLIAMENTARY. Those of the HOUSE OF COMMONS commenced in 1547. They were first ordered to be printed in 1752, when 5000*l.* were allowed to Mr. Hardinge for the execution of the work; by this means the journals can now be searched for precedents in parliamentary transactions. The journals of the HOUSE OF PEERS (commencing 1509) were ordered to be printed in 1767.

JUAN FERNANDEZ, an island in the Pacific, named from its discoverer in 1567. Alexander Selkirk, a native of Scotland, was left on shore here by his captain for mutiny in 1705. In this solitary place he lived more than four years, till he was discovered by captain Rogers in 1709. From the narrative of his proceedings, Daniel De Foe is said to have derived the hint which produced the celebrated *Adventures of Robinson Crusoe*, published in 1719.

JUBILEES. The Jews were commanded to celebrate a Jubilee every fifty years, 1491 B.C. (*Lev.* xxv. 8). Among the Christians a jubilee every century was instituted by pope Boniface VIII. in the year 1300. In the sixteenth century it was celebrated every fifty years by command of pope Clement VI. ; and was afterwards reduced by Urban VI. to every thirty-third year ; and by Sixtus V. to every twenty-fifth year.

Shakspeare's Jubilee, projected by David Garrick, was celebrated at Shakspeare's birth-place, Stratford-on-Avon Sept 6, 7, 8, 1769
Another Shakspeare festival at Stratford, April 23, 1836
National Jubilee in England on account of

George III. entering into the fiftieth year of his reign Oct. 25, 1809
Jubilee in celebration of the general peace, and of the centenary of the accession of the Brunswick family Aug. 1, 1814

JUDAH. See *Jews*.

JUDGES appointed by God, when the Israelites were in bondage, ruled from 1402 B.C. till the election of Saul as king, 1095. See *Justices, Circuits, Lord Justices, and Vice-Chancellors*.

Judges punished for bribery, and Thomas de Weyland banished A.D. 1289
William de Thorp hanged for bribery 1351
John de Cavendish beheaded by the Kentish rebels 1382
Tresilian, chief justice, executed for favouring despotism, and other judges condemned 1388

The prince of Wales said to have been committed by judge Gascoigne for assaulting him on the bench A.D. 1412
Sir Thomas More, lord chancellor, beheaded, July 6, 1535
Judges threatened with impeachment, and Berkeley taken off the bench and committed

* This house was of an octagon shape, being one room, with eight windows and eight doors, to admit eight members of the family, the heads of different branches of it, to prevent their quarrels for precedence at table, which on a previous occasion had nigh proved fatal. Each came in by this contrivance at his own door, and sat at an octagon table, at which, of course, there was no chief place or head.

JUDGES, *continued.*

by the commons, on a charge of treason,		standing the demise of the crown (by 1 Geo. III. c. 23)	1761
Three judges impeached	Feb. 13, 1641	Three additional judges appointed, one to each law court 1784: and again in	1830
Judge Jeffries committed by the lord mayor to the tower, where he died	1680	A new judge took his seat as vice-chancellor,	May 5, 1813
The judge's office made tenable for life (during good behaviour) instead of during the pleasure of the crown (by 13 Will. III. c. 2.)	1689	Two new vice-chancellors appointed	1841
Their commissions made permanent, notwithstanding	1702	A third vice-chancellor, and two new chancery judges (styled lords-justices) appointed	1851

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL. See *Privy Council*.

JUGGERNAUT, or "Lord of the World," one of the incarnations of Krishna, is an idol formed of an irregular pyramidal black stone, with two rich diamonds to represent eyes; the nose and mouth are painted vermilion. The number of pilgrims that visit the god is stated at 1,200,000 annually; a great many never return; and, to the distance of fifty miles, the way is strewn with human bones. The temple of Juggernaut has existed above 800 years. The state allowance to the temple was suspended by the Indian government in June 1851.

JUGURTHINE WAR. Jugurtha expelled his cousin Hiempsal, king of Numidia, and usurped his throne, 118 B.C. He afterwards gave him a share in the government, but killed him in 112. He then provoked the Romans to war. Cælius Metellus was first sent against him, and defeated him in two battles; and Marius brought him in chains to Rome to adorn his triumph, 106 B.C. This war has been immortalised by the pen of Sallust.

JULIAN PERIOD (invented by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the puzzling ambiguity attendant on reckoning any period antecedent to our era, an advantage which it has in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714. For *Julian era*, see *Calendar and Year*.

JULY, the seventh, originally fifth, Roman month, named by Marc Antony from *Julius*, the surname of Caesar, the dictator of Rome, who was born in it.

JUNE, the sixth month, owes its name to *Junius*, which some derive from *Juno*, and others from *Juniores*, this being for the young, as the month of May was for aged persons. Ovid, in his *Fæsti*, introduces Juno as claiming this month.

JUNIUS'S LETTERS. Junius was the assumed name of a concealed political writer, who began to publish his *Letters* in the *Public Advertiser*, Jan. 21, 1769. They were written in a nervous, sarcastic, and clear style, produced a powerful impression, and are still much admired. They have been ascribed to Mr. Burke, Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), serjeant Adair, the Rev. J. Rosenhagen, John Roberts, Charles Lloyd, Samuel Dyer, general Lee, the duke of Portland, Hugh Boyd, lord George Sackville, and sir Philip Francis. The last named is generally considered to have been the author, but the question is still undecided. Junius said, "I am the depository of my own secret, and it shall perish with me."

JUNO, the planet, discovered by M. Harding, of Lilienthal, near Bremen, Sept. 1, 1804. Its distance from the sun is 254 millions of miles, and it accomplishes its revolution in four years and 128 days, at the rate of nearly 42,000 miles an hour. Its diameter is estimated by German astronomers at 1424 English miles.

JUNONIA.* Festivals in honour of Juno celebrated at Rome, and instituted 431 B.C.

JUPITER, known as a planet to the Chaldeans, it is said 3000 B.C. The discovery of the satellites is attributed to Simon Mayr (Marius) in 1609, but more generally to Galileo on Jan. 8, 1610. See *Planets*. **JUPITER AMMON**'s celebrated temple in Libya was visited by Alexander, 332 B.C. Cambyzes' army sent against this temple perished miserably, 525 B.C.

JURIDICAL SOCIETY was established in Feb. 1855, and opened with an address by sir R. Bethell (now lord chancellor) on May 12 following.

* At these festivals the young maids ran races, and petitioned Juno to give them husbands; at Rome an altar was erected to her as the goddess of marriage, where the new-married couple offered either a white cow, geese, or ravens, from which they took the gall before they sacrificed, and threw it behind the altar, to intimate that in that state of life no bitterness of spirit should remain.

JURIES. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates real and personal, for false verdicts. *Lambard*. But by most authorities their institution is ascribed to Alfred about 886. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, statute 28 Edw. III. 1353. By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. The constitution of 1791 established the trial by jury in France. An imperial decree abolished trial by jury throughout the Austrian empire, Jan. 15, 1852.*

JUSTICES OF THE PEACE are local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority. They were first nominated by William I. in 1076. *Stow*. Persons to maintain the peace in each county were appointed by 1 Edw. III. c. 2, 1327; and their duties were defined in 1360. The form of a commission of the peace settled by the judges, 23 Eliz. 1580. *Hawkins*. See *Eyre*.

JUSTICES (LORDS) OF THE COURT OF APPEAL IN CHANCERY. Two judges of recent appointment, to give more efficiency to the administration of justice in the court of chancery; and having rank next after the chief baron of the exchequer. By 14 & 15 Vict. c. 83, "From Oct. 1, 1851, the power exercised by the lord chancellor in the court of chancery, to be exercised by the court of appeal; one judge sitting with the lord chancellor, or the two judges sitting together, to form a court of appeal; but the lord chancellor sitting alone to have a co-ordinate jurisdiction." The rt. hon. J. L. Knight-Bruce and lord Cranworth (afterwards lord chancellor) were the first lords justices; the latter was succeeded by sir G. J. Turner in 1853—(the present justices, 1862).

JUSTICIARS. In ancient times the kings of England used to hear and determine causes; but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges. The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy. After the Norman Conquest, the person invested with that power had the style of *Capitalis Justicie*, or *Justiciarius Anglie*. These judges continued until the erection of the Courts of King's Bench and the Common Pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborn, in 1067; and the last was Philip Basset, in 1261.

JUSTINIAN CODE (compiled under the direction of the emperor Justinian I.), wherein was written what may be termed the statute law, scattered through 2000 volumes, reduced to fifty; it was promulgated in A.D. 528. To this code of laws Justinian added the *Pandects*, the *Institutes*, and *Novels*. These compilations have since been called, collectively, the body of civil law (*Corpus Juris Civilis*). A digest was made in 533. *Blair*.

JUTE, the fibres of two plants, the chonch and isbund (*Corchorus olitorius* and *corchorus capsularis*), extensively cultivated in Bengal for making gunnycloth, &c. Jute has been much manufactured at Dundee as a substitute for flax, tow, &c., and in July 1862, assertions were made that it could be employed as a substitute for cotton. In 1853, 275,578 cwts., and in 1861, 904,092 cwts. of undressed jute were imported into the United Kingdom.

JUVENILE OFFENDERS. In 1838, an act was passed for instituting a prison for instructing and correcting juvenile offenders, and the military hospital at Parkhurst in the Isle of Wight was appropriated for this purpose. A similar act was passed in 1854.

* **COERCION OF JURIES.**—About the year 927, the plaintiff and defendant used to feed the jury empaneled in their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or fire, candlelight excepted, till they are unanimous. Some jurors have been fined for having fruit in their pockets, when they were withdrawn to consider of their verdict, though they did not eat it. *Leon. Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, Oct. 9, 1791. *Phillips*. In Scotland, Guernsey, Jersey, and France, juries decide by a majority: in France, since 1831, a majority of two-thirds is required.

K.

KABYLES. See *Algiers*.

KAFFRARIA, an extensive country in South Africa, extending from the north of Cape Colony to the south of Guinea. An invasion of the Kaffirs or Caffres, in the vicinity of Grahamstown, Cape of Good Hope, took place in Oct. 1831; the invaders fell upon the settlers, murdered them, burnt their houses, destroyed their crops, and carried away their cattle; this irruption was eventually suppressed by the colonial authorities. Various slighter annoyances to the colonists occurred up to Dec. 31, 1850, when sir Harry Smith, the then governor, proclaimed martial law, and ordered the inhabitants to rise *en masse* for the defence of the frontier; the Kaffirs had previously defeated our troops in several encounters, and had committed many murderous forays upon the villages. Disastrous operations against the Kaffirs in the Waterkloeff followed, and colonel Fordyce and several officers and men of the 74th regiment were killed, Nov. 6, 1851. Captain Oldham and others had just before been murdered in ambuscade or killed in sundry encounters. —Wreck of the *Birkenhead* with reinforcements from England (see *Birkenhead*), Feb. 26, 1852. The hostilities of the Kaffirs having assumed all the features of regular warfare, the governor-general Cathcart, after much forbearance, attacked them with 2000 British troops at Berea, where they numbered 6000 mounted horsemen, Dec. 20, 1852. In this action captain Faunce and 38 men were killed, and two other officers and 15 men wounded. The Kaffir loss was so severe as to compel them to sue for peace. The conditions offered by general Cathcart were accepted, and peace was restored, March 9, 1853.

KAINARDGI, Bulgaria. Here a treaty was signed, 1774, between the Turks and Russians, which opened the Black Sea, and gave the Crimea to the latter.

KALAFAT, on the Danube, opposite the fortress of Widdin. This place was fortified by the Turks under Omer Pacha when they crossed the river, Oct. 28, 1853. In December, prince Gortschakoff, with the Russian army, determined to storm their intrenchments. The conflict lasted from Dec. 31, to Jan. 9, 1854, when the Russians were compelled to retire. Among these conflicts one occurred at Citate, Jan. 6. See *Citate*. Kalafat was invested Jan. 28, and general Schilders attacked it vigorously on April 19, without success, and the blockade was raised April 21.

KALEIDOSCOPE, an optical instrument which, by an arrangement of mirrors, produces a symmetrical reflection of beautiful images, was invented by Dr. (now sir David) Brewster, of Edinburgh; it was first suggested in 1814, and the instrument perfected in 1817, when it became popular. It was intended to assist jewellers, glass-painters, and other ornamental artists, in the formation of patterns. See *Debuscope*.

KALITSCH (Poland), BATTLE OF, between the Saxons, under the French general Reynier, and the Russians under Winzingerode; an obstinate engagement, in which the former were defeated with much loss, 2000 being slain on the field, and some thousands wounded, Feb. 13, 1813.

KALUNGA FORT (E. Indies), attacked unsuccessfully by the company's forces, and general Gillespie killed, Oct. 31, 1814; and again unsuccessfully, Nov. 25. It was evacuated by the Nepaulese, Nov. 30, same year.

KAMTSCHATKA, a peninsula, E. coast of Asia, was discovered by Morosco, a Cossack chief, A.D. 1690; taken possession of by Russia, in 1697; and proved to be a peninsula by Behring, in 1728. Four months, commencing at our midsummer, may be considered as the spring, summer, and autumn here, the rest of the year being dreary winter. The amiable captain Clarke, a companion of captain Cook, died in sight of Kamtschatka, Aug. 22, 1779, and was buried at the town of St. Peter and Paul, in the peninsula.

KAMPTULICON, a substance used for flooring, patented by Elijah Galloway in 1843, and manufactured since 1851, by Messrs. Tayler, Harvey, & Co. It is composed of India-rubber and cork, combined by masticating machines.

KANGAROOS, animals indigenous to Australia, were bred at San Donato, the estate of prince Demidoff, in 1853, and since.

KANSAS, part of Louisiana, a state in the American Union, formed into a territory, 1854, was left open to slavery, in opposition to the Missouri Compromise (see *Slavery in America*). During the greater part of 1855 this state was a scene of anarchy and bloodshed through the efforts of the slavery party to make it a slave state. It was not till Jan. 21, 1861, that the senate admitted it as a free state.

KARRACK. See *Carrack*.

KARS, a town in Asiatic Turkey, renowned for its defence by gen. (now sir William) Fenwick Williams with 15,000 men and with three months' provisions, and three days' ammunition, against the Russian general Mouravieff with an army of 40,000 infantry and 10,000 cavalry. The siege lasted from June 18 to Nov. 28, 1855. The sufferings of the garrison were very great from cholera and want of food. The Russians made a grand assault on Sept. 29, but were repulsed with the loss of above 6000 men. The garrison were overcome by famine alone.* *Sandwith*. Kars was restored to Turkey, Aug. 1856.

KEEPER. See *See Lord Keeper*.

KEEPER OF THE KING'S CONSCIENCE. The early chancellors were priests, and out of their moral control of the king's mind probably grew up the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common law courts afford no redress. The keeper of the king's conscience therefore, at the present day, is the officer who presides in the court of chancery. See *Lord High Chancellor* and *Lord Keeper*.

KEEPER (LORD) OF THE GREAT SEAL OF ENGLAND differed only from the lord chancellor in that the latter had letters patent, whereas the lord keeper had none. Richard, a chaplain, was the first keeper under Ranulph, in 1116. The lord keeper had the like jurisdiction, and all other advantages, in the same degree as the lord high chancellor of England. The two offices were made one by 5 Eliz. 1562. *Cowell*. See *Lord Chancellors*. The office of lord keeper of the great seal of SCOTLAND was established in 1708, after the union.

KENILWORTH CASTLE (Warwickshire) was built in 1120, by Geoffrey de Clinton, whose grandson sold it to Henry III. It was greatly enlarged and strongly fortified by Simon de Montfort, to whom Henry gave it as a marriage portion with his sister Eleanor, but much of the pile was erected subsequently by John of Gaunt.† It was conferred on her favourite, Dudley, earl of Leicester, by queen Elizabeth, whom he afterwards entertained within its walls for seventeen days. His entertainment of the queen commenced July 19, 1575, and cost the earl daily 1000*l.*, then a vast expenditure.

KENNINGTON COMMON (Surrey). The Chartist demonstration, April 10, 1848, took place here. See *Chartists*. The common was directed to be enclosed and laid out as a public pleasure ground by 15 & 16 Vict. c. 29, June 17, 1852.

KENSINGTON PALACE, originally the residence of lord chancellor Finch, from whom it was purchased by William III. who made the road through its parks. The gardens were improved by queens Mary, Anne, and Caroline, who died within the walls of the palace. George, prince of Denmark, and George II. likewise expired here; and here queen Victoria was born May 24, 1819.‡ See *Queens*.

KENT. See *Britain* and *Holy Maid*. Odo, bishop of Bayeux, brother of William the Conqueror, was made earl of Kent, 1067; and Henry Grey was made duke of Kent in 1710; he died without male heirs in 1740. Edward, son of George III., was created duke of Kent in 1799. He was father of queen Victoria, and died in 1820. See *England*.

KENT, an East Indiaman of 1850 tons burthen, left the Downs Feb. 19, 1825, bound for Bombay, and experienced bad weather to the Bay of Biscay. Here she encountered a dreadful storm, by which she was very much shattered, Feb. 28. On the next day she accidentally took fire, and having to contend against the twofold calamity, every soul on board was in expectation of perishing either by the tempest or the flames. In this awful exigency, the *Cambria*, captain Cook, bound to Vera Cruz, providentially hove in sight, and through the heroism of her commander nearly all on board were saved, viz., 301 officers and men of the 31st regiment, 66 women, 45 children, and 139 seamen. The *Kent* shortly afterwards blew up, March 2, 1825.

* On accepting general Williams' proposal for surrendering, general Mouravieff said: "General Williams, you have made yourself a name in history; and posterity will stand amazed at the endurance, the courage, and the discipline which this siege has called forth in the remains of an army. Let us arrange a capitulation that will satisfy the demands of war, without outraging humanity." In 1856 the general was made a baronet, with the title of sir William Fenwick Williams of Kars, and granted a pension.

† After the battle of Evesham and defeat and death of Simon de Montfort, by prince Edward (afterwards Edward I.) 1265, Montfort's younger son, Simon, shut himself up in Kenilworth castle, which sustained a siege for six months against the royal forces of Henry III. to whom it at length surrendered. Upon this occasion was issued the "*Dictum de Kenilworth*," enacting that all who took up arms against the king should pay him the value of their lands for five years.

‡ In Aug. 1855, by permission of the government, a military band played in Kensington Gardens on Sundays, in presence of about 60,000 persons. The practice was discontinued in 1856, being objected to by many persons; but bands were ordered to play in other parks during the week.

KENTISH FIRE, a term given to the continued cheering which was common at the public meetings held in Kent, with the view of preventing the passing of the Catholic Relief Bill, about 1828 and 1829.

KENTUCKY, a western state of the North American Union, admitted 1792. It declared for strict neutrality in the conflict between the North and South in April 1861. It was invaded by the Southern troops in August, and on their refusal to retire, after much correspondence, the legislature of Kentucky gave in its adhesion to the Union, Nov. 27, 1861. In the campaign that ensued several sharp skirmishes took place, and on Jan. 19, 1862, the confederates under Zollicoffer were defeated and himself killed at Mill Spring, and in March no confederate soldiers remained in Kentucky. For following events, see *United States*.

KEROSELENE, a new anæsthetic, derived from the distillation of coal-tar by Mr. W. B. Merrill of Boston, U.S., was tried and made known early in 1861.

KERTCH, capital of the ancient kingdom of Bosporus, late a flourishing town on the straits of Yenikale, sea of Azof. It was entered by the allies (English and French) May 24, 1855; the Russians retired after destroying stores, &c. The place was totally dismantled by the allies, and the inhabitants removed.

KET'S REBELLION: a revolt in July, 1549, instigated by William Ket, a tanner of Norfolk. He demanded the destruction of inclosures and the dismissal of evil counsellors. The insurgents amounted to 20,000 men, but were quickly defeated by the earl of Warwick. More than 2000 fell; Ket was tried and hanged, Aug. 27, 1549.

KEW PALACE was successively occupied by the Capel family and Mr. Molyneux; by Frederick, prince of Wales, 1730, and George III. Queen Charlotte died here, Nov. 4, 1818. A new palace erected by George III. under the direction of Mr. Wyatt, was pulled down in 1827. The gardens contain a very fine collection of plants, and are decorated with ornamental buildings, most of them erected by sir William Chambers, about 1760.* Here are a temple of the Sun, a temple of Æolus, of Bellona, of Solitude, of Arethusa, and of Victory; the last in commemoration of the victory of Minden, Aug. 1, 1759.

KEYS. The invention is ascribed to Theodore of Samos, by Pliny, about 730 B.C.; but keys are mentioned in the siege of Troy, 1193 B.C. They were originally made of wood, and the earliest form was a simple crook similar to the common picklock now in use. The ancient keys now to be found in the cabinets of the curious are mostly of bronze. The antiquary Francis Douce had some of remarkable shapes, the shaft terminating on one side by the works, on the other by a ring. Keys were formerly presented by husbands to wives, and returned again upon divorce or separation.

KHERSON, an ancient Dorian colony (deriving its name from Chersonesus, a peninsula), came (about 120 B.C.) under the sway of the great Mithridates and his successors, and afterwards of that of Rome, A.D. 30. It continued an important place, and its possession was long a constant source of dispute between the Russians and Greeks. It was besieged and taken by Vladimir, grand-duke of Russia, in 988, when he and his army received Christian baptism, and he married the emperor's sister Anne, who obtained the Kherson as her dowry. The city was destroyed by the Lithuanians; and the Turks found it deserted when they took possession of the Crimea in 1475. What ancient remains the Turks and Tartars had spared, the Russians conveyed away for the construction of Sebastopol. Since the foundation of Odessa in 1792, Kherson has declined. Potemkin, the favourite of Catherine, who died at Jassy in 1791, is buried here, and John Howard, the English philanthropist, who died here Jan. 20, 1790, is buried about three miles from the town, where an obelisk has been erected to his memory.

KHIVA, in Turkistan, Asia, governed by a khan. An expedition sent against it by the emperor Nicholas of Russia in 1839 perished through the rigour of the climate in 1840.

KIDDERMINSTER (Worcestershire), renowned for its carpet manufactures, established about 1735. On April 25, 1857, a disgraceful election riot took place here, when the member Mr. Robert Lowe was seriously injured.

KIEL, chief town of Holstein, a seaport, and a member of the Hanseatic league in 1300. The university was founded in 1665. By a treaty between Great Britain, Sweden, and

* The botanic gardens contain many magnificent conservatories, &c. Mr. Aiton retired from his office of director of the botanic gardens in 1841, after fifty years' service. He was succeeded by sir William Hooker, the present director, at whose recommendation the gardens were opened to the public daily. In 1847 the royal kitchen and forcing gardens were incorporated with the botanic gardens. The valuable collections in the Museum of Economic Botany began with the private collection of sir William Hooker given by him in 1847. Under his charge the gardens have been very greatly improved.

Denmark, signed here Jan. 14, 1814, Norway was ceded to Sweden. Previously the Norwegians had been deserted by the king of Denmark, and had sent a deputation to England, to interest that country in their favour. On the contrary, the English blockaded the ports of Norway, and the Swedes entered by land. The Norwegians fought some brave actions, but they were defeated. The prince of Denmark quitted Norway, and the diet elected the king of Sweden to be their king. An extraordinary assembly of the revolted provinces, Schleswig and Holstein, met here Sept. 9, 1850.

KILCULLEN (Kildare). Here a large body of the insurgent Irish defeated the British forces commanded by general Dundas, May 23, 1798. The general in a subsequent engagement overthrew the rebels near Kilcullen-bridge, when 300 were slain.
